EDMT 9870 Advanced Research Seminar in Mathematics Education (3)

Choose three required courses (9 hours):
EDMT 8290 The Study of Learning and Instruction in Mathematics (3)
EDMT 8420 Topics in the School Mathematics Curriculum (3)
EDMT 8430 Sociocultural and Sociohistorical Issues of Mathematics Education (3)
EDMT 8550 Trends and Issues of Teaching Mathematics (3)

C. Cognate Area (18)

Required (6):
EDCI 8970 Seminar in Teaching and Learning (3)
EDCI 9660 Internship (3)

Select (12): The student and Doctoral Advisory Committee select additional coursework (12 hours).

D. Dissertation (15)

Required (15):
EDCI 9990 Dissertation (15)

Program total: Minimum of 69 semester hours

3 – Concentration Area: Music Education

A. Core Area (18)

The Core Area consists of 15 semester hours of research coursework and 3 semester hours of Social Foundation of Education and Psychology of Learning coursework.

Research Core (15 hours)

Choose one course (3):
EPRS 8500 Qualitative/Interpretive Research in Education (3)
EPRS 8530 Quantitative Methods and Analysis in Education (3)

Required (12):

A two course sequence (6 hours) in research methodology (see below for specific tracks/courses)
Two courses (6 hours) in advanced research methods as identified by the Doctoral Advisory Committee

Quantitative Methodology
EPRS 8540 Quantitative Methods and Analysis in Education II
EPRS 8550 Quantitative Methods and Analysis in Education III (3)
EPRS 8820 Program Evaluation and Institutional Research (3)
EPRS 8830 Survey Research, Sampling Principles and Questionnaire Design (3)
EPRS 8840 Meta-Analysis (3)
EPRS 8660 Bayesian Statistics (3)
EPRS 9550 Multivariate Analysis (3)
EPRS 9560 Structural Equation Modeling (3)
In addition to highly specialized research in specific areas, doctoral students in the College of Education and Human Development must possess a deep understanding of comprehensive, theoretical principles and broad ideological conceptualizations.

Through historical, philosophical, sociological, and anthropological inquiry, knowledge of social foundations fosters the types of speculative investigations essential for thorough understandings of those theoretical principles and ideological conceptualizations necessary to uphold the integrity of the Ph.D. degree.

The psychology of learning component is based on the following guiding principles: (1) Educational leaders make judgments that affect learning. (2) Doctoral students should have a substantial understanding of the psychology of learning.

Select one (3):
EPSF 8270 Philosophy of Education (3)
EPSF 8280 Anthropology of Education (3)
EPSF 8310 Sociology of Education (3)
EPSF 8320 Politics and Policy in Education (3)
EPSF 8340 History of American Education (3)
EPSF 9260 Epistemology and Learning (3)
EPY 8030 Advanced Applied Behavior Analysis (3)
EPY 8050 The Psychology of Instruction (3)
EPY 8070 Understanding and Facilitating Adult Learning (3)
EPY 8080 Memory and Cognition (3)
EPY 8180 Development During School Age (5 to 18 Years) (3)
EPY 8200 Advanced Developmental Psychology: Cognition and Intellect (3)
EPY 8220 Advanced Developmental Psychology: Personality and Socialization (3)

B. Major Area (18)

Choose three required courses from the list of courses below (9):
MUS XXXX (graduate methods course in area of focus) (3)
MUS XXXX (graduate music education elective) (3)
MUS XXXX (graduate music education elective) (3)
MUS 8980 Advanced Research Project in Music Education (3)

Required (9):
EDCI 9660 Internship (3)
EDCI 9850 Research Seminar (3)
EDCI 9900 Critique of Educational Research (3)

C. Cognate Area (15)

Required (15):
EDCI 8970 Seminar in Teaching and Learning (3)
MUS 8960 Proseminar in Music Education (3) (repeatable course taken four times)
Semester A – Current Issues & Sociology of Music Teaching and Learning
Semester B – Philosophy of Music Teaching and Learning
Semester C – History of Music Teaching and Learning
Semester D – Perception, Cognition & Creativity in Music Teaching and Learning

D. Dissertation (15)

Required (15):
EDCI 9990 Dissertation (15)

Program total: Minimum of 66 semester hours

4 – Concentration Area: Science Education

A. Core Area (18)

The Core Area consists of 15 semester hours of research coursework and 3 semester hours of Social Foundation of Education and Psychology of Learning coursework.
Research Core (15 hours)

Choose one course (3):
EPRS 8500 Qualitative/Interpretive Research in Education (3)
EPRS 8530 Quantitative Methods and Analysis in Education (3)

Required (12):

A two course sequence (6 hours) in research methodology (see below for specific tracks/courses)
Two courses (6 hours) in advanced research methods as identified by the Doctoral Advisory Committee

Quantitative Methodology

Select (15): The student and Doctoral Advisory Committee select additional coursework (15 hours).

C. Dissertation (15)

Required (15):
EDCI 9990 Dissertation (15)

Program total: Minimum of 66 semester hours

6 – Concentration Area: Teaching and Teacher Education

This concentration prepares scholars for research, practice, and policy work in teaching and the preparation of teachers. Working alongside faculty who have close connections to practice in urban schools and to the development, implementation, and evaluation of teacher education programs, graduate students will be prepared to contribute to the quality of professional practice and policy at the K-12 level, as well as in the education and development of practicing professionals.

A. Core Area (18)

The Core Area consists of 15 semester hours of research coursework and 3 semester hours of Social Foundation of Education and Psychology of Learning coursework.

Research Core (15 hours)

Choose one course (3):
EPRS 8500 Qualitative/Interpretive Research in Education (3)

EDCI 9760 Seminar in Teacher Education (3)
EDCI 9850 Research Seminar (3)
EDCI 9900 Critique of Educational Research (3)

Select (9): The student and Doctoral Advisory Committee select additional coursework (9 hours).

C. Dissertation (15)

Required (15):
EDCI 9990 Dissertation (15)

Program total: Minimum of 60 semester hours
Add-on PL-6 (Performance-Based) Leadership Certification

The add-on in Educational Leadership is designed to build the capacity of practicing educators and administrators to be effective educational leaders. The program fulfills the requirements of the Performance-Based Educational Leadership certification for the State of Georgia. Applicants for the add-on must be full time, practicing educators and be employed in a partnering school system. Because leadership certification is no longer a self-select program in the state of Georgia, applicants must receive written permission from their employers in order to participate. Applicants for the add-on must hold a specialist’s degree or higher in any education field or in other Georgia Professional Standards Commission accepted non-education fields.

Program Academic Regulations

Students must earn a “B” or higher in all courses in the add-on program. If students earn a grade below a grade of “B” in a required course, the students with the advice and consent of his or her adviser may substitute another course for that requirement.

Required (24):

- EPEL 8000 Research in Educational Leadership and Organizational Culture (3)
- EPEL 8020 Leadership for Change in a Diverse Society (3)
- EPEL 8420 Advanced Instructional Leadership (3)
- EPEL 8690 Research-Based Decision Making for School Leaders (3)
- EPEL 8970 Seminar in Educational Leadership (9)
- EPSF 8440 Curriculum Design and Analysis (3)

Following the completion of coursework, persons wishing to obtain the PL-6 certification in the State of Georgia must receive a passing score on the GACE Educational Leadership Tests.

Total hours for certification: minimum of 24 semester hours.
4685 Certificate in Instructional Design and Technology

Learning Technologies Division
233-242, 2nd Floor, College of Education building
http://ltd.education.gsu.edu/
Stephen Harmon, Chair

The online program is designed for individuals interested in working in a wide variety of education, training, and development areas such as those found in business, industry, government agencies, the military, and nonprofit organizations. This certificate is designed to meet the challenges created by technology training needs. The program emphasizes the competencies required to design, develop, facilitate, and manage education and training programs, including e-learning and human performance support systems.

The goal of the certificate program is to: 1) Help students meet the qualifications to advance within their current field related to designing, developing, facilitating, and managing education and training; and 2) Open up additional avenues for the students to pursue a career in instructional design or human performance technology.

Through a combination of classroom and hands-on activities, this program provides participants with the opportunity to design and produce learning activities that make effective use of technology in instructional development. Ample opportunities are provided for applying the competencies learned in the classroom to job-related situations.

Students who complete the Instructional Design and Technology Certificate will:

- Demonstrate knowledge of learning theories and principles, models, tools, and techniques which are applied to the systematic design of instruction
- Apply instructional design principles to the design, development, and implementation of learning activities in their work environment
- Demonstrate the ability to effectively lead the design of effective instruction through planning, development, evaluation, and management
- Demonstrate the ability to manage and lead all phases of an instructional design project

Program of Study

- LT 7100 Design of Performance and Instructional Systems (3)
- LT 7150 Analysis of Performance and Instructional Systems (3)
- LT 8150 Managing Instructional Technology Projects (3)
- LT 8440 E-Learning Environments (3)

Program Total: minimum of 12 hours
A Graduate Certificate in International Education is available from the College of Education and Human Development to eligible students enrolled as non-degree students in the College of Education and Human Development or in graduate programs at Georgia State University. To earn the certificate, students must complete a minimum of 18 credit hours with a collective GPA of 3.0 or higher in those courses.

Students must submit a proposed program of study to the Associate Dean of School, Community, International Partnerships along with syllabi for each proposed course. The specific courses to be included will be reviewed in light of the guidelines below. The program must be approved by the Associate Dean of School, Community, International Partnerships and a minimum of two College of Education and Human Development faculty associated with the International Education certificate.

In order to be eligible to earn the certificate, students must:

- be enrolled in a non-degree program in the College of Education and Human Development or in a graduate program at Georgia State University
- submit the proper form to the Associate Dean of Graduate Studies and Research officially indicating an intention to work toward earning the certificate (the form is available from the College of Education and Human Development Office of Academic Assistance and Graduate Admissions), a list of the proposed courses, and accompanying syllabi.
- complete the approved program of study coursework with a 3.0 GPA or higher.

Program of Study

The program of study for the Graduate Certificate in International Education must include the following:

International Education: Core (3 hours)

The program must include a Core course that provides an understanding of teaching, learning, and/or development from an international perspective. The lens framing this course should be comprehensive in the international focus rather than specific to a given area/country.

Select One Course (3):

- EDCI 8970 Seminar in Teaching and Learning: Global Perspectives in Literacy Education (3)
- EDRD 8280 Literacy for a Diverse Society (3)
- EPEL 7020 Leadership for a Diverse Society (3)
- EPEL 8020 Leadership for Change in a Diverse Society (3)
- EPSF 8330 Globalization and Educational Policy (3)
- EPSF 8350 Comparative Educational Systems (3)
- Other international education core courses approved by ICE faculty committee

International Education: Study Abroad (3 hours)
The program must include a minimum of 3 graduate credit hours that incorporate a study-abroad experience.

Select One Course (3):

- ECE 9810 Directed Readings in Early Childhood Education (3)
- ECE 8000 Issues in International Education (3)
- EDUC 7777 Field Experiences in International Education (3)
- EDMT 8420 Topics in Mathematics Teaching and Learning (3)
- EDMT 8430 Sociocultural and Sociohistorical Issues of Mathematics Education (3)
- EPEL 8970 Seminar in Educational Leadership (3)
- KH 7810 Directed Readings And Research In Sports Administration (3)
- KH 8680 International Experience in Sport and Exercise Science (3)
- Or other study abroad courses as approved by ICE faculty committee

International Education: Electives (12 hours)

Students may choose electives from across the university which may be broadly focused or country/region specific. The course foci may include: (a) educational issues in a specific region/country, (b) development of language expertise or background knowledge associated with a region/country, or involvement in studying/interacting/teaching with international populations who are living in our own country. After having met the Core and Study Abroad area requirements above, students may also count as electives any additional courses taken from the ones listed in those sections

Select Four Courses (12):

- CPS 7340 Social/Cultural Issues In CPS (3)
- CPS 8340 Advanced Multicultural Counseling Strategies & Interventions (3)
- ECE 6360 Culturally Responsive Pedagogy (3)
- ECE 8100 Social, Cultural, and Political Issues in Teaching and Learning (3)
- EDLA 8020 Social, Cultural, and Political Contexts Shaping Early Literacy Instruction (3)
- EDLA 8330 Language Variation and Learning (3)
- EDRD 8550 Trends and Issues in Language and Literacy Education (3)
- EDSS 8290 Learning, Curriculum & Instruction in Social Studies (3)
- EDSS 8420 Topics in the School Social Studies Curriculum (3)
- EDSS 8550 Trends and Issues in Social Studies (3)
- EPSF 7110 Multicultural Education (3)
- EPSF 8010 Cultural Studies in Education (3)
- EPSF 8040 Cultural Studies in Education: Gender (3)
- EPY 8180 Development during School Age (3)
- EPY 8220 Advanced Developmental Psychology: Personality and Socialization (3)
- KH 7200 Cultural Aspects of Sport (3)
- TSLE 7260 Cultural Issues for the Bilingual/ESL Teacher (3)
- TSLE 7440 Methods and Materials for the Bilingual/ESL Teacher (3)
- Or other internationally focused elective courses as approved by ICE faculty committee
Program Total: minimum of 18 hours
A Graduate Certificate in Qualitative Research in Education is available from the College of Education and Human Development to eligible students enrolled in a doctoral program at Georgia State University. To earn the certificate, students must complete a minimum of seven 3-credit-hour doctoral-level qualitative research methods courses with a collective GPA of 3.5 or higher in those courses, with no grade lower than a B in any course to be counted toward the certificate.

Four of the seven courses must be the following:

- EPRS 8500 Qualitative/Interpretive Research in Education I (3)
- EPRS 8510 Qualitative Research in Education II (3)
- EPRS 8520 Qualitative Research in Education III (3)
- EPSF 9260 Epistemology and Learning

The remaining three courses must be doctoral-level qualitative method courses, bearing a call number of 8000 or higher, from the approved list of certificate courses. The list is updated yearly and available in the Department of Educational Policy Studies. A current list of these courses is provided below:

- EPRS 8450 Popular Culture as Qualitative Text (3)
- EPRS 8640 Case Study Methods (3)
- EPRS 8700 Visual Research Methods (3)
- EPRS 9120 Poststructural Inquiry (3)
- EPRS 9380 / ECE 9380 Discourse Analysis (3)
- EPRS 9400 Writing Qualitative Research Manuscripts (3)
- EPRS 9920 Special Topics in Qualitative Research (3)
- ANTH 8010 Qualitative Methods in Anthropology (3)
- EPSF 9850 Historical Research in Twentieth Century American Education (3)
- EPSF 9930 Philosophical Analysis and Method (3)
- SOCI 8342 Qualitative Methods in Sociology (3)
- COMM 8160 Style and Narrative Analysis (3)
- COMM 8410 Qualitative Methods (3)
- Other Qualitative Methods courses as approved by the Certificate Coordinator and the Department Chair.

In addition, students must successfully defend a qualitative or multi-methods research dissertation. Although a faculty member from the Research, Measurement and Statistics (RMS) program of the Department of Educational Policy Studies need not be on the student’s dissertation committee, the prospectus for the dissertation must be endorsed by an appropriate member of the RMS faculty, as determined by the RMS Coordinator.
Eligibility

In order to be eligible to earn the certificate, students must:

- be enrolled in a doctoral program at Georgia State University
- have completed at least three courses from the College of Education and Human Development Doctoral Research Core, with a collective GPA in those courses of 3.5 or higher
- submit the proper form to the Department of Educational Policy Studies officially indicating an intention to work toward earning the certificate (the form is available from the Department of Educational Policy Studies or from the Office of Academic Assistance)

Normal Time to Complete Program

One additional semester with 3 courses is estimated to be additional coursework which would be included within the doctoral program timeframe because it is likely that at least 4 courses meet both the certificate and doctoral requirements. The certificate program requires 7 courses. Courses beyond the three courses in the doctoral core which meet the certificate requirements may be included in the doctoral program of study for the student based on each student’s individualized program. Typically, at least one course meeting certificate requirements beyond the three from the doctoral core would be included in the student’s doctoral program for the student’s doctoral degree.

Learning Outcomes and Assessments

The RMS faculty evaluate students on the following learning outcomes for the certificate:

- Addresses the research question(s) with appropriate methodology
- Demonstrates knowledge of previous research and/or literature in the field
- Document adheres to the standards of quality writing
- Oral presentation communicates research in a manner appropriate for the material and audience
- Potential for contribution to the discipline
- Demonstrates knowledge in the field of the certificate program in the dissertation defense

On-Time Graduation Rates

On-time graduation rate is 100% based on the College of Education and Human Development doctoral program time-frame.

Program Costs*

Graduate Tuition per credit hour: In-State $362.00; Out-of-State $1,223.00
Mandatory Student Fees per term: $1,064.00
Books and Supplies per term: $500.00
Room and Board per term: $5,262.00

*All figures are estimates only and subject to change without notice.
Occupations

The Qualitative Research in Education Certificate aids in the preparation of students to be employed as:
- Ethnology Professors (SOC 25-1062)
- Ethnologists (SOC 19-3099)
- Historians (SOC 19-3093)

You can find additional information on the Standard Occupational Classification (SOC) and occupational profiles on these professions at the U.S. Bureau of Labor Statistics and O*Net web sites: http://www.bls.gov/soc/ and http://www.onetcenter.org/.

Other Certificate Information

There is no state or accrediting agency that requires tracking placement rates. Students who receive a certificate also complete the doctoral program which is a higher credentialed program; thus, calculation of median loan debt for the certificate program is not required.
A Graduate Certificate in Quantitative Research in Education is available from the College of Education and Human Development to eligible students enrolled in a doctoral program at Georgia State University. To earn the certificate, students must complete a minimum of seven 3-credit-hour doctoral-level quantitative research methods courses with a collective GPA of 3.5 or higher in those courses, with no grade lower than a B in any course to be counted toward the certificate.

Four of the seven courses must be the following:

- EPRS 8530 Quantitative Methods and Analysis in Education I (3)
- EPRS 8540 Quantitative Methods and Analysis in Education II (3)
- EPRS 8550 Quantitative Methods and Analysis in Education III (3)
- EPSF 9260 Epistemology and Learning (3)

The remaining three courses must be doctoral-level quantitative method courses, bearing a call number of 8000 or higher, from the approved list of certificate courses. The list is updated yearly and available in the Department of Educational Policy Studies. A current list of these courses is provided below:

- EPRS 8600 Computer Use in Educational Research (3)
- EPRS 8620 Program Evaluation I (3)
- EPRS 8660 Bayesian Statistics (3)
- EPRS 8820 Program Evaluation and Institutional Research (3)
- EPRS 8830 Survey Research, Sampling Principles, and Questionnaire Design (3)
- EPRS 8840 Meta-Analysis (3)
- EPRS 8920 Educational Measurement (3)
- EPRS 9350 Introduction to Item Response Theory (3)
- EPRS 9360 Advanced Item Response Theory (3)
- EPRS 9550 Multivariate Analysis (3)
- EPRS 9560 Structural Equation Modeling (3)
- EPRS 9570 Hierarchical Linear Modeling I (3)
- EPRS 9571 Hierarchical Linear Modeling II (3)
- EPRS 9600 Advanced Computer Methods in Educational Research (3)
- EPRS 9900 Research Design (3)
- PSYC 8430 Psychological Research Statistics (3)
- Other Quantitative Methods courses as approved by the Certificate Coordinator and the Department Chair

In addition, students must successfully defend a quantitative or multi-methods research dissertation. Although a faculty member from the Research, Measurement and Statistics (RMS) program of the
Department of Educational Policy Studies need not be on the student’s dissertation committee, the prospectus for the dissertation must be endorsed by an appropriate member of the RMS faculty, as determined by the RMS Coordinator.

Eligibility

In order to be eligible to earn the certificate, students must:

- be enrolled in a doctoral program at Georgia State University
- have completed at least three courses from the College of Education and Human Development Doctoral Research Core, with a collective GPA in those courses of 3.5 or higher
- submit the proper form to the Department of Educational Policy Studies officially indicating an intention to work toward earning the certificate (the form is available from the Department of Educational Policy Studies or from the Office of Academic Assistance)

Normal Time to Complete Program

One additional semester with 3 courses is estimated to be additional coursework which would be included within the doctoral program timeframe because it is likely that at least 4 courses meet both the certificate and doctoral requirements. The certificate program requires 7 courses. Courses beyond the three courses in the doctoral core which meet the certificate requirements may be included in the doctoral program of study for the student based on each student’s individualized program. Typically, at least one course meeting certificate requirements beyond the three from the doctoral core would be included in the student’s doctoral program for the student’s doctoral degree.

Learning Outcomes and Assessments

The RMS faculty evaluate students on the following learning outcomes for the certificate:

- Addresses the research question(s) with appropriate methodology
- Demonstrates knowledge of previous research and/or literature in the field
- Document adheres to the standards of quality writing
- Oral presentation communicates research in a manner appropriate for the material and audience
- Potential for contribution to the discipline
- Demonstrates knowledge in the field of the certificate program in the dissertation defense

On-Time Graduation Rates

On-time graduation rate is 100% based on the College of Education and Human Development doctoral program time-frame.

Program Costs*

Graduate Tuition per credit hour: In-State $362.00; Out-of-State $1,223.00
Mandatory Student Fees per term: $1,064.00
Books and Supplies per term: $500.00
Room and Board per term: $5,262.00
*All figures are estimates only and subject to change without notice.

**Occupations**

The Quantitative Research in Education Certificate aids in the preparation of students to be employed as:
- Statistics Professors (SOC 25-1022)
- Survey Research Professors (SOC 25-1069)
- Survey Researchers or Survey Methodologists (SOC 19-3022)
- Program Analysts (SOC 13-1111)
- Research Methodology and Quantitative Methods (SOC 15-2041) for Statisticians
- Research Methodology and Quantitative Methods (SOC 11-9199) for Managers and All Others

You can find additional information on the Standard Occupational Classification (SOC) and occupational profiles on these professions at the U.S. Bureau of Labor Statistics and O*Net web sites: http://www.bls.gov/soc/ and http://www.onetcenter.org/.

**Other Certificate Information**

There is no state or accrediting agency that requires tracking placement rates. Students who receive a certificate also complete the doctoral program which is a higher credentialed program; thus, calculation of median loan debt for the certificate program is not required.
4720 Coaching Endorsement

Department of Early Childhood and Elementary Education
550 College of Education Building
404-413-8020
http://ece.education.gsu.edu/
Barbara Meyers, Chair
Sue Duncan, Executive Director

The Department of Early Childhood and Elementary Education offers graduate courses in literacy which apply to Georgia’s Coaching Endorsement. These courses focus on four areas (a) understanding literacy – the reading and writing process, (b) linking assessment and instruction, (c) using instructional strategies in specific content areas and (d) professional development, supervision and systematic change.

The Coaching Endorsement – Literacy presupposes certification at least at the Master’s level. Successful completion of application sequences (Reading Recovery Teacher Leader Strand) qualifies a person for the master’s, or specialist level endorsement, depending on the current level of certification. This endorsement qualifies an individual to be considered ‘in field’ as a coach at the level of the base certificate. Teachers pursuing the coaching endorsement are enrolled as non-degree students in specific programs for certification in either the concentration for Reading Recovery Teacher Leaders or the concentration for Literacy Coach Certificate.

Reading Recovery Teacher Leader Concentration

Strand 1:

Understanding Literacy – Reading and Writing Process/Linking Assessment and Instruction

- ECE 8300 Reading Recovery Theory I (3)
- ECE 8360 Reading Recovery Clinical for Leaders I (3)

Strand 2:

Understanding Literacy – Struggling Readers and Writers/Linking Assessment and Instruction

- ECE 8310 Reading Recovery Theory II (3)
- ECE 8320 Reading Recovery Theory III (3)
- ECE 8370 Reading Recovery Clinical for Leaders II (3)

Strand 3: Using Instructional Strategies in Specific Content Areas/Professional Development, Reflective Analysis of Teaching and Systematic Change

- ECE 8380 Reading Recovery Clinical for Leaders III (3)
- ECE 8700 Reading Recovery Supervision (3)

Literacy Coach Certificate Concentration
Theory and Research (6):

- ECE 7980 Theory and Practice in Literacy (3) or EDRD 7600 Theory and Pedagogy in the Study of Reading (3)
- ECE 7964 Comprehensive Literacy Model for School Improvement (3)

Practicum/Field Experience (9):

- ECE 7981 Supervision and Organization of Reading Programs (3) or EDRD 8610 Supervision of School Literacy Programs (3)
- ECE 7982 Professional Experiences in Reading (3) or EDCI 7660 Practicum I (3)
- ECE 7983 Literacy Coaches as Agents of Change (3)

Curriculum Framework (3):

- ECE 7984 Curriculum Design and Evaluation (3)
The Comprehensive Intervention Model (CIM) is a well-coordinated, Response to Intervention seamless design for providing intervention services to struggling readers. The CIM is a systemic model for reversing the reading failures of struggling readers through layered interventions, including differentiated classroom instruction and supplemental interventions in small groups or one-to-one. The goal is two-fold. In grades K-3 the goal is to increase the overall literacy achievement by the end of the third grade and to reduce the number of children identified with learning disabilities within 1.5% or less of the general population. In grades 4-6, interventions focus on research-based strategies for reading and writing in the content areas.

The system goal of the CIM is to change the achievement profile of a school by providing:

- research-based interventions that increase the literacy levels of low-performing children, and
- training and professional development for teachers that increase their knowledge and expertise in teaching the lowest performing children.

Prerequisites

In addition to completing the Comprehensive Intervention Model (CIM) Institute the previous summer, participants are required to have completed ECE 7963 Practicum in Interventions or be a trained Reading Recovery teacher, Reading Recovery teacher leader or Literacy Collaborative coordinator. Candidates must be employed as an interventionist in a school setting.

Program of Study

This year-long program of study focuses on preparing K-6 educators to differentiate reading and writing instruction within a range of settings for students experiencing difficulty in literacy learning. The training consists of intensive study of the Comprehensive Intervention Model Framework and focuses on gaining in-depth knowledge and skills in designing and implementing a portfolio of small-group interventions for K-6 students. Intervention candidates complete 6 hours of academic credit. Intervention candidates continue to work full-time in their school districts in addition to completing coursework.

ECE 7963 Practicum in Interventions (3) is required for teachers who have not been Reading Recovery trained.
ECE 7965 Intervention Designs for Struggling Readers (3) is completed in fall and spring semesters for a total of 6 hours. The course is required for teachers who are training in the Comprehensive Intervention Model.
4740 ESOL Endorsement

Department of Middle and Secondary Education
639 College of Education Building
404-413-8060
http://mse.education.gsu.edu/
Gertrude Tinker Sachs, Chair

English to Speakers of Other Languages (ESOL) Endorsement

The Department of Middle and Secondary Education of the College of Education and Human Development and the Department of Applied Linguistics and English as a Second Language of the College of Arts and Sciences offer graduate courses in bilingual/English as a second language to give teachers additional training to work with non-English speaking or limited English speaking students at the early childhood, middle childhood, and secondary school levels.

Successful completion of the following coursework and completion of a portfolio demonstrating competencies established for ESOL teachers by TESOL qualifies a person for the bachelor’s, master’s, or specialist level endorsement, depending upon the students’ current level of certification. The program presupposes certification at least at the bachelor’s level. Students must be admitted as graduate students to the College of Education and Human Development. (See the program description for the M.Ed. major in Reading, Language, and Literacy Education for application of TSLE courses to a degree program. Students who do not hold an initial certification in a teaching field may apply to the M.A.T. major in Reading, Language, and Literacy Education to receive initial certification in ESOL and a reading endorsement.)

Required (6):

- EDCI 7660 Practicum I (3)
- TSLE 7440 Methods and Materials for the Bilingual/English as a Second Language Teacher (3)

Select one (3):

- AL 8250 Second Language Acquisition (3)
- TSLE 7250 Applied Linguistics for the Bilingual/English as a Second Language Teacher (3)

Select one (3):

- AL 8330 Intercultural Communication (3)
- TSLE 7260 Cultural Issues for the Bilingual/English as a Second Language Teacher (3)

Total hours for endorsement: minimum of 12 semester hours
English to Speakers of Other Languages (ESOL) Online Endorsement

The Department of Middle and Secondary Education offers online graduate courses in bilingual/English as a second language that apply to the Georgia ONmyLINE non-degree English as a Second Language Endorsement. The non-degree GOML ESOL Endorsement provides teachers with additional training to work effectively with non-English-speaking or limited-English-speaking students at the early childhood, middle childhood, and secondary school levels. The GOML non-degree ESOL Endorsement is approved by the State of Georgia Professional Standards Commission.

Successful completion of the Georgia ONmyLINE non-degree ESOL endorsement course work and a portfolio qualifies a person for the bachelor’s, master’s, or specialist level endorsement, depending upon his or her current level of certification. Students seeking only the non-degree GOML ESOL endorsement must be admitted to the graduate program in the College of Education and Human Development as a non-degree GOML student. All courses in the Georgia ONmyLINE non-degree ESOL Endorsement must be completed online through Georgia ONmyLINE; no other courses may apply.

Required Georgia ONmyLINE Courses for the Non-degree ESOL Endorsement:

- EDCI 7660 Practicum I
- TSLE 7250 Applied Linguistics for the Bilingual/English as a Second Language Teacher
- TSLE 7260 Cultural Issues for Bilingual/English as a Second Language Teacher
- TSLE 7440 Methods and Materials for Bilingual/English as a Second Language Teacher

Total Program Hours: 12 semester hours
The Initial Certification program in Early Childhood Special Education offers two certification options, including:

- Early Childhood Special Education-General Curriculum (certified to teach all core subjects for children from preschool through 5th grade with and without disabilities included in the general curriculum)
- Special Education Preschool (certified to teach children 3-5 years old with disabilities)

Pre-Service Certificate: Upon admission to a teacher education program, students will be contacted by the College’s Office of Academic Assistance office with instructions to claim enrollment in their program and submit a GaPSC Pre-Service Certificate Application. The pre-service certificate is required for placement in required field experiences or clinical practice.

Certification: Students must post passing scores on the GACE Content Assessment, Georgia Educator Ethics – Program Exit (360) Assessment, and edTPA in order to be recommended by Georgia State University for clear, renewable certification.

Requirements for Certification in Early Childhood Special Education-General Curriculum:

Prerequisite Courses (21):

- EDMT 7400 Mathematics Concepts for Special Learners (3)
- EDRD 6600 Introduction to Materials and Methods in Reading Instruction (3)
- EDRD 7550 Literacy Assessment and Curriculum Development OR EDRD 7650 Individualized Literacy Assessment and Instruction (3)
- EPY 2050 Human Growth and Development (3)
- EXC 4020 Characteristics and Instructional Strategies for Students with Disabilities (3)
- EXC 7030 Applied Behavior Analysis (3)
- EXC 4650 Opening School Experience (0)
- EXC 7929 Practicum I: Early Childhood (3)

Program Courses (27):

- EXC 7000 Collaboration with Parents and Professionals (3)
- EXC 7010 Language Development and Language Disabilities (3)
- EXC 7190 Alternative Approaches to Literacy Instruction for Students with Disabilities (3)
- EXC 7300 Assistive Technology: Reading and Academics (3)
- EXC 7320 Methods of Teaching Low Functioning Students with Autism Spectrum Disorders (3)
• EXC 7330 Physical and Health Management of Students with Disabilities (3)
• EXC 7650 Characteristics of Young Children with Disabilities (3)
• EXC 7660 Methods of Teaching Young Children with Disabilities (3)
• EXC 7939 Practicum II: Early Childhood (3)

Requirements for Certification in Special Education Preschool:

• EXC 7010 Language Development and Language Disabilities (3)
• EXC 7650 Characteristics of Young Children with Disabilities (3)
• EXC 7660 Methods of Teaching Young Children with Disabilities (3)
Initial Certification in Special Education Adapted Curriculum (Intellectual Disabilities) course of study is for students seeking only teacher certification. Certification only students complete a planned program that leads to a College of Education and Human Development recommendation to the Professional Standards Commission for certification K-12 as a teacher of Special Education Adapted Curriculum. The focus of the coursework is students with moderate, severe, and profound mental retardation.

**Pre-Service Certificate:** Upon admission to a teacher education program, students will be contacted by the College’s Office of Academic Assistance office with instructions to claim enrollment in their program and submit a GaPSC Pre-Service Certificate Application. The pre-service certificate is required for placement in required field experiences or clinical practice.

**Certification:** Students must post passing scores on the GACE Content Assessment, Georgia Educator Ethics – Program Exit (360) Assessment, and edTPA in order to be recommended by Georgia State University for clear, renewable certification.

**Prerequisite Courses**

- EDRD 6600 Introduction to Materials and Methods in Reading Instruction (3)
- EPY 2050 Human Growth and Development (3)
- EXC 4020 Characteristics and Instructional Strategies for Students with Disabilities (3)
- EXC 4650 Opening School Experience (0)
- EXC 7925 Practicum I: Intellectual Disabilities (3)

**Program Courses**

- EXC 7030 Applied Behavior Analysis (3)
- EXC 7250 Characteristics of Severe Intellectual Disability and Autism (3)
- EXC 7280 Methods of Teaching Students with Severe Disabilities (3)
- EXC 7281 Adapted/Functional Curriculum for Students with Severe Disabilities (3)
- EXC 7935 Practicum II: Severe Intellectual Disability (3)
Applicants who hold a bachelor’s degree and clear, renewable teaching certification in an area of regular education or special education and are highly qualified in a content area based on coursework may apply to this program. Applicants must be teachers or paraprofessionals in classrooms of students who are deaf or hard of hearing, or they must submit a letter from a school superintendent verifying access to deaf or hard of hearing students.

**Pre-Service Certificate:** Upon admission to a teacher education program, students will be contacted by the College’s Office of Academic Assistance office with instructions to claim enrollment in their program and submit a GaPSC Pre-Service Certificate Application. The pre-service certificate is required for placement in required field experiences or clinical practice.

**Certification:** Students must post passing scores on the GACE Content Assessment, Georgia Educator Ethics – Program Exit (360) Assessment, and edTPA in order to be recommended by Georgia State University for clear, renewable certification.

**Prerequisites**

- EXC 4020 Characteristics and Instructional Strategies for Students with Disabilities (3) or similar introduction to special education course (3)
- EPY 2050 Human Growth and Development or equivalent (3)
- EXC 4650 Opening School Experience (0)

**Required Courses**

- CSD 6480 Hearing Science and Disorders (3)
- EXC 7350 Psychosocial Characteristics of Deafness (3)
- EXC 7360 Language Development in Students Who are Deaf/Hard of Hearing (3)
- EXC 7390 Reading and Writing Instruction for Deaf/Hard of Hearing (3)
- EXC 7400 Methods of Teaching Students who are Deaf/Hard of Hearing (3)
- EXC 7430 Auditory and Speech Development in Students Who are Deaf/Hard of Hearing (3)
- EXC 7940 Practicum: Deaf/Hard of Hearing (3)

Candidates must post a rating of “Intermediate” on the Signed Language Proficiency Interview (SLPI) before admission to EXC 7940 Practicum.

**Total hours for certification: minimum of 21 Hours**
A student can earn a teaching certificate in either “Special Education (P-12) General Curriculum” or “Special Education (P-12) Adapted Curriculum”. The certificate is determined based on the characteristics of pupils with autism spectrum disorders the student is, or plans on, working with and the Praxis II or GACE completed. Either certification results in the student being uniquely qualified to educate children and youth with autism spectrum disorders. Students who wish only certification can apply to the non-degree program and take the courses that lead to certification, enabling them to be better prepared to educate individuals with autism spectrum disorders.

**Pre-Service Certificate:** Upon admission to a teacher education program, students will be contacted by the College’s Office of Academic Assistance office with instructions to claim enrollment in their program and submit a GaPSC Pre-Service Certificate Application. The pre-service certificate is required for placement in required field experiences or clinical practice.

**Certification:** Students must post passing scores on the GACE Content Assessment, Georgia Educator Ethics – Program Exit (360) Assessment, and edTPA in order to be recommended by Georgia State University for clear, renewable certification.

**Required Courses**

- EDRD 6600 Introduction to Materials and Methods in Reading Instruction (3)
- EPY 2050 Human Growth and Development (3)
- EXC 4020 Characteristics and Instructional Strategies for Students with Disabilities (3)
- EXC 4650 Opening School Experience (0)
- EXC 7030 Applied Behavior Analysis (3)
- EXC 7190 Alternative Approaches to Literacy Instruction for Students with Disabilities (3)
- EXC 7250 Characteristics of Severe Intellectual Disability and Autism (3)
- EXC 7280 Methods of Teaching Students with Severe Disabilities (3)
- EXC 7310 Strategies for Challenging Behaviors (3)
- EXC 7315 Assessment and Curricular Planning for Students with Autism Spectrum Disorders (3)
- EXC 7320 Methods for Teaching Low-Functioning Students with Autism Spectrum Disorders (3)
- EXC 7325 Methods for Teaching High-Functioning Students with Autism Spectrum Disorders (3)
- EXC 7926 Practicum I: Autism (3)
- EXC 7936 Practicum II: Autism (3)
- EDRD 7650 Individualized Literacy Assessment and Instruction (3) is also required for students who wish to acquire the Reading Endorsement.
The Special Education program is a teaching certification sequence in special education for certification in Special Education General Education Curriculum: Consultative. This is a nondegree, initial certification program for students who already hold an undergraduate degree from an accredited college or university. Students seeking admission to this initial certification program must have a minimum cumulative GPA of 2.75 and have passing scores on the GACE Program Admission Assessment or be exempt based on equivalent SAT, ACT or GRE scores, and complete the Georgia Educator Ethics – Program Entry (350) Assessment.

**Pre-Service Certificate:** Upon admission to a teacher education program, students will be contacted by the College’s Office of Academic Assistance office with instructions to claim enrollment in their program and submit a GaPSC Pre-Service Certificate Application. The pre-service certificate is required for placement in required field experiences or clinical practice.

**Certification:** Students must post passing scores on the GACE Content Assessment, Georgia Educator Ethics – Program Exit (360) Assessment, and edTPA in order to be recommended by Georgia State University for clear, renewable certification.

The sequence of required certification courses are as follows:

- EPY 2050 Human Growth and Development (3)
- EXC 4010 Characteristics of Students with Disabilities (3)
- EXC 4650 Opening School Experience (0)
- EXC 6560 Educational Evaluation of Students with Disabilities (3)
- EXC 6570 Individual and Classroom Management (3)
- EXC 6580 Instructional Methods for Students with Behavior Learning Disabilities (3)
- EXC 6590 Functional and Social Methods for Students with Behavior Learning Disabilities (3)
- EXC 6661 Practicum I: Special Education General Curriculum: Consultative (3)
- EXC 6671 Partnerships and Practicum II: Special Education General Curriculum: Consultative (3)
- EXC 7190 Alternative Approaches to Literacy Instruction for Students with Disabilities (3)
- EDRD 6600 Introduction to Material and Methods of Reading Instruction (3)
- EDRD 7650 Individual Literacy Assessment and Instruction (3)

**Total hours for certification:** 33 semester hours

Students may not transfer any core special education coursework into the certification program. Students may be given credit for EPY 2050 if prior appropriate coursework can be documented. Students must become highly qualified in reading by completing the Reading Endorsement, through passing EDRD 6600, EXC 7190, and EDRD 7650, and completing a reading portfolio as required. Students must receive a
satisfactory grade of “B” or better in all core special education courses. Students who do not receive a grade of “B” or better must retake the course and satisfactorily pass the course prior to taking additional special education core coursework in the program. A course may be repeated once. Students who do not satisfactorily pass a course after two attempts will be administratively withdrawn from the program.

Evaluation of a student's performance is continuous and involves consideration of each student’s performance in all academic settings. Inappropriate or unprofessional conduct by any student may result in the student being dropped from a course or program. If such removal from a course is necessary, the student will receive the grade of “F” and may be judged ineligible to re-enroll in the course. Georgia State University will only recommend an individual for their certification who has completed a program approved by the College of Education's Professional Education Faculty and developed under the guidance of a faculty advisor.
4810 Initial Certification in Special Education Physical and Health Disabilities

Department of Educational Psychology, Special Education and Communication Disorders
835 College of Education Building
404-413-8040
http://esc.education.gsu.edu/
Laura Fredrick, Chair

The Initial Certification in Special Education Physical and Health Disabilities Program (formally known as the Orthopedic Impairments program) prepares teachers to instruct students in the special education category of orthopedic impairments. This includes students with a wide range of physical impairments, neuromotor impairments, degenerative diseases, and severe health impairments who may have additional cognitive/learning or sensory impairments. To prepare teachers to instruct students with orthopedic impairments, a wide range of coursework is provided which includes such areas as characteristics, specialized instructional strategies to teach academics, specialized curricular areas, physical and health management, and assistive technology.

Certification only students complete a planned program that leads to the College of Education and Human Development recommendation to Professional Standards Commission for certification in Special Education Physical and Health Disabilities (P-12). This certification will make these teachers eligible to instruct students who are in the special education category of orthopedic impairments.

Pre-Service Certificate: Upon admission to a teacher education program, students will be contacted by the College’s Office of Academic Assistance office with instructions to claim enrollment in their program and submit a GaPSC Pre-Service Certificate Application. The pre-service certificate is required for placement in required field experiences or clinical practice.

Certification: Students must post passing scores on the GACE Content Assessment, Georgia Educator Ethics – Program Exit (360) Assessment, and edTPA in order to be recommended by Georgia State University for clear, renewable certification.

Prerequisite Courses

- EDMT 7400 Mathematics Concepts for Special Learners (3)
- EDRD 6600 Introduction to Materials and Methods in Reading Instruction (3)
- EPY 2050 Human Growth and Development (3)
- EXC 4020 Characteristics and Instructional Strategies for Students with Disabilities (3)
- EXC 4650 Opening School Experience (0)
- EXC 7030 Applied Behavior Analysis (3)
- EXC 7927 Practicum I: Physical and Health Disabilities (3)

Program Courses

- EXC 7260 Characteristics of Severe and Multiple Disabilities (3)
- EXC 7290 Methods for Teaching Students with Physical and Multiple Disabilities: Reading and
Academics (3)
- EXC 7300 Assistive Technology: Reading and Academics (3)
- EXC 7330 Physical and Health Management of Students with Disabilities (3)
- EXC 7937 Practicum II: Physical and Health Disabilities (3)
This endorsement is intended for teachers who hold a clear, renewable certificate, level 4 or higher in one of the following areas: Early Childhood Education, Middle Grades – Mathematics, or Special Education General Curriculum/Early Childhood Education. Other areas of Special Education are eligible to enroll if they have a core academic content concentration in mathematics. Requirements for the K-5 Mathematics Endorsement include 15 hours of concentrated coursework in elementary (PreK-5) mathematics education. Students must be admitted to the university and may be enrolled as a non-degree student or pursuing another advanced degree.

Required (15):

ECE 7393 Number and Operation in the Elementary Classroom (3)
ECE 7394 Geometry and Measurement in the Elementary Classroom (3)
ECE 7395 Rational Numbers and Algebra in the Elementary Classroom (3)
ECE 7396 Data Analysis and Probability in the Elementary Classroom (3)
ECE 7740 Internship in Early Childhood Classroom I (3)

Total hours for endorsement: minimum of 15 semester hours
This endorsement is intended for teachers who hold a clear, renewable certificate, level 4 or higher in early childhood education (P-5) or another eligible field specified in GaPSC Educator Preparation Rules and are interested in adding additional expertise in science education to their certificate. Requirements for the K-5 Science Endorsement include 12 hours of concentrated coursework in elementary (K-5) science education. Students must be admitted to the university and may be enrolled as a nondegree student or pursuing another advanced degree.

Required (12):

- ECE 8420 Essentials of Elementary Science (3)
- ECE 8430 Mastery of Elementary Science (3)
- ECE 8440 Leadership in Elementary Science (3)
- ECE 7740 Internship in Early Childhood Classroom I (3)

Students must complete a portfolio as an exit requirement.

Total hours for endorsement: minimum of 12 semester hours
The Literacy Coach Certificate is also referred to as the Partners in Comprehensive Literacy (PCL) program.

The Partners in Comprehensive Literacy (PCL) is a research-based companion program to the Comprehensive Intervention Model (CIM). PCL is a systemic school improvement model based on the principles of apprenticeship learning. Inherent to the model is the coaching and mentoring feature. The series of courses for Literacy Coach Certificate are designed to prepare individuals for supporting accountability with a school-wide assessment system using multiple ways for evaluating student achievement; providing embedded professional development for teachers; assisting with the development of a well-designed school-wide literacy plan; and with assisting teachers to expand their knowledge and expertise particularly in providing differentiated classroom instruction.

With the growing need to support classroom teachers serving diverse populations, there is an increased demand for embedded professional development as well as coaching and mentoring within school settings. Thus the demand for school-based literacy coaches has increased over the past few years. Also, teachers serving as literacy coaches desire to further develop their knowledge and expertise to increase their effectiveness as an instructional facilitator/coach.

The certificate program focuses on specialized coursework for preparing teachers to serve as highly qualified teachers/coaches equipped to collaborate across classrooms, with school administrators, parents and community representatives in order to improve student achievement.

The Literacy Coach/Instructional Facilitator certificate program is an 18-hour program of study designed for students who already have a master’s degree or a minimum of 9 hours of appropriate reading coursework, and are seeking specialized training as an Instructional Facilitator/Literacy Coach. The training is restricted to candidates employed as a literacy coach in a school setting.

The admission requirements for the Literacy Coach Certificate program follow the same standards for admission to a non-degree graduate program. A Baccalaureate degree from a regionally accredited college or university with a grade point average of no less than 2.50 (4.0 scale). In addition, the candidate must have a valid teaching license (Georgia or other state); a master's degree or a minimum of 9 hours of appropriate reading coursework; and be employed as a literacy coach in a school setting.

Program of Study

Theory and Research (6 hours)
- ECE 7980 Theory and Practice in Literacy (3) or EDRD 7600 Theory and Pedagogy in the Study of Literacy (3)
- ECE 7964 Comprehensive Literacy Model for School Improvement (3)

Practicum/Field Experiences (9 hours)

- ECE 7981 Supervision and Organization of Reading Programs (3) or EDRD 8610 Professional Learning and Leadership of Literacy (3)
- ECE 7982 Professional Experiences in Reading (3) or EDCI 7660 Practicum I (3)
- ECE 7983 Literacy Coaches as Agents of Change (3)

Curriculum Framework (3 hours)

- ECE 7984 Curriculum Design and Evaluation
4850 Preschool Special Education Endorsement

Department of Educational Psychology, Special Education and Communication Disorders
835 College of Education Building
404-413-8040
http://esc.education.gsu.edu/
Laura Fredrick, Chair

In addition to full field teacher certification preparation, Georgia State University offers preparation for state certification endorsements in some specific areas of training, service, and leadership. All such programs require acceptable teaching or appropriate school experiences and admission to the College of Education and Human Development as graduate students. Program applicants must be fully certified teachers.

All coursework for the Preschool Special Education endorsement must be completed with a grade of “B” or higher.

Nine semester hours of coursework are required for endorsement in preschool special education for professionals holding teacher certification in early childhood education, special education, or speech language pathology. Completion of the coursework requirements below, as designated, qualifies the students for endorsement in preschool handicapped education.

Required (6):

- EXC 7650 Characteristics of Young Children with Disabilities (3)
- EXC 7660 Methods of Teaching Young Children with Disabilities (3)

Select one (3):

- CSD 4320 Introduction to Language Disorders (3)
- EXC 7010 Language Development and Language Disabilities (3)

Total hours for endorsement: minimum of 9 semester hours
The Department of Early Childhood and Elementary Education offers graduate courses in literacy which apply to Georgia’s Reading Endorsement for classroom teachers. These courses focus on three areas (a) understanding readers and the reading process, (b) linking assessment and instruction, and (c) using instructional strategies in specific content areas.

The Reading Endorsement Program presupposes certification at least at the bachelor’s level. Successful completion of application sequences (Reading Recovery Teacher Strand or Reading Recovery Teacher Leader Strand) qualifies a person for the bachelor’s, master's, or specialist level endorsement, depending on the current level of certification. This endorsement qualifies an individual to be considered ‘in field’ in reading at the level of the base certificate. Teachers pursuing the reading endorsement are enrolled as nondegree students in specific programs for certification as a Reading Recovery Teacher or a Reading Recovery Teacher Leader.

**Strand 1: Understanding Readers and the Reading Process/Linking Assessment and Instruction**

- ECE 7360 Reading Recovery Clinical for Teachers I (3)
- ECE 8300 Reading Recovery Theory I (3)
- ECE 8360 Reading Recovery Clinical for Leaders I (3)

**Strand 2: Understanding Readers and the Reading Process**

- ECE 7370 Reading Recovery Clinical for Teachers II (3)
- ECE 8310 Reading Recovery Theory II (3)
- ECE 8320 Reading Recovery Theory III (3)
- ECE 8370 Reading Recovery Clinical for Leaders II (3)

**Strand 3: Using Instructional Strategies in Specific Content Areas**

- ECE 7380 Reading Recovery Clinical for Teachers III (3)
- ECE 8380 Reading Recovery Clinical for Leaders III (3)
The Department of Middle and Secondary Education and the Department of Educational Psychology, Special Education, and Communication Disorders offer graduate courses in literacy which apply to Georgia’s Reading Endorsement for classroom teachers. These courses focus on three areas (a) understanding readers and the reading process, (b) linking assessment and instruction, and (c) using instructional strategies in specific content areas. All students who wish to obtain a reading endorsement must attend a MSE orientation session and complete an exit requirement of a portfolio. The portfolio will be aligned with the PSC requirements and will require the demonstration of the ability to teach reading at the applicable levels of the base certificate.

The Reading Endorsement Program presupposes certification at least at the bachelor’s level. Successful completion of three of the following courses qualifies a person for the bachelor’s, master’s, or specialist level endorsement, depending on the current level of certification. This endorsement qualifies an individual to be considered ‘in field’ in reading at the level of the base certificate. Teachers pursuing the reading endorsement may be enrolled as nondegree students or may be enrolled in specific programs.

Strand 1: Understanding Readers and the Reading Process

Select one (3):

- EDRD 6600 Introduction to Materials and Methods in Reading Instruction (3)
- EDRD 7600 Theory and Pedagogy in the Study of Literacy (3)

Strand 2: Linking Assessment and Instruction

Select one (3):

- EDRD 7550 Literacy Assessment and Curriculum Development (3)
- EDRD 7650 Individualized Literacy Assessment and Instruction (3)

Strand 3: Using Instructional Strategies in Specific Content Areas

Select one (3):

- EDRD 7630 Literacy in the Content Areas (3)
- EXC 7190 Alternative Approaches to Literacy for Students with Disabilities (3)

Total hours for endorsement: minimum of 9 semester hours
The Department of Middle and Secondary Education offers online graduate courses in literacy that apply to the Georgia ONmyLINE non-degree Reading Endorsement for classroom teachers. These courses focus on three areas (a) understanding readers and the reading process, (b) linking assessment and instruction, and (c) using instructional strategies in specific content areas. The GOML non-degree Reading Endorsement is approved by the Georgia Professional Standards Commission.

The Georgia ONmyLINE non-degree Reading Endorsement program presupposes certification at least at the bachelor’s level. Successful completion of the Georgia ONmyLINE non-degree Reading Endorsement course work and a portfolio qualifies a person for the bachelor’s, master’s, or specialist level endorsement, depending on his or her current level of certification. This endorsement qualifies an individual to be considered “in field” in reading at the level of the base certificate. Students seeking only the non-degree GOML Reading Endorsement must be admitted to the graduate program in the College of Education and Human Development as a non-degree GOML student. All courses in the Georgia ONmyLINE non-degree Reading Endorsement must be completed online through Georgia ONmyLINE; no other courses may apply.

Required Georgia ONmyLINE Courses for the Non-degree Reading Endorsement:

- EDRD 7600 Theory and Pedagogy in the Study of Literacy (3)
- EDRD 7630 Literacy in the Content Areas (3)
- EDRD 7650 Individualized Literacy Assessment and Instruction (3)
- EDCI 7660 Practicum I (3)

Total Program Hours: 12 semester hours
The program for training in Reading Recovery prepares teachers to observe, assess, and address reading problems in children in the first grade, using assessment, observation, and early intervention/prevention and teaching procedures developed by Dr. Marie Clay. Two levels of training are offered: teacher training and teacher leader training.

The Georgia State University Reading Recovery Program meets the requirements established by Professor Marie M. Clay, the faculty of The Ohio State University College of Education, and the Reading Recovery Council of North America (RRCNA). It has been granted a royalty free license to use the name “Reading Recovery” in conjunction with the program.

This program is a fixed sequence with enrollment fall through spring term. Admission to the program occurs once a year, and a school district and/or consortia must submit a site application and supporting materials. (Call 404/413-8024 for materials required for such applications.) The program begins in the summer with the Observation Survey Institute.

Students selected for training in Reading Recovery must apply for admission to an appropriate level of graduate study (e.g., nondegree, M.Ed., Ed.S., graduate transient) in the College of Education and Human Development and must meet published criteria for admission.

A student must earn a cumulative grade point average of 3.00 in Reading Recovery courses to become a registered Reading Recovery teacher or teacher leader. Completion of Reading Recovery Teacher Training or Reading Recovery Teacher Leader Training qualifies the completer for the Georgia Teacher Certification Reading Endorsement.

Teacher Training Level

Teacher Training prepares teachers to observe, assess, and select children for Reading Recovery understanding; to teach children using Reading Recovery methods and procedures; to make informed instructional decisions using records and materials unique to the program; to accelerate the progress of Reading Recovery children to meet the average level of reading achievement in each child’s classroom; and to communicate with other teachers, principals, parents, and their peers about the effectiveness of the program and its impact in the school and community.

Teachers in training continue to work full time in their school districts in addition to attending class once each week. Teacher training requires school and district support to release the in-training teacher from classroom duties at least half time for one academic year. This requirement allows the teacher in training to work with four children in his or her school for 30 minutes per day, five days per week.
Applicants must hold a bachelor’s degree and a current teaching certificate, among other criteria. Contact the department for further details.

Teachers in training enroll in the following courses for academic credit:

Required Fall Term (6):

- ECE 7360 Reading Recovery Clinical for Teachers I (3)
- ECE 7370 Reading Recovery Clinical for Teachers II (3)

Required Spring Term (3):

- ECE 7380 Reading Recovery Clinical for Teachers III (3)

Program total: minimum of 9 semester hours

Students enrolled in the M.Ed. Elementary Education with a concentration in Elementary Literacy in Reading Recovery may apply ECE 7360, ECE 7370, ECE 7380 to the program.

Because of the special nature of this program, students who withdraw will not be able to complete the program unless they apply to enter a later cycle. The faculty of the Georgia State University Reading Recovery Program reserves the right to refuse admission to any student who applies for a program cycle after having withdrawn from a previous cycle.

Teacher Leader Training Level

Teacher Leader Training prepares teachers to implement Reading Recovery in their home systems or regions; to recruit, select, and train teachers in Reading Recovery observation and teaching methods; to select children for service and assess their progress in the program; to supervise Reading Recovery teachers; to evaluate and oversee teaching decisions using record keeping materials unique to the program; to conduct public and professional awareness sessions for school systems and communities; to conduct research on the effectiveness of the program; and to teach children using Reading Recovery techniques, procedures, and methods.

Teacher leader training requires support from the trainee’s home system, private school association, or consortium. Trainees are expected to attend a yearlong study program full time where they are trained through coursework, clinical sessions, and field experience. Teacher leaders must hold a minimum of a master’s degree and meet other criteria for selection. (Contact the department for further details.)

Because the training of Reading Recovery teachers and Reading Recovery teacher leaders is different, students previously trained as Reading Recovery teachers who are later selected for teacher leader training will be required to complete the entire training sequence.

Teacher leaders in training enroll in the following courses for academic credit:

Required Fall Term (12):
- ECE 8300 Reading Recovery I (3)
- ECE 8360 Reading Recovery for Leaders (3)
- ECE 8370 Reading Recovery Clinical for Leaders II (3)
- ECE 8700 Reading Recovery Supervision (3)

Required Spring Term (15):

- ECE 8310 Reading Recovery Theory II (3)
- ECE 8320 Reading Recovery Theory III (3)
- ECE 8380 Reading Recovery Clinical for Leaders III (3)
- ECE 8390 Reading Recovery Clinical for Leaders IV (3)
- ECE 8700 Reading Recovery Supervision (3)

Program total: minimum of 27 semester hours
5000 Byrdine F. Lewis School of Nursing and Health Professions

Graduate programs in the Byrdine F Lewis School of Nursing and Health Professions are described in detail in this chapter. See subsections for specific program information as well as policies and procedures.

5010 General Information

The Byrdine F Lewis School of Nursing and Health Professions is committed to the preparation of professionals in the areas of Nursing, Nutrition, Physical Therapy and Respiratory Therapy. The graduate programs build on undergraduate education and prepare the students for advanced practice, research, and leadership. The programs are designed to meet the health and human service needs of the citizens of Georgia. Involvement in research and practice in the urban community is encouraged. The programs are responsive to the needs of both full-time and part-time students and to students entering both first and second careers. Courses are delivered through a variety of modes including classroom and laboratory instruction, web-based instruction, and distance technology.

5010.10 Office of the Dean

404-413-1100
snhp.gsu.edu

Nancy Kropf, Dean
Andrew Butler, Associate Dean for Research
Lynda Goodfellow, Associate Dean for Academic Affairs

5010.20 Accreditation

The Doctor of Physical Therapy (DPT) degree program is accredited by the Commission on Accreditation in Physical Therapy Education. The Coordinated Program in Dietetics is accredited by the Accreditation Council for Education In Nutrition and Dietetics (ACEND). The Integrated Program (IP) in the Division of Respiratory Therapy leading to the Master’s of Health Sciences with a concentration in Respiratory Therapy is accredited for entry into the profession of respiratory care by the Committee on Respiratory Care Education (CoARC).

5010.30 Degrees Offered

The School of Nursing and Health Professions offers the following graduate programs:

- Master of Science: major in health sciences (concentrations in nutrition and respiratory therapy)
- Master of Science: major in nursing (concentrations in adult health-gerontology CNS/NP, pediatric primary care NP, psychiatric/mental health NP, family nurse practitioner and nursing leadership in healthcare innovations.)
- Post-Master’s Certificates in all clinical areas in nursing
- Doctor of Nursing Practice
- Doctor of Philosophy: major in nursing (focus in health promotion, protection, and restoration in vulnerable populations)
- Doctor of Physical Therapy

5020 Admissions

A person seeking to pursue any of the school’s programs of graduate study must be admitted to Georgia State University through the Byrdine F Lewis School of Nursing and Health Professions. The requirements for admission stated in the following sections are established by the School of Nursing and Health Professions and the department of the program. Acceptance into one of the programs in the School of Nursing and Health Professions does not imply acceptance into another College/School in the University.

Georgia State University welcomes applications from all qualified individuals regardless of race, color, sex, religion, creed, age, sexual orientation, gender, disability, veteran status or national origin. Admission is based on a number of factors including, but not limited to, an applicant’s academic record, test scores, experience, circumstances, good conduct and character. Admission is a competitive, selective process and meeting minimum requirements does not guarantee acceptance.

Absent extenuating circumstances, good disciplinary standing at previously attended colleges and universities is a condition of admission for all applicants. For purposes of admission, good disciplinary standing means that the applicant has no pending disciplinary charges, outstanding disciplinary sanctions or disciplinary issues that would prevent the applicant from re-enrolling at previously attended post-secondary institutions.

Applicants with a criminal and/or disciplinary history who are determined to be otherwise admissible for a respective term based on their academic record and other credentials are required to complete an admissions background review process before an admission decision is made by the university. Instructions for completing that review process are communicated to the applicant after the university has determined that the applicant is otherwise admissible for that term.

Omissions or misrepresentations on an application for admission are grounds for automatically invalidating consideration by, acceptance to and continuation at Georgia State. Applicants have a duty to update their application with Georgia State when information changes after application submission.

Graduate Admissions Appeals

The Chair of the academic department of the graduate program and the Vice President for Enrollment Management and Student Success and Vice Provost are the President’s designees for purposes of hearing Graduate Admissions Appeals.

Applicants for graduate program admissions who are denied admission due to academic ineligibility may appeal the denial to the department chair within twenty (20) calendar days of the date of the denial letter. The decision of the department chair is final.
Applicants for graduate admission who are denied for reasons related to disciplinary/criminal history or falsification of application may appeal the denial to the Vice President for Enrollment Management and Student Success and Vice Provost within twenty (20) calendar days of the date of the denial letter. The decision of the Vice President for Enrollment Management and Student Success and Vice Provost is final.

**Notice to applicant of background review requirements**

The University requires applicants who have a criminal or disciplinary history to complete a background review. Please contact the Background Review Records Coordinator at 404-413-1515 for information regarding completion of the review process as soon as possible to ensure timely processing of your application.* The Background Review Records Coordinator will let you know what supplemental documentation you will need to provide to complete the process. You may be required to provide documentation such as:

1. a personal statement explaining the circumstances surrounding criminal or school disciplinary violations, and the current status of any charges and sanctions;
2. copies of criminal or school disciplinary records; and
3. a background check (if you have a criminal history);

Please note that a final admission decision cannot be made until you complete all requirements of the admissions background review process. *Applications may be withdrawn from review if the background review process is not initiated within two weeks.

**Master of Science in Nursing**

The master’s program in nursing is open to registered nurses who wish to continue their education by obtaining an advanced degree. There are two admission options: RNs with a baccalaureate degree in nursing and RNs prepared at the associate or diploma level that have had outstanding practice experience and professional involvement. RNs who do not have a baccalaureate degree in nursing must complete additional undergraduate course work as prerequisites to master’s course work. The determination of required undergraduate course work is based on an evaluation of each applicant’s past academic work and on current undergraduate requirements for the baccalaureate nursing program.

Nursing accepts students into the master’s degree options each semester with the exception of the Pediatric Primary Care concentration which only accepts in the spring and the Nursing Leadership concentration which only accepts in the fall. The application deadline for both summer and fall semesters is February 1 for the regular Masters and March 1st for the Nursing Leadership. The application deadline for spring semester is September 1.

The following materials are required for admission:

1. Application for Graduate Study, and supplemental application for specific program option.
2. A $50 application fee.
3. Two copies of official transcripts from all colleges attended.
4. Two letters of recommendation from individuals knowledgeable of the applicant’s professional and academic abilities; if you have completed your undergraduate nursing degree within past five years, one letter must come from a former professor.
5. Current vitae or resume including education, work experience and professional development, professional and/or community activities, research and publications.

6. Official scores on the Test of English as a Foreign Language (TOEFL), for applicants whose native language is not English. See section on “International Admissions” for more information.

7. A written statement identifying your educational /professional goals and the purpose for applying to the specific graduate option.

8. A two-page position paper on a current social or health issue (APA style)

10. Official scores from either the Miller Analogies Test (MAT), which is preferred, or the Graduate Record Examination (GRE)

Additional requirements include the following:

1. Graduation from an accredited nursing program.

2. A cumulative grade point average (GPA) of 2.75 on a 4.00 scale. The GPA is based on all undergraduate college-level course work attempted at regionally accredited institutions.

3. Registration as a professional nurse in Georgia or another U.S. state and evidence of application to the Georgia Board of Nursing.

4. One to two years of clinical practice in the specialty area for master’s education is preferred for applicants in the clinical practice specialist.

Application information and materials are available on the School’s website http://nursing.gsu.edu/academics/admissions/.

Admission Status

Full Graduate Status: Admission to the master’s program is contingent upon the availability of faculty and clinical resources. Applicants who meet all admissions guidelines based upon faculty review may be admitted to full graduate status.

Provisional Graduate Status: Students who do not meet all admission criteria MAY be admitted on a provisional basis. These students are limited to nine semester hours of study. These nine hours of study are determined and authorized by the student’s faculty advisor. Courses that must be included in the program of study for provisional students include NURS 7310 Advanced Pathophysiological Concepts in Nursing, Part 1 and NURS 7320 Advanced Pathophysiological Concepts in Nursing, Part 2 and one of the following: NURS 7550 (Pharmacology), NURS 7900 (Theoretical Foundations for Advanced Practice Nursing), or NURS 7000 (Research Methods for Advanced Practice Nurses). A grade of B must be achieved in each course during the provisional status period (9 credits); no course may be repeated. If a B is not achieved in each course, then the student will be withdrawn from the program. If a GPA of 3.0 is achieved (with at least a B in each course in the 9 credit course plan), and upon recommendation of the Master’s Program Committee, the student is admitted to full graduate status and will receive a letter notifying him or her of the change in status.

Post Master’s Certificate

The Post-Master’s certificate program is open to all registered nurses who hold a master’s degree in
Nursing. Post-Master's certificate applicants have to meet the same admissions requirements as Masters’ degree applicants. Both Master’s degree and Post-Master’s Certificate admissions requirements can be found in the Graduate Admissions section under Nursing, Master of Science or Post-Master’s Certificate. The length of time to complete the certificate varies depending on your academic history and the courses taken in the MS Nursing program but generally takes one to two years.

Doctor of Philosophy in Nursing

The Nursing program accepts students into the doctoral program in the fall semester only. The application deadline is February 1.

The following materials are required for admission:

1. Application for Graduate Study.
2. A $50 application fee.
3. Two copies of official transcripts from all colleges attended.
4. Three letters of recommendation from individuals knowledgeable of the applicant’s professional, intellectual, and academic abilities.
5. Current vitae or resume including education, work experience and professional development, professional and/or community activities, research, and publications.
6. Statements of professional goals and research area of interest.
7. A two-page position paper on a current social or health issue.
8. Official scores on the Graduate Record Examination (GRE).
9. Official scores on the Test of English as a Foreign Language (TOEFL), for applicants whose native language is not English. See section on “International Admissions” for more information.
10. A Certificate of Immunization.

Additional requirements include the following:

1. Master’s degree in nursing. Applicants who hold a master’s degree in an area other than nursing must have (1) a bachelor’s degree in nursing, (2) a background in advanced clinical nursing practice, and (3) evidence of either previous course work in nursing theory or an individualized learning program in nursing theory.
2. Licensure/Certification. All applicants (including international applicants) must hold a license in the United States as a registered nurse (R.N. license) prior to acceptance to the doctoral program.
3. An interview with a Nursing faculty member.
4. Applicants must have completed a graduate-level intermediate statistics course within the past five years prior to admission, OR must complete a graduate-level intermediate statistics course by the end of the first enrolled semester in the doctoral program.

Doctor of Nursing Practice

The Nursing program accepts students into the doctoral program in the fall semester only. The priority application deadline is April 1.

The following materials are required for admission:
1. Application for Graduate Study.
2. A $50 application fee.
3. Two copies of official transcripts from all colleges attended.
4. Three letters of recommendation from individuals knowledgeable of the applicant’s professional, intellectual, and academic abilities.
5. Current vitae or resume including education, work experience and professional development, professional and/or community activities, research, and publications.
6. Statements of professional goals and research area of interest.
7. A two-page position paper on a current social or health issue.
8. Official scores on the Test of English as a Foreign Language (TOEFL), for applicants whose native language is not English. See section on “International Admissions” for more information.

Additional requirements include the following:

1. Must have had a graduate level stats course before the first semester of the DNP program
2. Master’s degree in nursing from an accredited nursing program
3. Current RN licensure in state of residency and/or practice
4. Current advance practice nurse certification for CNS, NP, CNRA and CNM applicants
5. Actively practicing as an advanced practice nurse (CNS, NP, CNRA, CNM, administration and informatics)
6. Minimum two years of clinical experience
7. Recommended grade point average of 3.2 in master’s degree program (3.5 is preferred)

Nursing Non Degree Admission

Non-degree status is granted on an individual basis in the graduate nursing programs. Applicants must possess a bachelor’s of science degree with a major in nursing to be eligible to take master’s courses. Applicants must have a GPA of 2.75 or greater to take master’s level nursing courses. Applicants wishing to take a doctoral course must have a master’s degree. Instructor permission is required for course enrollment. Admission to non-degree status does not warrant or secure admission to the degree program. Students with non-degree status may take up to a maximum of six credit hours of graduate coursework without admission to the nursing program.

Application information and materials are available on School’s website http://snhp.gsu.edu/academics-admissions/graduate-admissions/nondegree-status/

Nutrition, Master of Science in Health Sciences

IMPORTANT: The four courses listed below are required prerequisites to the M.S. degree program in Nutrition. These courses must be completed prior to admission. If you wish to complete or update the required prerequisites at Georgia State University, you can apply through the Office of Undergraduate Admissions at admissions.gsu.edu for postbaccalaureate status.

Inorganic Chemistry (1 semester)

(GSU CHEM 1151K or equivalent)
Organic Chemistry (1 semester)

(GSU CHEM 1152K or equivalent)

Human Anatomy and Physiology (2 semesters)

(GSU BIOL 2110K and BIOL 2120K or equivalent)

Additionally, a biochemistry course (NUTR 6700 or equivalent) and a normal nutrition and metabolism course (NUTR 6500 or equivalent) are prerequisites to graduate coursework. They may be taken after acceptance into the graduate program. The biochemistry and nutrition/metabolism courses must have been completed within 10 years prior to beginning the graduate program if they are not taken as part of the graduate program.

The Master of Science program accepts students into the program each semester. The application deadline for summer semester is April 1, fall semesters is May 15 and for spring semester is October 1.

The selection of potential degree candidates for the Master of Science degree program in Health Sciences is competitive. Admission is based upon the quality of the undergraduate record, achievement on required admission tests, and suitable preparation for the specific degree program to be pursued. All applicants must be graduates of accredited institutions with baccalaureate degrees and meet other requirements listed below.

The following materials are required for admission:

1. Application for Graduate Study.
2. A $50 application fee.
3. Supplemental Application for the Master of Nutrition
4. Two letters of recommendation from individuals knowledgeable of the applicant’s professional, intellectual, and academic abilities
5. Statement of Professional Goals

In addition to the materials required for program admission, the Department of Nutrition requires the following for applicants to the specialization in nutrition:

1. A minimum grade point average of 3.0 in all college-level coursework.
2. A rank in the 50th percentile or greater on both the Graduate Record Examination (GRE) Verbal Reasoning and Quantitative Reasoning measures.
3. A resume (curriculum vita) outlining professional, educational, and volunteer experience and special skills, such as proficiency in languages other than English.
4. Two letters of recommendation.
5. A statement of professional goals.
6. College-level courses with laboratory experiences in anatomy, physiology, inorganic chemistry, and organic chemistry. Biochemistry and normal nutrition (nutrition and metabolism) are prerequisites for many graduate courses. These courses must have been completed within 10 years prior to taking graduate courses for which they are prerequisites. They may be taken at the beginning of the graduate program but do not confer graduate credit.
Students may be admitted in Fall and Spring semesters to the specialization in nutrition. The application deadline for fall semester is May 15 and the application deadline for spring semester is October 1. Students planning full time course loads are strongly urged to enter in fall semester to maximize availability of courses due to sequencing.

Application information and materials are available on the School’s website http://nutrition.gsu.edu/academics/graduate-admissions/.

Nutrition, Master of Science in Health Sciences, Coordinated Program

**IMPORTANT:** The four courses listed below are required prerequisites to the M.S. degree program in Nutrition. These courses must be completed prior to admission. If you wish to complete or update the required prerequisites at Georgia State University, you can apply through the Office of Undergraduate Admissions at www.gsu.edu/admissions for postbaccalaureate status.

- Inorganic Chemistry (1 semester)
  
  (GSU CHEM 1151K or equivalent)

- Organic Chemistry (1 semester)
  
  (GSU CHEM 1152K or equivalent)

- Human Anatomy and Physiology (2 semesters)
  
  (GSU BIOL 2110K and BIOL 2120K or equivalent)

Additionally, a biochemistry course (NUTR 6700 or equivalent) and a normal nutrition and metabolism course (NUTR 6500 or equivalent) are prerequisites to graduate coursework. They may be taken after acceptance into the graduate program. The biochemistry and nutrition/metabolism courses must have been completed within 10 years prior to beginning the graduate program if they are not taken as part of the graduate program.

Applicants to this program must meet the requirements for admission to the Master of Science in Health Science in Nutrition, including the Nutrition Specialization requirements listed above. They must also have completed an undergraduate course in anthropology, psychology, or sociology. Additionally, they must submit the supplemental application that is available online. Undergraduate majors from Didactic Programs in Dietetics who hold a ACEND Verification Statement listing completion date or ACEND Declaration of Intent to Complete Form with anticipated completion date must apply for this program January 15 for early admission or April 15th for a Summer Semester start date. All other applications are due May 15 for a Fall Semester start date.

The Coordinated program accepts students twice a year. The application deadline for summer semester is April 1, fall semester is May 15 and for spring semester is October 1.

Doctor of Physical Therapy
Candidates for admission to the entry-level doctor of physical therapy degree program must be able to demonstrate abilities to meet certain technical standards of performance necessary to carry out their activities as health professionals. They must demonstrate the functional use of their senses that will allow them to elicit appropriate information to perceive nonverbal communications from patients or clients. They must be able to communicate effectively and efficiently in oral and in written form. Additionally, each candidate should be physically able to provide reasonable care and emergency treatment when necessary.

All candidates must possess those intellectual, ethical, physical, and emotional attributes required to undertake the full curriculum and to achieve the levels of competence required by the faculty. They must possess the emotional health required for full utilization of these abilities in order to exercise good judgment in their activities as health professionals.

Prerequisites

The D.P.T. curriculum demands rigorous scholarly effort. Students with diverse strengths and backgrounds are encouraged to apply to the program. To gain admission, students must possess a baccalaureate degree from an accredited college or university. The baccalaureate degree must be completed prior to matriculation into the D.P.T. program. The baccalaureate degree should be in a student’s area of interest. The program is designed for the person with an undergraduate degree in a field other than physical therapy.

- Students are required to complete the following prerequisite courses:
  - 2 courses in anatomy and/or physiology
  - 2 courses in physics
  - 2 courses in chemistry
  - 1 course in statistics
  - 1 course in biology
  - 1 course in psychology
- A rank in the 50th percentile or greater on both the Graduate Record Examination (GRE) Verbal Reasoning and Quantitative Reasoning measures. The minimum required score on the Analytic Writing section score is 3.5.
- A cumulative undergraduate grade point average (GPA) of 3.0 is recommended. A GPA of 3.0 in prerequisite courses is required.
- Documentation of volunteer and/or work experience in two physical therapy practice settings. A total of 80 hours of service is required with at least 20 hours of observation in each setting. The experience must be documented, and the documents must be signed by a supervisor who can attest to the applicant’s presence and the nature of the activities. The program is competitive, and the admissions application, cumulative GPA, prerequisite GPA, GRE scores, and Interview are utilized to rank applicants for admission.

The following materials are required for admission:

1. Application for Graduate Study and supplemental materials for the program.
2. A $50 application fee.
3. Two copies of official transcripts from each college attended.
4. Official scores from the Graduate Record Examination (GRE).
5. Official scores on the Test of English as a Foreign Language (TOEFL), for applicants whose native
Selected applicants are invited to campus for an interview with the faculty, clinical instructors and students of the Department of Physical Therapy.

Students are accepted into the program once a year and the program begins in the summer semester. The application deadline is generally nine to twelve months prior to the anticipated semester of entry. Application information is available on the School’s website http://physicaltherapy.gsu.edu/graduate-admissions/.

Respiratory Therapy, Master of Science in Health Sciences

The selection of potential degree candidates for the Master of Science degree program in Health Sciences is competitive. Admission is based upon the quality of the undergraduate record, achievement on required admission tests, and suitable preparation for the specific degree program to be pursued. All applicants must be graduates of accredited institutions with baccalaureate degrees and meet other requirements listed below for the specialization areas.

Individuals are admitted into the program in one of two categories: Full Graduate Status, which includes provisional status, or nondegree status.

**Full Graduate Status**

Full Graduate Status must be achieved in order to fulfill all degree requirements. Required materials include the following:

1. Application for Graduate Study and supplemental applications, if applicable.
2. A $50 application fee.
3. Two copies of official transcripts from all colleges attended.
4. Official scores from the Graduate Record Examination (GRE).
5. Official scores on the Test of English as a Foreign Language (TOEFL), for applicants whose native language is not English. See section on “International Admissions” in this chapter for more information.
6. A Certificate of Immunization

**Provisional Status**

Applicants who do not meet one or more of the admissions standards for Full Graduate Status and who, in the opinion of the faculty, have the potential to be successful in graduate study, may be admitted to Provisional Status. Students admitted to this status must satisfy the requirements stated on their admission letter to continue in Full Graduate Status. Students are admitted to this status at the option of the division and when adequate facilities are available.

**Respiratory Therapy Specialization**
In addition to the materials required for program admission, the Department of Respiratory Therapy requires the following for applicants to the specialization in respiratory care:

1. A minimum grade point average of 3.0 in all college-level course work.
2. A rank in the 50th percentile or greater on both the Graduate Record Examination (GRE) Verbal Reasoning and Quantitative Reasoning measures.
3. Bachelor of Science/Arts degree in respiratory therapy or related field.
4. Resumé (C.V.) outlining professional and educational experience, with two professional references listed.
5. If you already have your bachelor’s degree in respiratory therapy, evidence of credentialing as a registered respiratory therapist (RRT), a copy of National Board of Respiratory Care (NBRC) credentials.

Provisional Status

Applicants who do not meet one or more of the admissions standards for Full Graduate Status and who, in the opinion of the faculty, have the potential to be successful in graduate study, may be admitted to Provisional Status. Students admitted to this status must satisfy the requirements stated on their admission letter to continue in Full Graduate Status. Students are admitted to this status at the option of the department and when adequate facilities are available.

Respiratory Therapy Nondegree Status

Nondegree Status is provided to accommodate selected students who do not plan to seek the master’s degree. Additionally, this status may be used to accommodate selected students who have the potential for graduate study but, at the time of application, are not able to fulfill all the requirements for admission to Full Graduate Status. A student is admitted to this status at the option of the department concerned. Admission to this status does not warrant or secure admission to the degree program. Students in Nondegree Status are limited to 12 semester hours of graduate course work.

Applications are accepted for the fall and spring semesters only. The application deadline for fall is May 15 and September 15 for spring and January 15 for summer. Application information and materials are available on the School’s website http://snhp.gsu.edu/academics-admissions/graduate-admissions/nondegree-status/.

5020.10 Transient Student Admission

A student enrolled in a graduate degree program at another accredited institution may seek admission as a transient student in the school. Admission requirements include an application, application fee, certificate of immunization, and a letter of good standing from the institution the applicant is presently attending. The letter must include the courses approved by the home institution. The application must be printed/downloaded from the website http://snhp.gsu.edu/academics-admissions/graduate-admissions/transient-status/.

Admission to transient status is normally for one semester only. A transient student who wishes to enroll for a subsequent semester at Georgia State must file an Application for Reentry with the School of Nursing.
and Health Professions Office of Academic Assistance. Students must be in good Academic Standing at Georgia State University in order to continue as transient students at the University. Transient students who are not in good academic standing will not be allowed to continue taking courses as transient students in the School of Nursing and Health Professions per the University Reentry Definition see section 1110.10 in this catalog. If the student wishes to enroll in courses other than those listed in the original letter of good standing, the home institution must submit a new letter indicating approval of those courses.

Although the university cannot guarantee the availability of space in desired courses, every effort will be made to assist students in the registration process. The student is responsible for requesting that transcripts of grades earned at Georgia State be sent to the home institution. Transient students who do not remain in good academic standing at Georgia State University may not be allowed to continue taking courses in the School of Nursing and Health Professions.

5020.20 International Student Admission

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The University subscribes to the principles of international education and to the basic concept that only through education and understanding can mutual respect, appreciation and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus because we believe in a cultural exchange program which will be beneficial to our own student body, to the international students involved, and to metropolitan Atlanta.

- **Academic Credentials:** Applicants who have completed all or part of their education outside the United States are required to have their foreign credentials evaluated by an independent evaluation service. For graduate admissions, the School of Nursing and Health Professions recommends Josef Silny and Associates, Inc. (www.jsilny.com). The school will also accept evaluations of foreign credentials from Educational Credential Evaluators, Inc. (www.ece.org) and World Education Services (www.wes.org). If Josef Silny & Associates is used as the independent evaluation service, transcripts do not have to be provided by the applicant. Academic credentials must be original documents with authoritative signatures, seals, stamps, etc. Whenever possible, these should be sent by the institution responsible for issuing such documents. In cases where it is impossible for an applicant to have these credentials sent from such institutions, the applicant should forward a duly “notarized” or “attested to” copy. The notarization should be done by the proper institutional official or by the Ministry of Education in the home country. Documents in a language other than English must be accompanied by translations. Translations should be made by the home country embassy or an appropriate official, and the original copies of the translations, acceptably notarized as described above, must be provided. As a general rule, documents translated by the Office of the American Friends of the Middle East (AFME) or the Institute of International Education (IIE) will be acceptable.

- **English Proficiency:** In addition to meeting the regular admission requirements, international applicants whose native language is not English must submit official scores on the Test of English as a Foreign Language (TOEFL) before admission can be considered. Scores cannot be more than two years old. The test is not required of international applicants who have received a bachelor’s degree from a regionally accredited U.S. institution.
Financial Resources: Applicants who plan to attend Georgia State University on an F-1 or J-1 visa must submit a Financial Statement showing the financial support necessary for the costs associated with the first year of study.

Course Load: The international student with a student visa is required to carry a full course of study in fall and spring semester. A full course of study at Georgia State University is nine semester hours for graduate students. International students cannot be admitted as non degree students.

5020.30 Changing Semester of Entry

Admission to a graduate program in the School of Nursing and Health Professions is valid only for the semester, the degree, the major and the concentration specified in the letter of acceptance. A student who does not enroll for the semester for which acceptance was granted should notify the school of their decision to change their semester of entry. In most programs, students who do not enroll for the semester they are accepted are not guaranteed admission in a subsequent semester. Students generally have to reapply to the program and must be reconsidered for admission.

5020.40 Reentry Students

A reentry student is a student who has been enrolled at Georgia State University and who:

1. Has not registered for courses at Georgia State during the previous 12 months; or
2. Attended any semester as a transient student and wishes to attend an additional semester as a transient student.

Graduate students in the School of Nursing and Health Professions may only reenter the same graduate program or status in which they were last enrolled. Students must additionally be approved for reentry through their division. Students who have attended Georgia State University in both undergraduate and graduate categories may apply to reenter in either category. Reentry applications for Undergraduate Students are submitted online to the Office of Admissions at www.gsu.edu/admissions. Graduate Student may obtain applications through the school’s website. Transient students should refer to the “Transient Student Admission” section in this chapter.

5020.50 Tuition Deposit

The Department of Physical Therapy requires students newly accepted into their program to submit a portion of their first semester’s tuition at the time of acceptance. The advanced tuition, which is nonrefundable, guarantees the student’s place in the class.

5030 Degree Regulations

Graduate students in the Byrdine F. Lewis School of Nursing and Health Professions are responsible for knowledge of all regulations and procedures of the school, the university, and of the program or status in which they are enrolled. Enrollment in a program constitutes a students’ acknowledgment that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to read carefully the general regulations that follow and those specifically pertaining to their
program.

5030.10 Transfer of Credit

Students who have completed graduate courses at other institutions prior to enrollment at Georgia State University may request that those courses be evaluated for transfer of credit to the School of Nursing and Health Professions. The request for transfer credit must be made by the student. Only those courses that are deemed to be appropriate to the student’s program of study in the school can be transferred. Transferred credits will be included in the year limitation placed on credits applicable to the degree.

Students who wish to enroll in courses at another institution after acceptance to a graduate program in the School of Nursing and Health Professions and wish to apply those courses to their graduate program at Georgia State University, must first obtain written approval from their adviser, the graduate director/coordinator, and any other appropriate persons. Students will not be allowed to enroll in courses to be transferred back to Georgia State University during the semester he or she expects to graduate from Georgia State University.

Students should inquire with the separate divisions in the School to determine the maximum amount of transfer credit allowed for each program.

5030.20 Academic Warning and Suspension

Each student admitted to a graduate program in the Byrdine F Lewis School of Nursing and Health Professions must maintain a minimum cumulative grade point average of 3.00. A student whose cumulative grade point average falls below 3.00 at the end of a semester will be placed on Academic Warning. The student will be notified of this standing by the School of Nursing and Health Professions Office of Academic Assistance. If a 3.00 cumulative grade point average is not achieved by the end of the next twelve semester hours or two semesters, whichever is longer, of completed course work approved by the faculty adviser, the student will be suspended from the graduate program. Students in provisional status or non-degree status must achieve a 3.00 cumulative grade point average by the end of their period in that status, however individual programs may not allow students in these categories to continue if their cumulative grade point average falls below 3.00. Transient students must maintain a 3.00 cumulative grade point average in order to continue in that status. Transient students who do not maintain a 3.00 cumulative grade point average may be subject to Academic Suspension. A student may apply for reinstatement after one semester as a suspended student. Application for reinstatement must be made no later than six weeks prior to the first day of classes for the semester in which reinstatement is sought.

The academic standing policies for the Doctor in Physical Therapy (DPT) and the Masters and Doctoral Nursing programs differ from those above. Please refer to the section on the DPT program for policies and the Nursing polices that pertain to students in those programs.

Each department may have additional policies related to academic progression. Students should refer to the applicable student handbooks.
5030.30 Changing Catalog Editions

Students will normally satisfy the degree requirements of the catalog in effect at the time they enter the graduate program in the School of Nursing and Health Professions. Revisions may be required to provide more effective programs. Degree requirements include the courses and grades required to earn the degree. A change in an academic regulation such as academic standing policy or appeals procedures will affect all students regardless of catalog edition.

Students will be required to change catalog editions when they reenter the university after a period of two or more consecutive years in which they have earned no academic credit at Georgia State University. Some graduate programs in the School of Nursing and Health Professions may have stricter requirements on changing catalog editions.

5030.40 Continuous Enrollment

Students in all graduate programs must maintain enrollment totaling 6 hours (or more) over all consecutive three semester periods (including summers). In other words, the total enrollment of the current term plus the two terms preceding it must add to 6 hours or more at all times. The status of all students will be checked by the midpoint of each term for compliance with the continuous enrollment requirement. Any student whose enrollment is out of compliance may receive a registration hold preventing all current and future registration. Those students will be notified by an email message sent to their official Georgia State University’s email account.

To resume their programs, students with continuous enrollment holds must file for re-entry by the published deadline and must enroll at a level sufficient to satisfy the continuous enrollment criterion. That is, their enrollment in the re-entry term plus the two terms preceding it must total to 6 hours or more. The maximum required enrollment level for the re-entry term is 6 hours. For more information on the re-entry process, see section 1100.

5040 Degree Requirements

Degree requirements in the Byrdine F Lewis School of Nursing and Health Professions are program specific and are listed under the individual programs.

5040.10 Thesis Hours

Students in Nutrition and Respiratory Therapy who are involved in writing a master’s thesis/research project shall register for at least three credit hours of thesis/research project credit each semester from the time they finish their course work until the time all requirements for the degree are completed. Masters students in Nursing do not complete a thesis requirement.

All doctoral students in the Nursing who are involved in writing a dissertation shall register for at least three credit hours of dissertation credit each semester from the time they are admitted to candidacy until the time the dissertation is successfully defended.
Doctor of Physical Therapy students are not required to complete a thesis or dissertation.

### 5050 Academic Advisement and Graduation Procedures

Academic Advisement for graduate students in the Byrdine F Lewis School of Nursing and Health Professions is done by the faculty within the School.

All candidates for the M.S., Ph.D, D.N.P or D.P.T degrees or post-master’s certificates in Nursing must file a formal application for graduation with the University’s Graduation Office at least two semesters in advance of the expected semester of graduation. Deadlines are published on the GSU Website: http://advisement.gsu.edu/seniors/graduating-from-georgia-state/ . The Graduation Office will inform the School when the application is filed. The School of Nursing and Health Professions will conduct an audit and inform the student of any remaining requirements. A degree will be awarded only to a student who meets the university academic and residence requirements as well as the standards of performance and academic requirements for the M.S., Ph.D, D.N.P or D.P.T degrees or post-master’s certificate in Nursing.

All credits, including transfer credits, presented for the Master of Science and Doctor of Physical Therapy degree must have been earned within six calendar years of the date of the degree. For the Doctor of Philosophy and Doctor of Nursing Practice degree credits, including transfer credits must be earned within seven years of the date of the degree. A student must have a minimum grade point average of 3.0 in order to receive a master’s degree in the School of Nursing and Health Professions. A student must have a minimum grade point average of 3.0 in order to receive a Doctor of Philosophy, Doctor of Nursing Practice, and Doctor of Physical Therapy degree.

Please note that licensing boards or agencies for program-related occupations may deny, suspend or revoke a license if an applicant has a criminal history or licensee is convicted, pleads guilty or nolo contendere to a felony or other crime. Students should consult the licensing board corresponding to their intended occupations for more details. Successful completion of a program of study in the School of Nursing and Health Professions does not guarantee licensure, certification, or employment in the relevant occupation.

### 5060 Student Complaints, Petitions for Policy Waivers and Variances, and Appeals

The appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit http://enrollment.gsu.edu/assistance/ online for details.

### 5070 Clinical, Field Experience or Internship

As part of the degree completion requirements for some of the programs in the Byrdine F Lewis School of Nursing and Health Professions, the student will be placed in a clinical setting which requires the student to care for and/or be exposed to individuals and patients of all ages and with a variety of diagnoses and
symptoms, some of which are communicable and infectious. However, unless otherwise required by law, the Georgia State University School of Nursing and Health Professions does not grant special consideration or waiver of any degree completion requirements, including placement in a clinical setting.

Please note that majors in the School must complete a clinical program during their program. Some students will be placed with a clinical affiliate that gives care to vulnerable populations or deals with sensitive information. As a result, the affiliate may request a criminal background check or drug screen as a prerequisite for placement. If a student uses illegal drugs, has a criminal record before they declare their major or acquire a criminal record after declaring their major, they might be prohibited from participating in the clinical program. Since the program is a requirement, the student might be prevented from completing the degree program. The programs in the School of Nursing and Health Professions reserve the right to require the withdrawal of any student who, in the opinion of the faculty, does not maintain the standards of clinical performance or conduct.

5080 Graduate Assistants

A limited number of graduate assistant positions (GA) are available for qualified candidates in the Byrdine F Lewis School of Nursing and Health Professions. Further information regarding availability and qualifications for these positions can be obtained by contacting the graduate director/coordinator in each department.

Any student chosen for an GA is required to have health insurance. There are two options for satisfying this requirement: students may provide proof of insurance if they already have coverage or they may apply for coverage through the University with either United Healthcare or Blue Cross and Blue Shield. For more information on student health insurance please go to this link: http://sfs.gsu.edu/tuition-fees/student-health-insurance/buy-student-health-insurance/

5100 Nursing

Programs Offered:

- **M.S. in Nursing**
  - Specializations in Adult Health-Gerontology Clinical Nurse Specialist, Adult Health-Gerontology Primary Care Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Family Nurse Practitioner, Psychiatric/Mental Health Nurse Practitioner and Nursing Leadership in Healthcare Innovations
- **Ph.D in Nursing**
- **D.N.P in Nursing Practice**

900 Urban Life Building
404/413-1200

Joan Cranford, Interim Director

Faculty: Aycock, Bates, Campbell, Casseus, Clark, Cranford, Cranwell-Bruce, DeMars, Eades, Eastman,

The master’s program in nursing focuses on the preparation of leaders for innovative health delivery systems of the future. Graduates are prepared as clinical experts with advanced competencies in practice, critical thinking, inquiry, leadership, self-awareness, and empowerment. The curriculum is designed to prepare graduates to assume nursing administration, nursing informatics and a variety of advanced practice roles to include clinical nurse specialists and nurse practitioners. Preparation is offered in a variety of nursing areas: adult health-gerontology, psychiatric mental health, pediatric primary care, family health, nursing administration and nursing informatics. The Master of Science program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle NW, Suite 530, Washington, DC 20036, 202/887-6791. Graduates of all master’s options are eligible to take national certification examinations in their specialty area of concentration.

The purpose of the Doctor of Philosophy (PhD) is to prepare nurse leaders and scholars who will expand health-related knowledge and make socially relevant contributions to the discipline of nursing and the larger society. The focus of the curriculum is on the development of nurse scholars and scientists; emphasis is placed on health promotion, protection, and restoration of health for high risk, vulnerable populations. The Doctor of Nursing Practice (DNP) program is a practice focused doctoral degree which prepares nurses to advance nursing practice, participate in organizational and system leadership, and be leaders in evidence-based practice. The DNP graduate will be able to use technology to improve patient outcomes, participate, implement and evaluate health care policy and practice nursing at the highest level. Both the master’s program and the doctoral programs are offered in a web-enhanced format. Classes are held onsite (approximately four times per semester) and online (synchronous and asynchronous formats).

Program Degree Requirements

Master of Science in Nursing: Advanced Practice Nursing Specialties

Semester hours are shown in parentheses after each entry.

Nurse Practitioner and Clinical Nurse Specialist Core Courses (22 hours)

- NURS 7310 Advanced Pathophysiological Concepts of Nursing- Part 1 (3)
- NURS 7320 Advanced Pathophysiological Concepts of Nursing- Part 2 (3)
- NURS 7500 Advanced Health Assessment (3)
- NURS 7550 Pharmacology for the Advanced Practice Nurse (3)
- NURS 7600 The Culture of Health Care (2)
- NURS 7900 Theoretical Foundations for Advanced Nursing Practice (3)
- NURS 7940 Advanced Professional Nurse Practice Issues (2)
- NURS 7000 Research Methods for Advanced Practice Nurses (3)

Adult Health-Gerontology Clinical Nurse Specialist

- NURS 7030 Clinical Practicum in Adult Health Nursing I (7)
- NURS 7040 Clinical Practicum in Adult Health Nursing II (7)
- NURS 7340 Common Health Problems of Adults (6)
• NURS 7010 Gerontological Nursing (3)
• SNHP 7800 Interprofessional Collaboration for Advanced Practice (3)

Adult Health-Gerontology Primary Care Nurse Practitioner

• NURS 7010 Gerontological Nursing (3)
• NURS 7340 Common Health Problems of Adults (10)
• NURS 7080 Common Health Problems of Women (6)
• NURS 7360 Advanced Nursing Practicum (4)
• SNHP 7800 Interprofessional Collaboration for Advanced Practice (3)

Pediatric Primary Care Nurse Practitioner

• NURS 7420 Common Health Problems and Issues Pertinent to Children and Adolescents (9)
• NURS 7430 Chronic Health Problems in Children and Adolescents (7)
• NURS 7440 Advanced Practicum in Child Health (10)

Family Nurse Practitioner

• NURS 7340 Common Health Problems of Adults (10)
• NURS 7342 Common Health Problems of Children and Adolescents (6)
• NURS 7080 Advanced Practice in Ambulatory Health Care of Women (6)
• NURS 7360 Advanced Family Nursing Practicum (4)

Psychiatric Mental Health Nurse Practitioner

• NURS 7120 Theories of Advanced Psychiatric Nursing (3)
• NURS 7140 Advanced Psychiatric Care for Individuals (6)
• NURS 7160 Psychiatric Mental Health Nursing of Families and Groups (6)
• NURS 7170 Advanced Psychopharmacology (2)
• NURS 7190 Seminar on Complex Cases (2)
• NURS 7340 Common Health Problems of Adults (5)
• NURS 7420 Common Problems of Children and Adolescents (2)

Total = 48 semester hours Clinical Masters

Nursing Leadership in Healthcare Innovations-Core Courses (27 hours)

• NURS 7610 Leadership and Organizational Behavior in Multicultural Healthcare Environments (3)
• NURS 7620 Leadership in Promoting Innovation in Nursing and Healthcare Systems (3)
• NURS 7630 Leadership for Health Policy, Law and Ethics (3)
• NURS 7660 Healthcare Technology and Clinical Informatics-An Overview (3)
• NURS 7000 Research Methods and Designs for Measuring Quality and Effectiveness (3)
• HA 8160 Health Care Systems (3)
• HA 8550 Basics of Financial Management (3)
• NURS 7730 Leadership Residency I (3)
• NURS 7740 Leadership Residency II (3)
Courses for each Specialization Curriculum (9 hours)

**Technology/Informatics Courses** (9 hours)

- NURS 7680 Health Information Systems (3)
- NURS 7690 Human Computer Interfaces (3)
- NURS 7720 Advanced Topics in Healthcare Informatics (3)

OR

**Nursing Administration Courses** (9 hours)

- HA 8460 Human Resource Management (3)
- HA 8620 Operations Management (3)
- HA 8440 Executive Leadership in Healthcare (3)
- NURS 7710 Advanced topics in Managing Healthcare and Nursing Systems (3)

Total = 36 semester hours **Nursing Leadership in Healthcare Innovations**

**Required Preliminary Course Work for the RN with an Associate Degree or Diploma**

All RNs with an associate degree or diploma are required to meet university and School of Nursing requirements for undergraduate non-nursing coursework and to take two bridge courses NURS 6910 (Caring for Families and Communities – 5 credit hours) and NURS 6930 (Leadership and Management in Nursing – 3 credit hours). Additionally, students who have not completed an undergraduate health assessment course will be required to complete an on-line health assessment course.

Students admitted to the R.N.-M.S. Program and requiring the bridge courses, NURS 6910 and NURS 6930, must work closely with the course administrators. NURS 6910 requires clinical site arrangement ONE semester before registering for the course. If clinical site arrangement is not done the semester before, students will not be eligible to take NURS 6910 in accordance with their program plans.

**Clinical and Residency Course Requirements**

Prior to entering clinical courses, students must complete the Nursing Student Health Form and provide evidence of current tuberculosis status and immunization for hepatitis B. The Health Form must be updated annually. Some clinical agencies require updates every six months. Additionally, students must provide evidence of current American Heart Association Basic Cardiopulmonary Resuscitation Certification, student liability insurance, and current licensure as a Registered Professional Nurse (RN) within the U.S. Prior to any clinical activities, students will be required to have criminal background and substance usage checks. The student must utilize approved vendors to obtain these tests and must financially bear the costs.

**Post-Master’s Certificates**

Nursing offers post-master’s certificates in all specialty areas to enable nurses who hold master’s degrees in nursing to gain the knowledge and competencies needed for certification in a specific clinical options.
options offered are Adult Health-Gerontology Primary Care Nurse Practitioner, Psychiatric Mental Health Nursing, Pediatric Primary Care Nursing, and Family Nurse Practitioner.

In addition to holding a master’s degree in nursing, applicants must meet the same admission requirements as all M.S. applicants. Graduate Record Exam (GRE) and Miller Analogies Test (MAT) are waived.

Doctor of Philosophy in Nursing

The program requires a minimum of 51 semester hours past the master’s degree in nursing, plus a minimum of nine semester hours of dissertation credit. In general, each three-semester credit hour course represents three lecture hours per week. Semester credit hours are shown in parentheses after each entry.

- NURS 8012 Qualitative Research Methods (3)
- NURS 8035 Theoretical and Philosophical Foundations of Nursing (3)
- NURS 8040 Theory Construction (3)
- NURS 8045 Introduction to Advanced Nursing Research (3)
- NURS 8050 Quantitative Research Methods I (3)
- NURS 8051 Quantitative Research Methods II (3)
- NURS 8100 Health in Vulnerable Populations (3)
- NURS 8205 Perspectives on Leadership, Research, Ethics, and Policy (3)
- SNHP 8200 Instrument Evaluation and Construction (3)
- NURS 8120 Univariate Statistics for Health Care Professionals (3)
- NURS 8140 Multivariate Statistics for Health Care Professionals (3)
- PH 8001 Epidemiology for Health Professionals (3)

Individualized Area of Concentration Courses (12)

- NURS 8070 Comprehensive Examination (3)
- NURS 9990 Doctoral Dissertation (9)

Total Credit Hour Requirement: 60 hours

Doctoral Advisory Committee

Upon admission to the Ph.D. program in nursing, the student is assigned an advisor. Within the first year, a Doctoral Advisory Committee is formed to assist the student in planning and approving an appropriate program of study, selecting residency activities, and constructing, administering and evaluating the comprehensive examination. There will be a minimum of three committee members: a major advisor from the Nursing faculty, one additional committee member from Nursing, and one non-nursing committee member with faculty rank outside the School. The outside member may be a faculty member from within Georgia State University, or a nursing or non-nursing faculty member from another institution.

Doctoral Dissertation Committee

The Doctoral Dissertation Committee is selected by the student after the successful completion of comprehensive examinations. This committee will recommend the student to candidacy for the Ph.D. degree. Committee members will guide the student during the dissertation process and judge the
acceptability of the dissertation. The committee will also judge the acceptability of the validation defense of
the dissertation.

The Doctoral Dissertation Committee will consist of a minimum of three members: a major advisor and
one other committee member from within Nursing and one member from outside of Nursing. The outside
member may be a faculty member from within Georgia State University, or a nursing or non-nursing
faculty member from another institution. All committee members must hold an earned doctorate and be
graduate faculty or the equivalent. The Doctoral Dissertation Committee may consist of some or all of the
same individuals from the student’s Doctoral Advisory Committee, or the student may select a committee
of new individuals to constitute the Doctoral Dissertation Committee.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) program is a practice focused doctoral degree which prepares
nurses to advance nursing practice, participate in organizational and system leadership, and be leaders in
evidence-based practice. The DNP graduate will be able to use technology to improve patient outcomes,
participate, implement and evaluate health care policy and practice nursing at the highest level.

Year One

- **Fall Semester**
  - NURS 8670 Evidence Based Practice (3)
  - NURS 8700 Scholarly Writing (2)
  - NURS 8992 Capstone Project – Roles Development Transition (2)
  - Clinical Hours: 90
  - **TOTAL Semester Hours 7**
- **Spring Semester**
  - NURS 8160 Introduction to Health Systems (3)
  - NURS 8550 Basics of Financial Management in Health Care Organization (3)
  - NURS 8994 Capstone Project Planning (2)
  - Clinical Hours: 135
  - **TOTAL Semester Hours 8**
- **Summer Semester**
  - NURS 8001 Epidemiology (3)
  - NURS 8620 Health Care Technologies (3)
  - **TOTAL Semester Hours 6**

Year Two

- **Fall Semester**
  - NURS 8610 Advanced Leadership & Organizational Behavior (3)
  - NURS 8996 Capstone Project Implementation (3)
  - Clinical Hours: 180
  - Elective (optional) 3
  - **TOTAL Semester Hours 6**
- **Spring Semester**
- NURS 8205 Health & Law, Vulnerable Populations & Disparities (3)
- NURS 8998 Capstone Project Dissemination (3)
- Clinical Hours: 180
- Elective (optional)(3)
- TOTAL Semester Hours 6

Total Credit Hours for Doctor of Nursing Practice: 39 hours; electives optional

5110 Nutrition

Programs Offered:

- M.S. in Health Science, Specialization in Nutrition (with optional emphasis in Sports Nutrition and/or optional Certificate in Public Health)
- M.S. in Health Science—Coordinated Program in Dietetics without Didactic Program in Dietetics prior Completion
- M.S. in Health Science—Coordinated Program in Dietetics with Didactic Program in Dietetics prior Completion

Accreditation

The Coordinated Program (CP) is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics (ACEND), 120 South Riverside Plaza, Chicago, IL 60606; (312) 899-5400.

This program provides students the opportunity to meet coursework requirements and pre-professional experiences (supervised practice) required for eligibility to take the Registration Examination for Dietitians to become Registered Dietitians (RD). Admission to this option does not require an undergraduate degree in nutrition; however, it does require completion of an undergraduate degree and the prerequisites for the M.S. The supervised practice component has a general focus with an urban health emphasis. The program requires a minimum four semester (students holding a Verification Statement at entrance) to six semester (students without Verification Statements) program of didactic coursework and supervised practice, if the student selects the project or coursework capstone option.

Students have the option of completing a thesis; this option could take longer than the minimum program completion time. The CP requires additional academic courses for students who enter the program prior to meeting the undergraduate coursework required for a Verification Statement from a Didactic Program in Dietetics (DPD) accredited by ACEND. At the completion of the degree, graduates receive a Master of Science in Health Sciences with a specialization in nutrition and a Verification Statement that makes them eligible to take the Registration Examination for Dietitians.

Department of Nutrition

862 Urban Life Building
404/413-1226
http://nutrition.gsu.edu/
The Lewis School of Nursing and Health Professions offers a Master of Science major in Health Sciences with a specialization in the area of nutrition. The purposes of the program are to 1) foster critical thinking, inquiry, and professional leadership in the health professions; 2) prepare health professionals who can formulate research questions, organize and test research problems, and evaluate research study results; 3) provide health practitioners with advanced study in professional specialty areas; 4) enhance career development in the health professions; and 5) provide the framework for advanced degree study.

The overall program objectives are to develop an understanding of the theoretical basis for the health professions; to gain proficiency in the processes, techniques, and practices that are currently being developed within the health professions; to enable the student to discover and utilize specialized knowledge in other disciplines that are related to the effective practice of the health professions; and to develop within the student the ability to see health care as a whole, to visualize the interrelationships of its components, and to recognize the influence of political, social, and economic milieu on the health care system.

The graduate program of study in the Department of Nutrition is built on a common core of courses and allows for maximum flexibility to meet the needs of the students and their professions. In this way, each program may be individualized to meet the student’s professional goals in keeping with the overall objectives of the program. The curriculum includes core health sciences courses, nutrition specialization courses, elective courses, and either a thesis or non-thesis capstone option.

Program Academic Regulations

Students in the master's program in Health Sciences are required to maintain a minimum cumulative grade point average (GPA) of 3.0. Students must have a minimum cumulative GPA of 3.0 before registration for any capstone experience (thesis, project or coursework) will be permitted. Any grade below a C is not acceptable toward the master’s degree. No more than two C grades (maximum of six semester credits) in the health sciences core and/or major can be applied toward the degree. A minimum cumulative GPA of 3.0 is required to receive the master’s degree.

Program Degree Requirements

Master of Science, Health Sciences in Nutrition

A. A minimum of 36 hours are required for a Master’s degree. Semester hours are shown in parenthesis after each entry.

1. Health Sciences Core (6)
   - SNHP 6000 Research Methods for the Health and Human Science Professions (3)
   - SNHP 8000 Trends Affecting Health Policies, Practices and Laws (3)
2. Specialization Curriculum (15)*
   - NUTR 6101 Nutrition Research Methods (3)
   - NUTR 6102 Nutrition Intervention (3)
   - NUTR 6104 Advanced Normal Nutrition I (3)
   - NUTR 7280 Nutritional Genomics (3)
   - NUTR 7950 Advanced Topics in Nutrition (3) or NUTR 7101 Nutrition Issues (3)

3. Electives (9)
   - Chosen in Consultation with Graduate Program Director

*Students without a Didactic Program in Dietetics verification statement must also take NUTR 6500 Macronutrients and NUTR 6700 Micronutrients

1. Capstone (6 minimum)
   - **Thesis Option:** Students will take NUTR 7999. A minimum of two semesters at three credits each must be completed. Students must be enrolled in thesis credit each semester they continue to work on completion of the requirements for thesis research and must be registered for thesis in the semester of graduation.
   - **Nonthesis Options:** Project-Students will take NUTR 7990. A minimum of two semesters at three credits each must be completed. Coursework – Students must take three courses at three credits each. Courses are defined in specialty areas including geriatrics, pediatrics, public health and sports.

Coordinated Program in Dietetics

The Coordinated Program (CP) includes a Master of Science in Health Sciences with a concentration in Nutrition degree and a supervised practice program. The CP has two program tracks. Track one: Students with a verification statement have completed the required didactic coursework and are eligible to begin the supervised practice component of the CP. Track two: Students without a verification statement must complete the required didactic coursework before beginning the supervised practice component of the CP.

1. Health Sciences Core (6)
   - SNHP 6000 Research Methods for the Health and Human Science Professions (3)
   - SNHP 8000 Trends Affecting Health Policies, Practices and Laws (3)

2. Specialization Curriculum (38)
   - NUTR 6001 Supervised Practice I (3)
   - NUTR 6002 Supervised Practice II (3)
   - NUTR 6003 Supervised Practice III (3)
   - NUTR 6004 Supervised Practice IV (3)
   - NUTR 6005 Supervised Practice V (3)
   - NUTR 6006 Supervised Practice VI (3)
   - NUTR 6011 Orientation to Practice I (1)
   - NUTR 6012 Orientation to Practice II (1)
   - NUTR 6101 Nutrition Research Methods (3)
   - NUTR 6102 Nutrition Intervention (3)
   - NUTR 6104 Advanced Normal Nutrition I (3)
NUTR 6105 Nutrition, Culture, and Life Cycle (3)
NUTR 6300 Nutrition Counseling Skills (3)
NUTR 7108 Nutrition Assessment (3)
NUTR 7280 Nutritional Genomics (3)
NUTR 7950 Advanced Topics in Nutrition (3)

3. Capstone Option (6 minimum)
   - Thesis Option: Students will take NUTR 7999. A minimum of two semesters at three credits each must be completed. Students must be enrolled in thesis credit each semester they continue to work on completion of the requirements for thesis research and must be registered for thesis in the semester of graduation.
   - Nonthesis Options: Project-Students will take NUTR 7990. A minimum of two semesters at three credits each must be completed. Coursework—Students must take three courses at three credits each. Courses are defined in specialty areas including geriatrics, pediatrics, public health and sports.

4. Courses Required by the Program beyond Degree Requirements [This section includes courses that can be satisfied in an undergraduate curriculum and additional practice hours beyond the typical institutional requirements for the M.S. degree]
   - NUTR 6150 Food Science I (4)
   - NUTR 6105 Nutrition, Culture and Life Cycle (3)
   - NUTR 7200 Nutrition and Disease (3)
   - NUTR 7250 Medical Nutrition Laboratory (1)
   - NUTR 6500 Macronutrients (3)
   - NUTR 6700 Micronutrients (3)
   - HADM 3401 Food Production and Service Management (2)
   - HADM 3402 Food Production Lab (1)

5. Electives—one to three courses at 3-credits each depending upon track and capstone selection

Clinical Course Requirements

The Georgia State University Health Center requires an Immunization Record on file before students may register for courses. Additional health information, laboratory test and immunizations may be required by specific supervised practice rotations and/or facilities. It is the responsibility of the student to consult with the Coordinated Program Director or Coordinator in the Department of Nutrition prior to beginning a clinical assignment. Liability insurance must be purchased prior to beginning the program and again at the beginning of each academic year.

Criminal Background Check and Drug Screen

Your application for licensure may ask you to respond to questions regarding any violations of federal, state or local law. You may be required to provide documentation to the state licensing board explaining any such occurrence. The individual state licensing agencies have exclusive authority to issue a license and could decline to issue such a license based on an applicant’s prior criminal record.

Additionally, many of the clinical sites with which we have a clinical agreement require criminal background checks, finger printing and drug screen prior to allowing the student to be placed in the facility. The clinical facility has the right to deny the student an internship in the facility based on the findings of the criminal background check or drug screen.
Graduate/Thesis Committee

Students in the master’s program in health sciences who plan to complete a thesis will select, with assistance from the major adviser, a Graduate/Thesis Committee, consisting of a chairperson and at least two additional members. The Committee should be selected by the time 12 semester hours have been completed. The Committee should be selected in accordance with the following criteria:

1. The Committee Chairperson must hold an appointment in the student’s department and hold full or provisional Graduate Faculty Status in the Byrdine F Lewis School of Nursing and Health Professions.
2. A second member of the Committee must be from the faculty at Georgia State University.
3. A third member must be selected from the faculty of Georgia State University or another institution of higher education or from a health-related agency.
4. All Committee members must be selected in consultation with the chair of the Graduate/Thesis Committee and approved by the head of the department.
5. No Committee may consist of fewer than three members; however, a student may elect to have more than three members.

Project Capstone Option

The Project Advisor must hold an primary appointment in the student’s department.

5130 Physical Therapy

Programs Offered:

- Doctor of Physical Therapy

Department of Physical Therapy
1228 Urban Life Building
404/413-1225
http://physicaltherapy.gsu.edu/

Andrew Butler, Associate Dean of Research and DPT Program Director
Faculty: Butler, Chen, Farrell, Garcia, Gore, Huggins, Lorio, Morelli, Thompson, Tsai, Warren

The Doctor of Physical Therapy curriculum is based on the same philosophical principles that guide the educational, clinical, and research activities of the Byrdine F Lewis School of Nursing and Health Professions and Georgia State University. The curriculum integrates academic and clinical instruction with the scientific bases for clinical practice. In accordance with, and in support of the mission of Georgia State University, the purpose of the Department of Physical Therapy is to prepare doctors of physical therapy who are committed to clinical excellence, professional distinction, and the pursuit of scholarly activities that contribute to the body of scientific and clinical knowledge.

As a faculty, we believe in:
• Educating students to serve the physical therapy needs of society by alleviating and eliminating impairments, functional limitations, and disabilities in people of all ages, with acute and chronic conditions; in addition to promoting prevention and wellness in all people
• Creating a learning environment that is learner-centered, interactive, and facilitated by faculty members
• Utilizing a variety of educational methods (e.g. didactic, case-based, reflective learning) to enhance critical thinking and clinical decision-making, while utilizing an evidence-based approach that promotes attitudes towards life-long learning.
• Demonstrating professional behaviors of cultural competence, client-centered care, and interdisciplinary team collaboration
• Engaging students in the scholarly pursuits (including clinical and basic science research)
• Providing services to the broader community

Objectives of the Program

1. Prepare a competent physical therapist who is ready to work autonomously in a variety of settings throughout the continuum of healthcare.
   • Provide culturally competent physical therapy services for prevention, health promotion, fitness, and wellness, to individuals, groups and communities.
   • Provide a variety of clinical educational opportunities to allow students to perform competently across the healthcare continuum.

2. Prepare a competent physical therapist who has obtained a sufficient level of knowledge in the foundational (basic, applied and social) and clinical sciences to understand the facts, concepts, and principles essential to competent evidence based practice.
   • Deliver and manage a plan of care that is safe, effective and patient client centered and incorporates all elements of the physical therapy management model as described in the Guide to Physical Therapist Practice.
   • Monitor and adjust the plan of care in response to patient/client status.
   • Provide physical therapy interventions to achieve patient/client goals and outcomes.
   • Consistently and critically evaluate sources of information related to physical therapy practice, research, and education and apply knowledge from these sources in a scientific manner and to appropriate populations.
   • Consistently integrate the best evidence for practice from sources of information with clinical judgment and patient/client values to determine the best care for a patient/client.
   • Use clinical judgment and reflection to identify, monitor, and enhance clinical reasoning in order to minimize errors and enhance patient/client outcomes.
   • Consistently apply current knowledge, theory, and professional judgment while considering the patient/client perspective in patient/client management.

3. Prepare a competent physical therapist who recognizes the limits of current knowledge, clinical skill, and experience and demonstrate the commitment to acquire new knowledge and skill through lifelong learning.
   • Acquire new knowledge and skill: writing and presenting evidence based practice paper/research project, attend conferences and consult with colleagues
   • Facilitate reflective thinking using reflective journals, small group discussions
   • Utilize technology to access information
   • Formulate clinical patterns based on best available evidence for various patient populations.
   • Read literature, attend conferences, and consult with colleagues to examine and evaluate
current and future trends to challenge the status quo of the practice of physical therapy.

4. Prepare a competent physical therapist who embraces a multi-cultural learning environment that assists in the development of culturally competent physical therapy practitioners
   - Identify respect and act with consideration for patients’/clients’ differences, values preferences and expressed needs in all professional activities.
   - Effectively educate others using culturally appropriate teaching methods that are commensurate with the needs of the learner.
   - Provide culturally competent physical therapy services for prevention, health promotion, fitness and wellness to individuals, groups and communities

5. Prepare a competent physical therapist who promotes interdisciplinary collaboration in the pursuit of clinical and scholarly activities.
   - Collaborate with patients/clients, family members, payers, other professionals, and other individuals to determine a plan of care that is acceptable, realistic, culturally competent, and patient/client-centered.
   - Develop and participate in inter-departmental research collaboration and education opportunities

6. Prepare a competent physical therapist who supports professional, community, and clinical service opportunities and activities.
   - Incorporate pro bono services into practice.
   - Participate and show leadership in community organizations and volunteer service.
   - Advocate for the health and wellness needs of society.
   - Provide consultation within boundaries of expertise to businesses, schools, government agencies, other organizations, or individuals.
   - Participate in professional organizations

7. Prepare a competent physical therapist who models professionalism consistent with the American Physical Therapy Association’s core values.
   - Adhere to legal practice standards, including all federal, state and institutional regulations related to patient/client care and fiscal management
   - Practice in a manner consistent with the professional code of ethics
   - Participate in organizations and efforts that support the role of the physical therapist in furthering the health and wellness of the public.
   - Place patient’s/client’s needs above the physical therapist’s needs.
   - Exhibit caring, compassion, and empathy in providing services to patients/clients.
   - Demonstrate integrity in all interactions with patients/clients, family members, caregivers, other health care providers, students, other consumers, and payers.
   - Demonstrate professional behavior in all interactions with patients/clients, family members, caregivers, other health care providers, students, other consumers, and payers.
   - Expressively and receptively communicate in a culturally competent manner with patients/clients, family members, caregivers, practitioners, interdisciplinary team members, consumers, payers, and policy makers.
   - Influence legislative and political processes

Criminal Background Check and Drug Screen

Please be aware that when you apply for licensure the jurisdiction in which you apply may ask you to respond to questions regarding any violations of federal, state or local law. You may be required to provide documentation to the state board of physical therapy explaining any such occurrence. The individual state
licensing agencies have exclusive authority to issue a license for physical therapy and could decline to issue such a license based on an applicant’s prior criminal record. Additionally, many of the clinical sites with which we have a clinical agreement require criminal background checks, finger printing and drug screen prior to allowing the student to be placed in the facility. The clinical facility has the right to deny the student an internship in the facility based on the findings of the criminal background check or drug screen.

Program Academic Regulations

1. In order to graduate from the Department of Physical Therapy (DPT) program, the student must:
   - Have a 3.0 Cumulative GPA.
   - Must successfully complete (S) all courses graded by S/U.
   - Have no grades lower than C (2.0)
   - Successfully complete yearly comprehensive exams

2. Calculation of Cumulative GPA will be as follows:
   - Only courses numbered 6000 and above taken at Georgia State University in the DPT curriculum are used to compute a student’s Cumulative GPA.
   - Courses graded with Satisfactory/Unsatisfactory (S/U) will not be used in computing GPA.
   - All original grades for courses attempted in the DPT program will be used in computing the Cumulative GPA for purposes of determining academic standing.

3. To continue the following semester, all prior courses in the DPT curriculum must be successfully completed (C or better or “S” for clinical courses).

4. A grade of “D” or “F” in any one course will result in the student being terminated from the program. A grade of “U” in any clinical internship course will result in the student being terminated from the program.

5. No course in which a grade of B (3.0) or greater has been earned may be repeated for credit.

6. Academic standing:
   a. “Good academic standing” is defined as having a Cumulative GPA of 3.0 or better.
   b. If Semester GPA falls below 3.0, regardless of course load, the student is placed on “scholastic warning.” A letter stating this will be sent from the Department Head. Upon completion of subsequent semesters of relevant graduate course work, performance of the student on warning is evaluated in one of the following ways:
      i. If Semester GPA is at least 3.0 and Cumulative GPA is at least 3.0, the student returns to “good academic standing”.
      ii. If Semester GPA is less than 3.0 and Cumulative GPA is less than 3.0, student is terminated from the program.
      iii. If Semester GPA is less than 3.0 but Cumulative GPA is at least 3.0, student may continue to enroll, but will continue to be on “scholastic warning” until Semester GPA of at least 3.0 is achieved (at which time he/she will be returned to “good standing”) or until subsequent Semester GPAs bring Cumulative GPA to less than 3.0 (at which time he/she is terminated from the program).
      iv. If Semester GPA is at least 3.0, but Cumulative GPA is less than 3.0, student is on “scholastic probation.” The student may continue to enroll on probation, provided the Semester GPAs are at least 3.0, until Cumulative GPA is brought back to at least 3.0. At this time the student will return to good standing. If any Semester GPA is less than 3.0 before Cumulative GPA is brought back to at least 3.0, the student is terminated from the program.
   c. A student may only be on warning twice. A third “Scholastic Warning” will result in
termination from the program.

d. A student will be placed on “scholastic warning” for failure of the first or 2nd year comprehensive exam, regardless of GPA.

e. After termination from the program, the student may reapply for admission through the Department of Physical Therapy. The faculty may choose not to admit, or to admit with conditions.

f. If a student is terminated from the program for a second time, he or she may not apply for readmission to the DPT program.

Program Degree Requirements

Curriculum Design and Constructs

Several concepts interwoven throughout the curriculum provide a framework for application of clinical skills and professional development. These concepts include:

- Using published literature as course readings in order to integrate concepts of research, theory, and critical inquiry into class discussion. These concepts address controversies in practice and the need for evidence gathered by practitioners to contribute to the establishment of new treatments, validate the efficacy of current practice, and enhance clinical outcomes.
- Incorporating professional behaviors into each course which include safety, ethics, personal responsibility and accountability, cooperation with other health care providers, and recognition of one’s own professional limitations. Faculty will model these behaviors as well as discussing and encouraging them.
- Instructing students with a comprehensive, patient-centered healthcare model that identifies, respects, and cares about patient differences with regard to values, preferences, and expressed needs.
- The coordination of continuous care which clearly informs and educates patients to share in the decision making and management of their care. The faculty advocates disease prevention, wellness, and healthy lifestyles with a focus on population health.

Physical therapy education is the beginning step of professionalism and the lifelong commitment to the field and the pursuit of learning.

Curriculum Structure

The curriculum is divided into five categories of study and clinical internships spread across the three years of the program:

- **Biological/Clinical Science**: (e.g. Anatomy, Pathophysiology, Neuroanatomy, Movement Sciences, Functional Anatomy). Basic sciences are presented in two areas: biological sciences and clinical sciences. The biological sciences provide the background for the study of normal and impaired movement; the clinical science component concerns the etiology, medical, surgical, therapeutic, and pharmacological management of deviations from homeostasis.

- **Patient Management and Intervention**: (e.g. Acute, Medical, Surgical Pathology, Musculoskeletal, Geriatric, Pediatric, Neuromuscular, Cardiopulmonary, and Integumentary with corresponding Interventions courses). Patient management courses reinforce a model of examination, evaluation, diagnosis, prognosis, intervention, outcome, and discharge planning utilizing the Guide to Physical Therapist Practice of the APTA.
Professional Practice: (e.g. Doctoring Profession, Psychosocial Aspects of Disability and Disease, Management). Professional practice courses discuss health care delivery in various practice settings and the role of the PT as a member of the health care team. Each professional practice course is designed to address different issues that impact the delivery of physical therapy services within the health care system. This includes an examination of different practice settings, psychology of disability, teaching and learning activities, communication, health policy, structure of the health care delivery system, documentation, reimbursement issues, administration, management, and clinical decision making. In addition, time is incorporated into the curriculum to allow students to attend professional meetings, including the annual National PT Student Conclave, Combined Sections Meeting, Annual APTA meeting, and State PT (PTAG) Association meetings.

Evidence-Based Practice and Research: Emphasis is on the role of critical inquiry and current evidence in clinical decision-making and research. Components include research design, data collection, and statistics. Each student participates in small group research projects with a limited focus that complements on-going faculty research. The projects must be completed in the final year before the student sets forth on his or her final internship. Projects involve outcome studies, quality assurance studies, descriptive analysis, or other forms of secondary analysis. Students are prepared to disseminate their findings by platform and poster presentations, as well as through the literature.

Clinical Internships: Clinical internships provide an opportunity to integrate academic content into clinical practice. The internships incorporate full-time clinicals provided in the first, third, sixth, eighth and ninth semesters. The first internship is one week in length, and the second through fifth internships are 8-10 weeks in length. Students will complete internships in an acute or sub-acute care, out-patient, and adult rehabilitation settings. The fifth internship can be in a variety of settings such as pediatrics, geriatrics, sports, outpatient orthopedics, or acute care. Students are advised to budget for travel and living expenses associated with the clinical internships. A student should understand that he/she is likely to be assigned to clinical sites outside of Georgia for one or more of the clinical experiences.

Curriculum

First Year

- Gross Anatomy I (4)
- Functional Anatomy I (4)
- Research I: Methods (3)
- Pathophysiology (3)
- Professional Practice I: The Doctoring Profession (3)
- Clinical Internship I (1)
- Evidence-Based Practice (2)
- Gross Anatomy II (3)
- Functional Anatomy II (2)
- PT Management of Cardiopulmonary Disorders (3)
- PT Management of Medical and Surgical Conditions (3)
- PT Interventions I (3)
- Medical Screening (2)
- Movement Sciences I (3)
- Exercise Physiology (2)
- Clinical Internship II (6)
Second Year

- Neuroanatomy and Neurophysiology I (4)
- Life Span I (2)
- PT Management of Musculoskeletal Disorders I (3)
- PT Management of Musculoskeletal Disorders II (3)
- PT Interventions II (2)
- PT Interventions III (4)
- Movement Sciences II (2)
- Research II: Investigations* (2)
- Evidence-Based Practice II (1)
- PT Management of Neuromuscular Disorders II (3)
- PT Management of Neuromuscular Disorders III (2)
- Life Span II: Pediatrics (3)
- Life Span III: Pediatrics Applications (1)
- PT Management of Musculoskeletal Disorders III (3)
- PT Management of Musculoskeletal Disorders IV (2)
- Prosthetics and Orthotics (2)
- Professional Practice II: Psychosocial Aspects of Disability and Disease (3)
- Clinical Internship III (6)
- Meta Analysis (2)* students will take this if they are not taking Research II

Third Year

- PT Management of Neuromuscular Disorders IV (2)
- PT Management of Neuromuscular Disorders V (2)
- Life Span IV: Geriatrics (3)
- PT Management of Musculoskeletal Disorders V (4)
- Research III: Synthesis (3)
- Clinical Internship IV (7)
- Professional Practice III: Business Management (3)
- PT Interventions IV (3)
- Elective: Special Topics in PT (3)
- Health Promotion and Wellness (2)
- Clinical Internship V (7)
- Evidence-Based Practice III (1)
- Research IV: Dissemination (1)
- Comprehensive Review (1)

Total = 137 semester hours

Georgia State University
To Begin Summer 2014
First Year

- Prof Practice I (2)
- Lifespan I (2)
• Pathophysiology (3)
• Medical Terminology (3)
• Gross Anatomy (2)
• Gross Anatomy Lab (2)
• Functional Anatomy I (4)
• Clinical I (2)
• Med Surg (3)
• Movement Science I (3)
• Research I (3)
• Gross Anatomy II (2)
• Gross Anatomy II Lab (1)
• Functional Anatomy II (2)
• Exercise Physiology (2)
• Neuroanatomy I (3)
• Neuroanatomy I Lab (1)
• Interventions I (3)
• EBP I (2)
• Medical Screening (2)
• Interventions II (2)
• Diagnostic Imaging for PT (1)
• Clinical II (8 wks) (6)

Second Year

• Cardiopulm (4)
• Movement Science II (2)
• Musculoskeletal I (3)
• Musculoskeletal II (3)
• Neuro II (3)
• Neuro III (2)
• Research II OR Meta-analysis (2)
• Interventions III (3)
• Int. IIIB Modalities (1)
• Musculoskeletal III (3)
• Neuro IV (3)
• Neuro V (2)
• Lifespan II: Peds (3)
• Lifespan III: Peds Lab (1)
• Research III (2)
• Professional Practice II (2)
• Musculoskeletal IV (2)
• EBP II (1)
• Prosthetics and Orthotic (2)
• Clinical III (8 wks) (6)

Third Year
• Clinical IV (10 wks) (7)
• Lifespan IV: Geriatrics (2)
• Musculoskeletal V (3)
• Prof Practice III (2)
• EBP III (1)
• Research IV (2)
• Clinical V (10 wks) (7)
• Elective (2)
• Research V – NEW (2)
• Comprehensive Review (2)
• Interventions IV (3)
• Service Learning (2)
• Health promotion (2)

Total = 143 semester hours

5140 Respiratory Therapy

Programs Offered:

• M.S. Health Science, Respiratory Therapy
• Integrated M.S. Health Science, Respiratory Therapy

Department of Respiratory Therapy
1228 Urban Life Building
404/413-1225
respiratorytherapy.gsu.edu
Douglas S. Gardenhire, Interim Chairman

Faculty: Ari, Colquitt, Gardenhire, D, Gardenhire, R, Goodfellow, Murray, Zimmerman, Zavorsky

The Department of Respiratory Therapy offers a Master of Science major in Health Sciences with a specialization in respiratory therapy. The purposes of the program are to 1) foster critical thinking, inquiry, and professional leadership in the health professions; 2) prepare health professionals who can formulate research questions, organize and test research problems, and evaluate research study results; 3) provide health practitioners with advanced study in professional specialty areas; 4) enhance career development in the health professions; and 5) provide the framework for advanced degree study.

The overall program objectives are to develop an understanding of the theoretical basis for the health professions; to gain proficiency in the processes, techniques, and practices that are currently being developed within the health professions; to enable the student to discover and utilize specialized knowledge in other disciplines that are related to the effective practice of the health professions; and to develop within the student the ability to see health care as a whole, to visualize the interrelationships of its components, and to recognize the influence of political, social, and economic milieu on the health care system.

There are two options in graduate study for Respiratory Therapy. One option is the Traditional M.S.
degree which is built on a common core of courses and allows for maximum flexibility to meet the needs of the students and their professions. Various specialty tracks or specialties in the Department of Respiratory Therapy are offered. In this way, each program may be individualized to meet the students’ professional goals in keeping with the overall objectives of the program. The curriculum includes core health sciences courses, specialty courses, elective courses, and either a thesis, nonthesis or advanced practice capstone option. The Advanced Practice option is available for students who want more of a clinical master’s degree and allows the student to obtain two credentials prior to graduation. An initial program of study is planned by the student in consultation with the Major Advisor or Chair of the Graduate Thesis Committee by the end of the first year or before 12 semester hours of coursework has been completed.

The Department of Respiratory Therapy also offers an Integrated Program (IP) for students who possess a bachelor’s degree and want to enter the profession without having to earn another bachelor's degree. This program provides students with the opportunity to meet undergraduate and graduate pre-professional experiences required for eligibility to take the National Board for Respiratory Care credentialing exams. Admission to this option requires an undergraduate degree and completion of program pre-requisites.

Application to this specialization option requires a completed application to the M.S. in Health Sciences and a supplemental application. This application must be received by the School of Nursing and Health Professions Office of Academic Assistance for review by January 15 for summer admission, May 15 for fall semester admission and September 15 for spring semester admission.

Program Academic Regulations

Students in the master’s program in health sciences are required to maintain a minimum cumulative grade point average (GPA) of 3.0. Students must have a minimum cumulative GPA of 3.0 before registration for any capstone experience (thesis or nonthesis) will be permitted. Any grade below a C is not acceptable toward the master’s degree. No more than two C grades (maximum of six semester credits) in the health sciences core and/or major can be applied toward the degree. A minimum cumulative GPA of 3.0 is required to receive the master’s degree.

Program Degree Requirements

Master of Science Health Science, Respiratory Therapy (Traditional)

A minimum of 36 hours are required for the traditional Master’s degree. Semester hours are shown in parenthesis after each entry.

Traditional Master’s Degree Program The program of study for a Traditional Master’s of Science in Health Science with a concentration in Respiratory Therapy consists of a minimum of 36 semester hours. At this time the hours are:

I. Health Science Core (12 hours)
II. Specialization Curriculum (Respiratory Therapy) (18 hours)
III. Thesis/Project ( 6 hours)

I. HEALTH SCIENCE CORE CURRICULUM (12)
The following SNHP courses are required of all students in the Master’s Program Semester Hours Required Courses (12)
SNHP 6000 Research Methods** (3)  
SNHP 6010 Graduate Medical Terminology** (3)  
SNHP 8010 Leadership and Ethics in Health Care** (3)  
SNHP 8000 Trends Affecting Health Policies, Practices and Laws OR (3)  
SNHP 7800 Interprofessional Collaborative for Advanced Practice OR (3)  
SNHP 6900 EKG Interpretation (3)  

II. SPECIALIZATION (Respiratory Therapy) Curriculum (18)  
The following courses are required of all students in the Master’s Program  

Required Courses (18)  
RT 7030 Advanced Topics in Ventilatory Support (3)  
RT 7090 Research Seminar in Respiratory Care* (3)  
RT 7050 Research Statistics II (3)  
RT 7010 Teaching Practicum (3)  
RT 7040 Ventilation Waveforms (3)  
RT 7095 Special Problems in Respiratory Care (3)  

III. THESIS/NON-THESIS  
Students will take a minimum of 2 semesters at 3 hours each in either the thesis option RT 7999 or a non-thesis RT 7995.  

Thesis Option: Students will take RT 7999, depending on specialty area. A minimum of two semesters at three hours each must be completed. These courses must be taken consecutively. Students must be enrolled in thesis credit each semester they continue to work on completion of the requirements for thesis research.  

Non-thesis Option (Project): Respiratory Therapy students will take six hours of RT 7995, Directed Study. A minimum of two semesters at three hours each must be completed. These courses must be taken consecutively. Students must be enrolled in non-thesis credit each semester they continue to work on completion of the requirements for non-thesis.  

RT 7995 Directed Study (non-thesis or project) (3) or (6)  
RT 7999 Thesis (3)-(6)  

*RT 7090 Seminar in Respiratory Care should be taken prior to taking RT 7995 or RT 7999.  
**Required Health Science Core  

Course substitutions may be authorized by the Department Chair in sections I and II only. All authorizations must be in writing by the Department Chair before a student registers for the course.  

Advanced Practice Option  
Advanced Practice Master’s Degree Program The program of study for a Traditional Master’s of Science in Health Science with a concentration in Respiratory Therapy consists of a minimum of 36 semester hours. At this time the hours are:
I. Health Science Core (12 hours)
II. Specialization Curriculum (Respiratory Therapy) (18 hours)
III. Thesis/Project (6 hours)

I. HEALTH SCIENCE CORE CURRICULUM (12)
The following SNHP courses are required of all students in the Master's Program

Semester Hours
Required Courses (12)
SNHP 6000 Research Methods** (3)
SNHP 6010 Graduate Medical Terminology** (3)
SNHP 8010 Leadership and Ethics in Health Care** (3)
SNHP 8000 Trends Affecting Health Policies, Practices and Laws OR (3)
SNHP 7800 Interprofessional Collaborative for Advanced Practice OR (3)
SNHP 6900 EKG Interpretation (3)

II. SPECIALIZATION (Respiratory Therapy) Curriculum (18)
The following courses are required of all students in the Master's Program

Required Courses (18)
RT 7030 Advanced Topics in Ventilatory Support (3)
RT 7090 Research Seminar in Respiratory Care* (3)
RT 7010 Teaching Practicum (3)
RT 7040 Ventilation Waveforms (3)
RT 7095 Special Problems in Respiratory Care (3)
RT 7950 Directed Readings (3)

III. Advanced Practice (6)

Respiratory Therapy students will register for six hours of RT 7995 Directed Study. Two-3 hour courses must be completed. These courses do not have to be taken consecutively.

Students must be enrolled in RT 7995 each semester as they continue to work on completion of the requirements for advanced practice.

RT 7995 Directed Study (non-thesis) (3)
RT 7995 Directed Study (non-thesis) (3)

*RT 7090 Seminar in Respiratory Care should be taken prior to taking RT 7995 or RT 7999.
**Required Health Science Core

Course substitutions may be authorized by the Department Chair in sections I and II only. All authorizations must be in writing by the Department Chair before a student registers for the course.

Requirements
For the two-3 hour RT 7995 courses the student will need to successfully pass 2 credentialing exams. The exam will be taken in the semester RT 7995 is registered or 2 exams can be taken in 1 semester and credit will be given in the next semester that RT 7995 is registered upon submitting proof of passing success. A copy of the exam certificate will be required by the end of the semester the exam is completed in order to receive a grade in RT 7995. The exam options include:

Neonatal-Perinatal Specialist

Advanced Critical Care Specialist

Certified Pulmonary Function Technologist

Registered Pulmonary Function Technologist

Certified Sleep Disorder Specialist

Registered Sleep Disorder Specialist

Certified Tobacco Treatment Specialist

Certified Asthma Educator

The student must successfully pass the credentialing exam in the same semester that RT 7995 is registered. If the student fails the exam, it can be repeated in the same semester. If the student does not pass the exam in the same semester that RT 7995 is registered then the student must re-register for RT 7995 in the next semester. This will continue until the exam is passed.

To receive credit for the courses you will need to:

1. Register for RT 7995.
2. Register for one of the exams in the same semester you register for RT 7995.
3. Sit for the exam in the same semester.
4. Show your passing score from the grading sheet that you receive after completing the exam.
5. Provide to the department a copy of the official certificate.
6. You will receive your grade for RT 7995 at the end of the semester when grades are due.

If you sit for two exams in the same semester you will need to register for the second RT 7995 in the next semester. You will receive credit for the second exam that you passed in that next semester for RT 7995. You must continue to register for RT 7995 until 2 exams have been successfully completed.

If a student is already credentialed with one of the exams listed that student can receive credit for RT 7995 for each credential. For example if a student has the RRT-NPS credential the following will need to be completed:

1. Register for RT 7995 and pay for the course
2. Provide to the department a copy of the official examination certificate.
3. You will receive your grade for RT 7995 at the end of the semester when grades are submitted.

Integrated Program

Courses required by the Program beyond Degree Requirements [This section includes courses that can be satisfied in an undergraduate curriculum and additional practice hours beyond the typical institutional requirements for the M.S. degree]

- Health Sciences Core (12)
  - SNHP 6000 Research Methods for the Health and Human Science Professions (3)
  - SNHP 6010 Graduate Medical Terminology (3)
  - SNHP 7800 Interprofessional Collaborative for Advanced Practice (3)
  - SNHP 6900 EKG Interpretation (3)
  - SNHP 8000 Trends Affecting Health Policies, Practices and Laws (3)
  - SNHP 8010 Ethics and Leadership in Health Care (3)

- Specialization Curriculum (58)
  - RT 6005 Clinical Cardiopulmonary Physiology (3)
  - RT 6111 Respiratory Therapy Equipment I (4)
  - RT 6025 Patient Evaluation (4)
  - RT 6030 Pulmonary Function Diagnostics (3)
  - RT 6040 Respiratory Care Pharmacology (3)
  - RT 6027 Pulmonary Diseases (3)
  - RT 6112 Respiratory Therapy Equipment II (3)
  - RT 7010 Teaching Practicum (3)
  - RT 7011 Mechanical Ventilation I (3)
  - RT 7012 Mechanical Ventilation II (3)
  - RT 7020 Advanced Clinical Preceptorship (3)
  - RT 7030 Advanced Topics in Ventilatory Support (3)
  - RT 7040 Advanced Cardiopulmonary Monitoring (3)
  - RT 7050 Statistical ResearchII (3)
  - RT 7070 Advanced Cardiac Life Support (2)
  - RT 7075 Patient Care Management Strategies (3)
  - RT 7080 Pediatric Respiratory Care (2)
  - RT 7081 Neonatal Respiratory Care (2)
RT 7085 Professional Trends to Long-Term Care (3)
RT 7090 Seminar in Respiratory Care (3)
RT 7095 Problems in Respiratory Care (3)
RT 7995 Directed Studies (3)
RT 7096 End of Life Issues (1)

Clinical Curriculum (15)
- RT 6050 Clinical Practice I (1)
- RT 6051 Clinical Practice II (4)
- RT 6052 Clinical Practice III (1)
- RT 7051 Clinical Practice IV (4)
- RT 7052 Clinical Practice V (5)

Thesis/Nonthesis Option (6)
- Thesis Option RT 7999: Students will take RT 7999, depending on specialty area. A minimum of two semesters at three hours each must be completed. These courses must be taken consecutively. Students must be enrolled in thesis credit each semester they continue to work on completion of the requirements for thesis research.
- Nonthesis Option RT 7995: Respiratory Therapy students will take six hours of RT 7995, Directed Studies in Respiratory Therapy. These courses must be taken in consecutive semesters.
- * RT 7090 Seminar in Respiratory Care should be taken prior to taking RT 7995 or RT 7999.

**Required Health Science Core
Online Option
The Masters of Science in Health Sciences with a specialization in Respiratory Care Online Option consists of a minimum of 36 semester hours. All courses will be taught synchronously online. At this time the hours are:
I. Health Science Core (12 hours)
II. Specialization Curriculum (Respiratory Therapy) (18 hours)
III. Thesis/Project/Advanced Practice (6 hours)

I. HEALTH SCIENCE CORE CURRICULUM (12)
The following SNHP courses are required of all students in the Master’s Program

Semester Hours
Required Courses (12)
SNHP 6000 Research Methods (3)
SNHP 6010 Graduate Medical Terminology (3)
SNHP 6900 EKG Interpretation (3)
SNHP 8010 Leadership and Ethics in Health Care (3)

II. SPECIALIZATION (Respiratory Therapy) Curriculum (18)
The following courses are required of all students in the Master’s Program

Required Courses (18)
RT 7010 Teaching Practicum (3)
RT 7030 Advanced Topics in Ventilatory Support (3)
RT 7040 Ventilation Waveforms (3)
RT 7090 Research Seminar in Respiratory Care* (3)
RT 7095 Special Problems in Respiratory Care (3)
RT 7950 Directed Readings (3)

III. THESIS/NON-THESIS/ADVANCED PRACTICE (6)
Students will take a minimum of 2 semesters at 3 hours each in one of the following options:

Thesis Option: Students will take RT 7999, depending on specialty area. A minimum of two semesters at three hours each must be completed. These courses must be taken consecutively. Students must be enrolled in thesis credit each semester they continue to work on completion of the requirements for thesis research.

Non-thesis Option (Project): Respiratory Therapy students will take six hours of RT 7995, Directed Study. A minimum of two semesters at three hours each must be completed. These courses must be taken consecutively. Students must be enrolled in non-thesis credit each semester they continue to work on completion of the requirements for non-thesis.

Advanced Practice: Respiratory Therapy students will register for six hours of RT 7995 Directed Study. Two-3 hour courses must be completed. These courses do not have to be taken consecutively. Students must be enrolled in RT 7995 each semester as they continue to work on completion of the requirements for advanced practice.

RT 7995 Directed Study (non-thesis project/ advanced practice option) (3) or (6)
RT 7999 Thesis (3) or(6)

*RT 7090 Research Seminar in Respiratory Care should be taken prior to taking RT 7995 or RT 7999.

Course substitutions may be authorized by the Department Chairman in sections I and II only. All authorizations must be in writing by the Department Chairman before a student registers for the course.

Advanced Practice Credentials:
Neonatal-Perinatal Specialist
Advanced Critical Care Specialist
Certified Pulmonary Function Technologist
Clinical Course Requirements

Students who must complete a clinical component as part of their program of study must complete the School of Nursing and Health Professions Health Form and provide evidence of current tuberculosis status, immunization for hepatitis B, and review of current CDC guidelines on universal precautions. The health form and review of CDC guidelines on universal precautions must be updated annually. Clinical agencies may require additional evidence of health status. It is the responsibility of the student to consult with the graduate program director in their academic unit prior to beginning a clinical assignment. Liability insurance must be purchased before the clinical course begins.

Criminal Background Check and Drug Screen

Your application for licensure may ask you to respond to questions regarding any violations of federal, state or local law. You may be required to provide documentation to the state licensing board explaining any such occurrence. The individual state licensing agencies have exclusive authority to issue a license and could decline to issue such a license based on an applicant’s prior criminal record.

Additionally, many of the clinical sites with which we have a clinical agreement require criminal background checks, finger printing and drug screen prior to allowing the student to be placed in the facility. The clinical facility has the right to deny the student an internship in the facility based on the findings of the criminal background check or drug screen.

Graduate/Thesis Committee

Students in the traditional and integrated program in health sciences will select, with assistance from the major adviser, a Graduate/Thesis Committee, consisting of a chairperson (usually the major adviser) and at least two additional members. The committee should be selected by the time 12 semester hours have been completed. The Committee should be selected in accordance with the following criteria:

1. The Committee Chairperson must hold a primary appointment in the student’s department and hold full or provisional Graduate Faculty Status in the School of Nursing and Health Professions.
2. A second member of the committee must be from the faculty at Georgia State University.
3. A third member must be selected from the faculty of Georgia State University or another institution of higher education or from a health-related agency.
4. All committee members must be selected in consultation with the chair of the Graduate/Thesis Committee and approved by the head of the department.
5. No committee may consist of fewer than three members; however, a student may elect to have more than three members.
In September 1982, the College of Law began operation on the Georgia State University downtown campus. The college, which offers conventional first-year law courses to both day and evening students, enrolled a first-year class of about 200 students. Second- and third-year classes now complete a student body of about 675 students.

The College of Law makes a quality legal education as accessible as possible, both to traditional students and to the large number of qualified and motivated individuals whose present occupations would prevent them from pursuing a traditional, full-time law program. The College of Law thus maintains, in addition to our conventional program, an affirmative attitude toward part-time law study. The college views the part-time program as an attractive and equally respectable alternative for many applicants. We believe the ability to choose between programs provides students with a flexibility that is an exceptional strength of the college.

With this in mind, our faculty helps all of our students gain knowledge of the law, of legal institutions and of legal processes. This knowledge will become progressively more important to our students’ upward movement, both vocationally and avocationally.

The College of Law is committed to providing an excellent, affordable, and distinctive legal education to a diverse student body; to promoting legal scholarship and service that enrich the legal profession and the communities we serve; and to capitalize on the unique environment in which we are located.

Accreditation

The College of Law is accredited by the American Bar Association and is a member of the Association of American Law Schools.

Directory

• Admissions – Suite 150, 85 Park Place NE, 404/413-9200

Anne Dries, Assistant Dean for Administration and Finance
Toby McChesney, Assistant Dean of Graduate Recruiting and Student Services
Tracy Widman, Assistant Dean for Assessment, Accreditation and Faculty Data Management
Jacobus Boers, Assistant Dean for International Engagement
Todd Maurer, Associate Dean for Sponsored Research

7010.20 Mission

The J. Mack Robinson College of Business of Georgia State University is committed to academic excellence through advancing the creation and dissemination of knowledge in business and management. Moreover, the college seeks to prepare its students for the practice of management with the knowledge and skills needed to remain effective in a global, culturally diverse, and technologically advanced world that is characterized by rapid change and complex interdependencies. As an academic unit of Georgia State University, the Robinson College seeks to add value to private, public, and not-for-profit organizations through excellence in its research, education, and outreach programs. The college enjoys a location that is distinctive among business schools and is committed to taking full advantage of its proximity to multinational corporations; entrepreneurial enterprises; federal, state, and city agencies; and not-for-profit organizations.

7010.30 Accreditation

The J. Mack Robinson College of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business. The accounting programs of the college also hold accounting accreditation granted by the AACSB. The Institute of Health Administration is accredited by the
Commission on Accreditation of Healthcare Management Education. The Cecil B. Day School of Hospitality Administration is accredited by the Commission on Programs in Hospitality Administration.

7010.40 Administration of Master’s Programs

The Graduate Program Council, a committee composed of five faculty members, has overall responsibility for master’s admission criteria and for recommending changes in the degree requirements and academic regulations of the master’s programs for approval of the faculty of the college. The Division of Master’s Admissions and Advisement, (see below), works with the associate dean for academic initiatives and innovation, on behalf of the dean and the faculty, to consider changes to the master’s programs.

7010.50 Units and Centers

The Robinson College of Business has 11 academic units: the schools of Accountancy and Cecil B. Day Hospitality Administration; the departments of Computer Information Systems, Finance, Managerial Sciences, Marketing, Real Estate, and Risk Management and Insurance; and the institutes of Decision Sciences, Health Administration, International Business, and W.T. Beebe Personnel and Employment Relations. The college also has the following centers:

- Center for Business and Industrial Marketing
- Center for the Economic Analysis of Risk
- Center for Ethics and Corporate Responsibility
- Center for Excellence in Brand and Customer Management
- Center for Health Information Technology
- Center for Health Services Research
- Center for International Business Education and Research
- Center for Mature Consumer Studies
- Center for Process Innovation
- Center for Research in Information Systems
- Center for Risk Management and Insurance Research
- Economic Forecasting Center
- Entrepreneurship and Innovation
- Herman J. Russell, Sr. International Center for Entrepreneurship
- Institute for Insight
- Korean-American Business Center
- Small Business Development Center

7010.60 RCB Directory of Academic Units

All locations are in the RCB Building, 35 Broad Street, NW, corner of Broad and Marietta streets. All phone numbers begin with 404/413-. 

- Academic Units Floor Phone
  - Accountancy 5 7200
  - Beebe (Human Resource Management) 10 7525

• Risk Mgt. and Insurance 11 7500
  (Includes: Actuarial Science, Legal Studies, and Personal Financial Planning)

7010.70 Study Abroad Programs

The Institute of International Business promotes international learning experiences through a strong portfolio offering of study abroad programs. The study abroad programs range from two-to-three week intensive experiences to semester- and year-long programs. The programs span disciplines and geographic regions, affording students in all business disciplines the rich rewards of an international study experience. RCB currently offers programs in Argentina, Belgium, Brazil, China, France, Germany, Hungary/Czech Republic, Italy, South Africa, Turkey, and Switzerland. Semester- or year-long options are available in France, Germany, Italy, and Mexico. Other locations are possible through our partner institutions. Students must be in good standing with a minimum cumulative GPA of 3.0. Additional requirements vary by program. For individual program descriptions and application information, consult the Institute of International Business at iib@gsu.edu.

7010.80 Student Organizations

The Actuarial Students Association (ASA) is an official Georgia State University student organization whose mission is to serve actuarial science students by providing information, coordinating with companies and recruiters, and assisting students with passing actuarial exams and seeking employment. All of the students in the Actuarial Science program at Georgia State University—prospective, current, and past—have access to ASA resources. For more information, contact the Department of Risk Management and Insurance, 404/413-7500.

AIESEC: AIESEC is an international non-profit organization that strives for spreading cultural understanding by means of international exchange. Being the world’s largest student organization, AIESEC serves as an “international platform for young people to discover and develop their potential so as to have a positive impact on society.” Currently, AIESEC occupies over 1,100 universities spanning across more than 100 countries and territories. AIESEC encourages and helps students to discover both their social and professional potential. Through AIESEC, students have access to leadership positions, traineeship abroad opportunities and conferences. For more information, contact aiesec.gsu@gmail.com

Alpha Kappa Psi: This national professional fraternity aims to foster the study of business in universities, to encourage scholarship, to promote closer affiliation between the business world and students of business, and to further the development of high standards of business ethics. The Pi Chapter was organized at this university in 1917. More information about this general business fraternity can be obtained by calling
**The American Marketing Association:** The AMA, which is the world’s largest marketing organization, aims to serve the professional needs of marketing practitioners, educators, and students. By attending the programs, seminars, and workshops sponsored by the local AMA professional chapter, students can gain valuable firsthand knowledge of the marketing industry and how it works. Practical experience in research, advertising, and other areas can be acquired through participation in the AMA student chapter’s marketing-related projects. For more information about Georgia State University’s AMA chapter, call the Department of Marketing at 404/413-7650 or visit www.gsuama.com.

**The Association for Computing Machinery:** This foundation was founded in 1947 to advance the sciences and arts of information processing. It promotes the free interchange of information about the sciences and arts of information processing both among specialists and among the public in the best scientific tradition. The student chapter was organized at Georgia State in 1963. For more information, contact the Department of Computer Information Systems, 404/413-7360.

**Beta Alpha Psi:** This national honorary accounting, finance, and information systems fraternity has as its purpose to encourage the idea of service as the basis of a business profession; to promote the study of accounting, finance, and information systems; and to further the highest ethical standards. Graduate students may qualify for membership in Beta Mu Chapter of Beta Alpha Psi. For more information, contact the School of Accountancy, 404/413-7200.

**Beta Gamma Sigma:** Membership in Beta Gamma Sigma is the highest general scholastic honor a business student can receive at Georgia State University. Nominations for membership in this national honorary business fraternity occur during spring semester. New members are recognized at the college’s Honors Day ceremony. Master’s students who have completed their programs and are in the upper twenty percent of the master’s graduates during the preceding calendar year are eligible for nomination. All doctoral students who graduated during the preceding calendar year are eligible for nomination. For additional information, contact 404/413-7130.

**The CIS Society:** This organization of GSU students defines and creates new ways for CIS students to excel academically and to succeed professionally while establishing valuable relationships with their peers, faculty, and business leaders within the information technology community. Additional information may be found at www.TheCISociety.org.

**Delta Sigma Pi:** This national professional fraternity aims to foster the study of business in universities, to encourage scholarship, to promote closer affiliation between the business world and students of business, and to further the development of high standards of business ethics. The Kappa chapter of Delta Sigma Pi was organized here in 1921. More information about this general business fraternity can be obtained by calling 404/659-8953.

**The Entrepreneur Network:** This organization of faculty, alumni, and students is dedicated to helping those seeking the personal and financial freedom offered by entrepreneurship. The Entrepreneur Network hosts an array of events; grants access to vast networks of advisors, investors, and entrepreneurs; and offers support in launching, growing, and exiting businesses. The organization welcomes all students and alumni with a passion for entrepreneurship. For more information, contact Robert Gemmell at 404/413-7542.
Eta Sigma Delta International Hospitality Management Society: Founded in 1978, this international honor society recognizes hospitality undergraduate and graduate students for outstanding academic achievement, meritorious service and demonstrated professionalism. An annual induction ceremony is held for graduate hospitality students with a minimum 3.50 GPA. Contact the School of Hospitality for additional information.

Finance Society, The: This organization welcomes all undergraduate and graduate business majors who are interested in the field of finance. The organization is dedicated to fostering the student’s knowledge of finance-related issues and job awareness by exposing members to some of the industry’s most prominent speakers, offering interactive workshops and assisting students make career contacts. For more information, contact the Department of Finance at 404/413-7310 or visit www2.gsu.edu/~wwtfs/.

Financial Planning Association (FPA) Alliance: This organization is open to students and alumni of the GSU PFP programs, as well as interested visitors. The club serves as a focal point for discussion of leading-edge issues in personal financial planning as well as career trends and opportunities in the industry. The Alliance also provides students with a direct link to the premier professional association in personal financial planning. For additional information, contact the PFP Program at 404/413-7462 or visit www.rmi.gsu.edu.

Future Healthcare Executives: This student organization conducts seminars, projects, and other activities that provide student members with the opportunity for constructive involvement, recognition, and representation in the profession of health services administration. The chapter provides faculty and students in health services administration with a forum for professional dialogue. It also helps students enhance career and academic opportunities through its relationships with local and regional health services executive groups. For more information, contact the Institute of Health Administration, 404/413-7630. www.gsu-fhe.org

Gamma Iota Sigma: This is a national organization of students interested in the various risk management professions — insurance, company risk management, actuarial science, employee benefits, personal financial planning — and of related faculty. The organization exists to encourage superior moral and academic achievement and facilitate close interaction between risk management professionals and students. The Zeta Chapter of Gamma Iota Sigma welcomes all majors. For more information, contact the Department of Risk Management and Insurance at 404/413-7500.

Graduate Business Association (GBA): This organization serves all graduate business students. The GBA’s objective is to provide career education and professional development to its members through contact with the Atlanta business community while creating an enjoyable, social atmosphere. Programs and activities are planned to achieve these goals. All students are invited to become active members of the organization by joining one of the following committees: Membership, Professional Development, and Social. For more information, contact Graduate Recruiting and Student Services 404/413-7167.

GSU Campus Talkers/Toastmasters: This is an officially chartered club of Toastmasters International. The mission of the club is to provide a supportive and positive learning environment in which members develop their communication and leadership skills through more effective thinking, speaking, and listening. For specific meeting and contact information, check the club’s website at www.gsu.edu/gsutoastmasters.
National Association of Black Accountants: This national membership organization has the primary purpose of developing, encouraging, and serving as a resource for greater participation by African-Americans and other minorities in the accounting and finance professions. Student membership in NABA is available to undergraduate and graduate students who are interested in careers in accounting or finance. For more information, contact the School of Accountancy, 404/413-7200.

National Black MBA: This national membership organization has as its primary focus the networking of the MBA students. This organization fosters the development and encouragement of African Americans as well as other minorities in MBA programs and other graduate programs. For more information, please contact – Robinson College of Business 404.413.7167 for the current leadership.

NET Impact: We are the new generation of leaders who are committed to using the power of business to improve the world. Our Global Network of MBA’s, graduate students and professionals are interested in like-minded individuals to join the cause. For more information, please contact – Robinson College of Business 404.413-7167 for the current leadership.

Personal Financial Planning (PFP) Club: This organization is open to students and alumni of the GSU PFP programs, as well as interested visitors. The club serves as a focal point for discussion of leading-edge issues in personal financial planning as well as career trends and opportunities in the industry. For additional information, contact the PFP Program at 404/413-7462 or visit www.rmi.gsu.edu.

Phi Chi Theta: Phi Chi Theta: A National Business and Economics Fraternity- Become a member NOW or work for us later!! Founded in 1924, the Upsilon chapter at GSU was initiated in 1929, and this is the only GSU business and economics fraternity!!! Members share a passion for developing critical business skills, cultivating leadership talent, and enriching professional networks. Our organization prides itself on fostering new business leaders by creating value and professional growth for each member. Please contact Dr. Marta Szabo White in the Department of Managerial Sciences for additional information, 404/413-7555.

Real Estate Alumni Group: This organization is open to alumni as well as graduate and undergraduate students who are interested in all aspects of real estate and land utilization to provide a social and intellectual atmosphere for the study of this professional area. For more information, contact the Department of Real Estate, 404/413-7720.

The Society for Human Resource Management: This society is an organization open to all undergraduate and graduate students who are interested in the field of personnel/human resources. Practitioners address students on career topics at periodic meetings. Applications and additional information may be obtained from the W.T. Beebe Institute of Personnel and Employment Relations, 404/413-7170.

Tau Alpha Chi (T.A.X.) is an honorary professional association. It is intended for students who are seeking a career in tax accounting or for those accounting students who have a general interest in tax issues. The primary objectives of T.A.X. are (1) to provide members a forum for in-depth tax discussions, (2) to promote association with professional tax practitioners, and (3) to encourage scholastic and professional excellence in the field of tax accounting. For more information, contact the School of Accountancy, 404/413-7200.
Other Organizations: Information on other student organizations, fraternities, and sororities in which some graduate students may be interested is available from the Office of the Dean of Students, Suite 300, Student Center, 404/413-1515.

7020 Office of Graduate Recruiting and Student Services

Graduate Recruiting and Student Services

6th floor, Robinson College of Business Building
35 Broad Street
404/413-7167

Toby McChesney, Assistant Dean of Graduate Recruiting and Student Services

Allison Jacobs, Director of Graduate Recruiting

Charlene Adams Watkins, Assistant Director of Integrated Student Services Global Cluster

Alvin Carter, Associate Director of Integrated Student Services MBA Cluster

Winifred Akande, Associate Director of Integrated Student Services Financial Cluster

Kumar Swaminathan, Assistant Director of Integrated Student Services Modeling Cluster

Tiffany Ashby, Associate Director of Integrated Student Services Managerial Cluster

Naomi Leader, Associate Director of Shared Services

Shantina Knox, Assistant Director of Admissions

Ian Schonberg, Assistant Director of Advising

Tracy Kuepper, Assistant Director of Student Services

Mission

The Graduate Recruiting and Student Services staff supports the college’s mission of academic excellence by promoting the college to prospective applicants and facilitating the application process to admit qualified students to the master’s program. The Graduate Student Services office helps graduate students become knowledgeable about academic programs, pertinent regulations, and student services available through the college and university.

Services
This office provides admission counseling to prospective applicants and assistance in selecting a degree program that meets their academic and professional goals. This department provides academic counseling, including new student orientation, preparing evaluations of students’ academic programs and academic standing, assisting students with course selection and schedule revisions each semester, explaining catalog regulations, and administering policies of the college and university.

7030 College Admissions

All documents and other materials submitted by or for persons in connection with their consideration for admission become the property of this institution and cannot be returned at any time. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the Office of Graduate Recruiting and Student Services by the application deadline.

No guarantee regarding admission can be made before an applicant's file is complete and has been reviewed by the Master’s Admissions Committee. Applicants must assume responsibility for all costs related to applying for admission regardless of the admission decision.

Admission is for entry in a specific program, major or status, and for a specific semester. A student who is admitted for one program, major, concentration or status may enter a different one only if, and after, formal approval has been given by the Master’s Admissions Committee of the college. An accepted applicant who wishes to defer enrollment to a future semester will be reevaluated according to the admission criteria in effect for the future semester. Reevaluation must be requested by the deadline for the desired semester of entry.

7030.05 Retention of Records

If an applicant does not complete enrollment for the semester in which admission is sought, the application must be renewed and submission of such additional credentials and information as may be requested by the Master’s Admissions Committee will be required. Incomplete application files are retained for a maximum of four years.

A student who earns master’s-level credit and later becomes inactive may be required to re-establish his or her file. A transcript of graduate credit earned at Georgia State University will be maintained indefinitely by the Office of the Registrar.

7030.10 Application Deadline Dates for Master’s Degree and Certificate Programs and Nondegree Status

Admission to flexible master's programs in the Robinson College of Business is possible for any term (fall, spring or summer). Admission to the cohort master's programs in the Robinson College of Business varies each term; please refer to the program’s website for term(s) of admission.
Listed below are the deadlines for submitting applications and all supporting materials. The deadlines are for three categories of applicants:

- All new applicants to submit applications for admission and all related materials including test scores
- Accepted applicants to request approval to change their semester of entry
- Denied applicants to request reconsideration

If the deadline falls on a weekend or university holiday, applications and materials will be accepted until the next workday following the deadline. To be guaranteed a decision for the desired term of entry, applications and all supporting documents must be received by these deadlines.

**International Applicants U.S. and International Deadlines:**

<table>
<thead>
<tr>
<th>Semester Applying</th>
<th>Abroad</th>
<th>Applicants in the U.S.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall (Aug)</td>
<td>March 15</td>
<td>May 1</td>
</tr>
<tr>
<td>Spring (Jan)</td>
<td>August 15</td>
<td>October 15</td>
</tr>
<tr>
<td>Summer (June)</td>
<td>September 1</td>
<td>February 1</td>
</tr>
</tbody>
</table>

Applicants are encouraged to apply early, which has several advantages:

- Better chance of securing university housing (fall entry, U.S. applicants). International applicants who wish to secure university housing should complete their applications even earlier due to the additional time needed to process the financial documents required for I-20s/DS-2019s.
- Better chance of qualifying for assistance through the university’s Office of Student Financial Aid before time to register for first term.
- Increased likelihood of eligibility for early registration (U.S. applicants).
- Increased likelihood of receiving immigration documents in time to arrive on campus for international orientation and registration for desired term (international applicants).
- More time to make plans for attending graduate school if accepted or make alternative plans if not accepted.

**7030.15 Application Procedures**

Refer to the Executive M.B.A. Program, the Professional MBA, and the Global Partners M.B.A. Program later in this chapter for information on applying to those programs.

**International Applicants:** Applicants who completed all or part of their education abroad may be required to have their foreign credentials evaluated by Joseph Silny or Educational Credential Evaluators. Course-by-course evaluations, equivalence to an, World Education Services, accredited U.S. degree (or number of years toward completion), and grade-point average equivalents are required.

**7030.20 Application Options**
There are two ways to apply. These options can be accessed by clicking on “How to Apply” at the college’s website: robinson.gsu.edu/apply/index.html.

- Applications can be submitted electronically. This is the preferred method.
- The application packet can be downloaded as pdf files and printed.

Follow the online directions when applying electronically. The instructions given below (Sections 7030.25-7060.75) are for the paper application process.

### 7030.25 Self-Managed Applications

When submitting paper applications, the Robinson College of Business requires self-managed applications to its master’s programs. This means that the applicant collects all credentials other than test scores and submits them at one time to the Office of Graduate Recruiting and Student Services. A notice acknowledging receipt of the completed application packet is sent to the applicant by Graduate Recruiting and Student Services. Self-managed applications are required for initial applications, requests for reconsideration by previously denied applicants, and requests by previously accepted applicants to change semester of entry.

This procedure eliminates any question about whether the applicant’s transcripts or other documents have been received. It also requires careful planning by the applicant, well in advance of the deadline for the desired semester of entry. The closing dates for receipt of the completed application packet and all test scores for each of the academic semesters are listed in the “Application Deadline Dates for Master’s Degree and Certificate Programs and Nondegree Status” section in this chapter.

The application instructions provide complete information on preparing the self-managed application packet. Applicants must use current application forms. Applicants must not submit incomplete packets; this will result in a substantial delay in processing the application. The entire application and all attachments must be legible. The following sections discuss the documents required.

All inquiries about the application process should be made to the following:

Robinson College of Business  
Office of Graduate Recruiting and Student Services  
Georgia State University  
P.O. Box 3988  
Atlanta, GA 30302-3988  
Phone: 404/413-7167  
Fax: 404/413-7162  
robinson.gsu.edu/prospective.html

### 7030.30 Master’s Application and Narrative Questions

The Application for Admission—Master’s Programs must be submitted by all applicants. It must be typed or printed legibly. In addition to asking for basic biographical and educational data, the master’s application also contains narrative questions. Answers to these questions must be typed. Evaluative interviews are not
part of the application process for most programs, although an interview may be requested, so it is important that applicants complete their application in a thorough and thoughtful way. This is the opportunity for applicants to present themselves to the Master’s Admissions Committee. It provides a way to highlight qualities relevant to success in a graduate business program that may not be evident in test scores and past academic performance. The application also is used to establish the applicant’s record on the university’s computer record system and with the Office of the Registrar. It is important that this information is coded completely and correctly.

**7030.40 Residency Information**

Residence data will be used by the university’s resident auditor to determine if an applicant is a Georgia resident for fee-payment purposes. It must be completed by all applicants. (See the “Regents’ Requirements for Georgia Resident Status” heading in the Financial Information chapter earlier in this catalog.)

**7030.50 Application Fee**

You will be assessed a $50 application fee with your application for most programs. The application fee is nonrefundable and does not apply toward registration fees. For each subsequent online application that you submit, you will be assessed another application fee.

**7030.55 Transcripts**

One official copy of the transcript of all previous college work are required from each institution previously attended. Each set of transcripts must be submitted in a sealed envelope from the institution. If an institution’s policies do not permit it to send official transcripts to applicants for use with self-managed applications or if the applicant is applying online, the transcripts may be sent directly to Graduate Recruiting and Student Services using the address given previously under the heading “Self-Managed Applications.” In this instance, applicants should indicate on the application that the transcripts will be sent separately by the appropriate deadline.

Transcripts are required from each institution regardless of the length of time the applicant attended the institution or the applicant’s status while at the institution or whether the grades are listed on another institution’s transcript. EXCEPTION: Applicants who have attended Georgia State University must list their dates of attendance on their applications, but they do not have to request their Georgia State transcript. Graduate Recruiting and Student Services will obtain a record of the Georgia State coursework.

One copy of each of the transcripts will be given by Graduate Recruiting and Student Services to the registrar of the university of the student’s permanent file. A person who has attended Georgia State University as a degree-seeking student may submit only one copy of the transcripts from each institution attended prior to entering Georgia State University; two copies are required from all institutions attended after having last attended Georgia State University.

An applicant who may have been granted provisional admission pending completion of the undergraduate degree must file one official copy of a supplementary transcript showing the awarding of the degree as soon as it is available but at the latest the first day of registration of your second semester of enrollment.
7030.60 Admission Tests

The Graduate Management Admission Test (GMAT) and the General Test of the Graduate Record Examinations (GRE) are the primary admission tests for admission at the master's level in the Robinson College of Business.

Applicants to the programs listed below may submit scores on either the GMAT or the General Test of the Graduate Record Examinations (GRE):

- Master of Business Administration
- Master of Business Administration/Master of Health Administration joint programs
- Master of Business Administration/Juris Doctor joint programs
- Master of Professional Accountancy
- Master of Actuarial Science
- Master of International Business
- Master of Science majors in Business Economics, Finance, Managerial Sciences
- Risk Management and Insurance
- Master of Science in Health Administration
- Master of Science in Real Estate
- Master of Science in Wealth Management
- Master of Taxation [Law Scholastic Aptitude Test (LSAT) scores may be submitted by MTx applicants only.]
- One Year MPA, One Year MS in Marketing, One Year MS in Information Systems, One Year MS in Finance, One Year Master of Global Hospitality Management, One year MS in Information Systems Audit & Control, EX MS MIT

Graduate Certificates in:

- Brand and Customer Management (see below)
- Accountancy
- Enterprise Risk Management
- Information Systems
- Real Estate
- Strategic Sales Leadership

This certificate program is only open to MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University. Enrollment status of applicants to this program will be verified.

GMAT

The GMAT is designed to measure aptitude for graduate study in business and is not a measure of knowledge in specific business subjects. Competitive scores are required for a successful application, and the level of competitiveness is subject to change throughout the year. Scores significantly below current averages are not likely to be competitive. GMAT scores may not be more than five years old at the desired semester of entry. Applicants whose scores do not meet this age limit must retake the GMAT and have the...
current scores sent to GRSS.

The GMAT should be taken as far as possible in advance of the desired semester of entry since official scores must be received by the stated deadline for complete applications. Scores from GMAT will be sent to Graduate Recruiting and Student Services two weeks after the test date. The “candidate’s copy” of the score report is not acceptable. Admission decisions will not be made based on the unofficial scores given to the test taker at the conclusion of the GMAT CAT.

In North America and most other parts of the world, the GMAT is administrated only as a computer-adaptive test (CAT). Prospective applicants who are located in a country that does not currently offer the GMAT CAT and who cannot travel to another country to take the test should contact Customer Service at the Pearson VUE: GMATcandidateservicesamericas@pearson.com

The GMAT is administered worldwide by Pearson VUE instead of Educational Testing Service (ETS). The college’s code number for master’s-level programs is 5251.

The GMAT Information Bulletin and the GMAC Website (www.gmac.com) contain detailed information about the options for registering to take the test, the most up-to-date listing of test centers, and instructions for having scores sent to desired schools.

GRE

The GRE is administered worldwide and year round. The General Test is offered only on the computer in most locations. It is an adaptive test measuring verbal, quantitative, and analytical writing skills.

Updated information about the GRE computer-based and paper-based test centers and registration procedures may be found on the GRE Web site shown below.

GRE information may be obtained by contacting the Educational Testing Service in one of these ways:

GRE-ETS
P. O. Box 6000
Princeton, New Jersey 08541-6000, USA
Phone: 1-609-771-7670 (8:00 a.m.—7:45 p.m. EST)
Fax: 1-610-290-8975
E-mail: greinfo@ets.org
www.gre.org

GRE scores may not be more than five years old at the desired semester of entry. Applicants whose scores do not meet this age limit must re-take the GRE or take the Graduate Management Admission Test and have the current scores sent to Graduate Recruiting and Student Services.

Applicants taking the GRE must request that their scores be reported to Georgia State University. Those who have previously taken this test must request the Educational Testing Service to report their scores to Georgia State. The university’s code number is R5251. The “candidate’s copy” of the score report is not acceptable.
The GRE should be taken as far as possible in advance of the desired semester of entry since official scores must be received by the stated deadline for complete applications. Scores from the GRE CAT are sent electronically within 30 days of the test date.

7030.65 Interviews

Applicants who are strong candidates for the program to which they are applying will be invited to interview prior to their acceptance. Those selected to interview will be notified by a graduate recruitment coordinator. Applicants are therefore encouraged to provide complete answers to all questions asked on the applications. Applicants who have questions about the information in this catalog concerning admissions, the programs, or related matters, however, are invited to contact Graduate Recruiting and Student Services at any time during the application process.

7030.71 Resume

A resume is a required part of the application for all master's-level programs in the Robinson College of Business.

7030.70 Letters of Recommendation

Letters of recommendation are not part of the admissions process for most programs. Applicants who wish to submit them, however, may do so. Applicants who choose to submit letters can use the online recommendation system or collect the letters from their recommenders in sealed envelopes; recommenders must sign their names across the sealed portion of the back of the envelope. Letters of recommendation must be submitted unopened with the rest of the application packet or submitted by the recommender using the online application system. They may not be reviewed by the applicant at any time. An applicant who does not wish to waive access to a letter of recommendation must arrange for the recommender to provide a copy.

7030.75 Immunization Certification

The Board of Regents of the University System of Georgia requires that accepted applicants who have never attended Georgia State University submit proof of immunization from measles, mumps, and rubella (MMR), varicella (Chicken Pox), tetanus, and diphtheria before being allowed to register. Forms for providing this certification to GSU Student Health Services are available online at www.gsu.edu/health/forms.html. Questions about the requirement may be directed to GSU Student Health Services (141 Piedmont Ave. NW, Suite D, Atlanta, Georgia 30303-2417, telephone: 404/413-1930, fax: 404-413-1955)

The college can consider applications for master's-level admission before receiving this documentation. Applicants will be eligible only for conditional admission and may register for their initial semester prior to receipt of proof of immunization. However, registration for subsequent semesters will not be allowed until acceptable proof of immunization has been received.

Applicants born before January 1, 1957, are considered to be immune to measles and mumps, but the rubella immunization is required; this requires one vaccination.
Applicants born January 1, 1957, or later who have not already received the MMR immunization or who cannot document that they have received it must have two vaccinations at least 30 days apart. Applicants in this category should be aware of this time constraint. Sufficient time before registration may not be available to begin the immunization process after an admission decision is received.

U.S.-born applicants born after 1980 and all foreign-born applicants regardless of year of birth must show proof of vaccination, reliable history of varicella disease, laboratory/serologic evidence of immunity, or history of herpes zoster (shingles).

7040 General Admission Criteria

(Refer to the Executive M.B.A. Program, the Professional MBA, and the Global Partners M.B.A Program later in this chapter for information about admission criteria for those programs.)

The Master's Admissions Committee, comprised of faculty representatives and admissions staff, determines the eligibility of each person who applies for master’s-level admission. Admission is competitive. Each applicant is evaluated individually and among the current group of candidates. In this evaluation, primary consideration is given to the applicant’s academic record, educational background, and test scores. Secondary consideration is given to the applicant’s educational objectives, narrative information, experience in business or government, professional activities, and character. The Master’s Admissions Committee prefers that applicants have some meaningful full-time work experience. These elements together must indicate a favorable prospect of success in graduate study for an offer of admission to be made. The college is also aware of the appropriate provisions of its accrediting agency, AACSB International—The Association to Advance Collegiate Schools of Business, in making admission decisions.

A bachelor’s degree in any field of study from a regionally accredited college or university is required for admission to all of the degree programs, or to the certificate program, of the Robinson College of Business. Only coursework from institutions with accreditation equivalent to that granted by the Commission on Colleges of the Southern Association of Colleges and Schools is considered in evaluating an applicant for admission.

In reviewing the past academic work of applicants, the Master's Admissions Committee evaluates both the overall undergraduate GPA and the junior/senior GPA. In evaluating scores on the GMAT, the committee looks for a balance between verbal and quantitative scores in addition to considering the total score and the analytical writing score, because all of the master’s programs require strong communication skills and quantitative ability. Similar evaluations are made when GRE scores are submitted for applications to eligible programs.

In cases where the applicant has done additional accredited undergraduate work beyond the bachelor's degree or has done accredited graduate work, a “most recent two-year GPA” will be calculated. This is defined as the most recent ninety quarter hours or sixty semester hours of coursework (to the nearest whole term). If this GPA shows more academic promise than the junior/senior GPA, it will be given more weight in the admission consideration.

Transcripts test scores, and other materials are received and evaluated by the Office of Graduate Recruiting and Student Services. Applicants are not required to submit a general certification of their state of health.
but are required to submit proof of immunization against measles, mumps, rubella, varicella, tetanus, and diphtheria (see 7030.75 above). Forms for providing this certification are available online at http://health.gsu.edu/general-information/103-2/. Also, the college reserves the right to investigate the health, character, and personality of each applicant.

Applicants are not required to submit a general certification of their state of health but are required to submit proof of immunization against measles, mumps, rubella, varicella, tetanus, and diphtheria (see 7030.75 above). Forms for providing this certification are available online at www.gsu.edu/health/forms.html. Also, the college reserves the right to investigate the health, character, and personality of each applicant.

The Robinson College uses a combination batch and rolling admissions process. Admission decisions are communicated in writing to applicants as soon as possible after all application materials have been received and evaluated. Admission decisions cannot be given by telephone or email, nor can they be given to any person other than the applicant without a written release from the applicant to do so.

Graduate Admissions – General

Georgia State University welcomes applications from all qualified individuals regardless of race, color, sex, religion, creed, age, sexual orientation, gender, disability, veteran status or national origin. Admission is based on a number of factors including, but not limited to, an applicant’s academic record, test scores, experience, circumstances, good conduct and character. Admission is a competitive, selective process and meeting minimum requirements does not guarantee acceptance.

Absent extenuating circumstances, good disciplinary standing at previously attended colleges and universities is a condition of admission for all applicants. For purposes of admission, good disciplinary standing means that the applicant has no pending disciplinary charges, outstanding disciplinary sanctions or disciplinary issues that would prevent the applicant from re-enrolling at previously attended postsecondary institutions.

Applicants with a criminal and/or disciplinary history who are determined to be otherwise admissible for a respective term based on their academic record and other credentials are required to complete an admissions background review process before an admission decision is made by the university. Instructions for completing that review process are communicated to the applicant after the university has determined that the applicant is otherwise admissible for that term.

Omissions or misrepresentations on an application for admission are grounds for automatically invalidating consideration by, acceptance to and continuation at Georgia State. Applicants have a duty to update their application with Georgia State when information changes after application submission.

Graduate Admissions Appeals

The Chair of the academic department of the graduate program and the Associate Provost for Academic Programs are the President’s designees for purposes of hearing Graduate Admissions Appeals.

Applicants for graduate admission who are denied for reasons related to disciplinary/criminal history or falsification of application may appeal the denial to the Associate Provost for Academic Programs within
twenty (20) calendar days of the date of the denial letter. The decision of the Associate Provost for Academic Programs is final.

Applicants for graduate program admissions who are denied admission due to academic ineligibility may appeal the denial to the department chair within twenty (20) calendar days of the date of the denial letter. The decision of the department chair is final.

Notice to Applicant of Background Review Requirement

The University requires applicants who have a criminal or disciplinary history to complete a background review. Please contact the Background Review Records Coordinator at 404-413-1515 for information regarding completion of the review process as soon as possible to ensure timely processing of your application.* The Background Review Records Coordinator will let you know what supplemental documentation you will need to provide to complete the process. You may be required to provide documentation such as:

1. a personal statement explaining the circumstances surrounding criminal or school disciplinary violations, and the current status of any charges and sanctions;
2. copies of criminal or school disciplinary records; and
3. a background check (if you have a criminal history);

All materials submitted as part of an application for admission become and remain the property of the university and will not be returned to the applicant, duplicated, or transferred to another institution.

Please note that a final admission decision cannot be made until you complete all requirements of the background disciplinary review process. *Applications may be withdrawn from review if the background review process is not initiated within two weeks.

7050 Master’s Level Nondegree and Postgraduate Status

The master’s level nondegree and postgraduate classifications are provided by the Robinson College of Business in recognition of the fact that education is a life-long process and that people may wish to enroll in one or more graduate courses at various times for personal or professional reasons without completing an entire degree or certificate program.

7050.10 Definition of Nondegree Status

Nondegree students are those who have followed the same admissions procedures and met the same admissions deadlines and criteria as applicants to the Master of Business Administration program, but they do not wish to pursue a graduate degree or certificate. These students are admitted to enroll in graduate courses of their choice in the Robinson College of Business. They may enroll for credit or for audit, according to the same criteria as any other student.

All master’s-level nondegree students will complete the Business Communication Skills Requirement explained in this chapter. The regulations, policies, and procedures given in this chapter also apply to
nondegree students.

7050.20 Definition of Postgraduate Status

Postgraduate students are those who have received a graduate degree from the Robinson College of Business and wish to reenter to take additional graduate courses in this college, but they do not wish to pursue another graduate degree. They may also enroll for credit or for audit.

7050.30 Responsibilities/Continued Enrollment

Nondegree and postgraduate students are responsible for meeting all academic regulations of the college and the university, including the requirements for maintaining good academic standing. It is therefore important that those students be familiar with the provisions of the graduate catalog in effect at the time of their enrollment in either status. Students may continue to enroll in nondegree or postgraduate status indefinitely, as long as at least a 3.00 cumulative GPA is maintained. No more than nine semester hours of coursework taken in nondegree or postgraduate status, however, may be subsequently applied toward a graduate degree or certificate of this college. (See below.)

Nondegree and postgraduate students must follow proper registration procedures each semester they wish to enroll; these classifications do not waive the responsibility to register correctly and on a timely basis.

Some academic units do not permit nondegree and/or postgraduate students to enroll in their courses due to the demand for the courses by degree-seeking students.

All prerequisites to any course taken must be met. These classifications are not intended as a means to circumvent proper course sequencing.

Neither nondegree status nor postgraduate status in the Robinson College of Business is provided for students who intend to qualify for any degree, certification, or other status in another college of Georgia State University. Students with this goal must, at the first opportunity, contact the appropriate graduate admissions office for procedures and criteria for establishing graduate status in that college.

7050.35 Change of Program

Currently enrolled nondegree or postgraduate students who wish to change to degree/certificate status must file a new admissions application and application fee for the program desired.

Further information on application procedures for changing to degree or certificate programs in the Robinson College of Business may be found in 7080.12 below or obtained from the Office of Graduate Student Services.

Any credit earned while in nondegree or postgraduate status must be no more than seven years old at the time the student graduates if it is to be counted for credit toward the program to which the student is changing.

Grades from all attempts at all courses that are later counted toward degree or certificate credit will become
part of the student’s GPA for that program. This means that the nondegree and postgraduate statuses are not intended as a means to make attempts at courses that are anticipated to be difficult with the intention of having only the final attempt count in the GPA for the degree/certificate program.

7060 Transient Students and Cross Registration

7060.10 Transient Students

Students enrolled in a graduate degree program at another accredited institution may take graduate courses in the college. A maximum of nine semester hours may be taken as a transient student unless approval for additional hours is requested by the student’s home institution. Transients who later enroll in an RCB master’s level program may apply a maximum of nine appropriate graduate credit hours earned in transient status toward the requirements of the RCB program.

To become a master’s degree-seeking student, a transient student must submit a new online admissions application, application fee, and the required additional credentials by the normal application deadline for the semester in which he or she wishes to begin degree work.

The transient application materials described in items 1-3 below must be submitted to the Office of Graduate Recruiting and Student Services.

1. The online admissions application
2. A fifty dollar application fee. This fee is nonrefundable.
3. A “Certification of Good Standing” completed by the home institution. This form is available from Graduate Recruiting and Student Services. After an appropriate official at the home institution has completed this form, it should be placed in an envelope, sealed with the official’s signature across the sealed portion of the envelope and returned to the applicant for submission with the other transient application materials.

Deadlines for receipt of all materials required for admission as a transient student in each semester are shown below:

<table>
<thead>
<tr>
<th>Desired Semester of Entry</th>
<th>Deadline Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall (August)</td>
<td>July 1</td>
</tr>
<tr>
<td>Spring (January)</td>
<td>December 1</td>
</tr>
<tr>
<td>Summer (June)</td>
<td>May 1</td>
</tr>
</tbody>
</table>

A transient student should come prepared with alternative courses approved by the home institution. Georgia State University does not guarantee that the courses desired will be offered or available. If, for example, courses are full when a transient attempts to register, the student will not be admitted to these classes.

A transient student must meet all prerequisites for Georgia State courses as defined by Georgia State University. Enrollment in some RCB graduate courses is monitored for completion of prerequisites. Examples are MBA prefixed courses and courses in accounting and finance. It is recommended that transient students have personal copies of their transcripts readily available to substantiate completion of
prerequisites.

If a transcript is needed by the home institution, the student must make a request via the university website by using your pass code. The university does not automatically forward transcripts to the home institution.

A student who attends Georgia State University as a transient student normally will be allowed to attend only for the one semester for which acceptance was granted. A transient student who wishes to enroll for a subsequent semester(s) at Georgia State University must do the following:

1. File an Application for Reentry with the Office of Graduate Recruiting and Student Services for each subsequent semester.
2. Have the home institution submit another Certification of Good Standing to the Office of Graduate Recruiting and Student Services if the previous one has expired. These certifications expire after one calendar year or after completion of the number of courses for which approval was granted, whichever comes first.

Reentry must be approved by Graduate Student Services to be official. The college reserves the right to request a new Certification of Good Standing before the expiration date and/or a transcript from the home institution. If this information is deemed necessary, the transient student will be notified.

Transient students who apply for reentry are cautioned that approval may not be granted by GRSS if the grade-point average in the course(s) taken at Georgia State University is lower than 3.00, which is the minimum required to maintain good standing at the graduate level.

A complete reentry application and any required document must be submitted by the following deadlines:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Priority Deadline</th>
<th>Regular Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>February 1</td>
<td>June 1</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>October 1</td>
<td>November 1</td>
</tr>
<tr>
<td>Summer Semester</td>
<td>February 1</td>
<td>April 1</td>
</tr>
</tbody>
</table>

7060.20 Cross Registration

Georgia State University participates in the Atlanta Regional Consortium for Higher Education (ARCHE) cross registration agreement. Please see section 1320 Cross Registration earlier in this catalog for complete information. Students from other ARCHE institutions may enroll in graduate courses in the Robinson College of Business provided they meet the academic eligibility and other requirements of the agreement, and show evidence that any prerequisites for the RCB courses they wish to take have been met.

7070 International Students

See also the note at the beginning of the “Application Procedures” section earlier in this chapter for information specifically for international applicants applying from abroad.

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The institution subscribes to the principles of international education and to the basic concept that only
through education and understanding can mutual respect, appreciation, and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus, because we believe in a cultural exchange program which will be beneficial to our own student body, to the international students involved, and to metropolitan Atlanta.

7070.10 English Proficiency

In addition to meeting the regular admission requirements, an international applicant whose native language is other than English must submit official scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) before admission can be considered.

Exceptions: Neither the TOEFL nor IELTS is required of U.S. naturalized citizens or international applicants who have received a degree from a regionally accredited U.S. institution. Documentation of citizenship status or proof of a U.S. degree must accompany the application.

The acceptable English proficiency scores for the TOEFL are at least a 610 (paper), 253 (computer), and 101 (internet) with a score of at least 25 in each area. To electronically send TOEFL scores to our office, please use the college’s TOEFL code number for master’s-level programs, 5251 and the college’s department code number, 02.

The acceptable English proficiency scores bands for the IELTS are 7 (Good User), 8 (Very Good User) and 9 (Expert User). Please send all IELTS scores to Georgia State University, J. Mack Robinson College of Business, Graduate Recruiting and Student Services, PO. Box 3988, Atlanta, GA 30302-3988.

An accepted international applicant whose test results indicate a lack of proficiency in English will be required to enroll in and satisfactorily complete Business Communication 7255. If BCom 7255 is assigned it becomes a formal part of the international student’s degree requirements and must be given first priority in registering for courses.

This section was corrected on February 2016

7070.20 Academic Credentials

Each applicant must present “official” credentials attesting to academic achievement as to level and performance. “Official” documents will vary from country to country, but should be original documents with authoritative signatures, seals, stamps, etc. Whenever possible, these should be sent by the institution responsible for issuing such documents. In cases where it is impossible for an applicant to have these credentials sent from such institutions, the applicant should forward a duly “notarized” or “attested to” copy. The notarization should be done by a proper government official or proper representative of the American Embassy in the country.

When the documents are in a language other than English, they must be accompanied by translations. These translations must be the original form and contain acceptable notarization as described above for a copy of the original documents. Translations should be made by the American Embassy, the home country
Embassy, or an appropriate government official. As a general rule, documents translated by the Office of the American Friends of the Middle East (AFME) and the Institute of International Education (IIE) will be acceptable.

Applicants who completed all or part of their education abroad may be required to have their foreign credentials evaluated by Joseph Silny (www.jsilny.com), World Educational Services (www.wes.org), or Educational Credential Evaluators (www.ece.org). If this evaluation is needed, the applicant will be notified by the Office of Graduate Admission and Student Services. All evaluations by outside services are subject to review by the Master’s Admissions Committee.

Course descriptions (syllabi) and any other information submitted in an attempt to qualify for exemption from course requirements must meet the same criteria for “official” documents as described above. These documents must be received directly from the institution and have a cover letter written on the institution’s letterhead mentioning the student’s name and certifying that the outline is comparable to the way the course was taught when the student took it.

7070.30 Financial Resources

Georgia State University requires international applicants requesting F-1 visa status to not only meet academic admission requirements, but also to document his or her ability to meet the financial requirements while in attendance. Applicants needing a student or exchange visitor’s visa are required to show financial capability for their full degree program and may be required to have an amount equal to the estimated cost of the first academic year on deposit at Georgia State University before a certificate of eligibility and an acceptance letter will be issued. Continuation of the visa after the first calendar year may require further proof and certification of the applicant’s financial ability.

Specific amounts are available from International Student and Scholar Services (www.gsu.edu/isss).

International applicants should be aware that the minimum financial resources requirement for a certificate of eligibility is based on an extremely modest budget and standard of living and do not include the cost of owning a car. Tuition expenses for Robinson College of Business students are based on the minimum enrollment required for graduate international students, which is nine hours for the fall and spring semesters and six hours in the summer. Students who plan to take 12 or 15 hours a semester must budget for the costs of additional tuition and books. For planning purposes, assume an additional $3,300 per course per semester up to the 15-hour plateau for tuition and additional $125 per course for books.

Financial aid from the university is not available for international students. International students may be considered for graduate assistantships (GRA), and if an assistantship is granted prior to the student commencing studies at Georgia State, the GRA stipend and tuition waiver may not be counted toward the minimum financial resources required for issuance of the certificate of eligibility.

It is extremely unwise for students who receive assistantships not to continue to include full nonresident tuition in their budgets. No guarantee can be made that the assistantship will continue to be available from semester to semester.

7070.35 Full-time Course Load
The international student with a student visa is required to carry a full course of study in fall and spring semesters; the summer semester can be a vacation semester or a semester with a reduced course load unless summer is the student’s first term. Students who choose to enroll during summer semester must meet the minimum course load required for an assistantship if received during that semester.

A full course of study at Georgia State University is 12 hours for undergraduate students and nine hours for graduate students. International students will not be admitted as nondegree students.

See also the heading titled “International Student and Scholar Services” in the Student Life and Services chapter of this catalog.

### 7080 College Academic Regulations

#### 7080.02 Students’ Responsibility

Graduate students must assume full responsibility for knowledge of the rules and regulations of the college and the university and of departmental, school, or institute requirements concerning their individual programs. Enrollment in a graduate program of this college constitutes students’ acknowledgement that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to read carefully Section 1300, “Academic Regulations” that applies to all of the university’s programs and the regulations specific to their RCB programs in this chapter. Students are also urged to read all of the requirements of their degree, program, or status that are presented in this chapter.

#### 7080.04 Commitment to Master’s Programs

The Robinson College of Business provides a flexible schedule of courses for some of its master’s programs. The schedule attempts to accommodate the needs of a diverse student body, particularly with respect to students’ employment. However, the faculty of the college expects that students enrolled in a master’s program will bring to that program a commitment to complete their degree requirements in a timely manner. The faculty believes that maximum benefit will be derived from a program if students devote a period of concentrated study to the disciplines that constitute the master’s programs.

Before deciding to enroll in a master’s program of this college, students must examine seriously and realistically their abilities to adjust their personal and professional schedules to accommodate the challenge of graduate study. Students or applicants with questions about the commitment needed to complete the master’s programs should schedule an appointment with a Graduate Recruitment Coordinator in the college’s Office of Graduate Recruiting and Student Services.

The course load of master’s students may vary with the circumstances of the individual student each semester. Students normally enroll in three to 15 semester hours a term depending on the program. In determining each semester’s course load, students must balance other time constraints (work, family, civic, and other responsibilities) with the need to make reasonable and timely progress toward completion of the program within the five-year time limit.

If a student in good standing needs longer than five years to complete the master’s degree, they may petition for an extension of the time limit up to a maximum of seven years. Courses more than seven years
old at the time of graduation expire and must be repeated or replaced with more current courses. Students who need more than five years to complete the degree requirements should schedule an appointment with an advisor in the Office of Graduate Recruiting and Student Services.

7080.06 Conduct

Students are expected to observe generally accepted standards of conduct and to assume personal responsibilities appropriate to potential business and professional leaders. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, the faculty, or other students. The formal policy of the university concerning student rights and obligations is under the heading “University Code of Conduct” in the General Information chapter of this catalog.

7080.08 Changing Semester of Entry

Admission to a master’s-level program is for the specific semester stated in the acceptance letter. Anyone who does not enroll for the semester for which acceptance was granted must notify the Office of Graduate Recruiting and Student Services so his or her records may be updated to a future semester and reevaluated according to admission criteria in effect for the future semester. Deadlines for notification to change to each semester are shown below:

Change Semester of Entry to Deadline Date
Spring (January) September 1
Summer (June) February 1
Fall (August) April 1

If the deadline falls on a weekend or a university holiday, requests to change semester of entry will be accepted until the next workday following the deadline.

7080.10 Catalog Editions

Normally, students will be permitted to graduate under the provisions of the graduate catalog in effect at the time of first enrollment. Student may choose to graduate under the provisions of a subsequent graduate catalog; that is, they may choose to change their “catalog edition.” Students who choose to do this must meet all provisions of the subsequent graduate catalog.

Robinson College students are required to change to the current catalog edition when they change programs/statuses or MS majors or after certain absences from the program, as explained in the next two headings below.

7080.12 Changing Majors, Programs or Status (Master's Level)

An M.B.A. student who wishes to change concentrations within the M.B.A. program may begin the process by notifying the Office of Graduate Recruiting and Student Services in writing, no later than the first week of their graduation term, and consulting the graduate catalog to determine requirements for the new concentration. Written notification of the decision will be provided.

An RCB master’s student who wishes to change majors within the M.S. program or to change programs or
status (for example, M.B.A. to M.S., C.R.E. to M.S.R.E., M.P.A. to M.S.I.S.A.C, M.S. to M.S.I.S.A.C, M.S.-MGS. to M.S.-H.R.M., nondegree to M.B.A.) may begin the process by notifying GRSS in writing. For programs that require faculty review as part of the admissions process, the file of the student will be sent to the appropriate faculty representative for a recommended admission decision. A student who has applied for admission to a new program will be notified in writing of the decision and, if approved, of any foundation courses required by the new program. Changes in M.S. major and changes in program require that students making such changes follow the program requirements of the graduate catalog in effect at the time of the change.

7080.14 Noncontinuous Enrollment and Requests to Reenter

Absences shorter than one calendar year: Students continue to be eligible to register until they have not registered for one calendar year, except as noted below. Registration is defined as remaining registered until at least the end of the official late registration period. See the heading titled “Reentry Students” in the Registration and Reentry chapter earlier in this catalog.

Absence from the program is defined as not registering for graduate or relevant undergraduate courses or registering for such courses but not earning degree credit (minimum grade of C-), that is, earning D, F, W, or WF.

NOTE: Graduate students must register for at least a total of six semester hours of course work during any period of three consecutive terms (fall, spring, summer) until completion of degree. Failure to meet this standard for “continuous enrollment” will require the graduate student to apply for reentry.

Absences of one calendar year or longer: All students who wish to reenter one of the master’s-level programs or nondegree status after an absence of one calendar year or longer must meet the degree requirements and academic regulations of the graduate catalog current upon return, along with other reentry provisions as may be in effect.

Reentering students who have earned a minimum of 18 semester hours of appropriate credit at Georgia State University with a minimum GPA of 3.00 will be eligible for reentry without being required to meet current admissions criteria.

“Appropriate credit” means assigned foundation courses and/or courses that are applicable to the students’ current program.

Students who have not earned at least 18 semester hours of appropriate credit at Georgia State University with a minimum GPA of 3.00 must reapply and meet current admissions criteria. The provision to meet current admissions criteria includes submission of current scores on the Graduate Management Admission Test if the latest score on file will be more than five years old at the time of reentry.

7080.16 Reentry Procedures

Reentry applications must be submitted by the deadlines as shown for each term in Section 1100, “Reentry” earlier in this catalog. Reentry applications are available online from the Office of Graduate Recruiting and Student Services website.
Reentry applicants should request that the registrar of each school attended since their last enrollment at Georgia State University send an official transcript to the RCB Office of Graduate Recruiting and Student Services GRSS.

Transient students should refer to the heading titled “Transient Students” earlier in this chapter.

Graduate students normally reenter the same college and program/status in which they were last enrolled. Students who have attended Georgia State in both undergraduate and graduate categories may apply to reenter any undergraduate or graduate program/status in which they were enrolled. Exception: Students who have graduated and wish to reenter in order to take additional graduate level courses but not earn another graduate degree or certificate will reenter as post-graduate (PG) students.

RCB master’s students who wish to reenter this college under a new RCB degree or major or who have graduated from one graduate program in RCB and who wish to return to take courses for another graduate degree or certificate must file a new application for admission rather than a Reentry form. Graduate Student Services will evaluate the request to change degrees or majors in accordance with the relevant regulations of the college.

Reentry approval is valid for the semester applied for. Students approved for reentry who do not register for the semester for which they applied, must submit a new reentry application for future semesters.

7080.18 Enrollment in Approved Courses

Students must not attend courses for which they have not officially registered and paid. Properly completing the registration process by the published deadline for each term is the responsibility of each student.

Students must enroll in courses that are part of the approved curriculum for the program to which they have been accepted. Students who do otherwise are subject to loss of credit and/or loss of eligibility to continue to register. Students in colleges other than the Robinson College of Business who take RCB courses may do so only if the courses are part of the program of study in the other college. For students to follow the program of study for an RCB degree or certificate, they must qualify for admission to the RCB program.

7080.20 Enforcement of Course Prerequisites

The faculty of the Robinson College of Business expects all students, regardless of status (degree seeking, nondegree, transient), to have satisfied the prerequisites for all courses for which they are registered. This expectation includes course prerequisites and computing skills prerequisites.

Satisfaction of prerequisites is enforced in the Robinson College of Business in varying ways. Prerequisites for some courses are monitored by the college or an academic unit once the term begins with violators withdrawn about the third week of the term, resulting in loss of fees and no opportunity to register for a replacement course. Other courses are monitored by the individual professors, who can also require violators to be withdrawn. The registration system will verify completion of prerequisites at the time of registration for selected courses. Students must assume this responsibility.
Prerequisites for each course are found in the Course Descriptions chapter of this catalog. The current catalog must always be consulted before registration to determine course prerequisites. Questions about prerequisites can be directed to the advisors in the Office of Graduate Recruiting and Student Services.

7080.22 Day/Night Programs

There are no differences in admission requirements and degree requirements for students based on whether classes will be taken during the day or at night. The master’s programs (with the exception of the M.A.S. program) may be completed entirely at night. Students may take only night classes or a combination of day and night classes, whatever is suitable for their particular circumstances each semester.

7080.24 Separate Graduate and Undergraduate Programs

Except for the circumstance described in the regulation below titled “Policy on Allowing Undergraduates to Take Graduate Courses,” the graduate and undergraduate programs of Robinson College are entirely separate and only those persons who have been admitted to a graduate status may enroll in courses numbered 6000 or higher. No undergraduate course credit, including that obtained in required background work for a master’s degree, may be applied toward any of the master's-level programs.

7080.26 Policy on Allowing Undergraduates to Take Graduate Courses

Undergraduate students with a cumulative grade-point average of 3.50 or higher who have at least 18 semester hours of degree credit at Georgia State University and who are in their senior year may petition to take up to two graduate courses in the Robinson College of Business in lieu of undergraduate courses. Students interested in petitioning should contact the RCB Office of Undergraduate Academic Assistance for a statement of restrictions and procedures pertaining to this policy.

7080.28 Double Concentrations and Multiple Master's Degrees

An M.B.A. student who wishes to qualify for an additional concentration may do so successfully by completing 12 semester hours of appropriate coursework (See “Regulations for the M.B.A. Degree” for the list of M.B.A. concentrations and their requirements and for information on career paths that can lead to dual concentrations.) For double concentrations within the M.B.A. program, electives can be counted toward both concentrations to the extent they are acceptable in both. [NOTE: The Graduate Program Council may establish minimum hours requirements for students earning multiple degrees.].

The earning of the second concentration will be confirmed by letter from the Office of Graduate Recruiting and Student Services, upon written request by the student, only if the additional courses are completed before any of the student’s M.B.A. credit will be more than seven years old. The grades in the additional hours must not cause the student’s cumulative GPA to fall below 3.00. All grades must be “C-” or higher.

A student may take a particular master’s degree only once (except as noted below). However, a student who holds a master’s degree of this college may qualify for a different master’s degree of this college. To so qualify the student must meet all admission requirements in effect for the second degree and thereafter fulfill all requirements for the second master’s degree. Along with all other requirements, the student must complete a minimum of 18 additional semester hours of appropriate credit in residence at Georgia State University for the second and each subsequent degree with appropriate grades and in coursework that has
not been applied in satisfaction of the requirements of any other degree. This minimum residence requirement is permitted only when all courses to be applied toward the subsequent degree will be no more than seven years old upon completion of all degree requirements. If the seven-year time frame is not met, the minimum residence requirement for a second (or subsequent) master’s degree is 24 semester hours with appropriate grades and in coursework that has not been applied in satisfaction of the requirements of any other degree. Once the 24-semester-hour residency is met, students may transfer approved course work completed elsewhere in accordance with the college's standard transfer-of-credit regulations.

Courses taken to earn an additional MBA concentration must be separate from any courses taken to meet the minimum residency for an additional degree. This applies whether the courses for the additional designations are taken before or after the first degree has been awarded. The final decision about the minimum course credit required for additional concentrations, and/or degrees rests with the Robinson College of Business.

A student who holds an M.S. degree from this college and wishes to earn an M.S. in another major must follow the provisions for qualifying for a different master’s degree (described earlier in this section).

7080.30 Standards of Performance

The dean or the associate dean for master’s programs of the college may require that a student withdraw from a particular course or courses, from a master’s program, or from the college because of unsatisfactory academic work or for other adequate reason. To continue in a master’s program, a student must make reasonable and timely progress in terms of grades and courses toward the degree or certificate concerned. The student’s progress may be reviewed each semester.

As a result of this review, any student whose scholastic performance does not indicate appropriate progress may be required to reduce the course load or may be required to withdraw from the program.

7080.32 Scholastic Discipline: Master’s Programs and Status

Each student admitted to a master’s program or status of the college must maintain a grade-point average (GPA) in the program of 3.00 or higher in all attempts at all courses numbered 6000 and higher. (This means that the original grade in a course that is repeated is not dropped from the cumulative GPA for purposes of determining good academic standing.) Also included in this GPA, except as noted below, are all Robinson College of Business courses that the student takes (if any) which are in addition to those in the degree/certificate program. Therefore, a student who wishes to take a course for personal enrichment or for other purposes not related to pursuit of the degree/certificate should audit the course.

Grades earned in other graduate programs of the Robinson College of Business from which the student has graduated or any grades earned at any time in graduate courses of other colleges of the university do not affect the cumulative GPA for the current program, unless they apply toward the current program. Grades in courses in areas where higher-level coursework has already been completed will not affect the cumulative GPA for the current program (example: taking MBA 8025 after MBA 8115). These grades are, however, included in the cumulative GPA which is calculated by the university and recorded on the student’s official transcript. The calculation on the transcript includes all attempts at all courses numbered 5000-level and above taken at the university. All references to “cumulative GPA” in the scholastic discipline policy are to the cumulative GPA in the student’s current program (except as noted in the next paragraph).
Students who change master’s-level programs within the Robinson College of Business (as opposed to completing one program then entering a second program) are responsible for all graduate grades earned in the college. That is, students with less than a 3.00 GPA in one master’s-level program or status cannot automatically return to good academic standing by changing programs or status.

Questions about calculation of the GPA for determining academic standing should be directed to the Office of Graduate Recruiting and Student Services. The interpretation of the college’s scholarship discipline policy as it applies to unusual situations is the responsibility of the dean of the college as represented by Graduate Recruiting and Student Services.

Each student whose GPA for a semester is below 3.00, regardless of course load, will be on “scholastic warning.” Upon completion of the next semester of relevant graduate coursework, the performance of a student on warning will be evaluated in the following way:

1. If the semester GPA is at least 3.00 and the cumulative GPA is at least 3.00, then the student will return to good standing.
2. If the semester GPA is less than 3.00 and the cumulative GPA is less than 3.00, then the student will be suspended from the university for a minimum of one semester.
3. If the semester GPA is less than 3.00 but the cumulative GPA is at least 3.00, then the student may continue to enroll but will continue to be on warning until a semester GPA of at least 3.00 is achieved, at which time he or she will return to good standing, or until subsequent semester GPAs bring the cumulative GPA below 3.00, at which time he or she will be suspended from the university for a minimum of one semester.
4. If the semester GPA is at least 3.00 but the cumulative GPA is less than 3.00, then the student will remain on “scholastic warning.” The student may continue to enroll on warning, provided the semester GPAs are at least 3.00, until the cumulative GPA is brought to at least 3.00; at this time he or she will return to good standing. If any semester GPA is less than 3.00 before the cumulative GPA has been brought to 3.00, the student will be suspended from the university for a minimum of one semester.

After a suspension of at least one semester and if the time limit for completing the program has not expired, the student may apply for readmission. Application for readmission must be made to the Office of Graduate Recruiting and Student Services not later than six weeks prior to the first day of registration for the semester in which reinstatement is sought.

A student who is readmitted from suspension will be on probation. If any semester GPA is less than 3.00 before the student’s cumulative GPA reaches at least 3.00, the student will be permanently excluded from taking graduate courses in the Robinson College of Business. When the cumulative GPA is at least 3.00, the student will then return to good standing. Another suspension after returning to good standing also will result in permanent exclusion.

See the next section for grade requirements for graduation.

7080.34 Grade Requirements for Graduation

To graduate with a master’s degree or graduate certificate from the Robinson College of Business, students must have a cumulative GPA of 3.00 or higher in all attempts at all courses numbered 6000 and above.
taken at Georgia State University (See Sections 1330 Cumulative Grade Point Average and 1336.15 Graduation Requirements). In addition, students must have a cumulative GPA of 3.00 or higher in all courses applicable toward the program from which graduation is planned. Also included in this GPA are grades earned in all graduate RCB courses taken at GSU, including those taken while in any master’s program(s) or status which the student began but did not complete. Exception: grades in courses which are more than seven years old, while part of the cumulative GSU GPA, will not be factored into the College’s GPA requirement for graduation. No grade below a grade of C- is acceptable. No course in which a grade of B or higher has been earned may be repeated for degree credit.

Questions about calculation of the GPA for graduation should be directed to the Office of Graduate Recruiting and Student Services. The interpretation of the college’s GPA requirement for graduation as it applies to unusual situations is the responsibility of the dean of the college as represented by the Office of Graduate Recruiting and Student Services.

7080.38 Residency Requirements

The Robinson College of Business defines residency in a master’s program as being enrolled in courses that are numbered 8000 or higher, that are appropriate for the program, and that have not been counted toward another graduate degree of this college. The minimum residency requirement for each degree program except the Master of Science in Real Estate (MSRE) is 24 semester hours. The minimum residency requirement for the certificate program in real estate is nine semester hours; the MSRE minimum is 30 semester hours. The minimum residency for the certificate program in enterprise risk management is 18 semester hours of graduate course work.

In the Master of Business Administration program, at least one half the concentration, as appropriate, must be completed in residence to be designated as having completed the concentration in a specific field; otherwise the general business concentration is awarded. In the Master of Science program, at least one half of the major must be completed in residence.

7080.40 Transfer of Credits

Transfer of credit in master’s programs of this college is defined as receiving graduate degree credit for a course completed at another institution, thereby reducing the number of graduate courses to be taken at Georgia State University. Transfer of credit is distinguished from exemption from MBA-prefixed courses. Transfer of credit will be approved only under the following conditions:

1. The course must have been completed at an institution whose master’s programs were accredited by AACSB International—The Association to Advance Collegiate Schools of Business at the time the course was taken.
2. The course must have been restricted to graduate students only.
3. A grade of B or higher must have been received in the course. Exceptions to the minimum grade requirement will be reviewed on a case by case basis for students participating under terms of international dual degree agreements.
4. The content of the course must correspond to that of a Georgia State course required or permitted in the student’s program.
5. Credit completed before enrollment in the current Georgia State program will be considered if it will not be more than seven years old at the time the student graduates.
6. Credit completed elsewhere after enrollment in the current Georgia State program will be considered for transfer credit if it is within the time limit allowed for completion of the current program.

It is also possible to receive transfer credit from another graduate program of Georgia State University, including previously completed Robinson College programs and programs from other colleges/schools in the university. These regulations are written for the usual transfer credit case, which is credit from another institution. The Office of Graduate Recruiting and Student Services should be consulted about transfer credit from other Georgia State programs.

A written request for consideration of transfer credit completed before admission must be submitted by the student concerned during the first semester of residence here. The request must indicate the specific course(s) for which transfer credit is sought. A copy of the other institution’s catalog must be submitted to verify that condition 2 (listed above) has been met; a course outline for each course must be submitted to verify that condition 4 has been met; if the course(s) were taken after application materials had been filed, an official transcript of the coursework must be sent directly from the other institution to Graduate Recruiting and Student Services to verify that conditions 3 and 5 have been met. Requests for transfer of graduate credit cannot be processed until all necessary information has been received.

Students who have met the residency requirement for their program and who wish to take graduate courses at another institution to complete the coursework for their Georgia State degree should provide the information listed above (except the transcript) to Graduate Recruiting and Student Services before enrolling at the other institution. Advance approval will ensure that the transfer credit can be granted if a grade of B or higher is earned in the course(s) and the coursework is completed within the time limit allowed for the program. Such students should plan to graduate at least one semester after the quarter/semester in which the last course to be transferred has been taken. This will allow adequate time for the necessary transcript to be received and for the transfer credit to be processed. (See the “Graduation Fee” heading in this catalog for details about applying to graduate.) A letter certifying completion of degree requirements and stating the date the degree will be conferred can be furnished to the student by the Graduation Office.

7080.42 Information Technology Access and Skill Requirements

Access Requirements: Because information technology is an integral part of business decision making, courses in the Robinson College of Business frequently incorporate assignments that require computing skills. Consistent with university policy (available at http://technology.gsu.edu/about/technology-policies/), the Robinson College requires students to be responsible for providing computer and Internet access for all RCB courses and programs.

Hardware and Software Requirements: Georgia State has standardized on the Microsoft Office Suite in the student computer labs. Students may consult the university’s Office of Student Financial Aid for information about possible funding opportunities for computer and Internet access expenses.

Skill Requirements: Although students can expect to enhance their information technology skills as they work toward their degrees, the college expects all students to have certain basic skills before enrolling in any business course. These skills are defined as Basic Microcomputing Skills, Word Processing and Presentation Skills, and Basic Internet Usage and are described below in the Computing Skill Prerequisites
(CSP) 1, 6, and 7 definitions. When courses require additional computing skills, these CSPs are listed by number in the catalog course descriptions.

The CSPs listed in the Course Descriptions chapter of this catalog for a particular course are required for all sections of the course. Students must be proficient at the level indicated in the skills definition (see below) for each CSP listed in the catalog for individual courses. Students found to have insufficient CSP expertise can be unenrolled from the course.

**7080.46 Computer Skills Prerequisites (CSPs) Definitions**

**CSP 1- Basic Microcomputing Skills**: Understand the PC and its components; turn on the PC; use command-oriented, windows-based, and LAN operating environments to accomplish tasks such as formatting floppy disks, creating and navigating through directories and subdirectories, creating and deleting files, copying and renaming files, using help screens, loading application software, exiting from application programs and operating environments in an orderly manner, and using appropriate measures to check for and prevent the spread of computer viruses.

**CSP 2- Basic Microcomputing Spreadsheet Skills**: Load the spreadsheet software; create, organize, and navigate through spreadsheets; format the spreadsheet or a block of cells; enter and edit formulas, values, and text; copy, move, and protect cells; insert and delete columns and rows; save and retrieve files; print spreadsheets; use financial, statistical, and mathematical functions such as totaling and averaging of rows and columns; create and print charts and graphs; create data tables; invoke existing macros; and use help screens.

**CSP 3- Advanced Microcomputer Spreadsheet Skills**: Use advanced spreadsheet features such as database commands and functions; create macros; create menu systems and develop customized applications.

**CSP 4- Basic Microcomputer Database Skills**: Load database software, create databases; enter and edit data; add and delete records; list, query, and generate reports using the database; use help screens.

**CSP 5- Advanced Microcomputer Database Skills**: Link databases through keys; create input screens; develop customized applications.

**CSP 6- Word Processing and Presentation Graphic Skills**: For word processing: load the word processing software; create, format, edit, and save documents; copy and move text; adjust margins, indents, and line space; and adjust fonts and styles. For presentation graphics: Load the presentation graphics software, choose and modify templates; choose and modify slide layouts; insert slides, handout, and note masters; change color schemes; apply effects, animation, and multimedia to slides; run a slide show. For both: Import tables, clip art, and graphs from other applications; use spell-checking; load additional toolbars; use help screens.

**CSP 7- Basic Internet Usage**: Send and receive email messages including attachments of files; transfer files with FTP, compress and uncompress files with utility programs; use search engines to locate documents and find information on the Web; navigate the Web with a browser including copying/pasting/saving Web information; download and set up Web browser plug-in programs such as electronic document readers and audio/video players; use Web-based clients such as library catalog systems.
CSP 8- Advanced Internet Usage: Create formatted *.html pages with tags including links within and between pages; publish pages to a Web site; create image files and embed them in *.html pages.

7090 College Degree Requirements

The MBA program is designed for individuals with work experience who aspire to organizational or entrepreneurial leadership positions. The program enhances general management abilities and provides an opportunity to place emphasis on one or more functional areas of expertise. The primary objectives of the program are for students to develop and integrate: (1) analytical skills for decision-making that incorporate global, ethical, and culturally diverse dimensions; (2) skills in assessing organizational performance and developing approaches for improvement; (3) leadership skills; and (4) interpersonal skills that contribute to teamwork.

7090.10 Orientation

All entering Flexible Master's students are required to attend the mandatory Master's Orientation in their first semester of enrollment. The specific dates for the Master's Orientation can be found here: Master's Orientation information The objectives of the orientation are:
- To develop a sense of community and identification for students.
- To demonstrate how teamwork enhances learning.
- To begin the process of program planning and career planning.
- To introduce Robinson master’s students to the available resources provided by the college and how to use those resources effectively.

7090.20 Regulations for the Degree

The Master of Business Administration degree is awarded upon completion of a prescribed program ranging from 39 to 54 semester hours of credit, depending on the academic background of students and on options selected by the students. The M.B.A. program is developed on the assumption that students enter the program with certain skills:

- **Computing skills**: Because computers are an integral part of business decision making, courses in the Robinson College of Business frequently incorporate assignments that require computing skills. Expectations are described in section 7080.42.
- **Algebra skills**: MATH 1111 (college algebra) or equivalent mathematical knowledge is assumed for all entering M.B.A. students. Students are expected to self select into MATH 1111 or take other appropriate steps if they do not have a working knowledge of college algebra.

7090.30 Degree Requirements

The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs”
sections of this chapter apply to the M.B.A. program.

The Master of Business Administration degree is awarded upon completion of the program prescribed in this section below. The time limit for completing the M.B.A. program is five years.

MBA Course Requirements

The course requirements for the M.B.A. program and the sequence of courses follow. Note that Cornerstone Core courses may be taken concurrently. All other courses must be taken after MBA 8000 Managing in the Global Economy and MBA 8025 Financial Statement Analysis.

Cornerstone Core Courses (10.5-16.5 hours):

These courses provide a solid intellectual grounding within an integrative framework that sets the stage for the entire MBA curriculum. Managing in the Global Economy cannot be waived. Waiver of Strategic Communication will be granted only under exceptional circumstances which must include a high degree of previous education and proof of significant experience in the communications area. Financial Statement Analysis may be waived if the student has an undergraduate degree in accounting with a 3.0 or better GPA and current experience in the area. Legal Environment: Ethics and Corporate Governance can only be waived by those students already possessing a JD degree. Student may waive no more than 6 hours in this area. Once a course is waived, it may not be taken later for credit.

- MBA 8000 Managing in the Global Economy (3)
- MBA 8015 Strategic Business Communication (3)
- MBA 8025 Financial Statement Analysis (3)
- MBA 8030 Legal Environment: Ethics and Corporate Governance (3)
- MBA 8040 Data Driven Decision Making (3)
- MBA 8045 Analytics Experience (1.5)

Functional Core Courses (10.5-16.5 hours):

The functional core offers curricular breadth. Up to 6 hours (two courses) in this category may be waived (see Section 7090.60 for details), based on an undergraduate business degree from an AACSB or EQUIS accredited institution with a 3.0 or great GPA in the major and current work experience in the area. Once a course is waived, it may not be taken later for credit. MBA 8000 and MBA 8025 are prerequisites for every Functional Core course, and MBA 8015, MBA 8030, MBA 8040, and MBA 8045 are co-requisites.

- MBA 8115 Managerial Accounting and Control Systems (1.5)
- MBA 8125 Digital Innovation (3)
- MBA 8135 Corporate Finance (3)
- MBA 8145 Strategic Marketing Management (3)
- MBA 8155 Operations Management (3)
- MBA 8165 Leadership and Organizational Behavior (3)

Capstone Core Course (3 hours):

This course integrates a broad span of knowledge gained from the required curriculum. This course cannot
be waived. Registration will be granted once students have completed all six MBA 8100 level courses.

- MBA 8820 Global Competitive Strategy (3)

8000-Level Elective Courses (18 hours):

Electives include 12 hours in a concentration which permit the student to personalize core competency and customize intellectual development. Electives are to be from the set of RCB 8000-level courses or from the Department of Economics in the Andrew Young School. Students wishing to take electives outside that set must apply for special permission.

7090.40 Concentrations

Concentrations are available in the following areas:

- Accounting
- Actuarial Science
- Business Analysis
- Business Economics
- Entrepreneurship
- Finance
- Health Administration
- Health Informatics
- Hospitality Administration
- Human Resource Management
- Information Systems
- International Business
- Managerial Sciences
- Marketing
- Operations Management
- Organization Management
- Real Estate
- Risk Management and Insurance

Students should contact individual departments regarding requirements for obtaining concentrations not detailed below.

Accounting

Stephen Claghorn, Coordinator, 404/413-7238, sclaghorn@gsu.edu

The mission of the accounting concentration in the MBA program is to prepare individuals to become leaders in financial reporting and assurance services in public accounting or industry. While the MBA program enhances general management abilities, the accounting concentration focuses specifically on (1) financial reporting skills in a global economy, (2) assurance service skills in a variety of organizational contexts, and (3) financial analysis skills.
The concentration in accounting requires students to have completed courses equivalent to the following with a C- or better grade:

- ACCT 4111 Intermediate Accounting I
- ACCT 4112 Intermediate Accounting II
- ACCT 4113 Intermediate Accounting III
- ACCT 4210 Cost/Managerial Accounting
- ACCT 4310 Accounting Information Systems
- ACCT 4510 Introduction to Federal Income Taxes
- ACCT 4610 Introduction to Assurance Services

The concentration in accounting requires 12 semester hours as follows:

- ACCT 8130 Advanced Accounting Topics
- ACCT 8420 Special Topics in Financial Accounting
- ACCT 8610 Advanced Topics in Assurance Services
- ACCT 8700 Financial Statement & Business Analysis

**NOTE:** Generally students who concentrate in accounting want to sit for the CPA exam. To do so in Georgia they must have 20 credit hours in upper level (above the 2xxx level) accounting classes. In order to earn the CPA license in Georgia they must (in addition to successfully completing the examination in accordance with Georgia’s requirements, and having one year of appropriate work experience) have earned a total of 30 credit hours in upper level accounting classes.

**Actuarial Science**

Eric Ulm, Coordinator, 404-413-7485, eulm@gsu.edu

The MBA program provides the skills needed by future business leaders and future management consultants, such as creative decision-making, leadership, and the ability to work as a member of a team. The actuarial science concentration focuses on mathematical modeling. Qualified students who wish to acquire both sets of skills should enroll in the MBA program with a concentration in actuarial science. Applicants will be required to meet the admission requirements for both the MBA and the MAS programs.

The concentration in actuarial science requires students to have completed courses equivalent to the following with a minimum grade of C. These courses are described in the Course Descriptions chapter of the *Georgia State University Undergraduate Catalog*. This catalog is available on the web at catalog.gsu.edu.

- MATH 4751 Mathematical Statistics I
- MATH 4752 Mathematical Statistics II
- AS 4230 Theory of Interest

Students with undergraduate actuarial science courses required who have financial aid should refer to “Courses Eligible to Count Toward Graduate Students’ Financial Aid” in the Financial Information chapter before registering for the first time with graduate status.

The concentration in actuarial science requires 12 semester hours of courses selected from the following list:
Business Analysis

Satish Nargundkar, Coordinator, 404/413-7541, snargundkar@gsu.edu

The overall goal of the concentration in business analysis is to provide the student with specialized training in the use of advanced analytical techniques for managerial decision making. These areas span statistical data analysis, management science, business intelligence, and decision support systems. This concentration also prepares students for Six-Sigma certification.

The contextual topics include data warehousing, data mining, online analytical processing, enterprise resource planning, and supply chain management. This concentration prepares the student for careers in business analysis, financial analysis, marketing analysis, operations analysis, strategic analysis and corporate planning. The student will be prepared for the utilization of information technology for corporate decision making.

The required courses for the concentration (nine semester hours) follow:

- MGS 8020 Business Intelligence
- MGS 8040 Data Mining
- MGS 8150 Business Modeling

For electives, select an additional three semester hours (1 course) for a concentration from the following list.

- MGS 8110 Applied Regression Analysis
- MGS 8140 Management Science Modeling
- MGS 8170 Statistical Modeling
- MGS 8710 Operations Planning
- MGS 8760 Quality Management

Electives can be substituted by other relevant courses through prior approval by a faculty adviser.

Business Economics

Jon Mansfield, Coordinator, 404-413-0151, Jon.Mansfield@gsu.edu
Electives to constitute a concentration (12 semester hours) in business economics are chosen from any of the courses listed below for which prerequisites have been satisfied (all courses are 3 hours unless otherwise noted).

- ECON 8100 Applied Microeconomic Analysis
- ECON 8110 Macroeconomic Analysis
- ECON 8180 Applied Economic Analysis
- ECON 8430 Theory of the Firm and Business Strategy
- ECON 8440 Industrial Organization and Antitrust Economics
- ECON 8710 Introduction to Statistical Foundations for Econometrics
- ECON 8860 Economics of Global Finance
- ECON 8740 Applied Statistics and Econometrics 1
- ECON 8780 Financial Econometrics
- ECON 8840 Applied Statistics and Econometrics 2

Additional courses not listed above may be taken with the approval of the Coordinator.

Entrepreneurship

Pamela Barr, Coordinator, 404-413-7527 pbarr3@gsu.edu

Concentration in entrepreneurship for an MBA student requires completion of 12 semester hours of courses as described below. Some of these courses have prerequisites.

MGS 8500 may be exempted with documentation of having earned a grade of B or higher in a graduate or undergraduate introductory course in entrepreneurship or with documentation of having started a new venture no more than 10 years prior to entering the MBA program. If exempted, MGS 8500 must be replaced by a second course from the specified list below. It is suggested that courses with higher numbers be taken later in the student’s program of study.

Take the following three courses, unless MGS 8500 is exempted:

- MGS 8500 Entrepreneurship and Enterprise
- MGS 8590 Field Study in Entrepreneurship
- MGS 8510 Business Plan Development

Take one of the following courses, or take two if MGS 8500 is exempted:

- IB 8100 International Entrepreneurship
- IB 8680 Technology and Global Competition
- MGS 8420 Enhancing Leadership Skills
- MGS 8425 Coaching for Leadership
- MGS 8430 Negotiation

An MBA Career Path in International Entrepreneurship is an additional option. See the descriptions of
career paths later in this section.

Finance

Alfred Mettler, Coordinator, 404-413-7327, mettler@gsu.edu

The following course is required for a finance concentration:

- FI 8000 Valuation of Financial Assets

The Department of Finance encourages all students pursuing a finance concentration to take FI 8000 early in their program since it is a prerequisite for all electives that count toward a finance concentration except FI 8020, Financial Analysis and Loan Structuring, and FI 8040, Survey of International Finance. To complete a concentration, nine additional semester hours of 8000-level finance courses are required. FI 8060, Current Issues in Finance, and FI 8070, Leading the Finance Function, may be taken as free electives but do not count toward a finance concentration.

Dual Concentration Option:

Students who complete the following set of courses as part of their MBA program will qualify for dual concentrations both in the area of finance and in risk management and insurance:

- FI 8000 Valuation of Financial Assets
- FI 8200 Derivative Markets I
- RMI 8050 Risk Management Modeling
- RMI 8370 Financial Risk Management

Study Abroad Elective:

Students taking IB 8410 *Financial and Managerial Issues in France and the EU*, (3hrs) may count this course toward a concentration in finance.

An MBA Career Path in Enterprise Risk Management:

This is an additional option. See the description of career paths later in this section.

Health Administration

Andrew T. Sumner, Coordinator, 404-413-7634, asumner@gsu.edu

A concentration in health administration consists of 12 hours chosen from this list:

- HA 8160 Introduction to the Health Care System
- HA 8190 Health Policy & Ethics
- HA 8250 Health Economics & Financing
- HA 8440 Executive Leadership in Healthcare
- HA 8460 Human Resource Management in Health Care
Health Informatics

Abhay Mishra, Coordinator, 404-413-7638, amishra@gsu.edu

The goal of the MBA concentration in Health Informatics is to provide students with specialized skills to improve healthcare services enabled by information technology. Such improvements focus on the information-intensive nature of healthcare institutions and processes to increase the quality and reduce the cost of healthcare services.

Courses required for the concentration (12 semester hours) in Health Informatics are:

- CIS 8070 Pervasive Healthcare Technologies
- CIS 8080 Security and Privacy of Information and Information Systems
- HA 8160 Introduction to the Health Care System
- HA 8670 Health Information Systems

Suggested electives for Health Informatics are in recommended order:

- CIS 8010 Process Innovation
- CIS 8000 IT Project Management
- HA 8550 Health Planning and Financial Management
- CIS 8090 Enterprise Architecture

Hospitality Administration

Debby Cannon, Coordinator, 404-413-7617, dfcannon@gsu.edu

A concentration in hospitality consists of any 12 hours chosen from this list:

- HADM 8100 Hospitality and Tourism Management
- HADM 8400 Financial Management Applications for Hospitality Enterprises
- HADM 8500 Economic and Cultural Impact of Travel and Tourism
- HADM 8600 Trends in the Food Service Industry
- HADM 8700 Trends in the Hotel Industry
- MGS 8300 Human Resources Management
- MK 8800 Services Marketing

Human Resource Management

Kelly Grace, Coordinator, 404-413-7172, kgrace@gsu.edu

Admission to the HRM concentration requires formal approval by the faculty of the Beebe Institute. Other M.B.A. students or students in other master’s programs must file a written request with the Office of
Graduate Student Services to transfer to HRM. Students’ records are then sent to the institute for review.

Each HRM student’s courses for the concentration must be selected from the list below in consultation with the HRM faculty adviser and a copy of these course selections filed with Graduate Student Services for review and approval. Progress toward the degree beyond the M.B.A. core and required courses, including clearance for graduation, cannot be confirmed without an approved program of study. This program should be planned before the student takes a non-required course. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to Graduate Student Services.

A concentration in Human Resources Management consists of 12 hours. Required:

- MGS 8300 Human Resources Management
- MGS 8360 Human Resources Recruitment and Selection
- MGS 8390 Strategic Compensation

Take at least one of the following:

- MGS 8320 Legal and Ethical Environment of Human Resource Management
- MGS 8380 Strategic Human Resource Management

Courses not on the list may be chosen through consultation with a faculty advisor.

**Information Systems**

Dr. Veda Storey, Coordinator, 404-413-7477, vstorey@gsu.edu

In today’s highly competitive global environment, the effective deployment of information technology has become the key to organizational success. There is a continuing shortage of individuals with the combination of business and technology skills needed to develop and manage information systems that provide competitive advantage in the global marketplace. The mission of the M.B.A. concentration in information systems is to produce graduates able to fill this need. Students will learn how to combine their general business knowledge with the latest software engineering tools and techniques to create information systems needed by today’s organizations. The courses to constitute a concentration (12 semester hours) in information systems are chosen from the 8000-level offerings of the Department of Computer Information Systems, or Acct 8680, IB 8680, IB 8710, provided the relevant course prerequisites have been satisfied.

Students may achieve a managerial emphasis by choosing courses from the following:

- CIS 8000 Information Technology Project Management
- CIS 8010 Business Process Innovation
- CIS 8060/CPI 8060 Supply Chain Management
- CIS 8080/ACCT 8680 Security and Privacy of Information and Information Systems
- CIS 8100 Management of Information Services
- CIS 8125 IT Management
- CIS 8200 Information Systems Strategy
- CIS 8210 Global Systems Sourcing
- CIS 8220/IB 8710 International Information Technology Issues and Policy
• CIS 8670 Enterprise Resource Planning Systems (ERP)

Or they may achieve a technical emphasis by choosing courses from the following:

• CIS 8020 Systems Integration
• CIS 8030 Software Requirements Management
• CIS 8040 Database Management Systems
• CIS 8050 Business Telecommunications and Networks
• CIS 8070 Pervasive Healthcare Technologies
• CIS 8090 Enterprise Architectures
• CIS 8260 Knowledge Management
• CIS 8300 Software Quality Management
• CIS 8310 Systems Development
• CIS 8399 Advanced Topics in Systems Development
• CIS 8499 Advanced Topics in Telecommunications
• CIS 8670 Enterprise Resource Planning Systems (ERP)
• CIS 8850 Web Application Development

Please see www2.cis.gsu.edu/cis/program/mbacis.asp for more information and the most current list of CIS courses.

International Business

Daniel Bello, Coordinator, 404-413-7658, dbello@gsu.edu

Businesses continue to explore international opportunities as globalization expands. A concentration in international business opens up exciting career opportunities for managers with an MBA. The MBA-IB (international business) offers an opportunity to build a sound foundation in international business, preparing students for careers in an increasingly interconnected global business environment. The concentration offers a flexible learning experience that extends functional skills to deal with managerial issues in the international marketplace as well as enhance students’ intercultural awareness and effectiveness. The MBA-IB requires the capstone course, IB 8990, which replaces MBA 8820 as the MBA capstone requirement. In addition, the concentration requires 4 courses (12 hours). As the prerequisite for IB 8000-level electives, IB 8090 is required; the 4 courses constituting the concentration are selected as follows:

1. a) At least 6 hours from a list of IB 8000-level electives
   b) 3 hours from a list of related international courses or from the list of IB 8000-level electives.
   c) 3 hour IB 8990 Policy & Strategy in the International Marketplace (course replaces MBA 8820).

Required Prerequisite: IB 8090 International Business Environment

IB 8000-level electives: To complete the concentration, at least 6 (six) semester hours chosen from the courses listed below are required. Consult the current graduate catalog for prerequisites that will affect
IB 8080 Legal Aspects of International Business
IB 8092 Analyzing International Business Problems
IB 8100 International Entrepreneurship
IB 8180 Doing Business in Emerging Markets
IB 8190 Doing Business in World Regions
IB 8400 International Exchange Program Credit (1-6)
IB 8410 Study Abroad (1-6)
IB 8550 Special Topics in International Business
IB 8620 Commercial Diplomacy
IB 8630 International Business Negotiation
IB 8680 Technology and Global Competition
IB 8690 Global Operations Management
IB 8710 International Information Technology Issues and Policy

**IB Related International Courses:** To complete the concentration, three semester hours chosen from the courses listed below or from IB 8000-level electives are required. Consult the current graduate catalog for prerequisites that will affect selections.

See list of IB 8000-level electives above, or

- MGS 8860 Management and Cross-National Environments (Study Abroad)
- MK 8600 International Marketing
- RE 8600 International Real Estate
- RMI 8350 International Risk and Insurance
- TX 8300 International Aspects of Taxation
- ACCT 8090 International Accounting Practices
- CIS 8060 Supply Chain Management
- ECON 8850 International Trade
- ECON 8860 Economics of Global Finance
- FI 8040 Survey of International Finance
- FI 8240 Global Portfolio Management
- FI 8340 Multinational Corporate Finance
- FI 8440 Finance and Banking in the Global Economy

An international study experience is highly encouraged, but not required. Note that IB 8410 may be repeated for offerings in different countries/locations.

**Capstone: REQUIRED**

IB 8990 Policy & Strategy in the International Marketplace (course replaces MBA 8820).

**Note:** Knowledge of a foreign language is not required of a MBA-IB student.

**Marketing**
Electives to constitute a concentration (12 semester hours) in marketing are chosen from any of the 8000-level marketing courses, including:

- MK 8100 Consumer Behavior
- MK 8200 Marketing Research
- MK 8210 Marketing Intelligence
- MK 8300 Marketing Communications and Promotion
- MK 8330 Strategic Selling
- MK 8340 Strategic Sales Leadership
- MK 8400 Channels of Distribution
- MK 8410 Logistics Management
- MK 8510 Business to Business Marketing
- MK 8600 International Marketing
- MK 8620 Product Management
- MK 8700 Digital and Social Media Marketing
- MK 8710 Customer Relationship Management
- MK 8720 Data Driven Marketing
- MK 8800 Services Marketing
- MK 8900 Strategic Market Planning

MBA 8145 must be taken or waived. If waived, it cannot be taken later for credit and the number of credit hours waived must be replaced with 8000-level RCB courses within Marketing.

Operations Management

Yusen Xia, Coordinator, 404-413-7556, ysxia@gsu.edu

Electives to constitute a concentration (12 hours) in Operations Management are chosen from the following list. Some of these courses have prerequisites which must be met. Courses not on the list may be chosen through consultation with a faculty advisor.

- MGS 8710 Logistics and Supply Chains
- MGS 8730 Project Management
- MGS 8740 Operations Strategy
- MGS 8760 Quality Management
- MGS 8770 Service Operations Management
- CIS 8060/CPI 8060 Supply Chain Management
- IB 8690 Global Operations Management

Leadership and Organization Management

Ed Miles, Coordinator, 404-413-7540, emiles@gsu.edu

Electives to constitute a concentration (12 hours) in Leadership and Organization Management are chosen from the following list. Some these courses have prerequisites which must be met. Courses not on the list
may be chosen through consultation with the coordinator.

- MGS 8420 Enhancing Leadership Skills
- MGS 8425 Coaching for Leadership
- MGS 8430 Negotiation
- MGS 8435 Power in Organizations
- MGS 8450 Leading Organizational Change
- MGS 8500 Entrepreneurship and Enterprise
- MGS 8510 Business Plan Development
- MGS 8730 Project Management
- MGS 8860 Management Studies Abroad

Real Estate

Karen Gibler, Coordinator, 404-413-7725, kgibler@gsu.edu

A concentration in real estate consists of the six semester hours of required real estate courses listed below plus six semester hours chosen from any other 8000-level real estate courses:

- RE 8020 Real Estate Equity Investments
- RE 8100 Strategic Management of Real Property in a Corporate Environment

Risk Management and Insurance

Martin Grace, Coordinator, 404-413-7469, mgrace@gsu.edu

A concentration (12 hours) in risk management and insurance can be chosen from any of the 8000-level RMI-prefixed courses. Students may select non-RMI prefixed courses as credit toward a concentration with advance permission of the RMI department’s graduate faculty adviser.

In addition to the general concentration described above, the department participates in two hybrid degree programs: one entitled Financial Risk Management and the other the Enterprise Risk Management Career Path. Students completing the Financial Risk Management Specialization will earn a dual concentration in risk management and insurance and in finance. The specialization is designed to prepare students to work in the treasury departments of non-financial firms or as professionals in the financial risk management departments in financial institutions or consultancies. The MBA Career Path Enterprise Risk Management is appropriate for students seeking to further enhance their training in financial risk management with broader education in the management of operational and other non-financial risks, such as political risk, property and liability exposures, security breach risk, and employer welfare.

The four courses required for the Financial Risk Management Specialization are as follows.

- FI 8000 Valuation of Financial Assets
- RMI 8050 Risk Management Modeling
- FI 8200 Derivative Markers I
- RMI 8370 Financial Risk Management
Students completing the Financial Risk Management Specialization will earn a concentration in RMI and in finance.

Students seeking to enroll in the MBA Career Path in *Enterprise Risk Management* must take three courses in addition to those required for the Financial Risk Management Specialization. One is required and the other two can be chosen by the student, with approval of the RMI department’s graduate faculty adviser, from the list of recommended courses below. Other courses may be selected with the advance approval of the graduate adviser.

**Required:**

- RMI 8150 Corporate Risk Management

**Choose two of the following:**

- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- ECON 8860 Economics of Global Finance
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
- MGS 8040 Data Mining

MBA students who complete the ERM career path will earn a concentration in RMI and also will earn a concentration in finance. A complete description of the MBA Career Path Program is described in section 7090.50.

### 7090.50 Robinson MBA Career Paths

The Robinson College of Business believes the curriculum should be innovative, forward looking, and boundary spanning. The college seeks to prepare students for the practice of management with the knowledge and skills needed to remain effective in a global, culturally diverse, and technologically advanced world that is characterized by rapid change and complex interdependencies. To respond to these changes in today’s marketplace, the faculty has designed a new series of career paths composed of “hybrid concentrations.” These options enable Robinson MBA students to select a combination of courses that cut across traditional business disciplines.

Hybrids combine courses available in two existing MBA concentrations into a specific career path. Often one course can count toward both concentrations. Rather than two independent concentrations that may or may not have some overlap, hybrids are a cohesive set of courses relevant for the career path indicated.

Listed below are the career paths available at press time for this catalog. (Updates on career path offerings that may occur during the year can be found at the college’s Web site, robinson.gsu.edu, by clicking on “Students.”) Choice of a career path is optional, but the Robinson faculty strongly encourages them as part of the career planning for MBA students interested in these areas. Indications are that employers are increasingly interested in MBA students who have a concentration and even more so in students that have concentrations in more than one discipline.
Accounting Information Systems Design and Assurance

Ron Guymon, Program Director, 404-413-7236, rguymon@gsu.edu

There is a dire need for those who understand general business principles, along with technology and accounting. A career path in Accounting Information Systems Design and Assurance prepares students for a career in this much sought-after area.

This career path essentially provides the students the opportunity to obtain an MBA with the same accounting systems focus that is available in the Master of Professional Accountancy program.

Students leaving the program will be well prepared to enter into a public accounting career with the major accounting firms and into consulting where they could help companies design systems with built-in auditing controls. Another career option would be to enter the assurance service field where they would audit systems for proper design and control. On the corporate side, students could find a career in systems design or audit systems.

MBA students who complete this career path will earn concentrations in accounting and information systems. Courses for the AIS Career Path follow.

Foundation Courses. Students whose previous academic course work does not include the foundation courses listed below (minimum grade of C) will take them as part of this career path. Any student with an undergraduate accounting degree from an AACSB-accredited business school meets the accounting foundation requirements.

- ACCT 4111 Intermediate Accounting I
- ACCT 4112 Intermediate Accounting II
- ACCT 4113 Intermediate Accounting III
- ACCT 4210 Cost/Managerial Accounting
- ACCT 4310 Accounting Information Systems
- ACCT 4610 Assurance Services

A course in a procedural or object-oriented programming language such as Visual BASIC, C/C++ (CIS 3260), or JAVA (CIS 3270)

Required courses:

- ACCT 8630 Information Technology Auditing
- ACCT 8680 Security and Privacy of Information and Information Systems
- CIS 8030 Software Requirements Management
- CIS 8040 Fundamentals of Database Management Systems

In addition, students must take six hours of elective credit from 8000-level courses in the Robinson College of Business or the Department of Economics in the Andrew Young School to meet the minimum elective hours requirement for the MBA degree.

Enterprise Risk Management
Among the most dramatic aspects of the revolution currently taking place in the risk management profession is the recognition that such formerly diverse areas as insurance, asset management, and the treasury functions of global corporations now require a common set of skills drawn from economics, finance, and risk management. Consequently, there is now a great demand for education in the core of contemporary risk management techniques.

The MBA career path in Enterprise Risk Management (ERM) will be attractive to individuals seeking breadth in risk management. Required and elective course work in ERM is broader than what is currently available at most universities in the United States.

The increasing acceptance of the Chief Risk Officer concept suggests there is enhanced demand for professionals who can efficiently manage both financial and non-financial risk—such as political risk, property and liability risks, risks associated with information technology and e-commerce, employee welfare, and human resource risk.

MBA students who complete this career path will earn a concentration in risk management and insurance and also will earn a concentration in finance. Courses for the ERM Career Path follow.

Required Courses:

- FI 8000 Valuation of Financial Assets
- FI 8200 Derivative Markets I
- RMI 8050 Risk Management Modeling
- RMI 8150 Corporate Risk Management
- RMI 8370 Financial Risk Management

Two of the following four courses must also be chosen. Other courses may be selected with prior approval of the RMI faculty adviser.

- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- ECON 8860 Economics of Global Finance
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
- MGS 8040 Data Mining

Hotel Real Estate

Debby Cannon, Coordinator, 404-413-7617, dfcannon@gsu.edu

The Career Path in Hotel Real Estate is a partnership between the Cecil B. Day School of Hospitality and the Department of Real Estate. Hotel real estate encompasses a variety of careers including positions on the corporate level, in entrepreneurial initiatives, in financial institutions and with hotel brokers.

The six course specialization (18 credit hours) includes real estate and hospitality courses that focus on hotel operations including financial analysis and hotel assets combined with real estate finance, project
development and market analysis. Students will follow the flexible MBA curriculum with the six courses counting as electives. Students in this specialization will benefit from both the specialized curriculum and the opportunity to interact with industry leaders in Atlanta’s active hotel development environment.

The six required courses are:

- HADM 8400 F Financial Management Applications in Hospitality Enterprises
- HADM 8700 Trends in the Lodging Industry
- HADM 8800 Hotel Assets
- RE 8030 Real Estate Financing
- RE 8050 Real Estate Development
- RE 8060 Applied Real Estate Market Analysis

**Information Systems Consulting**

Ephraim McLean, Coordinator, 404-413-7448, chair@gsu.edu

The combination of courses that prepares students for careers in Information Systems (IS) Consulting combines IS content expertise with process expertise in consulting. Traditional offerings provide strength only in IS content. Students following this career path must already have some level of expertise in both areas coupled with a desire to expand their backgrounds to meet the growing demands of today’s global environment. The primary intention of this career path is to prepare students to be external consultants, but it will certainly help those who act as consultants inside companies.

MBA students who complete this career path will earn concentrations in information systems and managerial sciences. Courses for the ISC Career Path follow.

These required MBA courses are particularly applicable to this career path.

- MBA 8125 Digital Innovation (3.0)
- MBA 8155 Operations Management (3.0)
- MBA 8165 Leadership and Organizational Behavior (3.0)

Required Courses:

- CIS 8000 IT Project Management
- CIS 8010 Process Innovation
- MGS 8430 Negotiation
- MGS 8450 Leading Organizational Change

One elective (subject to meeting prerequisites) from 8000-level CIS courses

In addition, students must take three hours of elective credit from 8000-level courses in the Robinson College of Business or the Department of Economics in the Andrew Young School to meet the minimum elective hours requirement for the MBA degree.

**Information Technology Risk Management**
Organizations have become increasingly dependent on information technology as a fundamental enabler of their business activities. Today, even small interruptions or disturbances in the functions of this technology may bring disastrous losses in processing revenue and recording assets. Yet the risk profile of this technology has grown as widespread networking increases electronic access to organizational information resources. While a vast array of security technology is available, management must have the principles, knowledge and skills to decide when and whether to reduce the IT risks through the deployment of appropriate technical solutions, through the diversification of risk across organizational systems, or through risk financing.

MBA students who complete this career path will earn concentrations in both Information Systems and Risk Management and Insurance.

Required Courses:

- RMI 8050 Risk Management Modeling
- RMI 8150 Corporate Risk Management
- RMI 8370 Financial Risk Management
- CIS 8020 Systems Integration
- CIS 8080/ACCT 8680 Security and Privacy of Information and Information Systems.
- CIS 8100 Management of Information Services

Recommended Electives:

- CIS 8000 Information Technology Project Management
- RMI Elective

International Business and Information Technology

Duane Truex, Coordinator, 404-413-7380, dtruex@gsu.edu

Information-intensive businesses operating in a global environment are looking for a special type of manager. This manager must comprehend simultaneously the complex international business environment and know how information technology (IT) can be used to best support the company’s strategic direction. In information-intensive industries, IT is the lifeline to an organization’s global operations, creating new opportunities for individuals with these skills. Robinson’s career path in International Business and Information Technology builds synergy from courses that overlap three areas [international business, organizational strategy (and its fit with IT), and IT itself]. This career path prepares tomorrow’s leaders for an increasingly information-dependent global marketplace.

MBA students who complete this career path will earn concentrations in information systems and international business. Courses for the IBIT Career Path follow.

Foundation Course: a course in an object-oriented programming language such as C/C++ (CIS 3260) or JAVA (CIS 3270). (Not assigned if an equivalent academic course has been previously completed with a
grade of C or higher.)

Required Courses:

- CIS 8000 IT Project Management
- CIS 8010 Process Innovation
- CIS 8220/IB 8710 International Information Technology
- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- IB 8090 International Business Environment
- IB 8180 Comparative Business Systems
- IB 8680 Technology and Global Competition

Optional Elective:

- IB 8410 International study experience focused on IT

Capstone Course IB 8990 (in lieu of MBA 8820): Policy and Strategy in the International Marketplace
(Consent of instructor for exception to prerequisites will be given to students following this career path.)

Students interested in this career path may complete four of the six courses at the University of Nantes in Nantes, France in the fall semester. All instruction is in English.

7100 Student Complaints, Petitions for Policy Waivers and Variances, and Appeals

The appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog for details.

Please note the procedure below for GMAT/GRE waiver requests.

The GMAT/GRE requirement may be waived for applicants who have already received an MBA from an AACSB accredited institution. Applicants must submit a request to waive the GMAT/GRE with the original application packet.

The Assistant Dean and Master’s Admission Committee will review the entire application file and waiver request. The decision to waive the GMAT/GRE is at the discretion of the Assistant Dean and Master’s Admission Committee. The submission of this request does not guarantee the GMAT/GRE score will be waived.

Applicants will be notified of the committee’s decision within 10 business days of submitting a complete application file.

7110 Master’s Programs
7110.10 Specialized Master’s Foundation Requirements

The requirements in this list are in addition to the hours required for the non-MBA master’s degrees, collectively referred to as specialized master’s degrees. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. Foundation requirements are commonly satisfied by one of the following:

1. A bachelor’s degree in business, economics, or accounting; or,

2. A bachelor’s degree in the specialization or an area related to the student’s specialized master’s degree; or,

3. Certified completion of approved online courses in accounting, quantitative methods, and economics as directed by RCB Graduate Student Services; or,

4. Completion of the following courses:
   a. Accounting: MBA 8025 or financial and managerial accounting principles (ACCT 2101–ACCT 2102).
   b. Economics: Microeconomics principles (ECON 2106).
   c. Mathematics: College Algebra (MATH 1111).
   d. Statistics: MATH 1070.
   e. Business Communications: BCOM 8250 or MBA 8015 (completion of either of these will eliminate the need for taking the Business Communication Workshop in item 3 above)

Specific Master’s Programs may have further foundation requirements that are in addition to those listed here. See the specific program description for other specific foundation requirements.

7120 Executive M.B.A. Program

7120 Executive M.B.A. Program

The Robinson 17-month Executive MBA (EMBA) program is designed for professionals who possess significant (approximately seven years or more post-undergraduate degree) professional work experience as well as experience in a management role (managing people, projects, or assets). On average, EMBA students are 40 years old with fifteen years of professional work experience. The purpose of the program is to prepare experienced professionals to better the meet the challenges of an ever-changing global business environment.

The EMBA program format is team-based and lock-step. Students begin in August and remain together throughout the course of the program. There are no electives, and students receive an MBA in general management. All classes are held at the GSU Buckhead Campus every other Friday (noon to 6:30 p.m.) and Saturday (9:00 a.m. to 6:00 p.m.).
Covering the most critical business topics, the EMBA curriculum touches all aspects of the enterprise as it pertains to today’s global markets. The curriculum is designed to equip students with a broader business perspective, strategic thinking skills, and the executive leadership skills necessary to advance in their career.

An integral part of Robinson’s EMBA program is the International Business Residency, an intensive, 10-day exposition into the management and business practices of companies around the world. While abroad, students meet with company leaders (both indigenous and American-owned companies), tour plants and facilities, and meet with government officials to better understand global markets.

The Financial Times ranks the Robinson Executive MBA as 22nd among U.S.-based Executive MBA programs.

For more information including admission criteria visit the Executive MBA website at: www.emba.gsu.edu or call 404-413-7182.

7130 Global Partners M.B.A. Program

The Robinson College of Business offers the Global Partners MBA in association with IAE de Paris, the Sorbonne Graduate Business School, and the COPPEAD Graduate School of Business at the Federal University of Rio de Janeiro. The highlights of the program are as follows:

- The Global Partners MBA is a living classroom: It is a full-time, 14-month, dual degree program delivered across four continents.
- Students experience an in-depth, global immersion experience through extended residency stays in North and South America, Europe, and Asia.
- Students see and hear first hand what’s happening in the real word as they interact with corporate and government leaders in each locale, including extended company visits during the Asian residency, Washington DC, and Brussels.
- Students gain a 360 degree cross-cultural perspective.
- Courses are integrated across the partner schools, providing students with a truly global perspective.
- Commercial Diplomacy and Leadership are program themes. Commercial Diplomacy focuses on the relationship between the public and private sector. They develop an in-depth understanding of the regulatory environment and legal issues as they compare and contrast across four countries and four trading blocks. Students spend time in Washington D.C. at the outset of the program and observe first-hand the American approach to public affairs. This experience builds over the course of the program with key visits such as to the European Union Directorate in Brussels, and other firms and agencies in all program locations.
- Students learn the latest leadership principles and practices. It begins with a personal assessment of one’s leadership style, including strengths and areas of potential derailment.
- Internship/Field Study: The internship takes place at the end of the program for approximately 16 weeks. It is the culmination of the classroom and program experiences and can take place anywhere in the world. During this period, students complete a research project that aligns with their internship assignment.
- Graduates receive the Robinson College of Business MBA degree, the Master d’ Administration des Entreprises degree from IAE de Paris, Sorbonne and a certificate from COPPEAD.
Global Partners MBA Courses Overview

- GMBA 7035 Economics for Managers
- GMBA 8025 Financial Accounting
- GMBA 8030 Global Legal and Regulatory Issues
- GMBA 8090 International Business Environment
- GMBA 8115 Managerial Accounting
- GMBA 8120 Information Technology and Global Competition I
- GMBA 8135 Corporate Finance
- GMBA 8145 Marketing Management
- GMBA 8150 Global Operations and Logistics I
- GMBA 8160 Human Resources Management & Organizational Behavior I
- GMBA 8170 International Finance I
- GMBA 8190 International Affairs & Economic Integration
- GMBA 8220 Information Technology and Global Competition II
- GMBA 8250 Global Operations and Logistics II
- GMBA 8260 Human Resources Management & Organizational Behavior II
- GMBA 8270 International Finance II
- GMBA 8410 The Asian Experience
- GMBA 8500 Internship / Thesis
- GMBA 8605 International Marketing
- GMBA 8610 Leadership Practices
- GMBA 8620 Commercial Diplomacy
- GMBA 8630 Strategic Business Communications
- GMBA 8990 Policy & Strategy

Admission requirements include the following:

- Bachelor’s degree
- GMAT/ GRE
- Essays
- Two letters of recommendation.
- Interview
- Proficiency in a second language. This will be assessed at the time of the interview
- Two-to-three years of full-time work experience is preferred
- TOEFL or IELTS (if applicable)

Application deadlines: Rolling admissions with December 1, March 1, and July 1 each year for fall admission. To be automatically considered for scholarships, all materials must be turned in by the March 1 deadline.

For further information about the program, visit http://globalpmba.robinson.gsu.edu; e-mail: gpmba@gsu.edu, or call the Global Partners MBA Program at 404/413-7299.
7140 Professional M.B.A. Program

Edward W. Miles, Interim Faculty Director

The Professional MBA Program is a 24-month lock-step program designed for rising professionals with a minimum of four years of professional experience in a supervisor or mid-level management position with increasing responsibility to assume greater leadership roles. Students receive an MBA degree upon completion of the program.

The purpose of the Professional MBA program is to provide mid-level managers a challenging curriculum relevant to the needs of rising professionals. The curriculum develops and integrates leadership portfolio skills focusing on analytical skills for decision-making and incorporating global, ethical and culturally diverse dimensions; skills in assessing organizational performance and developing approaches for improvement; and interpersonal skills that contribute to teamwork. The lock-step format serves to forge strong networking, a more in-depth learning environment and support among the students as they take the same courses together during the program.

Students may choose from a variety of electives offered in multiple locations or online. International trips are available through the Robinson College’s Institute of International Business. The PMBA program also offers a dual degree with Master of Health Administration in a lock-step format over seven months.

For more information, visit the Professional MBA Web site at www.robinson.gsu.edu/PMBA or call 404/413-7167

7140.10 Admissions

Class size is limited, so we urge you to complete the application process as soon as possible. To be considered for admission, the following is required:

- Approximately four years of professional, full-time work experience
- Complete GMAT or GRE scores
- A four-year undergraduate degree from an accredited university
- Completed online application
- Up to three letters of recommendation
- An essay
- A resume
- Applicants who are strong candidates for the program will be interviewed by the admissions committee

The admissions committee reviews applications as they are received.

7140.20 Regulations for the Degree

This is a 48 semester hour, 24-month cohort program that includes electives.

PROGRAM TOTAL 48 hours

7150 M.B.A./J.D. Joint Program

The Robinson College of Business, in conjunction with the College of Law, offers a joint program leading to the M.B.A. and the J.D. degrees. The following regulations apply to students who are accepted to both the M.B.A. and the J.D. programs and are enrolled in the joint program (joint enrollment) as opposed to being independently enrolled in both degree programs concurrently (dual enrollment). Students who have already earned an M.B.A. degree or a J.D. degree at Georgia State University or at another institution are not eligible for the joint program.

7150.10 Application to the M.B.A./J.D. Joint Program

Applicants to the M.B.A./J.D. joint program must meet the entrance requirements and follow the application procedures of both the Robinson College of Business and the College of Law. Applicants must be accepted by both colleges.

Although students may apply for either the M.B.A. or the J.D. program at any time, acceptance to both programs would only result in dual enrollment, as opposed to joint enrollment. Admission to both degree programs under the joint program concept permits the application of credit for one degree toward the other degree (as explained below), which is not necessarily possible in the case of dual enrollment. To be in the M.B.A./J.D. joint program, students must be admitted to both programs before completing either program. See the heading “Enrollment Sequencing and Time Limits” below.

Students who are accepted to both the M.B.A. and the J.D. programs and wish to be enrolled in the joint program are responsible for providing written notification of their intentions to each college.

7150.20 Joint Program Degree Requirements

Students must satisfy the curriculum requirements for both the M.B.A. and the J.D. degrees.

M.B.A. Degree Requirements

For students enrolled in the joint program, completion of the first-year curriculum of the J.D. program in good academic standing will satisfy the M.B.A. requirement in Legal Environment: Ethics and Corporate Governance (MBA 8030). For students who drop out of the J.D. program before completing the first-year curriculum or do not complete it in good standing, determination of credit for MBA 8030 will be decided by normal transfer-of-credit procedures, which are explained earlier in this chapter.
For students enrolled in the joint program, the Robinson College of Business will allow 12 semester hours of grades of B or higher to be credited toward the 12 semester hours of electives for the general business concentration in the M.B.A. program.

Students who earn fewer than 12 semester hours of grades of B or higher in the J.D. program will receive a reduced number of hours of credit toward the general business concentration in the M.B.A. program. Such students must compensate for this shortage of courses eligible for elective credit by taking additional courses in either college and earning minimum grades of B. Choice of these courses must be approved in advance by the Office of Graduate Student Services.

**J.D. Degree Requirements**

Reciprocally, the College of Law will permit, with prior approval, up to 12 semester hours of 8000-level M.B.A. courses with grades of B or higher to be credited toward the J.D. degree. No M.B.A. credit toward the J.D. degree is awarded until the M.B.A. degree program has been completed. As stated in the College of Law chapter of this catalog, a law student must earn 90 semester hours of credit to qualify for the J.D. degree.

**Enrollment Sequencing and Time Limits**

The College of Law does not permit enrollment in the joint degree program after a student has completed more than 20 semester hours of 8000-level MBA coursework. After students have been admitted to both the M.B.A. and the J.D. programs and have declared intent to be enrolled in the joint program, they must, at the first opportunity, complete 31 semester hours of required courses in the J.D. program. After completion of these 31 hours, enrollment in the courses of either college or enrollment in both colleges concurrently is permitted. The requirements for the M.B.A. degree must be completed within eight years of the initial semester of enrollment in the M.B.A. program. The J.D. degree must be completed within six years of the initial semester of enrollment in the J.D. program.

**Grading and Scholastic Discipline**

Students enrolled in the joint program must meet the academic regulations of each college, including those related to the minimum GPA and scholastic discipline. The computation of the GPA in each college is based only on courses taken in that college.

**7160 Master of Actuarial Science**

Eric Ulm, Program Director, 404-413-7485, eulum@gsu.edu

Actuarial Science is a discipline that employs mathematics and statistics in modeling the financial impacts of risk and uncertainty in various sectors of the economy, and in designing solutions of managing risks. A majority of professional actuaries work in careers that are associated with the insurance industry, though growing numbers work in other fields. The mission of the MAS degree program is to educate students in the theory and practice of actuarial science through a specialized program of study. The program is designed to teach students both the core actuarial theory and the latest development in actuarial practice.
In addition to the MAS program, two dual-degree options are available: one where students will earn both the Master of Actuarial Science degree and the Master of Science in Risk Management and Insurance degree specializing in Mathematical Risk Management; and one where students will earn both the Master of Actuarial Science degree and the Master of Science in Analytics.

The rapid integration of insurance and financial services and the increasing acceptance of enterprise risk management in broad sectors of the economy imply that risk professionals need to master the understanding of risks associated with assets, liabilities and business operations. This requires a set of integrated skills in actuarial risk modeling, financial risk modeling, and enterprise risk management. The dual degree program in MAS/MRM is designed to serve the growing need for graduates who 1) have solid quantitative skills in both actuarial risk modeling and financial risk modeling, and 2) understand the business contexts and possess the necessary communication skills for solving complex risk issues.

Similarly, there is an increasing need for graduates an expertise in data analytics in the insurance field. The ongoing data revolution associated with the ever-increasing collection of data and use in the business process and decisions makes analytics skills relevant in all areas of business. The dual degree program MAS/MAS is designed to serve the need for actuarial graduates with analytics skills.

7160.10 Regulations for the Degree

All Master of Actuarial Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.A.S. program. A maximum of 9 semester hours of transfer credit is possible in this 30-hour program or in the 50-hour dual degree program.

Foundation Requirements.

These courses are in addition to the 30 hours required for the M.A.S. degree or in addition to the 50 hours required for the dual degree programs. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent work has been previously completed with grades of C or higher.

Accounting: financial and managerial accounting principles (MBA 8025, or ACCT 2101 & ACCT 2102)

Finance: corporate finance principles (MBA 8135). This requirement can be waived if FI 3300 and FI 4000, or equivalent course work, have been completed with grades of “C” or higher.

Behavioral Science: Management principles (MGS 3400). Students may satisfy this requirement with either management (MGS 3400), sociology (SOCI 1101), or psychology (PSYC 1101) principles.

Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106). Alternatively, both requirements can be satisfied by taking MBA 7035 Economics for Managers or the corresponding placement exam (see http://flex.robinson.gsu.edu/about/curriculum/placement-exam-option-mba-foundation-courses/).

Mathematics: Students must have completed three semesters of advanced calculus (MATH 2211, MATH
2212, and MATH 2215) and must have Compound Interest Theory AS 4230.

**Statistics:** Students have completed two semesters of undergraduate mathematical statistics (Math 4751, Math 4752). Alternatively, these requirements can be satisfied by taking ECON 8710 or MSA 8190.

**Course Requirements: The Master of Actuarial Science**

This section is applicable to students interested in the Master of Actuarial Science Degree.

Students interested in the dual degree programs should go to Section 3 (MAS/MRM) or Section 4 (MAS/MSA) below.

**Required Courses (27 hours):**

- FI 8000 Valuation of Financial Assets (3)
- AS 8340 Life Contingencies I (3)*
- AS 8350 Insurance Mathematics (3)*
- AS 8810 Actuarial Science Graduate Seminar (3)
- ECON 8740 Applied Statistics and Econometrics (3)**
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8000 Analytical Programming (2)
- MRM 8389/MRM 8391/MAS 8391 CPT/Internship/Field Study (1)

*Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section B & C below in consultation with the actuarial science faculty adviser.

**Students can use ECON 9720 Econometrics II as a substitute for ECON 8740. Students in the dual degree Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management must substitute ECON 9720 for ECON 8740.

Students must complete a minimum of 6 hours of course work from sections B and C combined.

**Elective Courses in the Major or in Mathematical Risk Management: (3-9 hours)**

- AS 8430 Loss Distributions and Credibility Theory (3)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- MRM 8620 Quantitative Financial Risk Models (3)
- MRM 8630 Stochastic Interest Rate and Credit Models (3)
- RMI 8050 Risk Management Modeling (3)
- RMI 8300 Predictive Risk Models (3)

**Electives Outside the Major: (3-6 hours).** At least one course must be selected from the 8000 level offerings in Risk Management and Insurance (RMI). Nonmajor electives must be individually approved by
an actuarial science faculty adviser. In the selection of these electives, students will be strongly encouraged
to choose courses that will serve to enhance their skills in writing and other forms of communication.

**Course Requirements:** Dual Degree Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management.

This section is applicable to students interested in the dual degree program Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management. Students interested in the Master of Actuarial Science should go to Section 2 above. Students interested in the dual degree program Master of Actuarial Science and Master of Science in Analytics should go to Section 4 below.

**Required Technical Support Courses (0-3 hours):** FI 8000 Valuation of Financial Assets (3)*

*Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management faculty adviser.

**Required Courses in the Dual Degree Program (27-33 hours)**

- AS 8340 Life Contingencies I (3)**
- AS 8350 Insurance Mathematics (3)**
- AS 8810 Actuarial Science Graduate Seminar (3)
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8630 Stochastic Interest Rate and Credit Models (3)
- MRM 8640 Advanced Credit Risk Models (alternatively, students can take MRM 8620 Quantitative Risk Models)
- RMI 8370 Financial Risk Management (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- ECON 8780 Financial Econometrics (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the actuarial science faculty adviser.

**Elective Courses in the Dual Degree Program (12-21 hours)**

Students should consult with the faculty advisers for the Master of Actuarial Science and Mathematical Risk Management programs prior to beginning their elective coursework and may select from among the following courses:

- AS 8430 Loss Distributions and Credibility Theory (3)
- AS 8520 Non-life Insurance Mathematics (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8240 Global Portfolio Management (3)
Students may select, with the prior approval of both faculty advisers for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

**Course Requirements:** Dual Degree Master of Actuarial Science and Master of Science in Analytics. This section is applicable to students interested in the dual degree program Degree Master of Actuarial Science and Master of Science in Analytics. Students interested in the Master of Actuarial Science should go to Section 2 above. Students interested in the dual degree program Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program should go to Section 3 above.

**Required Technical Support Courses**

The following course must be completed within the first 18 hours of 8000-level course work: FI 8000 Valuation of Financial Assets (3)*

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

**Required Courses in the Dual Degree Program**

- AS 8340 Life Contingencies I (3)**
- AS 8350 Insurance Mathematics (3)**
- AS 8810 Actuarial Science Graduate Seminar (3)
- CIS 8040 Database Management Systems (3)
- MSA 8010 Data Programming (3)
- MSA 8050 Unstructured Data Management (3)
- MSA 8100 Operations Research Models and Methods (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- MSA 8300 Value Through Analytics (3)
- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)
- MRM 8320 Stochastic Risk Management Models (3)
** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the actuarial science faculty adviser.

**Elective Courses in the Dual Degree Program (9-15 hours)**

Students should consult with the program directors for the Master of Actuarial Science and Analytics programs prior to beginning their elective coursework and may select from among the following courses:

- Any of the 8000 level MSA elective classes
- AS 8340 Life Contingencies (3)
- AS 8350 Insurance Mathematics (3)
- AS 8430 Loss Distributions and Credibility Theory (3)
- AS 8810 Actuarial Science Graduate Seminar (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- MRM 8630 Stochastic Interest Rate and Credit Models (3)
- MRM 8640 Advanced Credit Risk Models
- RMI 8150 Corporate Risk Management (3)
- RMI 8300 Predictive Risk Models (3)
- RMI 8370 Financial Risk Management (3)

Students may select, with the prior approval of both program directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

**Program of Study**

Each student’s program must be planned in consultation with a faculty adviser in actuarial science and a copy of the program filed with the Office of Graduate Admissions and Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. The program of study should be planned before the student takes a non-required course. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to the GASS.

**Time Limit**

The time limit for completing the M.A.S. program is five years from the first semester a course in sections
The purpose of the Master of Business Administration/Master of Health Administration joint programs is to prepare future executives to assume responsible managerial positions in health care and business organizations. To accomplish this purpose, the M.B.A./M.H.A. curriculum is structured to provide (1) the basic theoretical knowledge needed to develop as a manager in a variety of health care and business organizations; (2) an understanding of the pragmatic applications of theoretical concepts applied to operational issues through health casework and involvement with health care facilities throughout the program; (3) the technical skills appropriate to successfully function as a health care or business manager; and (4) an understanding of the values, traditions, ethics, and attitudes basic to excellence in health care leadership roles.

The strength of this M.B.A./M.H.A. program lies in the fact that it applies the theoretical concepts of business administration to health administration. The curriculum is designed around a set of competencies that define the set of knowledge, skills and abilities students should possess upon completion of the program.

Business knowledge and skills
- Financial Management
- Operations Management
- Strategic Management
- Human Resource Management
- Analytics

Knowledge of the Health Care Environment
- Clinical Professions and the Continuum of Care
- Legal and Regulatory Environment
- Health Care Economics and Financing
- Governance
- Health Policy
- Measurement and Improvement of Organizational Performance and Quality
- Health Information Systems and Technology

Leadership
- Strategic Communication
- Motivation and Empowerment of Others
- Group Participation and Leadership
- Change Management
- Servant Leadership

Professionalism
- Self Regulation, Self Awareness and Self Confidence
- Ethics, Honest and Integrity
A Commitment to Lifelong Learning

7170.10 Admissions
The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. Applicants must be accepted by the Institute of Health Administration in addition to receiving admission to graduate study in the Robinson College of Business. A personal interview is required for all applicants but may be waived by the director of the institute in exceptional circumstances.

Admission to the M.B.A./M.H.A. degree programs occurs each semester. Early application is advised, since the number of applicants each year exceeds program capacity. Applicants should note that health administration courses are offered during the evening.

7170.20 Regulations for the Degrees
The Master of Business Administration (M.B.A.)/Master of Health Administration (M.H.A.) joint degrees are comprised of 54-66 semester hours of 8000-level graduate courses; a one-semester administrative residency is included. The residency (three semester hours) must be satisfactorily completed at a site approved by the Director of the Institute. A maximum of twelve semester hours of MBA coursework can be exempted based on previous completion of equivalent coursework.

The time limit for completing the M.B.A./M.H.A. joint degrees is five years.

Applicants who have already completed an AACSB accredited M.B.A. degree program may request to complete only the M.H.A. portion of the joint programs and earn only the M.H.A. degree. These requests must be approved by the faculty of the Institute of Health Administration. A limited number of students can be accepted for this option. The program of study for students approved for this option includes the 36 semester hours of health administration courses listed in items 4 and 5 below and the three-hour residency requirement described in item 6 below. (Such students should have already completed equivalents to MBA courses; in the event any deficiencies exist, these will be assigned as additional courses.)

7170.30 The M.B.A./M.H.A. Curriculum

The M.B.A./M.H.A. degrees meet all M.B.A. core requirements. In cases where a health-oriented course is essential and is available, students will substitute this course for the standard requirement. Health courses are taken to complete M.B.A. elective requirements and M.H.A. core requirements. Following completion of all core requirements, an elective is selected from available health administration courses to meet the student’s interests, career objectives, and academic requirements. The course requirements for the M.B.A./M.H.A. degrees and the format of the program follow.

1. Cornerstone Core Courses (7.5-13.5 hours): These courses provide a solid intellectual grounding within an integrative framework that sets the stage for the entire program. Managing in the Global Economy cannot be waived. Waiver of Strategic Business Communications and Financial Statement Analysis maybe waived based on education or work experience. Once a course is waived, it may not be taken later for credit. Foundation courses and Cornerstone Core courses may be taken concurrently.

   • MBA 8000 Managing in the Global Economy (3)
   • MBA 8015 Strategic Business Communication (3)
   • MBA 8025 Financial Statement Analysis (3)
2. Functional Core Courses (4.5-10.5 hours): The functional core offers curricular breadth. Up to 6 hours (two courses) in this category may be waived based on a student’s undergraduate degree. Once a course is waived, it may not be taken later for credit. MBA 8000 and MBA 8025 are prerequisites for every Functional Core course, and MBA 8015 and MBA 8040 are co-requisites.

• MBA 8115 Managerial Accounting and Control Systems (1.5)
• MBA 8135 Corporate Finance (3)
• MBA 8145 Marketing Management (3)

• MBA 8165 Leadership and Organization Behavior (3)

3. Business Elective Course (3 hours): At least one business elective chosen from this list are required of all students:

• MBA 8125 Digital Innovation (3)
• CIS 8000 IT Project Management (3)
• MGS 8730 Project Management (3)

4. Required Courses in Health Administration (27 hours):

• HA 8160 Introduction to the Health Care System (3)
• HA 8190 Health Policy and Ethics (3)
• HA 8250 Health Economics and Financing (3)
• HA 8440 Executive Leadership in Health Care (3)
• HA 8450 Legal Environment of Health Care (3) Replaces MBA 8030, Legal Environment: Ethics and Corporate Governance, in the MBA curriculum.
• HA 8550 Healthcare Financial Management and Planning (3)
• HA 8620 Operations Management and Quality in Health Care (3) Replaces MBA 8155, Operations Management, in the MBA curriculum.
• HA 8670 Health Information Systems (3)
• HA 8990 Strategic Management in Health Care (3) Replaces MBA 8820, Global Competitive Strategy in the MBA curriculum.

5. Electives in Health Administration (9 hours). At least three 8000-level health administration electives chosen from this list are required of all students:

• HA 8460 Human Resource Management in Health Care (3)
• HA 8680 Care Management and Delivery Systems (3)
• HA 8700 Health Services Research and Evaluation Methods (3)
• HA 8750 Predictive Analytics in Healthcare (3)

6. Residency Requirement (3 hours).
An administrative residency or experiential learning of one academic semester is required to provide an opportunity for synthesizing and applying the curriculum. Residencies are available in hospitals, health service facilities, organizations, and corporations throughout the country. The Institute of Health Administration assists students who are responsible for obtaining the residency, works with the preceptor to develop student protocols, and evaluates the residency. Three hours of credit will be awarded for the academic semester of residency, upon completion of HA 8810. The residency is subject to the same matriculation/tuition fees taken on campus for these three semester hours. Students must meet all report/evaluation assignments. With approval by the faculty of the Institute, the administrative residency for international students or students with extensive experience may be replaced with a special project that will more appropriately prepare the person for service in the health system. The time period required to complete the project will be determined by the faculty but may not exceed the regular residency period.

Note: If changes to the MBA curriculum are implemented, students are advised to contact the Institute of Health Administration for impact on degree requirements.

7180 Master of International Business

7180 Master of International Business

Penelope B. Prime, MIB Program Director

The Master of International Business program in the Institute of International Business is offered in a one year format. The Master of International Business (MIB) is designed to meet the needs of students who wish to acquire a strong background in international business preparing them for careers in an increasingly globally interconnected and interdependent business environment.

The goals of the MIB program are to: (1) extend functional skills to address managerial issues in the global marketplace; and (2) enhance students’ intercultural awareness and sensitivity. Course requirements are intended to strengthen functional skills required for an enterprise competing in the global economy. The curriculum is further enhanced through a supervised international business field study, often embedded in the rich and diverse business community surrounding Georgia State University. Students also gain a familiarity with doing business in different world regions.

7180.10 Regulations for the Degree

1. Eligibility. Applicants must hold a four-year undergraduate degree from an accredited college or university. Candidates will be evaluated based on interviews, grade point average, GMAT or GRE and TOEFL or IELTS scores if needed. Ability to handle demanding coursework and contribute to the cohort will also be considered. Professional experience and foreign language proficiency are not required.

2. Foundation coursework. Students accepted into the program with non-business undergraduate degrees are required to take online preparatory classes that cover essential concepts in economics,
accounting, finance, and statistics prior to starting the program.

3. Course Requirements: The rigorous 10 course, 30-credit curriculum provides graduates with an in-depth knowledge of international business fundamentals. Students also benefit from extensive contact with corporate executives, guest speakers, and professional and social events.

Required curriculum for the MIB is as follows (30 hours):

IB 8080 Legal Aspects of International Business (3)
IB 8090 International Business Environment (3)
IB 8100 International Entrepreneurship (3)
IB 8180 Doing Business in Emerging Markets (3)
IB 8550 Special Topics in International Business (3)
IB 8090 Analyzing International Business Problems (3)
IB 8630 International Business Negotiation (3)
IB 8990 Policy & Strategy in the International Marketplace (3)

and one of the following:

IB 8190 Doing Business in World Regions (3)
FI 8040 Survey of International Finance (3)

and one of the following:

IB 8510 International Business Field Study (3)
IB 8500 International Business Internship (3)
For additional information, please visit the following website: http://iib.robinson.gsu.edu/academic-programs/mib-one-year/

7190 Flexible Master of Professional Accountancy

Winifred Akande, wakandel@gwu.edu

The Flexible Master of Professional Accountancy (Flex MPA) program is flexible in that students may take
up to five years to complete the program and may choose which courses to take each semester. The objective of the Flexible MPA program is to prepare students for professional careers in accounting. More specifically, the objective of the Flexible MPA programs is to develop skills needed to excel in a professional path toward a leadership position in the practice of accountancy. The Flexible MPA program uses the student’s previously acquired undergraduate skills to focus on developing advanced technical and analytical skills in accounting. The primary objectives are for students to develop and integrate: (1) skills for analyzing organizational performance systems that incorporate global and ethical dimensions; (2) skills in financial reporting; (3) assurance skills; (4) skills for collaborative work in teams; and (5) communication and technology skills. Typically, graduates of this program will find professional accounting positions in public accounting firms and in business and governmental organizations that have a need for graduates with greater depth and breadth in the discipline of accounting than is generally available in graduates with a B.B.A. or M.B.A. in accounting.

7190.10 Admissions

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. It is assumed that a person entering the fifth (graduate) year of the professional accounting program will have or will acquire the equivalent of the preparation offered in the four years of Georgia State’s B.B.A. program in accounting.

An accepted applicant, who at the time of admission to the Flexible MPA program, has not completed the foundation and prerequisite courses must complete these requirements in a manner approved by the faculty adviser and the director of master’s admissions.

7190.20 Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the Flexible MPA program. A maximum of six semester hours of transfer credit is permitted in this 30-hour program. The course requirements for the Flexible MPA degree and the format of the program follow.

2. Course Requirements: Foundation and Prerequisite Courses Consult the Course Descriptions chapter of the Georgia State University Undergraduate Catalog for prerequisites to the undergraduate courses listed below. This catalog is available on the web at http://catalog.gsu.edu; click on Students then Catalogs. The courses in this section are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent coursework has been previously completed with minimum grades of C-.

**Accounting:** ACCT 2101 and ACCT 2102, or MBA 8025 and MBA 8115; ACCT 4111, ACCT 4112, ACCT 4113, ACCT 4210, ACCT 4310, ACCT 4510, and ACCT 4610.

**Behavioral Science:** MBA 8165 Leadership and Organizational Behavior or management principles (MGS 3400).

**Programming:** Visual BASIC or C/C++ (CIS 3260): required if ACCT 8630 (Information Technology Auditing) is taken as an elective.
Economics: Both macroeconomic principles (Econ 2105) and microeconomic principles (ECON 2106).

Mathematics: College algebra (MATH 1111) and either calculus (Math 1220) or discrete math (Math 2420). Math 2420 has precalculus as the minimum prerequisite.

Statistics: MATH 1070 Elementary Statistics.

Management Science: MGS 3100

Finance: Corporate finance principles (FI 3300).

Graduate students who receive a grade lower than a grade of C- in any undergraduate accounting course may repeat that course but may not enroll in any other accounting course until a grade of C- or higher is earned in that course Flexible MPA students who have undergraduate accounting courses required and who have financial aid should refer to “Courses Eligible to Count Toward Graduate Students’ Financial Aid” before registering for the first time with graduate status.

3. Course Requirements:

a. Required Courses (24 hours)

- MBA 8015 Strategic Communications (3)
- ACCT 8120 Advanced Federal Taxation (3)
- ACCT 8130 Advanced Accounting Topics (3)
- ACCT 8310 Seminar in Management Accounting Systems (3)
- ACCT 8420 Special Topics in Financial Accounting
- ACCT 8610 Advanced Topics in Assurance Services (3)
- ACCT 8700 Financial Statement and Business Analysis (3)
- ACCT 8740 Seminar on Internal Auditing (3)

b. Electives in the Specialization (6 hours).

Select any two 8000-level ACCT classes.

4. Advisement/Course Selection: The Flexible MPA program coordinator is available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

5. The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in accounting or taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.
6. Time Limit: The time limit for completing the Flexible MPA program is five years from the first semester a course in the program.

**7185 One-Year Regynald G. Washington Master of Global Hospitality Management**

Soon-Ho Kim, Program Director, 404/413-7615, skim@gsu.edu

Robinson’s One-year Regynald G. Washington Master of Global Hospitality Management is the only program of its kind in the state of Georgia. This year-long cohort program provides the critical decision-making, managerial, practical, analytical, technical, and leadership skills necessary for success in today’s global hospitality and tourism environment. Students benefit from extensive networking and connecting with hospitality executives worldwide and professional gatherings. Program enrolls in the fall semester only.

Students proceed as a group through a sequenced curriculum of modules beginning each August. The program may be offered in an online cohort and/or as a classroom-based cohort. Classroom-based cohorts meet every Tuesday and Thursday evening from 5:30 to 9:45 p.m. All classes are taught at the Georgia State University’s Executive Education Center in Buckhead.

Curriculum

The 30-hour curriculum comprises 10 courses including:

• Survey of Hospitality and Tourism
• Economic Cultural Impact of Travel and Tourism
• Global Trends in the Foodservice Industry
• Global Trends in the Lodging Industry
• International Special Event Management
• Hotel Assets
• Sustainable Operations in Hospitality
• Hospitality and Tourism Research Methodology
• Applied Industry-Based Research Project
• Financial Management Applications in Hospitality Enterprises

In addition to the 10 courses, students must fulfill the specialized master’s foundation requirements found in section 7110.10

**7195 Cohort Master of Professional Accountancy**

Winifred Akande, Associate Director of Integrated Graduate Student Services, wakande1@gsu.edu

Kaile Rackley, Graduate Recruitment Coordinator, krackley@gsu.edu

The objective of the Cohort Master of Professional Accountancy (Cohort MPA) degree program is to
prepare non-accounting students for professional careers in accounting. More specifically, the Cohort MPA program develops skills needed for non-accounting professionals to excel in a professional path in accountancy. The Cohort MPA provides students with the knowledge, skills and upper level credit hours required to become eligible to sit for the Certified Public Accountant exam or Certified Management Accountant exam within one year — a process that usually takes more than two years to complete. The program starts all students with intermediate accounting building on their knowledge of Principles of Accounting I and II. Typically, graduates of this program will find professional accounting positions in public accounting firms and in business and governmental organizations.

7195.10 Admissions

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. All applicants must take the GMAT/GRE and each finalist may be interviewed before an admission decision is made.

An accepted applicant, who at the time of admission to the MPA program, has not completed the foundation and prerequisite courses must complete these requirements in a manner approved by the faculty adviser and the director of master’s admissions.

7195.20 Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MPA program.

2. Course Requirements: Foundation and Prerequisite Courses Consult the Course Descriptions chapter of the Georgia State University Undergraduate Catalog for prerequisites to the undergraduate courses listed below. This catalog is available on the web at http://catalog.gsu.edu; click on Students then Catalogs. The courses in this section are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent coursework has been previously completed with minimum grades of C-.

Accounting: ACCT 2101 and ACCT 2102, or MBA 8025 and MBA 8115.

Economics: Both macroeconomic principles (Econ 2105) and microeconomic principles (ECON 2106).

Mathematics: College algebra (MATH 1111) and either calculus (Math 1220) or discrete math (Math 2420). Math 2420 has precalculus as the minimum prerequisite.

Graduate students who receive a grade lower than a grade of C- in any undergraduate accounting course may repeat that course but may not enroll in any other accounting course until a grade of C- or higher is earned in that course. Flex MPA students who have undergraduate accounting courses required and who have financial aid should refer to “Courses Eligible to Count Toward Graduate Students’ Financial Aid” before registering for the first time with graduate status.

3. Course Requirements: The rigorous 10-course curriculum provides graduates with broad and deep functional knowledge as well as the upper-level credit hours required for CPA/CMA eligibility.
4. Advisement/Course Selection: The MPA program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

5. The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in accounting or taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.

7196 JD/MPA Joint Program

Winifred Akande, Associate Director of Integrated Graduate Student Services, wakande1@gsu.edu

The College of Law and the J. Mack Robinson College of Business offer a joint degree program that allows students simultaneously to pursue advanced coursework in Law and Public Accountancy (the “JD/MPA Program”). Full-time students are able to satisfy all requirements for both a Juris Doctorate and a Master of Professional Accountancy (MPA) in as little as four years, or eight semesters, as opposed to the five years, or ten semesters, that would be required if the two degrees were pursued separately.

7196.10 Admissions

Candidates interested in the joint-degree program must satisfy the admissions requirements and be admitted to each College separately. Applicants should contact the Admissions Office of each school for application information. Students must take the GMAT or GRE for admissions to the J. Mack Robinson College of Business and the LSAT for admission to the College of Law.

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. All applicants must take the GMAT/GRE and each finalist may be interviewed before an
admission decision is made.

The application procedures and admission criteria are given in chapter 6000 “College of Law” for the JD program.

An accepted applicant, who at the time of admission to the MPA program, has not completed the foundation and prerequisite courses must complete these requirements in a manner approved by the faculty adviser and the director of master’s admissions.

7196.20 Regulations for the Degree

After students have been admitted to both programs and have declared their intent to enter the dual degree program, they must, at their first opportunity, complete the first 31 credit hours of required courses in the JD program. After the first 31 required credit hours of law are complete, enrollment in either college or both concurrently is permitted.

For the MPA, the J. Mack Robinson College of Business requires all candidates to complete 24 credit hours of general business coursework. Students without an undergraduate degree in accounting must also complete two introductory accounting courses (Acct 2101 and Acct 2102, or MBA 8025 and MBA 8115) and 21 semester hours of undergraduate (4000 level) accounting courses. Additionally, the J. Mack Robinson College of Business requires students to complete 30 credit hours of 8000-level courses: a three-credit hour strategic communications course, 21 credit hours of required accounting and tax courses, and six credit hours of accounting and tax electives.

The College of Law requires all JD candidates to complete 90 credit hours of law courses (43 of which are required courses and 47 of which are elective courses).

Students enrolled in the Joint JD/MPA Program are permitted to apply 24 credit hours of law courses toward the required 24 credit hours of general business coursework. In addition, the J. Mack Robinson College of Business will allow 12 semester hours of law courses to be credited toward the 30 credit hours of 8000 level required MPA courses, as follows: six credit hours of law courses applied toward the six credit hours of elective MPA courses; a three credit hour tax law course applied toward the required course TX 8020, and a three credit hour law course applied toward the three credit hour strategic communications course.

Reciprocally, the College of Law will allow 12 credit hours of 8000-level MPA courses to be credited towards the requirements of the JD program. Thus, a student enrolled in the Joint JD/MPA Program student will be able to complete the requirements for both degrees by completing 18 credit hours in the Robinson College of Business and 78 credit hours in the College of Law.

Degree requirements for both programs must be complete within eight years of the student’s initial semester of enrollment in the MPA Program. The JD degree must be completed within six years of the student’s initial enrollment in the JD program. Students must satisfy the degree requirements of each school and should consult with advisors in each school for the precise graduation requirements for each degree and for information about course offerings. JD candidates may apply for the MPA program at any point. MPA candidates may enroll in the joint program at any point prior to completion of 21 semester hours of 8000-level MPA coursework.
Advisement/Course Selection: The MPA program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in accounting or taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.

7200 Master of Science

The Master of Science program allows students to concentrate their studies in one of the six majors listed below:

- Business Economics
- Finance
- Managerial Sciences
- Marketing
- Wealth Management
- Risk Management and Insurance

The Master of Science program is designed particularly for students who already have an undergraduate degree in business administration and wish to study one of the disciplines in which a major is offered in greater depth. Students who do not have an undergraduate background in business but have already established a career in a field related to one of the M.S. majors may find that the specialized degree can be tailored to fit career needs.

The requirements for each of these major fields of study are given in the following sections.

7200.05 Major in Business Economics

Jon Mansfield, Program Director, 404-413-0151, jmansfield@gsu.edu

The mission of the business economics major in the Master of Science program is to prepare students to function successfully as professional economists in the corporate and business environment. More specifically, the program endeavors to:

- build a solid background in micro and macroeconomic theory;
• equip students with an extensive knowledge of analytical and statistical techniques;
• provide expertise and practice in applying theory and quantitative tools to actual business problems; and
• ensure that students are able to communicate this information both in a technical way to peers and in a more general way for decision-making by upper management.

Regulations for the Degree

1. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S./Bu.E. program. A maximum of six hours of transfer credit is permitted in this 30-hour program.

2. Course Requirements: The course requirements for the degree of Master of Science with a major in business economics and the format of the program follow. If prerequisites for the courses listed in each section have not been previously completed, they must be taken as additional hours. Consult the Course Descriptions chapter of this catalog for a listing of the prerequisites for each graduate course. Undergraduate foundation course descriptions and prerequisites are shown in the Georgia State University Undergraduate Catalog. This catalog is available on the web at catalog.gsu.edu.

   a. Foundation Courses. The courses in this list are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher.

   **Accounting:** Financial accounting principles (ACCT 2101).

   **Behavioral Science:** Management principles (MGS 3400).

   **Economics:** Intermediate macroeconomics (ECON 3900) and microeconomics (ECON 3910). Prerequisites are ECON 2105 and ECON 2106, respectively.

   **Mathematics:** Calculus (ECON 6030 or MATH 1220).

   **Statistics:** MATH 1070.

   b. Required Courses (15 hours)

   Fifteen hours is the minimum amount of course work in this portion of the program. Any prerequisites for these courses that have not been previously satisfied must be taken as additional hours. Consult the Course Descriptions chapter of this catalog for a listing of the prerequisites for each of these required courses.

   • ECON 8100 Applied Microeconomic Analysis (3)
   • ECON 8110 Macroeconomic Analysis (3)
   • ECON 8430 Theory of the Firm and Business Strategy (3)

   Select two of the following four:
c. Economics Electives (15 hours): Electives will be selected consistent with the student’s planned program. They must be approved in advance by the M.S./Bu.E. Program director, Dr. Jon Mansfield. The suggested electives are listed below (all courses are 3 credit hours):

- ECON 8180 Applied Economic Analysis
- ECON 8440 Industrial Organization & Antitrust Economics
- ECON 8740 Applied Statistics & Econometrics
- ECON 8840 Applied Statistics & Econometrics 2
- ECON 8860 Economics Of Global Finance
- FI 8000 Valuation Of Financial Assets
- FI 8020 Financial Analysis & Loan Structure
- FI 8040 Survey of International Finance
- FI 8060 Current Issues In Finance
- FI 8240 Global Portfolio Management
- FI 8420 The Financial System
- BCOM 8250 Effective Executive Communication
- BCOM 8260 Corporate Communication
- MBA 8015 Strategic Business Communication
- MBA 8025 Financial Statement Analysis
- MBA 8135 Corporate Finance
- IB 8090 International Business Environment
- IB 8180 Business Systems in Advanced Economies & Emerging Markets
- IB 8190 Doing Bus/World Regions
- MGS 8110 Applied Regression Analysis
- MGS 8150 Business Modeling
- MK 8200 Marketing Research

3. Program of Study. Each student’s program must be planned in consultation with the M.S./Bu.E. program director before a non-required course is taken. Students may contact the department (404-413-0141) or Dr. Mansfield (jmansfield@gsu.edu) to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to the Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

4. Time Limit: The time limit for completing the M.S./Bu.E. program is five years from the first semester a course in section B or C (above) is taken.

7200.15 Major in Finance
This program is currently only available in the cohort format.
Alfred Mettler, Program Director, 404-413-7327, mettler@gsu.edu

Conrad Ciccotello, Program Director Asset & Wealth Management Specialization, 404-413-7462, cciccotello@gsu.edu

Cohort MS in Finance format

The Cohort Master of Science in Finance is offered in a one-year format with three distinctive specializations. The program is ideally suited for accounting, finance, banking, and wealth management professionals wishing to augment their professional expertise and is focused on the decision-making, personal, analytical and technical skills required to compete in today’s ever-changing financial environment.

In addition, students are provided leadership training as well as extensive contact with senior executives through a guest speaker series, class participation, and professional and social gatherings. Furthermore there is an opportunity for students to be part of in a formal mentoring program.

Applicants must hold a four-year undergraduate degree from an accredited college or university. Work experience is preferred but not required.

Robinson’s Cohort MS-Finance will be offered in a one-year format over three semesters. Class size will be limited and students will proceed as a cohort—a structure that fosters peer learning, collaboration and the building of lifelong business networks. The courses will be taught at Robinson’s Executive Education Center in Buckhead and will meet every Monday evening from 5:30 p.m. to 9:45 p.m. and every other Wednesday evening from 5:30 p.m. to 9:45 p.m. during the Spring and Fall semesters. Two classes will be offered during the Summer semester with a month-long break in between. Two innovative courses, Current Issues in Finance and Financial Leadership – Leading the Finance Function, designed to promote interaction with senior level finance executives, will meet four Saturdays during every Spring and Fall semester. Program enrolls in the spring and fall semesters in 2016 and fall semester only beginning in 2017.

The 30-hour curriculum comprises of an integrated first semester, in which all students take the same classes. At the end of the first semester students will choose their specialization. In addition to the 30-hour curriculum, students will need to complete the specialized master’s foundation courses referenced in section 7110.10.

The three specializations in the Cohort MS Finance Program are:

- Corporate Finance
- Global Capital Markets and Financial Services
- Asset and Wealth Management

Cohort MS Finance Curriculum

Spring Semester (all students, regardless of later specialization)

- MBA 8135 Corporate Finance
- FI 8000 Valuation of Financial Assets
- FI 8450 Financial Analysis of Asset and Wealth Management
- FI 8070 Financial Leadership

**Summer Semester**

**Corporate Finance specialization**

- FI 8310 Investment Banking
- FI 8020 Financial Analysis and Loan Structuring

**Global Capital Markets and Financial Services specialization**

- FI 8310 Investment Banking
- FI 8020 Financial Analysis and Loan Structuring

**Asset and Wealth Management specialization**

- ACCT 8040 Topics in Federal Taxation
- FI 8020 Financial Analysis and Loan Structuring

**Fall Semester**

**Corporate Finance specialization**

- FI 8360 Special Topics in Finance
- FI 8200 Derivative Markets
- FI 8320 Corporate Financial Strategy
- FI 8070 Financial Leadership
- FI 8090 Financial Data Analytics
- FI 8389/8391 Internship/CPT

**Global Capital Markets and Financial Services specialization**

- FI 8360 Special Topics in Finance
- FI 8240 Global Portfolio Management
- FI 8260 Hedge Funds and Their Trading Strategies
- FI 8070 Financial Leadership
- FI 8090 Financial Data Analytics
- FI 8389/8391 Internship/CPT

**Asset and Wealth Management specialization**

- PFP 8420 Financial Advice and Planning over the Life Cycle
- FI 8240 Global Portfolio Management
- FI 8260 Hedge Funds and Their Trading Strategies
- PFP 8520 Advanced Studies in Asset and Wealth Management
Flex MS in Finance format

* This program is currently not offered in a Flex format, and is only available in the cohort format.

The MS-Finance curriculum is designed to provide graduates with advanced knowledge of master’s-level finance, including particular expertise in their area of specialization (chosen from Corporation Finance, Investments, or Financial Institutions and Markets). The primary emphasis of the program is to provide students with the theoretical, analytical and technical skills necessary to examine particular financial situations, formulate alternative plans for action and develop policy initiatives. The program prepares graduates to understand the context for issues encountered in the rapidly evolving domestic and international financial environment. Quantitative and analytical course requirements in the areas of optimization techniques, computer modeling and statistical methodology complement the finance course requirements.

Regulations for the Degree

1. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies and procedures given in the “Master's Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S.-Finance program. A maximum of six hours of transfer credit is permitted in this program only if 12 hours are taken in section B below; otherwise a maximum of three hours of transfer credit is permitted.

2. Course Requirements. The course requirements for the degree of Master of Science with a major in finance and the format of the program follow.

   a. Foundation Courses. The courses in this list are in addition to the 30 semester hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher.

      Accounting: MBA 8025 or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300).

      Behavioral Science: MBA 8165 Leadership and Organizational Behavior or Management principles (MGS 3400) or marketing principles (MK 3010).

      Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

      Mathematics: College algebra (MATH 1111) and calculus (MATH 1220).

      Statistics: MATH 1070 or equivalent.

   b. Required Major/Technical Support Courses (9-12 hours). These courses must be completed during the first 18 hours of 8000-level course work in the M.S.-Fi program.
• MGS 8020 Business Intelligence (3) (or MBA 8025 Financial Statement Analysis (3) subject to approval by the MS faculty advisor)
• MGS 8150 Business Modeling (3)
• MGS 8110 Applied Regression Analysis (3)
• MBA 8135 Corporate Finance (3)

Note: MBA 8135 may be exempted (with replacement) if FI 3300, FI 4300, and FI 4320 or their equivalents have been completed with grades of C or higher at the time of admission.

c. Specializations (18-21 hours). Students not exempting MBA 8135 are required to take 18 hours of Fi-prefixed courses; 21 hours if exempting MBA 8135. These courses consist of the following:

(i) All M.S.-Finance students are required to take the following course:

• FI 8000 Valuation of Financial Assets (3)

(ii) All students are also required to take a minimum of nine (9) semester hours within a chosen finance specialization. Three areas of specialization are shown below along with various courses considered appropriate for each area that students may select from.

(iii) In addition to FI 8000 (3 hours) and the 3 courses (9 hours) comprising the chosen finance specialization, students must select an additional six to nine semester hours of any other Fi-prefixed courses (6 hours if MBA 8135 is not exempted; 9 hours otherwise).

Fi-prefixed courses comprising Specializations:

Corporate Finance

• FI 8040 Survey of International Finance (3)
• FI 8200 Derivative Markets I (3)
• FI 8300 Advanced Corporate Finance (3)
  • FI 8320 Cases and Readings in Corporate Finance (3)
• FI 8350 Corporate Restructuring and Workouts (3)
• FI 8360 Special Topics in Corporate Finance (3)
  * May be taken multiple times for different topics.

Investments

• FI 8020 Financial Analysis and Loan Structuring (3)
• FI 8200 Derivative Markets I (3)
• FI 8240 Global Portfolio Management (3)
• FI 8260 Hedge Funds and Their Trading Strategies (3)
• FI 8310 Investment Banking (3)

Financial Institutions and Capital Markets
- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8040 Survey of International Finance (3)
- FI 8260 Hedge Funds and Their Trading Strategies (3)
- FI 8400 Financial Institutions (3)
- FI 8420 The Financial System (3)
- FI 8440 Finance and Banking in the Global Economy (3)

The Department encourages all students pursuing the M.S.-Finance degree to take FI 8000 early in their program as it is a prerequisite for all electives except FI 8020 and FI 8040. FI 8000 is designed so that it may be taken concurrently with MBA 8135 to provide students greater scheduling flexibility.

3. Program of Study. Each student’s program of study must be planned in consultation with the M.S.-Finance program director prior to the completion of the first semester of enrollment. A copy of the program will be filed with the Office of Graduate Recruiting and Student Services (GRSS) for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to GASS. Students always must consult the Course Descriptions chapter of this catalog to determine if they have met the prerequisites for any course to be taken.

4. Time Limit. The time limit for completing the M.S.-Finance program is five years from the first semester a course in section b or c (above) is taken.

7200.20 Major in Managerial Sciences

Thomas Conklin, Program Director, tconklin@gsu.edu

The Master of Science with a major in managerial sciences prepares professionals to assume leadership roles in organizations. Students learn critical management skills that allow them to communicate successfully, think creatively and adapt quickly to business fluctuations and transformations. There are two concentrations available for managerial sciences majors:

1. Talent Management: The talent management concentration prepares students to effectively recruit, retain and develop employees by focusing on best practices in selection, compensation and employment law.

2. Supply Chain and Analytics Management: The supply chain and analytics management concentration is designed to provide students with the knowledge necessary to assess the operations function of both goods-producing and service-rendering organizations, to diagnose current operating systems, and to prescribe and implement improvements. It also provides expertise for analytically oriented careers in business with an emphasis on applications of information technology.

While this program is structured in both cohorted and non-cohorted formats, it is anticipated that all admissions in the coming year will be in the cohorted format only.

Regulations for the Degree
1. The regulations, policies, and procedures given in the “Master's Enrollment” and “Master's Programs” sections of this chapter apply to the Master of Science in Managerial Sciences.

2. Course Requirements. The course requirements for the degree Master of Science with a major in Managerial Sciences and the format of the program follow:

a. Foundation and Prerequisite Courses. See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in the Major. Choose one of these tracks:

Concentration 1: Talent Management

Kelly Grace, Faculty Coordinator

- MGS 8200 Introduction to the Management of People, Processes and Projects
- MGS 8320 Legal Environment of Human Resource Management
- MGS 8360 Designing Talent Acquisition and Development Systems
- MGS 8390 Designing Total Rewards Systems

Concentration 2: Supply Chain and Analytics Management

Yusen Xia, Faculty Coordinator

- MGS 8200 Introduction to the Management of People, Processes and Projects
- MGS 8710 Managing Logistics and Supply Chains
- MGS 8770 Service Operations Management
- MGS 8040 Data Mining

C. Elective Courses. 18 hours. Choose courses with a MGS prefix (including any courses listed in the one concentration not chosen).

3. Program of Study/Course Prerequisites. With the exception of cohort-enrolled students, each student's program must be planned in consultation with the faculty coordinator for his or her concentration before a non-required course is taken. Students may contact the department to schedule an appointment. A copy of the program of study will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty coordinator and a copy of the changes sent to the Office of Graduate Student Services. Students must always consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

4. Time Limit. The time limit for completing the M.S./Managerial Science program is five years from the first semester a course in section B or C (above) is taken.
One Year MS in Managerial Sciences Format

The One Year Master of Science in Managerial Sciences is a cohorted program. In addition to the required courses in the two tracks listed above, the 18 credit hours of electives will be pre-selected for the entire cohort.

7200.25 Major in Marketing

Bruce K. Pilling, Program Director, 404-413-7673, bpilling@gsu.edu

The MS in marketing is designed primarily for persons with an undergraduate business degree who want to distinguish themselves as marketing specialists. The major is designed to provide the in-depth theoretical and applied training needed to excel in a leadership position in marketing. The program extends the students’ previously acquired basic business and marketing skills by developing advanced technical and analytical competency in a selected area. It therefore allows graduates to make more informed decisions in an increasingly complex marketing environment.

* This program is currently only available in the one year format.

Regulations for the Degree

1. The Masters of Science in Marketing is now available in a one year fast-track format. For additional information on this format, please visit the following website: http://marketing.robinson.gsu.edu/academic-programs/ms/.

2. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S./Marketing program. A maximum of six hours of transfer credit is permitted in this 30-hour program.

3. Course Requirements. The course requirements for the degree Master of Science with a major in marketing and the format of the program follow:

a. Foundation Courses. The courses in this list are in addition to the 33 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Descriptions chapter of the Georgia State University Undergraduate Catalog. This catalog is available at catalog.gsu.edu.

   Accounting/Finance: MBA 8025, or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300).

   Behavioral Science: Management principles (MGS 3400), managerial decision making (MGS 4000), marketing principles (MK 3010), psychology (PSYC 1101), sociology (SOCI 1101) or anthropology (ANTH 1102).
**Economics:** Microeconomic principles (ECON 2106).

**Mathematics:** College algebra (MATH 1111).

**Statistics:** MATH 1070.

b. **Required Courses in the Major (9 hours)**

- MBA 8145 Marketing Management (3)
- MK 8100 Buyer Behavior (3)
- MK 8200 Marketing Research (3)

c. **Marketing Electives (18 hours).** These electives may be chosen from among the 8000-level marketing courses that are not required as core or capstone courses. A maximum of nine hours of appropriate 8000-level courses from other departments in the Robinson College of Business or from elsewhere in the university may be substituted for these courses with departmental approval.

d. **Capstone Course (3 hours).**

- MK 8900 Strategic Market Planning (3)

4. **Program of Study.** Each student’s program must be planned in consultation with the M.S./marketing faculty adviser before a non-required course is taken. Contact the department to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty advisor and a copy of the changes sent to the Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

5. **Time Limit.** The time limit for completing the M.S./marketing is five years from the first semester a course in sections B, C, or D (above) is taken.

**One Year MS in Marketing format**

One Year Master of Science (MS) in Marketing is a year-long cohort program for marketing professionals who want to update/expand their knowledge, managers who oversee marketing activities but lack formal training, and career changers. Students proceed as a group through a sequenced curriculum of five session modules.

In addition to the required courses outlined in the general curriculum above, candidates must take 21 credit hours of pre-selected electives for this one year format. Students must fulfill the specialized master’s foundation requirement (section 7110.10). Courses meet at Georgia State University’s Buckhead Center on Monday and Wednesday evenings. New cohorts begin in January of each year. **Program enrolls in the spring semester only.**

The internationally renowned faculty of Robinson’s Department of Marketing and its Center for
Excellence in Brand and Customer Management developed the program, drawing on their expertise as researchers and theorists, strategists and practitioners. Concurrent to earning a Master of Science in Marketing, students also will earn Robinson’s Certificate in Brand and Customer Management.

The program is open to full-time working professionals, full-time students and international students.

7200.30 Major in Wealth Management

Conrad S. Ciccotello, Program Director, 404-413-7462, ccicotello@gsu.edu

Robinson’s MS in Wealth Management program places an emphasis on the individual student’s specific goals and objectives with regard to advancement in the financial advisory profession. Shifting in risk from government and business to families and individuals, changing regulation, and the explosion of new financial products and services create an enormous opportunity in the field of wealth management. The Robinson College of Business has offered graduate business programs in personal financial planning and wealth management for nearly thirty years. **Program enrolls in the spring semester only**

The program is designed to be completed in a sixteen-month period, beginning in January and concluding in April of the following year. Classes meet at Georgia State University’s Buckhead Center on Tuesday and Thursday evenings from 5:30 to 9:45 p.m.

**Regulations for the Degree**

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master's Programs” sections of this chapter apply to the M.S./WMGT program.

2. Course Requirements. The course requirements for the Master of Science degree with a major in wealth management and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

a. Foundation and Prerequisite Courses. The courses in this section are in addition to the 33 semester hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts see section 7110.10.

**Accounting/Finance:** MBA 8025, or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102, and FI 3300).

**Behavioral Science:** Management principles (MGS 3400), psychology (PSYC 1101), or sociology (SOCI 1101).

**Economics:** Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

**Mathematics:** College algebra (MATH 1111) and calculus (MATH 1220).

**Statistics:** MATH 1070.
Legal Studies: MBA 8030 or BUSA 2106.

Taxation: ACCT 4510.

Wealth management students are expected to be competent in computer operating systems (Windows-based or equivalent), word processing, and a spreadsheet package. Competence in mathematics of finance also is required and can be achieved through self study of math of finance tutorial outlines and manuals available in university bookstores.

b. The MS in Wealth Management program consists of 11 graduate courses (33 credit hours) including:

- MBA 8135 Corporate Finance
- FI 8000 Valuation of Financial Assets
- FI 8240 Global Portfolio Management
- FI 8260 Hedge Funds and their Trading Strategies
- FI 8440 Finance and Banking in the Global Economy
- PFP 8400 Personal Financial Planning
- PFP 8420 Financial Advice and Planning over the Life Cycle
- PFP 8460 Law, Enterprise, and Planning for Asset Transfer
- PFP 8520 Advanced Studies in Wealth Management and Advisory Practice
- RMI 8200 Risk Management and Insurance Planning
- TX 8510 Issues in Individual Taxation

3. Time Limit. The time limit for completing the M.S./WMGT program is five years from the first semester a course in section B or C (above) is taken.

7200.35 Major in Risk Management and Insurance

There are two specializations in the risk management and insurance major in the Master of Science program: Risk and Insurance and Mathematical Risk Management.

The mission of the Specialization in Risk and Insurance is to educate students in the theory and practice of risk management and insurance at an advanced level through a customized program of study. The program is designed to prepare students for analytical and technical staff, consulting, and applied research positions in risk management, employee benefits and insurance. The program is suited especially to the needs of students who have undergraduate business degrees or MBA degrees and who desire further course work in risk and insurance to enhance their professional careers.

Program Director: Martin F. Grace

The mission of the Specialization in Mathematical Risk Management is to provide students with a solid understanding of the application of mathematics in economics and finance to address contemporary risk management issues. Emphasis is placed on the diagnosis, analysis, pricing and customization of solutions to risk management problems, broadly defined to include both financial and operational risk exposures. The program is designed to prepare students for analytical and technical positions within financial institutions, risk management advisory organizations, and the treasury departments of non-financial corporations.
Quantitative in focus, the program is well suited for students with undergraduate and graduate degrees in mathematics, statistics or similar technical disciplines. Students with an MBA or undergraduate degree in economics, finance or actuarial science, who can demonstrate the necessary skills in mathematics, also make excellent candidates.

The Specialization in Mathematical Risk Management can be completed in 16 months over three semesters. Since the core courses are designed in a lockstep format, students should be prepared to begin their core sequence during the fall semester. Students who have not completed the foundational requirements for the degree should apply for admission during either the spring or summer semester so they can complete the prerequisites before the core sequence begins in the fall. Please contact the MRM program director for advice about the appropriate time when you should apply to enter the program.

Two dual-degree options are available: one in which students will earn both the Master of Actuarial Science degree and the Master of Science in Risk Management and Insurance degree specializing in Mathematical Risk Management (MAS/MRM); and one in which students will earn both the Master of Science in Analytics degree and the Master of Science in Risk Management and Insurance degree specializing in Mathematical Risk Management (MSA/MRM). The programs provide students with increased career opportunities in the financial services industries specializing in the application of quantitative methods to solve complex business problems in an era of financial services and capital markets convergence.

Program Director: Daniel Bauer

Regulations for the Degree

1. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this section. The Summary of Regulations-Master’s Programs, also found earlier in this section, applies to the M.S. program with a major in risk management and insurance as do the regulations, policies and procedures given in Section 7 (Master’s enrollment). A maximum of 6 hours of transfer credit is permitted in this Master of Science in Risk Management and Insurance program. A maximum of 9 hours of transfer credit is permitted in the 50-hour dual degree programs.

2. Course Requirements: Foundation and Prerequisite Courses Consult Section 10 (Course descriptions) and the heading “Undergraduate Foundation Courses” later in this bulletin for prerequisites to the courses listed below. The courses in this section are in addition to the 32 semester hours required for the Master of Science in Risk Management and Insurance degree or the 50 semester hours required for the dual degree programs. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent coursework has been previously completed with minimum grades of “C.”

Accounting/Finance: MBA 8025, or financial and managerial accounting and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300). Students specializing in Mathematical Risk Management must have completed Corporate Finance (MBA 8135). This requirement can be waived if FI 3300 and FI 4000, or equivalent coursework, have been completed with grades of “C” or higher.

Behavioral Science: MBA 8165 Leadership and Organizational Behavior or Management principles (MGS 3400). Students specializing in Mathematical Risk Management may satisfy this requirement with either principles of management (MGS 3400), sociology (SOCl 1101) or psychology (PSYC 1101).
Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106). Alternatively, both requirements can be satisfied by taking MBA 7035 Economics for Managers or the corresponding placement exam (see http://flex.robinson.gsu.edu/about/curriculum/placement-exam-option-mba-foundation-courses/).

Mathematics: College algebra (MATH 1111) and calculus (MATH 1220). Students specializing in Mathematical Risk Management must have completed three semesters of advanced calculus (MATH 2211, MATH 2212 and MATH 2215). Students entering the joint Master of Actuarial Science/Mathematical Risk Management program must have Compound Interest Theory AS 4230.

Statistics: Math 1070. Students specializing in Mathematical Risk Management must have completed two semesters of undergraduate mathematical statistics (Math 4751, Math 4752). Alternatively, this requirements can be satisfied by taking ECON 8710 or MSA 8190.

Legal Studies: MBA 8030 or BusA 2106. Students specializing in Mathematical Risk Management are exempt from this requirement.

Computing Skills. Because computers are an integral part of business decision making, courses in the Robinson College of Business frequently incorporate assignments that require computing skills.

3. Course Requirements: Specialization in Risk and Insurance

This section is applicable to students interested in the specialization in Risk and Insurance. Students interested in the specialization in Mathematical Risk Management should refer to section 4 below. Students interested in the dual degree program MAS/MRM should go to Section 5 below. Students interested in the dual degree programs should go to Section 5 (MAS/MRM) or Section 6 (MSA/MRM) below.

a. Required Technical Support Courses (3)
   - MBA 8135 Corporate Finance (3)

b. Required Courses in the Specialization (3)
   - RMI 8050 Risk Management Modeling (3)

c. Electives in the Specialization (24)

Students may select seven 8000-level courses to satisfy this requirement. In consultation with the faculty adviser for the Risk and Insurance specialization, students select a program of study that is consistent with their career orientation in risk management and insurance. The following optional tracks are available.

Risk Management Track

- RMI 8120 Property and Liability Insurance (3)
- RMI 8150 Corporate Risk Management (3)
- RMI 8300 Predictive Risk Models (3)
- RMI 8370 Financial Risk Management (3)
• FI 8000 Valuation of Financial Assets (3)
• FI 8200 Derivative Markets I (3)
• FI 8300 Advanced Corporate Finance (3)
• FI 8340 Multinational Corporate Finance (3)

Insurance Track

The following courses are recommended for students in the insurance track.

• RMI 8120 Property and Liability Insurance (3)
• RMI 8150 Corporate Risk Management (3)
• RMI 8200 Life Insurance (3)
• RMI 8370 Financial Risk Management (3)
• FI 8000 Valuation of Financial Assets (3)
• FI 8300 Advanced Corporate Finance (3)
• FI 8440 Finance and Banking in the Global Economy (3)
• HA 8250 Health Economics and Financing (3)
• LGLS 8450 Legal Environment of Health Care (3) (Same as HA 8450)
• PFP 8400 Personal Financial Planning (3)
• MGS 8300 Human Resource Management (3)

One additional course to be decided based upon student’s interests.

4. Course Requirements: Specialization in Mathematical Risk Management

This section is applicable to students interested in the specialization in Mathematical Risk Management. Students interested in the specialization in Risk and Insurance should refer to section 3 above. Students interested in the dual degree programs should go to Section 5 (MAS/MRM) or Section 6 (MSA/MRM) below.

a. Required Technical Support Courses (0-5)

The following courses must be completed within the first 18 hours of 8000-level course work.

• FI 8000 Valuation of Financial Assets (3)*
• MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

b. Required Courses in the Specialization (24)

• MRM 8320 Stochastic Risk Management Models (3)
• MRM 8600 Theory of Risk Sharing (3)
• MRM 8610 Financial Engineering (3)
• MRM 8630 Interest Rate Models (3)
• MRM 8640 Advanced Credit Risk Models (3) (alternatively, students can take MRM 8620...
Quantitative Risk Models
- RMI 8370 Financial Risk Management (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- ECON 8780 Financial Econometrics (3)

c. Elective Courses in the Specialization (3-8)

Students should consult with the program director prior to beginning their elective course work and may select from among the following courses.

- AS 8340 Life Contingencies (3)
- AS 8350 Insurance Mathematics (3)
- AS 8430 Loss Distributions and Credibility Theory (3)
- AS 8810 Actuarial Science Graduate Seminar (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- RMI 8150 Corporate Risk Management (3)
- RMI 8300 Predictive Risk Models (3)

Students may select, with the prior approval of the Mathematical Risk Management faculty advisor, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

5. Course Requirements: Dual Degree Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program. This section is applicable to students interested in the dual degree program Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management. Students interested in the Specialization in Risk and Insurance should go to Section 3 above. Students interested in the Specialization in Mathematical Risk Management should go to Section 4 above. Students interested in the dual degree program between the Master of Science in Analytics and the Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program should go to Section 6 below.

a. Required Technical Support Courses (0-5)

The following course must be completed within the first 18 hours of 8000-level course work.

- FI 8000 Valuation of Financial Assets (3)*
• MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

b. Required Courses in the Dual Degree Program (27-33 hours)

• AS 8340 Life Contingencies (3)**
• AS 8350 Insurance Mathematics (3)**
• AS 8810 Actuarial Science Graduate Seminar (3)
• MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)
• MRM 8320 Stochastic Risk Management Models (3)
• MRM 8600 Theory of Risk Sharing (3)
• MRM 8610 Financial Engineering (3)
• MRM 8630 Interest Rate Models (3)
• MRM 8640 Advanced Credit Risk Models (3) (alternatively, students can take MRM 8620 Quantitative Risk Models)
• RMI 8370 Financial Risk Management (3)
• MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
• ECON 8780 Financial Econometrics (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the actuarial science program director.

c. Elective Courses in the Dual Degree Program (12-23 hours)

Students should consult with the program directors for the Master of Actuarial Science and Mathematical Risk Management programs prior to beginning their elective coursework and may select from among the following courses:

• AS 8430 Loss Distributions and Credibility Theory (3)
• ECON 8860 Economics of Global Finance (3)
• FI 8260 Hedge Funds and Their Strategies (3)
• FI 8300 Advanced Corporate Finance (3)
• FI 8310 Investment Banking (3)
• FI 8320 Corporate Financial Strategy (3)
• FI 8400 Financial Management of Depository Institutions (3)
• FI 9100 The Theory of Asset Valuation (3)
• MGS 8040 Data Mining (3)
• MGS 8150 Business Modeling (3)
• RMI 8150 Corporate Risk Management (3)
• RMI 8200 Life Insurance (3)
• RMI 8300 Predictive Risk Models (3)

Students may select, with the prior approval of both program directors for the dual degree program,
electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

6. Course Requirements: Dual Degree Master of Science in Analytics and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program. This section is applicable to students interested in the dual degree program Master of Science in Analytics and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program. Students interested in the Specialization in Risk and Insurance should go to Section 3 above. Students interested in the Specialization in Mathematical Risk Management should go to Section 4 above. Students interested in the dual degree program between the Master of Actuarial Science and the Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program should go to Section 5 above.

a. Required Technical Support Courses (0-5)

The following course must be completed within the first 18 hours of 8000-level course work.

- FI 8000 Valuation of Financial Assets (3)*
- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

b. Required Courses in the Dual Degree Program (42 hours)

- CIS 8040 Data Programming (3)
- MSA 8010 Data Programming (3)
- MSA 8050 Unstructured Data Management (3)
- MSA 8100 Operations Research Models and Methods (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- MSA 8300 Value Through Analytics (3)
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8630 Interest Rate Models (3)
- MRM 8640 Advanced Credit Risk Models (3) (alternatively, students can take MRM 8620 Quantitative Risk Models)
- RMI 8370 Financial Risk Management (3)
- ECON 8780 Financial Econometrics (3)

c. Elective Courses in the Dual Degree Program (3-8 hours)

Students should consult with the program directors for the Master of Actuarial Science and Mathematical Risk Management programs prior to beginning their elective coursework and may select from among the following courses:
• Any of the 8000 level MSA elective classes
• AS 8340 Life Contingencies (3)
• AS 8350 Insurance Mathematics (3)
• AS 8430 Loss Distributions and Credibility Theory (3)
• AS 8810 Actuarial Science Graduate Seminar (3)
• ECON 8860 Economics of Global Finance (3)
• FI 8020 Financial Analysis and Loan Structuring (3)
• FI 8240 Global Portfolio Management (3)
• FI 8260 Hedge Funds and Their Strategies (3)
• FI 8300 Advanced Corporate Finance (3)
• FI 8310 Investment Banking (3)
• FI 8320 Corporate Financial Strategy (3)
• FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
• MGS 8040 Data Mining (3)
• MGS 8150 Business Modeling (3)
• RMI 8150 Corporate Risk Management (3)
• RMI 8300 Predictive Risk Models (3)

Students may select, with the prior approval of both program directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

7. Program of Study: Each student’s program must be planned in consultation with the appropriate program director for the M.S. in risk management and insurance and a copy of the program filed with the Office of Graduate Student Services for review and approval. The program of study should be planned before the student takes a non-required course. Progress toward the degree, including clearance for graduation, can be confirmed only with an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

8. Time Limit: The time limit for completing the M.S./R.M.I. program is five calendar years from the first semester a course in section 3-6 (above) is taken.

7205 Master of Science in Analytics

Dr. Sanjay Srivastava, Program Director

The mission of the Master of Science in Analytics is to educate students how to acquire, organize and model data sets in order to formulate the questions that guide decision-making in corporate and non-corporate settings. Graduates are ideal candidates for the range of technical data-driven positions in a variety of industries/businesses currently emerging such as data scientist, quantitative marketing analyst, credit risk analyst, predictive modeler, health informatics, web analytics. Please see program website for more details.
Regulations for the Degree

All M.S. in Analytics students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to M.S. in Analytics program. A maximum of 6 semester hours of transfer credit is possible in this 32-hour program.

Foundation Requirements

These courses are in addition to the 32 hours required for the M.S. in Analytics. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent work has been previously completed with grades of C or higher, or as deemed suitable by the MSA Admission Committee.

**Accounting:** financial and managerial accounting principles (MBA 8025, or ACCT 2101 & ACCT 2102)

**Behavioral Science:** Management principles (MBA 8165, or MGS 3400). Students may satisfy this requirement with either management (MGS 3400), sociology (SOCI 1101), or psychology (PSYC 1101) principles.

**Economics:** Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

**Mathematics:** Students must have completed three semesters of advanced calculus (MATH 2211, MATH 2212, and MATH 2215).

**Statistics:** Students must have ECON 8710 or completed two semesters of undergraduate mathematical statistics (MATH 4751, MATH 4752).

Course Requirements: The Master of Science in Analytics

a. Required Courses (23 hours):

- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)
- CIS 8040 Database Management Systems (3)
- MSA 8050 Unstructured Data Management (3)
- MSA 8100 Operations Research Models and Methods (3)
- MSA 8010 Data Programming for Analytics (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8190 Statistical Foundations for Analytics (3)
- MSA 8200 Econometric Modeling for Analytics (3)

b. Elective Courses (9 hours):

Students will select at least two elective courses. These courses will either be in an application area of interest or the student can deepen their technical skill development. The faculty adviser for M.S. in Analytics must individually approve electives. Examples of possible electives include the following:
• CIS 8020 Systems Integration (3)
• CIS 8100 Management of Information Systems (3)
• CIS 8200 Information Systems Strategy (3)
• CIS 8401 Mobile Applications Development (3)
• ECON 8780 Financial Econometrics (3)
• FI 8000 Valuation of Financial Assets (3)
• FI 8200 Financial Derivatives (3)
• FI 8260 Hedge Fund Strategies (3)
• FI 8320 Corporate Financial Strategy (3)
• HA 8160 Health Care System (3)
• HA 8550 Health Planning and Financial Management (3)
• HA 8620 Operations Management and Quality in Health Care (3)
• HA 8670 Health Information Systems (3)
• HA 8750 Health Analytics (3)
• MK 8010 Marketing Metrics (3)
• MK 8705 Digital Marketing Analytics (3)
• MK 8715 Brand and Consumer Analytics (3)
• MK 8730 Marketing Engineering (3)
• MRM 8610 Financial Engineering (3)
• MRM 8620 Quantitative Financial Risk Models (3)
• MGS 8110 Applied Regression Analysis (3)
• MGS 8730 Project Management (3)
• MGS 8740 Operations Strategy (3)
• RCB 8040 Competing on Analytics and Organizational Knowledge (3)
• RMI 8050 Risk Management Modeling (3)
• RMI 8300 Predictive Risk Models (3)

Program of Study

Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to the GRSS.

Time Limit

The time limit for completing the M.S. in Analytics program is five years from the first semester a course in section a, or b (above) is taken.

7210 Master of Science in Health Administration

In addition to offering the M.B.A. and M.H.A. degrees as a joint program (described earlier), the Robinson College of Business offers the Master of Science in Health Administration as a single degree. This program is designed to meet the needs of students who desire a background in health administration and the opportunity to acquire specialized skills in areas of business or healthcare administration, including health information systems and data analytics. PMBA and other graduate degree students may apply for the
MSHA as a second degree.

7210.10 Admissions

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. A personal interview normally is required for all applicants but may be waived by the director of the institute in exceptional circumstances.

Admission to the M.S.H.A. degree program may occur each semester. Early application is encouraged, however, since the number of applicants each year exceeds the capacity of the program.

7210.20 Regulations for the Degree

1. All Master of Science in Health Administration students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S. H.A. program. A maximum of 12 hours of transfer credit is permitted in this 36-hour program.

2. Course Requirements. The course requirements for the Master of Science in Health Administration degree and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

3. a. Foundation Courses. See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in Health Administration (24 hours)

- HA 8160 Introduction to the Health Care System (3)
- HA 8190 Health Policy and Ethics (3)
- HA 8250 Health Economics and Financing (3)
- HA 8450 Legal Environment of Health Care (3)
- HA 8620 Operations Management and Quality in Health Care (3)
- HA 8670 Health Information Systems (3)
- HA 8990 Strategic Management in Health Care (3)
- HA 8680 Care Management and Delivery Systems

c. Concentration (12 hours). A Health Administration concentration may be taken as listed below; an approved selected concentration maybe taken such as: a customized concentration of 8000-level RCB courses, or MBA concentrations, to complete this section of the M.S.H.A. program. For concentrations in the Master of Business Administration program cited earlier in this chapter, follow the course requirements given for the chosen MBA concentration.

**Health Administration:** This concentration includes the following four health administration courses:
HA 8440 Executive Leadership in Healthcare, HA 8550 Healthcare Financial Management and Planning, HA 8700 Health Services Research and Data Mining, and HA 8750 Predictive Analytics in Healthcare

The cohort MSHA program requires the following twelve courses:
1. Program of Study/Course Selection. All M.S.H.A. students must contact the Institute for consultation and guidance. Concentration courses must be approved by the Institute Director, and students are required to plan a formal program of study with a faculty adviser in the Institute of Health Administration. M.S.H.A. students should notify the Office of Graduate Student Services as soon as they select their area of concentration. Progress toward the degree, including clearance for graduation, will be determined by Office of Graduate Student Services by comparing courses taken with the foundation courses assigned at admission and the degree requirements stated above. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

2. Time Limit. The time limit for completing the M.S.H.A. degree with a concentration is five years from the first semester a course in section B or C (above) is taken.

7210.30 JD/Health Administration Joint Program

The Institute of Health Administration in the Robinson College of Business, in conjunction with the College of Law, offers a joint program leading to the Juris Doctor degree (JD) and (1) a Master of Science in Health Administration degree (MSHA), or (2) an MBA/MHA (Master of Business Administration and Master of Health Administration). The following regulations apply to students who are accepted to both the JD and MSHA or MBA/MHA, and are enrolled in the joint program (joint enrollment) as opposed to being separately enrolled in both programs. Students who have already earned an MSHA or MBA/MHA degrees or a JD degree at Georgia State University or at another institution are not eligible for the joint program.

JD/MSHA Joint Degrees

The JD/MSHA is a course of study which allows selected previously-approved course work earned in one degree program to satisfy some of the elective course requirements of the other degree program. This enables a student to complete the requirements for both degrees in a shorter time than required to complete both degrees separately. Students who have already earned an MSHA degree or a JD degree at Georgia State University or at another institution are not eligible for the joint program.

Students must satisfy the curriculum requirements for both the MSHA degree and the JD degree.
requirements.

For students enrolled in the joint program, the Robinson College of Business will accept as course credit 15 semester hours of elective courses from the JD curriculum with grades of B or better. Twelve hours will be given for any law elective courses and 3 credit hours will be given for LAW 7239 Health Law Liability or LAW 7240 Health Law Regulation in place of HA 8450 Legal Environment of Health Care.

Reciprocally, the College of Law will accept as course credit 12 semester hours of 8000 level MSHA courses with a grade of B or better to apply toward the 47 hours of law elective courses.

Applicants to the JD/MSHA joint degree program must meet the entrance requirements and follow the application procedures of both the Robinson College of Business and the College of Law. Applicants must be accepted by both colleges before completing either program.

The College of Law does not permit enrollment in the joint degree program after a student has completed more than 21 semester hours of 8000-level MSHA coursework. After students have been admitted to both the MSHA and the JD programs they must, at the first opportunity, complete the first 31 semester hours of required courses in the JD program. After completion of these 31 hours, course enrollment in either college or both concurrently is permitted.

No credit hours of JD course work will be applied toward the MSHA degree requirements until the completion of JD degree requirements. A simultaneous awarding of degrees will satisfy this requirement.

The requirements for the MSHA degree must be completed within five years of the initial semester of enrollment in the MSHA program. The JD Degree must be completed within six years of the initial semester of enrollment in the JD program.

**JD-MBA/MHA Joint Degrees**

The JD-MBA/MHA is a course of study which allows selected previously-approved course work earned in one degree program to satisfy some of the elective course requirements of the other degree program. This enables a student to complete the requirements for all three degrees in a shorter time than required to complete the degrees separately. Students who have already earned an MBA/ MHA or a JD degree at Georgia State University or at another institution are not eligible for the joint program.

Students must satisfy the curriculum requirements for both the MBA/MHA degrees and the JD degree requirements.

For students enrolled in the joint program, the Robinson College of Business will accept as course credit 6 semester hours of elective courses from the JD curriculum with grades of B or better. Three hours of credit for successful completion of either LAW 7239 Health Law Liability or LAW 7240 Health Law Regulation, and 3 hours of legal externship courses in the healthcare area may be substituted for the required HA residency course, HA 8810.

Reciprocally, the College of Law will accept as course credit 12 semester hours of 8000 level MBA/MHA courses with a grade of B or better to apply toward the 47 hours of law elective courses.
Applicants to the JD-MBA/MHA joint degree program must meet the entrance requirements and follow the application procedures of both the Robinson College of Business and the College of Law. Applicants must be accepted by both colleges before completing either program.

The College of Law does not permit enrollment in the joint degree program after a student has completed more than 21 semester hours of 8000-level MBA/MHA coursework. After students have been admitted to both the MBA/MHA and the JD programs they must, at the first opportunity, complete the first 31 semester hours of required courses in the JD program. After completion of these 31 hours, course enrollment in either college or both concurrently is permitted.

No credit hours of JD coursework will be applied toward the MBA/MHA degree requirements until the completion of JD degree requirements. A simultaneous awarding of degrees will satisfy this requirement.

The requirements for the MBA/MHA degrees must be completed within eight years of the initial semester of enrollment in the MBA/MHA program. The JD Degree must be completed within six years of the initial semester of enrollment in the JD program.

---

7220 Master of Science in Information Systems

Doug Battleson, Program Director

The Master of Science in Information Systems (MSIS) is designed to meet the needs of students who want to build a strong background in information systems and the application of information and communications technology in business.

In today’s highly competitive global environment, the effective deployment of information technology has become the key to business success. New applications of information technology strike at the heart of what management does and how organizations are structured and compete. In many respects these applications are redefining the nature of work and its organization.

There is a continuing shortage of specialists and managers with the combination of business and technology skills needed to bring about this reshaping of international industries. The purpose of the Master of Science in Information Systems program is to produce graduates who are able to combine their general business knowledge with the latest information systems tools and techniques to enable organizations to compete strongly in the global marketplace. Graduates, through the use of optional concentrations in their programs of study, will be prepared for careers in specific areas such as information systems management; health informatics; or information technology consulting, project management, database management, and systems development.

The MSIS program is usually offered only as a cohort program.

**Regulations for the Degree**

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s
Programs” sections of this chapter apply to the Master of Science in Information Systems students. A maximum of 12 hours of transfer credit is permitted in this 36-hour program.

2. Course Requirements. The course requirements for the Master of Science in Information Systems and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

a. **Foundation Courses.** In addition to the Foundation Requirements in section 7110.10, the MSIS degree program foundation includes successful completion of the programming courses CIS 3260 Introduction to Programming and CIS 3270 Application Programming. The requirements for CIS 3260 and CIS 3270 may be waived upon approved evidence of equivalent accredited undergraduate coursework with a grade of at least C or successful completion of approved online courses and exams in programming as directed by the CIS Graduate Program Coordinator.

b. **Required Courses** in Computer Information Systems (12 hours). These comprise the “MSIS Core”:
   - CIS 8000 or MIT 8000 Information Technology Project Management (3)
   - CIS 8010 or MIT 8010 Process Innovation (3)
   - CIS 8080 or MIT 8080 Security and Privacy of Information and Information Systems (3)
   - CIS 8090 or MIT 8090 Enterprise Architecture (3)

c. **Elective Courses** in Computer Information Systems and Related Fields: Any 8000 level CIS or MIT or MSA or HA graduate courses may be used to satisfy the electives requirements subject to approval by the MSIS faculty advisor.

d. **Capstone Requirement** (3-6 hours), selected from:
   - CIS 8391 Field Study in Computer Information Systems (0-6)
   - MIT 8990 IT Management Capstone Project (0-6)
   - CIS 8990 M.S. C.I.S. Thesis Research (0-6)

e. **Optional concentrations available within the MSIS**

Subject to availability, MSIS students are expected to do full-time or part-time field study in the last two semesters in the program. MSIS students are required to begin their field study in the semester preceding the one in which they will graduate.

Students may complete the MSIS by meeting the requirements (2.a.) through (2.d.) above. Subject to course availability, students may additionally qualify for the following concentrations by substituting the below required courses in the concentration in place of Elective Courses detailed in (2.c.) above.

**MSIS with a Concentration in Information Technology:** The MSIS with a concentration in Information Technology is usually offered as a year-long cohort program. The purpose of the Master of Science in Information Systems program is to produce graduates who are able to combine business knowledge with the latest information systems tools and techniques. Graduates will be prepared for careers in a variety of areas such as systems development, information systems management, consulting, project management, software quality management, database management, security and privacy, and business process design. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
- CIS 8080 Security and Privacy of Information and Information Systems (3)
- CIS 8090 Enterprise Architecture (3)

• The MSIS IT Concentration Core (12 hours)
  - CIS 8040 Fundamentals of Database Management Systems (3)
  - CIS 8025 Mobile Application Development (3)
  - CIS 8630 Business Computer Forensics and Incident Response (3)
  - CIS 8670 Enterprise Resource Planning Systems: Implementation and Management (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).

**MSIS with a Concentration in Big Data Management and Analytics:** The MSIS with a concentration in Big Data Management and Analytics is usually offered as a cohort program intended to prepare students for executive careers in the management and use of both structured and unstructured data. Required courses for this concentration:

• The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)

• The MSIS Big Data Management and Analytics Concentration Core (15 hours):
  - CIS 8040 Fundamentals of Database Management Systems (3)
  - CIS 8045 / MSA 8050 Unstructured Data Management (3)
  - CIS 8005 / MSA 8010 Data Programming for Analytics (3)
  - CIS 8695 Managing Big Data for Analytics (3)
  - CIS 8795 IT Infrastructure for Big Data (3)

- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).

**MSIS with a Concentration in Health Informatics:** The MSIS with a concentration in Health Informatics is usually offered as a cohort program intended to prepare students for executive careers in the management of information resources in support of medical services and administration within the healthcare industry. Required courses for this concentration:

• The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)

• The MSIS Health Informatics Concentration Core (12 hours):
  - CIS 8070 Mobile Health: Technologies and Applications (3)
  - HA 8160 Introduction to the Health Care System (3)
  - HA 8670 Health Information Systems (3)
  - HA 8740 Health Analytics (3)
MSIS with a Concentration in Enterprise Systems: The MSIS with a concentration in Enterprise Systems is usually offered as a cohort program intended to provide students with the knowledge needed for careers in organizations that use ERP systems to support key business processes. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)
- The MSIS Enterprise Systems Concentration Core (12 hours):
  - CIS 8670 Enterprise Resource Planning Systems: Implementation and Management (3)
  - CIS 8672 ERP Business Scenario and Process Analysis (3)
  - CIS 8674 ERP Customization (3)
  - CIS 8676 ERP Technologies (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).

MSIS with a Concentration in Cybersecurity: The MSIS with a concentration in Cybersecurity is usually offered as a cohort program intended to prepare students for executive careers in the areas of privacy and security of information and information systems. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)
- The MSIS Cybersecurity Concentration Core (12 hours):
  - CIS 8040 Fundamentals of Database Management Systems (3)
  - CIS 8085 Information and Information Systems Risk Management (3)
  - CIS 8086 Protecting Information Assets (3)
  - CIS 8088 Network Security and Hacking (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (12).

MSIS with a Concentration in Management of Information Technology: The MSIS with a concentration in Management of Information Technology is usually offered in executive format (See Section 7225 for details)

Program of Study/Course Prerequisites. With the exception of cohort-enrolled students, each student’s program must be planned in consultation with an M.S. faculty adviser in the Department of Computer Information Systems for approval by the MSIS coordinator before a non-required course is taken. Students may contact the department for the name of their faculty adviser and to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved
program of study. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the graduate catalog to determine if they have met the prerequisites for any course to be taken.

**Time Limit.** The time limit for completing the Master of Science in Information Systems is five years from the semester the first course in section B or C (above) is taken.

For additional information, please visit the following website: http://cis.robinson.gsu.edu/academic-programs/ms-is/.

**7220.10 4 + 1 Programs**

The Department of Computer Information Systems in the Robinson College of Business and the Department of Computer Science jointly offer a combined BS in Computer Science/MS in Information Systems program. The program is designed to take five years, at the end of which, a student will receive both a Bachelor of Science in Computer Science and a Master of Science in Information Systems. The graduate level coursework permits a choice of emphasis in Managing Information Technology or Information Systems Development. The program requires application. Please see the Computer Science undergraduate program for the complete description of this joint offering.

The Department of Computer Information Systems in the Robinson College of Business and the Department of Mathematics and Statistics jointly offer a combined BS in Mathematics/MS in Information Systems program. The program is designed to take five years, at the end of which, a student will receive both a Bachelor of Science in Mathematics and a Master of Science in Information Systems. The graduate level coursework permits a choice of emphasis in Managing Information Technology or Information Systems Development. The program requires application. Please see the Mathematics undergraduate program for the complete description of this joint offering.

**7225 Executive Master of Science in Managing Information Technology**

Dr. Ephraim McLean, Program Director, 404/ 413-7448, emclean@gsu.edu

Applications are no longer being accepted for this program.

The Executive Master of Science in Information Systems concentrating on managing information technology (MSIS MIT) is a 12-month, lock-step program designed for rising professionals with a minimum of four years professional information technology (IT)-related experience. Students receive a Master of Science in Information Systems degree upon completion of the program.

The purpose of the Executive Master of Science in Information Systems program is to provide mid-level managers, and those aspiring to IT-related management, a challenging curriculum relevant to the needs of rising IT professionals. The MSIS MIT curriculum is designed to prepare IT professionals for significant management level positions. Participants will increase their ability to think efficiently, plan productively, manage effectively, and make decisions that create added value for the enterprise. For example, the curriculum will help managers assume a strategic role in the enterprise’s future; plan and manage for the next generation of IT business challenges; utilize and manage resources effectively and efficiently; and
identify and broker solutions to current challenges utilizing best-in-practice IT methods. From an IT perspective, managers will be better able to implement a business-focused approach to create value and deliver a competitive edge for their organization.

The program consists of ten three-hour courses and a six-hour capstone project. The courses cover a wide range of IT management topics extending from strategic to organizational, financial, and technical. All courses are enhanced versions of the award-winning courses offered in the traditional two-year program. The capstone projects will be selected based on the interests of participants and their value and relevance to their companies.

The lock-step format serves to forge strong networking, a more in-depth learning environment and support among the students as they take the same courses together during the program.

This Executive format program meets the needs of busy IT professionals; the program is designed to be completed in one year while maintaining full-time employment. Face-to-face classes are held on alternate Saturdays. Electronic distant-learning modules are offered in between these Saturdays at the convenience of the participant – any time, any place.

Another aspect of the strong commitment to the success of each participant is the Mentor of Excellence program. During the year-long experience, each participant will be paired with a business leader who will serve as mentor to guide, advise, and support.

Required Courses in the MSIS MIT

The MSIS Core (12 hours)

- MIT 8000 Information Technology Project Management (3)
- MIT 8010 Process Innovation (3)
- MIT 8080 Security and Privacy of Information and Information Systems (3)
- MIT 8090 Managing Enterprise Systems (3)

The MIT Concentration Core (1 hours)

- MIT 8070 Mobile and Wireless Information Systems (3)
- MIT 8100 Management of Information Services (3)
- MIT 8200 Information Systems Strategy (3)
- MIT 8210 Global Systems Sourcing (3)
- MIT 8299 Finance and Accounting for Information Systems (3)
- MIT 8699 Organizational Change Management (3)
- MIT 8990 IT Management Capstone Project (3-6)

Elective Courses in Computer Information Systems and Related Fields as detailed in (c.) above (0-3).

For additional information, please visit the following website: http://cis.robinson.gsu.edu/academic-programs/executive-ms-mit/.
Dr. Balasubramaniam Ramesh, Program Director, bramesh@gsu.edu

There is a developing shortage of specialists with the combination of accounting and technology knowledge needed to properly inform and execute management decisions in areas such as IT Assurance, Information Security, IT Governance, and IT Risk Management. The purpose of the Master of Science in Information Systems Audit and Control (MSISAC) program is to produce graduates who are able to combine a thorough knowledge of accounting principles with an equally thorough knowledge of Information and Communication Technologies (ICT) to enable organizations to competently operate in environments where accounting systems are tightly integrated with organizational ICT. Graduates will be well prepared for careers in IT auditing, but also for a variety of other areas such as accounting, information systems, consulting, and assurance.

ICT provides the basic fabric with which organizational management develop, record, and process abstractions and models that are both the basis of management strategy, decision making and of recording the flows of assets and liabilities within the organization and with its trading partners. Accountants are increasingly called upon to design, review, audit, and advise stakeholders with regard to the accuracy, timeliness and appropriateness of complex ICT based systems. Developing competencies in IT audit often requires a broad understanding of enterprise-wide approaches for managing growing international risks and emerging regulations. IT auditors must know how to identify and mitigate information risks, effectively manage security-related incidents, and reduce the impact of these on people, profitability and property.

To summarize, the purpose of the Master of Science in Information Systems Audit and Control program is to produce graduates who are able to combine their knowledge of accounting and auditing with the latest information systems tools and techniques to enable organizations to achieve information assurance and security. MSISAC program graduates are expected to be academically prepared to take the CISA exam upon completion of their degree. This combination of skills necessary for obtaining these highly valued certifications is very rarely found in any program in the nation.

Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MSISAC program. A maximum of 12 hours of transfer credit is permitted in this 30-hour program.

2. Course Requirements. The course requirements for the Master of Science in Information Systems Audit and Control degree and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Descriptions chapter of the Georgia State University Undergraduate and Graduate Catalogs. These catalogs are available on the web at www.gsu.edu; click on Students then University Catalogs.

a. Foundation Courses:

The following foundation courses are required in addition to the Specialized Master’s Foundation
Requirements listed in Section 7110.20:

None

b. Prerequisite courses:

The courses in this list are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. An accepted applicant, who at the time of admission to the MSISAC program, has not completed the foundation and prerequisite courses, must complete these requirements in a manner approved by the MSISAC program coordinator.

Accounting

Acct 2101-2102 Financial and Managerial Accounting Principles

Computer Information Systems

CIS 3300 Analyzing business systems or equivalent or an approved online course in Systems Analysis as directed by the MSISAC program coordinator

CIS 3730 Database Management Systems or an approved online course in Database Management Systems as directed by the MSISAC program coordinator

c. Required Courses (30 hours)

Credit Hours/COURSES

Required Graduate Courses

CIS 8000 Information Technology Project Management (3)
CIS 8300 Software Quality Management (3)
CIS 8630 Business Computer Forensics and Incident Response (3)
CIS 8670 Enterprise Resource Planning Systems: Implementation & Management (3)
ACCT 8310 Seminar in Management Accounting Systems (3)
ACCT 8630 Information Technology Auditing (3)
ACCT 8680 or CIS 8080 Security and Privacy of Information and Information Systems (3)
ACCT 8050 Special Topics in Accounting (3)
CIS 8640 IT Services Management & Governance (3)
CIS 8388 Capstone Project (3)

Subject to availability, MSISAC students are expected to do full-time or part-time field study in the last two semesters in the program. MSISAC students are required to begin their field study in the semester preceding the one in which they will graduate.
7300 Master of Science in Real Estate

Karen M. Gibler, Program Director, 404/ 413-7725, kgibler@gsu.edu

The Master of Science in Real Estate degree is designed for students who are principally interested in careers in the real estate industry and those who will use real property in business decision making. It provides the student with both general and specialized real estate knowledge and analytical skills. The degree prepares students for professional areas such as financial counseling, market analysis and valuation, as well as industry activities such as real property development, acquisition, disposition, and management. The MSRE program is based on a synthesis of legal, physical, market and financial considerations that affect the real property decision process. The student’s educational experience is enhanced because the program attracts many experienced real estate professionals into the classroom, and the program has a practical orientation in which students participate in industry problem solving and research under the direction of the program’s faculty.

7300.10 Regulations for the Degree

1. Course Requirements. The Master of Science in Real Estate degree consists of 30 semester hours of course work numbered 8000 and above. Previous graduate real estate coursework successfully completed at the Robinson College of Business will be evaluated and up to six hours credit toward the required or elective courses in the major (section “b” or “c” below) may be awarded to entering students. A maximum of six hours of transfer credit is permitted in this 30-hour program. The option of awarding credit toward the MSRE degree is totally at the discretion of the Department of Real Estate and its designees. The course requirements for the degree and the format of the program follow. The number of hours of 8000-level credit required in each section of the program is shown in parentheses after the section heading. This number represents the minimum requirement. If prerequisites for the courses listed in each section have not been properly completed or if they are not included as electives within the M.S.R.E. program, they must be taken as additional hours. In most cases, however, the graduate-level prerequisites can be incorporated as electives into the student’s program of study. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

a. Foundation Courses. See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in the Major (21 hours)
RE 8020 Real Estate Investment Analysis (3)
RE 8030 Real Estate Financing (3)
RE 8050 Real Estate Development (3)
RE 8060 Applied Real Estate Market Analysis (3)
RE 8090 Real Estate Case Analysis (3)
RE 8100 Strategic Management of Real Property in the Corporate Environment (3)
RE 8400 Advanced Real Estate Investment Analysis (3)
c. Elective Courses (9 hours). Students may choose as electives any three 8000 level RE prefixed courses or appropriate courses from an approved list available from the Department of Real Estate.

2. Program of Study/Course Prerequisites.
Each student’s program of study must be planned in consultation with the MSRE program director or a designee of the director before a copy of the program of study is filed with the Office of Graduate Student Services for review and approval. Students may contact the department to schedule an appointment with a faculty adviser. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

3. Time Limit. The time limit for completing the M.S.R.E. program is five years from the first semester a course in section “b” or “c” (above) is taken.

7310 Master of Taxation

Tad Ransopher, Program Director, 404-413-7229, acctdr@gsu.edu

The Master of Taxation program offers a variety of courses that provide students with a meaningful opportunity to develop the technical, analytical, and research skills needed for tax practice. The Master of Taxation Program is an academically rigorous program taught in the J. Mack Robinson College of Business Buckhead Center by the faculty of the School of Accountancy. Students begin the program in either the Fall semester or the Spring semester and complete the program in either one or two years. Classes meet once a week and are offered from either 4:30 to 7:00 or 7:15 to 9:45 in Fall and Spring. Summer classes are offered two days a week.

7310.20 Regulations for the Degree

1. The regulations, policies and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MTAX. program.

2. Course Requirements. The course requirements for the degree of Master of Taxation and the format of the program follow:

a. Foundation and Prerequisite Courses.

The courses in this section are in addition to the 30 semester hours required for the M.Tx. degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with minimum grades of C-. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Description chapter of the Georgia State University Undergraduate Catalog.
Accounting: Financial accounting principles (ACCT 2101) or MBA 8025.

Behavioral Science: Sociology (Soci 1101), or psychology (PSYC 1101), or anthropology (ANTH 1102), or buyer behavior (MK 4100), or management principles (MGS 3400), or managerial decision making (MGS 4000).

Economics: Macroeconomic principles (Econ 2105) or microeconomic principles (Econ 2106) – Econ 2106 is preferred.

Mathematics: College algebra (MATH 1111).

Statistics: MATH 1070.

Taxation: ACCT 4510.

b. Courses in Taxation (30 hours)

Students will take ten of the following courses, including six required courses totaling 18 hours. In addition, students will take four other courses totaling 12 hours. Program administrators will ensure that students take the courses in the appropriate sequence, e.g., the Tx 8020 and Tx 8030 must be the first two courses taken if a student takes only two courses the first semester in the program.

- TX 8020 Advanced Federal Income Taxation (3)***
- TX 8030 Tax Research (3)***
- TX 8040 Tax Practice and Procedures (3)***
- TX 8080 Taxation of Partnerships and Partners (3)***
- TX 8120 Taxation of Corporations and Shareholders (3)***
- TX 8100 Taxation of Property and Securities Transactions (3)
- TX 8180 Current Topics in Taxation (3)
- TX 8220 Estate/Gift Taxation & Estate Planning (3)
- TX 8270 State and Local Taxation (3)
- TX 8300 International Aspects of Taxation (3)
- TX 8320 Income Tax Accounting Periods and Methods (3)***
- TX 8391 Field Study in Taxation (3)
- TX 8510 Issues in Individual Tax (3)

*** Required courses

3. Advisement/Course Selection: The MTAX program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward
the degree and to determine if they have met all the requirements of the degree.

4. The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.

5. Time Limit: The time limit for completing the MTAX program is five years from the first semester a course in the program.

7330 Graduate Certificate in Enterprise Risk Management

The Graduate Certificate in Enterprise Risk Management is intended for individuals who possess an MBA or a master's degree in a business-related field, or hold a CPA or CPCU, and who desire graduate education in enterprise risk management but do not wish to complete the degree requirements for an MBA with a concentration in risk management and insurance. The Certificate in Enterprise Risk Management is designed for individuals seeking more broad-based education than what they might have gained in their undergraduate or graduate degree programs. There is an increasing demand for professionals who can efficiently manage financial and nonfinancial risk exposures faced by businesses. Course work taken to meet the certificate requirements emphasizes both financial risks (including, for example, derivatives and exchange rate risk) and nonfinancial risk (including political risk, property and liability exposures, risks associated with information technology, and employee welfare exposures).

7330.10 Regulations for the Certificate Program

1. All Graduate Certificate in Enterprise Risk Management students will complete the Business Communication Skills requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and Master’s Programs sections of this chapter apply to the C.E.R.M. program. The time limit for completing the certificate program is three calendar years. The certificate program requires completion of six graduate courses in residence at Georgia State University. In the event of waiver of one or more of the prescribed courses due to prior experience or education, substitute courses will be approved by the Director of the E.R.M. Certificate Program. A minimum cumulative GPA of 3.00 is required. In addition to possessing the MBA or another business master’s degree, or the CPA or CPCU professional credential, applicants are required to meet the admission requirements for the MBA program with a concentration in risk management and insurance (enterprise risk management specialization).

2. Course Requirements

a. Required Courses (12)

- RMI 8050 Risk Management Modeling
b. Elective Courses (6)

Students select two courses from the following list with approval from the Director of the ERM Certificate Program:

- RMI 8120 Property and Liability Insurance
- RMI 8150 Corporate Risk Management
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- ECON 8860 Economics of Global Finance

Other graduate-level course work may be substituted with prior approval by the Director of the E.R.M. Certificate Program.

3. Awarding the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the academic advisor in Graduate Recruiting and Student Services to have the certificate awarded. The academic advisor then reviews the student’s record. If all requirements have been met, a request for the certificate on behalf of the student will be sent to the registrar’s office.

**7335 Graduate Certificate in Information Systems**

Dr. Ephraim McLean, Program Director, 404/413- 7448, emclean@gsu.edu

The purpose of the Graduate Certificate in Information Systems is to more formally acknowledge students who have chosen to strengthen their technical foundation by successfully undertaking and completing additional Information Systems studies. The Graduate Certificate in Information Systems program is designed for students in any graduate major who wish to prepare to meet business and personal challenges through the use of information technology. From biology and the health sciences through the arts, social sciences, legal and business disciplines information systems are a fundamental enabler.

Admission to the Graduate Certificate in Information Systems program is subject to the minimum Georgia State University and RCB cumulative grade-point-average requirement for RCB graduate programs. Applicants for the Graduate Certificate in Information Systems must either be a current Robinson student or they must apply for admission to Robinson – meeting normal admission requirements and be accepted into the Robinson College.

Obtaining the Graduate Certificate in Information Systems requires completion of any three CIS 8000 level courses. For currently available courses, see www2.cis.gsu.edu/cis/program/syllabus/index.asp.
addition, you must have a grade point average of at least 3.0 for the three courses, with all grades a B- or higher. Please be aware that some of these courses have prerequisites and other requirements for enrollment. There are no additional fees required for the Graduate Certificate in Computer Information Systems. For more information including how to request the certificate after completing course work, please see www2.cis.gsu.edu/cis/program/ciscertificate.asp.

**7340 Graduate Certificate in Personal Financial Planning**

We are no longer accepting applications for this certificate program at this time.

The Graduate Certificate in Personal Financial Planning is intended for students who are CPAs or who possess an M.B.A., a master’s degree in a business-related field, or a J.D. and who desire graduate training in the field of personal financial planning. The program helps prepare students for a career in personal financial planning. Completion of the program will satisfy the education requirement for the Certified Financial Planner (CFP)™ examination.

The program provides a focus on individual and small business needs which complements the typical M.B.A./business master’s focus on larger business entities. Employers such as banks, brokerages, and other financial services firms will find this dual focus attractive as they seek employees capable of dealing effectively with both the demands of modern corporate life and the needs of the individuals and small businesses served by the financial services firms. The certificate provides attorneys with a focus on individual and small business financial needs which complements the legal services provided to those groups. Because of the close relationship between the financial planning and legal professions, the certificate also offers attorneys the opportunity to make a career change while using much of the knowledge and skill obtained through their legal training. For CPAs, the certificate provides the opportunity to expand the scope of services offered to clients.

**7340.10 Regulations for the Certificate Program**

All Graduate Certificate in Personal Financial Planning students will complete the “Business Communication Skills Requirement” explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to this certificate program. The time limit for completing the certificate program is two years. The certificate program requires completion of six graduate courses in residence at Georgia State University; in the event of waiver of one or more of the listed courses due to prior experience or education, substitute courses will be approved by the program director. A minimum cumulative GPA of 3.00 is required. In addition to possessing the M.B.A., another business master’s, or C.P.A. credential, applicants are required to meet the admissions requirements for the M.S. program with a major in personal financial planning with the following exceptions. Graduate Certificate in P.F.P. applicants who are CPAs or who possess an M.B.A. or other master’s degree in business from an AACSB-accredited institution or who possess a J.D. degree are exempt from the requirement of providing GRE or GMAT scores as part of the application process. Such qualifying applicants will be required to provide transcripts or other proof that they possess the necessary professional or academic credentials. If admitted to the Graduate Certificate in Personal Financial Planning program with valid GMAT or GRE scores, such applicants must submit valid GMAT or GRE scores before being eligible for admission to a regular master’s degree program, another graduate certificate
program, or nondegree status in the Robinson College of Business.

**Course Requirements**

**Foundation Course.** The Graduate Certificate in Personal Financial Planning requires completion of this foundation course or its equivalent: ACCT 4510 Introduction to Federal Income Taxation (3)

**Required Courses (18 hours)**

- PFP 8400 Personal Financial Planning (3)
- PFP 8420 Individual Retirement Planning (3)
- PFP 8460 Estate Planning (3)
- PFP 8520 Advanced Studies in Asset and Wealth Management (2)
- FI 8000 Valuation of Financial Assets (3)
- RMI 8200 Life Insurance (3)

**Awarding the Certificate.** After completing the requirements for the certificate according to these regulations, the student must make a written request to the Department of Risk Management and Insurance to have the certificate awarded. The request, an official Georgia State University transcript, and a certificate fee of $40.00 (check made payable to Georgia State University) must be sent to the director of the certificate program in the Department of Risk Management and Insurance. The director then reviews the student’s record. If all requirements have been met, the certificate, signed by the dean and the department chair, will be issued to the student.

**7350 Graduate Certificate in Real Estate**

We are no longer accepting applications for this certificate program at this time.

**7350.10 Admissions**

An accredited bachelor’s degree provides appropriate background for the nondegree certificate in real estate program (C.R.E.) in the Department of Real Estate. No specific undergraduate courses are required for consideration for admission to the program. The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter.

**7350.20 Regulations for the Certificate Program**

1. All Graduate Certificate in Real Estate students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the C.R.E. program. The time limit for completing the certificate program is two calendar years. The program requires 18 semester hours of course work. A maximum of nine hours of transfer credit is permitted in this program. A minimum cumulative GPA of 3.00 is required.

2. Course Requirements (3). There are three semester hours of required course work in the certificate program.
3. Electives (15). The student can select any 8000-level course from the real estate curriculum for the program. The following courses are recommended as electives.

- RE 8020 Real Estate Investment Analysis (3)
- RE 8030 Real Estate Financing (3)
- RE 8040 Legal and Regulatory Environment of Real Estate (3)
- RE 8050 Real Estate Development (3)
- RE 8060 Applied Real Estate Market Analysis (3)
- RE 8100 Strategic Management of Real Property in a Corporate Environment (3)
- RE 8410 Real Estate Appraisal Theory and Practice (3)

Each student may petition the coordinator of the certificate program to substitute up to nine semester hours of course work from other departments or programs as electives in the C.R.E. program. These courses must have relevance for a real estate education. The student will prepare a written request in which the title of the course is identified, a full course description is attached, and a statement explaining the significance of the course to the student’s program is included. In each instance, these courses must be graduate level. The written request should be submitted to, and will be evaluated by, the C.R.E. coordinator, who will notify the Office of Graduate Student Services of any approvals.

4. Awarding of the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the certificate adviser in the Department of Real Estate to have the certificate awarded; an official Georgia State University transcript and a certificate fee of $125 (check made payable to Georgia State University) must be sent with the request. The adviser then reviews the student’s record. If all requirements have been met, the certificate, signed by the dean and department chair, will be issued to the student.

**7355 Graduate Certificate of Specialization in Brand & Customer Management**

This certificate program is open to all MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University who are qualified for admission to a masters program in the Robinson College of Business.

To earn the (Graduate) Certificate of Specialization in Brand & Customer Management, students must complete the following 4 courses:

- MK 8200 Marketing Research (MR)
- MK 8710 Customer Relationship Management (CRM)
- MK 8620 Product and Brand Management (PBM)
MK 8720 Data Driven Marketing (DDM)

Prerequisite for all courses: MBA 8145 Strategic Marketing Management

Students must earn an overall 3.0 grade point average (GPA) in all courses taken in the J. Mack Robinson College of Business and must earn a minimum of B- in all courses taken as part of this certificate.

Contact Dr. Alok Saboo for further information: asaboo@gsu.edu.

7356 Graduate Certificate in Strategic Sales Leadership

Kent Christopher Lemley, Program Director, 404/413-7668, clemley@gsu.edu

This certificate program is open to all MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University who are qualified for admission to a masters program in the Robinson College of Business.

To earn the (Graduate) Certificate in Strategic Sales Leadership, students must complete the following 2 courses:

- MK 8330 Strategic Selling
- MK 8340 Strategic Sales Leadership

And two or more of the following related electives:

- MK 8510 Business to Business Marketing
- MK 8710 Customer Relationship Management
- MGS 8430 Negotiation
- MGS 8425 Coaching for Leadership

Prerequisite for all courses: MBA 8145 Strategic Marketing Management

Students must earn an overall 3.0 grade point average (GPA) in all courses taken in the J. Mack Robinson College of Business and must earn an overall grade point average (GPA) of 3.0 in all courses taken as part of this certificate.

7358 Executive Doctorate in Business (EDB)

EDB Program Office
Tower Place 200, 3348 Peachtree Road NE, Suite 500, Atlanta, GA 30326
404/413-7187
Program website: http://edb.robinson.gsu.edu/
Email: kalnitz@gsu.edu

Maury C. Kalnitz, MBA, MS, Director of the EDB Program
Lars Mathiassen, Ph.D., Academic Director of the EDB Program

Please contact the EDB Program Office for more information about this program.

7358.10 Goals and Expectations

The Executive Doctorate in Business (EDB) program of the J. Mack Robinson College of Business advances the development and practice of effective organizational leadership by providing senior level executives with:

- The knowledge and expertise required to identify, understand, and successfully tackle the interdisciplinary, big picture issues that characterize global business management today.
- The skills in formal social inquiry required to define and address complex issues and to disseminate knowledge in a variety of professional and public outlets to influence professional activity and public policy.
- The type of interdisciplinary and global systems oriented perspective that is required to understand and address contemporary business problems.

The EDB program is a 3-year degree program designed for senior executives who already possess an MBA, EMBA, or equivalent MS degree. It is offered in an executive format with students participating in four 3-day residencies (Thursday, Friday and Saturday) per semester for 6 semesters.

Conduct

All EDB students must assume full responsibility for knowledge of the rules and regulations concerning their studies. Moreover, students are expected to abide by generally accepted standards of conduct. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, faculty, or other students. Students should review the “University Code of Conduct” in the General Information chapter of this catalog for explicit information on this topic.

Admissions: Applications, Procedures, and Criteria

Applications for the EDB program will be accepted for once-a-year admission in the fall semester. All inquiries and requests for application materials should be made to:

EDB Program Office
Tower Place 200
3348 Peachtree Road NE, Suite 500,
Atlanta, GA 30326

The EDB Program Office phone number is 404/413-7187. The program’s website is http://edb.robinson.gsu.edu/. All documents and other materials submitted by or for applicants for admission to the EDB program become the property of Georgia State University and cannot be returned. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the EDB Program Office by the deadline for receipt of materials. Incomplete applications will not be processed.
Admission Criteria

Admission decisions are based on a careful review of the applicant’s scholastic record, resume, required essays, and the other information submitted in support of the application. Applicants must possess an accredited MBA, EMBA, or equivalent MS degree. Applicants are not required to submit a certification of their state of health but on enrollment, must submit an immunization certification. The college reserves the right to investigate the health, character, and personality of each applicant. Listed below are the materials which all applicants must submit to the EDB Program Office to be considered for admission.

Application

Applicants must submit all application forms, including the narrative section.

Application Fee

An application fee of $100 must be submitted by all applicants. Checks or money orders should be made payable to Georgia State University in U.S. currency. Do not send cash. The application fee cannot be waived, is nonrefundable, and does not apply toward registration fees.

Transcripts

Applicants either must request that two official copies of all transcripts be sent directly from each institution to the EDB Program Office or submit the official transcripts unopened with the application. An applicant who has previously attended Georgia State University is permitted to submit only one copy of transcripts from each institution attended prior to entering the university; two copies are required from all institutions attended after having last been registered at Georgia State University.

Interview/Additional Information

As part of the review of an applicant’s file, an interview or additional information is often required. In these instances, applicants will be contacted to schedule an interview or to provide additional information.

International Applicants

Applications from international applicant are accepted.

TOEFL: An international applicant whose native language is not English may be required to submit official scores from the Educational Testing Service on the Test of English as a Foreign Language (TOEFL). An international applicant who has received a degree from an accredited U.S. institution is exempt from this requirement. However, international applicants who have taken the TOEFL within two years of application to the EDB program are encouraged to submit official scores even if the exemption applies.

The school code is 5251.

Financial Requirements: Georgia State University reserves the right to admit only those international applicants who are academically qualified and who have documented their ability to meet the financial
EDB Program of Study

Year 1

Fall Semester
(9 credit hours)

Year 2

Fall Semester
(9 credit hours)

- EDB 9030 Theory and Practice of Managing Organizations
- EDB 9100 Quantitative Research II
- EDB 9140 Laboratory for Business Driven Research

Spring Semester
(9 credit hours)

- EDB 9040 Emerging Markets and Global Models for Business
- EDB 9060 Global Economic Systems & Issues
- EDB 9170 Dissertation (3 credit hours)

Year 3

Fall Semester
(9 credit hours)

- EDB 9110 Influences and Limitations on Executive Decision Making
- EDB 9170 Dissertation (6 credit hours)

Spring Semester
(9 credit hours)
EDB 9120 Evidence Based Management
EDB 9150 Creating and Disseminating Research Knowledge
EDB 9170 Dissertation (3 credit hours)

Academic Regulations

I. Scholastic Warning and Termination

a. Each student must maintain a 3.00 doctoral GPA (“B” average). The doctoral grade-point average (GPA) is defined as the GPA for all EDB courses numbered 9000 or higher taken after admission to the EDB program. A student whose doctoral GPA falls below 3.00 is on “scholastic warning.” After being placed on scholastic warning, a student must attain a 3.00 doctoral GPA within two consecutive calendar semesters; otherwise the individual will be terminated from EDB studies in the Robinson College of Business. The doctoral GPA could differ from the GPA calculated by the university and reported on the student’s official transcript, since the university GPA would also include the grades from any graduate courses numbered 6000 or above taken at Georgia State University before admission to the EDB program. b. A student who has been terminated from the EDB program will not be permitted to reapply to or reenter the program.

II. Standards of Performance

The requirements and regulations listed in this catalog refer to minimum standards of performance. The program may have additional requirements, as set forth in writing, that exceed the minimum standards published in this catalog. If a student fails to meet these additional requirements, the directors of the EDB program may require that the student withdraw from EDB study. To continue in the program, a student must make reasonable and timely progress toward the degree in terms of coursework completed.

Continuous Enrollment

Beginning with the semester of acceptance, an EDB student must register for a full load each semester (excluding summer semester unless the student has completed all coursework) until graduation. A full load is considered a minimum of nine semester hours. Students who are visa-holders may need to register for more hours and should discuss their status with the Office of International Student and Scholar Services. EDB 9171, Dissertation Seminar, may be used to satisfy this requirement until the student has passed the final dissertation defense. Students who fail to meet the continuous enrollment requirement are subject to withdrawal from EDB studies in the Robinson College of Business.

Reentry

As stated in the previous section concerning continuous enrollment, students must enroll for a full course load each semester (excluding summers). Any absence from the program must be approved through the academic director. Students who leave the program without an approved request or who do not fulfill the terms of an approved request for an absence may not be allowed to reenter the program. Any student who is not registered for one calendar year must file a reentry application with the Registrar’s Office. Students must be mindful of the deadline for this application. There is a charge to file a reentry application. As previously stated, reentry approval is not automatic and the student should check with the EDB Program Office if considering reentry.
III. The Dissertation

The purpose of the dissertation is for the EDB candidate to demonstrate ability to conduct research leading to a significant contribution in a chosen area of inquiry. Before a student begins to collect any primary data from human subjects, the student must make sure that all data collection, including surveys, is in compliance with the guidelines set out by the Institutional Review Board (IRB). Included among these requirements is certification via an online test on ethical treatment of subjects. The IRB’s *Human Subjects Manual* is accessible online at http://ursa.research.gsu.edu/ursa/compliance/human-subjects/.

IV. The Dissertation Committee

The Dissertation Committee consists of a chair plus a minimum of two members. The committee, and any subsequent change in its membership, is appointed by the academic director of the EDB program. Faculty from institutions other than GSU may serve as members of the committee, but at the time of the initial formation of the committee, there must be at least two GSU faculty on the committee. At least two committee members must be in good standing with respect to GSU graduate faculty status. Co-chair arrangements are not only acceptable, but even encouraged, especially in cases where one of the co-chairs is an assistant professor. When the student is ready to begin the initial work on the dissertation, he or she should first discuss with the EDB academic director the names of potential faculty who would be the most appropriate chair of the Dissertation Committee. Only after the EDB academic director has agreed with the student as to the choice of a particular faculty member should the student then invite the faculty member to be chair of the committee. Once the dissertation chair has been chosen, the chair, in consultation with the student, will recommend the selection of the remaining committee members to the EDB academic director.

Dissertation Proposal Defense

Prior to admission to candidacy for the degree, a dissertation proposal defense must be held. After the student completes a written proposal that the Dissertation Committee deems to be ready for final defense, a dissertation proposal defense will be held before the Dissertation Committee.

The student's dissertation proposal should include a summary of the following: the purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory, if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation.

The proposal defense will be open to all interested faculty and doctoral (EDB and Ph.D.) students. After the proposal defense has been held, the members of the committee will vote to determine if the student is deemed to have a satisfactory research topic. A unanimous decision by the student's Dissertation Committee is required. The members of the committee will sign the dissertation proposal defense approval form.

Submission of the approval form does not constitute a contractual agreement between the student and the Dissertation Committee. It is within the scope and function of the Dissertation Committee to recommend modifications to the research as it proceeds. Upon submission of the proposal defense approval form to the EDB Program Office, the student is admitted to candidacy for the degree.
Committee members should be given a draft of the proposal (and also the final dissertation) at least two weeks before the proposed defense date. This will permit a revision cycle to both improve the work before the defense and ensure that committee members have adequate time to comment and raise substantive issues, should this be the case. It will also allow the defense date to be postponed in the event that required changes could not be completed before the proposed defense date.

**Final Dissertation Defense**

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. At least two weeks in advance of the final dissertation defense, the student will inform the EDB Program Office of the scheduled date of defense and an announcement will be made to all academic units. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the EDB Program Office. Unanimous approval is required. Guidelines for the dissertation are available from the EDB Program Office and on the EDB website at [http://phd.robinson.gsu.edu/ph-d-students/online-student-handbook/the-dissertation/](http://phd.robinson.gsu.edu/ph-d-students/online-student-handbook/the-dissertation/).

**Dissertation Embargo Policy**

Students may request a 3-month, 6-month, 9-month, or 12-month restriction of dissertation publishing (hereafter termed embargo). Requests must be made in writing to the dissertation chair/co-chairs prior to the electronic uploads of the dissertation to ProQuest/UMI and Georgia State University’s Scholarworks Digital Archive Library. Written approval from the chair/co-chairs must be sent to the EDB Program Office. Once the approval is received by the EDB Program Office, the dissertation will not be published for the approved embargo period. The dissertation will be released for publishing after the embargo period ends.

**V. Dissertation Defense and Graduation**

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the EDB Program Office. Unanimous approval is required. An electronic copy of the dissertation must be submitted to the EDB Program Office two weeks prior to the anticipated date of graduation.

**Time Limits for the Degree**

The time limits specified below should be interpreted as the maximum amount of time students may take to complete each of the degree requirements. It is anticipated that most students will complete the requirements within the intended three years of study:

- All coursework on the program of study in the EDB program must be completed within four years
from the semester of entry into the EDB program.

- All requirements for the EDB degree, including the dissertation, must be completed within five years from the semester of entry into the EDB program.

7360 Ph.D. Program

Ph.D. Program Office
831 RCB Building
404/413-7070
Program website: robinson.gsu.edu/phd/
Email: rcbphd@gsu.edu

Lisa Schurer Lambert, PhD., Director of the Ph.D. Program
Adenike Brewington, MS., Associate Director of the Ph.D. Program

7360.05 Goals and Expectations

The Ph.D. program of J. Mack Robinson College of Business will develop in graduates a high level of competence in conducting research and in teaching business disciplines by requiring: (1) education in theory; (2) education in general research techniques as well as research techniques specific to a discipline; (3) research experience with faculty members on contemporary research problems and issues; and (4) training on teaching methodology reinforced with active classroom teaching experience.

The Ph.D. program requires that the student demonstrate mastery of a large and complex body of knowledge and a high degree of proficiency in the techniques of teaching and research. This is evidenced by the successful completion of coursework and examinations, effective performance in classroom instruction, participation with faculty members in research, presentation of papers and reports, and the writing of a dissertation of high quality. Given the substantial commitment of intellectual effort and time required to achieve these competencies, students are required to enroll on a full-time basis.

Conduct

All Ph.D. students must assume full responsibility for knowledge of the rules and regulations concerning their studies. Moreover, students are expected to abide by generally accepted standards of conduct. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, faculty, or other students. Students should review the “University Code of Conduct” in the General Information chapter of this catalog for explicit information on this topic.

The Nature of Ph.D. Studies

Ph.D. studies are fundamentally different from undergraduate or master’s programs. The Ph.D. student must be self-motivated and work well independently. The program is academically rigorous and students must have exceptional quantitative and verbal skills. Coursework is but one facet of the program. The research component is the heart of the Ph.D. program. The student must be highly motivated to work on research projects independently and with faculty. Most students take five years to complete the degree. Students are encouraged to present research papers at national and regional meetings. The college provides
partial funding to help defray costs. The successful student is one who not only has excellent academic skills, but a passion for scholarly research.

**7360.10 Ph.D. Majors Offered**

The Robinson College of Business offers the Ph.D. in Business Administration with major fields in:

- Accountancy
- Computer Information Systems
- Finance
- Managerial Sciences (specializations are currently offered in Organization Behavior/Human Resource Management and Strategic Management). Please contact the Ph.D. Program Office for information about which of these programs is currently admitting students.
- Marketing
- Real Estate
- Risk Management and Insurance

*The specialization in international business is available to Ph.D. students majoring in any business major.*

**7360.15 Ph.D. Program Operation**

The Ph.D. program of the Robinson College of Business is governed and administered as follows:

1. The Graduate Program Council of the Robinson College of Business, comprised of five faculty members, recommends Ph.D. degree requirements and academic regulations that are subsequently submitted for approval by the college faculty.
2. The Ph.D. Program Office is run by the Associate Director who reports to the Director. This office is the student’s primary point of contact for administrative matters. Applications for admission are processed by this office.
3. The Ph.D. Coordinator is the faculty member in the student’s academic unit who advises students on courses to be taken and other degree requirements.

**7360.20 Admissions: Applications, Procedures, and Criteria**

Applications for the Ph.D. programs will be accepted for once-a-year admission in the fall semester. The deadline for receipt of all required application materials is January 8.

The Ph.D. application is an online electronic application. Visit phd.robinson.gsu.edu/admissions/ and select the link to “Apply Online.” All documents and other materials submitted by or for applicants for admission to the Ph.D. program become the property of Georgia State University and cannot be returned. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the Ph.D. Program Office by the deadline for receipt of materials. Incomplete applications will not be processed. Admission is for entry in a specific major. A student may enter a different major only if, and after formal approval has been given by the Ph.D. admissions committee of that major. Not all majors admit students yearly.

**Admission Criteria**
Admission decisions are based on a careful review of the applicant’s scholastic record, admission test score(s), letters of recommendation, and the other information submitted in support of the application (including an interview, if required by the academic unit). In making the decision, each academic unit must consider at all times the optimum number of students in the program. This could result in the denial or deferral of otherwise qualified applicants.

Applicants are not required to submit a certification of their state of health but must submit an immunization certification upon admission. The college reserves the right to investigate the health, character, and personality of each applicant.

Listed below are the materials that all applicants must submit to the Ph.D. Program Office to be considered for admission.

Application

Applicants must submit all application forms, including a statement of purpose.

Application Fee

An application fee of $50 must be submitted by applicants who have never applied to the Ph.D. program of the Georgia State University Robinson College of Business and paid the fee in the past. The online application allows applicants to pay by credit card. Checks or money orders should be made payable to Georgia State University in U.S. currency. Do not send cash. The application fee cannot be waived, is nonrefundable, and does not apply toward registration fees.

Transcripts

Applicants either must request that one official copy of all transcripts be sent directly from each institution to the Ph.D. Program Office or submit the official transcripts unopened with the application.

Letters of Recommendation

Three letters of recommendation are required from persons who are able to evaluate the applicant’s intellectual capacity for advanced study, independent research, analytical thinking, and the potential for effective teaching at the collegiate level. Applicants and students are not permitted to have access to letters of recommendation.

Admission Test for Ph.D. in Business Administration

All applicants to the Ph.D. in Business Administration program must submit official scores on the Graduate Management Admission Test (GMAT) of the Educational Testing Service.

* The following units —Business Process Innovation, Computer Information Systems, Finance, Marketing, Organizational Behavior/Human Resource Management, Real Estate, and Risk Management and Insurance—will accept scores on the Graduate Record Examinations (GRE) as a substitute for the GMAT from applicants. Other academic units may consider GRE scores on a case-by-case basis, but an applicant to any program other than those previously mentioned may lessen the probability of acceptance.
by not submitting GMAT scores. The GRE school code is 5251. Applicants are advised to enclose a copy of their test scores with the hard copy materials that they send to the admissions office to facilitate the office in locating the official score report.

*GMAT scores will not be considered if they are more than seven years old at the time of application to the Ph.D. program. The school code is QCK-ZW-59.

A GMAT Information Bulletin may be obtained by contacting the Graduate Management Admission Council:

Pearson VUE-GMAT Program  
5601 Green Valley Drive  
Suite 300  
Bloomington, MN 55437  
Phone: 1 800 717 4628  
E-mail: gmat@ets.org  
www.gmac.com

Interview/Additional Information

As part of the review of an applicant’s file by faculty representatives in the academic unit, an interview or additional information may be required. In such cases, the applicant will be notified.

7360.25 International Applicants

TOEFL: An international applicant whose native language is not English must submit official scores from the Educational Testing Service on the Test of English as a Foreign Language (TOEFL). An international applicant who has received a degree from an accredited U.S. institution is exempt from this requirement. However, international applicants who have taken the TOEFL within two years of application to the Ph.D. program are encouraged to submit official scores even if the exemption applies. The school code is 5251.

Financial Requirements: Georgia State University reserves the right to admit only those international applicants who are academically qualified and who have documented their ability to meet the financial requirements while in attendance. Although the Ph.D. program does award assistantships to the majority of accepted applicants, this funding is not always adequate to meet all living expenses. Applicants who are requesting a student (F-1) visa might be required to have some independent sources of funding, depending on the amount of their award. For the 2015-2016 year, an unmarried student coming to the U.S. without dependents is required to show resources totaling approximately $48,586 a year for tuition and living expenses. Applicants with dependents will be required to document additional funds. This documentation will be requested of applicants who are offered admission. The estimated living expenses do not include owning a car.

Immunization Certification

The Board of Regents of the University System of Georgia Requires that all accepted applicants who have never attended Georgia State University submit proof of immunization from measles, mumps, and rubella (MMR) as well as the varicella vaccine before being allowed to register. The Ph.D. program will consider
applicants for admission without this documentation. However, in order to matriculate, an applicant must have fulfilled this requirement. The Immunization Form can be obtained from the Georgia State University Health Services Office.

7360.30 Changing Year of Entry and Record Retention

Admission to the Ph.D. program is for the specific semester and year stated in the acceptance letter. Any accepted applicant who does not enroll for the semester and year for which acceptance was granted must notify the associate director of the Ph.D. program and the unit’s Ph.D. coordinator so his or her records may be updated for fall of the next year. Admission for the next year is not guaranteed. Applicants should be aware that assistantships, instructorships, or fellowships could be affected by such a change. All application files of nonmatriculated applicants, regardless of admissions decision, will be kept on file for two years. An applicant who wishes to reactivate an application after that period may need to resubmit application materials and official documentation.

7360.35 Ph.D. Assistantships, Instructorships, and Fellowships

Ph.D. students in the Robinson College of Business are eligible for graduate research assistantships (GRA) and graduate teaching assistantships (GTA). The college also awards temporary instructorships to select Ph.D. students who have passed the dissertation proposal defense. In addition, there are various fellowships and scholarships awarded on a competitive basis to Ph.D. students. No separate application is required for applicants to be considered for funding.

7360.40 Graduate Research Assistantships

Newly admitted Ph.D. students. Soon after admission to the Ph.D. program, the Ph.D. Program Office will inform newly admitted students of the type and number of appointments, if any, which they have been allocated by their academic unit. All accepted applicants are automatically considered for assistantships.

Students in their second and successive years of Ph.D. studies. Each academic unit will determine the assistantship appointment level to be allocated to its continuing Ph.D. students based on the students’ performance in the program and on the unit’s assistantship budget.

7360.45 Graduate Teaching Assistantships

The teaching assignment of a graduate teaching assistant is usually a basic undergraduate course in the student’s area of interest.

Advanced Ph.D. students may be permitted to teach advanced-level courses. Only Ph.D. students who have completed the requirements for a master’s degree, or the equivalent amount of graduate coursework, can be considered for appointment as a GTA.

Prior to the actual appointment as a GTA, a student must be recommended for hiring by the academic unit and receive approval to teach from the University. The student is responsible for completing all paperwork involved in this process well in advance of the semester for which approval is sought.

Any Ph.D. student appointed as a GTA must take BA 9200, Seminar in University Teaching, during his or
her first or second semester of teaching. Prior teaching experience does not exempt a student from this requirement. Nonnative speakers of English must demonstrate adequate proficiency in their language skills to the satisfaction of their academic unit prior to being hired as a GTA.

7360.50 Tuition for GRAs and GTAs

A student hired as a GRA or GTA receives a tuition waiver. A registration fee assessed each semester includes the health clinic, student activity, student athletics, recreation and transportation fees. International students and all graduate students who have a full tuition waiver (as defined by the university) must pay a mandatory health insurance fee or provide proof of health insurance. Submission of proof of insurance does not automatically exempt a student from this requirement. Approval is contingent on verification of coverage. For further information, students should visit the Student Accounts website: sfs.gsu.edu/tuition-fees/student-health-insurance/.

- Standards Applying to Both GRA and GTA Appointments

1. Students must register for a minimum of nine credit hours of appropriate course work (or research hours). During each semester in which an assistantship is held, students must register for a full load (as defined by the university) of credit hours that may be a combination of courses, dissertation hours, and/or research hours. Students who are visa-holders should discuss their status with the Office of International Student and Scholar Services to make certain that they are registered for a sufficient number of hours.
2. Students must maintain satisfactory academic standing during the period(s) of their appointment, including a minimum 3.00 cumulative grade-point average. Ph.D. students must also be making normal progress toward completion of the degree requirements.
3. Satisfactory performance, as measured by the academic unit, as a GRA or a GTA is required for continuation of such appointments in subsequent semesters.
4. For further information on policies and procedures applying to GRA and GTA appointments, contact the associate director in the Ph.D. Program Office.

7360.60 Instructorships

A temporary instructor is appointed for one academic year at a time. Appointment as a temporary instructor benefits Ph.D. students who have passed the dissertation proposal defense and have demonstrated satisfactory classroom teaching ability over a period of two or more semesters by providing them with a significant level of income during the year in which they are working full time on their dissertation.

7360.65 Fellowships and Scholarships

The Robinson College of Business has a number of fellowships and scholarships available, ranging from $500 to $10,000 per year. Such fellowship and scholarship stipends are awarded in addition to the amounts received by Ph.D. students who are appointed as GRAs or GTAs. Information on specific fellowships and scholarships is available from the Ph.D. coordinator of the student’s academic unit.

7360.70 Doctor of Philosophy in Business Administration
1. Program of Study

The Ph.D. Coordinator is the faculty member in the student’s academic unit who advises students on courses to be taken and on other degree requirements. As a function of, and implicit in course selection for the student’s program of study the academic unit will consider how the discipline fits into managerial and organizational contexts and will select courses accordingly.

A program of study indicating how the student will fulfill each of the degree requirements must be approved by the student’s Ph.D. Coordinator and the Director of the Ph.D. Program by the end of the second semester of enrollment. This program of study is filed in the RCB Ph.D. Program Office; it may be revised, as appropriate, but must be kept current, as it will be a key factor in determining satisfactory progress in the program.

Forty-two (42) semester hours of coursework, as a minimum, must be completed successfully for graduation. The major field requirement is a minimum of 18 credit hours; the research methods requirement is a minimum of 15 credit hours; and free elective or secondary area courses are a minimum of 9 credit hours for a total of 42 semester hours. Students are expected to complete the courses on their program of study on a timely basis. When feasible, registration for a full load (as defined by the college) each semester is encouraged, including courses for research and dissertation credit (BA 9000 or BA 9500). At a minimum, students who do not hold an assistantship must register for six hours per semester (excluding summer semester unless the student holds a GRA/GTA).

1. Quantitative and Research Foundations (15 semester hours)

Students entering the Ph.D. program are presumed to have background and current knowledge in the following additional areas:

- multi-variable calculus including multiple integration, partial derivatives, and infinite series;
- matrix algebra including linear transformations, vector differentiation, and eigenstructures;
- computer skills for empirical research including statistical packages and the use of databases; and
- macroeconomics and microeconomics through the intermediate level.

Students can remedy a deficiency in any or all of these areas by taking credit or noncredit courses, auditing appropriate graduate or undergraduate classes, and/or attending tutorial sessions. Students who feel their background is not adequate may consult with the Associate Director of the Ph.D. program and their Ph.D. Coordinator for recommendations on overcoming deficiencies.

III. Major Field (18 semester hours)

Hours of Course work. The satisfactory completion of no fewer than 18 graduate-level semester hours constitutes minimum preparation in the major field.

Students must have satisfactorily completed all courses on the program of study in the major field and in the research methods requirement to be eligible to take the preliminary examination. Requests to take the preliminary examination are made through the Ph.D. Coordinator. The Ph.D. Coordinator will notify the Office of Ph.D. Programs with the names of the student(s) prepared to take the examination.
Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.

1. Research Methods Requirements (15 semester hours)

The satisfactory completion of no fewer than 15 graduate-level semester hours constitutes minimum preparation in research methods. The Ph.D. Coordinator may approve substitutions for any of the following research methods requirements.

1. Intermediate Statistics: MGS 9920(3)
2. Research Design: MGS 9940(3)
3. Regression: MGS 9950(3)
4. Multivariate Data Analysis: MGS 9960(3)
5. Elective: research methods/theory development course: BA 9260; BA 9280; BA 9300; or a course may be from the student’s major field and department (3)
6. Free Electives or Secondary Area (9 semester hours)
7. The satisfactory completion of no fewer than nine (9) semester hours fulfills this coursework requirement and students may choose to fulfill these credits, with the approval of their Ph.D. Coordinator, either with a secondary area or with free electives. Courses would generally be at the 9000 Ph.D. level, except as advised by the Ph.D. Coordinator of the student’s academic unit, and would support and complement the student’s research interest.
8. Courses for each secondary area shall be taken from a list of courses prepared by the academic unit offering the secondary area, but students must have the approval of their Ph.D. Coordinator for both taking a secondary area and for the set of courses making up that secondary area.
9. Substitutes for secondary area courses can be made with the approval of the unit offering the secondary area and the student’s Ph.D. coordinator.

7360.75 Academic Regulations

Transfer Credit

A maximum of 15 semester hours may be transferred from other institutions or from other programs at Georgia State University. Transfer credit, whether from other institutions or from Georgia State, must have been completed within five years of the semester of entry to the Ph.D. program. The course must have been limited to graduate students only, and a grade of A or B must have been received.

At the time the program of study is planned with the Ph.D. coordinator, the student who requests transfer credit must submit a course description from the catalog of the institution, a syllabus or course outline, and written justification stating why the course is relevant to the program of study. Requests for transfer credit are approved at the discretion of the unit coordinator in consultation with Ph.D. faculty. Final approval for the acceptance of transfer credit rests with the director of the Ph.D. program at the time the program of study is submitted to the Ph.D. Program Office.

Residency Requirement

In order to earn a graduate degree at Georgia State University, students must earn the majority of their
graduate program credit hours from Georgia State University. All transfer hours are subject to unit/college level approval. The Robinson College of Business defines residency in the Ph.D. program as being enrolled in approved coursework that is appropriate for the program, and that have not been counted toward another graduate degree of this college. The minimum residency requirement is 18 semester hours.

**Scholastic Warning and Termination**

The Ph.D. grade-point average (GPA) is defined as the GPA for all courses numbered 6000 or higher taken after admission to the Ph.D. program. Each student must maintain a 3.0 Ph.D. GPA (“B” average). A student whose semester or overall Ph.D. GPA falls below 3.0 is on “scholastic warning.” After being placed on scholastic warning, a student must attain a 3.0 Ph.D. GPA within two consecutive calendar semesters; otherwise the individual will be terminated from Ph.D. studies in the Robinson College of Business.

The Ph.D. GPA could differ from the GPA calculated by the university and reported on the student’s official transcript, since the university GPA would also include the grades from all courses taken at Georgia State University before admission to the Ph.D. program.

No student will be permitted to sit for any examination required for the Ph.D. degree, other than course examinations, without having a minimum 3.00 Ph.D. GPA at the time the examination is to be taken. A student with a Ph.D. GPA below 3.00 is ineligible for graduate assistantship appointments as either a GRA or GTA. Students must have at least a 3.0 Ph.D. GPA in order to graduate.

A student who has been terminated from the Ph.D. program will not be permitted to reapply to or reenter the program.

**Standards of Performance**

The requirements and regulations listed in this catalog refer to minimum standards of performance. The student’s academic unit may have additional requirements, as set forth in writing, that exceed the minimum standards published in this catalog. If a student fails to meet these additional requirements, either the chair of the student’s major academic unit or the director of the Ph.D. program may require that the student withdraw from Ph.D. study.

To continue in the program, a student must make reasonable and timely progress toward the degree in terms of coursework completed and examinations. Students who fail to adhere to the minimum standards published in the catalog or to any higher standards established by the academic unit will be terminated from the program.

**Petitions**

When a student feels that unusual circumstances call for an exception to any of the regulations or requirements relating to the degree in his or her particular case, the student may write to the Ph.D. coordinator and request exemption from or change in the policy. The petition by the student must be submitted with accompanying justifications. If the Ph.D. coordinator and academic unit support the request, the Ph.D. coordinator will write a letter of support for the student and submit the material to the director of the Ph.D. program for a decision.
Continuous Registration

Beginning with the semester of acceptance, a Ph.D. student must register for a full load each semester) until graduation. Summer enrollment is mandatory if required by the Ph.D. faculty coordinator, if the student is receiving a GRA/GTA, and for certain visa holders. A full load is considered a minimum of nine semester hours. Students who are visa-holders may need to register for more hours and should discuss their status with the Office of International Student and Scholar Services. BA 9000, Doctoral Research, may be used to satisfy this requirement until the student has passed the dissertation proposal defense. BA 9500, Dissertation Research, may be used to satisfy the minimum hours requirement once the student has passed the dissertation proposal defense. Students who fail to meet the continuous registration requirement are subject to withdrawal from Ph.D. studies in the Robinson College of Business.

Reentry

As stated in the previous section concerning continuous registration, students must enroll for a full course load each semester (excluding summers). Any absence from the program must be approved through the petition procedure (see section regarding petitions). Students who leave the program without an approved petition or who do not fulfill the terms of an approved petition for an absence, may not be allowed to reenter the program. Any student who is not registered for one calendar year must file a reentry application with the Ph.D. Program Office. Students must be mindful of the deadline for this application. There is a charge to file a reentry application. As previously state, reentry approval is not automatic and the student should check with the Ph.D. Program Office if considering reentry.

Preliminary Examination

The purpose of the preliminary examination is to determine student mastery of the body of knowledge in their area of specialization and their readiness for dissertation research. Students are encouraged to confer with their Ph.D. coordinator regarding the areas the examination will encompass. The preliminary examination is a written examination, supplemented in some cases by an oral examination. The preliminary exam may have several parts and students must have successfully completed all parts before being designated, informally, as ABD (“All-But-Dissertation”). The units offering Ph.D. programs will determine how many parts there will be to their preliminary exam and when these will be offered.

Students must have satisfactorily completed all required courses in the program of study in the major field to be eligible to take the preliminary examination (or the first part in the event of a multi-part exam). Requests to take the preliminary examination are made through their Ph.D. coordinator. The Ph.D. coordinator will notify the Ph.D. Program Office which student(s) are prepared to take the examination.

Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.

The Dissertation

The purpose of the dissertation is for the Ph.D. candidate to demonstrate his or her ability to conduct research leading to a significant contribution to the candidate’s discipline. Before a student begins to collect any primary data from human subjects, s/he must make sure that all data collection, including surveys and
use of archival data, are in compliance with the guidelines set out by the Institutional Review Board (IRB). Included among these requirements is certification via an online test on ethical treatment of subjects. The IRB’s Human Subjects Manual is accessible online at ursa.research.gsu.edu/ursa/compliance/human-subjects/.

**Acceptable Forms of Dissertation**

Dissertations may be a single study or they may be composed of multiple essays or papers. In the latter case, these papers make up separate chapters of the overall dissertation or they are summarized within the dissertation and attached in full text. Guidelines for the traditional single study dissertation need not be articulated here since they are well understood and are part of the socialization of each business Ph.D. student. Guidelines for multi-paper studies, though, are articulated next since this model is not as familiar within U.S. schools of business.

**Guidelines for Multi-Paper Dissertation**

Whereas the essays or papers that are included in the dissertation may be co-authored, it is critical that the student provide evidence of leadership in the majority of these to demonstrate ability to conduct independent research. Committee members can and should exercise their own judgment as to the quality of the dissertation, irrespective of any prior publication history of the papers. Unit standards for multi-paper dissertations may be formulated and distributed to students to equal or exceed the guidelines expressed here.

**The Dissertation Committee**

The Dissertation Committee consists of a chair plus a minimum of three members. The committee, and any subsequent change in its membership, is appointed by the director of the Ph.D. program upon the recommendation of the Ph.D. coordinator. Faculty from institutions other than GSU may serve as members of the committee, but at the time of the initial formation of the committee, there must be at least three GSU faculty members on the committee. At least two committee members must be in good standing with respect to GSU graduate faculty status. Co-chair arrangements are not only acceptable, but even encouraged, especially in cases where one of the co-chairs is an assistant professor. Unit standards for committee membership may be formulated and distributed to students to equal or exceed the policies expressed here.

As the student develops an interest in a potential dissertation topic, he or she should discuss the topic with individual faculty members both to determine the topic’s feasibility and merit and the faculty members’ interest and expertise in that area. When the student is ready to begin the initial work on the dissertation, he or she should first discuss with the Ph.D. coordinator names of potential faculty who would be the most appropriate chair of the Dissertation Committee. Only after the Ph.D. coordinator has agreed with the student as to the choice of a particular faculty member should the student then invite the faculty member to be chair of the committee.

Once the dissertation chair has been chosen, the chair, in consultation with the student, will recommend the selection of the three remaining committee members to the Ph.D. coordinator. Normally, one of the committee members is from outside the academic unit. The final committee membership is then sent to the unit Ph.D. coordinator and the director of the Ph.D. program for their approval. Should either of these
managers disapprove a particular committee member(s), the chair will work with the student to find a suitable replacement(s).

**Dissertation Proposal Defense**

Prior to admission to candidacy for the degree, a dissertation proposal defense must be held. After the student completes a written proposal that the Dissertation Committee deems to be ready for final defense, a dissertation proposal defense will be held before the Dissertation Committee.

The student’s dissertation proposal should include a summary of the following: the purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory, if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation.

The proposal defense will be open to all interested faculty and Ph.D. students. After the proposal defense has been held, the members of the committee will vote to determine if the student is deemed to have a satisfactory research topic. A unanimous decision by the student’s Dissertation Committee is required. The members of the committee will sign the dissertation proposal defense approval form.

Submission of the approval form does not constitute a contractual agreement between the student and the Dissertation Committee. It is within the scope and function of the Dissertation Committee to recommend modifications to the research as it proceeds. Upon submission of the proposal defense approval form to the Ph.D. Program Office, the student is admitted to candidacy for the degree.

Committee members should be given a draft of the proposal (and also the final dissertation) at least a month before the proposed defense date. This will permit a revision cycle to both improve the work before the defense and ensure that committee members have adequate time to comment and raise substantive issues, should this be the case. It will also allow the defense date to be postponed in the event that required changes could not be completed before the proposed defense date.

**Final Dissertation Defense**

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. At least two weeks in advance of the final dissertation defense, the Ph.D. coordinator will inform the Ph.D. Program Office of the candidate’s date of defense and an announcement will be made to all academic units. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the Ph.D. Program Office. Unanimous approval is required. Guidelines for the dissertation are available from the Ph.D. Program Office and on the Ph.D. website at phd.robinson.gsu.edu/ph-d-students/online-student-handbook/the-dissertation/.

**Dissertation Embargo Policy**

Students may request a 3-month, 6-month, 9-month, or 12-month restriction of dissertation publishing
(hereafter termed embargo). Requests must be made in writing to the dissertation chair/co-chairs prior to the electronic uploads of the dissertation to ProQuest/UMI and Georgia State University’s Scholar Works. Written approval from the chair/co-chairs must be sent to the Ph.D. Program Office. Once the approval is received by the Ph.D. Program Office, the dissertation will not be published for the approved embargo period. The dissertation will be released for publishing after the embargo period ends.

**Graduation**

Students must apply for graduation through the Office of Graduation. The deadline for applying for graduation is usually several months before the anticipated graduation date, so students need to apply in a timely manner. There is no summer commencement. More information concerning applying for graduation can be found at registrar.gsu.edu/graduation. The associate director of the Ph.D. program will provide the candidate with information regarding clearance for graduation. An electronic copy of the dissertation must be submitted to the Ph.D. Program Office two weeks prior to the anticipated date of graduation.

**Time Limits for the Degree**

These time limits should be interpreted as the maximum amount of time students may take to complete each of the degree requirements. It is anticipated that most students will complete the requirements much earlier than the maximum time limits specified below:

- All coursework on the program of study and the preliminary examination in the Ph.D. in Business Administration program must be completed within four years from the semester of entry into the Ph.D. program.
- The Dissertation Committee must be appointed, the dissertation proposal defense must be held, and the student’s dissertation proposal must be approved within one year after completion of all parts of the preliminary exam.
- All requirements for the Ph.D. degree, including the dissertation, must be completed within seven years from the semester of entry into the Ph.D. program.
7010 General Information

7010.10 Office of the Dean

7th floor, Robinson College of Business Building
35 Broad Street
404/413-7000
robinson.gsu.edu

Richard D. Phillips, Dean
Nathan Bennett, Associate Dean for Faculty and Research
Sanjay Srivastava, Associate Dean for Strategy and Special Projects
Harley C. Ryan, Associate Dean for Curriculum and Teaching
David Forquer, Assistant Dean for Executive Programs
Anne Dries, Assistant Dean for Administration and Finance
Toby McChesney, Assistant Dean of Graduate Recruiting and Student Services
Tracy Widman, Assistant Dean for Assessment, Accreditation and Faculty Data Management
Jacobus Boers, Assistant Dean for International Engagement
Todd Maurer, Associate Dean for Sponsored Research

7010.20 Mission

The J. Mack Robinson College of Business of Georgia State University is committed to academic excellence through advancing the creation and dissemination of knowledge in business and management. Moreover, the college seeks to prepare its students for the practice of management with the knowledge and skills needed to remain effective in a global, culturally diverse, and technologically advanced world that is characterized by rapid change and complex interdependencies. As an academic unit of Georgia State University, the Robinson College seeks to add value to private, public, and not-for-profit organizations through excellence in its research, education, and outreach programs. The college enjoys a location that is distinctive among business schools and is committed to taking full advantage of its proximity to multinational corporations; entrepreneurial enterprises; federal, state, and city agencies; and not-for-profit organizations.

7010.30 Accreditation

The J. Mack Robinson College of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business. The accounting programs of the college also hold accounting accreditation granted by the AACSB. The Institute of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education. The Cecil B. Day School of Hospitality Administration is accredited by the Commission on Programs in Hospitality Administration.

7010.40 Administration of Master’s Programs

The Graduate Program Council, a committee composed of five faculty members, has overall responsibility
for master's admission criteria and for recommending changes in the degree requirements and academic regulations of the master's programs for approval of the faculty of the college. The Division of Master's Admissions and Advisement, (see below), works with the associate dean for academic initiatives and innovation, on behalf of the dean and the faculty, to consider changes to the master's programs.

7010.50 Units and Centers

The Robinson College of Business has 11 academic units: the schools of Accountancy and Cecil B. Day Hospitality Administration; the departments of Computer Information Systems, Finance, Managerial Sciences, Marketing, Real Estate, and Risk Management and Insurance; and the institutes of Decision Sciences, Health Administration, International Business, and W.T. Beebe Personnel and Employment Relations. The college also has the following centers:

- Center for Business and Industrial Marketing
- Center for the Economic Analysis of Risk
- Center for Ethics and Corporate Responsibility
- Center for Excellence in Brand and Customer Management
- Center for Health Information Technology
- Center for Health Services Research
- Center for International Business Education and Research
- Center for Mature Consumer Studies
- Center for Process Innovation
- Center for Research in Information Systems
- Center for Risk Management and Insurance Research
- Economic Forecasting Center
- Entrepreneurship and Innovation
- Herman J. Russell, Sr. International Center for Entrepreneurship
- Institute for Insight
- Korean-American Business Center
- Small Business Development Center

7010.60 RCB Directory of Academic Units

All locations are in the RCB Building, 35 Broad Street, NW, corner of Broad and Marietta streets. All phone numbers begin with 404/413-.

7010.70 Study Abroad Programs

The Institute of International Business promotes international learning experiences through a strong portfolio offering of study abroad programs. The study abroad programs range from two-to-three week intensive experiences to semester- and year-long programs. The programs span disciplines and geographic regions, affording students in all business disciplines the rich rewards of an international study experience. RCB currently offers programs in Argentina, Belgium, Brazil, China, France, Germany, Hungary/Czech Republic, Italy, South Africa, Turkey, and Switzerland. Semester- or year-long options are available in France, Germany, Italy, and Mexico. Other locations are possible through our partner institutions. Students must be in good standing with a minimum cumulative GPA of 3.0. Additional requirements vary by program. For individual program descriptions and application information, consult the Institute of International Business at iib@gsu.edu.

7010.80 Student Organizations

The Actuarial Students Association (ASA) is an official Georgia State University student organization whose mission is to serve actuarial science students by providing information, coordinating with companies and recruiters, and assisting students with passing actuarial exams and seeking employment. All of the students in the Actuarial Science program at Georgia State University—prospective, current, and past—have access to ASA resources. For more information, contact the Department of Risk Management and Insurance, 404/413-7500.

AIESEC: AIESEC is an international non-profit organization that strives for spreading cultural understanding by means of international exchange. Being the world’s largest student organization, AIESEC serves as an “international platform for young people to discover and develop their potential so as to have a positive impact on society.” Currently, AIESEC occupies over 1,100 universities spanning across more than 100 countries and territories. AIESEC encourages and helps students to discover both their social and professional potential. Through AIESEC, students have access to leadership positions, traineeship abroad opportunities and conferences. For more information, contact aiesec.gsu@gmail.com

Alpha Kappa Psi: This national professional fraternity aims to foster the study of business in universities, to encourage scholarship, to promote closer affiliation between the business world and students of business, and to further the development of high standards of business ethics. The Pi Chapter was organized at this university in 1917. More information about this general business fraternity can be obtained by calling 404/659-1492.

The American Marketing Association: The AMA, which is the world’s largest marketing organization, aims to serve the professional needs of marketing practitioners, educators, and students. By attending the programs, seminars, and workshops sponsored by the local AMA professional chapter, students can gain valuable firsthand knowledge of the marketing industry and how it works. Practical experience in research,
advertising, and other areas can be acquired through participation in the AMA student chapter's marketing-related projects. For more information about Georgia State University’s AMA chapter, call the Department of Marketing at 404/413-7650 visit www.gsuama.com

The Association for Computing Machinery: This foundation was founded in 1947 to advance the sciences and arts of information processing. It promotes the free interchange of information about the sciences and arts of information processing both among specialists and among the public in the best scientific tradition. The student chapter was organized at Georgia State in 1963. For more information, contact the Department of Computer Information Systems, 404/413-7360.

Beta Alpha Psi: This national honorary accounting, finance, and information systems fraternity has as its purpose to encourage the idea of service as the basis of a business profession; to promote the study of accounting, finance, and information systems; and to further the highest ethical standards. Graduate students may qualify for membership in Beta Mu Chapter of Beta Alpha Psi. For more information, contact the School of Accountancy, 404/413-7200.

Beta Gamma Sigma: Membership in Beta Gamma Sigma is the highest general scholastic honor a business student can receive at Georgia State University. Nominations for membership in this national honorary business fraternity occur during spring semester. New members are recognized at the college’s Honors Day ceremony. Master’s students who have completed their programs and are in the upper twenty percent of the master’s graduates during the preceding calendar year are eligible for nomination. All doctoral students who graduated during the preceding calendar year are eligible for nomination. For additional information, contact 404/413-7130.

The CIS Society: This organization of GSU students defines and creates new ways for CIS students to excel academically and to succeed professionally while establishing valuable relationships with their peers, faculty, and business leaders within the information technology community. Additional information may be found at www.TheCISsociety.org.

Delta Sigma Pi: This national professional fraternity aims to foster the study of business in universities, to encourage scholarship, to promote closer affiliation between the business world and students of business, and to further the development of high standards of business ethics. The Kappa chapter of Delta Sigma Pi was organized here in 1921. More information about this general business fraternity can be obtained by calling 404/659-8953.

The Entrepreneur Network: This organization of faculty, alumni, and students is dedicated to helping those seeking the personal and financial freedom offered by entrepreneurship. The Entrepreneur Network hosts an array of events; grants access to vast networks of advisors, investors, and entrepreneurs; and offers support in launching, growing, and exiting businesses. The organization welcomes all students and alumni with a passion for entrepreneurship. For more information, contact Robert Gemmell at 404/413-7542.

Eta Sigma Delta International Hospitality Management Society: Founded in 1978, this international honor society recognizes hospitality undergraduate and graduate students for outstanding academic achievement, meritorious service and demonstrated professionalism. An annual induction ceremony is held for graduate hospitality students with a minimum 3.50 GPA. Contact the School of Hospitality for additional information.
Finance Society, The: This organization welcomes all undergraduate and graduate business majors who are interested in the field of finance. The organization is dedicated to fostering the student’s knowledge of finance-related issues and job awareness by exposing members to some of the industry’s most prominent speakers, offering interactive workshops and assisting students make career contacts. For more information, contact the Department of Finance at 404/413-7310 or visit www2.gsu.edu/~wwwtfs/.

Financial Planning Association (FPA) Alliance: This organization is open to students and alumni of the GSU PFP programs, as well as interested visitors. The club serves as a focal point for discussion of leading-edge issues in personal financial planning as well as career trends and opportunities in the industry. The Alliance also provides students with a direct link to the premier professional association in personal financial planning. For additional information, contact the PFP Program at 404/413-7462 or visit www.rmi.gsu.edu.

Future Healthcare Executives: This student organization conducts seminars, projects, and other activities that provide student members with the opportunity for constructive involvement, recognition, and representation in the profession of health services administration. The chapter provides faculty and students in health services administration with a forum for professional dialogue. It also helps students enhance career and academic opportunities through its relationships with local and regional health services executive groups. For more information, contact the Institute of Health Administration, 404/413-7630. www.gsu-fhe.org

Gamma Iota Sigma: This is a national organization of students interested in the various risk management professions — insurance, company risk management, actuarial science, employee benefits, personal financial planning — and of related faculty. The organization exists to encourage superior moral and academic achievement and facilitate close interaction between risk management professionals and students. The Zeta Chapter of Gamma Iota Sigma welcomes all majors. For more information, contact the Department of Risk Management and Insurance at 404/413-7500.

Graduate Business Association (GBA): This organization serves all graduate business students. The GBA’s objective is to provide career education and professional development to its members through contact with the Atlanta business community while creating an enjoyable, social atmosphere. Programs and activities are planned to achieve these goals. All students are invited to become active members of the organization by joining one of the following committees: Membership, Professional Development, and Social. For more information, contact Graduate Recruiting and Student Services 404/413-7167.

GSU Campus Talkers/Toastmasters: This is an officially chartered club of Toastmasters International. The mission of the club is to provide a supportive and positive learning environment in which members develop their communication and leadership skills through more effective thinking, speaking, and listening. For specific meeting and contact information, check the club’s website at www.gsu.edu/gsutoastmasters.

National Association of Black Accountants: This national membership organization has the primary purpose of developing, encouraging, and serving as a resource for greater participation by African-Americans and other minorities in the accounting and finance professions. Student membership in NABA is available to undergraduate and graduate students who are interested in careers in accounting or finance. For more information, contact the School of Accountancy, 404/413-7200.
National Black MBA: This national membership organization has as its primary focus the networking of the MBA students. This organization fosters the development and encouragement of African Americans as well as other minorities in MBA programs and other graduate programs. For more information, please contact – Robinson College of Business 404.413.7167 for the current leadership.

NET Impact: We are the new generation of leaders who are committed to using the power of business to improve the world. Our Global Network of MBA’s, graduate students and professionals are interested in like-minded individuals to join the cause. For more information, please contact – Robinson College of Business 404.413-7167 for the current leadership.

Personal Financial Planning (PFP) Club: This organization is open to students and alumni of the GSU PFP programs, as well as interested visitors. The club serves as a focal point for discussion of leading-edge issues in personal financial planning as well as career trends and opportunities in the industry. For additional information, contact the PFP Program at 404/413-7462 or visit www.rmi.gsu.edu.

Phi Chi Theta: Phi Chi Theta: A National Business and Economics Fraternity- Become a member NOW or work for us later!! Founded in 1924, the Upsilon chapter at GSU was initiated in 1929, and this is the only GSU business and economics fraternity!!! Members share a passion for developing critical business skills, cultivating leadership talent, and enriching professional networks. Our organization prides itself on fostering new business leaders by creating value and professional growth for each member. Please contact Dr. Marta Szabo White in the Department of Managerial Sciences for additional information, 404/413-7555.

Real Estate Alumni Group: This organization is open to alumni as well as graduate and undergraduate students who are interested in all aspects of real estate and land utilization to provide a social and intellectual atmosphere for the study of this professional area. For more information, contact the Department of Real Estate, 404/413-7720.

The Society for Human Resource Management: This society is an organization open to all undergraduate and graduate students who are interested in the field of personnel/human resources. Practitioners address students on career topics at periodic meetings. Applications and additional information may be obtained from the W.T. Beebe Institute of Personnel and Employment Relations, 404/413-7170.

Tau Alpha Chi (T.A.X.) is an honorary professional association. It is intended for students who are seeking a career in tax accounting or for those accounting students who have a general interest in tax issues. The primary objectives of T.A.X. are (1) to provide members a forum for in-depth tax discussions, (2) to promote association with professional tax practitioners, and (3) to encourage scholastic and professional excellence in the field of tax accounting. For more information, contact the School of Accountancy, 404/413-7200.

Other Organizations: Information on other student organizations, fraternities, and sororities in which some graduate students may be interested is available from the Office of the Dean of Students, Suite 300, Student Center, 404/413-1515.
7020 Office of Graduate Recruiting and Student Services

Graduate Recruiting and Student Services

6th floor, Robinson College of Business Building
35 Broad Street
404/413-7167

Toby McChesney, Assistant Dean of Graduate Recruiting and Student Services

Allison Jacobs, Director of Graduate Recruiting

Charlene Adams Watkins, Assistant Director of Integrated Student Services Global Cluster

Alvin Carter, Associate Director of Integrated Student Services MBA Cluster

Winifred Akande, Associate Director of Integrated Student Services Financial Cluster

Kumar Swaminathan, Assistant Director of Integrated Student Services Modeling Cluster

Tiffany Ashby, Associate Director of Integrated Student Services Managerial Cluster

Naomi Leader, Associate Director of Shared Services

Shantina Knox, Assistant Director of Admissions

Ian Schonberg, Assistant Director of Advising

Tracy Kuepper, Assistant Director of Student Services

Mission

The Graduate Recruiting and Student Services staff supports the college’s mission of academic excellence by promoting the college to prospective applicants and facilitating the application process to admit qualified students to the master’s program. The Graduate Student Services office helps graduate students become knowledgeable about academic programs, pertinent regulations, and student services available through the college and university.

Services

This office provides admission counseling to prospective applicants and assistance in selecting a degree program that meets their academic and professional goals. This department provides academic counseling, including new student orientation, preparing evaluations of students’ academic programs and academic standing, assisting students with course selection and schedule revisions each semester, explaining catalog
regulations, and administering policies of the college and university.
All documents and other materials submitted by or for persons in connection with their consideration for admission become the property of this institution and cannot be returned at any time. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the Office of Graduate Recruiting and Student Services by the application deadline.

No guarantee regarding admission can be made before an applicant’s file is complete and has been reviewed by the Master’s Admissions Committee. Applicants must assume responsibility for all costs related to applying for admission regardless of the admission decision.

Admission is for entry in a specific program, major or status, and for a specific semester. A student who is admitted for one program, major, concentration or status may enter a different one only if, and after, formal approval has been given by the Master’s Admissions Committee of the college. An accepted applicant who wishes to defer enrollment to a future semester will be reevaluated according to the admission criteria in effect for the future semester. Reevaluation must be requested by the deadline for the desired semester of entry.

If an applicant does not complete enrollment for the semester in which admission is sought, the application must be renewed and submission of such additional credentials and information as may be requested by the Master’s Admissions Committee will be required. Incomplete application files are retained for a maximum of four years.

A student who earns master's-level credit and later becomes inactive may be required to re-establish his or her file. A transcript of graduate credit earned at Georgia State University will be maintained indefinitely by the Office of the Registrar.

Admission to flexible master's programs in the Robinson College of Business is possible for any term (fall, spring or summer). Admission to the cohort master’s programs in the Robinson College of Business varies each term; please refer to the program's website for term(s) of admission.

Listed below are the deadlines for submitting applications and all supporting materials. The deadlines are for three categories of applicants:

- All new applicants to submit applications for admission and all related materials including test scores
- Accepted applicants to request approval to change their semester of entry
- Denied applicants to request reconsideration

If the deadline falls on a weekend or university holiday, applications and materials will be accepted until the
next workday following the deadline. To be guaranteed a decision for the desired term of entry, applications and all supporting documents must be received by these deadlines.

International Applicants U.S. and International Deadlines:

<table>
<thead>
<tr>
<th>Semester Applying</th>
<th>Abroad</th>
<th>Applicants in the U.S.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall (Aug)</td>
<td>March 15</td>
<td>May 1</td>
</tr>
<tr>
<td>Spring (Jan)</td>
<td>August 15</td>
<td>October 15</td>
</tr>
<tr>
<td>Summer (June)</td>
<td>September 1</td>
<td>February 1</td>
</tr>
</tbody>
</table>

Applicants are encouraged to apply early, which has several advantages:

- Better chance of securing university housing (fall entry, U.S. applicants). International applicants who wish to secure university housing should complete their applications even earlier due to the additional time needed to process the financial documents required for I-20s/DS-2019s.
- Better chance of qualifying for assistance through the university’s Office of Student Financial Aid before time to register for first term.
- Increased likelihood of eligibility for early registration (U.S. applicants).
- Increased likelihood of receiving immigration documents in time to arrive on campus for international orientation and registration for desired term (international applicants).
- More time to make plans for attending graduate school if accepted or make alternative plans if not accepted.

7030.15 Application Procedures

Refer to the Executive M.B.A. Program, the Professional MBA, and the Global Partners M.B.A. Program later in this chapter for information on applying to those programs.

International Applicants: Applicants who completed all or part of their education abroad may be required to have their foreign credentials evaluated by Joseph Silny or Educational Credential Evaluators. Course-by-course evaluations, equivalence to an, World Education Services, accredited U.S. degree (or number of years toward completion), and grade-point average equivalents are required.

7030.20 Application Options

There are two ways to apply. These options can be accessed by clicking on “How to Apply” at the college’s website: robinson.gsu.edu/apply/index.html.

- Applications can be submitted electronically. This is the preferred method.
- The application packet can be downloaded as pdf files and printed.

Follow the online directions when applying electronically. The instructions given below (Sections 7030.25-7060.75) are for the paper application process.
7030.25 Self-Managed Applications

When submitting paper applications, the Robinson College of Business requires self-managed applications to its master’s programs. This means that the applicant collects all credentials other than test scores and submits them at one time to the Office of Graduate Recruiting and Student Services. A notice acknowledging receipt of the completed application packet is sent to the applicant by Graduate Recruiting and Student Services. Self-managed applications are required for initial applications, requests for reconsideration by previously denied applicants, and requests by previously accepted applicants to change semester of entry.

This procedure eliminates any question about whether the applicant’s transcripts or other documents have been received. It also requires careful planning by the applicant, well in advance of the deadline for the desired semester of entry. The closing dates for receipt of the completed application packet and all test scores for each of the academic semesters are listed in the “Application Deadline Dates for Master’s Degree and Certificate Programs and Nondegree Status” section in this chapter.

The application instructions provide complete information on preparing the self-managed application packet. Applicants must use current application forms. Applicants must not submit incomplete packets; this will result in a substantial delay in processing the application. The entire application and all attachments must be legible. The following sections discuss the documents required.

All inquiries about the application process should be made to the following:

Robinson College of Business
Office of Graduate Recruiting and Student Services
Georgia State University
P.O. Box 3988
Atlanta, GA 30302-3988
Phone: 404/413-7167
Fax: 404/413-7162
robinson.gsu.edu/prospective.html

7030.30 Master’s Application and Narrative Questions

The Application for Admission—Master’s Programs must be submitted by all applicants. It must be typed or printed legibly. In addition to asking for basic biographical and educational data, the master’s application also contains narrative questions. Answers to these questions must be typed. Evaluative interviews are not part of the application process for most programs, although an interview may be requested, so it is important that applicants complete their application in a thorough and thoughtful way. This is the opportunity for applicants to present themselves to the Master’s Admissions Committee. It provides a way to highlight qualities relevant to success in a graduate business program that may not be evident in test scores and past academic performance. The application also is used to establish the applicant’s record on the university’s computer record system and with the Office of the Registrar. It is important that this information is coded completely and correctly.

7030.40 Residency Information
Residence data will be used by the university’s resident auditor to determine if an applicant is a Georgia resident for fee-payment purposes. It must be completed by all applicants. (See the “Regents’ Requirements for Georgia Resident Status” heading in the Financial Information chapter earlier in this catalog.)

7030.50 Application Fee

You will be assessed a $50 application fee with your application for most programs. The application fee is nonrefundable and does not apply toward registration fees. For each subsequent online application that you submit, you will be assessed another application fee.

7030.55 Transcripts

One official copy of the transcript of all previous college work are required from each institution previously attended. Each set of transcripts must be submitted in a sealed envelope from the institution. If an institution’s policies do not permit it to send official transcripts to applicants for use with self-managed applications or if the applicant is applying online, the transcripts may be sent directly to Graduate Recruiting and Student Services using the address given previously under the heading “Self-Managed Applications.” In this instance, applicants should indicate on the application that the transcripts will be sent separately by the appropriate deadline.

Transcripts are required from each institution regardless of the length of time the applicant attended the institution or the applicant’s status while at the institution or whether the grades are listed on another institution’s transcript. EXCEPTION: Applicants who have attended Georgia State University must list their dates of attendance on their applications, but they do not have to request their Georgia State transcript. Graduate Recruiting and Student Services will obtain a record of the Georgia State coursework.

One copy of each of the transcripts will be given by Graduate Recruiting and Student Services to the registrar of the university of the student’s permanent file. A person who has attended Georgia State University as a degree-seeking student may submit only one copy of the transcripts from each institution attended prior to entering Georgia State University; two copies are required from all institutions attended after having last attended Georgia State University.

An applicant who may have been granted provisional admission pending completion of the undergraduate degree must file one official copy of a supplementary transcript showing the awarding of the degree as soon as it is available but at the latest the first day of registration of your second semester of enrollment.

7030.60 Admission Tests

The Graduate Management Admission Test (GMAT) and the General Test of the Graduate Record Examinations (GRE) are the primary admission tests for admission at the master’s level in the Robinson College of Business.

Applicants to the programs listed below may submit scores on either the GMAT or the General Test of the Graduate Record Examinations (GRE):
- Master of Business Administration
- Master of Business Administration/Master of Health Administration joint programs
- Master of Business Administration/Juris Doctor joint programs
- Master of Professional Accountancy
- Master of Actuarial Science
- Master of International Business
- Master of Science majors in Business Economics, Finance, Managerial Sciences
- Risk Management and Insurance
- Master of Science in Health Administration
- Master of Science in Real Estate
- Master of Science in Wealth Management
- Master of Taxation [Law Scholastic Aptitude Test (LSAT) scores may be submitted by MTx applicants only.]
- One Year MPA, One Year MS in Marketing, One Year MS in Information Systems, One Year MS in Finance, One Year Master of Global Hospitality Management, One year MS in Information Systems Audit & Control, EX MS MIT

Graduate Certificates in:

- Brand and Customer Management (see below)
- Accountancy
- Enterprise Risk Management
- Information Systems
- Real Estate
- Strategic Sales Leadership

This certificate program is only open to MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University. Enrollment status of applicants to this program will be verified.

**GMAT**

The GMAT is designed to measure aptitude for graduate study in business and is not a measure of knowledge in specific business subjects. Competitive scores are required for a successful application, and the level of competitiveness is subject to change throughout the year. Scores significantly below current averages are not likely to be competitive. GMAT scores may not be more than five years old at the desired semester of entry. Applicants whose scores do not meet this age limit must retake the GMAT and have the current scores sent to GRSS.

The GMAT should be taken as far as possible in advance of the desired semester of entry since official scores must be received by the stated deadline for complete applications. Scores from GMAT will be sent to Graduate Recruiting and Student Services two weeks after the test date. The “candidate’s copy” of the score report is not acceptable. Admission decisions will not be made based on the unofficial scores given to the test taker at the conclusion of the GMAT CAT.

In North America and most other parts of the world, the GMAT is administrated only as a computer-adaptive test (CAT). Prospective applicants who are located in a country that does not currently offer the
GMAT CAT and who cannot travel to another country to take the test should contact Customer Service at the Pearson VUE: GMATcandidateservicesamericas@pearson.com

The GMAT is administered worldwide by Pearson VUE instead of Educational Testing Service (ETS). The college’s code number for master’s-level programs is 5251.

The GMAT Information Bulletin and the GMAC Website (www.gmac.com) contain detailed information about the options for registering to take the test, the most up-to-date listing of test centers, and instructions for having scores sent to desired schools.

GRE

The GRE is administered worldwide and year round. The General Test is offered only on the computer in most locations. It is an adaptive test measuring verbal, quantitative, and analytical writing skills.

Updated information about the GRE computer-based and paper-based test centers and registration procedures may be found on the GRE Web site shown below.

GRE information may be obtained by contacting the Educational Testing Service in one of these ways:

GRE-ETS
P. O. Box 6000
Princeton, New Jersey 08541-6000, USA
Phone: 1-609-771-7670 (8:00 a.m.—7:45 p.m. EST)
Fax: 1-610-290-8975
E-mail: greinfo@ets.org
www.gre.org

GRE scores may not be more than five years old at the desired semester of entry. Applicants whose scores do not meet this age limit must re-take the GRE or take the Graduate Management Admission Test and have the current scores sent to Graduate Recruiting and Student Services.

Applicants taking the GRE must request that their scores be reported to Georgia State University. Those who have previously taken this test must request the Educational Testing Service to report their scores to Georgia State. The university’s code number is R5251. The “candidate’s copy” of the score report is not acceptable.

The GRE should be taken as far as possible in advance of the desired semester of entry since official scores must be received by the stated deadline for complete applications. Scores from the GRE CAT are sent electronically within 30 days of the test date.

7030.65 Interviews

Applicants who are strong candidates for the program to which they are applying will be invited to interview prior to their acceptance. Those selected to interview will be notified by a graduate recruitment coordinator. Applicants are therefore encouraged to provide complete answers to all questions asked on the
applications. Applicants who have questions about the information in this catalog concerning admissions, the programs, or related matters, however, are invited to contact Graduate Recruiting and Student Services at any time during the application process.

7030.71 Resume

A resume is a required part of the application for all master's-level programs in the Robinson College of Business.

7030.70 Letters of Recommendation

Letters of recommendation are not part of the admissions process for most programs. Applicants who wish to submit them, however, may do so. Applicants who choose to submit letters can use the online recommendation system or collect the letters from their recommenders in sealed envelopes; recommenders must sign their names across the sealed portion of the back of the envelope. Letters of recommendation must be submitted unopened with the rest of the application packet or submitted by the recommender using the online application system. They may not be reviewed by the applicant at any time. An applicant who does not wish to waive access to a letter of recommendation must arrange for the recommender to provide a copy.

7030.75 Immunization Certification

The Board of Regents of the University System of Georgia requires that accepted applicants who have never attended Georgia State University submit proof of immunization from measles, mumps, and rubella (MMR), varicella (Chicken Pox), tetanus, and diphtheria before being allowed to register. Forms for providing this certification to GSU Student Health Services are available online at www.gsu.edu/health/forms.html. Questions about the requirement may be directed to GSU Student Health Services (141 Piedmont Ave. NW, Suite D, Atlanta, Georgia 30303-2417, telephone: 404/413-1930, fax: 404-413-1955

The college can consider applications for master's-level admission before receiving this documentation. Applicants will be eligible only for conditional admission and may register for their initial semester prior to receipt of proof of immunization. However, registration for subsequent semesters will not be allowed until acceptable proof of immunization has been received.

Applicants born before January 1, 1957, are considered to be immune to measles and mumps, but the rubella immunization is required; this requires one vaccination.

Applicants born January 1, 1957, or later who have not already received the MMR immunization or who cannot document that they have received it must have two vaccinations at least 30 days apart. Applicants in this category should be aware of this time constraint. Sufficient time before registration may not be available to begin the immunization process after an admission decision is received.

U.S.-born applicants born after 1980 and all foreign-born applicants regardless of year of birth must show proof of vaccination, reliable history of varicella disease, laboratory/serologic evidence of immunity, or history of herpes zoster (shingles).
7040 General Admission Criteria

(Refer to the Executive M.B.A. Program, the Professional MBA, and the Global Partners M.B.A Program later in this chapter for information about admission criteria for those programs.)

The Master’s Admissions Committee, comprised of faculty representatives and admissions staff, determines the eligibility of each person who applies for master’s-level admission. Admission is competitive. Each applicant is evaluated individually and among the current group of candidates. In this evaluation, primary consideration is given to the applicant’s academic record, educational background, and test scores. Secondary consideration is given to the applicant’s educational objectives, narrative information, experience in business or government, professional activities, and character. The Master’s Admissions Committee prefers that applicants have some meaningful full-time work experience. These elements together must indicate a favorable prospect of success in graduate study for an offer of admission to be made. The college is also aware of the appropriate provisions of its accrediting agency, AACSB International—The Association to Advance Collegiate Schools of Business, in making admission decisions.

A bachelor’s degree in any field of study from a regionally accredited college or university is required for admission to all of the degree programs, or to the certificate program, of the Robinson College of Business. Only coursework from institutions with accreditation equivalent to that granted by the Commission on Colleges of the Southern Association of Colleges and Schools is considered in evaluating an applicant for admission.

In reviewing the past academic work of applicants, the Master’s Admissions Committee evaluates both the overall undergraduate GPA and the junior/senior GPA. In evaluating scores on the GMAT, the committee looks for a balance between verbal and quantitative scores in addition to considering the total score and the analytical writing score, because all of the master’s programs require strong communication skills and quantitative ability. Similar evaluations are made when GRE scores are submitted for applications to eligible programs.

In cases where the applicant has done additional accredited undergraduate work beyond the bachelor’s degree or has done accredited graduate work, a “most recent two-year GPA” will be calculated. This is defined as the most recent ninety quarter hours or sixty semester hours of coursework (to the nearest whole term). If this GPA shows more academic promise than the junior/senior GPA, it will be given more weight in the admission consideration.

Transcripts test scores, and other materials are received and evaluated by the Office of Graduate Recruiting and Student Services. Applicants are not required to submit a general certification of their state of health but are required to submit proof of immunization against measles, mumps, rubella, varicella, tetanus, and diphtheria (see 7030.75 above). Forms for providing this certification are available online at http://health.gsu.edu/general-information/103-2/. Also, the college reserves the right to investigate the health, character, and personality of each applicant.

Applicants are not required to submit a general certification of their state of health but are required to submit proof of immunization against measles, mumps, rubella, varicella, tetanus, and diphtheria (see 7030.75 above). Forms for providing this certification are available online at www.gsu.edu/health/forms.html. Also, the college reserves the right to investigate the health, character,
and personality of each applicant.

The Robinson College uses a combination batch and rolling admissions process. Admission decisions are communicated in writing to applicants as soon as possible after all application materials have been received and evaluated. Admission decisions cannot be given by telephone or email, nor can they be given to any person other than the applicant without a written release from the applicant to do so.

**Graduate Admissions – General**

Georgia State University welcomes applications from all qualified individuals regardless of race, color, sex, religion, creed, age, sexual orientation, gender, disability, veteran status or national origin. Admission is based on a number of factors including, but not limited to, an applicant’s academic record, test scores, experience, circumstances, good conduct and character. Admission is a competitive, selective process and meeting minimum requirements does not guarantee acceptance.

Absent extenuating circumstances, good disciplinary standing at previously attended colleges and universities is a condition of admission for all applicants. For purposes of admission, good disciplinary standing means that the applicant has no pending disciplinary charges, outstanding disciplinary sanctions or disciplinary issues that would prevent the applicant from re-enrolling at previously attended postsecondary institutions.

Applicants with a criminal and/or disciplinary history who are determined to be otherwise admissible for a respective term based on their academic record and other credentials are required to complete an admissions background review process before an admission decision is made by the university. Instructions for completing that review process are communicated to the applicant after the university has determined that the applicant is otherwise admissible for that term.

Omissions or misrepresentations on an application for admission are grounds for automatically invalidating consideration by, acceptance to and continuation at Georgia State. Applicants have a duty to update their application with Georgia State when information changes after application submission.

**Graduate Admissions Appeals**

The Chair of the academic department of the graduate program and the Associate Provost for Academic Programs are the President’s designees for purposes of hearing Graduate Admissions Appeals.

Applicants for graduate admission who are denied for reasons related to disciplinary/criminal history or falsification of application may appeal the denial to the Associate Provost for Academic Programs within twenty (20) calendar days of the date of the denial letter. The decision of the Associate Provost for Academic Programs is final.

Applicants for graduate program admissions who are denied admission due to academic ineligibility may appeal the denial to the department chair within twenty (20) calendar days of the date of the denial letter. The decision of the department chair is final.

**Notice to Applicant of Background Review Requirement**
The University requires applicants who have a criminal or disciplinary history to complete a background review. Please contact the Background Review Records Coordinator at 404-413-1515 for information regarding completion of the review process as soon as possible to ensure timely processing of your application.* The Background Review Records Coordinator will let you know what supplemental documentation you will need to provide to complete the process. You may be required to provide documentation such as:

1. a personal statement explaining the circumstances surrounding criminal or school disciplinary violations, and the current status of any charges and sanctions;
2. copies of criminal or school disciplinary records; and
3. a background check (if you have a criminal history);

All materials submitted as part of an application for admission become and remain the property of the university and will not be returned to the applicant, duplicated, or transferred to another institution.

Please note that a final admission decision cannot be made until you complete all requirements of the background disciplinary review process. *Applications may be withdrawn from review if the background review process is not initiated within two weeks.
7050 Master's Level Nondegree and Postgraduate Status

The master's level nondegree and postgraduate classifications are provided by the Robinson College of Business in recognition of the fact that education is a life-long process and that people may wish to enroll in one or more graduate courses at various times for personal or professional reasons without completing an entire degree or certificate program.

7050.10 Definition of Nondegree Status

Nondegree students are those who have followed the same admissions procedures and met the same admissions deadlines and criteria as applicants to the Master of Business Administration program, but they do not wish to pursue a graduate degree or certificate. These students are admitted to enroll in graduate courses of their choice in the Robinson College of Business. They may enroll for credit or for audit, according to the same criteria as any other student.

All master's-level nondegree students will complete the Business Communication Skills Requirement explained in this chapter. The regulations, policies, and procedures given in this chapter also apply to nondegree students.

7050.20 Definition of Postgraduate Status

Postgraduate students are those who have received a graduate degree from the Robinson College of Business and wish to reenter to take additional graduate courses in this college, but they do not wish to pursue another graduate degree. They may also enroll for credit or for audit.

7050.30 Responsibilities/Continued Enrollment

Nondegree and postgraduate students are responsible for meeting all academic regulations of the college and the university, including the requirements for maintaining good academic standing. It is therefore important that those students be familiar with the provisions of the graduate catalog in effect at the time of their enrollment in either status. Students may continue to enroll in nondegree or postgraduate status indefinitely, as long as at least a 3.00 cumulative GPA is maintained. No more than nine semester hours of coursework taken in nondegree or postgraduate status, however, may be subsequently applied toward a graduate degree or certificate of this college. (See below.)

Nondegree and postgraduate students must follow proper registration procedures each semester they wish to enroll; these classifications do not waive the responsibility to register correctly and on a timely basis.

Some academic units do not permit nondegree and/or postgraduate students to enroll in their courses due to the demand for the courses by degree-seeking students.

All prerequisites to any course taken must be met. These classifications are not intended as a means to circumvent proper course sequencing.

Neither nondegree status nor postgraduate status in the Robinson College of Business is provided for students who intend to qualify for any degree, certification, or other status in another college of Georgia
State University. Students with this goal must, at the first opportunity, contact the appropriate graduate admissions office for procedures and criteria for establishing graduate status in that college.

7050.35 Change of Program

Currently enrolled nondegree or postgraduate students who wish to change to degree/certificate status must file a new admissions application and application fee for the program desired.

Further information on application procedures for changing to degree or certificate programs in the Robinson College of Business may be found in 7080.12 below or obtained from the Office of Graduate Student Services.

Any credit earned while in nondegree or postgraduate status must be no more than seven years old at the time the student graduates if it is to be counted for credit toward the program to which the student is changing.

Grades from all attempts at all courses that are later counted toward degree or certificate credit will become part of the student’s GPA for that program. This means that the nondegree and postgraduate statuses are not intended as a means to make attempts at courses that are anticipated to be difficult with the intention of having only the final attempt count in the GPA for the degree/certificate program.
Transient Students and Cross Registration

Transient Students

Students enrolled in a graduate degree program at another accredited institution may take graduate courses in the college. A maximum of nine semester hours may be taken as a transient student unless approval for additional hours is requested by the student’s home institution. Transients who later enroll in an RCB master’s level program may apply a maximum of nine appropriate graduate credit hours earned in transient status toward the requirements of the RCB program.

To become a master’s degree-seeking student, a transient student must submit a new online admissions application, application fee, and the required additional credentials by the normal application deadline for the semester in which he or she wishes to begin degree work.

The transient application materials described in items 1-3 below must be submitted to the Office of Graduate Recruiting and Student Services.

1. The online admissions application
2. A fifty dollar application fee. This fee is nonrefundable.
3. A “Certification of Good Standing” completed by the home institution. This form is available from Graduate Recruiting and Student Services. After an appropriate official at the home institution has completed this form, it should be placed in an envelope, sealed with the official’s signature across the sealed portion of the envelope and returned to the applicant for submission with the other transient application materials.

Deadlines for receipt of all materials required for admission as a transient student in each semester are shown below:

<table>
<thead>
<tr>
<th>Desired Semester of Entry</th>
<th>Deadline Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall (August)</td>
<td>July 1</td>
</tr>
<tr>
<td>Spring (January)</td>
<td>December 1</td>
</tr>
<tr>
<td>Summer (June)</td>
<td>May 1</td>
</tr>
</tbody>
</table>

A transient student should come prepared with alternative courses approved by the home institution. Georgia State University does not guarantee that the courses desired will be offered or available. If, for example, courses are full when a transient attempts to register, the student will not be admitted to these classes.

A transient student must meet all prerequisites for Georgia State courses as defined by Georgia State University. Enrollment in some RCB graduate courses is monitored for completion of prerequisites. Examples are MBA prefixed courses and courses in accounting and finance. It is recommended that transient students have personal copies of their transcripts readily available to substantiate completion of prerequisites.

If a transcript is needed by the home institution, the student must make a request via the university website by using your pass code. The university does not automatically forward transcripts to the home institution.
A student who attends Georgia State University as a transient student normally will be allowed to attend only for the one semester for which acceptance was granted. A transient student who wishes to enroll for a subsequent semester(s) at Georgia State University must do the following:

1. File an Application for Reentry with the Office of Graduate Recruiting and Student Services for each subsequent semester.
2. Have the home institution submit another Certification of Good Standing to the Office of Graduate Recruiting and Student Services if the previous one has expired. These certifications expire after one calendar year or after completion of the number of courses for which approval was granted, whichever comes first.

Reentry must be approved by Graduate Student Services to be official. The college reserves the right to request a new Certification of Good Standing before the expiration date and/or a transcript from the home institution. If this information is deemed necessary, the transient student will be notified.

Transient students who apply for reentry are cautioned that approval may not be granted by GRSS if the grade-point average in the course(s) taken at Georgia State University is lower than 3.00, which is the minimum required to maintain good standing at the graduate level.

A complete reentry application and any required document must be submitted by the following deadlines:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Priority Deadline</th>
<th>Regular Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>February 1</td>
<td>June 1</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>October 1</td>
<td>November 1</td>
</tr>
<tr>
<td>Summer Semester</td>
<td>February 1</td>
<td>April 1</td>
</tr>
</tbody>
</table>

**7060.20 Cross Registration**

Georgia State University participates in the Atlanta Regional Consortium for Higher Education (ARCHE) cross registration agreement. Please see section 1320 Cross Registration earlier in this catalog for complete information. Students from other ARCHE institutions may enroll in graduate courses in the Robinson College of Business provided they meet the academic eligibility and other requirements of the agreement, and show evidence that any prerequisites for the RCB courses they wish to take have been met.
7070 International Students

See also the note at the beginning of the “Application Procedures” section earlier in this chapter for information specifically for international applicants applying from abroad.

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The institution subscribes to the principles of international education and to the basic concept that only through education and understanding can mutual respect, appreciation, and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus, because we believe in a cultural exchange program which will be beneficial to our own student body, to the international students involved, and to metropolitan Atlanta.

7070.10 English Proficiency

In addition to meeting the regular admission requirements, an international applicant whose native language is other than English must submit official scores on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) before admission can be considered.

Exceptions: Neither the TOEFL nor IELTS is required of U.S. naturalized citizens or international applicants who have received a degree from a regionally accredited U.S. institution. Documentation of citizenship status or proof of a U.S. degree must accompany the application.

The acceptable English proficiency scores for the TOEFL are at least a 610 (paper), 253 (computer, and 101 (internet) with a score of at least 25 in each area. To electronically send TOEFL scores to our office, please use the college’s TOEFL code number for master’s-level programs, 5251 and the college’s department code number, 02.

The acceptable English proficiency scores bands for the IELTS are 7 (Good User), 8 (Very Good User) and 9 (Expert User). Please send all IELTS scores to Georgia State University, J. Mack Robinson College of Business, Graduate Recruiting and Student Services, PO. Box 3988, Atlanta, GA 30302-3988.

An accepted international applicant whose test results indicate a lack of proficiency in English will be required to enroll in and satisfactorily complete Business Communication 7255. If BCom 7255 is assigned it becomes a formal part of the international student’s degree requirements and must be given first priority in registering for courses.

*This section was corrected on February 2016*

7070.20 Academic Credentials

Each applicant must present “official” credentials attesting to academic achievement as to level and performance. “Official” documents will vary from country to country, but should be original documents with authoritative signatures, seals, stamps, etc. Whenever possible, these should be sent by the institution responsible for issuing such documents. In cases where it is impossible for an applicant to have these
credentials sent from such institutions, the applicant should forward a duly “notarized” or “attested to” copy. The notarization should be done by a proper government official or proper representative of the American Embassy in the country.

When the documents are in a language other than English, they must be accompanied by translations. These translations must be the original form and contain acceptable notarization as described above for a copy of the original documents. Translations should be made by the American Embassy, the home country Embassy, or an appropriate government official. As a general rule, documents translated by the Office of the American Friends of the Middle East (AFME) and the Institute of International Education (IIE) will be acceptable.

Applicants who completed all or part of their education abroad may be required to have their foreign credentials evaluated by Joseph Silny (www.jsilny.com), World Educational Services (www.wes.org), or Educational Credential Evaluators (www.ece.org). If this evaluation is needed, the applicant will be notified by the Office of Graduate Admission and Student Services. All evaluations by outside services are subject to review by the Master’s Admissions Committee.

Course descriptions (syllabi) and any other information submitted in an attempt to qualify for exemption from course requirements must meet the same criteria for “official” documents as described above. These documents must be received directly from the institution and have a cover letter written on the institution’s letterhead mentioning the student’s name and certifying that the outline is comparable to the way the course was taught when the student took it.

7070.30 Financial Resources

Georgia State University requires international applicants requesting F-1 visa status to not only meet academic admission requirements, but also to document his or her ability to meet the financial requirements while in attendance. Applicants needing a student or exchange visitor’s visa are required to show financial capability for their full degree program and may be required to have an amount equal to the estimated cost of the first academic year on deposit at Georgia State University before a certificate of eligibility and an acceptance letter will be issued. Continuation of the visa after the first calendar year may require further proof and certification of the applicant’s financial ability.

Specific amounts are available from International Student and Scholar Services (www.gsu.edu/isss).

International applicants should be aware that the minimum financial resources requirement for a certificate of eligibility is based on an extremely modest budget and standard of living and do not include the cost of owning a car. Tuition expenses for Robinson College of Business students are based on the minimum enrollment required for graduate international students, which is nine hours for the fall and spring semesters and six hours in the summer. Students who plan to take 12 or 15 hours a semester must budget for the costs of additional tuition and books. For planning purposes, assume an additional $3,300 per course per semester up to the 15-hour plateau for tuition and additional $125 per course for books.

Financial aid from the university is not available for international students. International students may be considered for graduate assistantships (GRA), and if an assistantship is granted prior to the student commencing studies at Georgia State, the GRA stipend and tuition waiver may not be counted toward the
minimum financial resources required for issuance of the certificate of eligibility.

It is extremely unwise for students who receive assistantships not to continue to include full nonresident tuition in their budgets. No guarantee can be made that the assistantship will continue to be available from semester to semester.

7070.35 Full-time Course Load

The international student with a student visa is required to carry a full course of study in fall and spring semesters; the summer semester can be a vacation semester or a semester with a reduced course load unless summer is the student’s first term. Students who choose to enroll during summer semester must meet the minimum course load required for an assistantship if received during that semester.

A full course of study at Georgia State University is 12 hours for undergraduate students and nine hours for graduate students. International students will not be admitted as nondegree students.

See also the heading titled “International Student and Scholar Services” in the Student Life and Services chapter of this catalog.
7080 College Academic Regulations

7080.02 Students’ Responsibility

Graduate students must assume full responsibility for knowledge of the rules and regulations of the college and the university and of departmental, school, or institute requirements concerning their individual programs. Enrollment in a graduate program of this college constitutes students’ acknowledgement that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to read carefully Section 1300, “Academic Regulations” that applies to all of the university’s programs and the regulations specific to their RCB programs in this chapter. Students are also urged to read all of the requirements of their degree, program, or status that are presented in this chapter.

7080.04 Commitment to Master’s Programs

The Robinson College of Business provides a flexible schedule of courses for some of its master’s programs. The schedule attempts to accommodate the needs of a diverse student body, particularly with respect to students’ employment. However, the faculty of the college expects that students enrolled in a master’s program will bring to that program a commitment to complete their degree requirements in a timely manner. The faculty believes that maximum benefit will be derived from a program if students devote a period of concentrated study to the disciplines that constitute the master’s programs.

Before deciding to enroll in a master’s program of this college, students must examine seriously and realistically their abilities to adjust their personal and professional schedules to accommodate the challenge of graduate study. Students or applicants with questions about the commitment needed to complete the master’s programs should schedule an appointment with a Graduate Recruitment Coordinator in the college’s Office of Graduate Recruiting and Student Services.

The course load of master’s students may vary with the circumstances of the individual student each semester. Students normally enroll in three to 15 semester hours a term depending on the program. In determining each semester’s course load, students must balance other time constraints (work, family, civic, and other responsibilities) with the need to make reasonable and timely progress toward completion of the program within the five-year time limit.

If a student in good standing needs longer than five years to complete the master’s degree, they may petition for an extension of the time limit up to a maximum of seven years. Courses more than seven years old at the time of graduation expire and must be repeated or replaced with more current courses. Students who need more than five years to complete the degree requirements should schedule an appointment with an advisor in the Office of Graduate Recruiting and Student Services.

7080.06 Conduct

Students are expected to observe generally accepted standards of conduct and to assume personal responsibilities appropriate to potential business and professional leaders. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, the faculty, or other students. The formal policy of the university concerning student rights and obligations is under the heading “University Code of Conduct” in the General Information chapter of this catalog.
7080.08 Changing Semester of Entry

Admission to a master’s-level program is for the specific semester stated in the acceptance letter. Anyone who does not enroll for the semester for which acceptance was granted must notify the Office of Graduate Recruiting and Student Services so his or her records may be updated to a future semester and reevaluated according to admission criteria in effect for the future semester. Deadlines for notification to change to each semester are shown below:

Change Semester of Entry to Deadline Date
Spring (January) September 1
Summer (June) February 1
Fall (August) April 1

If the deadline falls on a weekend or a university holiday, requests to change semester of entry will be accepted until the next workday following the deadline.

7080.10 Catalog Editions

Normally, students will be permitted to graduate under the provisions of the graduate catalog in effect at the time of first enrollment. Student may choose to graduate under the provisions of a subsequent graduate catalog; that is, they may choose to change their “catalog edition.” Students who choose to do this must meet all provisions of the subsequent graduate catalog.

Robinson College students are required to change to the current catalog edition when they change programs/statuses or MS majors or after certain absences from the program, as explained in the next two headings below.

7080.12 Changing Majors, Programs or Status (Master's Level)

An M.B.A. student who wishes to change concentrations within the M.B.A. program may begin the process by notifying the Office of Graduate Recruiting and Student Services in writing, no later than the first week of their graduation term, and consulting the graduate catalog to determine requirements for the new concentration. Written notification of the decision will be provided.

An RCB master’s student who wishes to change majors within the M.S. program or to change programs or status (for example, M.B.A. to M.S., C.R.E. to M.S.R.E., M.P.A. to .M.S.I.S.A.C, M.S. to M.S.I.S.A.C, M.S.-MGS. to M.S.-H.R.M., nondegree to M.B.A.) may begin the process by notifying GRSS in writing. For programs that require faculty review as part of the admissions process, the file of the student will be sent to the appropriate faculty representative for a recommended admission decision. A student who has applied for admission to a new program will be notified in writing of the decision and, if approved, of any foundation courses required by the new program. Changes in M.S. major and changes in program require that students making such changes follow the program requirements of the graduate catalog in effect at the time of the change.

7080.14 Noncontinuous Enrollment and Requests to Reenter

Absences shorter than one calendar year: Students continue to be eligible to register until they have not
registered for one calendar year, except as noted below. Registration is defined as remaining registered until at least the end of the official late registration period. See the heading titled “Reentry Students” in the Registration and Reentry chapter earlier in this catalog.

Absence from the program is defined as not registering for graduate or relevant undergraduate courses or registering for such courses but not earning degree credit (minimum grade of C-), that is, earning D, F, W, or WF.

**NOTE:** Graduate students must register for at least a total of six semester hours of course work during any period of three consecutive terms (fall, spring, summer) until completion of degree. Failure to meet this standard for “continuous enrollment” will require the graduate student to apply for reentry.

**Absences of one calendar year or longer:** All students who wish to reenter one of the master’s-level programs or nondegree status after an absence of one calendar year or longer must meet the degree requirements and academic regulations of the graduate catalog current upon return, along with other reentry provisions as may be in effect.

Reentering students who have earned a minimum of 18 semester hours of appropriate credit at Georgia State University with a minimum GPA of 3.00 will be eligible for reentry without being required to meet current admissions criteria.

“Appropriate credit” means assigned foundation courses and/or courses that are applicable to the students’ current program.

Students who have not earned at least 18 semester hours of appropriate credit at Georgia State University with a minimum GPA of 3.00 must reapply and meet current admissions criteria. The provision to meet current admissions criteria includes submission of current scores on the Graduate Management Admission Test if the latest score on file will be more than five years old at the time of reentry.

**7080.16 Reentry Procedures**

Reentry applications must be submitted by the deadlines as shown for each term in Section 1100, “Reentry” earlier in this catalog. Reentry applications are available online from the Office of Graduate Recruiting and Student Services website.

Reentry applicants should request that the registrar of each school attended since their last enrollment at Georgia State University send an official transcript to the RCB Office of Graduate Recruiting and Student Services GRSS.

Transient students should refer to the heading titled “Transient Students” earlier in this chapter.

Graduate students normally reenter the same college and program/status in which they were last enrolled. Students who have attended Georgia State in both undergraduate and graduate categories may apply to reenter any undergraduate or graduate program/status in which they were enrolled. Exception: Students who have graduated and wish to reenter in order to take additional graduate level courses but not earn another graduate degree or certificate will reenter as post-graduate (PG) students.
RCB master's students who wish to reenter this college under a new RCB degree or major or who have graduated from one graduate program in RCB and who wish to return to take courses for another graduate degree or certificate must file a new application for admission rather than a Reentry form. Graduate Student Services will evaluate the request to change degrees or majors in accordance with the relevant regulations of the college.

Reentry approval is valid for the semester applied for. Students approved for reentry who do not register for the semester for which they applied, must submit a new reentry application for future semesters.

7080.18 Enrollment in Approved Courses

Students must not attend courses for which they have not officially registered and paid. Properly completing the registration process by the published deadline for each term is the responsibility of each student.

Students must enroll in courses that are part of the approved curriculum for the program to which they have been accepted. Students who do otherwise are subject to loss of credit and/or loss of eligibility to continue to register. Students in colleges other than the Robinson College of Business who take RCB courses may do so only if the courses are part of the program of study in the other college. For students to follow the program of study for an RCB degree or certificate, they must qualify for admission to the RCB program.

7080.20 Enforcement of Course Prerequisites

The faculty of the Robinson College of Business expects all students, regardless of status (degree seeking, nondegree, transient), to have satisfied the prerequisites for all courses for which they are registered. This expectation includes course prerequisites and computing skills prerequisites.

Satisfaction of prerequisites is enforced in the Robinson College of Business in varying ways. Prerequisites for some courses are monitored by the college or an academic unit once the term begins with violators withdrawn about the third week of the term, resulting in loss of fees and no opportunity to register for a replacement course. Other courses are monitored by the individual professors, who can also require violators to be withdrawn. The registration system will verify completion of prerequisites at the time of registration for selected courses. Students must assume this responsibility.

Prerequisites for each course are found in the Course Descriptions chapter of this catalog. The current catalog must always be consulted before registration to determine course prerequisites. Questions about prerequisites can be directed to the advisors in the Office of Graduate Recruiting and Student Services.

7080.22 Day/Night Programs

There are no differences in admission requirements and degree requirements for students based on whether classes will be taken during the day or at night. The master's programs (with the exception of the M.A.S. program) may be completed entirely at night. Students may take only night classes or a combination of day and night classes, whatever is suitable for their particular circumstances each semester.

7080.24 Separate Graduate and Undergraduate Programs
Except for the circumstance described in the regulation below titled “Policy on Allowing Undergraduates to Take Graduate Courses,” the graduate and undergraduate programs of Robinson College are entirely separate and only those persons who have been admitted to a graduate status may enroll in courses numbered 6000 or higher. No undergraduate course credit, including that obtained in required background work for a master’s degree, may be applied toward any of the master’s-level programs.

7080.26 Policy on Allowing Undergraduates to Take Graduate Courses

Undergraduate students with a cumulative grade-point average of 3.50 or higher who have at least 18 semester hours of degree credit at Georgia State University and who are in their senior year may petition to take up to two graduate courses in the Robinson College of Business in lieu of undergraduate courses. Students interested in petitioning should contact the RCB Office of Undergraduate Academic Assistance for a statement of restrictions and procedures pertaining to this policy.

7080.28 Double Concentrations and Multiple Master’s Degrees

An M.B.A. student who wishes to qualify for an additional concentration may do so successfully by completing 12 semester hours of appropriate coursework (See “Regulations for the M.B.A. Degree” for the list of M.B.A. concentrations and their requirements and for information on career paths that can lead to dual concentrations.) For double concentrations within the M.B.A. program, electives can be counted toward both concentrations to the extent they are acceptable in both. [NOTE: The Graduate Program Council may establish minimum hours requirements for students earning multiple degrees.]

The earning of the second concentration will be confirmed by letter from the Office of Graduate Recruiting and Student Services, upon written request by the student, only if the additional courses are completed before any of the student’s M.B.A. credit will be more than seven years old. The grades in the additional hours must not cause the student’s cumulative GPA to fall below 3.00. All grades must be “C-” or higher.

A student may take a particular master’s degree only once (except as noted below). However, a student who holds a master’s degree of this college may qualify for a different master’s degree of this college. To so qualify the student must meet all admission requirements in effect for the second degree and thereafter fulfill all requirements for the second master’s degree. Along with all other requirements, the student must complete a minimum of 18 additional semester hours of appropriate credit in residence at Georgia State University for the second and each subsequent degree with appropriate grades and in coursework that has not been applied in satisfaction of the requirements of any other degree. This minimum residence requirement is permitted only when all courses to be applied toward the subsequent degree will be no more than seven years old upon completion of all degree requirements. If the seven-year time frame is not met, the minimum residence requirement for a second (or subsequent) master’s degree is 24 semester hours with appropriate grades and in coursework that has not been applied in satisfaction of the requirements of any other degree. Once the 24-semester-hour residency is met, students may transfer approved course work completed elsewhere in accordance with the college’s standard transfer-of-credit regulations.

Courses taken to earn an additional MBA concentration must be separate from any courses taken to meet the minimum residency for an additional degree. This applies whether the courses for the additional designations are taken before or after the first degree has been awarded. The final decision about the minimum course credit required for additional concentrations, and/or degrees rests with the Robinson College of Business.
A student who holds an M.S. degree from this college and wishes to earn an M.S. in another major must follow the provisions for qualifying for a different master’s degree (described earlier in this section).

7080.30 Standards of Performance

The dean or the associate dean for master’s programs of the college may require that a student withdraw from a particular course or courses, from a master’s program, or from the college because of unsatisfactory academic work or for other adequate reason. To continue in a master’s program, a student must make reasonable and timely progress in terms of grades and courses toward the degree or certificate concerned. The student’s progress may be reviewed each semester.

As a result of this review, any student whose scholastic performance does not indicate appropriate progress may be required to reduce the course load or may be required to withdraw from the program.

7080.32 Scholastic Discipline: Master’s Programs and Status

Each student admitted to a master’s program or status of the college must maintain a grade-point average (GPA) in the program of 3.00 or higher in all attempts at all courses numbered 6000 and higher. (This means that the original grade in a course that is repeated is not dropped from the cumulative GPA for purposes of determining good academic standing.) Also included in this GPA, except as noted below, are all Robinson College of Business courses that the student takes (if any) which are in addition to those in the degree/certificate program. Therefore, a student who wishes to take a course for personal enrichment or for other purposes not related to pursuit of the degree/certificate should audit the course.

Grades earned in other graduate programs of the Robinson College of Business from which the student has graduated or any grades earned at any time in graduate courses of other colleges of the university do not affect the cumulative GPA for the current program, unless they apply toward the current program. Grades in courses in areas where higher-level coursework has already been completed will not affect the cumulative GPA for the current program (example: taking MBA 8025 after MBA 8115). These grades are, however, included in the cumulative GPA which is calculated by the university and recorded on the student’s official transcript. The calculation on the transcript includes all attempts at all courses numbered 5000-level and above taken at the university. All references to “cumulative GPA” in the scholastic discipline policy are to the cumulative GPA in the student’s current program (except as noted in the next paragraph).

Students who change master’s-level programs within the Robinson College of Business (as opposed to completing one program then entering a second program) are responsible for all graduate grades earned in the college. That is, students with less than a 3.00 GPA in one master’s-level program or status cannot automatically return to good academic standing by changing programs or status.

Questions about calculation of the GPA for determining academic standing should be directed to the Office of Graduate Recruiting and Student Services. The interpretation of the college’s scholastic discipline policy as it applies to unusual situations is the responsibility of the dean of the college as represented by Graduate Recruiting and Student Services.

Each student whose GPA for a semester is below 3.00, regardless of course load, will be on “scholastic warning.” Upon completion of the next semester of relevant graduate coursework, the performance of a student on warning will be evaluated in the following way:
1. If the semester GPA is at least 3.00 and the cumulative GPA is at least 3.00, then the student will return to good standing.

2. If the semester GPA is less than 3.00 and the cumulative GPA is less than 3.00, then the student will be suspended from the university for a minimum of one semester.

3. If the semester GPA is less than 3.00 but the cumulative GPA is at least 3.00, then the student may continue to enroll but will continue to be on warning until a semester GPA of at least 3.00 is achieved, at which time he or she will return to good standing, or until subsequent semester GPAs bring the cumulative GPA below 3.00, at which time he or she will be suspended from the university for a minimum of one semester.

4. If the semester GPA is at least 3.00 but the cumulative GPA is less than 3.00, then the student will remain on “scholastic warning.” The student may continue to enroll on warning, provided the semester GPAs are at least 3.00, until the cumulative GPA is brought to at least 3.00; at this time he or she will return to good standing. If any semester GPA is less than 3.00 before the cumulative GPA has been brought to 3.00, the student will be suspended from the university for a minimum of one semester.

After a suspension of at least one semester and if the time limit for completing the program has not expired, the student may apply for readmission. Application for readmission must be made to the Office of Graduate Recruiting and Student Services not later than six weeks prior to the first day of registration for the semester in which reinstatement is sought.

A student who is readmitted from suspension will be on probation. If any semester GPA is less than 3.00 before the student’s cumulative GPA reaches at least 3.00, the student will be permanently excluded from taking graduate courses in the Robinson College of Business. When the cumulative GPA is at least 3.00, the student will then return to good standing. Another suspension after returning to good standing also will result in permanent exclusion.

See the next section for grade requirements for graduation.

**7080.34 Grade Requirements for Graduation**

To graduate with a master’s degree or graduate certificate from the Robinson College of Business, students must have a cumulative GPA of 3.00 or higher in all attempts at all courses numbered 6000 and above taken at Georgia State University (See Sections 1330 Cumulative Grade Point Average and 1336.15 Graduation Requirements). In addition, students must have a cumulative GPA of 3.00 or higher in all courses applicable toward the program from which graduation is planned. Also included in this GPA are grades earned in all graduate RCB courses taken at GSU, including those taken while in any master’s program(s) or status which the student began but did not complete. Exception: grades in courses which are more than seven years old, while part of the cumulative GSU GPA, will not be factored into the College’s GPA requirement for graduation. No grade below a grade of C- is acceptable. No course in which a grade of B or higher has been earned may be repeated for degree credit.

Questions about calculation of the GPA for graduation should be directed to the Office of Graduate Recruiting and Student Services. The interpretation of the college’s GPA requirement for graduation as it applies to unusual situations is the responsibility of the dean of the college as represented by the Office of Graduate Recruiting and Student Services.
7080.38 Residency Requirements

The Robinson College of Business defines residency in a master’s program as being enrolled in courses that are numbered 8000 or higher, that are appropriate for the program, and that have not been counted toward another graduate degree of this college. The minimum residency requirement for each degree program except the Master of Science in Real Estate (MSRE) is 24 semester hours. The minimum residency requirement for the certificate program in real estate is nine semester hours; the MSRE minimum is 30 semester hours. The minimum residency for the certificate program in enterprise risk management is 18 semester hours of graduate course work.

In the Master of Business Administration program, at least one half the concentration, as appropriate, must be completed in residence to be designated as having completed the concentration in a specific field; otherwise the general business concentration is awarded. In the Master of Science program, at least one half of the major must be completed in residence.

7080.40 Transfer of Credits

Transfer of credit in master’s programs of this college is defined as receiving graduate degree credit for a course completed at another institution, thereby reducing the number of graduate courses to be taken at Georgia State University. Transfer of credit is distinguished from exemption from MBA-prefixed courses. Transfer of credit will be approved only under the following conditions:

1. The course must have been completed at an institution whose master’s programs were accredited by AACSB International—The Association to Advance Collegiate Schools of Business at the time the course was taken.
2. The course must have been restricted to graduate students only.
3. A grade of B or higher must have been received in the course. Exceptions to the minimum grade requirement will be reviewed on a case by case basis for students participating under terms of international dual degree agreements.
4. The content of the course must correspond to that of a Georgia State course required or permitted in the student’s program.
5. Credit completed before enrollment in the current Georgia State program will be considered if it will not be more than seven years old at the time the student graduates.
6. Credit completed elsewhere after enrollment in the current Georgia State program will be considered for transfer credit if it is within the time limit allowed for completion of the current program.

It is also possible to receive transfer credit from another graduate program of Georgia State University, including previously completed Robinson College programs and programs from other colleges/schools in the university. These regulations are written for the usual transfer credit case, which is credit from another institution. The Office of Graduate Recruiting and Student Services should be consulted about transfer credit from other Georgia State programs.

A written request for consideration of transfer credit completed before admission must be submitted by the student concerned during the first semester of residence here. The request must indicate the specific course(s) for which transfer credit is sought. A copy of the other institution’s catalog must be submitted to verify that condition 2 (listed above) has been met; a course outline for each course must be submitted to
verify that condition 4 has been met; if the course(s) were taken after application materials had been filed, an official transcript of the coursework must be sent directly from the other institution to Graduate Recruiting and Student Services to verify that conditions 3 and 5 have been met. Requests for transfer of graduate credit cannot be processed until all necessary information has been received.

Students who have met the residency requirement for their program and who wish to take graduate courses at another institution to complete the coursework for their Georgia State degree should provide the information listed above (except the transcript) to Graduate Recruiting and Student Services before enrolling at the other institution. Advance approval will ensure that the transfer credit can be granted if a grade of B or higher is earned in the course(s) and the coursework is completed within the time limit allowed for the program. Such students should plan to graduate at least one semester after the quarter/semester in which the last course to be transferred has been taken. This will allow adequate time for the necessary transcript to be received and for the transfer credit to be processed. (See the “Graduation Fee” heading in this catalog for details about applying to graduate.) A letter certifying completion of degree requirements and stating the date the degree will be conferred can be furnished to the student by the Graduation Office.

7080.42 Information Technology Access and Skill Requirements

Access Requirements: Because information technology is an integral part of business decision making, courses in the Robinson College of Business frequently incorporate assignments that require computing skills. Consistent with university policy (available at http://technology.gsu.edu/about/technology-policies/), the Robinson College requires students to be responsible for providing computer and Internet access for all RCB courses and programs.

Hardware and Software Requirements: Georgia State has standardized on the Microsoft Office Suite in the student computer labs. Students may consult the university’s Office of Student Financial Aid for information about possible funding opportunities for computer and Internet access expenses.

Skill Requirements: Although students can expect to enhance their information technology skills as they work toward their degrees, the college expects all students to have certain basic skills before enrolling in any business course. These skills are defined as Basic Microcomputing Skills, Word Processing and Presentation Skills, and Basic Internet Usage and are described below in the Computing Skill Prerequisites (CSP) 1, 6, and 7 definitions. When courses require additional computing skills, these CSPs are listed by number in the catalog course descriptions.

The CSPs listed in the Course Descriptions chapter of this catalog for a particular course are required for all sections of the course. Students must be proficient at the level indicated in the skills definition (see below) for each CSP listed in the catalog for individual courses. Students found to have insufficient CSP expertise can be unenrolled from the course.

7080.46 Computer Skills Prerequisites (CSPs) Definitions

CSP 1 - Basic Microcomputing Skills: Understand the PC and its components; turn on the PC; use command-oriented, windows-based, and LAN operating environments to accomplish tasks such as formatting floppy disks, creating and navigating through directories and subdirectories, creating and deleting files, copying and renaming files, using help screens, loading application software, exiting from
application programs and operating environments in an orderly manner, and using appropriate measures to check for and prevent the spread of computer viruses.

**CSP 2- Basic Microcomputing Spreadsheet Skills:** Load the spreadsheet software; create, organize, and navigate through spreadsheets; format the spreadsheet or a block of cells; enter and edit formulas, values, and text; copy, move, and protect cells; insert and delete columns and rows; save and retrieve files; print spreadsheets; use financial, statistical, and mathematical functions such as totaling and averaging of rows and columns; create and print charts and graphs; create data tables; invoke existing macros; and use help screens.

**CSP 3- Advanced Microcomputer Spreadsheet Skills:** Use advanced spreadsheet features such as database commands and functions; create macros; create menu systems and develop customized applications.

**CSP 4- Basic Microcomputer Database Skills:** Load database software, create databases; enter and edit data; add and delete records; list, query, and generate reports using the database; use help screens.

**CSP 5- Advanced Microcomputer Database Skills:** Link databases through keys; create input screens; develop customized applications.

**CSP 6- Word Processing and Presentation Graphic Skills:** For word processing: load the word processing software; create, format, edit, and save documents; copy and move text; adjust margins, indents, and line space; and adjust fonts and styles. For presentation graphics: Load the presentation graphics software, choose and modify templates; choose and modify slide layouts; insert slides, handout, and note masters; change color schemes; apply effects, animation, and multimedia to slides; run a slide show. For both: Import tables, clip art, and graphs from other applications; use spell-checking; load additional toolbars; use help screens.

**CSP 7- Basic Internet Usage:** Send and receive email messages including attachments of files; transfer files with FTP, compress and uncompress files with utility programs; use search engines to locate documents and find information on the Web; navigate the Web with a browser including copying/pasting/saving Web information; download and set up Web browser plug-in programs such as electronic document readers and audio/video players; use Web-based clients such as library catalog systems to find specific information.

**CSP 8- Advanced Internet Usage:** Create formatted *.html pages with tags including links within and between pages; publish pages to a Web site; create image files and embed them in *.html pages.
The MBA program is designed for individuals with work experience who aspire to organizational or entrepreneurial leadership positions. The program enhances general management abilities and provides an opportunity to place emphasis on one or more functional areas of expertise. The primary objectives of the program are for students to develop and integrate: (1) analytical skills for decision-making that incorporate global, ethical, and culturally diverse dimensions; (2) skills in assessing organizational performance and developing approaches for improvement; (3) leadership skills; and (4) interpersonal skills that contribute to teamwork.

### 7090.10 Orientation

All entering Flexible Master’s students are required to attend the mandatory Master’s Orientation in their first semester of enrollment. The specific dates for the Master's Orientation can be found here: Master’s Orientation information. The objectives of the orientation are:
- To develop a sense of community and identification for students.
- To demonstrate how teamwork enhances learning.
- To begin the process of program planning and career planning.
- To introduce Robinson master’s students to the available resources provided by the college and how to use those resources effectively.

### 7090.20 Regulations for the Degree

The Master of Business Administration degree is awarded upon completion of a prescribed program ranging from 39 to 54 semester hours of credit, depending on the academic background of students and on options selected by the students. The M.B.A. program is developed on the assumption that students enter the program with certain skills:

- **Computing skills;** Because computers are an integral part of business decision making, courses in the Robinson College of Business frequently incorporate assignments that require computing skills. Expectations are described in section 7080.42.
- **Algebra skills;** MATH 1111 (college algebra) or equivalent mathematical knowledge is assumed for all entering M.B.A. students. Students are expected to self select into MATH 1111 or take other appropriate steps if they do not have a working knowledge of college algebra.

### 7090.30 Degree Requirements

The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.B.A. program.

The Master of Business Administration degree is awarded upon completion of the program prescribed in this section below. The time limit for completing the M.B.A. program is five years.

**MBA Course Requirements**

The course requirements for the M.B.A. program and the sequence of courses follow. Note that
Cornerstone Core courses may be taken concurrently. All other courses must be taken after MBA 8000 Managing in the Global Economy and MBA 8025 Financial Statement Analysis.

Cornerstone Core Courses (10.5-16.5 hours):

These courses provide a solid intellectual grounding within an integrative framework that sets the stage for the entire MBA curriculum. Managing in the Global Economy cannot be waived. Waiver of Strategic Communication will be granted only under exceptional circumstances which must include a high degree of previous education and proof of significant experience in the communications area. Financial Statement Analysis may be waived if the student has an undergraduate degree in accounting with a 3.0 or better GPA and current experience in the area. Legal Environment: Ethics and Corporate Governance can only be waived by those students already possessing a JD degree. Student may waive no more than 6 hours in this area. Once a course is waived, it may not be taken later for credit.

- MBA 8000 Managing in the Global Economy (3)
- MBA 8015 Strategic Business Communication (3)
- MBA 8025 Financial Statement Analysis (3)
- MBA 8030 Legal Environment: Ethics and Corporate Governance (3)
- MBA 8040 Data Driven Decision Making (3)
- MBA 8045 Analytics Experience (1.5)

Functional Core Courses (10.5-16.5 hours):

The functional core offers curricular breadth. Up to 6 hours (two courses) in this category may be waived (see Section 7090.60 for details), based on an undergraduate business degree from an AACSB or EQUIS accredited institution with a 3.0 or great GPA in the major and current work experience in the area. Once a course is waived, it may not be taken later for credit. MBA 8000 and MBA 8025 are prerequisites for every Functional Core course, and MBA 8015, MBA 8030, MBA 8040, and MBA 8045 are co-requisites.

- MBA 8115 Managerial Accounting and Control Systems (1.5)
- MBA 8125 Digital Innovation (3)
- MBA 8135 Corporate Finance (3)
- MBA 8145 Strategic Marketing Management (3)
- MBA 8155 Operations Management (3)
- MBA 8165 Leadership and Organizational Behavior (3)

Capstone Core Course (3 hours):

This course integrates a broad span of knowledge gained from the required curriculum. This course cannot be waived. Registration will be granted once students have completed all six MBA 8100 level courses.

- MBA 8820 Global Competitive Strategy (3)

8000-Level Elective Courses (18 hours):

Electives include 12 hours in a concentration which permit the student to personalize core competency and customize intellectual development. Electives are to be from the set of RCB 8000-level courses or from the
Department of Economics in the Andrew Young School. Students wishing to take electives outside that set must apply for special permission.

7090.40 Concentrations

Concentrations are available in the following areas:

- Accounting
- Actuarial Science
- Business Analysis
- Business Economics
- Entrepreneurship
- Finance
- Health Administration
- Health Informatics
- Hospitality Administration
- Human Resource Management
- Information Systems
- International Business
- Managerial Sciences
- Marketing
- Operations Management
- Organization Management
- Real Estate
- Risk Management and Insurance

Students should contact individual departments regarding requirements for obtaining concentrations not detailed below.

Accounting

Stephen Claghorn, Coordinator, 404/413-7238, sclaghorn@gsu.edu

The mission of the accounting concentration in the MBA program is to prepare individuals to become leaders in financial reporting and assurance services in public accounting or industry. While the MBA program enhances general management abilities, the accounting concentration focuses specifically on (1) financial reporting skills in a global economy, (2) assurance service skills in a variety of organizational contexts, and (3) financial analysis skills.

The concentration in accounting requires students to have completed courses equivalent to the following with a C- or better grade:

- ACCT 4111 Intermediate Accounting I
- ACCT 4112 Intermediate Accounting II
- ACCT 4113 Intermediate Accounting III
- ACCT 4210 Cost/Managerial Accounting
• ACCT 4310 Accounting Information Systems  
• ACCT 4510 Introduction to Federal Income Taxes  
• ACCT 4610 Introduction to Assurance Services  

The concentration in accounting requires 12 semester hours as follows:

• ACCT 8130 Advanced Accounting Topics  
• ACCT 8420 Special Topics in Financial Accounting  
• ACCT 8610 Advanced Topics in Assurance Services  
• ACCT 8700 Financial Statement & Business Analysis

NOTE: Generally students who concentrate in accounting want to sit for the CPA exam. To do so in Georgia they must have 20 credit hours in upper level (above the 2xxx level) accounting classes. In order to earn the CPA license in Georgia they must (in addition to successfully completing the examination in accordance with Georgia’s requirements, and having one year of appropriate work experience), have earned a total of 30 credit hours in upper level accounting classes.

Actuarial Science

Eric Ulm, Coordinator, 404-413-7485, eulm@gsu.edu

The MBA program provides the skills needed by future business leaders and future management consultants, such as creative decision-making, leadership, and the ability to work as a member of a team. The actuarial science concentration focuses on mathematical modeling. Qualified students who wish to acquire both sets of skills should enroll in the MBA program with a concentration in actuarial science. Applicants will be required to meet the admission requirements for both the MBA and the MAS programs.

The concentration in actuarial science requires students to have completed courses equivalent to the following with a minimum grade of C. These courses are described in the Course Descriptions chapter of the Georgia State University Undergraduate Catalog. This catalog is available on the web at catalog.gsu.edu.

• MATH 4751 Mathematical Statistics I  
• MATH 4752 Mathematical Statistics II  
• AS 4230 Theory of Interest

Students with undergraduate actuarial science courses required who have financial aid should refer to “Courses Eligible to Count Toward Graduate Students’ Financial Aid” in the Financial Information chapter before registering for the first time with graduate status.

The concentration in actuarial science requires 12 semester hours of courses selected from the following list:

• AS 8340 Life Contingencies I  
• AS 8350 Insurance Mathematics (Life Contingencies II)  
• ECON 8740 Applied Statistics and Econometrics  
• AS 8430 Loss Distributions and Credibility Theory  
• AS 8520 Principles of Property and Casualty Ratemaking  
• AS 8810 Actuarial Science Graduate Seminar
Business Analysis

Satish Nargundkar, Coordinator, 404/413-7541, snargundkar@gsu.edu

The overall goal of the concentration in business analysis is to provide the student with specialized training in the use of advanced analytical techniques for managerial decision making. These areas span statistical data analysis, management science, business intelligence, and decision support systems. This concentration also prepares students for Six-Sigma certification.

The contextual topics include data warehousing, data mining, online analytical processing, enterprise resource planning, and supply chain management. This concentration prepares the student for careers in business analysis, financial analysis, marketing analysis, operations analysis, strategic analysis and corporate planning. The student will be prepared for the utilization of information technology for corporate decision making.

The required courses for the concentration (nine semester hours) follow:

- MGS 8020 Business Intelligence
- MGS 8040 Data Mining
- MGS 8150 Business Modeling

For electives, select an additional three semester hours (1 course) for a concentration from the following list.

- MGS 8110 Applied Regression Analysis
- MGS 8140 Management Science Modeling
- MGS 8170 Statistical Modeling
- MGS 8710 Operations Planning
- MGS 8760 Quality Management

Electives can be substituted by other relevant courses through prior approval by a faculty adviser.

Business Economics

Jon Mansfield, Coordinator, 404-413-0151, Jon.Mansfield@gsu.edu

5th Floor, Andrew Young School of Policy Studies Bldg. room 519

Electives to constitute a concentration (12 semester hours) in business economics are chosen from any of the courses listed below for which prerequisites have been satisfied (all courses are 3 hours unless otherwise noted).
Entrepreneurship

Pamela Barr, Coordinator, 404-413-7527 pbarr3@gsu.edu

Concentration in entrepreneurship for an MBA student requires completion of 12 semester hours of courses as described below. Some of these courses have prerequisites.

MGS 8500 may be exempted with documentation of having earned a grade of B or higher in a graduate or undergraduate introductory course in entrepreneurship or with documentation of having started a new venture no more than 10 years prior to entering the MBA program. If exempted, MGS 8500 must be replaced by a second course from the specified list below. It is suggested that courses with higher numbers be taken later in the student’s program of study.

Take the following three courses, unless MGS 8500 is exempted:

- MGS 8500 Entrepreneurship and Enterprise
- MGS 8590 Field Study in Entrepreneurship
- MGS 8510 Business Plan Development

Take one of the following courses, or take two if MGS 8500 is exempted:

- IB 8100 International Entrepreneurship
- IB 8680 Technology and Global Competition
- MGS 8420 Enhancing Leadership Skills
- MGS 8425 Coaching for Leadership
- MGS 8430 Negotiation

An MBA Career Path in International Entrepreneurship is an additional option. See the descriptions of career paths later in this section.

Finance

Alfred Mettler, Coordinator, 404-413-7327, mettler@gsu.edu
The following course is required for a finance concentration:

- FI 8000 Valuation of Financial Assets

The Department of Finance encourages all students pursuing a finance concentration to take FI 8000 early in their program since it is a prerequisite for all electives that count toward a finance concentration except FI 8020, Financial Analysis and Loan Structuring, and FI 8040, Survey of International Finance. To complete a concentration, nine additional semester hours of 8000-level finance courses are required. FI 8060, Current Issues in Finance, and FI 8070, Leading the Finance Function, may be taken as free electives but do not count toward a finance concentration.

Dual Concentration Option:

Students who complete the following set of courses as part of their MBA program will qualify for dual concentrations both in the area of finance and in risk management and insurance:

- FI 8000 Valuation of Financial Assets
- FI 8200 Derivative Markets I
- RMI 8050 Risk Management Modeling
- RMI 8370 Financial Risk Management

Study Abroad Elective:

Students taking IB 8410 *Financial and Managerial Issues in France and the EU*, (3hrs) may count this course toward a concentration in finance.

An MBA Career Path in Enterprise Risk Management:

This is an additional option. See the description of career paths later in this section.

Health Administration

Andrew T. Sumner, Coordinator, 404-413-7634, asumner@gsu.edu

A concentration in health administration consists of 12 hours chosen from this list:

- HA 8160 Introduction to the Health Care System
- HA 8190 Health Policy & Ethics
- HA 8250 Health Economics & Financing
- HA 8440 Executive Leadership in Healthcare
- HA 8460 Human Resource Management in Health Care
- HA 8550 Healthcare Financial Management and Planning
- HA 8630 Managed Care & Integrated Health Systems
- HA 8670 Health Information Systems

Health Informatics
The goal of the MBA concentration in Health Informatics is to provide students with specialized skills to improve healthcare services enabled by information technology. Such improvements focus on the information-intensive nature of healthcare institutions and processes to increase the quality and reduce the cost of healthcare services.

Courses required for the concentration (12 semester hours) in Health Informatics are:

- CIS 8070 Pervasive Healthcare Technologies
- CIS 8080 Security and Privacy of Information and Information Systems
- HA 8160 Introduction to the Health Care System
- HA 8670 Health Information Systems

Suggested electives for Health Informatics are in recommended order:

- CIS 8010 Process Innovation
- CIS 8000 IT Project Management
- HA 8550 Health Planning and Financial Management
- CIS 8090 Enterprise Architecture

Hospitality Administration

Debby Cannon, Coordinator, 404-413-7617, dfcannon@gsu.edu

A concentration in hospitality consists of any 12 hours chosen from this list:

- HADM 8100 Hospitality and Tourism Management
- HADM 8400 Financial Management Applications for Hospitality Enterprises
- HADM 8500 Economic and Cultural Impact of Travel and Tourism
- HADM 8600 Trends in the Food Service Industry
- HADM 8700 Trends in the Hotel Industry
- MGS 8300 Human Resources Management
- MK 8800 Services Marketing

Human Resource Management

Kelly Grace, Coordinator, 404-413-7172, kgrace@gsu.edu

Admission to the HRM concentration requires formal approval by the faculty of the Beebe Institute. Other M.B.A. students or students in other master's programs must file a written request with the Office of Graduate Student Services to transfer to HRM. Students' records are then sent to the institute for review.

Each HRM student’s courses for the concentration must be selected from the list below in consultation with the HRM faculty adviser and a copy of these course selections filed with Graduate Student Services for review and approval. Progress toward the degree beyond the M.B.A. core and required courses, including clearance for graduation, cannot be confirmed without an approved program of study. This
program should be planned before the student takes a non-required course. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to Graduate Student Services.

A concentration in Human Resources Management consists of 12 hours. Required:

- MGS 8300 Human Resources Management
- MGS 8360 Human Resources Recruitment and Selection
- MGS 8390 Strategic Compensation

Take at least one of the following:

- MGS 8320 Legal and Ethical Environment of Human Resource Management
- MGS 8380 Strategic Human Resource Management

Courses not on the list may be chosen through consultation with a faculty advisor.

**Information Systems**

Dr. Veda Storey, Coordinator, 404-413-7477, vstorey@gsu.edu

In today’s highly competitive global environment, the effective deployment of information technology has become the key to organizational success. There is a continuing shortage of individuals with the combination of business and technology skills needed to develop and manage information systems that provide competitive advantage in the global marketplace. The mission of the M.B.A. concentration in information systems is to produce graduates able to fill this need. Students will learn how to combine their general business knowledge with the latest software engineering tools and techniques to create information systems needed by today’s organizations. The courses to constitute a concentration (12 semester hours) in information systems are chosen from the 8000-level offerings of the Department of Computer Information Systems, or Acct 8680, IB 8680, IB 8710, provided the relevant course prerequisites have been satisfied.

Students may achieve a managerial emphasis by choosing courses from the following:

- CIS 8000 Information Technology Project Management
- CIS 8010 Business Process Innovation
- CIS 8060/CPI 8060 Supply Chain Management
- CIS 8080/ACCT 8680 Security and Privacy of Information and Information Systems
- CIS 8100 Management of Information Services
- CIS 8125 IT Management
- CIS 8200 Information Systems Strategy
- CIS 8210 Global Systems Sourcing
- CIS 8220/IB 8710 International Information Technology Issues and Policy
- CIS 8670 Enterprise Resource Planning Systems (ERP)

Or they may achieve a technical emphasis by choosing courses from the following:

- CIS 8020 Systems Integration
- CIS 8030 Software Requirements Management
International Business

Daniel Bello, Coordinator, 404-413-7658, dbello@gsu.edu

Businesses continue to explore international opportunities as globalization expands. A concentration in international business opens up exciting career opportunities for managers with an MBA. The MBA-IB (international business) offers an opportunity to build a sound foundation in international business, preparing students for careers in an increasingly interconnected global business environment. The concentration offers a flexible learning experience that extends functional skills to deal with managerial issues in the international marketplace as well as enhance students’ intercultural awareness and effectiveness. The MBA-IB requires the capstone course, IB 8990, which replaces MBA 8820 as the MBA capstone requirement. In addition, the concentration requires 4 courses (12 hours). As the prerequisite for IB 8000-level electives, IB 8090 is required; the 4 courses constituting the concentration are selected as follows:

1. a) At least 6 hours from a list of IB 8000-level electives
   b) 3 hours from a list of related international courses or from the list of IB 8000-level electives.
   c) 3 hour IB 8990 Policy & Strategy in the International Marketplace (course replaces MBA 8820).

Required Prerequisite: IB 8090 International Business Environment

IB 8000-level electives: To complete the concentration, at least 6 (six) semester hours chosen from the courses listed below are required. Consult the current graduate catalog for prerequisites that will affect selections.

- IB 8080 Legal Aspects of International Business
- IB 8092 Analyzing International Business Problems
- IB 8100 International Entrepreneurship
- IB 8180 Doing Business in Emerging Markets
• IB 8190 Doing Business in World Regions
• IB 8400 International Exchange Program Credit (1-6)
• IB 8410 Study Abroad (1-6)
• IB 8550 Special Topics in International Business
• IB 8620 Commercial Diplomacy
• IB 8630 International Business Negotiation
• IB 8680 Technology and Global Competition
• IB 8690 Global Operations Management
• IB 8710 International Information Technology Issues and Policy

**IB Related International Courses:** To complete the concentration, three semester hours chosen from the courses listed below or from IB 8000-level electives are required. Consult the current graduate catalog for prerequisites that will affect selections.

See list of IB 8000-level electives above, or

• MGS 8860 Management and Cross-National Environments (Study Abroad)
• MK 8600 International Marketing
• RE 8600 International Real Estate
• RMI 8350 International Risk and Insurance
• TX 8300 International Aspects of Taxation
• ACCT 8090 International Accounting Practices
• CIS 8060 Supply Chain Management
• ECON 8850 International Trade
• ECON 8860 Economics of Global Finance
• FI 8040 Survey of International Finance
• FI 8240 Global Portfolio Management
• FI 8340 Multinational Corporate Finance
• FI 8440 Finance and Banking in the Global Economy

An international study experience is highly encouraged, but not required. Note that IB 8410 may be repeated for offerings in different countries/locations.

**Capstone: REQUIRED**

IB 8990 Policy & Strategy in the International Marketplace (course replaces MBA 8820).

**Note:** Knowledge of a foreign language is not required of a MBA-IB student.

**Marketing**

Bruce K. Pilling, Coordinator, 404-413-7673, bpilling@gsu.edu

Electives to constitute a concentration (12 semester hours) in marketing are chosen from any of the 8000-level marketing courses, including:

• MK 8100 Consumer Behavior
• MK 8200 Marketing Research
• MK 8210 Marketing Intelligence
• MK 8300 Marketing Communications and Promotion
• MK 8330 Strategic Selling
• MK 8340 Strategic Sales Leadership
• MK 8400 Channels of Distribution
• MK 8410 Logistics Management
• MK 8510 Business to Business Marketing
• MK 8600 International Marketing
• MK 8620 Product Management
• MK 8700 Digital and Social Media Marketing
• MK 8710 Customer Relationship Management
• MK 8720 Data Driven Marketing
• MK 8800 Services Marketing
• MK 8900 Strategic Market Planning

MBA 8145 must be taken or waived. If waived, it cannot be taken later for credit and the number of credit hours waived must be replaced with 8000-level RCB courses within Marketing.

Operations Management

Yusen Xia, Coordinator, 404-413-7556, ysxia@gsu.edu

Electives to constitute a concentration (12 hours) in Operations Management are chosen from the following list. Some of these courses have prerequisites which must be met. Courses not on the list may be chosen through consultation with a faculty advisor.

• MGS 8710 Logistics and Supply Chains
• MGS 8730 Project Management
• MGS 8740 Operations Strategy
• MGS 8760 Quality Management
• MGS 8770 Service Operations Management
• CIS 8060/CPI 8060 Supply Chain Management
• IB 8690 Global Operations Management

Leadership and Organization Management

Ed Miles, Coordinator, 404-413-7540, emiles@gsu.edu

Electives to constitute a concentration (12 hours) in Leadership and Organization Management are chosen from the following list. Some of these courses have prerequisites which must be met. Courses not on the list may be chosen through consultation with the coordinator.

• MGS 8420 Enhancing Leadership Skills
• MGS 8425 Coaching for Leadership
• MGS 8430 Negotiation
• MGS 8435 Power in Organizations
Real Estate

Karen Gibler, Coordinator, 404-413-7725, kgibler@gsu.edu

A concentration in real estate consists of the six semester hours of required real estate courses listed below plus six semester hours chosen from any other 8000-level real estate courses:

- RE 8020 Real Estate Equity Investments
- RE 8100 Strategic Management of Real Property in a Corporate Environment

Risk Management and Insurance

Martin Grace, Coordinator, 404-413-7469, mgrace@gsu.edu

A concentration (12 hours) in risk management and insurance can be chosen from any of the 8000-level RMI-prefixed courses. Students may select non-RMI prefixed courses as credit toward a concentration with advance permission of the RMI department’s graduate faculty adviser.

In addition to the general concentration described above, the department participates in two hybrid degree programs: one entitled Financial Risk Management and the other the Enterprise Risk Management Career Path. Students completing the Financial Risk Management Specialization will earn a dual concentration in risk management and insurance and in finance. The specialization is designed to prepare students to work in the treasury departments of non-financial firms or as professionals in the financial risk management departments in financial institutions or consultancies. The MBA Career Path Enterprise Risk Management is appropriate for students seeking to further enhance their training in financial risk management with broader education in the management of operational and other non-financial risks, such as political risk, property and liability exposures, security breach risk, and employer welfare.

The four courses required for the Financial Risk Management Specialization are as follows.

- FI 8000 Valuation of Financial Assets
- RMI 8050 Risk Management Modeling
- FI 8200 Derivative Markers I
- RMI 8370 Financial Risk Management

Students completing the Financial Risk Management Specialization will earn a concentration in RMI and in finance.

Students seeking to enroll in the MBA Career Path in Enterprise Risk Management must take three courses in addition to those required for the Financial Risk Management Specialization. One is required and the other two can be chosen by the student, with approval of the RMI department’s graduate faculty adviser, from...
the list of recommended courses below. Other courses may be selected with the advance approval of the graduate adviser.

Required:

- RMI 8150 Corporate Risk Management

Choose two of the following:

- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- ECON 8860 Economics of Global Finance
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
- MGS 8040 Data Mining

MBA students who complete the ERM career path will earn a concentration in RMI and also will earn a concentration in finance. A complete description of the MBA Career Path Program is described in section 7090.50.

7090.50 Robinson MBA Career Paths

The Robinson College of Business believes the curriculum should be innovative, forward looking, and boundary spanning. The college seeks to prepare students for the practice of management with the knowledge and skills needed to remain effective in a global, culturally diverse, and technologically advanced world that is characterized by rapid change and complex interdependencies. To respond to these changes in today's marketplace, the faculty has designed a new series of career paths composed of "hybrid concentrations." These options enable Robinson MBA students to select a combination of courses that cut across traditional business disciplines.

Hybrids combine courses available in two existing MBA concentrations into a specific career path. Often one course can count toward both concentrations. Rather than two independent concentrations that may or may not have some overlap, hybrids are a cohesive set of courses relevant for the career path indicated.

Listed below are the career paths available at press time for this catalog. (Updates on career path offerings that may occur during the year can be found at the college's Web site, robinson.gsu.edu, by clicking on "Students.") Choice of a career path is optional, but the Robinson faculty strongly encourages them as part of the career planning for MBA students interested in these areas. Indications are that employers are increasingly interested in MBA students who have a concentration and even more so in students that have concentrations in more than one discipline.

**Accounting Information Systems Design and Assurance**

Ron Guymon, Program Director, 404-413-7236, rguymon@gsu.edu

There is a dire need for those who understand general business principles, along with technology and accounting. A career path in Accounting Information Systems Design and Assurance prepares students for
a career in this much sought-after area.

This career path essentially provides the students the opportunity to obtain an MBA with the same accounting systems focus that is available in the Master of Professional Accountancy program.

Students leaving the program will be well prepared to enter into a public accounting career with the major accounting firms and into consulting where they could help companies design systems with built-in auditing controls. Another career option would be to enter the assurance service field where they would audit systems for proper design and control. On the corporate side, students could find a career in systems design or audit systems.

MBA students who complete this career path will earn concentrations in accounting and information systems. Courses for the AIS Career Path follow.

Foundation Courses. Students whose previous academic course work does not include the foundation courses listed below (minimum grade of C) will take them as part of this career path. Any student with an undergraduate accounting degree from an AACSB-accredited business school meets the accounting foundation requirements.

- ACCT 4111 Intermediate Accounting I
- ACCT 4112 Intermediate Accounting II
- ACCT 4113 Intermediate Accounting III
- ACCT 4210 Cost/Managerial Accounting
- ACCT 4310 Accounting Information Systems
- ACCT 4610 Assurance Services

A course in a procedural or object-oriented programming language such as Visual BASIC, C/C++ (CIS 3260), or JAVA (CIS 3270)

Required courses:

- ACCT 8630 Information Technology Auditing
- ACCT 8680 Security and Privacy of Information and Information Systems
- CIS 8030 Software Requirements Management
- CIS 8040 Fundamentals of Database Management Systems

In addition, students must take six hours of elective credit from 8000-level courses in the Robinson College of Business or the Department of Economics in the Andrew Young School to meet the minimum elective hours requirement for the MBA degree.

Enterprise Risk Management

Martin Grace, Coordinator, 404-413-7469, mgrace@gsu.edu

Among the most dramatic aspects of the revolution currently taking place in the risk management profession is the recognition that such formerly diverse areas as insurance, asset management, and the treasury functions of global corporations now require a common set of skills drawn from economics,
finance, and risk management. Consequently, there is now a great demand for education in the core of contemporary risk management techniques.

The MBA career path in Enterprise Risk Management (ERM) will be attractive to individuals seeking breadth in risk management. Required and elective course work in ERM is broader than what is currently available at most universities in the United States.

The increasing acceptance of the Chief Risk Officer concept suggests there is enhanced demand for professionals who can efficiently manage both financial and non-financial risk—such as political risk, property and liability risks, risks associated with information technology and e-commerce, employee welfare, and human resource risk.

MBA students who complete this career path will earn a concentration in risk management and insurance and also will earn a concentration in finance. Courses for the ERM Career Path follow.

Required Courses:

- FI 8000 Valuation of Financial Assets
- FI 8200 Derivative Markets I
- RMI 8050 Risk Management Modeling
- RMI 8150 Corporate Risk Management
- RMI 8370 Financial Risk Management

Two of the following four courses must also be chosen. Other courses may be selected with prior approval of the RMI faculty adviser.

- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- ECON 8860 Economics of Global Finance
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
- MGS 8040 Data Mining

**Hotel Real Estate**

Debby Cannon, Coordinator, 404-413-7617, dfcannon@gsu.edu

The Career Path in Hotel Real Estate is a partnership between the Cecil B. Day School of Hospitality and the Department of Real Estate. Hotel real estate encompasses a variety of careers including positions on the corporate level, in entrepreneurial initiatives, in financial institutions and with hotel brokers.

The six course specialization (18 credit hours) includes real estate and hospitality courses that focus on hotel operations including financial analysis and hotel assets combined with real estate finance, project development and market analysis. Students will follow the flexible MBA curriculum with the six courses counting as electives. Students in this specialization will benefit from both the specialized curriculum and the opportunity to interact with industry leaders in Atlanta’s active hotel development environment.

The six required courses are:
Information Systems Consulting

Ephraim McLean, Coordinator, 404-413-7448, chair@gsu.edu

The combination of courses that prepares students for careers in Information Systems (IS) Consulting combines IS content expertise with process expertise in consulting. Traditional offerings provide strength only in IS content. Students following this career path must already have some level of expertise in both areas coupled with a desire to expand their backgrounds to meet the growing demands of today’s global environment. The primary intention of this career path is to prepare students to be external consultants, but it will certainly help those who act as consultants inside companies.

MBA students who complete this career path will earn concentrations in information systems and managerial sciences. Courses for the ISC Career Path follow.

These required MBA courses are particularly applicable to this career path.

- MBA 8125 Digital Innovation (3.0)
- MBA 8155 Operations Management (3.0)
- MBA 8165 Leadership and Organizational Behavior (3.0)

Required Courses:

- CIS 8000 IT Project Management
- CIS 8010 Process Innovation
- MGS 8430 Negotiation
- MGS 8450 Leading Organizational Change

One elective (subject to meeting prerequisites) from 8000-level CIS courses

In addition, students must take three hours of elective credit from 8000-level courses in the Robinson College of Business or the Department of Economics in the Andrew Young School to meet the minimum elective hours requirement for the MBA degree.

Information Technology Risk Management

Richard Baskerville, Coordinator, 404-413-7362, baskerville@gsu.edu

Organizations have become increasingly dependent on information technology as a fundamental enabler of their business activities. Today, even small interruptions or disturbances in the functions of this technology may bring disastrous losses in processing revenue and recording assets. Yet the risk profile of this
technology has grown as widespread networking increases electronic access to organizational information resources. While a vast array of security technology is available, management must have the principles, knowledge and skills to decide when and whether to reduce the IT risks through the deployment of appropriate technical solutions, through the diversification of risk across organizational systems, or through risk financing.

MBA students who complete this career path will earn concentrations in both Information Systems and Risk Management and Insurance.

Required Courses:

- RMI 8050 Risk Management Modeling
- RMI 8150 Corporate Risk Management
- RMI 8370 Financial Risk Management
- CIS 8020 Systems Integration
- CIS 8080/ACCT 8680 Security and Privacy of Information and Information Systems.
- CIS 8100 Management of Information Services

Recommended Electives:

- CIS 8000 Information Technology Project Management

RMI Elective

International Business and Information Technology

Duane Truex, Coordinator, 404-413-7380, dtruex@gsu.edu

Information-intensive businesses operating in a global environment are looking for a special type of manager. This manager must comprehend simultaneously the complex international business environment and know how information technology (IT) can be used to best support the company’s strategic direction. In information-intensive industries, IT is the lifeline to an organization’s global operations, creating new opportunities for individuals with these skills. Robinson’s career path in International Business and Information Technology builds synergy from courses that overlap three areas [international business, organizational strategy (and its fit with IT), and IT itself]. This career path prepares tomorrow’s leaders for an increasingly information-dependent global marketplace.

MBA students who complete this career path will earn concentrations in information systems and international business. Courses for the IBIT Career Path follow.

Foundation Course: a course in an object-oriented programming language such as C/C++ (CIS 3260) or JAVA (CIS 3270). (Not assigned if an equivalent academic course has been previously completed with a grade of C or higher.)

Required Courses:

- CIS 8000 IT Project Management
- CIS 8010 Process Innovation
- CIS 8220/IB 8710 International Information Technology
- ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
- IB 8090 International Business Environment
- IB 8180 Comparative Business Systems
- IB 8680 Technology and Global Competition

Optional Elective:

- IB 8410 International study experience focused on IT

Capstone Course IB 8990 (in lieu of MBA 8820): Policy and Strategy in the International Marketplace
(Consent of instructor for exception to prerequisites will be given to students following this career path.)

Students interested in this career path may complete four of the six courses at the University of Nantes in Nantes, France in the fall semester. All instruction is in English.
7100 Student Complaints, Petitions for Policy Waivers and Variances, and Appeals

The appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog for details.

Please note the procedure below for GMAT/GRE waiver requests.

The GMAT/GRE requirement may be waived for applicants who have already received an MBA from an AACSB accredited institution. Applicants must submit a request to waive the GMAT/GRE with the original application packet.

The Assistant Dean and Master’s Admission Committee will review the entire application file and waiver request. The decision to waive the GMAT/GRE is at the discretion of the Assistant Dean and Master’s Admission Committee. The submission of this request does not guarantee the GMAT/GRE score will be waived.

Applicants will be notified of the committee’s decision within 10 business days of submitting a complete application file.
7110 Master’s Programs

7110.10 Specialized Master’s Foundation Requirements

The requirements in this list are in addition to the hours required for the non-MBA master’s degrees, collectively referred to as specialized master’s degrees. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. Foundation requirements are commonly satisfied by one of the following:

(1) A bachelor’s degree in business, economics, or accounting; or,

(2) A bachelor’s degree in the specialization or an area related to the student’s specialized master’s degree; or,

(3) Certified completion of approved online courses in accounting, quantitative methods, and economics as directed by RCB Graduate Student Services; or,

(4) Completion of the following courses:

   a. Accounting: MBA 8025 or financial and managerial accounting principles (ACCT 2101–ACCT 2102).
   b. Economics: Microeconomics principles (ECON 2106).
   c. Mathematics: College Algebra (MATH 1111).
   d. Statistics: MATH 1070.
   e. Business Communications: BCOM 8250 or MBA 8015 (completion of either of these will eliminate the need for taking the Business Communication Workshop in item 3 above)

Specific Master’s Programs may have further foundation requirements that are in addition to those listed here. See the specific program description for other specific foundation requirements.
The Robinson 17-month Executive MBA (EMBA) program is designed for professionals who possess significant (approximately seven years or more post-undergraduate degree) professional work experience as well as experience in a management role (managing people, projects, or assets). On average, EMBA students are 40 years old with fifteen years of professional work experience. The purpose of the program is to prepare experienced professionals to better meet the challenges of an ever-changing global business environment.

The EMBA program format is team-based and lock-step. Students begin in August and remain together throughout the course of the program. There are no electives, and students receive an MBA in general management. All classes are held at the GSU Buckhead Campus every other Friday (noon to 6:30 p.m.) and Saturday (9:00 a.m. to 6:00 p.m.).

Covering the most critical business topics, the EMBA curriculum touches all aspects of the enterprise as it pertains to today’s global markets. The curriculum is designed to equip students with a broader business perspective, strategic thinking skills, and the executive leadership skills necessary to advance in their career.

An integral part of Robinson’s EMBA program is the International Business Residency, an intensive, 10-day exposition into the management and business practices of companies around the world. While abroad, students meet with company leaders (both indigenous and American-owned companies), tour plants and facilities, and meet with government officials to better understand global markets.

The Financial Times ranks the Robinson Executive MBA as 22nd among U.S.-based Executive MBA programs.

For more information including admission criteria visit the Executive MBA website at: www.emba.gsu.edu or call 404-413-7182.
The Robinson College of Business offers the Global Partners MBA in association with IAE de Paris, the Sorbonne Graduate Business School, and the COPPEAD Graduate School of Business at the Federal University of Rio de Janeiro. The highlights of the program are as follows:

- The Global Partners MBA is a *living classroom*: It is a full-time, 14-month, dual degree program delivered across four continents.
- Students experience an in-depth, global immersion experience through extended residency stays in North and South America, Europe, and Asia.
- Students see and hear first hand what’s happening in the real world as they interact with corporate and government leaders in each locale, including extended company visits during the Asian residency, Washington DC, and Brussels.
- Students gain a 360 degree cross-cultural perspective.
- Courses are integrated across the partner schools, providing students with a truly global perspective.
- Commercial Diplomacy and Leadership are program themes. Commercial Diplomacy focuses on the relationship between the public and private sector. They develop an in-depth understanding of the regulatory environment and legal issues as they compare and contrast across four countries and four trading blocks. Students spend time in Washington D.C. at the outset of the program and observe first-hand the American approach to public affairs. This experience builds over the course of the program with key visits such as to the European Union Directorate in Brussels, and other firms and agencies in all program locations.
- Students learn the latest leadership principles and practices. It begins with a personal assessment of one’s leadership style, including strengths and areas of potential derailment.
- Internship/Field Study: The internship takes place at the end of the program for approximately 16 weeks. It is the culmination of the classroom and program experiences and can take place anywhere in the world. During this period, students complete a research project that aligns with their internship assignment.
- Graduates receive the Robinson College of Business MBA degree, the Master d’ Administration des Entreprises degree from IAE de Paris, Sorbonne and a certificate from COPPEAD.

**Global Partners MBA Courses Overview**

- GMBA 7035 Economics for Managers
- GMBA 8025 Financial Accounting
- GMBA 8030 Global Legal and Regulatory Issues
- GMBA 8090 International Business Environment
- GMBA 8115 Managerial Accounting
- GMBA 8120 Information Technology and Global Competition I
- GMBA 8135 Corporate Finance
- GMBA 8145 Marketing Management
- GMBA 8150 Global Operations and Logistics I
- GMBA 8160 Human Resources Management & Organizational Behavior I
- GMBA 8170 International Finance I
- GMBA 8190 International Affairs & Economic Integration
- GMBA 8220 Information Technology and Global Competition II
GMBA 8250 Global Operations and Logistics II
GMBA 8260 Human Resources Management & Organizational Behavior II
GMBA 8270 International Finance II
GMBA 8410 The Asian Experience
GMBA 8500 Internship / Thesis
GMBA 8605 International Marketing
GMBA 8610 Leadership Practices
GMBA 8620 Commercial Diplomacy
GMBA 8630 Strategic Business Communications
GMBA 8990 Policy & Strategy

Admission requirements include the following:

- Bachelor’s degree
- GMAT/ GRE
- Essays
- Two letters of recommendation.
- Interview
- Proficiency in a second language. This will be assessed at the time of the interview
- Two-to-three years of full-time work experience is preferred
- TOEFL or IELTS (if applicable)

Application deadlines: Rolling admissions with December 1, March 1, and July 1 each year for fall admission. To be automatically considered for scholarships, all materials must be turned in by the March 1 deadline.

For further information about the program, visit http://globalpmba.robinson.gsu.edu; e-mail: gpmba@gsu.edu, or call the Global Partners MBA Program at 404/413-7299.
The Professional MBA Program is a 24-month lock-step program designed for rising professionals with a minimum of four years of professional experience in a supervisor or mid-level management position with increasing responsibility to assume greater leadership roles. Students receive an MBA degree upon completion of the program.

The purpose of the Professional MBA program is to provide mid-level managers a challenging curriculum relevant to the needs of rising professionals. The curriculum develops and integrates leadership portfolio skills focusing on analytical skills for decision-making and incorporating global, ethical and culturally diverse dimensions; skills in assessing organizational performance and developing approaches for improvement; and interpersonal skills that contribute to teamwork. The lock-step format serves to forge strong networking, a more in-depth learning environment and support among the students as they take the same courses together during the program.

Students may choose from a variety of electives offered in multiple locations or online. International trips are available through the Robinson College’s Institute of International Business. The PMBA program also offers a dual degree with Master of Health Administration in a lock-step format over seven months.

For more information, visit the Professional MBA Web site at www.robinson.gsu.edu/PMBA or call 404/413-7167

### 7140.10 Admissions

Class size is limited, so we urge you to complete the application process as soon as possible. To be considered for admission, the following is required:

- Approximately four years of professional, full-time work experience
- Complete GMAT or GRE scores
- A four-year undergraduate degree from an accredited university
- Completed online application
- Up to three letters of recommendation
- An essay
- A resume
- Applicants who are strong candidates for the program will be interviewed by the admissions committee

The admissions committee reviews applications as they are received.

### 7140.20 Regulations for the Degree

This is a 48 semester hour, 24-month cohort program that includes electives.
## 7140.30 Curriculum

Electives may be selected from a variety of courses offered at multiple locations or online.

PROGRAM TOTAL 48 hours
7150 M.B.A./J.D. Joint Program

The Robinson College of Business, in conjunction with the College of Law, offers a joint program leading to the M.B.A. and the J.D. degrees. The following regulations apply to students who are accepted to both the M.B.A. and the J.D. programs and are enrolled in the joint program (joint enrollment) as opposed to being independently enrolled in both degree programs concurrently (dual enrollment). Students who have already earned an M.B.A. degree or a J.D. degree at Georgia State University or at another institution are not eligible for the joint program.

7150.10 Application to the M.B.A./J.D. Joint Program

Applicants to the M.B.A./J.D. joint program must meet the entrance requirements and follow the application procedures of both the Robinson College of Business and the College of Law. Applicants must be accepted by both colleges.

Although students may apply for either the M.B.A. or the J.D. program at any time, acceptance to both programs would only result in dual enrollment, as opposed to joint enrollment. Admission to both degree programs under the joint program concept permits the application of credit for one degree toward the other degree (as explained below), which is not necessarily possible in the case of dual enrollment. To be in the M.B.A./J.D. joint program, students must be admitted to both programs before completing either program. See the heading “Enrollment Sequencing and Time Limits” below.

Students who are accepted to both the M.B.A. and the J.D. programs and wish to be enrolled in the joint program are responsible for providing written notification of their intentions to each college.

7150.20 Joint Program Degree Requirements

Students must satisfy the curriculum requirements for both the M.B.A. and the J.D. degrees.

M.B.A. Degree Requirements

For students enrolled in the joint program, completion of the first-year curriculum of the J.D. program in good academic standing will satisfy the M.B.A. requirement in Legal Environment: Ethics and Corporate Governance (MBA 8030). For students who drop out of the J.D. program before completing the first-year curriculum or do not complete it in good standing, determination of credit for MBA 8030 will be decided by normal transfer-of-credit procedures, which are explained earlier in this chapter.

For students enrolled in the joint program, the Robinson College of Business will allow 12 semester hours of grades of B or higher to be credited toward the 12 semester hours of electives for the general business concentration in the M.B.A. program.

Students who earn fewer than 12 semester hours of grades of B or higher in the J.D. program will receive a reduced number of hours of credit toward the general business concentration in the M.B.A. program. Such students must compensate for this shortage of courses eligible for elective credit by taking additional courses in either college and earning minimum grades of B. Choice of these courses must be approved in advance by the Office of Graduate Student Services.
J.D. Degree Requirements

Reciprocally, the College of Law will permit, with prior approval, up to 12 semester hours of 8000-level M.B.A. courses with grades of B or higher to be credited toward the J.D. degree. No M.B.A. credit toward the J.D. degree is awarded until the M.B.A. degree program has been completed. As stated in the College of Law chapter of this catalog, a law student must earn 90 semester hours of credit to qualify for the J.D. degree.

Enrollment Sequencing and Time Limits

The College of Law does not permit enrollment in the joint degree program after a student has completed more than 20 semester hours of 8000-level MBA coursework. After students have been admitted to both the M.B.A. and the J.D. programs and have declared intent to be enrolled in the joint program, they must, at the first opportunity, complete 31 semester hours of required courses in the J.D. program. After completion of these 31 hours, enrollment in the courses of either college or enrollment in both colleges concurrently is permitted. The requirements for the M.B.A. degree must be completed within eight years of the initial semester of enrollment in the M.B.A. program. The J.D. degree must be completed within six years of the initial semester of enrollment in the J.D. program.

Grading and Scholastic Discipline

Students enrolled in the joint program must meet the academic regulations of each college, including those related to the minimum GPA and scholastic discipline. The computation of the GPA in each college is based only on courses taken in that college.
Actuarial Science is a discipline that employs mathematics and statistics in modeling the financial impacts of risk and uncertainty in various sectors of the economy, and in designing solutions of managing risks. A majority of professional actuaries work in careers that are associated with the insurance industry, though growing numbers work in other fields. The mission of the MAS degree program is to educate students in the theory and practice of actuarial science through a specialized program of study. The program is designed to teach students both the core actuarial theory and the latest development in actuarial practice.

In addition to the MAS program, two dual-degree options are available: one where students will earn both the Master of Actuarial Science degree and the Master of Science in Risk Management and Insurance degree specializing in Mathematical Risk Management; and one where students will earn both the Master of Actuarial Science degree and the Master of Science in Analytics.

The rapid integration of insurance and financial services and the increasing acceptance of enterprise risk management in broad sectors of the economy imply that risk professionals need to master the understanding of risks associated with assets, liabilities and business operations. This requires a set of integrated skills in actuarial risk modeling, financial risk modeling, and enterprise risk management. The dual degree program in MAS/MRM is designed to serve the growing need for graduates who 1) have solid quantitative skills in both actuarial risk modeling and financial risk modeling, and 2) understand the business contexts and possess the necessary communication skills for solving complex risk issues.

Similarly, there is an increasing need for graduates an expertise in data analytics in the insurance field. The ongoing data revolution associated with the ever-increasing collection of data and use in the business process and decisions makes analytics skills relevant in all areas of business. The dual degree program MAS/MAS is designed to serve the need for actuarial graduates with analytics skills.

7160.10 Regulations for the Degree

All Master of Actuarial Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.A.S. program. A maximum of 9 semester hours of transfer credit is possible in this 30-hour program or in the 50-hour dual degree program.

Foundation Requirements.

These courses are in addition to the 30 hours required for the M.A.S. degree or in addition to the 50 hours required for the dual degree programs. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent work has been previously completed with grades of C or higher.

Accounting: financial and managerial accounting principles (MBA 8025, or ACCT 2101 & ACCT 2102)
**Finance:** corporate finance principles (MBA 8135). This requirement can be waived if FI 3300 and FI 4000, or equivalent course work, have been completed with grades of “C” or higher.

**Behavioral Science:** Management principles (MGS 3400). Students may satisfy this requirement with either management (MGS 3400), sociology (SOCI 1101), or psychology (PSYC 1101) principles.

**Economics:** Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106). Alternatively, both requirements can be satisfied by taking MBA 7035 Economics for Managers or the corresponding placement exam (see http://flex.robinson.gsu.edu/about/curriculum/placement-exam-option- mba-foundation-courses/).

**Mathematics:** Students must have completed three semesters of advanced calculus (MATH 2211, MATH 2212, and MATH 2215) and must have Compound Interest Theory AS 4230.

**Statistics:** Students have completed two semesters of undergraduate mathematical statistics (Math 4751, Math 4752). Alternatively, these requirements can be satisfied by taking ECON 8710 or MSA 8190.

**Course Requirements: The Master of Actuarial Science**

This section is applicable to students interested in the Master of Actuarial Science Degree.

Students interested in the dual degree programs should go to Section 3 (MAS/MRM) or Section 4 (MAS/MSA) below.

**Required Courses (27 hours):**

- FI 8000 Valuation of Financial Assets (3)
- AS 8340 Life Contingencies I (3)*
- AS 8350 Insurance Mathematics (3)*
- AS 8810 Actuarial Science Graduate Seminar (3)
- ECON 8740 Applied Statistics and Econometrics (3)**
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8000 Analytical Programming (2)
- MRM 8389/MRM 8391/MAS 8391 CPT/Internship/Field Study (1)

*Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section B & C below in consultation with the actuarial science faculty adviser.

**Students can use ECON 9720 Econometrics II as a substitute for ECON 8740. Students in the dual degree Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management must substitute ECON 9720 for ECON 8740.

Students must complete a minimum of 6 hours of course work from sections B and C combined.
Elective Courses in the Major or in Mathematical Risk Management: (3-9 hours)

- AS 8430 Loss Distributions and Credibility Theory (3)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- MRM 8620 Quantitative Financial Risk Models (3)
- MRM 8630 Stochastic Interest Rate and Credit Models (3)
- RMI 8050 Risk Management Modeling (3)
- RMI 8300 Predictive Risk Models (3)

Electives Outside the Major: (3-6 hours). At least one course must be selected from the 8000 level offerings in Risk Management and Insurance (RMI). Nonmajor electives must be individually approved by an actuarial science faculty adviser. In the selection of these electives, students will be strongly encouraged to choose courses that will serve to enhance their skills in writing and other forms of communication.

Course Requirements: Dual Degree Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management.

This section is applicable to students interested in the dual degree program Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management. Students interested in the Master of Actuarial Science should go to Section 2 above. Students interested in the dual degree program Master of Actuarial Science and Master of Science in Analytics should go to Section 4 below.

Required Technical Support Courses (0-3 hours): FI 8000 Valuation of Financial Assets (3)*

*Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management faculty adviser.

Required Courses in the Dual Degree Program (27-33 hours)

- AS 8340 Life Contingencies I (3)**
- AS 8350 Insurance Mathematics (3)**
- AS 8810 Actuarial Science Graduate Seminar (3)
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8630 Stochastic Interest Rate and Credit Models (3)
- MRM 8640 Advanced Credit Risk Models (alternatively, students can take MRM 8620 Quantitative Risk Models)
- RMI 8370 Financial Risk Management (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- ECON 8780 Financial Econometrics (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from 1.120
section C below in consultation with the actuarial science faculty adviser.

**Elective Courses in the Dual Degree Program (12-21 hours)**

Students should consult with the faculty advisers for the Master of Actuarial Science and Mathematical Risk Management programs prior to beginning their elective coursework and may select from among the following courses:

- AS 8430 Loss Distributions and Credibility Theory (3)
- AS 8520 Non-life Insurance Mathematics (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8240 Global Portfolio Management (3)
- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 8400 Financial Management of Depository Institutions (3)
- FI 9000 Mathematical Methods in Contemporary Financial Theory (3)
- FI 9100 The Theory of Asset Valuation (3)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- RMI 8150 Corporate Risk Management (3)
- RMI 8200 Life Insurance (3)
- RMI 8300 Predictive Risk Models (3)

Students may select, with the prior approval of both faculty advisers for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

**Course Requirements:** Dual Degree Master of Actuarial Science and Master of Science in Analytics. This section is applicable to students interested in the dual degree program Degree Master of Actuarial Science and Master of Science in Analytics. Students interested in the Master of Actuarial Science should go to Section 2 above. Students interested in the dual degree program Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program should go to Section 3 above.

**Required Technical Support Courses**

The following course must be completed within the first 18 hours of 8000-level course work: FI 8000 Valuation of Financial Assets (3)*

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

**Required Courses in the Dual Degree Program**

- AS 8340 Life Contingencies I (3)**
• AS 8350 Insurance Mathematics (3)**
• AS 8810 Actuarial Science Graduate Seminar (3)
• CIS 8040 Database Management Systems (3)
• MSA 8010 Data Programming (3)
• MSA 8050 Unstructured Data Management (3)
• MSA 8100 Operations Research Models and Methods (3)
• MSA 8150 Machine Learning for Analytics (3)
• MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
• MSA 8300 Value Through Analytics (3)
• MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)
• MRM 8320 Stochastic Risk Management Models (3)
• MRM 8600 Theory of Risk Sharing (3)
• MRM 8610 Financial Engineering (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the actuarial science faculty adviser.

Elective Courses in the Dual Degree Program (9-15 hours)

Students should consult with the program directors for the Master of Actuarial Science and Analytics programs prior to beginning their elective coursework and may select from among the following courses:

• Any of the 8000 level MSA elective classes
• AS 8340 Life Contingencies (3)
• AS 8350 Insurance Mathematics (3)
• AS 8430 Loss Distributions and Credibility Theory (3)
• AS 8810 Actuarial Science Graduate Seminar (3)
• ECON 8860 Economics of Global Finance (3)
• FI 8020 Financial Analysis and Loan Structuring (3)
• FI 8240 Global Portfolio Management (3)
• FI 8260 Hedge Funds and Their Strategies (3)
• FI 8300 Advanced Corporate Finance (3)
• FI 8310 Investment Banking (3)
• FI 8320 Corporate Financial Strategy (3)
• FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
• MGS 8040 Data Mining (3)
• MGS 8150 Business Modeling (3)
• MRM 8630 Stochastic Interest Rate and Credit Models (3)
• MRM 8640 Advanced Credit Risk Models
• RMI 8150 Corporate Risk Management (3)
• RMI 8300 Predictive Risk Models (3)
• RMI 8370 Financial Risk Management (3)

Students may select, with the prior approval of both program directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their
educational objectives.

**Program of Study**
Each student's program must be planned in consultation with a faculty adviser in actuarial science and a copy of the program filed with the Office of Graduate Admissions and Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. The program of study should be planned before the student takes a non-required course. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to the GASS.

**Time Limit**
The time limit for completing the M.A.S. program is five years from the first semester a course in sections 2-4 is taken.
7170 Master of Business Administration/Master of Health Administration

Andrew Sumner, Coordinator, 404/413-7634, asumner@gsu.edu

The purpose of the Master of Business Administration/Master of Health Administration joint programs is to prepare future executives to assume responsible managerial positions in health care and business organizations. To accomplish this purpose, the M.B.A./M.H.A. curriculum is structured to provide (1) the basic theoretical knowledge needed to develop as a manager in a variety of health care and business organizations; (2) an understanding of the pragmatic applications of theoretical concepts applied to operational issues through health casework and involvement with health care facilities throughout the program; (3) the technical skills appropriate to successfully function as a health care or business manager; and (4) an understanding of the values, traditions, ethics, and attitudes basic to excellence in health care leadership roles.

The strength of this M.B.A./M.H.A. program lies in the fact that it applies the theoretical concepts of business administration to health administration. The curriculum is designed around a set of competencies that define the set of knowledge, skills and abilities students should possess upon completion of the program.

Business knowledge and skills
• Financial Management
• Operations Management
• Strategic Management
• Human Resource Management
• Analytics

Knowledge of the Health Care Environment
• Clinical Professions and the Continuum of Care
• Legal and Regulatory Environment
• Health Care Economics and Financing
• Governance
• Health Policy
• Measurement and Improvement of Organizational Performance and Quality
• Health Information Systems and Technology

Leadership
• Strategic Communication
• Motivation and Empowerment of Others
• Group Participation and Leadership
• Change Management
• Servant Leadership

Professionalism
• Self Regulation, Self Awareness and Self Confidence
• Ethics, Honest and Integrity
• A Commitment to Lifelong Learning
Admissions
The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. Applicants must be accepted by the Institute of Health Administration in addition to receiving admission to graduate study in the Robinson College of Business. A personal interview is required for all applicants but may be waived by the director of the institute in exceptional circumstances.

Admission to the M.B.A./M.H.A. degree programs occurs each semester. Early application is advised, since the number of applicants each year exceeds program capacity. Applicants should note that health administration courses are offered during the evening.

Regulations for the Degrees
The Master of Business Administration (M.B.A.)/Master of Health Administration (M.H.A.) joint degrees are comprised of 54-66 semester hours of 8000-level graduate courses; a one-semester administrative residency is included. The residency (three semester hours) must be satisfactorily completed at a site approved by the Director of the Institute. A maximum of twelve semester hours of MBA coursework can be exempted based on previous completion of equivalent coursework.

The time limit for completing the M.B.A./M.H.A. joint degrees is five years.

Applicants who have already completed an AACSB accredited M.B.A. degree program may request to complete only the M.H.A. portion of the joint programs and earn only the M.H.A. degree. These requests must be approved by the faculty of the Institute of Health Administration. A limited number of students can be accepted for this option. The program of study for students approved for this option includes the 36 semester hours of health administration courses listed in items 4 and 5 below and the three-hour residency requirement described in item 6 below. (Such students should have already completed equivalents to MBA courses; in the event any deficiencies exist, these will be assigned as additional courses.)

The M.B.A./M.H.A. Curriculum

The M.B.A./M.H.A. degrees meet all M.B.A. core requirements. In cases where a health-oriented course is essential and is available, students will substitute this course for the standard requirement. Health courses are taken to complete M.B.A. elective requirements and M.H.A. core requirements. Following completion of all core requirements, an elective is selected from available health administration courses to meet the student’s interests, career objectives, and academic requirements. The course requirements for the M.B.A./M.H.A. degrees and the format of the program follow.

1. Cornerstone Core Courses (7.5-13.5 hours): These courses provide a solid intellectual grounding within an integrative framework that sets the stage for the entire program. Managing in the Global Economy cannot be waived. Waiver of Strategic Business Communications and Financial Statement Analysis maybe waived based on education or work experience. Once a course is waived, it may not be taken later for credit. Foundation courses and Cornerstone Core courses may be taken concurrently.

- MBA 8000 Managing in the Global Economy (3)
- MBA 8015 Strategic Business Communication (3)
- MBA 8025 Financial Statement Analysis (3)
- MBA 8040 Data Driven Decision Making (3)
• MBA 8045 Analytics Experience (1.5)

2. Functional Core Courses (4.5-10.5 hours): The functional core offers curricular breadth. Up to 6 hours (two courses) in this category may be waived based on a student’s undergraduate degree. Once a course is waived, it may not be taken later for credit. MBA 8000 and MBA 8025 are prerequisites for every Functional Core course, and MBA 8015 and MBA 8040 are co-requisites.

• MBA 8115 Managerial Accounting and Control Systems (1.5)
• MBA 8135 Corporate Finance (3)
• MBA 8145 Marketing Management (3)
• MBA 8165 Leadership and Organization Behavior (3)

3. Business Elective Course (3 hours): At least one business elective chosen from this list are required of all students:

• MBA 8125 Digital Innovation (3)
• CIS 8000 IT Project Management (3)
• MGS 8730 Project Management (3)

4. Required Courses in Health Administration (27 hours):

• HA 8160 Introduction to the Health Care System (3)
• HA 8190 Health Policy and Ethics (3)
• HA 8250 Health Economics and Financing (3)
• HA 8440 Executive Leadership in Health Care (3)
• HA 8450 Legal Environment of Health Care (3) Replaces MBA 8030, Legal Environment: Ethics and Corporate Governance, in the MBA curriculum.
• HA 8550 Healthcare Financial Management and Planning (3)
• HA 8620 Operations Management and Quality in Health Care (3) Replaces MBA 8155, Operations Management, in the MBA curriculum.
• HA 8670 Health Information Systems (3)
• HA 8990 Strategic Management in Health Care (3) Replaces MBA 8820, Global Competitive Strategy in the MBA curriculum.

5. Electives in Health Administration (9 hours). At least three 8000-level health administration electives chosen from this list are required of all students:

• HA 8460 Human Resource Management in Health Care (3)
• HA 8680 Care Management and Delivery Systems (3)
• HA 8700 Health Services Research and Evaluation Methods (3)
• HA 8750 Predictive Analytics in Healthcare (3)

6. Residency Requirement (3 hours).

An administrative residency or experiential learning of one academic semester is required to provide an opportunity for synthesizing and applying the curriculum. Residencies are available in hospitals, health
service facilities, organizations, and corporations throughout the country. The Institute of Health Administration assists students who are responsible for obtaining the residency, works with the preceptor to develop student protocols, and evaluates the residency. Three hours of credit will be awarded for the academic semester of residency, upon completion of HA 8810. The residency is subject to the same matriculation/tuition fees taken on campus for these three semester hours. Students must meet all report/evaluation assignments. With approval by the faculty of the Institute, the administrative residency for international students or students with extensive experience may be replaced with a special project that will more appropriately prepare the person for service in the health system. The time period required to complete the project will be determined by the faculty but may not exceed the regular residency period.

Note: If changes to the MBA curriculum are implemented, students are advised to contact the Institute of Health Administration for impact on degree requirements.
7180 Master of International Business

Penelope B. Prime, MIB Program Director

The Master of International Business program in the Institute of International Business is offered in a one year format. The Master of International Business (MIB) is designed to meet the needs of students who wish to acquire a strong background in international business preparing them for careers in an increasingly globally interconnected and interdependent business environment.

The goals of the MIB program are to: (1) extend functional skills to address managerial issues in the global marketplace; and (2) enhance students' intercultural awareness and sensitivity. Course requirements are intended to strengthen functional skills required for an enterprise competing in the global economy. The curriculum is further enhanced through a supervised international business field study, often embedded in the rich and diverse business community surrounding Georgia State University. Students also gain a familiarity with doing business in different world regions.

7180.10 Regulations for the Degree

1. Eligibility. Applicants must hold a four-year undergraduate degree from an accredited college or university. Candidates will be evaluated based on interviews, grade point average, GMAT or GRE and TOEFL or IELTS scores if needed. Ability to handle demanding coursework and contribute to the cohort will also be considered. Professional experience and foreign language proficiency are not required.

2. Foundation coursework. Students accepted into the program with non-business undergraduate degrees are required to take online preparatory classes that cover essential concepts in economics, accounting, finance, and statistics prior to starting the program.

3. Course Requirements: The rigorous 10 course, 30-credit curriculum provides graduates with an in-depth knowledge of international business fundamentals. Students also benefit from extensive contact with corporate executives, guest speakers, and professional and social events.

Required curriculum for the MIB is as follows (30 hours):

IB 8080 Legal Aspects of International Business (3)

IB 8090 International Business Environment (3)

IB 8100 International Entrepreneurship (3)

IB 8180 Doing Business in Emerging Markets (3)

IB 8550 Special Topics in International Business (3)
IB 8090 Analyzing International Business Problems (3)

IB 8630 International Business Negotiation (3)

IB 8990 Policy & Strategy in the International Marketplace (3)

and one of the following:

IB 8190 Doing Business in World Regions (3)

FI 8040 Survey of International Finance (3)

and one of the following:

IB 8510 International Business Field Study (3)

IB 8500 International Business Internship (3)

For additional information, please visit the following website: http://iib.robinson.gsu.edu/academic-programs/mib-one-year/
The Flexible Master of Professional Accountancy (Flex MPA) program is flexible in that students may take up to five years to complete the program and may choose which courses to take each semester. The objective of the Flexible MPA program is to prepare students for professional careers in accounting. More specifically, the objective of the Flexible MPA programs is to develop skills needed to excel in a professional path toward a leadership position in the practice of accountancy. The Flexible MPA program uses the student’s previously acquired undergraduate skills to focus on developing advanced technical and analytical skills in accounting. The primary objectives are for students to develop and integrate: (1) skills for analyzing organizational performance systems that incorporate global and ethical dimensions; (2) skills in financial reporting; (3) assurance skills; (4) skills for collaborative work in teams; and (5) communication and technology skills. Typically, graduates of this program will find professional accounting positions in public accounting firms and in business and governmental organizations that have a need for graduates with greater depth and breadth in the discipline of accounting than is generally available in graduates with a B.B.A. or M.B.A. in accounting.

7190.10 Admissions

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. It is assumed that a person entering the fifth (graduate) year of the professional accounting program will have or will acquire the equivalent of the preparation offered in the four years of Georgia State’s B.B.A. program in accounting.

An accepted applicant, who at the time of admission to the Flexible MPA program, has not completed the foundation and prerequisite courses must complete these requirements in a manner approved by the faculty adviser and the director of master’s admissions.

7190.20 Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the Flexible MPA program. A maximum of six semester hours of transfer credit is permitted in this 30-hour program. The course requirements for the Flexible MPA degree and the format of the program follow.

2. Course Requirements: Foundation and Prerequisite Courses Consult the Course Descriptions chapter of the Georgia State University Undergraduate Catalog for prerequisites to the undergraduate courses listed below. This catalog is available on the web at http://catalog.gsu.edu; click on Students then Catalogs. The courses in this section are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent coursework has been previously completed with minimum grades of C-.

Accounting: ACCT 2101 and ACCT 2102, or MBA 8025 and MBA 8115; ACCT 4111, ACCT 4112, ACCT 4113, ACCT 4210, ACCT 4310, ACCT 4510, and ACCT 4610.
Behavioral Science: MBA 8165 Leadership and Organizational Behavior or management principles (MGS 3400).

Programming: Visual BASIC or C/C++ (CIS 3260): required if ACCT 8630 (Information Technology Auditing) is taken as an elective.

Economics: Both macroeconomic principles (Econ 2105) and microeconomic principles (ECON 2106).

Mathematics: College algebra (MATH 1111) and either calculus (Math 1220) or discrete math (Math 2420). Math 2420 has precalculus as the minimum prerequisite.

Statistics: MATH 1070 Elementary Statistics.

Management Science: MGS 3100

Finance: Corporate finance principles (FI 3300).

Graduate students who receive a grade lower than a grade of C- in any undergraduate accounting course may repeat that course but may not enroll in any other accounting course until a grade of C- or higher is earned in that course Flexible MPA students who have undergraduate accounting courses required and who have financial aid should refer to “Courses Eligible to Count Toward Graduate Students’ Financial Aid” before registering for the first time with graduate status.

3. Course Requirements:

a. Required Courses (24 hours)

- MBA 8015 Strategic Communications (3)
- ACCT 8120 Advanced Federal Taxation (3)
- ACCT 8130 Advanced Accounting Topics (3)
- ACCT 8310 Seminar in Management Accounting Systems (3)
- ACCT 8420 Special Topics in Financial Accounting
- ACCT 8610 Advanced Topics in Assurance Services (3)
- ACCT 8700 Financial Statement and Business Analysis (3)
- ACCT 8740 Seminar on Internal Auditing (3)

b. Electives in the Specialization (6 hours).

Select any two 8000-level ACCT classes.

4. Advisement/Course Selection: The Flexible MPA program coordinator is available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.
5. The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in accounting or taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.

6. Time Limit: The time limit for completing the Flexible MPA program is five years from the first semester a course in the program.
Robinson’s One-year Regynald G. Washington Master of Global Hospitality Management is the only program of its kind in the state of Georgia. This year-long cohort program provides the critical decision-making, managerial, practical, analytical, technical, and leadership skills necessary for success in today’s global hospitality and tourism environment. Students benefit from extensive networking and connecting with hospitality executives worldwide and professional gatherings. Program enrolls in the fall semester only.

Students proceed as a group through a sequenced curriculum of modules beginning each August. The program may be offered in an online cohort and/or as a classroom-based cohort. Classroom-based cohorts meet every Tuesday and Thursday evening from 5:30 to 9:45 p.m. All classes are taught at the Georgia State University’s Executive Education Center in Buckhead.

Curriculum

The 30-hour curriculum comprises 10 courses including:
• Survey of Hospitality and Tourism
• Economic Cultural Impact of Travel and Tourism
• Global Trends in the Foodservice Industry
• Global Trends in the Lodging Industry
• International Special Event Management
• Hotel Assets
• Sustainable Operations in Hospitality
• Hospitality and Tourism Research Methodology
• Applied Industry-Based Research Project
• Financial Management Applications in Hospitality Enterprises

In addition to the 10 courses, students must fulfill the specialized master’s foundation requirements found in section 7110.10
7195 Cohort Master of Professional Accountancy

Winifred Akande, Associate Director of Integrated Graduate Student Services, wakande1@gsu.edu

Kaile Rackley, Graduate Recruitment Coordinator, krackley@gsu.edu

The objective of the Cohort Master of Professional Accountancy (Cohort MPA) degree program is to prepare non-accounting students for professional careers in accounting. More specifically, the Cohort MPA program develops skills needed for non-accounting professionals to excel in a professional path in accountancy. The Cohort MPA provides students with the knowledge, skills and upper level credit hours required to become eligible to sit for the Certified Public Accountant exam or Certified Management Accountant exam within one year — a process that usually takes more than two years to complete. The program starts all students with intermediate accounting building on their knowledge of Principles of Accounting I and II. Typically, graduates of this program will find professional accounting positions in public accounting firms and in business and governmental organizations.

7195.10 Admissions

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. All applicants must take the GMAT/GRE and each finalist may be interviewed before an admission decision is made.

An accepted applicant, who at the time of admission to the MPA program, has not completed the foundation and prerequisite courses must complete these requirements in a manner approved by the faculty adviser and the director of master’s admissions.

7195.20 Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MPA program.

2. Course Requirements: Foundation and Prerequisite Courses Consult the Course Descriptions chapter of the Georgia State University Undergraduate Catalog for prerequisites to the undergraduate courses listed below. This catalog is available on the web at http://catalog.gsu.edu; click on Students then Catalogs. The courses in this section are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent coursework has been previously completed with minimum grades of C-.

**Accounting:** ACCT 2101 and ACCT 2102, or MBA 8025 and MBA 8115;

**Economics:** Both macroeconomic principles (Econ 2105) and microeconomic principles (ECON 2106).

**Mathematics:** College algebra (MATH 1111) and either calculus (Math 1220) or discrete math (Math 2420). Math 2420 has precalculus as the minimum prerequisite.

Graduate students who receive a grade lower than a grade of C- in any undergraduate accounting course
may repeat that course but may not enroll in any other accounting course until a grade of C- or higher is earned in that course. Flex MPA students who have undergraduate accounting courses required and who have financial aid should refer to “Courses Eligible to Count Toward Graduate Students’ Financial Aid” before registering for the first time with graduate status.

3. Course Requirements: The rigorous 10-course curriculum provides graduates with broad and deep functional knowledge as well as the upper-level credit hours required for CPA/CMA eligibility.

- ACCT 8005 Current Issues in Accounting (3)
- ACCT 8010 Financial Accounting I (3)
- ACCT 8020 Financial Accounting II (3)
- ACCT 8030 Managerial Accounting and Systems (3)
- ACCT 8040 Topics in Federal Taxation (3)
- ACCT 8050 Assurance and Information Systems Control (3)
- ACCT 8130 Advanced Accounting Topics (3)
- ACCT 8120 Advanced Federal Taxation (3)
- ACCT 8420 Special Topics in Financial Accounting (3)
- ACCT 8700 Financial Statement and Business Analysis (3)

4. Advisement/Course Selection: The MPA program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

5. The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in accounting or taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.
7196 JD/MPA Joint Program

Winifred Akande, Associate Director of Integrated Graduate Student Services, wakande1@gsu.edu

The College of Law and the J. Mack Robinson College of Business offer a joint degree program that allows students simultaneously to pursue advanced coursework in Law and Public Accountancy (the “JD/MPA Program”). Full-time students are able to satisfy all requirements for both a Juris Doctorate and a Master of Professional Accountancy (MPA) in as little as four years, or eight semesters, as opposed to the five years, or ten semesters, that would be required if the two degrees were pursued separately.

7196.10 Admissions

Candidates interested in the joint-degree program must satisfy the admissions requirements and be admitted to each College separately. Applicants should contact the Admissions Office of each school for application information. Students must take the GMAT or GRE for admissions to the J. Mack Robinson College of Business and the LSAT for admission to the College of Law.

The application procedures and admission criteria are given in the “Master’s Admissions” section of this chapter. All applicants must take the GMAT/GRE and each finalist may be interviewed before an admission decision is made.

The application procedures and admission criteria are given in chapter 6000 “College of Law” for the JD program.

An accepted applicant, who at the time of admission to the MPA program, has not completed the foundation and prerequisite courses must complete these requirements in a manner approved by the faculty adviser and the director of master’s admissions.

7196.20 Regulations for the Degree

After students have been admitted to both programs and have declared their intent to enter the dual degree program, they must, at their first opportunity, complete the first 31 credit hours of required courses in the JD program. After the first 31 required credit hours of law are complete, enrollment in either college or both concurrently is permitted.

For the MPA, the J. Mack Robinson College of Business requires all candidates to complete 24 credit hours of general business coursework. Students without an undergraduate degree in accounting must also complete two introductory accounting courses (Acct 2101 and Acct 2102, or MBA 8025 and MBA 8115) and 21 semester hours of undergraduate (4000 level) accounting courses. Additionally, the J. Mack Robinson College of Business requires students to complete 30 credit hours of 8000-level courses: a three-credit hour strategic communications course, 21 credit hours of required accounting and tax courses, and six credit hours of accounting and tax electives.

The College of Law requires all JD candidates to complete 90 credit hours of law courses (43 of which are required courses and 47 of which are elective courses).
Students enrolled in the Joint JD/MPA Program are permitted to apply 24 credit hours of law courses toward the required 24 credit hours of general business coursework. In addition, the J. Mack Robinson College of Business will allow 12 semester hours of law courses to be credited toward the 30 credit hours of 8000 level required MPA courses, as follows: six credit hours of law courses applied toward the six credit hours of elective MPA courses; a three credit hour tax law course applied toward the required course TX 8020, and a three credit hour law course applied toward the three credit hour strategic communications course.

Reciprocally, the College of Law will allow 12 credit hours of 8000-level MPA courses to be credited towards the requirements of the JD program. Thus, a student enrolled in the Joint JD/MPA Program student will be able to complete the requirements for both degrees by completing 18 credit hours in the Robinson College of Business and 78 credit hours in the College of Law.

Degree requirements for both programs must be complete within eight years of the student’s initial semester of enrollment in the MPA Program. The JD degree must be completed within six years of the student’s initial enrollment in the JD program. Students must satisfy the degree requirements of each school and should consult with advisors in each school for the precise graduation requirements for each degree and for information about course offerings. JD candidates may apply for the MPA program at any point. MPA candidates may enroll in the joint program at any point prior to completion of 21 semester hours of 8000-level MPA coursework.

Advisement/Course Selection: The MPA program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in accounting or taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.
The Master of Science program allows students to concentrate their studies in one of the six majors listed below:

- Business Economics
- Finance
- Managerial Sciences
- Marketing
- Wealth Management
- Risk Management and Insurance

The Master of Science program is designed particularly for students who already have an undergraduate degree in business administration and wish to study one of the disciplines in which a major is offered in greater depth. Students who do not have an undergraduate background in business but have already established a career in a field related to one of the M.S. majors may find that the specialized degree can be tailored to fit career needs.

The requirements for each of these major fields of study are given in the following sections.

**7200.05 Major in Business Economics**

Jon Mansfield, Program Director, 404-413-0151, jmansfield@gsu.edu

The mission of the business economics major in the Master of Science program is to prepare students to function successfully as professional economists in the corporate and business environment. More specifically, the program endeavors to:

- build a solid background in micro and macroeconomic theory;
- equip students with an extensive knowledge of analytical and statistical techniques;
- provide expertise and practice in applying theory and quantitative tools to actual business problems; and
- ensure that students are able to communicate this information both in a technical way to peers and in a more general way for decision-making by upper management.

**Regulations for the Degree**

1. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S./Bu.E. program. A maximum of six hours of transfer credit is permitted in this 30-hour program.

2. Course Requirements: The course requirements for the degree of Master of Science with a major in business economics and the format of the program follow. If prerequisites for the courses listed in each section have not been previously completed, they must be taken as additional hours. Consult the Course Descriptions chapter of this catalog for a listing of the prerequisites for each graduate course.
Undergraduate foundation course descriptions and prerequisites are shown in the Georgia State University Undergraduate Catalog. This catalog is available on the web at catalog.gsu.edu.

a. Foundation Courses. The courses in this list are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher.

Accounting: Financial accounting principles (ACCT 2101).

Behavioral Science: Management principles (MGS 3400).

Economics: Intermediate macroeconomics (ECON 3900) and microeconomics (ECON 3910). Prerequisites are ECON 2105 and ECON 2106, respectively.

Mathematics: Calculus (ECON 6030 or MATH 1220).

Statistics: MATH 1070.

b. Required Courses (15 hours)

Fifteen hours is the minimum amount of course work in this portion of the program. Any prerequisites for these courses that have not been previously satisfied must be taken as additional hours. Consult the Course Descriptions chapter of this catalog for a listing of the prerequisites for each of these required courses.

- ECON 8100 Applied Microeconomic Analysis (3)
- ECON 8110 Macroeconomic Analysis (3)
- ECON 8430 Theory of the Firm and Business Strategy (3)

Select two of the following four:

- MGS 8110 Applied Regression Analysis (3)
- ECON 8710 Introduction to Statistical Foundations for Econometrics (3)
- ECON 8740 Applied Statistics and Econometrics (3)
- ECON 8780 Financial Econometrics (3)

c. Economics Electives (15 hours): Electives will be selected consistent with the student’s planned program. They must be approved in advance by the M.S./Bu.E. Program director, Dr. Jon Mansfield. The suggested electives are listed below (all courses are 3 credit hours):

- ECON 8180 Applied Economic Analysis
- ECON 8440 Industrial Organization & Antitrust Economics
- ECON 8740 Applied Statistics & Econometrics
- ECON 8840 Applied Statistics & Econometrics 2
- ECON 8860 Economics Of Global Finance
- FI 8000 Valuation Of Financial Assets
- FI 8020 Financial Analysis & Loan Structure
- FI 8040 Survey of International Finance
3. Program of Study. Each student’s program must be planned in consultation with the M.S./Bu.E. program director before a non-required course is taken. Students may contact the department (404-413-0141) or Dr. Mansfield (jmansfield@gsu.edu) to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to the Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

4. Time Limit: The time limit for completing the M.S./Bu.E. program is five years from the first semester a course in section B or C (above) is taken.

7200.15 Major in Finance

This program is currently only available in the cohort format.
Alfred Mettler, Program Director, 404-413-7327, mettler@gsu.edu

Conrad Ciccotello, Program Director Asset & Wealth Management Specialization, 404-413-7462, cciccotello@gsu.edu

Cohort MS in Finance format

The Cohort Master of Science in Finance is offered in a one-year format with three distinctive specializations. The program is ideally suited for accounting, finance, banking, and wealth management professionals wishing to augment their professional expertise and is focused on the decision-making, personal, analytical and technical skills required to compete in today’s ever-changing financial environment.

In addition, students are provided leadership training as well as extensive contact with senior executives through a guest speaker series, class participation, and professional and social gatherings. Furthermore there is an opportunity for students to be part of a formal mentoring program.
Applicants must hold a four-year undergraduate degree from an accredited college or university. Work experience is preferred but not required.

Robinson’s Cohort MS-Finance will be offered in a one-year format over three semesters. Class size will be limited and students will proceed as a cohort—a structure that fosters peer learning, collaboration and the building of lifelong business networks. The courses will be taught at Robinson’s Executive Education Center in Buckhead and will meet every Monday evening from 5:30 p.m. to 9:45 p.m. and every other Wednesday evening from 5:30 p.m. to 9:45 p.m. during the Spring and Fall semesters. Two classes will be offered during the Summer semester with a month-long break in between. Two innovative courses, Current Issues in Finance and Financial Leadership – Leading the Finance Function, designed to promote interaction with senior level finance executives, will meet four Saturdays during every Spring and Fall semester. Program enrolls in the spring and fall semesters in 2016 and fall semester only beginning in 2017.

The 30-hour curriculum comprises of an integrated first semester, in which all students take the same classes. At the end of the first semester students will choose their specialization. In addition to the 30-hour curriculum, students will need to complete the specialized master’s foundation courses referenced in section 7110.10.

The three specializations in the Cohort MS Finance Program are:

- Corporate Finance
- Global Capital Markets and Financial Services
- Asset and Wealth Management

Cohort MS Finance Curriculum

Spring Semester (all students, regardless of later specialization)

- MBA 8135 Corporate Finance
- FI 8000 Valuation of Financial Assets
- FI 8450 Financial Analysis of Asset and Wealth Management
- FI 8070 Financial Leadership

Summer Semester

Corporate Finance specialization

- FI 8310 Investment Banking
- FI 8020 Financial Analysis and Loan Structuring

Global Capital Markets and Financial Services specialization

- FI 8310 Investment Banking
- FI 8020 Financial Analysis and Loan Structuring

Asset and Wealth Management specialization
- ACCT 8040 Topics in Federal Taxation
- FI 8020 Financial Analysis and Loan Structuring

Fall Semester

Corporate Finance specialization
- FI 8360 Special Topics in Finance
- FI 8200 Derivative Markets
- FI 8320 Corporate Financial Strategy
- FI 8070 Financial Leadership
- FI 8090 Financial Data Analytics
- FI 8389/8391 Internship/CPT

Global Capital Markets and Financial Services specialization
- FI 8360 Special Topics in Finance
- FI 8240 Global Portfolio Management
- FI 8260 Hedge Funds and Their Trading Strategies
- FI 8070 Financial Leadership
- FI 8090 Financial Data Analytics
- FI 8389/8391 Internship/CPT

Asset and Wealth Management specialization
- PFP 8420 Financial Advice and Planning over the Life Cycle
- FI 8240 Global Portfolio Management
- FI 8260 Hedge Funds and Their Trading Strategies
- PFP 8520 Advanced Studies in Asset and Wealth Management
- FI 8090 Financial Data Analytics
- FI 8389/8391 Internship/CPT

Flex MS in Finance format

* This program is currently not offered in a Flex format, and is only available in the cohort format.

The MS-Finance curriculum is designed to provide graduates with advanced knowledge of master's-level finance, including particular expertise in their area of specialization (chosen from Corporation Finance, Investments, or Financial Institutions and Markets). The primary emphasis of the program is to provide students with the theoretical, analytical and technical skills necessary to examine particular financial situations, formulate alternative plans for action and develop policy initiatives. The program prepares graduates to understand the context for issues encountered in the rapidly evolving domestic and international financial environment. Quantitative and analytical course requirements in the areas of optimization techniques, computer modeling and statistical methodology complement the finance course requirements.

Regulations for the Degree
1. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S.-Finance program. A maximum of six hours of transfer credit is permitted in this program only if 12 hours are taken in section B below; otherwise a maximum of three hours of transfer credit is permitted.

2. Course Requirements. The course requirements for the degree of Master of Science with a major in finance and the format of the program follow.

a. Foundation Courses. The courses in this list are in addition to the 30 semester hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher.

**Accounting:** MBA 8025 or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300).

**Behavioral Science:** MBA 8165 Leadership and Organizational Behavior or Management principles (MGS 3400) or marketing principles (MK 3010).

**Economics:** Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

**Mathematics:** College algebra (MATH 1111) and calculus (MATH 1220).

**Statistics:** MATH 1070 or equivalent.

b. Required Major/Technical Support Courses (9-12 hours). These courses must be completed during the first 18 hours of 8000-level course work in the M.S.-Fi program.

- MGS 8020 Business Intelligence (3) (or MBA 8025 Financial Statement Analysis (3) subject to approval by the MS faculty advisor)
- MGS 8150 Business Modeling (3)
- MGS 8110 Applied Regression Analysis (3)
- MBA 8135 Corporate Finance (3)

**Note:** MBA 8135 may be exempted (with replacement) if FI 3300, FI 4300, and FI 4320 or their equivalents have been completed with grades of C or higher at the time of admission.

c. Specializations (18-21 hours). Students not exempting MBA 8135 are required to take 18 hours of Fi-prefixed courses; 21 hours if exempting MBA 8135. These courses consist of the following:

(i) All M.S.-Finance students are required to take the following course:

- FI 8000 Valuation of Financial Assets (3)

(ii) All students are also required to take a minimum of nine (9) semester hours within a chosen finance specialization. Three areas of specialization are shown below along with various courses considered
appropriate for each area that students may select from.

(iii) In addition to FI 8000 (3 hours) and the 3 courses (9 hours) comprising the chosen finance specialization, students must select an additional six to nine semester hours of any other Fi-prefixed courses (6 hours if MBA 8135 is not exempted; 9 hours otherwise).

Fi-prefixed courses comprising Specializations:

Corporate Finance

- FI 8040 Survey of International Finance (3)
- FI 8200 Derivative Markets I (3)
- FI 8300 Advanced Corporate Finance (3)
  - FI 8320 Cases and Readings in Corporate Finance (3)
- FI 8350 Corporate Restructuring and Workouts (3)
- FI 8360 Special Topics in Corporate Finance (3) *

* May be taken multiple times for different topics.

Investments

- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8200 Derivative Markets I (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Trading Strategies (3)
- FI 8310 Investment Banking (3)

Financial Institutions and Capital Markets

- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8040 Survey of International Finance (3)
- FI 8260 Hedge Funds and Their Trading Strategies (3)
- FI 8400 Financial Institutions (3)
- FI 8420 The Financial System (3)
- FI 8440 Finance and Banking in the Global Economy (3)

The Department encourages all students pursuing the M.S.-Finance degree to take FI 8000 early in their program as it is a prerequisite for all electives except FI 8020 and FI 8040. FI 8000 is designed so that it may be taken concurrently with MBA 8135 to provide students greater scheduling flexibility.

3. Program of Study. Each student’s program of study must be planned in consultation with the M.S.-Finance program director prior to the completion of the first semester of enrollment. A copy of the program will be filed with the Office of Graduate Recruiting and Student Services (GRSS) for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to GASS. Students always must consult the Course Descriptions chapter of this catalog to determine if they have met the prerequisites for any
7200.20 Major in Managerial Sciences

Thomas Conklin, Program Director, tconklin@gsu.edu

The Master of Science with a major in managerial sciences prepares professionals to assume leadership roles in organizations. Students learn critical management skills that allow them to communicate successfully, think creatively and adapt quickly to business fluctuations and transformations. There are two concentrations available for managerial sciences majors:

1. **Talent Management**: The talent management concentration prepares students to effectively recruit, retain and develop employees by focusing on best practices in selection, compensation and employment law.

2. **Supply Chain and Analytics Management**: The supply chain and analytics management concentration is designed to provide students with the knowledge necessary to assess the operations function of both goods-producing and service-rendering organizations, to diagnose current operating systems, and to prescribe and implement improvements. It also provides expertise for analytically oriented careers in business with an emphasis on applications of information technology

While this program is structured in both cohorted and non-cohorted formats, it is anticipated that all admissions in the coming year will be in the cohorted format only.

**Regulations for the Degree**

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the Master of Science in Managerial Sciences.

2. Course Requirements. The course requirements for the degree Master of Science with a major in Managerial Sciences and the format of the program follow:

   a. Foundation and Prerequisite Courses. See section 7110.10 for the foundation requirements for this degree.

   b. Required Courses in the Major. Choose one of these tracks:

   **Concentration 1: Talent Management**

   Kelly Grace, Faculty Coordinator

   - MGS 8200 Introduction to the Management of People, Processes and Projects
   - MGS 8320 Legal Environment of Human Resource Management
c. Elective Courses. 18 hours. Choose courses with a MGS prefix (including any courses listed in the one concentration not chosen).

3. Program of Study/Course Prerequisites. With the exception of cohort-enrolled students, each student’s program must be planned in consultation with the faculty coordinator for his or her concentration before a non-required course is taken. Students may contact the department to schedule an appointment. A copy of the program of study will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty coordinator and a copy of the changes sent to the Office of Graduate Student Services. Students must always consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

4. Time Limit. The time limit for completing the M.S./Managerial Science program is five years from the first semester a course in section B or C (above) is taken.

One Year MS in Managerial Sciences Format

The One Year Master of Science in Managerial Sciences is a cohorted program. In addition to the required courses in the two tracks listed above, the 18 credit hours of electives will be pre-selected for the entire cohort.

7200.25 Major in Marketing

Bruce K. Pilling, Program Director, 404-413-7673, bpilling@gsu.edu

The MS in marketing is designed primarily for persons with an undergraduate business degree who want to distinguish themselves as marketing specialists. The major is designed to provide the in-depth theoretical and applied training needed to excel in a leadership position in marketing. The program extends the students’ previously acquired basic business and marketing skills by developing advanced technical and analytical competency in a selected area. It therefore allows graduates to make more informed decisions in an increasingly complex marketing environment.
This program is currently only available in the one year format.

Regulations for the Degree

1. The Masters of Science in Marketing is now available in a one year fast-track format. For additional information on this format, please visit the following website: http://marketing.robinson.gsu.edu/academic-programs/ms/.

2. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S./Marketing program. A maximum of six hours of transfer credit is permitted in this 30-hour program.

3. Course Requirements. The course requirements for the degree Master of Science with a major in marketing and the format of the program follow:

   a. Foundation Courses. The courses in this list are in addition to the 33 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Descriptions chapter of the Georgia State University Undergraduate Catalog. This catalog is available at catalog.gsu.edu.

      **Accounting/Finance:** MBA 8025, or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300).

      **Behavioral Science:** Management principles (MGS 3400), managerial decision making (MGS 4000), marketing principles (MK 3010), psychology (PSYC 1101), sociology (SOCI 1101) or anthropology (ANTH 1102).

      **Economics:** Microeconomic principles (ECON 2106).

      **Mathematics:** College algebra (MATH 1111).

      **Statistics:** MATH 1070.

   b. Required Courses in the Major (9 hours)

      - MBA 8145 Marketing Management (3)
      - MK 8100 Buyer Behavior (3)
      - MK 8200 Marketing Research (3)

   c. Marketing Electives (18 hours). These electives may be chosen from among the 8000-level marketing courses that are not required as core or capstone courses. A maximum of nine hours of appropriate 8000-level courses from other departments in the Robinson College of Business or from elsewhere in the university may be substituted for these courses with departmental approval.

   d. Capstone Course (3 hours).
4. Program of Study. Each student’s program must be planned in consultation with the M.S./marketing faculty adviser before a non-required course is taken. Contact the department to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty advisor and a copy of the changes sent to the Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

5. Time Limit. The time limit for completing the M.S./marketing is five years from the first semester a course in sections B, C, or D (above) is taken.

One Year MS in Marketing format

One Year Master of Science (MS) in Marketing is a year-long cohort program for marketing professionals who want to update/expand their knowledge, managers who oversee marketing activities but lack formal training, and career changers. Students proceed as a group through a sequenced curriculum of five session modules.

In addition to the required courses outlined in the general curriculum above, candidates must take 21 credit hours of pre-selected electives for this one year format. Students must fulfill the specialized master's foundation requirement (section 7110.10). Courses meet at Georgia State University’s Buckhead Center on Monday and Wednesday evenings. New cohorts begin in January of each year. Program enrolls in the spring semester only.

The internationally renowned faculty of Robinson’s Department of Marketing and its Center for Excellence in Brand and Customer Management developed the program, drawing on their expertise as researchers and theorists, strategists and practitioners. Concurrent to earning a Master of Science in Marketing, students also will earn Robinson’s Certificate in Brand and Customer Management.

The program is open to full-time working professionals, full-time students and international students.

7200.30 Major in Wealth Management

Conrad S. Ciccotello, Program Director, 404-413-7462, cciccotello@gsu.edu

Robinson’s MS in Wealth Management program places an emphasis on the individual student’s specific goals and objectives with regard to advancement in the financial advisory profession. Shifting in risk from government and business to families and individuals, changing regulation, and the explosion of new financial products and services create an enormous opportunity in the field of wealth management. The Robinson College of Business has offered graduate business programs in personal financial planning and wealth management for nearly thirty years. Program enrolls in the spring semester only.

The program is designed to be completed in a sixteen-month period, beginning in January and concluding
in April of the following year. Classes meet at Georgia State University’s Buckhead Center on Tuesday and Thursday evenings from 5:30 to 9:45 p.m.

Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the M.S./WMGT program.

2. Course Requirements. The course requirements for the Master of Science degree with a major in wealth management and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

   a. Foundation and Prerequisite Courses. The courses in this section are in addition to the 33 semester hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts see section 7110.10.

   Accounting/Finance: MBA 8025, or financial and managerial accounting principles and corporate finance principles (ACCT 2101, ACCT 2102, and FI 3300).

   Behavioral Science: Management principles (MGS 3400), psychology (PSYC 1101), or sociology (SOCI 1101).

   Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

   Mathematics: College algebra (MATH 1111) and calculus (MATH 1220).

   Statistics: MATH 1070.

   Legal Studies: MBA 8030 or BUSA 2106.

   Taxation: ACCT 4510.

Wealth management students are expected to be competent in computer operating systems (Windows-based or equivalent), word processing, and a spreadsheet package. Competence in mathematics of finance also is required and can be achieved through self study of math of finance tutorial outlines and manuals available in university bookstores.

b. The MS in Wealth Management program consists of 11 graduate courses (33 credit hours) including:

   - MBA 8135 Corporate Finance
   - FI 8000 Valuation of Financial Assets
   - FI 8240 Global Portfolio Management
   - FI 8260 Hedge Funds and their Trading Strategies
   - FI 8440 Finance and Banking in the Global Economy
   - PFP 8400 Personal Financial Planning
   - PFP 8420 Financial Advice and Planning over the Life Cycle
3. Time Limit. The time limit for completing the M.S./WMGT program is five years from the first semester a course in section B or C (above) is taken.

7200.35 Major in Risk Management and Insurance

There are two specializations in the risk management and insurance major in the Master of Science program: Risk and Insurance and Mathematical Risk Management.

The mission of the Specialization in Risk and Insurance is to educate students in the theory and practice of risk management and insurance at an advanced level through a customized program of study. The program is designed to prepare students for analytical and technical staff, consulting, and applied research positions in risk management, employee benefits and insurance. The program is suited especially to the needs of students who have undergraduate business degrees or MBA degrees and who desire further course work in risk and insurance to enhance their professional careers.

Program Director: Martin F. Grace

The mission of the Specialization in Mathematical Risk Management is to provide students with a solid understanding of the application of mathematics in economics and finance to address contemporary risk management issues. Emphasis is placed on the diagnosis, analysis, pricing and customization of solutions to risk management problems, broadly defined to include both financial and operational risk exposures. The program is designed to prepare students for analytical and technical positions within financial institutions, risk management advisory organizations, and the treasury departments of non-financial corporations. Quantitative in focus, the program is well suited for students with undergraduate and graduate degrees in mathematics, statistics or similar technical disciplines. Students with an MBA or undergraduate degree in economics, finance or actuarial science, who can demonstrate the necessary skills in mathematics, also make excellent candidates.

The Specialization in Mathematical Risk Management can be completed in 16 months over three semesters. Since the core courses are designed in a lockstep format, students should be prepared to begin their core sequence during the fall semester. Students who have not completed the foundational requirements for the degree should apply for admission during either the spring or summer semester so they can complete the prerequisites before the core sequence begins in the fall. Please contact the MRM program director for advice about the appropriate time when you should apply to enter the program.

Two dual-degree options are available: one in which students will earn both the Master of Actuarial Science degree and the Master of Science in Risk Management and Insurance degree specializing in Mathematical Risk Management (MAS/MRM); and one in which students will earn both the Master of Science in Analytics degree and the Master of Science in Risk Management and Insurance degree specializing in Mathematical Risk Management (MSA/MRM). The programs provide students with increased career opportunities in the financial services industries specializing in the application of quantitative methods to
solve complex business problems in an era of financial services and capital markets convergence.

Program Director: Daniel Bauer

Regulations for the Degree

1. All Master of Science students will complete the Business Communication Skills Requirement explained earlier in this section. The Summary of Regulations-Master’s Programs, also found earlier in this section, applies to the M.S. program with a major in risk management and insurance as do the regulations, policies and procedures given in Section 7 (Master’s enrollment). A maximum of 6 hours of transfer credit is permitted in this Master of Science in Risk Management and Insurance program. A maximum of 9 hours of transfer credit is permitted in the 50-hour dual degree programs.

2. Course Requirements: Foundation and Prerequisite Courses Consult Section 10 (Course descriptions) and the heading “Undergraduate Foundation Courses” later in this bulletin for prerequisites to the courses listed below. The courses in this section are in addition to the 32 semester hours required for the Master of Science in Risk Management and Insurance degree or the 50 semester hours required for the dual degree programs. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent coursework has been previously completed with minimum grades of “C.”

Accounting/Finance: MBA 8025, or financial and managerial accounting and corporate finance principles (ACCT 2101, ACCT 2102 and FI 3300). Students specializing in Mathematical Risk Management must have completed Corporate Finance (MBA 8135). This requirement can be waived if FI 3300 and FI 4000, or equivalent coursework, have been completed with grades of “C” or higher.

Behavioral Science: MBA 8165 Leadership and Organizational Behavior or Management principles (MGS 3400). Students specializing in Mathematical Risk Management may satisfy this requirement with either principles of management (MGS 3400), sociology (SOCI 1101) or psychology (PSYC 1101).

Economics: Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106). Alternatively, both requirements can be satisfied by taking MBA 7035 Economics for Managers or the corresponding placement exam (see http://flex.robinson.gsu.edu/about/curriculum/placement-exam-option- mba-foundation-courses/).

Mathematics: College algebra (MATH 1111) and calculus (MATH 1220). Students specializing in Mathematical Risk Management must have completed three semesters of advanced calculus (MATH 2211, MATH 2212 and MATH 2215). Students entering the joint Master of Actuarial Science/Mathematical Risk Management program must have Compound Interest Theory AS 4230.

Statistics: Math 1070. Students specializing in Mathematical Risk Management must have completed two semesters of undergraduate mathematical statistics (Math 4751, Math 4752). Alternatively, this requirements can be satisfied by taking ECON 8710 or MSA 8190.

Legal Studies: MBA 8030 or BusA 2106. Students specializing in Mathematical Risk Management are exempt from this requirement.

1.151
Computing Skills. Because computers are an integral part of business decision making, courses in the Robinson College of Business frequently incorporate assignments that require computing skills.

3. Course Requirements: Specialization in Risk and Insurance

This section is applicable to students interested in the specialization in Risk and Insurance. Students interested in the specialization in Mathematical Risk Management should refer to section 4 below. Students interested in the dual degree program MAS/MRM should go to Section 5 below. Students interested in the dual degree programs should go to Section 5 (MAS/MRM) or Section 6 (MSA/MRM) below.

a. Required Technical Support Courses (3)
   - MBA 8135 Corporate Finance (3)

b. Required Courses in the Specialization (3)
   - RMI 8050 Risk Management Modeling (3)

c. Electives in the Specialization (24)

Students may select seven 8000-level courses to satisfy this requirement. In consultation with the faculty adviser for the Risk and Insurance specialization, students select a program of study that is consistent with their career orientation in risk management and insurance. The following optional tracks are available.

Risk Management Track

- RMI 8120 Property and Liability Insurance (3)
- RMI 8150 Corporate Risk Management (3)
- RMI 8300 Predictive Risk Models (3)
- RMI 8370 Financial Risk Management (3)
- FI 8000 Valuation of Financial Assets (3)
- FI 8200 Derivative Markets I (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8340 Multinational Corporate Finance (3)

Insurance Track

The following courses are recommended for students in the insurance track.

- RMI 8120 Property and Liability Insurance (3)
- RMI 8150 Corporate Risk Management (3)
- RMI 8200 Life Insurance (3)
- RMI 8370 Financial Risk Management (3)
- FI 8000 Valuation of Financial Assets (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8440 Finance and Banking in the Global Economy (3)
- HA 8250 Health Economics and Financing (3)
• LGLS 8450 Legal Environment of Health Care (3) (Same as HA 8450)
• PFP 8400 Personal Financial Planning (3)
• MGS 8300 Human Resource Management (3)

One additional course to be decided based upon student’s interests.

4. Course Requirements: Specialization in Mathematical Risk Management

This section is applicable to students interested in the specialization in Mathematical Risk Management. Students interested in the specialization in Risk and Insurance should refer to section 3 above. Students interested in the dual degree programs should go to Section 5 (MAS/MRM) or Section 6 (MSA/MRM) below.

a. Required Technical Support Courses (0-5)

The following courses must be completed within the first 18 hours of 8000-level course work.

• FI 8000 Valuation of Financial Assets (3)*
• MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

b. Required Courses in the Specialization (24)

• MRM 8320 Stochastic Risk Management Models (3)
• MRM 8600 Theory of Risk Sharing (3)
• MRM 8610 Financial Engineering (3)
• MRM 8630 Interest Rate Models (3)
• MRM 8640 Advanced Credit Risk Models (3) (alternatively, students can take MRM 8620 Quantitative Risk Models)
• RMI 8370 Financial Risk Management (3)
• MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
• ECON 8780 Financial Econometrics (3)

c. Elective Courses in the Specialization (3-8)

Students should consult with the program director prior to beginning their elective course work and may select from among the following courses.

• AS 8340 Life Contingencies (3)
• AS 8350 Insurance Mathematics (3)
• AS 8430 Loss Distributions and Credibility Theory (3)
• AS 8810 Actuarial Science Graduate Seminar (3)
• ECON 8860 Economics of Global Finance (3)
• FI 8020 Financial Analysis and Loan Structuring (3)
FI 8240 Global Portfolio Management (3)
FI 8260 Hedge Funds and Their Strategies (3)
FI 8300 Advanced Corporate Finance (3)
FI 8310 Investment Banking (3)
FI 8320 Corporate Financial Strategy (3)
FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
MGS 8040 Data Mining (3)
MGS 8150 Business Modeling (3)
RMI 8150 Corporate Risk Management (3)
RMI 8300 Predictive Risk Models (3)

Students may select, with the prior approval of the Mathematical Risk Management faculty advisor, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

5. Course Requirements: Dual Degree Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program. This section is applicable to students interested in the dual degree program Master of Actuarial Science and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management. Students interested in the Specialization in Risk and Insurance should go to Section 3 above. Students interested in the Specialization in Mathematical Risk Management should go to Section 4 above. Students interested in the dual degree program between the Master of Science in Analytics and the Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program should go to Section 6 below.

a. Required Technical Support Courses (0-5)

The following course must be completed within the first 18 hours of 8000-level course work.

- FI 8000 Valuation of Financial Assets (3)*
- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

b. Required Courses in the Dual Degree Program (27-33 hours)

- AS 8340 Life Contingencies (3)**
- AS 8350 Insurance Mathematics (3)**
- AS 8810 Actuarial Science Graduate Seminar (3)
- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8630 Interest Rate Models (3)
- MRM 8640 Advanced Credit Risk Models (3) (alternatively, students can take MRM 8620 Quantitative Risk Models)
- RMI 8370 Financial Risk Management (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- ECON 8780 Financial Econometrics (3)

** Students who have completed AS 4340 and/or AS 4350 or their equivalents must substitute appropriate 8000-level actuarial science courses for AS 8340 and/or AS 8350. The substitutions must be selected from section C below in consultation with the actuarial science program director.

c. Elective Courses in the Dual Degree Program (12-23 hours)

Students should consult with the program directors for the Master of Actuarial Science and Mathematical Risk Management programs prior to beginning their elective coursework and may select from among the following courses:

- AS 8430 Loss Distributions and Credibility Theory (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 8400 Financial Management of Depository Institutions (3)
- FI 9100 The Theory of Asset Valuation (3)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- RMI 8150 Corporate Risk Management (3)
- RMI 8200 Life Insurance (3)
- RMI 8300 Predictive Risk Models (3)

Students may select, with the prior approval of both program directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

6. Course Requirements: Dual Degree Master of Science in Analytics and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program. This section is applicable to students interested in the dual degree program Master of Science in Analytics and Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program. Students interested in the Specialization in Risk and Insurance should go to Section 3 above. Students interested in the Specialization in Mathematical Risk Management should go to Section 4 above. Students interested in the dual degree program between the Master of Actuarial Science and the Master of Science in Risk Management and Insurance Specializing in Mathematical Risk Management Program should go to Section 5 above.

a. Required Technical Support Courses (0-5)

The following course must be completed within the first 18 hours of 8000-level course work.
- FI 8000 Valuation of Financial Assets (3)*
- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)

* Students who have completed an equivalent course with a grade of “C” or higher must substitute an appropriate elective in consultation with the Mathematical Risk Management program director.

b. Required Courses in the Dual Degree Program (42 hours)

- CIS 8040 Data Programming (3)
- MSA 8010 Data Programming (3)
- MSA 8050 Unstructured Data Management (3)
- MSA 8100 Operations Research Models and Methods (3)
- MSA 8150 Machine Learning for Analytics (3)
- MSA 8200 Econometric Modeling for Analytics (3) (alternatively, students can take ECON 9720 Econometrics II)
- MSA 8300 Value Through Analytics (3)
- MRM 8320 Stochastic Risk Management Models (3)
- MRM 8600 Theory of Risk Sharing (3)
- MRM 8610 Financial Engineering (3)
- MRM 8630 Interest Rate Models (3)
- MRM 8640 Advanced Credit Risk Models (3) (alternatively, students can take MRM 8620 Quantitative Risk Models)
- RMI 8370 Financial Risk Management (3)
- ECON 8780 Financial Econometrics (3)

c. Elective Courses in the Dual Degree Program (3-8 hours)

Students should consult with the program directors for the Master of Actuarial Science and Mathematical Risk Management programs prior to beginning their elective coursework and may select from among the following courses:

- Any of the 8000 level MSA elective classes
- AS 8340 Life Contingencies (3)
- AS 8350 Insurance Mathematics (3)
- AS 8430 Loss Distributions and Credibility Theory (3)
- AS 8810 Actuarial Science Graduate Seminar (3)
- ECON 8860 Economics of Global Finance (3)
- FI 8020 Financial Analysis and Loan Structuring (3)
- FI 8240 Global Portfolio Management (3)
- FI 8260 Hedge Funds and Their Strategies (3)
- FI 8300 Advanced Corporate Finance (3)
- FI 8310 Investment Banking (3)
- FI 8320 Corporate Financial Strategy (3)
- FI 9100 The Theory of Asset Valuation (3) (Requires consent of instructor.)
- MGS 8040 Data Mining (3)
- MGS 8150 Business Modeling (3)
- RMI 8150 Corporate Risk Management (3)
Students may select, with the prior approval of both program directors for the dual degree program, electives other than those shown above if they can demonstrate the course(s) will better meet their educational objectives.

7. Program of Study: Each student’s program must be planned in consultation with the appropriate program director for the M.S. in risk management and insurance and a copy of the program filed with the Office of Graduate Student Services for review and approval. The program of study should be planned before the student takes a non-required course. Progress toward the degree, including clearance for graduation, can be confirmed only with an approved program of study. Any changes in the program must be approved by the program director and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

8. Time Limit: The time limit for completing the M.S./R.M.I. program is five calendar years from the first semester a course in section 3-6 (above) is taken.
7205 Master of Science in Analytics

Dr. Sanjay Srivastava, Program Director

The mission of the Master of Science in Analytics is to educate students how to acquire, organize and model data sets in order to formulate the questions that guide decision-making in corporate and non-corporate settings. Graduates are ideal candidates for the range of technical data-driven positions in a variety of industries/businesses currently emerging such as data scientist, quantitative marketing analyst, credit risk analyst, predictive modeler, health informatics, web analytics. Please see program website for more details.

Regulations for the Degree

All M.S. in Analytics students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to M.S. in Analytics program. A maximum of 6 semester hours of transfer credit is possible in this 32-hour program.

Foundation Requirements

These courses are in addition to the 32 hours required for the M.S. in Analytics. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent work has been previously completed with grades of C or higher, or as deemed suitable by the MSA Admission Committee.

**Accounting:** financial and managerial accounting principles (MBA 8025, or ACCT 2101 & ACCT 2102)

**Behavioral Science:** Management principles (MBA 8165, or MGS 3400). Students may satisfy this requirement with either management (MGS 3400), sociology (SOCI 1101), or psychology (PSYC 1101) principles.

**Economics:** Both macroeconomic principles (ECON 2105) and microeconomic principles (ECON 2106).

**Mathematics:** Students must have completed three semesters of advanced calculus (MATH 2211, MATH 2212, and MATH 2215).

**Statistics:** Students must have ECON 8710 or completed two semesters of undergraduate mathematical statistics (MATH 4751, MATH 4752).

Course Requirements: The Master of Science in Analytics

a. Required Courses (23 hours):

- MRM 8000 Introduction to Analytical Programming and Numerical Methods (2)
- CIS 8040 Database Management Systems (3)
- MSA 8050 Unstructured Data Management (3)
• MSA 8100 Operations Research Models and Methods (3)
• MSA 8010 Data Programming for Analytics (3)
• MSA 8150 Machine Learning for Analytics (3)
• MSA 8190 Statistical Foundations for Analytics (3)
• MSA 8200 Econometric Modeling for Analytics (3)

b. Elective Courses (9 hours):

Students will select at least two elective courses. These courses will either be in an application area of interest or the student can deepen their technical skill development. The faculty adviser for M.S. in Analytics must individually approve electives. Examples of possible electives include the following:

• CIS 8020 Systems Integration (3)
• CIS 8100 Management of Information Systems (3)
• CIS 8200 Information Systems Strategy (3)
• CIS 8401 Mobile Applications Development (3)
• ECON 8780 Financial Econometrics (3)
• FI 8000 Valuation of Financial Assets (3)
• FI 8200 Financial Derivatives (3)
• FI 8260 Hedge Fund Strategies (3)
• FI 8320 Corporate Financial Strategy (3)
• HA 8160 Health Care System (3)
• HA 8550 Health Planning and Financial Management (3)
• HA 8620 Operations Management and Quality in Health Care (3)
• HA 8670 Health Information Systems (3)
• HA 8750 Health Analytics (3)
• MK 8010 Marketing Metrics (3)
• MK 8705 Digital Marketing Analytics (3)
• MK 8715 Brand and Consumer Analytics (3)
• MK 8730 Marketing Engineering (3)
• MRM 8610 Financial Engineering (3)
• MRM 8620 Quantitative Financial Risk Models (3)
• MGS 8110 Applied Regression Analysis (3)
• MGS 8730 Project Management (3)
• MGS 8740 Operations Strategy (3)
• RCB 8040 Competing on Analytics and Organizational Knowledge (3)
• RMI 8050 Risk Management Modeling (3)
• RMI 8300 Predictive Risk Models (3)

Program of Study

Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to the GRSS.

Time Limit

The time limit for completing the M.S. in Analytics program is five years from the first semester a course
in section a, or b (above) is taken.
Master of Science in Health Administration

In addition to offering the M.B.A. and M.H.A. degrees as a joint program (described earlier), the Robinson College of Business offers the Master of Science in Health Administration as a single degree. This program is designed to meet the needs of students who desire a background in health administration and the opportunity to acquire specialized skills in areas of business or healthcare administration, including health information systems and data analytics. PMBA and other graduate degree students may apply for the MSHA as a second degree.

Admissions

The application procedures and admission criteria are given in the “Master's Admissions” section of this chapter. A personal interview normally is required for all applicants but may be waived by the director of the institute in exceptional circumstances.

Admission to the M.S.H.A. degree program may occur each semester. Early application is encouraged, however, since the number of applicants each year exceeds the capacity of the program.

Regulations for the Degree

1. All Master of Science in Health Administration students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master's Enrollment” and “Master's Programs” sections of this chapter apply to the M.S. H.A. program. A maximum of 12 hours of transfer credit is permitted in this 36-hour program.

2. Course Requirements. The course requirements for the Master of Science in Health Administration degree and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.

3. a. Foundation Courses. See section 7110.10 for the foundation requirements for this degree.

   b. Required Courses in Health Administration (24 hours)

   - HA 8160 Introduction to the Health Care System (3)
   - HA 8190 Health Policy and Ethics (3)
   - HA 8250 Health Economics and Financing (3)
   - HA 8450 Legal Environment of Health Care (3)
   - HA 8620 Operations Management and Quality in Health Care (3)
   - HA 8670 Health Information Systems (3)
   - HA 8680 Care Management and Delivery Systems

3. c. Concentration (12 hours). A Health Administration concentration may be taken as listed below; an approved selected concentration maybe taken such as: a customized concentration of 8000-level RCB courses, or MBA concentrations, to complete this section of the M.S.H.A. program. For concentrations in the Master of Business Administration program cited earlier in this chapter, follow the course requirements given for the chosen MBA concentration.
Health Administration: This concentration includes the following four health administration courses: HA 8440 Executive Leadership in Healthcare, HA 8550 Healthcare Financial Management and Planning, HA 8700 Health Services Research and Data Mining, and HA 8750 Predictive Analytics in Healthcare

The cohort MSHA program requires the following twelve courses:

- HA 8160 Health Care System
- HA 8190 Health Policy & Ethics
- HA 8250 Health Econ & Financing
- HA 8670 Health Info Systems
- HA 8620 Operations Management & Quality in Health Care
- HA 8440 Exec Leadership in Health
- HA 8550 Health Financial Management & Planning
- HA 8700 Health Services Research & Evaluation Methods
- HA 8450 Legal Environment of Health Care
- HA 8990 Strategic Management in Health Care
- HA 8750 Predictive Analytics in Healthcare
- HA 8680 Care Management & Delivery Systems

1. Program of Study/Course Selection. All M.S.H.A. students must contact the Institute for consultation and guidance. Concentration courses must be approved by the Institute Director, and students are required to plan a formal program of study with a faculty adviser in the Institute of Health Administration. M.S.H.A. students should notify the Office of Graduate Student Services as soon as they select their area of concentration. Progress toward the degree, including clearance for graduation, will be determined by Office of Graduate Student Services by comparing courses taken with the foundation courses assigned at admission and the degree requirements stated above. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

2. Time Limit. The time limit for completing the M.S.H.A. degree with a concentration is five years from the first semester a course in section B or C (above) is taken.

7210.30 JD/Health Administration Joint Program

The Institute of Health Administration in the Robinson College of Business, in conjunction with the College of Law, offers a joint program leading to the Juris Doctor degree (JD) and (1) a Master of Science in Health Administration degree (MSHA), or (2) an MBA/MHA (Master of Business Administration and Master of Health Administration). The following regulations apply to students who are accepted to both the JD and MSHA or MBA/MHA, and are enrolled in the joint program (joint enrollment) as opposed to being separately enrolled in both programs. Students who have already earned an MSHA or MBA/MHA degrees or a JD degree at Georgia State University or at another institution are not eligible for the joint program.

JD/MSHA Joint Degrees
The JD/MSHA is a course of study which allows selected previously-approved course work earned in one degree program to satisfy some of the elective course requirements of the other degree program. This enables a student to complete the requirements for both degrees in a shorter time than required to complete both degrees separately. Students who have already earned an MSHA degree or a JD degree at Georgia State University or at another institution are not eligible for the joint program.

Students must satisfy the curriculum requirements for both the MSHA degree and the JD degree requirements.

For students enrolled in the joint program, the Robinson College of Business will accept as course credit 15 semester hours of elective courses from the JD curriculum with grades of B or better. Twelve hours will be given for any law elective courses and 3 credit hours will be given for LAW 7239 Health Law Liability or LAW 7240 Health Law Regulation in place of HA 8450 Legal Environment of Health Care.

Reciprocally, the College of Law will accept as course credit 12 semester hours of 8000 level MSHA courses with a grade of B or better to apply toward the 47 hours of law elective courses.

Applicants to the JD/MSHA joint degree program must meet the entrance requirements and follow the application procedures of both the Robinson College of Business and the College of Law. Applicants must be accepted by both colleges before completing either program.

The College of Law does not permit enrollment in the joint degree program after a student has completed more than 21 semester hours of 8000-level MSHA coursework. After students have been admitted to both the MSHA and the JD programs they must, at the first opportunity, complete the first 31 semester hours of required courses in the JD program. After completion of these 31 hours, course enrollment in either college or both concurrently is permitted.

No credit hours of JD course work will be applied toward the MSHA degree requirements until the completion of JD degree requirements. A simultaneous awarding of degrees will satisfy this requirement.

The requirements for the MSHA degree must be completed within five years of the initial semester of enrollment in the MSHA program. The JD Degree must be completed within six years of the initial semester of enrollment in the JD program.

JD-MBA/MHA Joint Degrees

The JD-MBA/MHA is a course of study which allows selected previously-approved course work earned in one degree program to satisfy some of the elective course requirements of the other degree program. This enables a student to complete the requirements for all three degrees in a shorter time than required to complete the degrees separately. Students who have already earned an MBA/ MHA or a JD degree at Georgia State University or at another institution are not eligible for the joint program.

Students must satisfy the curriculum requirements for both the MBA/MHA degrees and the JD degree requirements.

For students enrolled in the joint program, the Robinson College of Business will accept as course credit 6 semester hours of elective courses from the JD curriculum with grades of B or better. Three hours of credit...
for successful completion of either LAW 7239 Health Law Liability or LAW 7240 Health Law Regulation, and 3 hours of legal externship courses in the healthcare area may be substituted for the required HA residency course, HA 8810.

Reciprocally, the College of Law will accept as course credit 12 semester hours of 8000 level MBA/MHA courses with a grade of B or better to apply toward the 47 hours of law elective courses.

Applicants to the JD-MBA/MHA joint degree program must meet the entrance requirements and follow the application procedures of both the Robinson College of Business and the College of Law. Applicants must be accepted by both colleges before completing either program.

The College of Law does not permit enrollment in the joint degree program after a student has completed more than 21 semester hours of 8000-level MBA/MHA coursework. After students have been admitted to both the MBA/MHA and the JD programs they must, at the first opportunity, complete the first 31 semester hours of required courses in the JD program. After completion of these 31 hours, course enrollment in either college or both concurrently is permitted.

No credit hours of JD course work will be applied toward the MBA/MHA degree requirements until the completion of JD degree requirements. A simultaneous awarding of degrees will satisfy this requirement.

The requirements for the MBA/MHA degrees must be completed within eight years of the initial semester of enrollment in the MBA/MHA program. The JD Degree must be completed within six years of the initial semester of enrollment in the JD program.
The Master of Science in Information Systems (MSIS) is designed to meet the needs of students who want to build a strong background in information systems and the application of information and communications technology in business.

In today’s highly competitive global environment, the effective deployment of information technology has become the key to business success. New applications of information technology strike at the heart of what management does and how organizations are structured and compete. In many respects these applications are redefining the nature of work and its organization.

There is a continuing shortage of specialists and managers with the combination of business and technology skills needed to bring about this reshaping of international industries. The purpose of the Master of Science in Information Systems program is to produce graduates who are able to combine their general business knowledge with the latest information systems tools and techniques to enable organizations to compete strongly in the global marketplace. Graduates, through the use of optional concentrations in their programs of study, will be prepared for careers in specific areas such as information systems management; health informatics; or information technology consulting, project management, database management, and systems development.

The MSIS program is usually offered only as a cohort program.

Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the Master of Science in Information Systems students. A maximum of 12 hours of transfer credit is permitted in this 36-hour program.
2. Course Requirements. The course requirements for the Master of Science in Information Systems and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below.
   a. Foundation Courses. In addition to the Foundation Requirements in section 7110.10, the MSIS degree program foundation includes successful completion of the programming courses CIS 3260 Introduction to Programming and CIS 3270 Application Programming. The requirements for CIS 3260 and CIS 3270 may be waived upon approved evidence of equivalent accredited undergraduate coursework with a grade of at least C or successful completion of approved online courses and exams in programming as directed by the CIS Graduate Program Coordinator.
   b. Required Courses in Computer Information Systems (12 hours). These comprise the “MSIS Core”:
      - CIS 8000 or MIT 8000 Information Technology Project Management (3)
      - CIS 8010 or MIT 8010 Process Innovation (3)
      - CIS 8080 or MIT 8080 Security and Privacy of Information and Information Systems (3)
      - CIS 8090 or MIT 8090 Enterprise Architecture (3)
c. **Elective Courses** in Computer Information Systems and Related Fields: Any 8000 level CIS or MIT or MSA or HA graduate courses may be used to satisfy the electives requirements subject to approval by the MSIS faculty advisor.

d. **Capstone Requirement** (3-6 hours), selected from:
   - CIS 8391 Field Study in Computer Information Systems (0-6)
   - MIT 8990 IT Management Capstone Project (0-6)
   - CIS 8990 M.S. C.I.S. Thesis Research (0-6)

e. **Optional concentrations available within the MSIS**

Subject to availability, MSIS students are expected to do full-time or part-time field study in the last two semesters in the program. MSIS students are required to begin their field study in the semester preceding the one in which they will graduate.

Students may complete the MSIS by meeting the requirements *(2.a.) through (2.d.) above.* Subject to course availability, students may additionally qualify for the following concentrations by substituting the below required courses in the concentration in place of Elective Courses detailed in *(2.c.) above.*

**MSIS with a Concentration in Information Technology:** The MSIS with a concentration in Information Technology is usually offered as a year-long cohort program. The purpose of the Master of Science in Information Systems program is to produce graduates who are able to combine business knowledge with the latest information systems tools and techniques. Graduates will be prepared for careers in a variety of areas such as systems development, information systems managements, consulting, project management, software quality management, database management, security and privacy, and business process design. Required courses for this concentration:

- **The MSIS Core (12 hours):**
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)

- **The MSIS IT Concentration Core (12 hours)**
  - CIS 8040 Fundamentals of Database Management Systems (3)
  - CIS 8025 Mobile Application Development (3)
  - CIS 8630 Business Computer Forensics and Incident Response (3)
  - CIS 8670 Enterprise Resource Planning Systems: Implementation and Management (3)

- **CIS 8391 Field Study in Computer Information Systems (3)**

- **Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).**

**MSIS with a Concentration in Big Data Management and Analytics:** The MSIS with a concentration in Big Data Management and Analytics is usually offered as a cohort program intended to prepare students for executive careers in the management and use of both structured and unstructured data. Required courses for this concentration:

- **The MSIS Core (12 hours):**
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
The MSIS Big Data Management and Analytics Concentration Core (15 hours):
- CIS 8040 Fundamentals of Database Management Systems (3)
- CIS 8045 / MSA 8050 Unstructured Data Management (3)
- CIS 8005 / MSA 8010 Data Programming for Analytics (3)
- CIS 8695 Managing Big Data for Analytics (3)
- CIS 8795 IT Infrastructure for Big Data (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).

MSIS with a Concentration in Health Informatics: The MSIS with a concentration in Health Informatics is usually offered as a cohort program intended to prepare students for executive careers in the management of information resources in support of medical services and administration within the healthcare industry. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)
- The MSIS Health Informatics Concentration Core (12 hours):
  - CIS 8070 Mobile Health: Technologies and Applications (3)
  - HA 8160 Introduction to the Health Care System (3)
  - HA 8670 Health Information Systems (3)
  - HA 8740 Health Analytics (3)

MSIS with a Concentration in Enterprise Systems: The MSIS with a concentration in Enterprise Systems is usually offered as a cohort program intended to provide students with the knowledge needed for careers in organizations that use ERP systems to support key business processes. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)
- The MSIS Enterprise Systems Concentration Core (12 hours):
  - CIS 8670 Enterprise Resource Planning Systems: Implementation and Management (3)
  - CIS 8672 ERP Business Scenario and Process Analysis (3)
  - CIS 8674 ERP Customization (3)
  - CIS 8676 ERP Technologies (3)
- CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (9).
MSIS with a Concentration in Cybersecurity: The MSIS with a concentration in Cybersecurity is usually offered as a cohort program intended to prepare students for executive careers in the areas of privacy and security of information and information systems. Required courses for this concentration:

- The MSIS Core (12 hours):
  - CIS 8000 Information Technology Project Management (3)
  - CIS 8010 Process Innovation (3)
  - CIS 8080 Security and Privacy of Information and Information Systems (3)
  - CIS 8090 Enterprise Architecture (3)
- The MSIS Cybersecurity Concentration Core (12 hours):
  - CIS 8040 Fundamentals of Database Management Systems (3)
  - CIS 8085 Information and Information Systems Risk Management (3)
  - CIS 8086 Protecting Information Assets (3)
  - CIS 8088 Network Security and Hacking (3)
  - CIS 8391 Field Study in Computer Information Systems (3)
- Elective Courses in Computer Information Systems and Related Fields as detailed in (2.c.) above (12).

MSIS with a Concentration in Management of Information Technology: The MSIS with a concentration in Management of Information Technology is usually offered in executive format (See Section 7225 for details)

Program of Study/Course Prerequisites. With the exception of cohort-enrolled students, each student’s program must be planned in consultation with an M.S. faculty adviser in the Department of Computer Information Systems for approval by the MSIS coordinator before a non-required course is taken. Students may contact the department for the name of their faculty adviser and to schedule an appointment. A copy of the program will be filed with the Office of Graduate Student Services for review and approval. Progress toward the degree, including clearance for graduation, cannot be confirmed without an approved program of study. Any changes in the program must be approved by the faculty adviser and a copy of the changes sent to Office of Graduate Student Services. Students always must consult the Course Descriptions chapter of the graduate catalog to determine if they have met the prerequisites for any course to be taken.

Time Limit. The time limit for completing the Master of Science in Information Systems is five years from the semester the first course in section B or C (above) is taken.

For additional information, please visit the following website: http://cis.robinson.gsu.edu/academic-programs/ms-is/.

7220.10 4 + 1 Programs
The Department of Computer Information Systems in the Robinson College of Business and the Department of Computer Science jointly offer a combined BS in Computer Science/MS in Information Systems program. The program is designed to take five years, at the end of which, a student will receive both a Bachelor of Science in Computer Science and a Master of Science in Information Systems. The graduate level coursework permits a choice of emphasis in Managing Information Technology or Information Systems Development. The program requires application. Please see the Computer Science undergraduate program for the complete description of this joint offering.
The Department of Computer Information Systems in the Robinson College of Business and the Department of Mathematics and Statistics jointly offer a combined BS in Mathematics/MS in Information Systems program. The program is designed to take five years, at the end of which, a student will receive both a Bachelor of Science in Mathematics and a Master of Science in Information Systems. The graduate level coursework permits a choice of emphasis in Managing Information Technology or Information Systems Development. The program requires application. Please see the Mathematics undergraduate program for the complete description of this joint offering.
Applications are no longer being accepted for this program.

The Executive Master of Science in Information Systems concentrating on managing information technology (MSIS MIT) is a 12-month, lock-step program designed for rising professionals with a minimum of four years professional information technology (IT)-related experience. Students receive a Master of Science in Information Systems degree upon completion of the program.

The purpose of the Executive Master of Science in Information Systems program is to provide mid-level managers, and those aspiring to IT-related management, a challenging curriculum relevant to the needs of rising IT professionals. The MSIS MIT curriculum is designed to prepare IT professionals for significant management level positions. Participants will increase their ability to think efficiently, plan productively, manage effectively, and make decisions that create added value for the enterprise. For example, the curriculum will help managers assume a strategic role in the enterprise’s future; plan and manage for the next generation of IT business challenges; utilize and manage resources effectively and efficiently; and identify and broker solutions to current challenges utilizing best-in-practice IT methods. From an IT perspective, managers will be better able to implement a business-focused approach to create value and deliver a competitive edge for their organization.

The program consists of ten three-hour courses and a six-hour capstone project. The courses cover a wide range of IT management topics extending from strategic to organizational, financial, and technical. All courses are enhanced versions of the award-winning courses offered in the traditional two-year program. The capstone projects will be selected based on the interests of participants and their value and relevance to their companies.

The lock-step format serves to forge strong networking, a more in-depth learning environment and support among the students as they take the same courses together during the program.

This Executive format program meets the needs of busy IT professionals; the program is designed to be completed in one year while maintaining full-time employment. Face-to-face classes are held on alternate Saturdays. Electronic distant-learning modules are offered in between these Saturdays at the convenience of the participant – any time, any place.

Another aspect of the strong commitment to the success of each participant is the Mentor of Excellence program. During the year-long experience, each participant will be paired with a business leader who will serve as mentor to guide, advise, and support.

**Required Courses in the MSIS MIT**

The MSIS Core (12 hours)

- MIT 8000 Information Technology Project Management (3)
- MIT 8010 Process Innovation (3)
- MIT 8080 Security and Privacy of Information and Information Systems (3)
• MIT 8090 Managing Enterprise Systems (3)

The MIT Concentration Core (1 hours)

• MIT 8070 Mobile and Wireless Information Systems (3)
• MIT 8100 Management of Information Services (3)
• MIT 8200 Information Systems Strategy (3)
• MIT 8210 Global Systems Sourcing (3)
• MIT 8299 Finance and Accounting for Information Systems (3)
• MIT 8699 Organizational Change Management (3)
• MIT 8990 IT Management Capstone Project (3-6)

Elective Courses in Computer Information Systems and Related Fields as detailed in (c.) above (0-3).

For additional information, please visit the following website: http://cis.robinson.gsu.edu/academic-programs/executive-ms-mit/.
There is a developing shortage of specialists with the combination of accounting and technology knowledge needed to properly inform and execute management decisions in areas such as IT Assurance, Information Security, IT Governance, and IT Risk Management. The purpose of the Master of Science in Information Systems Audit and Control (MSISAC) program is to produce graduates who are able to combine a thorough knowledge of accounting principles with an equally thorough knowledge of Information and Communication Technologies (ICT) to enable organizations to competently operate in environments where accounting systems are tightly integrated with organizational ICT. Graduates will be well prepared for careers in IT auditing, but also for a variety of other areas such as accounting, information systems, consulting, and assurance.

ICT provides the basic fabric with which organizational management develop, record, and process abstractions and models that are both the basis of management strategy, decision making and of recording the flows of assets and liabilities within the organization and with its trading partners. Accountants are increasingly called upon to design, review, audit, and advise stakeholders with regard to the accuracy, timeliness and appropriateness of complex ICT based systems. Developing competencies in IT audit often requires a broad understanding of enterprise-wide approaches for managing growing international risks and emerging regulations. IT auditors must know how to identify and mitigate information risks, effectively manage security-related incidents, and reduce the impact of these on people, profitability and property.

To summarize, the purpose of the Master of Science in Information Systems Audit and Control program is to produce graduates who are able to combine their knowledge of accounting and auditing with the latest information systems tools and techniques to enable organizations to achieve information assurance and security. MSISAC program graduates are expected to be academically prepared to take the CISA exam upon completion of their degree. This combination of skills necessary for obtaining these highly valued certifications is very rarely found in any program in the nation.

Regulations for the Degree

1. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MSISAC program. A maximum of 12 hours of transfer credit is permitted in this 30-hour program.

2. Course Requirements. The course requirements for the Master of Science in Information Systems Audit and Control degree and the format of the program follow. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Descriptions chapter of the Georgia State University Undergraduate and Graduate Catalogs. These catalogs are available on the web at www.gsu.edu; click on Students then University Catalogs.

a. Foundation Courses:

The following foundation courses are required in addition to the Specialized Master’s Foundation
Requirements listed in Section 7110.20:

None

b. Prerequisite courses:

The courses in this list are in addition to the 30 hours required for the degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with grades of C or higher. An accepted applicant, who at the time of admission to the MSISAC program, has not completed the foundation and prerequisite courses, must complete these requirements in a manner approved by the MSISAC program coordinator.

Accounting

Acct 2101-2102 Financial and Managerial Accounting Principles

Computer Information Systems

CIS 3300 Analyzing business systems or equivalent or an approved online course in Systems Analysis as directed by the MSISAC program coordinator

CIS 3730 Database Management Systems or an approved online course in Database Management Systems as directed by the MSISAC program coordinator

c. Required Courses (30 hours)

Credit Hours/COURSES

Required Graduate Courses

CIS 8000 Information Technology Project Management (3)
CIS 8300 Software Quality Management (3)
CIS 8630 Business Computer Forensics and Incident Response (3)
CIS 8670 Enterprise Resource Planning Systems: Implementation & Management (3)
ACCT 8310 Seminar in Management Accounting Systems (3)
ACCT 8630 Information Technology Auditing (3)
ACCT 8680 or CIS 8080 Security and Privacy of Information and Information Systems (3)
ACCT 8050 Special Topics in Accounting (3)
CIS 8640 IT Services Management & Governance (3)
CIS 8388 Capstone Project (3)

Subject to availability, MSISAC students are expected to do full-time or part-time field study in the last two semesters in the program. MSISAC students are required to begin their field study in the semester preceding the one in which they will graduate.
7300 Master of Science in Real Estate

Karen M. Gibler, Program Director, 404/ 413-7725, kgibler@gsu.edu

The Master of Science in Real Estate degree is designed for students who are principally interested in careers in the real estate industry and those who will use real property in business decision making. It provides the student with both general and specialized real estate knowledge and analytical skills. The degree prepares students for professional areas such as financial counseling, market analysis and valuation, as well as industry activities such as real property development, acquisition, disposition, and management. The MSRE program is based on a synthesis of legal, physical, market and financial considerations that affect the real property decision process. The student’s educational experience is enhanced because the program attracts many experienced real estate professionals into the classroom, and the program has a practical orientation in which students participate in industry problem solving and research under the direction of the program’s faculty.

7300.10 Regulations for the Degree

1. Course Requirements. The Master of Science in Real Estate degree consists of 30 semester hours of course work numbered 8000 and above. Previous graduate real estate coursework successfully completed at the Robinson College of Business will be evaluated and up to six hours credit toward the required or elective courses in the major (section “b” or “c” below) may be awarded to entering students. A maximum of six hours of transfer credit is permitted in this 30-hour program. The option of awarding credit toward the MSRE degree is totally at the discretion of the Department of Real Estate and its designees. The course requirements for the degree and the format of the program follow. The number of hours of 8000-level credit required in each section of the program is shown in parentheses after the section heading. This number represents the minimum requirement. If prerequisites for the courses listed in each section have not been properly completed or if they are not included as electives within the M.S.R.E. program, they must be taken as additional hours. In most cases, however, the graduate-level prerequisites can be incorporated as electives into the student’s program of study. Students always must consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the prerequisites for any course to be taken.

a. Foundation Courses. See section 7110.10 for the foundation requirements for this degree.

b. Required Courses in the Major (21 hours)
RE 8020 Real Estate Investment Analysis (3)
RE 8030 Real Estate Financing (3)
RE 8050 Real Estate Development (3)
RE 8060 Applied Real Estate Market Analysis (3)
RE 8090 Real Estate Case Analysis (3)
RE 8100 Strategic Management of Real Property in the Corporate Environment (3)
RE 8400 Advanced Real Estate Investment Analysis (3)

c. Elective Courses (9 hours). Students may choose as electives any three 8000 level RE prefixed courses or appropriate courses from an approved list available from the Department of Real Estate.
2. Program of Study/Course Prerequisites.
Each student’s program of study must be planned in consultation with the MSRE program director or a
designee of the director before a copy of the program of study is filed with the Office of Graduate Student
Services for review and approval. Students may contact the department to schedule an appointment with a
faculty adviser. Progress toward the degree, including clearance for graduation, cannot be confirmed
without an approved program of study. Any changes in the program must be approved by the faculty
adviser and a copy of the changes sent to Office of Graduate Student Services. Students always must
consult the Course Descriptions chapter of the current graduate catalog to determine if they have met the
prerequisites for any course to be taken.

3. Time Limit. The time limit for completing the M.S.R.E. program is five years from the first semester a
course in section “b” or “c” (above) is taken.
The Master of Taxation program offers a variety of courses that provide students with a meaningful opportunity to develop the technical, analytical, and research skills needed for tax practice. The Master of Taxation Program is an academically rigorous program taught in the J. Mack Robinson College of Business Buckhead Center by the faculty of the School of Accountancy. Students begin the program in either the Fall semester or the Spring semester and complete the program in either one or two years. Classes meet once a week and are offered from either 4:30 to 7:00 or 7:15 to 9:45 in Fall and Spring. Summer classes are offered two days a week.

### 7310.20 Regulations for the Degree

1. The regulations, policies and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the MTAX program.

2. Course Requirements. The course requirements for the degree of Master of Taxation and the format of the program follow:

   a. Foundation and Prerequisite Courses.

   The courses in this section are in addition to the 30 semester hours required for the M.Tx. degree. They are assigned as part of the admissions process based on a review of each student’s transcripts. They can be exempted if equivalent course work has been previously completed with minimum grades of C-. Consult the Course Descriptions chapter for prerequisites to the graduate courses listed below. For descriptions and prerequisites of the undergraduate foundation courses, see the Course Description chapter of the Georgia State University Undergraduate Catalog. This catalog is available on the web at catalog.gsu.edu

   **Accounting:** Financial accounting principles (ACCT 2101) or MBA 8025.

   **Behavioral Science:** Sociology (Soci 1101), or psychology (PSYC 1101), or anthropology (ANTH 1102), or buyer behavior (MK 4100), or management principles (MGS 3400), or managerial decision making (MGS 4000).

   **Economics:** Macroeconomic principles (Econ 2105) or microeconomic principles (Econ 2106) – Econ 2106 is preferred.

   **Mathematics:** College algebra (MATH 1111).

   **Statistics:** MATH 1070.

   **Taxation:** ACCT 4510.

   b. Courses in Taxation (30 hours)
Students will take ten of the following courses, including six required courses totaling 18 hours. In addition, students will take four other courses totaling 12 hours. Program administrators will ensure that students take the courses in the appropriate sequence, e.g., the TX 8020 and TX 8030 must be the first two courses taken if a student takes only two courses the first semester in the program.

- TX 8020 Advanced Federal Income Taxation (3)***
- TX 8030 Tax Research (3)***
- TX 8040 Tax Practice and Procedures (3)***
- TX 8080 Taxation of Partnerships and Partners (3)***
- TX 8120 Taxation of Corporations and Shareholders (3)***
- TX 8100 Taxation of Property and Securities Transactions (3)
- TX 8180 Current Topics in Taxation (3)
- TX 8220 Estate/Gift Taxation & Estate Planning (3)
- TX 8270 State and Local Taxation (3)
- TX 8300 International Aspects of Taxation (3)
- TX 8320 Income Tax Accounting Periods and Methods (3)***
- TX 8391 Field Study in Taxation (3)
- TX 8510 Issues in Individual Tax (3)

*** Required courses

3. Advisement/Course Selection: The MTAX program coordinator and graduate academic advisor are available to students for consultation and guidance as needed. Students are encouraged to contact the coordinator and/or advisor and schedule an appointment for advisement as needed. Progress toward the degree, including clearance for graduation, will be determined by the Office of Graduate Student Services by comparing courses taken by the student with the foundation courses assigned at admission and the degree requirements stated above. It is the responsibility of the students to monitor their progress toward the degree and to determine if they have met all the requirements of the degree.

4. The School of Accountancy requires strict adherence to the prerequisites listed for each of its courses (see the Course Descriptions chapter of this catalog). Students enrolled in taxation courses without having completed the stated prerequisites with minimum grades of C will be required to withdraw from the course. Please contact the School of Accountancy before registration if you have questions about course prerequisites.

5. Time Limit: The time limit for completing the MTAX program is five years from the first semester a course in the program.
The Graduate Certificate in Enterprise Risk Management is intended for individuals who possess an MBA or a master's degree in a business-related field, or hold a CPA or CPCU, and who desire graduate education in enterprise risk management but do not wish to complete the degree requirements for an MBA with a concentration in risk management and insurance. The Certificate in Enterprise Risk Management is designed for individuals seeking more broad-based education than what they might have gained in their undergraduate or graduate degree programs. There is an increasing demand for professionals who can efficiently manage financial and nonfinancial risk exposures faced by businesses. Course work taken to meet the certificate requirements emphasizes both financial risks (including, for example, derivatives and exchange rate risk) and nonfinancial risk (including political risk, property and liability exposures, risks associated with information technology, and employee welfare exposures).

7330.10 Regulations for the Certificate Program

1. All Graduate Certificate in Enterprise Risk Management students will complete the Business Communication Skills requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and Master’s Programs sections of this chapter apply to the C.E.R.M. program. The time limit for completing the certificate program is three calendar years. The certificate program requires completion of six graduate courses in residence at Georgia State University. In the event of waiver of one or more of the prescribed courses due to prior experience or education, substitute courses will be approved by the Director of the E.R.M. Certificate Program. A minimum cumulative GPA of 3.00 is required. In addition to possessing the MBA or another business master’s degree, or the CPA or CPCU professional credential, applicants are required to meet the admission requirements for the MBA program with a concentration in risk management and insurance (enterprise risk management specialization).

2. Course Requirements

a. Required Courses (12)

- RMI 8050 Risk Management Modeling
- RMI 8370 Financial Risk Management
- FI 8000 Valuation of Financial Assets
- FI 8200 Derivative Markets I

b. Elective Courses (6)

Students select two courses from the following list with approval from the Director of the ERM Certificate Program:

- RMI 8120 Property and Liability Insurance
- RMI 8150 Corporate Risk Management
- FI 8300 Advanced Corporate Finance
- FI 8320 Corporate Financial Strategy
• ACCT 8680/CIS 8080 Security and Privacy of Information and Information Systems
• ECON 8860 Economics of Global Finance

Other graduate-level course work may be substituted with prior approval by the Director of the E.R.M. Certificate Program other graduate-level course work may be substituted with prior approval by the Director of the E.R.M. Certificate Program.

3. Awarding the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the academic advisor in Graduate Recruiting and Student Services to have the certificate awarded. The academic advisor then reviews the student’s record. If all requirements have been met, a request for the certificate on behalf of the student will be sent to the registrar’s office.
7335 Graduate Certificate in Information Systems

Dr. Ephraim McLean, Program Director, 404/413-7448, emclean@gsu.edu

The purpose of the Graduate Certificate in Information Systems is to more formally acknowledge students who have chosen to strengthen their technical foundation by successfully undertaking and completing additional Information Systems studies. The Graduate Certificate in Information Systems program is designed for students in any graduate major who wish to prepare to meet business and personal challenges through the use of information technology. From biology and the health sciences through the arts, social sciences, legal and business disciplines information systems are a fundamental enabler.

Admission to the Graduate Certificate in Information Systems program is subject to the minimum Georgia State University and RCB cumulative grade-point-average requirement for RCB graduate programs. Applicants for the Graduate Certificate in Information Systems must either be a current Robinson student or they must apply for admission to Robinson – meeting normal admission requirements and be accepted into the Robinson College.

Obtaining the Graduate Certificate in Information Systems requires completion of any three CIS 8000 level courses. For currently available courses, see www2.cis.gsu.edu/cis/program/syllabus/index.asp. In addition, you must have a grade point average of at least 3.0 for the three courses, with all grades a B- or higher. Please be aware that some of these courses have prerequisites and other requirements for enrollment. There are no additional fees required for the Graduate Certificate in Computer Information Systems. For more information including how to request the certificate after completing course work, please see www2.cis.gsu.edu/cis/program/ciscertificate.asp.
7340 Graduate Certificate in Personal Financial Planning

We are no longer accepting applications for this certificate program at this time.

The Graduate Certificate in Personal Financial Planning is intended for students who are CPAs or who possess an M.B.A., a master’s degree in a business-related field, or a J.D. and who desire graduate training in the field of personal financial planning. The program helps prepare students for a career in personal financial planning. Completion of the program will satisfy the education requirement for the Certified Financial Planner (CFP)™ examination.

The program provides a focus on individual and small business needs which complements the typical M.B.A./business master’s focus on larger business entities. Employers such as banks, brokerages, and other financial services firms will find this dual focus attractive as they seek employees capable of dealing effectively with both the demands of modern corporate life and the needs of the individuals and small businesses served by the financial services firms. The certificate provides attorneys with a focus on individual and small business financial needs which complements the legal services provided to those groups. Because of the close relationship between the financial planning and legal professions, the certificate also offers attorneys the opportunity to make a career change while using much of the knowledge and skill obtained through their legal training. For CPAs, the certificate provides the opportunity to expand the scope of services offered to clients.

7340.10 Regulations for the Certificate Program

All Graduate Certificate in Personal Financial Planning students will complete the “Business Communication Skills Requirement” explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to this certificate program. The time limit for completing the certificate program is two years. The certificate program requires completion of six graduate courses in residence at Georgia State University; in the event of waiver of one or more of the listed courses due to prior experience or education, substitute courses will be approved by the program director. A minimum cumulative GPA of 3.00 is required. In addition to possessing the M.B.A., another business master’s, or C.P.A. credential, applicants are required to meet the admissions requirements for the M.S. program with a major in personal financial planning with the following exceptions. Graduate Certificate in P.F.P. applicants who are CPAs or who possess an M.B.A. or other master’s degree in business from an AACSB-accredited institution or who possess a J.D. degree are exempt from the requirement of providing GRE or GMAT scores as part of the application process. Such qualifying applicants will be required to provide transcripts or other proof that they possess the necessary professional or academic credentials. If admitted to the Graduate Certificate in Personal Financial Planning program with valid GMAT or GRE scores, such applicants must submit valid GMAT or GRE scores before being eligible for admission to a regular master’s degree program, another graduate certificate program, or nondegree status in the Robinson College of Business.

Course Requirements

Foundation Course. The Graduate Certificate in Personal Financial Planning requires completion of this foundation course or its equivalent: ACCT 4510 Introduction to Federal Income Taxation (3)
Required Courses (18 hours)

- PFP 8400 Personal Financial Planning (3)
- PFP 8420 Individual Retirement Planning (3)
- PFP 8460 Estate Planning (3)
- PFP 8520 Advanced Studies in Asset and Wealth Management (2)
- FI 8000 Valuation of Financial Assets (3)
- RMI 8200 Life Insurance (3)

Awarding the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the Department of Risk Management and Insurance to have the certificate awarded. The request, an official Georgia State University transcript, and a certificate fee of $40.00 (check made payable to Georgia State University) must be sent to the director of the certificate program in the Department of Risk Management and Insurance. The director then reviews the student's record. If all requirements have been met, the certificate, signed by the dean and the department chair, will be issued to the student.
7350 Graduate Certificate in Real Estate

We are no longer accepting applications for this certificate program at this time.

7350.10 Admissions

An accredited bachelor’s degree provides appropriate background for the nondegree certificate in real estate program (C.R.E.) in the Department of Real Estate. No specific undergraduate courses are required for consideration for admission to the program. The application procedures and admission criteria are given in the “Master's Admissions” section of this chapter.

7350.20 Regulations for the Certificate Program

1. All Graduate Certificate in Real Estate students will complete the Business Communication Skills Requirement explained earlier in this chapter. The regulations, policies, and procedures given in the “Master’s Enrollment” and “Master’s Programs” sections of this chapter apply to the C.R.E. program. The time limit for completing the certificate program is two calendar years. The program requires 18 semester hours of course work. A maximum of nine hours of transfer credit is permitted in this program. A minimum cumulative GPA of 3.00 is required.

2. Course Requirements (3). There are three semester hours of required course work in the certificate program.

- RE 8000 Real Estate Concepts and Practices (3)

This course can be replaced in the program by another 8000-level real estate course with permission from the program coordinator. Replacement with a substitute course will be evaluated based on previous course work and experience.

3. Electives (15). The student can select any 8000-level course from the real estate curriculum for the program. The following courses are recommended as electives.

- RE 8020 Real Estate Investment Analysis (3)
- RE 8030 Real Estate Financing (3)
- RE 8040 Legal and Regulatory Environment of Real Estate (3)
- RE 8050 Real Estate Development (3)
- RE 8060 Applied Real Estate Market Analysis (3)
- RE 8100 Strategic Management of Real Property in a Corporate Environment (3)
- RE 8410 Real Estate Appraisal Theory and Practice (3)

Each student may petition the coordinator of the certificate program to substitute up to nine semester hours of course work from other departments or programs as electives in the C.R.E. program. These courses must have relevance for a real estate education. The student will prepare a written request in which the title of the course is identified, a full course description is attached, and a statement explaining the significance of the course to the student’s program is included. In each instance, these courses must be graduate level. The written request should be submitted to, and will be evaluated by, the C.R.E.
coordinator, who will notify the Office of Graduate Student Services of any approvals.

4. Awarding of the Certificate. After completing the requirements for the certificate according to these regulations, the student must make a written request to the certificate adviser in the Department of Real Estate to have the certificate awarded; an official Georgia State University transcript and a certificate fee of $125 (check made payable to Georgia State University) must be sent with the request. The adviser then reviews the student’s record. If all requirements have been met, the certificate, signed by the dean and department chair, will be issued to the student.
7355 Graduate Certificate of Specialization in Brand & Customer Management

This certificate program is open to all MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University who are qualified for admission to a masters program in the Robinson College of Business.

To earn the (Graduate) Certificate of Specialization in Brand & Customer Management, students must complete the following 4 courses:

- MK 8200 Marketing Research (MR)
- MK 8710 Customer Relationship Management (CRM)
- MK 8620 Product and Brand Management (PBM)
- MK 8720 Data Driven Marketing (DDM)

Prerequisite for all courses: MBA 8145 Strategic Marketing Management

Students must earn an overall 3.0 grade point average (GPA) in all courses taken in the J. Mack Robinson College of Business and must earn a minimum of B- in all courses taken as part of this certificate.

Contact Dr. Alok Saboo for further information: asaboo@gsu.edu.
This certificate program is open to all MBA students in the Robinson College of Business and graduate students from other colleges at Georgia State University who are qualified for admission to a masters program in the Robinson College of Business.

To earn the (Graduate) Certificate in Strategic Sales Leadership, students must complete the following 2 courses:

- MK 8330 Strategic Selling
- MK 8340 Strategic Sales Leadership

And two or more of the following related electives:

- MK 8510 Business to Business Marketing
- MK 8710 Customer Relationship Management
- MGS 8430 Negotiation
- MGS 8425 Coaching for Leadership

Prerequisite for all courses: MBA 8145 Strategic Marketing Management

Students must earn an overall 3.0 grade point average (GPA) in all courses taken in the J. Mack Robinson College of Business and must earn an overall grade point average (GPA) of 3.0 in all courses taken as part of this certificate.
7358 Executive Doctorate in Business (EDB)

EDB Program Office
Tower Place 200, 3348 Peachtree Road NE, Suite 500, Atlanta, GA 30326
404/413-7187
Program website: http://edb.robinson.gsu.edu/
Email: kalnitz@gsu.edu

Maury C. Kalnitz, MBA, MS, Director of the EDB Program
Lars Mathiassen, Ph.D., Academic Director of the EDB Program

Please contact the EDB Program Office for more information about this program.

7358.10 Goals and Expectations

The Executive Doctorate in Business (EDB) program of the J. Mack Robinson College of Business advances the development and practice of effective organizational leadership by providing senior level executives with:

- The knowledge and expertise required to identify, understand, and successfully tackle the interdisciplinary, big picture issues that characterize global business management today.
- The skills in formal social inquiry required to define and address complex issues and to disseminate knowledge in a variety of professional and public outlets to influence professional activity and public policy.
- The type of interdisciplinary and global systems oriented perspective that is required to understand and address contemporary business problems.

The EDB program is a 3-year degree program designed for senior executives who already possess an MBA, EMBA, or equivalent MS degree. It is offered in an executive format with students participating in four 3-day residencies (Thursday, Friday and Saturday) per semester for 6 semesters.

Conduct

All EDB students must assume full responsibility for knowledge of the rules and regulations concerning their studies. Moreover, students are expected to abide by generally accepted standards of conduct. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, faculty, or other students. Students should review the “University Code of Conduct” in the General Information chapter of this catalog for explicit information on this topic.

Admissions: Applications, Procedures, and Criteria

Applications for the EDB program will be accepted for once-a-year admission in the fall semester. All inquiries and requests for application materials should be made to:

EDB Program Office
Tower Place 200
The EDB Program Office phone number is 404/413-7187. The program's website is http://edb.robinson.gsu.edu/. All documents and other materials submitted by or for applicants for admission to the EDB program become the property of Georgia State University and cannot be returned. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the EDB Program Office by the deadline for receipt of materials. Incomplete applications will not be processed.

Admission Criteria

Admission decisions are based on a careful review of the applicant’s scholastic record, resume, required essays, and the other information submitted in support of the application. Applicants must possess an accredited MBA, EMBA, or equivalent MS degree. Applicants are not required to submit a certification of their state of health but on enrollment, must submit an immunization certification. The college reserves the right to investigate the health, character, and personality of each applicant. Listed below are the materials which all applicants must submit to the EDB Program Office to be considered for admission.

Application

Applicants must submit all application forms, including the narrative section.

Application Fee

An application fee of $100 must be submitted by all applicants. Checks or money orders should be made payable to Georgia State University in U.S. currency. Do not send cash. The application fee cannot be waived, is nonrefundable, and does not apply toward registration fees.

Transcripts

Applicants either must request that two official copies of all transcripts be sent directly from each institution to the EDB Program Office or submit the official transcripts unopened with the application. An applicant who has previously attended Georgia State University is permitted to submit only one copy of transcripts from each institution attended prior to entering the university; two copies are required from all institutions attended after having last been registered at Georgia State University.

Interview/Additional Information

As part of the review of an applicant’s file, an interview or additional information is often required. In these instances, applicants will be contacted to schedule an interview or to provide additional information.

International Applicants

Applications from international applicant are accepted.

TOEFL: An international applicant whose native language is not English may be required to submit
official scores from the Educational Testing Service on the Test of English as a Foreign Language (TOEFL). An international applicant who has received a degree from an accredited U.S. institution is exempt from this requirement. However, international applicants who have taken the TOEFL within two years of application to the EDB program are encouraged to submit official scores even if the exemption applies.

The school code is 5251.

**Financial Requirements:** Georgia State University reserves the right to admit only those international applicants who are academically qualified and who have documented their ability to meet the financial requirements while in attendance.

**EDB Program of Study**

**Year 1**

Fall Semester  
(9 credit hours)

- EDB 9000 Leadership to Create Human Value  
- EDB 9020 Philosophy and Practice of Engaged Scholarship  
- EDB 9050 Qualitative Research I

Spring Semester  
(9 credit hours)

- EDB 9080 Quantitative Research I  
- EDB 9070 Qualitative Research II  
- EDB 9140 Laboratory for Business Driven Research

**Year 2**

Fall Semester  
(9 credit hours)

- EDB 9030 Theory and Practice of Managing Organizations  
- EDB 9100 Quantitative Research II  
- EDB 9140 Laboratory for Business Driven Research

Spring Semester  
(9 credit hours)

- EDB 9040 Emerging Markets and Global Models for Business  
- EDB 9060 Global Economic Systems & Issues  
- EDB 9170 Dissertation (3 credit hours)

**Year 3**
Fall Semester  
(9 credit hours)  
  - EDB 9110 Influences and Limitations on Executive Decision Making  
  - EDB 9170 Dissertation (6 credit hours)

Spring Semester  
(9 credit hours)  
  - EDB 9120 Evidence Based Management  
  - EDB 9150 Creating and Disseminating Research Knowledge  
  - EDB 9170 Dissertation (3 credit hours)

Academic Regulations

I. Scholastic Warning and Termination

a. Each student must maintain a 3.00 doctoral GPA (“B” average). The doctoral grade-point average (GPA) is defined as the GPA for all EDB courses numbered 9000 or higher taken after admission to the EDB program. A student whose doctoral GPA falls below 3.00 is on “scholastic warning.” After being placed on scholastic warning, a student must attain a 3.00 doctoral GPA within two consecutive calendar semesters; otherwise the individual will be terminated from EDB studies in the Robinson College of Business. The doctoral GPA could differ from the GPA calculated by the university and reported on the student’s official transcript, since the university GPA would also include the grades from any graduate courses numbered 6000 or above taken at Georgia State University before admission to the EDB program. b. A student who has been terminated from the EDB program will not be permitted to reapply to or reenter the program.

II. Standards of Performance

The requirements and regulations listed in this catalog refer to minimum standards of performance. The program may have additional requirements, as set forth in writing, that exceed the minimum standards published in this catalog. If a student fails to meet these additional requirements, the directors of the EDB program may require that the student withdraw from EDB study. To continue in the program, a student must make reasonable and timely progress toward the degree in terms of coursework completed.

Continuous Enrollment

Beginning with the semester of acceptance, an EDB student must register for a full load each semester (excluding summer semester unless the student has completed all coursework) until graduation. A full load is considered a minimum of nine semester hours. Students who are visa-holders may need to register for more hours and should discuss their status with the Office of International Student and Scholar Services. EDB 9171, Dissertation Seminar, may be used to satisfy this requirement until the student has passed the final dissertation defense. Students who fail to meet the continuous enrollment requirement are subject to withdrawal from EDB studies in the Robinson College of Business.

Reentry

1.191
As stated in the previous section concerning continuous enrollment, students must enroll for a full course load each semester (excluding summers). Any absence from the program must be approved through the academic director. Students who leave the program without an approved request or who do not fulfill the terms of an approved request for an absence may not be allowed to reenter the program. Any student who is not registered for one calendar year must file a reentry application with the Registrar’s Office. Students must be mindful of the deadline for this application. There is a charge to file a reentry application. As previously stated, reentry approval is not automatic and the student should check with the EDB Program Office if considering reentry.

III. The Dissertation

The purpose of the dissertation is for the EDB candidate to demonstrate ability to conduct research leading to a significant contribution in a chosen area of inquiry. Before a student begins to collect any primary data from human subjects, the student must make sure that all data collection, including surveys, is in compliance with the guidelines set out by the Institutional Review Board (IRB). Included among these requirements is certification via an online test on ethical treatment of subjects. The IRB’s Human Subjects Manual is accessible online at http://ursa.research.gsu.edu/ursa/compliance/human-subjects/.

IV. The Dissertation Committee

The Dissertation Committee consists of a chair plus a minimum of two members. The committee, and any subsequent change in its membership, is appointed by the academic director of the EDB program. Faculty from institutions other than GSU may serve as members of the committee, but at the time of the initial formation of the committee, there must be at least two GSU faculty on the committee. At least two committee members must be in good standing with respect to GSU graduate faculty status. Co-chair arrangements are not only acceptable, but even encouraged, especially in cases where one of the co-chairs is an assistant professor. When the student is ready to begin the initial work on the dissertation, he or she should first discuss with the EDB academic director the names of potential faculty who would be the most appropriate chair of the Dissertation Committee. Only after the EDB academic director has agreed with the student as to the choice of a particular faculty member should the student then invite the faculty member to be chair of the committee. Once the dissertation chair has been chosen, the chair, in consultation with the student, will recommend the selection of the remaining committee members to the EDB academic director.

Dissertation Proposal Defense

Prior to admission to candidacy for the degree, a dissertation proposal defense must be held. After the student completes a written proposal that the Dissertation Committee deems to be ready for final defense, a dissertation proposal defense will be held before the Dissertation Committee.

The student’s dissertation proposal should include a summary of the following: the purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory, if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation.

The proposal defense will be open to all interested faculty and doctoral (EDB and Ph.D.) students. After the proposal defense has been held, the members of the committee will vote to determine if the student is
deemed to have a satisfactory research topic. A unanimous decision by the student's Dissertation Committee is required. The members of the committee will sign the dissertation proposal defense approval form.

Submission of the approval form does not constitute a contractual agreement between the student and the Dissertation Committee. It is within the scope and function of the Dissertation Committee to recommend modifications to the research as it proceeds. Upon submission of the proposal defense approval form to the EDB Program Office, the student is admitted to candidacy for the degree.

Committee members should be given a draft of the proposal (and also the final dissertation) at least two weeks before the proposed defense date. This will permit a revision cycle to both improve the work before the defense and ensure that committee members have adequate time to comment and raise substantive issues, should this be the case. It will also allow the defense date to be postponed in the event that required changes could not be completed before the proposed defense date.

Final Dissertation Defense

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. At least two weeks in advance of the final dissertation defense, the student will inform the EDB Program Office of the scheduled date of defense and an announcement will be made to all academic units. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the EDB Program Office. Unanimous approval is required. Guidelines for the dissertation are available from the EDB Program Office and on the EDB website at http://phd.robinson.gsu.edu/ph-d-students/online-student-handbook/the-dissertation/.

Dissertation Embargo Policy

Students may request a 3-month, 6-month, 9-month, or 12-month restriction of dissertation publishing (hereafter termed embargo). Requests must be made in writing to the dissertation chair/co-chairs prior to the electronic uploads of the dissertation to ProQuest/UMI and Georgia State University’s Scholarworks Digital Archive Library. Written approval from the chair/co-chairs must be sent to the EDB Program Office. Once the approval is received by the EDB Program Office, the dissertation will not be published for the approved embargo period. The dissertation will be released for publishing after the embargo period ends.

V. Dissertation Defense and Graduation

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the EDB Program Office. Unanimous approval is required. An electronic copy of the dissertation must be submitted to the EDB Program Office two weeks prior to the
anticipated date of graduation.

Time Limits for the Degree

The time limits specified below should be interpreted as the maximum amount of time students may take to complete each of the degree requirements. It is anticipated that most students will complete the requirements within the intended three years of study:

- All coursework on the program of study in the EDB program must be completed within four years from the semester of entry into the EDB program.
- All requirements for the EDB degree, including the dissertation, must be completed within five years from the semester of entry into the EDB program.
7360 Ph.D. Program

Ph.D. Program Office
831 RCB Building
404/413-7070
Program website: robinson.gsu.edu/phd/
Email: rcbphd@gsu.edu

Lisa Schurer Lambert, PhD., Director of the Ph.D. Program
Adenike Brewington, MS., Associate Director of the Ph.D. Program

7360.05 Goals and Expectations

The Ph.D. program of J. Mack Robinson College of Business will develop in graduates a high level of competence in conducting research and in teaching business disciplines by requiring: (1) education in theory; (2) education in general research techniques as well as research techniques specific to a discipline; (3) research experience with faculty members on contemporary research problems and issues; and (4) training on teaching methodology reinforced with active classroom teaching experience.

The Ph.D. program requires that the student demonstrate mastery of a large and complex body of knowledge and a high degree of proficiency in the techniques of teaching and research. This is evidenced by the successful completion of coursework and examinations, effective performance in classroom instruction, participation with faculty members in research, presentation of papers and reports, and the writing of a dissertation of high quality. Given the substantial commitment of intellectual effort and time required to achieve these competencies, students are required to enroll on a full-time basis.

Conduct

All Ph.D. students must assume full responsibility for knowledge of the rules and regulations concerning their studies. Moreover, students are expected to abide by generally accepted standards of conduct. The university reserves the right to exclude any student whose conduct is prejudicial or injurious to the university, faculty, or other students. Students should review the “University Code of Conduct” in the General Information chapter of this catalog for explicit information on this topic.

The Nature of Ph.D. Studies

Ph.D. studies are fundamentally different from undergraduate or master’s programs. The Ph.D. student must be self-motivated and work well independently. The program is academically rigorous and students must have exceptional quantitative and verbal skills. Coursework is but one facet of the program. The research component is the heart of the Ph.D. program. The student must be highly motivated to work on research projects independently and with faculty. Most students take five years to complete the degree. Students are encouraged to present research papers at national and regional meetings. The college provides partial funding to help defray costs. The successful student is one who not only has excellent academic skills, but a passion for scholarly research.

7360.10 Ph.D. Majors Offered
The Robinson College of Business offers the Ph.D. in Business Administration with major fields in:

- Accountancy
- Computer Information Systems
- Finance
- Managerial Sciences (specializations are currently offered in Organization Behavior/Human Resource Management and Strategic Management). Please contact the Ph.D. Program Office for information about which of these programs is currently admitting students.
- Marketing
- Real Estate
- Risk Management and Insurance

The specialization in international business is available to Ph.D. students majoring in any business major.

7360.15 Ph.D. Program Operation

The Ph.D. program of the Robinson College of Business is governed and administered as follows:

1. The Graduate Program Council of the Robinson College of Business, comprised of five faculty members, recommends Ph.D. degree requirements and academic regulations that are subsequently submitted for approval by the college faculty.
2. The Ph.D. Program Office is run by the Associate Director who reports to the Director. This office is the student’s primary point of contact for administrative matters. Applications for admission are processed by this office.
3. The Ph.D. Coordinator is the faculty member in the student’s academic unit who advises students on courses to be taken and other degree requirements.

7360.20 Admissions: Applications, Procedures, and Criteria

Applications for the Ph.D. programs will be accepted for once-a-year admission in the fall semester. The deadline for receipt of all required application materials is January 8.

The Ph.D. application is an online electronic application. Visit phd.robinson.gsu.edu/admissions/ and select the link to “Apply Online.” All documents and other materials submitted by or for applicants for admission to the Ph.D. program become the property of Georgia State University and cannot be returned. It is the responsibility of each applicant to follow the application procedures completely and correctly and to be certain that all materials have been submitted to the Ph.D. Program Office by the deadline for receipt of materials. Incomplete applications will not be processed. Admission is for entry in a specific major. A student may enter a different major only if, and after formal approval has been given by the Ph.D. admissions committee of that major. Not all majors admit students yearly.

Admission Criteria

Admission decisions are based on a careful review of the applicant’s scholastic record, admission test score(s), letters of recommendation, and the other information submitted in support of the application (including an interview, if required by the academic unit). In making the decision, each academic unit must consider at all times the optimum number of students in the program. This could result in the denial or
Applicants are not required to submit a certification of their state of health but must submit an immunization certification upon admission. The college reserves the right to investigate the health, character, and personality of each applicant.

Listed below are the materials that all applicants must submit to the Ph.D. Program Office to be considered for admission.

**Application**

Applicants must submit all application forms, including a statement of purpose.

**Application Fee**

An application fee of $50 must be submitted by applicants who have never applied to the Ph.D. program of the Georgia State University Robinson College of Business and paid the fee in the past. The online application allows applicants to pay by credit card. Checks or money orders should be made payable to Georgia State University in U.S. currency. Do not send cash. The application fee cannot be waived, is nonrefundable, and does not apply toward registration fees.

**Transcripts**

Applicants either must request that one official copy of all transcripts be sent directly from each institution to the Ph.D. Program Office or submit the official transcripts unopened with the application.

**Letters of Recommendation**

Three letters of recommendation are required from persons who are able to evaluate the applicant’s intellectual capacity for advanced study, independent research, analytical thinking, and the potential for effective teaching at the collegiate level. Applicants and students are not permitted to have access to letters of recommendation.

**Admission Test for Ph.D. in Business Administration**

All applicants to the Ph.D. in Business Administration program must submit official scores on the Graduate Management Admission Test (GMAT) of the Educational Testing Service.

* The following units —Business Process Innovation, Computer Information Systems, Finance, Marketing, Organizational Behavior/Human Resource Management, Real Estate, and Risk Management and Insurance—will accept scores on the Graduate Record Examinations (GRE) as a substitute for the GMAT from applicants. Other academic units may consider GRE scores on a case-by-case basis, but an applicant to any program other than those previously mentioned may lessen the probability of acceptance by not submitting GMAT scores. The GRE school code is 5251. Applicants are advised to enclose a copy of their test scores with the hard copy materials that they send to the admissions office to facilitate the office in locating the official score report.
*GMAT scores will not be considered if they are more than seven years old at the time of application to the Ph.D. program. The school code is QCK-ZW-59.

A GMAT Information Bulletin may be obtained by contacting the Graduate Management Admission Council:

Pearson VUE-GMAT Program  
5601 Green Valley Drive  
Suite 300  
Bloomington, MN 55437  
Phone: 1 800 717 4628  
E-mail: gmat@ets.org  
www.gmac.com

Interview/Additional Information

As part of the review of an applicant’s file by faculty representatives in the academic unit, an interview or additional information may be required. In such cases, the applicant will be notified.

7360.25 International Applicants

TOEFL: An international applicant whose native language is not English must submit official scores from the Educational Testing Service on the Test of English as a Foreign Language (TOEFL). An international applicant who has received a degree from an accredited U.S. institution is exempt from this requirement. However, international applicants who have taken the TOEFL within two years of application to the Ph.D. program are encouraged to submit official scores even if the exemption applies. The school code is 5251.

Financial Requirements: Georgia State University reserves the right to admit only those international applicants who are academically qualified and who have documented their ability to meet the financial requirements while in attendance. Although the Ph.D. program does award assistantships to the majority of accepted applicants, this funding is not always adequate to meet all living expenses. Applicants who are requesting a student (F-1) visa might be required to have some independent sources of funding, depending on the amount of their award. For the 2015-2016 year, an unmarried student coming to the U.S. without dependents is required to show resources totaling approximately $48,586 a year for tuition and living expenses. Applicants with dependents will be required to document additional funds. This documentation will be requested of applicants who are offered admission. The estimated living expenses do not include owning a car.

Immunization Certification

The Board of Regents of the University System of Georgia Requires that all accepted applicants who have never attended Georgia State University submit proof of immunization from measles, mumps, and rubella (MMR) as well as the varicella vaccine before being allowed to register. The Ph.D. program will consider applicants for admission without this documentation. However, in order to matriculate, an applicant must have fulfilled this requirement. The Immunization Form can be obtained from the Georgia State University Health Services Office.
7360.30 Changing Year of Entry and Record Retention

Admission to the Ph.D. program is for the specific semester and year stated in the acceptance letter. Any accepted applicant who does not enroll for the semester and year for which acceptance was granted must notify the associate director of the Ph.D. program and the unit’s Ph.D. coordinator so his or her records may be updated for fall of the next year. Admission for the next year is not guaranteed. Applicants should be aware that assistantships, instructorships, or fellowships could be affected by such a change. All application files of nonmatriculated applicants, regardless of admissions decision, will be kept on file for two years. An applicant who wishes to reactivate an application after that period may need to resubmit application materials and official documentation.

7360.35 Ph.D. Assistantships, Instructorships, and Fellowships

Ph.D. students in the Robinson College of Business are eligible for graduate research assistantships (GRA) and graduate teaching assistantships (GTA). The college also awards temporary instructorships to select Ph.D. students who have passed the dissertation proposal defense. In addition, there are various fellowships and scholarships awarded on a competitive basis to Ph.D. students. No separate application is required for applicants to be considered for funding.

7360.40 Graduate Research Assistantships

Newly admitted Ph.D. students. Soon after admission to the Ph.D. program, the Ph.D. Program Office will inform newly admitted students of the type and number of appointments, if any, which they have been allocated by their academic unit. All accepted applicants are automatically considered for assistantships.

Students in their second and successive years of Ph.D. studies. Each academic unit will determine the assistantship appointment level to be allocated to its continuing Ph.D. students based on the students’ performance in the program and on the unit’s assistantship budget.

7360.45 Graduate Teaching Assistantships

The teaching assignment of a graduate teaching assistant is usually a basic undergraduate course in the student’s area of interest.

Advanced Ph.D. students may be permitted to teach advanced-level courses. Only Ph.D. students who have completed the requirements for a master’s degree, or the equivalent amount of graduate coursework, can be considered for appointment as a GTA.

Prior to the actual appointment as a GTA, a student must be recommended for hiring by the academic unit and receive approval to teach from the University. The student is responsible for completing all paperwork involved in this process well in advance of the semester for which approval is sought.

Any Ph.D. student appointed as a GTA must take BA 9200, Seminar in University Teaching, during his or her first or second semester of teaching. Prior teaching experience does not exempt a student from this requirement. Nonnative speakers of English must demonstrate adequate proficiency in their language skills to the satisfaction of their academic unit prior to being hired as a GTA.
7360.50 Tuition for GRAs and GTAs

A student hired as a GRA or GTA receives a tuition waiver. A registration fee assessed each semester includes the health clinic, student activity, student athletics, recreation and transportation fees. International students and all graduate students who have a full tuition waiver (as defined by the university) must pay a mandatory health insurance fee or provide proof of health insurance. Submission of proof of insurance does not automatically exempt a student from this requirement. Approval is contingent on verification of coverage. For further information, students should visit the Student Accounts website: sfs.gsu.edu/tuition-fees/student-health-insurance/.

- Standards Applying to Both GRA and GTA Appointments

1. Students must register for a minimum of nine credit hours of appropriate course work (or research hours). During each semester in which an assistantship is held, students must register for a full load (as defined by the university) of credit hours that may be a combination of courses, dissertation hours, and/or research hours. Students who are visa-holders should discuss their status with the Office of International Student and Scholar Services to make certain that they are registered for a sufficient number of hours.
2. Students must maintain satisfactory academic standing during the period(s) of their appointment, including a minimum 3.00 cumulative grade-point average. Ph.D. students must also be making normal progress toward completion of the degree requirements.
3. Satisfactory performance, as measured by the academic unit, as a GRA or a GTA is required for continuation of such appointments in subsequent semesters.
4. For further information on policies and procedures applying to GRA and GTA appointments, contact the associate director in the Ph.D. Program Office.

7360.60 Instructorships

A temporary instructor is appointed for one academic year at a time. Appointment as a temporary instructor benefits Ph.D. students who have passed the dissertation proposal defense and have demonstrated satisfactory classroom teaching ability over a period of two or more semesters by providing them with a significant level of income during the year in which they are working full time on their dissertation.

7360.65 Fellowships and Scholarships

The Robinson College of Business has a number of fellowships and scholarships available, ranging from $500 to $10,000 per year. Such fellowship and scholarship stipends are awarded in addition to the amounts received by Ph.D. students who are appointed as GRAs or GTAs. Information on specific fellowships and scholarships is available from the Ph.D. coordinator of the student’s academic unit.

7360.70 Doctor of Philosophy in Business Administration

1. Program of Study

The Ph.D. Coordinator is the faculty member in the student’s academic unit who advises students on courses to be taken and on other degree requirements. As a function of, and implicit in course selection for
the student’s program of study the academic unit will consider how the discipline fits into managerial and organizational contexts and will select courses accordingly.

A program of study indicating how the student will fulfill each of the degree requirements must be approved by the student’s Ph.D. Coordinator and the Director of the Ph.D. Program by the end of the second semester of enrollment. This program of study is filed in the RCB Ph.D. Program Office; it may be revised, as appropriate, but must be kept current, as it will be a key factor in determining satisfactory progress in the program.

Forty-two (42) semester hours of coursework, as a minimum, must be completed successfully for graduation. The major field requirement is a minimum of 18 credit hours; the research methods requirement is a minimum of 15 credit hours; and free elective or secondary area courses are a minimum of 9 credit hours for a total of 42 semester hours. Students are expected to complete the courses on their program of study on a timely basis. When feasible, registration for a full load (as defined by the college) each semester is encouraged, including courses for research and dissertation credit (BA 9000 or BA 9500). At a minimum, students who do not hold an assistantship must register for six hours per semester (excluding summer semester unless the student holds a GRA/GTA).

1. Quantitative and Research Foundations (15 semester hours)

Students entering the Ph.D. program are presumed to have background and current knowledge in the following additional areas:

- multi-variable calculus including multiple integration, partial derivatives, and infinite series;
- matrix algebra including linear transformations, vector differentiation, and eigenstructures;
- computer skills for empirical research including statistical packages and the use of databases; and
- macroeconomics and microeconomics through the intermediate level.

Students can remedy a deficiency in any or all of these areas by taking credit or noncredit courses, auditing appropriate graduate or undergraduate classes, and/or attending tutorial sessions. Students who feel their background is not adequate may consult with the Associate Director of the Ph.D. program and their Ph.D. Coordinator for recommendations on overcoming deficiencies.

III. Major Field (18 semester hours)

Hours of Course work. The satisfactory completion of no fewer than 18 graduate-level semester hours constitutes minimum preparation in the major field.

Students must have satisfactorily completed all courses on the program of study in the major field and in the research methods requirement to be eligible to take the preliminary examination. Requests to take the preliminary examination are made through the Ph.D. Coordinator. The Ph.D. Coordinator will notify the Office of Ph.D. Programs with the names of the student(s) prepared to take the examination.

Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.
1. Research Methods Requirements (15 semester hours)

The satisfactory completion of no fewer than 15 graduate-level semester hours constitutes minimum preparation in research methods. The Ph.D. Coordinator may approve substitutions for any of the following research methods requirements.

1. Intermediate Statistics: MGS 9920(3)
2. Research Design: MGS 9940(3)
3. Regression: MGS 9950(3)
4. Multivariate Data Analysis: MGS 9960(3)
5. Elective: research methods/theory development course: BA 9260; BA 9280; BA 9300; or a course may be from the student’s major field and department (3)
6. Free Electives or Secondary Area (9 semester hours)
7. The satisfactory completion of no fewer than nine (9) semester hours fulfills this coursework requirement and students may choose to fulfill these credits, with the approval of their Ph.D. Coordinator, either with a secondary area or with free electives. Courses would generally be at the 9000 Ph.D. level, except as advised by the Ph.D. Coordinator of the student’s academic unit, and would support and complement the student’s research interest.
8. Courses for each secondary area shall be taken from a list of courses prepared by the academic unit offering the secondary area, but students must have the approval of their Ph.D. Coordinator for both taking a secondary area and for the set of courses making up that secondary area.
9. Substitutes for secondary area courses can be made with the approval of the unit offering the secondary area and the student’s Ph.D. coordinator.

7360.75 Academic Regulations

Transfer Credit

A maximum of 15 semester hours may be transferred from other institutions or from other programs at Georgia State University. Transfer credit, whether from other institutions or from Georgia State, must have been completed within five years of the semester of entry to the Ph.D. program. The course must have been limited to graduate students only, and a grade of A or B must have been received.

At the time the program of study is planned with the Ph.D. coordinator, the student who requests transfer credit must submit a course description from the catalog of the institution, a syllabus or course outline, and written justification stating why the course is relevant to the program of study. Requests for transfer credit are approved at the discretion of the unit coordinator in consultation with Ph.D. faculty. Final approval for the acceptance of transfer credit rests with the director of the Ph.D. program at the time the program of study is submitted to the Ph.D. Program Office.

Residency Requirement

In order to earn a graduate degree at Georgia State University, students must earn the majority of their graduate program credit hours from Georgia State University. All transfer hours are subject to unit/college level approval. The Robinson College of Business defines residency in the Ph.D. program as being enrolled in approved coursework that is appropriate for the program, and that have not been counted toward another graduate degree of this college. The minimum residency requirement is 18 semester hours.
Scholastic Warning and Termination

The Ph.D. grade-point average (GPA) is defined as the GPA for all courses numbered 6000 or higher taken after admission to the Ph.D. program. Each student must maintain a 3.0 Ph.D. GPA ("B" average). A student whose semester or overall Ph.D. GPA falls below 3.0 is on "scholastic warning." After being placed on scholastic warning, a student must attain a 3.0 Ph.D. GPA within two consecutive calendar semesters; otherwise the individual will be terminated from Ph.D. studies in the Robinson College of Business.

The Ph.D. GPA could differ from the GPA calculated by the university and reported on the student’s official transcript, since the university GPA would also include the grades from all courses taken at Georgia State University before admission to the Ph.D. program.

No student will be permitted to sit for any examination required for the Ph.D. degree, other than course examinations, without having a minimum 3.00 Ph.D. GPA at the time the examination is to be taken. A student with a Ph.D. GPA below 3.00 is ineligible for graduate assistantship appointments as either a GRA or GTA. Students must have at least a 3.0 Ph.D. GPA in order to graduate.

A student who has been terminated from the Ph.D. program will not be permitted to reapply to or reenter the program.

Standards of Performance

The requirements and regulations listed in this catalog refer to minimum standards of performance. The student’s academic unit may have additional requirements, as set forth in writing, that exceed the minimum standards published in this catalog. If a student fails to meet these additional requirements, either the chair of the student’s major academic unit or the director of the Ph.D. program may require that the student withdraw from Ph.D. study.

To continue in the program, a student must make reasonable and timely progress toward the degree in terms of coursework completed and examinations. Students who fail to adhere to the minimum standards published in the catalog or to any higher standards established by the academic unit will be terminated from the program.

Petitions

When a student feels that unusual circumstances call for an exception to any of the regulations or requirements relating to the degree in his or her particular case, the student may write to the Ph.D. coordinator and request exemption from or change in the policy. The petition by the student must be submitted with accompanying justifications. If the Ph.D. coordinator and academic unit support the request, the Ph.D. coordinator will write a letter of support for the student and submit the material to the director of the Ph.D. program for a decision.

Continuous Registration

Beginning with the semester of acceptance, a Ph.D. student must register for a full load each semester) until graduation. Summer enrollment is mandatory if required by the Ph.D. faculty coordinator, if the student is receiving a GRA/GTA, and for certain visa holders. A full load is considered a minimum of nine semester
hours. Students who are visa-holders may need to register for more hours and should discuss their status with the Office of International Student and Scholar Services. BA 9000, Doctoral Research, may be used to satisfy this requirement until the student has passed the dissertation proposal defense. BA 9500, Dissertation Research, may be used to satisfy the minimum hours requirement once the student has passed the dissertation proposal defense. Students who fail to meet the continuous registration requirement are subject to withdrawal from Ph.D. studies in the Robinson College of Business.

Reentry

As stated in the previous section concerning continuous registration, students must enroll for a full course load each semester (excluding summers). Any absence from the program must be approved through the petition procedure (see section regarding petitions). Students who leave the program without an approved petition or who do not fulfill the terms of an approved petition for an absence, may not be allowed to reenter the program. Any student who is not registered for one calendar year must file a reentry application with the Ph.D. Program Office. Students must be mindful of the deadline for this application. There is a charge to file a reentry application. As previously state, reentry approval is not automatic and the student should check with the Ph.D. Program Office if considering reentry.

Preliminary Examination

The purpose of the preliminary examination is to determine student mastery of the body of knowledge in their area of specialization and their readiness for dissertation research. Students are encouraged to confer with their Ph.D. coordinator regarding the areas the examination will encompass. The preliminary examination is a written examination, supplemented in some cases by an oral examination. The preliminary exam may have several parts and students must have successfully completed all parts before being designated, informally, as ABD (“All-But-Dissertation”). The units offering Ph.D. programs will determine how many parts there will be to their preliminary exam and when these will be offered.

Students must have satisfactorily completed all required courses in the program of study in the major field to be eligible to take the preliminary examination (or the first part in the event of a multi-part exam). Requests to take the preliminary examination are made through their Ph.D. coordinator. The Ph.D. coordinator will notify the Ph.D. Program Office which student(s) are prepared to take the examination.

Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.

The Dissertation

The purpose of the dissertation is for the Ph.D. candidate to demonstrate his or her ability to conduct research leading to a significant contribution to the candidate’s discipline. Before a student begins to collect any primary data from human subjects, s/he must make sure that all data collection, including surveys and use of archival data, are in compliance with the guidelines set out by the Institutional Review Board (IRB). Included among these requirements is certification via an online test on ethical treatment of subjects. The IRB’s Human Subjects Manual is accessible online at ursa.research.gsu.edu/ursa/compliance/human-subjects/.
Acceptable Forms of Dissertation

Dissertations may be a single study or they may be composed of multiple essays or papers. In the latter case, these papers make up separate chapters of the overall dissertation or they are summarized within the dissertation and attached in full text. Guidelines for the traditional single study dissertation need not be articulated here since they are well understood and are part of the socialization of each business Ph.D. student. Guidelines for multi-paper studies, though, are articulated next since this model is not as familiar within U.S. schools of business.

Guidelines for Multi-Paper Dissertation

Whereas the essays or papers that are included in the dissertation may be co-authored, it is critical that the student provide evidence of leadership in the majority of these to demonstrate ability to conduct independent research. Committee members can and should exercise their own judgment as to the quality of the dissertation, irrespective of any prior publication history of the papers. Unit standards for multi-paper dissertations may be formulated and distributed to students to equal or exceed the guidelines expressed here.

The Dissertation Committee

The Dissertation Committee consists of a chair plus a minimum of three members. The committee, and any subsequent change in its membership, is appointed by the director of the Ph.D. program upon the recommendation of the Ph.D. coordinator. Faculty from institutions other than GSU may serve as members of the committee, but at the time of the initial formation of the committee, there must be at least three GSU faculty members on the committee. At least two committee members must be in good standing with respect to GSU graduate faculty status. Co-chair arrangements are not only acceptable, but even encouraged, especially in cases where one of the co-chairs is an assistant professor. Unit standards for committee membership may be formulated and distributed to students to equal or exceed the policies expressed here.

As the student develops an interest in a potential dissertation topic, he or she should discuss the topic with individual faculty members both to determine the topic’s feasibility and merit and the faculty members’ interest and expertise in that area. When the student is ready to begin the initial work on the dissertation, he or she should first discuss with the Ph.D. coordinator names of potential faculty who would be the most appropriate chair of the Dissertation Committee. Only after the Ph.D. coordinator has agreed with the student as to the choice of a particular faculty member should the student then invite the faculty member to be chair of the committee.

Once the dissertation chair has been chosen, the chair, in consultation with the student, will recommend the selection of the three remaining committee members to the Ph.D. coordinator. Normally, one of the committee members is from outside the academic unit. The final committee membership is then sent to the unit Ph.D. coordinator and the director of the Ph.D. program for their approval. Should either of these managers disapprove a particular committee member(s), the chair will work with the student to find a suitable replacement(s).

Dissertation Proposal Defense
Prior to admission to candidacy for the degree, a dissertation proposal defense must be held. After the student completes a written proposal that the Dissertation Committee deems to be ready for final defense, a dissertation proposal defense will be held before the Dissertation Committee.

The student’s dissertation proposal should include a summary of the following: the purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory, if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation.

The proposal defense will be open to all interested faculty and Ph.D. students. After the proposal defense has been held, the members of the committee will vote to determine if the student is deemed to have a satisfactory research topic. A unanimous decision by the student’s Dissertation Committee is required. The members of the committee will sign the dissertation proposal defense approval form.

Submission of the approval form does not constitute a contractual agreement between the student and the Dissertation Committee. It is within the scope and function of the Dissertation Committee to recommend modifications to the research as it proceeds. Upon submission of the proposal defense approval form to the Ph.D. Program Office, the student is admitted to candidacy for the degree.

Committee members should be given a draft of the proposal (and also the final dissertation) at least a month before the proposed defense date. This will permit a revision cycle to both improve the work before the defense and ensure that committee members have adequate time to comment and raise substantive issues, should this be the case. It will also allow the defense date to be postponed in the event that required changes could not be completed before the proposed defense date.

**Final Dissertation Defense**

When the candidate’s Dissertation Committee judges that the dissertation is complete, it must be defended orally in a final dissertation defense. At least two weeks in advance of the final dissertation defense, the Ph.D. coordinator will inform the Ph.D. Program Office of the candidate’s date of defense and an announcement will be made to all academic units. While any interested faculty member or graduate student may attend the examination and participate in the discussion, only those individuals who are members of the candidate’s Dissertation Committee will vote to approve or disapprove the dissertation. Upon successful defense of the dissertation, a dissertation defense approval form will be signed by the members of the Dissertation Committee and submitted to the Ph.D. Program Office. Unanimous approval is required. Guidelines for the dissertation are available from the Ph.D. Program Office and on the Ph.D. website at phd.robinson.gsu.edu/ph-d-students/online-student-handbook/the-dissertation/.

**Dissertation Embargo Policy**

Students may request a 3-month, 6-month, 9-month, or 12-month restriction of dissertation publishing (hereafter termed embargo). Requests must be made in writing to the dissertation chair/co-chairs prior to the electronic uploads of the dissertation to ProQuest/UMI and Georgia State University’s Scholar Works. Written approval from the chair/co-chairs must be sent to the Ph.D. Program Office. Once the approval is received by the Ph.D. Program Office, the dissertation will not be published for the approved embargo period. The dissertation will be released for publishing after the embargo period ends.
Graduation

Students must apply for graduation through the Office of Graduation. The deadline for applying for graduation is usually several months before the anticipated graduation date, so students need to apply in a timely manner. There is no summer commencement. More information concerning applying for graduation can be found at registrar.gsu.edu/graduation. The associate director of the Ph.D. program will provide the candidate with information regarding clearance for graduation. An electronic copy of the dissertation must be submitted to the Ph.D. Program Office two weeks prior to the anticipated date of graduation.

Time Limits for the Degree

These time limits should be interpreted as the maximum amount of time students may take to complete each of the degree requirements. It is anticipated that most students will complete the requirements much earlier than the maximum time limits specified below:

- All coursework on the program of study and the preliminary examination in the Ph.D. in Business Administration program must be completed within four years from the semester of entry into the Ph.D. program.
- The Dissertation Committee must be appointed, the dissertation proposal defense must be held, and the student’s dissertation proposal must be approved within one year after completion of all parts of the preliminary exam.
- All requirements for the Ph.D. degree, including the dissertation, must be completed within seven years from the semester of entry into the Ph.D. program.
8000 School of Public Health

Graduate programs in the School of Public Health are described in detail in this chapter. See subsections for specific program information as well as policies and procedures. The School of Public Health does not currently offer an undergraduate degree program. Interested students should visit the School of Public Health website at publichealth.gsu.edu for updates on our degree offerings.

About the School of Public Health

The School of Public Health (SPH) is a multi-disciplinary, research-based unit, drawing upon partnerships with community members and organizations, dedicated to the mission of advancing health through leadership, scholarship, research and service to better the human condition and promote the common good, especially for urban communities and for global populations. The School of Public Health achieves this mission by applying existing scholarship within Georgia State University to priority public health problems, particularly those that are aimed at reducing health disparities in urban settings. Training and research programs focus on both building the science base that underlies public health practice, as well as applying effective interventions that have been demonstrated to improve the public health. Academic and training efforts emphasize the basic prevention sciences (e.g., emerging infectious diseases, immunology, virology, bioinformatics, genomics, and geographic sciences), as well as applied public health efforts (e.g., chronic disease prevention, health promotion, environmental health, program evaluation, health policy, public health ethics and law, health communications, community-based participatory research, and global health).

Office of the Dean
848 Urban Life Building
404/413-1130
publichealth.gsu.edu

Michael P. Eriksen, Dean
Rodney Lyn, Associate Dean for Academic Affairs
John Lutzker, Interim Associate Dean for Faculty Development
Laura Salazar, Interim Associate Dean for Research
Shannon Self-Brown, Doctoral Program Director
Ike Okosun, Interim Director, Division of Epidemiology and Biostatistics
Stuart Shalat, Interim Director, Division of Environmental Health
Terry Pechacek, Interim Director, Division of Health Management and Policy
Daniel Whitaker, Interim Director, Division of Health Promotion and Behavior

Core Faculty

Barger, Casanova, Chowell, Crimmins, Dai (joint faculty), Dube, Eriksen, Fuller, Graybill, Greenwald, Hayat, Huddleston, Il’Yasova, Lai, Luo, Lutzker, Lyn, Magee, Masyn, Mobley, Okosun, Owen-Smith, Parker, Pratt, Ramsey-White, Roach (joint faculty), Roblin, Rothenberg, Salazar, Self-Brown, Shalat, Shanley-Chatham, Smith, Stauber, Sterling, Steward, Strasser, Swahn, Weaver, Whitaker, Wilkin (joint faculty), and Wright (joint faculty).
8000.10 Accreditation

The School of Public Health’s (SPH) Master of Public Health (MPH) program has been accredited by the Council on Education for Public Health (CEPH) since 2007, and was re-accredited in 2012 for a seven year period (2012-2019). In June 2013, CEPH accepted Georgia State University’s initial application to transition from an accredited program in public health to an accredited school of public health. The then Institute of Public Health was immediately renamed the School of Public Health and embarked on a three year accreditation process. In July 2015 and on schedule, CEPH accepted the SPH’s preliminary accreditation self-study, and the School was deemed eligible for a final accreditation site visit completed in December 2015. A final decision on Georgia State University’s transition from accredited program in public health to accredited school on public health could arrive as early as July 2016. CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside schools of public health.

8000.20 Mission, Philosophy, Values and Goals

The School of Public Health has the mission of advancing health through leadership, scholarship, research, and service to better the human condition and promote the common good, especially for urban communities and for global populations.

The School’s mission is strengthened by the objective of the University System of Georgia, through its Strategic Plan for Public Health Education, Research and Service, “to ensure that the System becomes one of the national leaders in public health education, research and service.”

Six values were determined in a School-wide review process. All values were developed with input from the administration, faculty, staff and students and are reaffirmed or revised during each subsequent review process. The values are succinct and specific in nature and are reflected in faculty, staff and students’ instruction, service and learning activities. The values are:

1. Scholarship and inquiry
2. Human rights and social justice
3. Diversity in multicultural and multiethnic environments
4. Integrity, accountability and transparency
5. Leadership, innovation and transformation
6. Healthy, sustainable social environments

The goals of the School of Public Health are to:

1. Prepare students to use multi-disciplinary skills to address contemporary public health problems.
2. Advance public health sciences and our understanding of the causes and prevention of disease.
3. Promote service activities and initiatives by implementing community-based projects, educating professional and lay audiences, and collaborating with the public health workforce to advance health promotion and disease prevention.

Measurable objectives related to each goal may be found on the SPH website or in student handbooks.
8000.30 Degrees and Certificates Offered

The School of Public Health offers the following graduate programs:

- Doctor of Philosophy in Public Health
- Master of Public Health
- Graduate Certificate in Public Health

8000.40 Research Centers and Initiatives

The Mark Chaffin Center for Healthy Development
14 Marietta Street NW, 2nd Floor
404/413-1281
http://families.publichealth.gsu.edu/

The Mark Chaffin Center for Healthy Development (CHD) was established in August 2008 to house the National SafeCare® Training and Research Center (NSTRC) and the Center for Leadership in Disability (CLD), a University Center for Excellence in Developmental Disabilities (UCEDD). In 2011 CHD welcomed Prevent Child Abuse Georgia, a state chapter of Prevent Child Abuse America, which will provide a statewide direction to promote healthy children and develop strong families through community resources, public awareness, prevention programs, research, and advocacy activities. The center was designated a university-level research center in 2015, and its name honors and memorializes Dr. Mark Chaffin (1952 – 2015), a pre-eminent scholar in child maltreatment, parenting, implementation science and services for disadvantaged people and populations with disabilities.

The NSTRC is funded by a number of private and public service and research grants and contracts. It was created in 2007 with a center grant from the Doris Duke Charitable Foundation. The CLD is primarily funded by a center grant from the Administration on Developmental Disabilities (ADD) of the Administration on Children and Families (ACF) within the U.S. Department of Health and Human Services (USDHHS). PCA Georgia is funded by a grant from the Governor’s Office for Children and Families, the Arthur M. Blank Family Foundation, and other sources. The general mission of the CHD is to promote the health, safety, well-being, and quality of life of children, adults, and families with and without disabilities through research, service, advocacy, and to prevent child maltreatment.

Center for Excellence on Health Disparities Research
848 Urban Life Building
404/413-1130
http://disparities.publichealth.gsu.edu/

The Center for Excellence on Health Disparities Research (CoEx) is funded through the NIH’s National Center for Minority Health and Health Disparities and includes major research topics, as well as outreach programs. It is based in the School of Public Health and includes researchers and faculty from public health, social work, criminal justice, African-American studies, sociology, psychology and the Center for Healthy Development. The three major research areas include: investigating variations in health among disadvantaged neighborhoods, especially in the wake of Atlanta’s relocation of residents from traditional public housing; examining the role of religion and churches in reducing drug use and the transmission of
HIV and testing a method (the SafeCare® Model) of reducing child maltreatment by using computers.

The Community Research Center (CRC)
75 Piedmont Ave, Suites 904-906
404/413-1147

The Community Research Center is a focus for expertise in working with citizens and organizations within disadvantaged communities. It currently manages a number of research projects and interventions on HIV/AIDS and related issues. The Center has established a strong presence in the community, and builds partnerships with community organizations for training, conducting community-based participatory research, and local capacity building.

Partnership for Urban Health Research
848 Urban Life Building
404/413-1137
http://urban.publichealth.gsu.edu/

The Partnership for Urban Health Research (PUHR) was established to understand how the urban environment affects the health and well-being of people who reside and work in the metropolitan Atlanta area. The focus of its efforts is on populations that bear a disproportionate burden of illness and disease using an interdisciplinary approach to research. In partnership with surrounding communities, PUHR creates and disseminates knowledge that is both meaningful and beneficial to the communities that participate in the process.

Tobacco Center of Regulatory Science
847 Urban Life Building
404/413-1142
http://tcors.publichealth.gsu.edu/

Georgia State University’s School of Public Health has been named one of 14 Tobacco Centers of Regulatory Science (TCORS) by the National Institute of Health (NIH) and the Food and Drug Administration (FDA). Along with major partners – the University of Illinois, Chicago and RTI International, the Georgia State University TCORS focuses on both the human and economic factors that contribute to decision making related to tobacco products. Funded through a five-year, $19 million grant, the Georgia State University project is titled “The Science of Decision Making: Connecting People and Policy.”

The Policy Leadership for Active Youth (PLAY)
848 Urban Life Building
404/413-1133
http://publichealth.gsu.edu/research-2/policy-leadership-for-active-youth/

Policy Leadership for Active Youth (PLAY) is a policy research initiative of the Georgia State University School of Public Health in partnership with the Georgia Center for Obesity and Related Disorders (GCORD) of the University of Georgia and Medical College of Georgia focused on engaging multiple sectors. Supported by Healthcare Georgia Foundation, the major focus of PLAY is connecting emerging evidence around childhood overweight and obesity to prevention and reduction activities occurring
throughout Georgia.

8000.50 Academic Resources and Services

Office of Academic Assistance and Career Services

1 Park Place, Suite 640
404/413-1452
publichealthadvising@gsu.edu

Contacts:

Denise Gouveia, Director
Lynette Reid, Admissions Coordinator
Jessica Pratt, Practicum and Career Coordinator
Gina Sample, Graduate Advisor
Esther Singh, Administrative Assistant

The Office of Academic Assistance and Career Services (OAA) provides School of Public Health (SPH) current and prospective students with comprehensive student support services to ensure academic and career success.

Advising and Academic Assistance

http://publichealth.gsu.edu/students/academic-advising/

For students in the Master of Public Health (MPH) program, academic advisement is provided using a two-pronged approach. The Graduate Advisor in OAA provides guidance on administrative matters such as program of study advisement, degree petition process, thesis/capstone registration, graduation, and referral to other student support services on campus. The School of Public Health faculty serve as faculty mentors, and students are encouraged to talk to their mentors about how to select a concentration, determining which course electives make sense for future career goals, exploring research interests and opportunities, developing professional networks, and serving on thesis or capstone committees. MPH and GCPH students are not assigned a faculty advisor but are instead encouraged to develop multiple mentoring relationships with SPH faculty.

Doctoral students are assigned a Faculty Advisor and build a Doctoral Advisory Committee; however, they are also encouraged to develop multiple mentoring relationships with other SPH faculty, the Doctoral Program Director, and even the OAA Graduate Advisor as they navigate doctoral program administrative matters.

Career Services

http://publichealth.gsu.edu/students/career-resources/

The School of Public Health provides public health specific career support and leadership development
services to all current SPH students and alumni. Students are invited to attend our career events and workshops as well as meet with our SPH Career Coordinator to discuss individual career questions. Career Services can help students with resume writing, interviewing, job searching, internship development, and networking.

Public Health Student Life

The Office of Academic Assistance and Career Services (OAA) also supports all SPH student clubs and organizations – students are encouraged to read about the various groups within the college, and join one while being enrolled in the SPH: http://publichealth.gsu.edu/student-life.

Biostatistics Student Lab

Location: Room 18B, 25 Park Place

The purpose of the Biostatistics Computer Lab is to provide Georgia State University SPH students with computer access and statistical software needed for class and research activities. All computers are equipped with standard statistical software, including SAS, STATA, SPSS and Mplus, as well as Microsoft Office tools and internet access. The computer lab is supervised by a Graduate Assistant (GA) Monday thru Friday, 9am-5pm. The GRA is available to assist students with questions related to PH7017 Fundamentals of Biostatistics I, PH 7027 Fundamentals of Biostatistics II, and PH7525 Statistical Computing, as well as basic computer assistance and questions related to the use of SAS.

8000.60 Student Organizations

Public Health Student Association (PHSA)

The Public Health Student Association (PHSA) is the student organization of the School of Public Health at Georgia State University. PHSA seeks to develop well-rounded public health professionals and promote meaningful interactions between students, faculty and staff, and public health professionals. Throughout the school year, PHSA organizes social events, professional development opportunities, and public service events for students, faculty, and staff. For more information: http://publichealth.gsu.edu/students/student-association-phisa/.

Association for Chronic Disease Awareness (ACDA)

As a campus director’s organization of the National Association of Chronic Disease Directors (NACDD), the Association of Chronic Disease Awareness strives to promote chronic disease awareness and prevention efforts within the Georgia State University community and the Atlanta area. The organization shall promote the professional development of its members and advance the initiatives of NCADD through service projects and networking. For more information: publichealth.gsu.edu/students/association-for-chronic-disease-awareness

8000.70 Study Abroad
SPH Study Abroad Website: http://publichealth.gsu.edu/academic/study-abroad/

Contact: SPHstudyabroad@gsu.edu

Study abroad is one of the ways the School provides a learning environment that prepares students with broad skills regarding diversity and cultural competence. Opportunities to earn graduate degree and certificate applicable credits abroad are available in most years, and opportunities increase as student interest increases. Previously planned study abroad opportunity cities include: Salvador, Brazil; Kampala, Uganda; Santo Domingo, Dominican Republic; and Shanghai, China. Students should check the above-linked study abroad website for future opportunities.

8010 Graduate Admissions

The School of Public Health accepts students into the Master of Public Health (MPH) and Graduate Certificate in Public Health (GCPH) programs for both the fall and spring semesters. The Ph.D. in Public Health only accepts students in the Fall semester. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>November 15</td>

<td>February 15 (Priority)</td>
<td>October 1</td>
<td>N/A</td>
</tr>
<tr>
<td>March 15 (Final)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Graduate Certificate March 15 October 1 N/A

8010.10 Master of Public Health (MPH) Application Requirements

For complete application materials instructions, visit the following School of Public Health website: http://publichealth.gsu.edu/academic/apply/.

The following materials are required for admission to the MPH. All application materials are submitted through SOPHAS (https://portal.sophas.org):

1. Application for Graduate Study, submitted through SOPHAS
2. A $120.00 application fee.
3. A resume or curriculum vitae
4. One official transcript from each college and/or university attended (including Georgia State University). Transcripts are required regardless of length of stay or if the grades are listed on another school’s transcript. Applicants must have a bachelor’s degree or its equivalent at the time of enrollment from a regionally accredited institution.
5. Three references from individuals knowledgeable of the applicant’s academic, professional and intellectual abilities.
6. A statement of interest and professional intent.
7. Official scores on the Graduate Record Examination (GRE), the Graduate Management Admission Test (GMAT), or the Medical College Admissions Test (MCAT). Please note that GRE, GMAT, and MCAT scores over five years old cannot be accepted. (Applicants with an earned doctorate or J.D. from a regionally accredited institution may not be required to take the GRE, GMAT, or MCAT examination. Those applicants should check with the School well before the admission
deadline to see if this examination requirement may be waived. The School reserves the right to
require the GRE, GMAT, or MCAT examination for applicants with an earned doctorate or J.D.)
8. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International
English Language Testing System (IELTS), for applicants whose native language is not English.
Applicants living in the Atlanta area may take the Georgia State Test of English Proficiency (GSTEP)
in place of the TOEFL or IELTS. Please note that the TOEFL, IELTS, and GSTEP scores over
two years old cannot be accepted. The TOEFL, IELTS, and GSTEP examination may not be
required for international applicants who have a received a degree from a regionally accredited U.S.
institution. See section 8010.40 for more information.

- TOEFL: http://www.toefl.org/
- IELTS: http://www.ielts.org/
- GSTEP: http://alsl.gsu.eu/programs/gstep/

9. A Certificate of Immunization (after acceptance)

10. Lawful Presence Verification (after acceptance): http://publichealth.gsu.edu/academic/apply/citizenship-
verification/

8010.20 Graduate Certificate in Public Health (GCPH) Application Requirements

For complete GCPH application materials instructions, visit the following School of Public Health
website: http://publichealth.gsu.edu/academic/apply/

The following materials are required for admission to the GCPH. All application materials are submitted
through Apply Yourself:

1. Application for Graduate Study, submitted through Apply Yourself
2. A $50.00 application fee.
3. A resume or curriculum vitae
4. One official transcript from each college and/or university attended, except from Georgia State
  University. Transcripts are required regardless of length of stay or if the grades are listed on another
  school’s transcript. You will collect and submit all unopened transcripts. If you are enrolled in
  another graduate program at Georgia State University, you may complete a Request for Transfer of
  Records in your current college’s graduate admissions office. If you attended Georgia State
  University as an undergraduate, we will be able to pull your records, so your undergraduate
  transcripts from Georgia State University do not need to be sent.
5. Three references from individuals knowledgeable of the applicant’s academic, professional and
  intellectual abilities.
6. A statement of interest and professional intent.
7. Official scores on the Graduate Record Examination (GRE), the Graduate Management Admission
  Test (GMAT), or the Medical College Admissions Test (MCAT). Please note that GRE, GMAT,
  and MCAT scores over five years old cannot be accepted. (Applicants with an earned doctorate or
  J.D. from a regionally accredited institution may not be required to take the GRE, GMAT, or
  MCAT examination. Those applicants should check with the School well before the admission
  deadline to see if this examination requirement may be waived. The School reserves the right to
require the GRE, GMAT, or MCAT examination for applicants with an earned doctoral or J.D..

8. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International English Language Testing System (IELTS), for applicants whose native language is not English. Applicants living in the Atlanta area may take the Georgia State Test of English Proficiency (GSTEP) in the place of the TOEFL or IELTS. Please note that TOEFL, IELTS, and GSTEP scores over two years old cannot be accepted. The TOEFL, IELTS, and GSTEP examination may not be required of international applicants who have received a degree from a regionally accredited U.S. institution. See section 8010.40 for more information.
   • TOEFL: http://www.toefl.org/
   • IELTS: http://www.ielts.org/
   • GSTEP: http://alsl.gsu.edu/programs/gstep/

10. Lawful Presence Verification (after acceptance):
    http://publichealth.gsu.edu/academic/apply/citizenship-verification/

A Graduate Certificate in Public Health (GCPH) student may apply a maximum of sixteen (16) semester hours of applicable Georgia State University course credit earned while completing the GCPH and prior to MPH program admission toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C or better. Credits are processed by the School—petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the Graduate Advisor in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Division Director of the student’s home division and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

8010.30 Doctor of Philosophy (Ph.D.) in Public Health Application Requirements

For complete Ph.D. application materials instructions, visit the following School of Public Health website: http://publichealth.gsu.edu/academic/apply/

The following materials are required for admission to the Ph.D. All application materials are submitted through SOPHAS (https://portal.sophas.org):

1. Application for Graduate Study, submitted through SOPHAS
2. A $120.00 application fee.
3. A resume or curriculum vitae
4. One official transcript from each college and/or university attended (including Georgia State University). Transcripts are required regardless of length of stay or if the grades are listed on another school’s transcript. Applicants must have a master’s degree or its equivalent at the time of enrollment from a regionally accredited institution.
5. Three references from individuals knowledgeable of the applicant’s academic, professional and intellectual abilities.
6. A statement of interest and professional intent.
7. Official scores on the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT). (Applicants with an earned doctorate or J.D. from a regionally accredited
institution may not be required to take the GRE or GMAT examination. Those applicants should check with the School well before the admission deadline to see if this examination requirement may be waived. The School reserves the right to require the GRE or GMAT examination for applicants with an earned doctoral or J.D..) Please note that the Medical College Admission Test (MCAT) cannot be accepted in lieu of GRE or GMAT scores for Ph.D. applicants.

8. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International English Language Testing System (IELTS), for applicants whose native language is not English. Applicants living in the Atlanta area may take the Georgia State Test of English Proficiency (GSTEP) in the place of the TOEFL or IELTS. Please note that TOEFL, IELTS, and GSTEP scores over two years old cannot be accepted. The TOEFL, IELTS, and GSTEP examination may not be required of international applicants who have received a degree from a regionally accredited U.S. institution. See section 8010.40 for more information.

• TOEFL: http://www.toefl.org/
• IELTS: http://www.ielts.org/
• GSTEP: http://alsl.gsu.edu/programs/gstep/

9. A Certificate of Immunization (after acceptance)

10. Lawful Presence Verification (after acceptance):
    http://publichealth.gsu.edu/academic/apply/citizenship-verification/

8010.40 International Student Admission

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The University subscribes to the principles of international education and to the basic concept that only through education and understanding can mutual respect, appreciation and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus because we believe in a cultural exchange program which will be beneficial to our own student body, to the international students involved, and to metropolitan Atlanta.

- **Academic Credentials:** An applicant who has completed all or part of his/her education outside the United States is required to have his/her foreign credentials evaluated by World Education Services (http://www.wes.org/sophas/). WES is the only evaluation service accepted by SOPHAS.

- **English Proficiency:** Applicants whose native language is not English must submit scores, not more than two years old, on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Official scores must be reported from the Educational Testing Service to SOPHAS prior to the application deadline. The TOEFL is not required of international applicants who have received a degree from a regionally accredited U.S. institution. TOEFL information can be found at http://www.toefl.org/. IELTS information can be found at http://www.ielts.org/. Applicants living in the Atlanta area may take the Georgia State Test of English Proficiency (GSTEP) in the place of the TOEFL. For more information about GSTEP: http://www2.gsu.edu/~wwwtep/index.html.

- **Financial Resources:** Applicants who have been accepted and plan to attend Georgia State University on an F-1 or J-1 visa must submit a Financial Statement showing the financial support necessary for the cost associated with the first year of study. This verification does not need to be submitted with your application but will be required before you can enroll if you are accepted.
*Course Load:* An international student with a student visa is required to carry a full course of study in the fall and spring semesters. A full course of study for graduate students at Georgia State University is 9 semester hours in the fall and spring semesters and 6 semester hours in the summer semester. International students cannot be admitted as non-degree students.

For additional information pertaining to international applicants and students at Georgia State University, please refer to the Office of International Student and Scholar Services on the Georgia State University website at www.gsu.edu/isss.

8010.50 Transient Student Admission

A student enrolled in a graduate degree program at another accredited institution may seek admission as a transient (or visiting) student in the School of Public Health.

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transient/Visiting</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

To be admitted to transient status, applicants must complete:

1. Transient/Visiting Application (available at http://publichealth.gsu.edu/academic/apply/reentry-or-transient-visiting-students/):
2. $50.00 Application Fee. A check or money order (in U.S. currency) should be made payable to Georgia State University. This fee is nonrefundable.
3. Transient Letter. This letter, from your home institution, must state that you are in good academic standing and that you have permission to attend Georgia State University. It should also contain a listing of the courses you plan to take.
4. Resident Status Form. This form is required to determine if you are an in-state or out-of-state student for tuition purposes. Please attach it to your application.
5. A Certificate of Immunization (after acceptance)

Completed application materials must be mailed to the address below by the deadline date:

School of Public Health
Georgia State University
Office of Academic Assistance and Career Services
P.O. Box 3984

Atlanta, GA 30302-3984

Admission to transient status is normally for one semester only. A transient student who wishes to enroll for a subsequent semester at Georgia State must file an Application for Reentry with the Office of Academic Assistance and Graduate Career Services in the School of Public Health. Students must be in good Academic Standing at Georgia State University in order to continue as transient students at the
Transient students who are not in good academic standing will not be allowed to continue taking courses as transient students per the University’s reentry definition. If the student wishes to enroll in courses other than those listed in the original letter of good standing, the home institution must submit a new letter indicating approval of those courses. Application deadlines are sometimes extended provided there is space available. Contact OAA at (404) 413-1452 or publichealthadvising@gsu.edu for additional information.

Although the university cannot guarantee the availability of space in desired courses, every effort will be made to assist students in the registration process. The student is responsible for requesting that transcripts of grades earned at Georgia State are sent to the home institution. Transient students who do not remain in good academic standing at Georgia State University may not be allowed to continue taking courses in the School of Public Health.

Students who wish to change from transient-status enrollment to graduate degree seeking status must file an application for the graduate program desired and provide all supporting documents by the appropriate deadline for the semester for which admission is sought. Further information on application procedures for admission to degree programs in the School of Public Health may be obtained from the Office of Academic Assistance: http://publichealth.gsu.edu/academic/apply/.

Up to nine (9) transient-status credit hours may apply to School of Public Health graduate degree or certificate programs. However, all credits, including transient-status earned credits, presented for the Master’s degree must have been earned within six calendar years of the date of Master’s degree conferral, and all credits presented for the Ph.D. degree must have been earned within nine calendar years of the date of Ph.D. degree conferral. Grades from all attempts at all Georgia State University courses that are taken at the graduate level will become part of the student’s GPA.

8010.60 Non-Degree Student Admission

The School of Public Health accepts non-degree students based on course availability. Non-degree students are admitted for a maximum of nine credit hours.

Applicants applying for non-degree status should hold a graduate degree or have been accepted into a graduate program but are no longer actively enrolled. Non-degree applicants can and usually do include members of the workforce who wish to further develop or upgrade their public health knowledge and skills.

If you are actively enrolled in another graduate program, please apply as a transient/visiting student. Contact the Office of Academic Assistance and Career Services (OAA) at (404) 413-1452 or publichealthadvising@gsu.edu for approval to submit a non-degree application. Application deadlines are sometimes extended provided there is space available. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-degree</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

The following items should be submitted to the Office of Academic Assistance and Graduate Career Services.
Non-degree Application

- $50.00 Application Fee. A check or money order (in U.S. currency) should be made payable to “Georgia State University”. This fee is nonrefundable.
- One official transcript from each college and/or university attended (including Georgia State University). Transcripts are required from all previously attended institutions regardless of length of stay or if the grades are listed on another school’s transcript.
- Statement of Intent, where you describe your goals and why completing coursework in the School of Public Health will help you attain those goals. Please limit your statement to two typed, double-spaced pages.
- Resident Status Form. This form is required to determine if you are an in-state or out-of-state student for tuition purposes. Please attach it to your application.
- A Certificate of Immunization (after acceptance)
- Lawful Presence Verification (after acceptance):  
  http://publichealth.gsu.edu/academic/apply/citizenship-verification/

Completed application materials must be mailed to the address below by the deadline date:

School of Public Health  
Georgia State University  
Office of Academic Assistance and Career Services  
P.O. Box 3984, Atlanta, GA 30302-3984  

Students who wish to change from non-degree enrollment to graduate degree seeking status must file an application for the graduate program desired and all supporting documents by the appropriate deadline for the semester for which admission is sought. Further information on application procedures for admission to degree programs in the School of Public Health may be obtained from the Office of Academic Assistance:  
http://publichealth.gsu.edu/academic/apply/.

A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to MPH program admission (while taking public health courses as either transient, non-degree, or other-GS University-degree status) toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C or better. Credits are processed by the School—petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the Graduate Advisor in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Division Director of the student’s home division and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

8010.70 Reentry Students

A reentry student is a student who has been enrolled at Georgia State University and who:

1. Has not maintained an enrollment totaling 6 hours (or more) of degree applicable courses over three consecutive semesters (including summer) until degree completion; or
2. Attended any semester as a transient student and wishes to attend an additional semester as a transient student.

Reentry is approved by application and is not guaranteed. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reentry</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

Graduate students previously enrolled in the School of Public Health may only reenter the same graduate program or status in which they were last enrolled and they may be required to satisfy the degree requirements of the graduate catalog in effect at the time of reentry—the Office of Academic Assistance and Career Services will notify the student of their requirements and update their program of study. Students will be required to change to the graduate catalog in effect at the time of reentry when they reenter the university after a period of two or more consecutive years in which they have earned no academic credit at Georgia State University. Students must be approved for reentry through the School—reentry is not guaranteed, even for students previously enrolled in School of Public Health graduate programs.

To apply as a reentry student, the following items should be submitted to the Office of Academic Assistance:

- Graduate Reentry Application (available here: http://publichealth.gsu.edu/academic/apply/graduate-reentry-application/)
- $25.00 Application Fee. A check or money order (in U.S. currency) should be made payable to Georgia State University. This fee is nonrefundable.
- Resident Status Form – This form is required to determine if you are an in-state or out-of-state student for tuition purposes. Please attach it to your application
- A Certificate of Immunization (after acceptance)
- Lawful Presence Verification (after acceptance): http://publichealth.gsu.edu/academic/apply/citizenship-verification/

Completed application materials must be mailed to the address below by the deadline date:

School of Public Health
Georgia State University
Office of Academic Assistance and Career Services
P.O. Box 3984, Atlanta, GA 30302-3984

8010.80 Tuition Deposit

The School of Public Health requires newly accepted applicants into their degree or certificate programs to submit a portion of their first semester’s tuition at the time of acceptance. The advanced tuition, which is nonrefundable, guarantees the student’s place in the class.

8020 Graduate Enrollment
Graduate degree and certificate students in the School of Public Health are responsible for knowledge of all regulations and procedures of the program and the university. Enrollment in a program constitutes a student’s acknowledgment that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to read carefully regulations related to the public health program.

**Summary of Georgia State University Policy on Responsible Conduct Research Training:**

Georgia State University is committed to promoting research ethics within the University community and modeling integrity across all disciplines and areas of empirical research. As research has become more complex, collaborative, and costly, issues of research ethics similarly have become complex, extensive and important. The federally mandated training of all levels of research students at Georgia State University in the Responsible Conduct of Research (RCR) must prepare them to face these issues in their professional lives. The Scholarship and Research Integrity (SARI) program at Georgia State University, developed in response to the America Competes Act requirements, is designed to offer students enrolled in undergraduate research, research graduate degree programs, and post-doctoral research programs comprehensive training in the RCR in a manner that is tailored to address the issues faced by students in their respective programs. As part of the commitment and policy, graduate research students and post-doctoral research fellows will be required to complete an online RCR training program provided by the Collaborative Institutional Training Initiative (CITI) and will also be required to engage in at least 5 hours of additional discussion-based RCR education.

http://ursa.research.gsu.edu/ursa/responsible-conduct-in-research/

The Georgia State University SPH has devised a RCR education program plan to be in compliance with Georgia State University's RCR policy and to ensure SPH students graduating from our MPH and Ph.D. programs complete the required CITI RCR training program and receive the additional 5 hours of RCR education. In the MPH program, all students enrolled in PH 7019 Public Health Research Methods (an MPH required course) will be required to complete the CITI RCR training and will receive 5 additional hours as part of in-class discussions during the PH 7019 course. In the Ph.D. program, all students enrolled in PH 9140 Advanced Research Methods (a Ph.D. required course) will be required to complete the CITI RCR training and will receive 5 additional hours as part of in-class discussions during the PH 9140 course. Doctoral level students enrolled in PH 9150 Public Health Ethics will also receive additional 1-5 hours of in-class discussion.

**8020.10 Time Limit for Completion of Degree/Graduate Certificates**

Before deciding to enroll in a graduate program of this school, students must examine seriously and realistically their abilities to adjust their personal and professional schedules to accommodate the challenge of graduate study. The maximum time limits set by the faculty for completing a graduate degree program are: six years from the first semester of admission for the master’s programs; three years from the first semester of admission for the certificate programs and nine years from the first semester of admission for the doctoral programs. Students or applicants with questions about the commitment needed to complete the graduate programs should schedule an appointment with the school’s Office of Academic Assistance and Career Services.
8020.20 Catalog Editions

 Normally, students will be permitted to graduate under the provisions of the graduate catalog in effect at the time of first enrollment. Students may choose to graduate under the provisions of a subsequent graduate catalog; that is, they may choose to change their “catalog edition.” Students who choose to do this must meet all provisions of the subsequent graduate catalog.

 Students are required to change to the current catalog edition when they change programs/statuses or after certain absences from the program, as explained below in section 8020.30. The School reserves the right to require students who wish to change their program of study concentration to update to the most recent catalog edition of their newly selected concentration.

8020.30 Continuous Enrollment Requirement and Requests to Reenter

 Students in all graduate degree and graduate certificate programs must maintain an enrollment totaling six (6) hours or more of degree applicable courses over any consecutive three (3) semester period (including summers) until degree completion. In other words, the total enrollment of the current term plus the two terms preceding it must add to six (6) hours or more at all times. The status of all students will be checked by the midpoint of each term for compliance with the Continuous Enrollment Requirement. Any student whose enrollment is out of compliance will receive a continuous enrollment registration hold preventing all current and future registration. Those students will be notified by an e-mail message sent to their official Georgia State University e-mail account. To resume their programs of study, students with continuous enrollment registration holds must apply for reentry admission by the published deadline (see section 8010.70), must be granted reentry admission, and must enroll at a credit hour level sufficient to satisfy the continuous enrollment requirement. For more information on the reentry process, see section 8010.70 or contact the Office of Academic Assistance and Career Services (OAA).

 Students who do not attend the semester for which reentry was originally required must complete a new reentry form for subsequent semesters.

 All students who wish to reenter one of the graduate level programs or non-degree status after an absence of one year must meet the degree requirements and academic regulations of the graduate catalog current upon return, along with other reentry provisions that may be in effect.

 All students who are approved for reentry will be eligible to retain all Georgia State course credit (and already approved transfer credit, if any) earned previously if their program can be completed within the time limit that was applicable to their program before the absence. The cumulative graduate GPA calculations will include all attempts in all courses at Georgia State University. Time limits would apply.

 Students who plan not to register for a particular semester but who intend to continue the program at some later semester should discuss such plans with the SPH Graduate Advisor in order to facilitate reentry at a subsequent time. Failure to comply with this request may complicate reentry in the semester preferred. An absence from the program, whether planned or unplanned, does not exempt students from the requirement to complete the program within the appropriate time limit.

8020.35 Enrollment in Approved Courses
Students must enroll for courses that are part of the approved curriculum for the program to which they have been accepted. Students who do otherwise are subject to loss of credit and/or loss of eligibility to continue to register. Failure to register for degree applicable courses over the course of three consecutive semesters will result in unsatisfactory progress and the rules of Continuous Enrollment Requirement will apply.

8020.40 Course Load

The course load of a master’s student may vary with the circumstances of the individual student each semester. A graduate student may enroll in 1 to 12 credit hours. Enrolling in more than 12 credit hours is not recommended and students should seek advisement with the Office of Academic Assistance and Career Services prior to registration unless employed as a Graduate Assistant (GA) with the university. A full-time course of study for graduate students at Georgia State University is nine (9) credit hours in fall and spring semesters, and six (6) credit hours in summer semesters.

In determining each semester’s course load, a student must balance other time constraints (work, family, civic, and other responsibilities) with the need to make reasonable and timely progress toward completion of the program.

8020.50 Grade Point Average and Course Grade Requirements

For Master’s level students, an overall institutional grade point average (GPA) of 3.0 or better must be earned to receive the MPH degree. All core courses in the MPH degree must be completed with a grade of B or better, and any student earning a grade of B- or below must repeat the core course. No more than six semester hours of grades less than B will be accepted for the degree in all other MPH program of study courses. No grade below a C will be accepted toward the degree. The records of students who fall below the 3.00 GPA requirement for all course attempts will be reviewed for continuation in the MPH program, and students may receive a scholastic warning or be scholastically dismissed from the MPH program.

For Graduate Certificate in Public Health (GCPH) students, an overall institutional grade point average (GPA) of 3.0 or better must be earned to receive the Graduate Certificate. The three core courses in the GCPH must be completed with a grade of B or better any student earning a grade of B- or below must repeat the core course. No grade below a C will be accepted in the two Graduate Certificate program elective courses. The records of students who fall below the 3.00 GPA requirement for all course attempts will be reviewed for continuation in the GCPH program, and students may receive a scholastic warning or be scholastically dismissed from the GCPH program.

Transient students must maintain an overall institutional grade point average (GPA) of 3.0 or better in order to continue enrolling as a transient student. Transient students who do not maintain a 3.0 GPA or better may receive a scholastic warning or be scholastically dismissed.

Any doctoral student completing the prerequisite MPH core courses must earn a grade of B or better in those MPH core courses; any doctoral student earning a grade of B- or below must repeat the prerequisite MPH core course. Doctoral students should refer to section 8060.40 Grade Point Average and Course Grade Requirements for Doctoral Students for more information regarding doctoral program grade point average requirements.
8020.60 Final Course Grades

The following course grades will be given as final grade options in courses taught by public health faculty members. Any deviations—including the availability of plus/minus grading—will be at the discretion of the individual faculty member and specifically stated in his or her syllabus.

- A 90-100
- B 80-89
- C 70-79
- D 60-69
- F below 60

8020.70 Transfer of Credit

**Transfer Credits from another institution:** A student may apply a maximum of nine (9) semester hours of approved course credit transferred from other graduate programs or institution(s) toward fulfilling MPH degree requirements. In order to transfer, the course grade must be a grade of B or better. Transfer credits are processed by the School and must be approved by petition. Students requesting to petition for transfer of credits must work with the Graduate Advisor in the Office of Academic Assistance. Approval is at the discretion of the Division Director of the student’s home division and concentration. All credits, including transfer credits, presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

A student may apply a maximum of three (3) semester hours of approved course credit transferred from other graduate programs or institution(s) toward fulfilling Graduate Certificate in Public Health (GCPH) requirements. Transfer credits are processed and approved by the Office of Academic Assistance.

**Credits earned at Georgia State University in either transient, non-degree, or other-Georgia State University-degree status:** A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to MPH program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree status) toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C or better. Credits are processed by the School—petition is not required, but students should confirm their previously completed courses are applicable. Students may work with the Graduate Advisor in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Division Director of the student’s home division and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

**Credits earned at Georgia State University in GCPH enrollment status:** A Graduate Certificate in Public Health (GCPH) student may apply a maximum of sixteen (16) semester hours of applicable Georgia State University course credit earned while completing the GCPH and prior to MPH program admission toward fulfilling MPH degree requirements. Courses that satisfy the MPH core courses must be completed with a grade of B or better, and courses that satisfy a concentration required or elective course must be completed with a grade of C or better. Credits are processed by the School—petition is not required, but
students should confirm their previously completed courses are applicable. Students may work with the Graduate Advisor in the Office of Academic Assistance to confirm applicability. Approval of applicable courses is at the discretion of the Division Director of the student’s home division and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

**Credits earned from another institution while currently enrolled:** Students who have been accepted into a School of Public Health program and who wish to take courses at another institution for credit must first obtain written approval via the graduate petition process. The first step in this approval process is to meet with the SPH Graduate Advisor in the Office of Academic Assistance and Career Services. All credits, including transfer credits, presented for the Master’s degree must have been earned within six calendar years of the date of degree conferral, all credits presented for the graduate certificate must have been earned within three calendar years of graduate certificate completion, and all credits presented for the Ph.D. must have been earned within nine calendar years of the date of degree conferral. Courses transferred-in for the doctoral degree may not be used in fulfilling the Doctoral Public Health Core Courses requirements or the doctoral residency requirement.

**JD/MPH Dual Degree Credits earned at Georgia State University just prior to joint degree (JD/MPH) status:** A student may apply MPH-applicable Georgia State University College of Law course credit (earned for the JD degree) toward fulfilling MPH degree requirements if the JD/MPH dual degree student is admitted and enrolled into both degree programs prior to completion of 30 credit hours of MPH coursework and 60 hours of JD coursework. JD credits applied to the MPH degree are processed by the SPH—petition is not required, but students should confirm (in advance) with the SPH Graduate Advisor that their planned JD courses are applicable to the MPH, and are correctly populating in their PAWS electronic MPH program of study. Approval of applicable courses is at the discretion of the SPH OAA and the Division Director of the student’s home MPH division and concentration—it is not guaranteed. All Georgia State University credits presented for the MPH degree must have been earned within six calendar years of the date of degree conferral.

**8020.75 Out-of-Residence Credit and Graduation**

Students who wish to take graduate courses at another institution to complete the coursework for their Georgia State University degree should provide the information listed above (except the transcript) to the Office of Academic Assistance and Career Services before enrolling at the other institution. Advance approval will ensure that the transfer credit can be granted if a grade of “B” or higher is earned in the course(s) and the coursework is completed within the time limit allowed for the student’s degree program. Such students should plan to graduate at least one semester after the Out-of-Residence quarter/semester in which the last course to be transferred has been taken. This will allow adequate time for the necessary transcript to be received and for the transfer credit to be processed. Please refer to the graduation office website for complete instructions and information concerning applying for graduation and the graduation fee: registrar.gsu.edu/graduation/. A letter certifying completion of degree requirements and stating the date the degree will be conferred can be furnished to the student by the OAA.

**8020.80 Application for Graduation**

All candidates for the MPH and Ph.D. degrees must file a formal application for graduation with the
University’s Graduation Office at least two semesters in advance of the expected semester of graduation. Deadlines are published on the Georgia State website: http://registrar.gsu.edu/graduation/. The Graduation Office will inform the School when the application is filed by the student. The School of Public Health will then conduct an audit and inform the student of any remaining requirements—these items will include any graduation clearance requirements. A degree will be awarded only to a student who meets the university academic, residence, and graduation clearance requirements as well as the standards of performance and academic requirements for the MPH or Ph.D. degree.

All candidates for the GCPH must file a formal application for completion: http://publichealth.gsu.edu/students/program/ with the Office of Academic Assistance and Career Services (OAA) in the School of Public Health during the semester in which the student plans to complete the GCPH. OAA will conduct an audit to confirm completion of the requirements and inform the student of any remaining requirements—these items will include any graduation clearance requirements. A graduate certificate will be awarded only to a student who meets the university academic, residence, and/or graduation clearance requirements as well as the standards of performance and academic requirements for the GCPH.

8020.90 Scholastic Warning and Suspension for MPH, GCPH, and Transient Students

Each student admitted into the MPH or GCPH program in the School of Public Health must maintain a minimum cumulative grade point average of 3.00. A student whose cumulative institutional grade point average falls below 3.00 at the end of a semester will be placed on Scholastic Warning. The student will be notified of this standing by the School of Public Health. If a 3.00 cumulative grade point average is not achieved by the end of the next twelve semester hours or two semesters, whichever is longer, of completed course work approved by the SPH faculty, the student will be suspended from the graduate program. Transient students must maintain a 3.00 cumulative grade point average in order to continue in that status. Transient students who do not maintain a 3.00 cumulative grade point average may be subject to scholastic exclusion.

A student may apply for reinstatement after one semester as a suspended student. Application for reinstatement must be made no later than six weeks prior to the first day of classes for the semester in which reinstatement is sought.

8030 Student Appeals Procedures

The appeals procedure for graduate students in the School of Public Health will follow different paths, depending on the nature of the student’s appeal. The various types of situations and the appropriate appeals avenues are as follows:

8030.10 Admissions Appeals

At the graduate level, a person who wishes to appeal an admission decision first discusses the matter with the Director of the Office of Academic Assistance and Career Services (OAA) within 5 working days of the date of the denial. If the question is not settled there, a written appeal must be submitted to the OAA Director within 10 working days of the date of the denial or the date of the denial discussion with the OAA
Director. (Workdays are counted as Monday through Friday except university staff holidays.) The director will present the appeal to the appropriate Admissions Committee, which will examine the facts presented. The OAA Director, on behalf of the committee, will make a recommendation to the Associate Dean for Academic Affairs. The associate dean will render a written decision to the applicant normally within 10 workdays of the date the applicant’s letter was received by the OAA Director. See Section 1100 of the Graduate Catalog for University level appeals of admission decisions.

8030.20 Petitions for Policy Waivers and Variances, and Appeals, and Student Complaints, Concerns, or Grievances

Petitions for Policy Waivers and Variances, and Appeals Procedure

The petitions for policy waivers and variances, and appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit http://enrollment.gsu.edu/assistance/ or the Student Code of Conduct online: http://codeofconduct.gsu.edu/ for details.

Student Complaints, Concerns, or Grievances

Similarly, the student complaints, concerns, or grievance procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit http://enrollment.gsu.edu/assistance/

8030.30 Appeal of Exclusions, Dismissals and Terminations

Terminated, dismissed or excluded graduate students with questions about their status should first discuss their situation with the Graduate Advisor in the Office of Academic Assistance and Career Services (OAA). Following this discussion, students who believe they have extenuating circumstances may submit a written appeal of their termination or exclusion to the Director of OAA. The director will review the information submitted in support of the appeal and the student’s total record. The director will then make a recommendation to the associate dean for academic affairs, who will make the decision regarding acceptance or denial of the appeal. The student will receive a written response from the school normally within 10 workdays of the date the appeal is received. (Workdays are counted as Monday through Friday except university staff holidays.)

Requests for such consideration must be submitted, in writing, to the director of OAA within 10 workdays (defined as Monday through Friday except university holidays). Students should write their appeals completely, but concisely, and include all facts germane to their case. Documentation should be provided, where possible, to substantiate statements made. Specific dates of the beginning and ending of particular problems should be included. Only circumstances described in the written and signed appeal as initially submitted will be accepted from the student; oral appeals are not permitted, nor are requests to submit additional information after the appeal has been reviewed. Appeals must be dated, signed, and include the student’s home address and telephone numbers (work and home).

Having been enrolled in too many courses relative to job requirements or other responsibilities or having continued to enroll while experiencing personal, work, or health-related problems very rarely constitutes
such extenuating circumstances.

8040 Master Degree Programs

8040.10 Master in Public Health (MPH)

Contacts:

Ike Okosun, Interim Director, Division of Epidemiology and Biostatistics
Stuart Shalat, Interim Director, Division of Environmental Health
Terry Pechacek, Interim Director, Division of Health Management and Policy
Daniel Whitaker, Interim Director, Division of Health Promotion and Behavior

The faculty and staff of the School of Public Health (SPH) are committed to providing a supportive academic environment that promotes the growth and progress of students engaged in graduate studies.

The Master of Public Health (MPH) program includes a minimum of forty-two (42) semester credit hours of study at the master’s level beyond the bachelor’s degree.

MPH Degree Requirements

1. Required MPH Core Courses (16 hours):
   - PH 7011 Epidemiology for Public Health (3) (required for Environmental Health, Health Management and Policy, and Health Promotion and Behavior concentrations) or PH 7711 Epidemiologic Methods I (required for Epidemiology and Biostatistics concentrations).
   
   Note: Students changing their concentration from Epidemiology or Biostatistics to Environmental Health, Health Management and Policy, or Health Promotion and Behavior will be able to substitute PH 7011 with PH 7711 if already completed.
   - PH 7017 Fundamentals of Biostatistics I (4)
   - PH 7140 Social and Behavioral Aspects of Public Health (3)
   - PH 7150 Environmental Health (3)
   - PH 7160 Introduction to the Health Care System (3)

2. Required MPH Research Methods Course (3 hours):
   - PH 7019 Public Health Research Methods (3)

3. Required MPH Concentration Courses (18 credit hours)
   - See “MPH CONCENTRATION REQUIREMENTS” section below

4. Required MPH Practicum Course (2 credit hours)
   - PH 7960 Public Health Practicum (2)
   
   Students will take two (2) credit hours of a required practicum in the students’ specialty field of study, which equals 240 clock hours. The practicum is a planned, supervised and evaluated practice experience where graduate professional public health degree students develop skills in basic public health concepts and demonstrate the application of these concepts through a practice experience that is relevant to students’ areas of specialization, concentration and/or division. These opportunities
can take place in a variety of governmental or non-governmental agencies and organizations and include local, state, national and international public health agencies to the extent possible and appropriate.

5. Required MPH Thesis or Capstone Project Course (3 credit hours)

- PH 7990 Thesis (3)
- PH 7991 Capstone (3)

Following completion of all coursework, students must complete three (3) credit hours for a culminating experience in the form of a master’s thesis or a capstone project. All students in the School of Public Health who are involved in writing or defending a master’s thesis/capstone project shall register for at least three credit hours of thesis/capstone project credit each semester from the time they finish their course work until the time all requirements for the degree are completed.

MPH CONCENTRATION REQUIREMENTS

Each of the distinct MPH concentrations (Biostatistics, Environmental Health, Epidemiology, Health Promotion and Behavior, and Health Management and Policy) have their own program competencies that define what a graduate from that MPH concentration will know and be able to do upon degree program completion. These MPH program competencies are made available in the MPH student handbook, and appear on public health course syllabi. The SPH will only recommend the award of an MPH degree when the student has demonstrated mastery of necessary theories, concepts and content, and demonstrated competence in the skills defined in the competencies for the student’s chosen MPH program concentration.

MPH Biostatistics Concentration

The MPH Biostatistics (BSTP) program concentration trains students to apply statistical principles and methods to problems in public health, medicine, and biology. The MPH BSTP program includes the development of analytic thinking and skill, with an emphasis on applications of research and evaluation in public health. Coursework in this concentration covers the span of biostatistics knowledge, including study design, data management, data analysis, interpretation, statistical reporting, and use of statistical software. MPH BSTP concentration graduates can look forward to excellent career opportunities in academia, government, nonprofits, non-governmental organizations, or private industry. Applicants to the biostatistics concentration should have strong aptitude for quantitative thinking and interest in biomedical and public health applications.

Required MPH BSTP Concentration Courses (12 hours):

- PH 7027 Fundamentals of Biostatistics II (3)
- PH 7525 Statistical Computing (3)
- PH 8820 Generalized Linear Models (3)
- PH 8830 Advanced Statistical Topics (3)

MPH BSTP Concentration Elective Courses (6 hours):

Select at least two (2) pre-approved* courses focusing on advanced statistical techniques and quantitative research methods. Pre-approved BSTP elective courses include:
- PH 7028 Introduction to Probability Theory and Statistical Inference (3)
- PH 8260 Spatial Population Health I (3)
- PH 8721 Epidemiologic Methods II (3)
- PH 8880 Public Health Study Abroad (3) (up to 3 credits of PH 8880 may count here)
- PH 8885 Fundamentals of Clinical Trials (3)
- PH 8890 Special Topics in Biostatistics (3) (may be repeated)

*The above listed pre-approved BSTP elective courses do not need further approval to satisfy the BSTP elective requirement. However, there are other academic departments at the university that may offer satisfying courses including, but not limited to the following departments: Math/Statistics, Decision Sciences, Marketing, Sociology, Policy Studies, Psychology, and Educational Policy Studies Research. Other courses that may be approved to satisfy this elective requirement generally have course titles including, but not limited to: Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics. Students should seek written, pre-approval of any course(s)—beyond the above listed pre-approved BSTP elective courses—to count toward the BSTP elective requirement. Approval must come from both the Division Director and OAA.

**MPH Environmental Health Concentration**

The MPH concentration in Environmental Health (EVHT) will prepare students for research and practice in the field of EVHT, which is the understanding of environmental factors, including biological, physical and chemical factors that affect the health of a community. EVHT focuses on the human health effects of agents encountered in the environment, from the molecular to the ecological level, as well as the effects of natural and human-created environments on health. The concentration will provide students with knowledge in the core EVHT disciplines of exposure assessment, toxicology, risk assessment, air pollution, and water pollution. In addition to these core knowledge areas, additional areas of specialization within EVHT include food safety, occupational health, infectious diseases, environmental epidemiology, and urban health.

**Required MPH EVHT Concentration Courses (9 hours):**

- PH 7293 Environmental Health Toxicology (3)
- PH 7294 Exposure Assessment (3)
- PH 7345 Introduction to Risk Assessment (3)

**MPH EVHT Concentration Elective Courses (9 hours):**

Select at least 3 courses from the following list of EVHT approved elective courses:

- PH 7025 Health Disparities (3)
- PH 7155 Air Quality and the Environment (3)
- PH 7280 Infectious Disease Epidemiology (3)
- PH 7297 Global Water, Sanitation and Hygiene (3)
- PH 7299 Sampling of the Environment (3)
- PH 7300 Urban Health (3)
- PH 7325 Urban Health Seminar (1)
- PH 7340 Built Environment and Health (3)
PH 7525 Statistical Computing (3)
PH 7540 Introduction to Public Health Laboratories (3)
PH 7600 Global Health (3)
PH 8350 Biological Basis for Disease (3)
PH 8880 Public Health Study Abroad (3) (up to 3 credits of PH 8880 may count here)
GEOS 6532 Introduction to Geographic Information Systems (4)
GEOS 6538 Urban Health Geographic Information Systems (4)
GEOS 6644 Environmental Conservation (4)
GEOS 6784 Climatic Change (3)
BIOL 6428 Medical Microbiology (4)
BIOL 6451 Aquatic Pollution and Toxicology (4)
BIOL 6480 Principles of Toxicology (4)
BIOL 6484 Laboratory Techniques in Applied and Environmental Microbiology (4)
NUTR 6170 Food Safety (3)

MPH Epidemiology Concentration

Epidemiology (EPID) is a scientific discipline commonly defined as the study of the distribution and determinants of disease and injury in human populations. This broad scope includes understanding the distribution, patterns and causes of adverse health outcomes as well as those associated with their control and prevention, and the complex interaction of factors that play a role in these processes. MPH with a concentration in Epidemiology will afford students choice in the in-depth study of substantive issues such as cancer, cardiovascular diseases, STDs and HIV. Students will also have the opportunity to focus on prevention methods. The knowledge and skills obtained in epidemiology will allow MPH EPID graduates to seek employment in areas that: (1) characterize community health status, (2) critically assess determinants of health-related events, (3) formulate strategies to evaluate the impact of health related interventions and (4) foster the application of epidemiologic methods for health promotion and disease prevention activities.

Required MPH EPID Concentration Courses (9 hours):

- PH 8721 Epidemiologic Methods II (3)
- PH 7027 Fundamentals of Biostatistics II (3)
- PH 7525 Statistical Computing (3)

MPH EPID Concentration Elective Courses (9 hours):
Select at least 3 courses from the following list of elective EPID approved courses:

- PH 7014 Epidemiology of STDs and HIV (3)
- PH 7265 Epidemiology and the Prevention of Violence (3)
- PH 7275 Chronic Disease Epidemiology (3)
- PH 7280 Infectious Disease Epidemiology (3)
- PH 7290 Case Studies in Epidemiology (3)
- PH 7355 Prevention Methods (3)
- PH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)
- PH 8260 Spatial Population Health I (3)
- PH 8261 Spatial Population Health II (3)
MPH Health Management and Policy Concentration

The MPH health management and policy (HMGP) concentration is concerned with the administration and management of public, not-for-profit, and community-based health care organizations, formulating and implementing health care policy, analyzing the distribution of and access to health care services, financing and reimbursement of health care services, and evaluating quality and outcomes of health care services and programs. The Health Management and Policy concentration draws upon a variety of disciplines, including health administration, health policy, public administration, business, public health law, health ethics, and economics.

Required MPH HMGP Concentration Courses (9 hours):

- PH 7130 Leadership and Public Health (3)
- PH 7170 Public Health Policy (3)
- PH 8250 Health Economics and Policy (3)

MPH HMGP Concentration Elective Courses (9 hours):

Select at least two (2) courses from the following HMGP list A of approved elective courses (6 hours):

- PH 7012 Health Program Planning, Implementation and Evaluation (3)
- PH 7300 Urban Health (3)
- PH 7340 Built Environment and Health (3)
- PH 7521 Evaluation Research (3)
- PH 7535 Dissemination and Implementation Science (3)
- PH 7600 Global Health (3)

Select at least one (1) course from the following HMGP list B of approved elective courses (3 hours):

- PH 7325 Urban Health Seminar (1)
- PH 7522 Qualitative Research (3)
- PH 7525 Statistical Computing (3)
- PH 7555 Disability and Public Health (3)
- PH 7565 Disability Policy (3)
- PH 7570 Childhood Obesity Prevention (3)
- PH 8290 Population Health Informatics (3)
- PH 8880 Public Health Study Abroad (3) (up to 3 credits of PH 8880 may count here)
- HA 8190 Health Policy and Ethics (3)
- HA 8700 Health Services Research and Evaluation Methods (3)
- LAW 7244 Public Health Law (2-3)
- PMAP 8010 Social Policy (3)
- PMAP 8431 Leadership and Organizational Behavior (3)
- PMAP 8531 Policy Analysis (3)
The concentration in Health Promotion and Behavior (HPMB) will provide MPH students with the skills, knowledge, and experiences to promote health and prevent diseases within populations and communities. This concentration will also provide students with a strong foundation for developing expertise in health promotion by specifically emphasizing public health, ecological, and behavioral contexts throughout the curriculum. Courses are designed to integrate theory, practice, and research.

Required MPH HPMB Concentration Courses (9 hours):

- PH 7016 Introduction to Health Promotion (3)
- PH 7022 Health Behavior Theory for Public Health Research (3)
- PH 7521 Evaluation Research (3)

MPH HPMB Concentration Elective Courses (9 hours):
Select at least 3 courses from the following list of HPMB approved elective courses:

- PH 7014 Epidemiology of STDs and HIV (3)
- PH 7020 Principles of Tobacco Control (3)
- PH 7025 Health Disparities (3)
- PH 7027 Fundamentals of Biostatistics II (3)
- PH 7170 Public Health Policy (3)
- PH 7265 Epidemiology and the Prevention of Violence (3)
- PH 7275 Chronic Disease Epidemiology (3)
- PH 7300 Urban Health (3)
- PH 7340 Built Environment and Health (3)
- PH 7365 Epidemiology of Adolescent and Young Adult Health Risk Behaviors (3)
- PH 7522 Qualitative Research (3)
- PH 7525 Statistical Computing (3)
- PH 7535 Dissemination and Implementation Science (3)
- PH 7555 Disabilities and Public Health (3)
- PH 7565 Disability Policy (3)
- PH 7570 Childhood Obesity Prevention (3)
- PH 7600 Global Health (3)
- PH 8260 Spatial Population Health I (3)
- PH 8261 Spatial Population Health II (3)
- PH 8285 Social Determinants of Public Health (3)
- PH8880 Public Health Study Abroad (3) (up to 3 credits of PH 8880 may count here)

8040.15 MPH Degree Progression

Critical milestones are assessed based on credit hours and semesters completed within the MPH degree program.
Milestone #1: Students are expected to have their thesis/capstone (culminating experience) proposal accepted by their thesis/capstone chair and committee by no later than the completion of 36 credit hours in the MPH program. The approved thesis proposal form must be submitted to the Office of Academic Assistance and Career Services within the same 36 credit hours. Waivers to this credit rule are by petition only and may be adjusted for approved leaves of absence, medical leave or disability as detailed elsewhere in school or university policies. Failure to submit an approved thesis/capstone proposal by the conclusion of 36 credit hours will place the student on scholastic probation.

Milestone #2: Once a student initially enrolls in their thesis/capstone course, students are expected to successfully defend and publish (upload to Georgia State University) their thesis/capstone within two academic semesters (including summer). Failure to complete the thesis/capstone within two academic semesters will place the student on scholastic probation. Failure to complete the thesis/capstone by the end of the 3rd semester will result in a scholastic exclusion from the MPH program.

Milestone #3: The maximum time limit set by the faculty for completing the MPH graduate degree program is six (6) years from the first semester of admission to the MPH. After six years, courses will begin to expire in order of first completed, and may require re-enrollment or replacement with advanced coursework to satisfy degree requirements.

If a student’s progress indicates scholastic probation, the student will receive a notice of this from the Director of the Office of Academic Assistance and Career Services (OAA), and the notice will be sent by e-mail message to their official Georgia State University e-mail account. Within fifteen (15) working days of receipt of this notice, the student should submit a memo to the Director of OAA (from the student’s Georgia State University e-mail account) documenting how he or she intends to achieve the relevant milestone before reaching the criterion for initiating a dismissal action. If a student’s progress indicates initiation of a scholastic exclusion action or if a student fails to submit a memo, the student will receive a scholastic exclusion action notice from the Director of OAA.

Students may appeal the pending exclusion action by petitioning the Dean of the School of Public Health but they must do so before the end of the semester in which their progress first indicated initiation of an exclusion action. If they appeal, students are required to submit as part of their appeal an individualized plan, approved by their thesis/capstone chair, detailing dates by which they intend to meet any milestones yet unachieved.

At any time the student believes they may have difficulty meeting the critical milestones, they should immediately consult with their Graduate Advisor in the Office of Academic Assistance and Career Services.

8040.20 Master of Public Health /Juris Doctor Dual Degree

The College of Law and the School of Public Health offer a Juris Doctor (JD)/ Master of Public Health (MPH) in the Health Management and Policy (HMGP) concentration dual degree program. This dual program provides an opportunity to pursue studies in law and public health concurrently. The JD/MPH-HMGP enables students to earn both degrees in a shorter time than would be possible if students pursued each degree separately. Dual degree programs include separate, but affiliated degree programs that are linked through shared curricular offerings and collaborative administrative processes.
Credit hours earned in one degree program satisfy some requirements of the other degree program. No credit hours for the MPH courses will be applied toward the JD requirements until a student has completed the MPH; similarly, no credit hours for the JD courses will be applied toward the MPH requirements until completion of the JD. In other words, a student cannot graduate from the JD and MPH in the same semester—a student must graduate from either program in a given semester, and then the second program in a subsequent semester. Students interested in pursuing a JD/MPH must be admitted into and enroll in both degree programs prior to completion of 30 credit hours of MPH coursework and 60 hours of JD coursework in order to qualify for the dual degree program. When admitted to the JD/MPH program, students must complete the first 30 hours of required courses in the JD program as soon as possible (immediately upon JD admission). After completion of these 30 hours of law courses, course enrollment in either college or both colleges concurrently is permitted and may resume. Students must complete the dual degree program within six years of the initial semester of enrollment. Students should be able to complete both degrees in four years.

**JD/MPH Dual Degree Admissions**

To participate in the JD/MPH dual degree program, students must apply separately for admission to the College of Law and the School of Public Health. Students are strongly encouraged to apply to both programs simultaneously. However, there is some opportunity to apply and enroll in the dual degree program after admission to only one of the schools, if a student has not proceeded too far in that school’s program. Students interested in pursuing a JD/MPH must be admitted into and enroll in both degree programs prior to completion of 30 credit hours of MPH coursework and 60 hours of JD coursework in order to qualify for the dual degree program.

Students must take the LSAT to apply to the College of Law. The School of Public Health will accept the LSAT in lieu of the GRE if a student is admitted into the College of Law first. If a student applies concurrently to the College of Law and School of Public Health, or if a student is admitted to the College of Law after they are admitted to the School of Public Health, that student will need to provide a GRE score as well. Admission into one program does not presume admission into the other. Students who gain admission into both programs and become dual degree JD/MPH students should self-disclose their dual degree status to the MPH Graduate Advisor at the School of Public Health and the Associate Director of the Center for Law, Health and Society at the College of Law immediately upon admission into their second program of study (either JD or MPH). An email from the student to both the MPH Graduate Advisor and CLHS Associate Director is preferred. Failure to send this notification to their two advisors may result in the student having to complete both programs in their entirety and become ineligible for the dual JD/MPH degree program opportunity.

**What can I do with a dual degree in law and public health?**

- Private law practices specializing in health care, pharmaceuticals, and food and drug policy
- Legal counsel in federal, state, and local government agencies
- Government affairs and advocacy
- Research institutions and higher education
- Non-profit organizations

Resources like the CDC's Public Health Law Program, Network for Public Health Law, APHA Law Section, and the American Health Lawyers Association provide connections to similarly trained individuals.
throughout the country through conferences, training, and networking. Read more information in the findings from the Network for Public Health Law’s interactive tool.

JD/MPH HMGP DUAL DEGREE REQUIREMENTS (106 hours)

MPH – minimum 28 School of Public Health credit hours (+ 14 or more public health-related College of Law credit hours, taken for the JD)

1. Required MPH Core Courses (16 hours):
   - PH 7011 Epidemiology for Public Health (3) or PH 7711 Epidemiologic Methods I (3)
   - PH 7017 Fundamentals of Biostatistics I (4)
   - PH 7140 Social and Behavioral Aspects of Public Health (3)
   - PH 7150 Environmental Health (3)
   - PH 7160 Introduction to the Health Care System (3)

2. Required MPH Research Methods Course (3 hours):
   - PH 7019 Public Health Research Methods (3)

3. Required MPH HMGP Concentration Courses (6 hours):
   - PH 7130 Leadership and Public Health (3)
   - PH 7170 Public Health Policy (3)

4. Required MPH Thesis or Capstone Project Course (3 credit hours):
   - PH 7990 Public Health Thesis or Capstone (3)

5. Required MPH Practicum Course (2 credit hours) or (2 credit hours minimum) of public health-related Lawyering Skills Course:
   - PH 7960 Public Health Practicum (2) or Public Health-Related Lawyering Skills Course (2+)

*Standard MPH HMGP students complete two (2) credit hours of PH 7960 Public Health Practicum; however, JD/MPH HMGP dual degree students may satisfy this PH 7960 requirement by completing 3-6 credit hours of a College of Law lawyering skills course: specifically in the Health Law Partnership (HeLP) Legal Services Clinic at Georgia State University [http://law.gsu.edu/clinics/help-legal-services-clinic/], a health law related externship [http://law.gsu.edu/experiential-learning/externships/], or Health Legislation and Advocacy clinical program [http://law.gsu.edu/clinics/]. For either a traditional PH 7960 practicum or for a lawyering skills course in lieu of a practicum, the student must FIRST complete all MPH core courses, LAW 7240, and LAW 7244 before beginning the practicum or lawyering skills course. If a lawyering skills course is taken prior to completing those required MPH core courses, it will not count for the PH 7960 practicum requirement. This is simply because the MPH curriculum design requires the practicum to be an opportunity for students to demonstrate the specific MPH knowledge and skills they learned in their MPH courses; therefore, students cannot apply the knowledge and skills acquired through their MPH courses of study in the practicum until after they have completed those MPH courses. Students must submit a Waiver/Substitution form to the School of Public Health for the lawyering skills course to be counted in lieu of the PH 7960 practicum requirement [http://publichealth.gsu.edu/students/practicum/practicum-
forms/]. The School of Public Health will make the final decision on if a completed lawyering skills course fulfills the PH 7960 requirement. Alternatively, JD/MPH student may elect to complete the standard public health practicum course.

6. **Required MPH HMGP Concentration-related College of Law Elective Courses (12 hours):**
   - LAW 7240 Health Law: Financing and Delivery (3)
   - LAW 7244 Public Health Law (3)
   - 6 hours of any qualifying College of Law electives related to both health management and policy and law with “B” grade or better—counted below

**JD – minimum 78 College of Law hours (+12 or more law-related School of Public Health credit hours, taken for the MPH)**

1. 43 hours of required College of Law course
2. 35 hours of College of Law elective courses, which include:
   - 12 hours HMGP Concentration-related College of Law Elective Courses:
     - LAW 7240 Health Law: Financing and Delivery (3)
     - LAW 7244 Public Health Law (3)
     - 6 hours of any qualifying law electives related to both health management and policy and law
   - 23 hours of additional elective courses
     - (3 hours could be a lawyering skills course such as externship, clinic, or summer fellowship for credit, relevant to public health)
   - At least 2 hours of the 35 must satisfy writing requirement (health law or other)

## 8050 Graduate Certificate in Public Health

### 8050 Graduate Certificate in Public Health

The Graduate Certificate in Public Health (GCPH) is a 16-credit hour program of study. The content includes three core courses taught in the Master of Public Health degree program and two electives. All courses have been specially designed and developed for students currently working in public health or related field who seek to maintain, upgrade, or advance their public health knowledge and skills.

The Graduate Certificate in Public Health will offer strong foundations in public health theory, research, and practice, for example:
Community Health Practice and Research
Program Planning, Management, and Evaluation
Human Communication
Health Promotion and Education
Environmental Health
Health and Human Rights
Health Policies

GRADUATE CERTIFICATE IN PUBLIC HEALTH REQUIREMENTS (16 hours):

1. Required GCPH Core Courses (10 hours)
   - PH 7011 Epidemiology for Public Health (3) or PH 7711 Epidemiologic Methods I (3)
   - PH 7017 Fundamentals of Biostatistics I (4)
   - PH 7160 Introduction to the Health Care System (3)

2. Required GCPH Elective Courses (6 hours):
   - Select at least two electives in consultation with either the SPH Graduate Advisor in the Office of Academic Assistance and Career Services (OAA) or a faculty mentor. Electives must be approved, in writing, by OAA and should be geared toward maintaining, upgrading, or advancing public health knowledge and skills related to the student’s current or future career.

Applying GCPH credit hours to Public Health Graduate degree programs. Students who wish to change from GCPH enrollment to graduate degree seeking status must file an application for the graduate program desired and provide all supporting documents by the appropriate deadline for the semester for which admission is sought. Further information on application procedures for admission to degree programs in the School of Public Health may be obtained from the Office of Academic Assistance and Graduate Career Services: http://publichealth.gsu.edu/academic/apply/.

GCPH credit hours may apply to School of Public Health graduate degree programs. However, all credits, including GCPH-earned credits, presented for the Master’s degree must have been earned within six calendar years of the date of Master’s degree conferral, and all credits presented for the Ph.D. degree must have been earned within nine calendar years of the date of Ph.D. degree conferral. Grades from all attempts at all Georgia State University courses that are taken at the graduate level will become part of the student’s GPA.

8060 Doctor of Philosophy in Public Health

Contact:
Shannon Self-Brown
Professor and Doctoral Program Director

Approved by the University System of Georgia Board of Regents in March 2011, the Doctor of Philosophy (Ph.D.) in Public Health academic degree in the School of Public Health is the first Georgia Board of Regent’s approved public health doctoral degree in the metropolitan Atlanta area. The degree
requirements will serve to educate the next generation of prevention scientists conducting public health research in academia, governmental public health, health care organizations and the private sector. Within the doctoral degree, students choose between distinct doctoral concentrations, or programs of study, offered by the School. They include: Epidemiology (EPID), Health Promotion and Behavior (HPMB), or Health Services and Policy Research (HSRP). While the Georgia State University School of Public Health offers three distinct Ph.D. programs in three different concentrations—EPID, HPMB, and HSRP—this catalog will occasionally refer to a singular Ph.D. degree when discussing requirements that pertain to all School of Public Health doctoral programs of study and students.

8060.10 Ph.D. Degree Requirements

The Ph.D. degree requires completion of a minimum of sixty-two (62) credit hours of coursework and a declared concentration in a public health core area. Students are also required to complete a dissertation. The candidates must satisfy the course requirements and credit hours in the following areas:

Required Prerequisites – MPH Core Courses (16 hours):

- PH 7011 Epidemiology for Public Health (3) or PH 7711 Epidemiologic Methods I (3) (EPID doctoral students must choose and complete PH 7711; HPMB and HSRP doctoral student may complete either PH 7011 or PH 7711)
- PH 7017 Fundamentals of Biostatistics I (4)
- PH 7140 Social and Behavioral Aspects of Public Health (3)
- PH 7150 Environmental Health (3)
- PH 7160 Introduction to the Health Care System (3)

Doctoral students may waive these MPH Core Courses if they:

- enter the Ph.D. program with a MPH degree that included “B” grades or better in their MPH courses related to the five knowledge areas basic to public health (biostatistics, epidemiology, environmental health sciences, social and behavioral sciences or dimensions of public health, and health services administration or introduction to the health care system), and/or have successfully completed a comparable course(s) with a grade of “B” or better, as documented by an official university transcript. Syllabi for courses may also be requested.
- and/or have completed employment or other training(s) that enable them to demonstrate the knowledge, skills, and abilities acquired in the MPH core courses listed above.

Students meeting the above criteria should provide a petitions for waiver for each of the five areas (courses) being requested for waiver. The Petition for Waiver is a written statement, along with any evidentiary documentation, that assures the School that the doctoral student has mastered one (or more) of the five areas of knowledge basic to public health through another manner (i.e. MPH degree, career experience, advanced or seminar coursework that included mastery of the five areas of knowledge basic to public health, etc.). This Petition must be approved by the Doctoral Program Director. The Doctoral Program Director may defer to the Director of the Division in which the petitioned course is offered. Upon approval by the Doctoral Program or Division Director, the Petition is then forwarded to the Office of Academic Assistance and Career Services (OAA) for their approval. OAA may request the input of the Associate Dean for Academic Affairs and/or the Academic Affairs Committee, but that is not required. Once the Director of
OAA notes OAA’s approval, the student’s file and PAWS electronic program of study is updated to note satisfaction of the required prerequisite(s).

Students who are admitted without these MPH core courses, comparable courses and/or skills will be required to take the five MPH core courses listed above as prerequisites to the doctoral degree. Some doctoral degree courses may be taken concurrently with prerequisite MPH core courses—students should consult their Faculty Advisor or the Doctoral Program coordinator. Note: In situations where the doctoral student has an MPH or appropriate graduate work from an institution known to the School, the School will pre-waive the prerequisite MPH core courses on behalf of the student during the admission and initial enrollment process. The student should confirm that this has been done by viewing their PAWS program of study audit; still, any student with doubt that this pre-waiver has been done or who does not see a waiver of the MPH core courses in their program of study audit should submit the Petition for Waiver as stated above.

Doctoral Degree Requirements (62 hours):

1. **Required Ph.D. Core Courses (18 hours):**

   - Public Health Doctoral Degree Core:
     - PH 8721 Epidemiologic Methods II (3)
     - PH 9120 Theory and Practice in Health and Prevention Instruction (3)
     - PH 9140 Advanced Research Methods (3)
     - PH 9150 Public Health Ethics (3)
     - PH 9810 Biostatistical Methods I (3)
     - PH 9820 Biostatistical Methods II (3)

2. **Required Ph.D. Concentration Courses (27 hours):**

   Twenty seven (27) hours of required coursework and electives have been established to ensure that students achieve proficiency in the competencies and skills related to each Ph.D. program of study: Epidemiology (EPID), Health Promotion and Behavior (HPMB), or Health Services and Policy Research (HSRP). Each student selects a program concentration upon application to the Ph.D. degree. To meet the individualized, in-depth training needs of doctoral students, many concentration research methods and/or elective areas have multiple course options that doctoral students may choose from to satisfy their unique learning needs and future career paths. All choices should be made in consultation with the student’s Faculty Advisor, and Faculty Advisor agreement with the course choices is implied on the Faculty Advisor and Doctoral Advisory Committee approved Doctoral Program of Study form (see Section 8060.60 Doctoral Program of Study Form for more information). Students are encouraged to seek Faculty Advisor consultation well before concentration research methods and/or elective course registration.

3. **Required Ph.D. Professional Seminar Courses (5 hours):**

   - PH 9180 Doctoral Research Seminar I (3)
   - PH 9181 Doctoral Research Seminar II (2)

4. **Required Comprehensive Ph.D. Examination:**

   Students will be expected to pass a doctoral comprehensive exam where the student demonstrates mastery of the program competencies and proficiency in the doctoral program body of knowledge. Students will have two opportunities to pass this exam, which is graded Pass/Fail by at least two faculty members in the School of Public Health. Please see the doctoral student handbook for more details about the doctoral comprehensive exam.
5. Required Ph.D. Research/Teaching/Applied Skills Practicum and Culminating Experience (12 hours):
   - PH 9960 Public Health Doctoral Practicum (3)
   - PH 9990 Dissertation (9)

6. Ph.D. Dissertation Requirement:
The dissertation will provide the student with an educational experience that enables the student to make a significant contribution to the field of public health and to apply the doctoral program knowledge and skills that allow him or her to contribute to the theoretical, conceptual, empirical, or practice base in the field of public health. Enrollment for dissertation credit is permitted only after successful completion of the comprehensive examination. Students must register for a minimum of nine (9) credit hours of PH 9990. Please see the doctoral student handbook for more details about the doctoral dissertation.

Ph.D. Epidemiology Concentration

The following EPID Competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program:

- Understand the strengths and weaknesses of various epidemiologic study designs and research methods.
- Demonstrate expertise in the ethical conduct of human subjects research, including confidentiality and vulnerable populations.
- Critically review, synthesize, and evaluate the scientific literature and present appropriate implications for public health practice, public policy, and further research.
- Demonstrate proficiency in epidemiological research by: (1) formulating a research question and/or corresponding hypotheses, (2) developing the study design, (3) participating in data collection, (4) conducting statistical analyses, and (5) interpreting scientific results.
- Demonstrate mastery and independence as a researcher by pursuing and completing a specialized area of epidemiologic research.
- Effectively present and disseminate findings from epidemiologic research to scientific and lay audiences.

1. Required Ph.D. EPID Concentration Courses (9 hours)
   - PH 9731 Epidemiologic Methods III (3)
   - PH 9741 Advanced Topics in Epidemiologic Methods (3)
   - PH 8830 Advanced Statistical Topics (3)

2. Required Ph.D. EPID Advanced Research Methods and Statistics Courses (6 hours)
   - PH 8260 Spatial Population Health I (3)
   - PH 8261 Spatial Population Health II (3)
   - PH 8885 Fundamentals of Clinical Trials (3)
   - PH 8890 Special Topics in Biostatistics (3)
   - Other appropriate research methods/statistics courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies,
Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics.

3. Required Ph.D. EPID Concentration Elective Courses (12 hours):
   - PH 7265 Epidemiology and the Prevention of Violence (3)
   - PH 7275 Chronic Disease Epidemiology (3)
   - PH 7280 Infectious Disease Epidemiology (3)
   - PH 7290 Case Studies in Epidemiology (3)
   - PH 7365 Epidemiology of Adolescent and Young Adult Risk Behaviors (3)
   - PH 8285 Social Determinants of Health (3)
   - PH 8790 Special Topics in Epidemiology (3)
   - Other appropriate Ph.D. EPID elective courses may be approved by the Faculty Advisor on the Doctoral Program of Study form.

Ph.D. Health Promotion and Behavior Concentration

The following HPMB Competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program:

- Develop expertise in social and behavioral theory, and application of theory to address public health problems at the individual, community or population level.
- Critically analyze research in terms of the appropriateness of the study design, sample, measures, data analysis, results, and interpretation and critically evaluate the potential impact of the new knowledge gained on public health practices and policies.
- Develop expertise in research methods and the ethical conduct of research to address scientific questions regarding health promotion research and practice.
- Develop expertise in statistical and analytic methods used in health promotion research and practice.
- Develop expertise in planning, implementation, evaluation, and dissemination of social and behavior interventions and/or policies that address public health and health behavior, especially around social-ecological interventions and interventions that address health disparities.
- Develop expertise in the communication of scientific findings, both writing and oral presentations, for both scientific and lay audiences.

1. Required Ph.D. HPMB Concentration Courses (9 hours):
   - PH 7535 Dissemination and Implementation Science (3)
   - PH 9130 Intervention and Evaluation of Health Promotion and Disease Prevention (3)
   - PH 9095 Measurement and Outcomes in Social and Behavioral Health (3)

2. Required Ph.D. HPMB Advanced Research Methods and Statistics Courses (12 hours)
   Select at least 4 courses in consultation with the Faculty Advisor:
   - PH 8260 Spatial Population Health I (3)
   - PH 8261 Spatial Population Health II (3)
   - PH 8830 Advanced Statistical Topics (3)
   - PH 8885 Fundamentals of Clinical Trials (3)
   - PH 8890 Special Topics in Biostatistics (3)
PH 9731 Epidemiologic Methods III (3)
PH 9741 Advanced Topics in Epidemiologic Methods (3)
Other appropriate research methods/statistics courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies, Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics.

3. Ph.D. HPMB Concentration Electives courses (6 hours):
Select at least 2 courses in public health or other graduate-level programs in consultation with the Faculty Advisor and approved by the Faculty Advisor on the Doctoral Program of Study form.

Ph.D. Health Services and Policy Research Concentration

The following HSRP Competencies describe the knowledge, skills, and abilities a successful graduate will demonstrate the conclusion of this doctoral program:

- Apply social science (economics, political science, sociology, etc.) concepts, theories and methods to the framing and analysis of research questions in health services delivery and health care policy.
- Describe major problems in health services delivery and health care policy that are currently the subject of empirical investigations
- Apply advanced methods of analysis and research design to describe policy-relevant issues in contemporary health care, such as: access to health care, health care financing, insurance market functioning, physician and hospital performance, healthcare management and organization, patient safety and quality of care, and health care workforce
- Effectively teach concepts and methods of health services and health policy research to students
- Design a health services or health policy research proposal involving qualitative, quantitative, or mixed methods approaches
- Conduct a health services or health policy research activity investigation suitable for peer-reviewed publication as an independent researcher
- Function as an interdisciplinary team collaborator in the design and conduct of a health services or health policy research investigation.

1. Required Ph.D. HSRP Concentration Courses (9 hours):
   - PH 9220 Principles of Health Service Research I: Themes (3)
   - PH 9240 Principles of Health Service Research II: Methods (3)
   - PH 8250 Health Economics and Policy (3)

2. Ph.D. HSRP Concentration Advanced Research Methods, Statistics and Electives Courses (18 hours)
   - Select at least 6 pre-approved courses in consultation with the Faculty Advisor.
   - PH 8260 Spatial Population Health I (3)
   - PH 261 Spatial Population Health II (3)
   - PH 8285 Social Determinants of Health (3)
   - PH 8290 Population Health Informatics (3)
- PH 8830 Advanced Statistical Topics (3)
- PH 8885 Fundamentals of Clinical Trials (3)
- PH 8890 Special Topics in Biostatistics (3)
- ECON 8220 Human Resources and Labor Markets (3)
- PMAP 8141 Microeconomics for Public Policy (3)
- PMAP 9211 Applying Research to Policymaking: Examples from Health Care Policy (3)
- SOCI 8118 Aging, Health, and Disability (3)
- SOCI 8234 Race-Ethnicity and Health (3)

Other appropriate Ph.D. HSRP research methods/statistics and elective courses may be approved by the Faculty Advisor on the Doctoral Program of Study form. There are a number of departments at the university that offer relevant courses including, but not limited to, Mathematics and Statistics, Managerial Sciences (Decision Sciences unit), Economics, Marketing, Sociology, Public Management and Policy Studies, Psychology, and Educational Policy Studies (Research unit). Other courses that may be approved to satisfy this elective requirement include, but are not limited to, Structural Equation Modeling, Finite Mixture Modeling, Hierarchical Linear Modeling, Longitudinal Modeling, Survival Analysis, Bayesian Inference, Survey Sampling, Causal Inference, Missing Data, or Nonparametric Statistics.

8060.20 Faculty Advisor and Doctoral Advisory Committee Requirements

Upon admission to the Ph.D. degree in Public Health programs, a student is assigned a Faculty Advisor from the SPH faculty. The Faculty Advisor serves as the primary advisor, and mentors the student throughout the program and assists the student in choosing courses, signing off on official documents, and chairing the student’s doctoral advisory committee (and dissertation).

Annual Review of Doctoral Students

Ph.D. students will be given feedback from their Faculty Advisor on an annual basis. Students are required to:

1. Set up an appointment with the Faculty Advisor by June 1st each year.
2. One week prior to the scheduled appointment students must submit:
   - summary of the courses and grades taken since beginning the program,
   - a summary of professional scholarship in the last year,
   - a course paper/assignment or another product that demonstrates scientific writing skills, and proficiency with statistics.
   - a self-assessment of mastery of the doctoral competencies to date.

Faculty Advisors will use this portfolio to evaluate student progress in several areas: coursework progress and demonstrated mastery of doctoral competencies, professional scholarship, scientific writing including dissertation writing, statistical proficiency, and overall professionalism. Ph.D. milestones and goals for the next academic year should also be discussed. All students will receive written feedback from the Doctoral Program Director or designated faculty mentor summing up the evaluation ratings and the student’s standing with the program.
If progress is unsatisfactory, the student will plan a course of action with his or her advisor and the Doctoral Program Director to improve his/her progress. If the student demonstrates unsatisfactory progress on the plan, or during more than one annual review, he or she may be scholastically excluded from the doctoral program.

8060.30 Continuous Enrollment Policy and Degree Completion

Students in all graduate programs, including doctoral programs, must maintain enrollment totaling six hours (or more) over three consecutive semesters, including summers. In other words, the total enrollment of the current term plus the two terms preceding it must add up to six hours or more. The status of all students will be checked by the midpoint of each term for compliance with the continuous enrollment requirement. Any student whose enrollment is noncompliant will receive a hold on their registration, which would prevent registering for all current and future classes. Those students will be notified by an e-mail message sent to their official Georgia State University e-mail account. To resume their programs, students with continuous holds on their enrollment must file for re-entry by the published deadline and must enroll at a level sufficient to satisfy the continuous enrollment criterion. That is, their enrollment in the re-entry term plus the two terms preceding it must total six hours or more. The maximum required enrollment level for the re-entry term is six hours. For more information on the re-entry process, contact the Office of Academic Assistance and Career Services.

8060.40 Grade Point Average and Course Grade Requirements for Doctoral Students

Doctoral students must maintain a 3.2 or better overall institutional grade point average (GPA) to progress from one semester to the next, and must receive a grade of “B” or better for each School of Public Health based course (courses with prefix “PH” in front of the course number). Any doctoral student earning a grade of B- or below must repeat the public health course or not count the course towards their doctoral program of study. Doctoral students whose cumulative GPA falls below 3.2 at the end of a semester will receive a scholastic warning from the School. If at the end of the following six semester hours of enrollment, the student has not achieved a 3.2 cumulative GPA, he or she will be scholastically excluded from the doctoral program. Any student who is scholastically excluded from the program may apply for readmission after a period of one year. Time Limitations for Doctoral Students (see section 8060.50) will still apply.

8060.50 Residency Requirements and Time Limitations for Doctoral Students

The purpose of requiring completion of all degree requirements within a fixed period is to ensure currency, continuity, and coherence in the academic experiences leading to the degree. Within nine (9) years of the student’s term of first matriculation, it is required that he or she complete all degree requirements. Moreover, all requirements for doctoral candidacy (coursework, comprehensive examination, prospectus approval) must be completed within seven years (7) of the student’s first term of matriculation. No coursework completed more than seven years before admission to candidacy may be used to meet any doctoral degree requirement. Enrollment for a minimum of three semester hours of credit is required during at least two out of each three-term period following successful completion of the comprehensive examination until graduation. This enrollment must include a minimum of nine semester hours of dissertation (PH 9990) credit but may also include other coursework. The student must be enrolled in and successfully complete three semester hours of graduate credit (typically dissertation hours) during the final
academic term in which all degree requirements are completed and the student graduates. Additional information about time limits and expected doctoral program completion milestones may be distributed by the Doctoral Program Coordinator, Division Directors, or a designated faculty member to doctoral students in the School of Public Health Doctoral Student Handbooks. Doctoral students will be subject to all the doctoral program completion milestone requirements, details and policies distributed in the School of Public Health Doctoral Student Handbooks. Failure to meet any of these doctoral program completion milestones may result in scholastic dismissal from the doctoral program.

8060.60 Doctoral Program of Study Form

The signed preliminary Doctoral Program of Study must be submitted to the Doctoral Program Director when the student has completed 20 semester credit hours and no later than three semesters after starting the program. In other words, students who start in the fall semester should submit this form by the end either of the subsequent spring semester, summer semester, or by the beginning of the following fall semester at the latest. Although the preliminary Doctoral Program of Study is completed on a university form, it is for Doctoral Program Director’s use only at the preliminary stage. While OAA might review the form or store it in the student’s file, it is not sent to OAA for degree-auditing purposes. The preliminary Doctoral Program of Study form is simply used for the Doctoral Program Director to confirm that each doctoral student understands the doctoral program requirements, has a realistic plan and timeline in place to complete the requirements within the prescribed time limits, and has made preliminary connections to a Faculty Advisor and likely Doctoral Advisory Committee.

Once all courses (with the exception of the dissertation course) are completed or in-progress, the Doctoral Program of Study form is revised and resubmitted by the student, this time as an official university form that documents completion of the doctoral program requirements to date. This final Doctoral Program of Study form must be approved by the final Faculty Advisor (who will serve as the dissertation chair), the final Doctoral Advisory Committee (who will serve as the dissertation committee), and submitted to the Doctoral Program Director at least two weeks before the student applies for admission to candidacy. It is forwarded to OAA for degree-audit and final approval. The Final Doctoral Program of Study form must show all courses relevant to the doctoral program (including master-level prerequisite courses and any courses approved from other universities), in addition to Georgia State University courses satisfying the minimum doctoral degree requirements.

Transfer credits from another institution: A student may apply a maximum of nine (9) semester hours of approved course credit transferred from another sufficiently accredited institution toward fulfilling Ph.D. degree requirements. Transfer credits are processed by the School and must be approved by petition. Students requesting to petition for transfer of credits must work with the Graduate Advisor in the Office of Academic Assistance. Approval is at the discretion of the Doctoral Program Coordinator—approval is not guaranteed. The Doctoral Program Director may defer to the Director of the Division in which the petitioned course is offered. All credits, including transfer credits, presented for the Ph.D. degree must have been earned within nine calendar years of the date of degree conferral. No previously taken course with a grade of “B-” or below may be transferred into the doctoral program. Courses transferred-in for the doctoral degree may not be used in fulfilling the Doctoral Public Health Core Courses requirements or the doctoral credit-hour residency requirement. OAA will update the student’s electronic PAWS program of study form at that time.
Credits earned at Georgia State University in either transient, non-degree, or other-Georgia State University-degree status: A student may apply a maximum of nine (9) semester hours of applicable Georgia State University course credit earned prior to Ph.D. program admission (while taking public health courses as either transient, non-degree, or other-Georgia State University-degree or program status) toward fulfilling Ph.D. degree requirements. Credits are processed by the School—petition is not required, but students should confirm their previously completed Georgia State University courses are applicable. Students may work with the Doctoral Program Director and the Graduate Advisor in the Office of Academic Assistance to confirm applicability. Approval is at the discretion of the Doctoral Program Coordinator—approval is not guaranteed. The Doctoral Program Director may defer to the Director of the Division in which the course is offered. All Georgia State University credits presented for the Ph.D. degree must have been earned within nine calendar years of the date of public health doctoral degree conferral. Courses taken at Georgia State University that were applied to another Georgia State University degree program may not be applied to the Ph.D. degree; instead, a student should seek a doctoral course waiver for these courses already applied to another Georgia State University degree program.

Doctoral Course Waivers: Doctoral students may receive a course waiver for any doctoral course already completed as part of another Georgia State University degree program (including the MPH degree program), or if the course content was already learned at another institution or training area, but was not eligible for transfer credit. Students are still expected to take the minimum number of credit hours expected for the Ph.D. degree at Georgia State University (sixty-two (62) credit hours), but when granted a course waiver, the student may complete a different graduate level course, substituted into their doctoral program in order to complete the total sixty-two (62) credit hour requirement of their doctoral degree.

No previously taken course with a grade of “B-” or below may be used for course waiver. Courses waived for the doctoral degree may not be used in fulfilling the Doctoral Public Health Core Course requirements or the doctoral credit-hour residency requirement.

Students hoping to waive a course and substitute it with another should provide a Petition for Waiver noting each doctoral course they hope to waive, and which course they would like to substitute in its place. The Petition for Waiver is a written statement, along with any evidentiary documentation, that assures the School that the doctoral student has mastered the course material in the course to be waived through another manner (i.e. MPH degree, another Georgia State University degree, etc.).

This Petition must be approved by the student’s Faculty Advisor and the Doctoral Program Director. The Doctoral Program Director may defer to the Director of the Division in which the petitioned course is typically offered.

Upon approval by the student’s Faculty Advisor and the Doctoral Program (or Division Director), the Petition is then forwarded to the Office of Academic Assistance and Career Services (OAA) for their approval. OAA may request the input of the Associate Dean for Academic Affairs and/or the Academic Affairs Committee, but that is not required. Once the Director of OAA notes OAA’s approval, the student’s file and program of study is updated to note a waiver of the required course(s) and the substitution of another course taking its place. (MPH-Level Core Course prerequisite requirements for the doctoral program are exempt from this rule, since these prerequisite course do not count toward the sixty-two (62) credit hour minimum requirement for doctoral programs).
8060.70 Doctoral Comprehensive Examination

Doctoral students must pass a comprehensive examination before being admitted to candidacy. The purpose of the comprehensive examination is to assess each student’s mastery of the doctoral program competencies and to determine the student’s readiness to complete the dissertation. The student must demonstrate expertise in expressing ideas with clarity and depth, synthesizing knowledge from public health and related fields, and applying knowledge and critical thinking skills to specific public health problems or issues. To be eligible to take the comprehensive examination, the student must have completed and achieved a 3.2 or greater cumulative grade-point average in the doctoral program of study, and received approval from their Faculty Advisor.

Students have two opportunities to pass the comprehensive examination. Faculty required revisions to an initial comprehensive examination attempt count as a second examination attempt. If the student fails the first attempt, faculty reserve the right to require the student to take additional coursework or complete other learning experiences prescribed by the student’s Faculty Advisor, Doctoral Advisory Committee, the Doctoral Program Coordinator, and/or a designated faculty member prior to retaking the comprehensive examination. These decisions may be made by the Faculty Advisor, but are usually done in consultation with the Doctoral Program Director or other SPH faculty. Students may only continue in the doctoral program if they complete prescribed additional coursework or learning experiences, if any, and pass the comprehensive examination on the second attempt. Failure on the second attempt will result in scholastic dismissal from the doctoral program. Students are expected to recognize and uphold the highest standards of intellectual and academic integrity. For explicit coverage of these policies students are advised to read the University and Student Codes of Conduct in the Graduate Catalog. These policies discuss plagiarism, cheating on examinations, unauthorized collaboration, falsification, and multiple submissions of material for credit without permission.

Examination content and structure varies between concentrations, between students, and from year-to-year to ensure relevance to the student’s training and integrity in the testing procedure. Information about the comprehensive exam structure and requirements, evaluation and scoring, and the policies governing the testing procedures are distributed by the Doctoral Program Director or designated SPH faculty member to comprehensive exam eligible students immediately prior to their comprehensive examination date. Doctoral students are subject to the comprehensive exam requirements and policies distributed at that time.

8060.80 Admission to Candidacy

Admission to candidacy for a doctoral student is requested immediately after the successful completion of the comprehensive examination. The following is a complete list of requirements for admission to candidacy:

1. All prerequisites set as a condition to admission to candidacy have been satisfactorily completed.
2. The Doctoral Advisory Committee, the Doctoral Program Director, and OAA have approved the final program of study.
3. A GPA of 3.2 has been maintained for all graduate courses taken and for all completed courses on the program of study. A grade of “B” or better for each School of Public Health based course (courses with prefix “PH” in front of the course number) must be earned, and
No course with a grade below C+ may be placed on the final program of study.
4. Written and oral comprehensive examinations have been passed and reported to the School.
5. The Doctoral Advisory Committee, including any necessary changes in the membership, is confirmed and all its members have been notified of their appointment.
6. The residency requirement has been met.

Application for Admission to Candidacy

This form must be submitted to OAA as soon as possible following the completion of the Admission to Candidacy requirements. Candidacy begins on the date the form is received by the School. After admission to candidacy, a student must register for at least nine (9) hours of dissertation credit during the completion of the degree program. Students planning to graduate the same semester they enter candidacy must be admitted by the published deadline for candidacy during that semester and register for nine (9) hours of dissertation credit. The student must also meet all other deadlines for graduation in that semester. A student must register for a minimum of three (3) dissertation credit hours in any semester when using University facilities, and/or faculty or staff time. The School shall not accept a dissertation if the student has not been admitted to candidacy for the degree.

Time Limit on Candidacy

All doctoral program degree requirements must be successfully completed within nine (9) years of a student’s first term of matriculation. The dissertation must be completed within four (4) years following admission to candidacy to qualify for graduation. If a doctoral student’s candidacy expires after the first week of classes in the final semester, the student is granted the remainder of the semester to complete degree requirements without special permission of the School. Additional information about time limits and expected dissertation completion milestones may be distributed by the Doctoral Program Coordinator, Division Directors, or a designated faculty member to candidacy eligible students immediately prior to their admission to candidacy. Doctoral students will be subject to all the dissertation completion milestone requirements, policies and procedures distributed at that time. Failure to meet any of these dissertation completion milestones may result in scholastic dismissal from the doctoral program.

8060.90 Dissertation

Enrollment for dissertation credit (PH 9990) is permitted only after successful completion of the comprehensive examination.

Doctoral Advisory Committee

It is most important that the persons who serve on the Doctoral Advisory Committee (occasionally referred to as the Doctoral Dissertation Committee), at the time the dissertation research is undertaken, be those faculty members most knowledgeable in the areas of the student’s research. Within the guidelines for committee membership, they should be selected regardless of their concentration affiliation. The Doctoral Advisory Committee consists of a minimum of three members: Two members must be within the School of Public Health and hold graduate faculty status. The third member may be from the School of Public Health or outside the School/Georgia State University, but he/she must have a Ph.D., MD, or other terminal degree and must have expertise in the content area or methodology used in the proposal that can be demonstrated upon review of a curriculum vita by the Doctoral Program Director or student’s Faculty
Advisor.

Dissertation Planning

Students pursuing a Ph.D. must complete a dissertation on a subject connected with their major field of study/concentration. The dissertation must present original research, independent thinking, scholarly ability, and technical mastery of a field of study. Its conclusions must be logical, its literary form must be acceptable, and its contribution to the field of public health should merit publication.

The dissertation must provide the student with an educational experience that enables the student to make a significant contribution to the field of public health and to apply the doctoral program knowledge and skills that allow him or her to contribute to the theoretical, conceptual, empirical, or practice base in the field of public health. At a minimum, the dissertation should contribute to at least one of these knowledge bases, as related to the student’s concentration. These activities must take place under the direction of the student’s dissertation committee. The study must include all of the following:

- Identifying an appropriate theory to inform the study.
- Conceptualizing the research questions and hypotheses.
- Developing the research design.
- Applying the appropriate methodology.
- Interpreting the study results.

Note: These guidelines do allow for secondary data analysis.

The School of Public Health accepts either the traditional dissertation form or the European (manuscript) dissertation format. The European (manuscript) dissertation format contains a first chapter that consists of a thorough synthetic review of the literature for the content area of the student dissertation. The next chapters consist of copies of three (a) published papers, (b) manuscripts in press, (c) manuscripts submitted. Because the manuscripts may have been published, submitted, or targeted for different journals with different journal styles, the chapters may not all be formatted in the same style. As is found in published papers, each chapter would have an Introduction, Methods, Results, and Discussion section, unless one paper is a review paper, which may be approved as an option by the Doctoral Advisory Committee (dissertation committee). The final chapter should include a global perspective summary that ties together the findings in the three papers and concludes with the future directions for the student’s line of research. This final chapter is not a recapitulation of the middle chapters. This chapter offers the author the unique opportunity to speculate without the fetters that constrain typical research papers.

The School of Public Health requires that the student submitting the dissertation must be listed as the first author of each article used as a chapter. One first-author manuscript that is submitted prior to the dissertation proposal meeting (no more than 1 year in advance) and is linked to the overall theme of the dissertation can be included as one of the three chapters upon approval of the major advisor. The inclusion of any articles that are previously published or accepted for publication requires permission from the copyright holder. Articles not yet copyrighted by another party will be covered under the copyright of the dissertation.

Student dissertation progress will be reviewed as part of the annual evaluation procedures, beginning in the student’s third year of the doctoral program. If a student is not making expected progress on the
dissertation, this will be noted on the faculty rated student annual evaluation form as not meeting expectations. Failure to make adequate progress on the dissertation in two consecutive annual evaluations will result in scholastic dismissal from the doctoral program.

**Dissertation Proposal/Prospectus and Meeting**

When the Faculty Advisor certifies that the written proposal for the dissertation is satisfactory, the student should schedule a meeting with the Doctoral Advisory committee to present the proposal and get approval for moving forward with dissertation development.

1. The student will provide a complete copy of the proposal (written and electronic) to all members of the committee at least two weeks before the meeting. The proposal must be formatted according to the APA Manual of Style (latest edition).
2. The proposal will include (Note: Deviations from the chapter approach may be approved by the student's Faculty Advisor and Doctoral Program Director):
   - **Traditional proposal:**
     1. Chapter 1: Introduction and Statement of Purpose
     2. Chapter 2: Review of the Literature
     3. Chapter 3: Methods
     4. Reference Section
     5. Appendices Section
   - **Manuscript proposal must include:**
     1. Chapter 1: Introduction and Statement of purpose
     2. Chapter 2: Description and Outline of 3 studies that will be developed and submitted during the dissertation process. **NOTE:** if one study has already been developed and submitted, please include a copy of that study and describe how the next 2 studies will build on this work
     3. Reference Section
     4. Appendices Section
3. Approval of the proposal signifies that members of the Doctoral Advisory Committee believe that the student has proposed a satisfactory dissertation plan. Approval of the proposal requires the agreement of all members of the Doctoral Advisory Committee except one, as endorsed by their signatures on the appropriate form that, together with this approved prospectus, is filed with the Graduate Advisor in the Office of Academic Assistance and Career Services.
4. Before starting the data collection, the student must request approval from the Georgia State University Institutional Review Board (IRB) if human subjects are involved in the research project.

The Faculty Advisor has the primary responsibility for guiding research, but the student should consult all members of the Doctoral Advisory Committee to draw upon their expertise in relevant areas.

**Dissertation Approval and Defense**

When the Faculty Advisor is satisfied with the completed dissertation, he or she will certify that it has his or her approval and is ready to be read by the other members of the Doctoral Advisory Committee. The Faculty Advisor will then distribute copies of the dissertation to the other members of the Doctoral
Advisory Committee and will schedule a final oral defense and notify the SPH.

Subsequently, the SPH will announce the time and place of the defense of the dissertation to the University community. The committee members will have three weeks to read and evaluate the completed dissertation. Written assent of all committee members except one is required before a dissertation is approved as ready for a final defense. If the Doctoral Advisory Committee declines to approve the dissertation as ready for the final defense, the Faculty Advisor will notify the student and the School in writing and the defense date will be cancelled.

The Faculty Advisor will chair the dissertation defense. All members of the Doctoral Advisory Committee, except one, must approve the dissertation and the defense, and must certify their approval in writing. The SPH will only recommend the award of a doctoral degree when the student has demonstrated mastery of necessary theories, concepts and content, and demonstrated competence in the knowledge and skills defined in the competencies for the student’s chosen doctoral program concentration. The results of the defense of the dissertation must be reported to the School of Public Health at least two weeks prior to graduation—students should consult the OAA Graduate Advisor for the absolute deadline in a given semester. The date (year) on the title page of the dissertation shall be the same as the date (year) on which the dissertation is approved by the School, following approval by the Doctoral Advisory Committee. The final dissertation document must conform to all format and content requirements specified by the School of Public Health.
9000 Institute for Biomedical Science

Graduate program information for the Institute for Biomedical Sciences is described in detail in this chapter. See subsections for specific program information as well as policies and procedures. The Institute for Biomedical Sciences does not currently offer an undergraduate degree program. Interested students should visit the Institute for Biomedical Sciences website at biomedical.gsu.edu for updates on our degree offerings.

About the Institute for Biomedical Sciences

The Institute for Biomedical Sciences (IBMS) was established in January 2014 as part of Georgia State University’s strategic plan that recommended enhanced contributions to the sciences, health, and medical education. The Institute is dedicated to advancing fundamental and innovative biomedical research that improves human health, as well as educating and training future generations of leading biomedical scientists that are poised to enter the workforce and support cutting-edge discoveries. The launch of the Institute represents the most recent progress toward establishing Georgia State as a premier urban research university.

IBMS is a leading multidisciplinary research and education (degree-granting) institute dedicated to advancing fundamental and innovative biomedical research that improves human health as well as educating and training future generations of leading biomedical scientists and health (non-M.D.) professionals related to biomedical sciences.

Despite tremendous advances in biological and medical research, significant gaps still exist between basic laboratory research and its clinical applications. Now more than ever there is an urgent need for bridging basic research to clinical management strategies. To meet this significant challenge and promote translational research from bench to bedside, the interface among the biomedical science disciplines has emerged as one of the most exciting interdisciplinary research fields in science. To significantly and rapidly accelerate Georgia State University as a recognized leader in this area, IBMS has been established to expand its contribution and efforts to research and education in these areas.

The Institute’s key assets include the university’s existing strengths in inflammation, immunity and infection, microbial pathogenesis, molecular and translational medicine, translational immunology, oncology, and therapeutics and diagnostics, which align with its strategic priorities, Georgia’s commitment to be the nation’s hub for biomedical research and federal/non-federal funding priorities. IBMS provides a world-class interdisciplinary training environment for preparation of technically skilled students who are capable of filling the diverse workforce needs in the biomedical sciences.

IBMS is building a strong research presence in biomedical sciences, but is also fostering a unique environment to promote synergistic and interdisciplinary collaboration with units internal to the university. The Institute partners with other Georgia and non-Georgia research institutions, major medical centers, private sector (for example, biopharmaceutical, biotech) companies and organizations/foundations, including the Georgia Research Alliance, to promote world-class multidisciplinary research and education programs.

Office of the Director
9000.10 Mission, Background, Philosophy, and Goals

**Mission:** The Institute for Biomedical Sciences (IBMS) will be a leading multidisciplinary research and education (degree-granting) institute dedicated to advancing fundamental and innovative biomedical research that improves human health as well as educating and training future generations of leading biomedical scientists and health (non-M.D.) professionals.

**Background:** Despite tremendous advances in biological and medical research, significant gaps still exist between basic laboratory research and its clinical applications. Now more than ever there is an urgent need for bridging basic research to clinical management strategies. To meet this significant challenge and promote translational research from bench to bedside, the interface between the biomedical science disciplines has emerged as one of the most exciting interdisciplinary research fields in science. To significantly and rapidly accelerate Georgia State University as a recognized leader in this area, the Institute was established to expand contributions and efforts to research and education in these areas. The Institute’s key assets include the University’s existing strengths in inflammation, immunity and infection, microbial pathogenesis, molecular and translational medicine, translational immunology, oncology, and therapeutics and diagnostics, which align with the its strategic priorities, Georgia’s commitment to be the nation’s hub for biomedical research and federal/non-federal funding priorities. Moreover, IBMS provides a world-class interdisciplinary training environment for preparation of technically skilled students that are capable of filling the diverse workforce needs in the biomedical sciences.

**Philosophy (Success Through Synergy):** IBMS is not only building a strong research presence in biomedical sciences, but also fosters a unique environment to promote synergistic and interdisciplinary collaboration with units internal to the University, other Georgia and non-Georgia research institutions, major medical centers, private sector (e.g., biopharmaceutical, biotech) companies, and organizations/ foundations to develop world-class multidisciplinary research and education programs.

**Goals:**

1. Pursue excellence in fundamental and innovative research in the basic biomedical sciences.
2. Advance diagnostic, therapeutic, and preventive measures for major diseases, with an initial emphasis on inflammatory, immunological, infectious, metabolic and cardiovascular, and neoplastic...
diseases.
3. Accelerate translation and commercialization outcomes by collaborating and interacting with partner institutions, hospitals and biopharmaceuticals.
4. Provide an environment for preparing students to meet the future challenges and workforce needs in biomedical research and health professions.

9000.20 Degrees Offered

IBMS currently offers the following graduate program:

Master of Interdisciplinary Studies with a concentration in Biomedical Enterprise.

Please visit the IBMS website at biomedical.gsu.edu for updates on our degree offerings.

9000.30 Research Centers and Initiatives

Areas of Research Focus: IBMS promotes interdisciplinary research that drives advances in biomedical sciences through synergistic collaboration, ultimately leading to better patient care. The focus is on understanding the mechanistic basis for a variety of important human diseases, such as inflammatory, immunologic, infectious, metabolic and cardiovascular diseases, and developing innovative approaches to prevention, diagnosis and treatment. Initial areas of research focus for IBMS are:

- Immunology (molecular and cellular immunology, inflammation, immunity, chemical immunology, tumor immunology, systems and computational immunology)
- Translational Immunology
- Microbiology (molecular and cellular microbiology, host-pathogen interactions, microbiota, translational microbiology, systems and computational microbiology)
- Microbial Pathogenesis
- Infectious Diseases
- Metabolic and Cardiovascular Diseases
- Molecular, Cellular and Translational Medicine
- Translational Systems Biology and Bioinformatics
- Translational Diagnostics and Therapeutics
- Vaccinology

Center for Inflammation, Immunity & Infection

The mission of the Center for Inflammation, Immunity & Infection is to better understand the molecular basis of inflammatory diseases and further develop novel therapeutic strategies. Inflammation is one of the body’s major defense mechanisms in response to infection or injury, but when it is uncontrolled, it causes inflammatory diseases such as chronic obstructive pulmonary disorder, asthma, rheumatoid arthritis, inflammatory bowel disease, otitis media and cancer.

Center for Microbial Pathogenesis

The Center for Microbial Pathogenesis is focused on studying such viruses as influenza virus, hepatitis C,
dengue, Ebola, Marburg, Crimean-Congo hemorrhagic fever, cytomegalovirus, and several other negative-stranded RNA viruses. Studies are directed at understanding how the innate immune system of the infected host is counteracted by components of these viruses and how the interferon signaling system works on a molecular level. Researchers use this knowledge to develop new vaccines against these viruses and work to identify small molecular weight compounds for use as antivirals.

Center for Translational Immunology

This center is expected to launch in the near future. Please visit the IBMS website at biomedical.gsu.edu for updates.

9000.40 Academic Resources and Services

Office of Academic Assistance and Career Services

Petit Science Center, Room 437
404-413-3650
biomedicaladvising@gsu.edu

Contacts:

Yvette Hilaire, Graduate Advisor
yhilaire@gsu.edu

The Office of Academic Assistance and Career Services (OAA) provides current and prospective IBMS students with comprehensive student support services to ensure academic and career success.

Advising and Academic Assistance

For students in the Master of Interdisciplinary Studies (MIS) program with a concentration in Biomedical Enterprise, academic advisement is provided using a two-pronged approach. The Graduate Advisor in the OAA provides guidance on administrative matters such as program of study advisement, degree petition process, thesis/capstone registration, graduation, and referral to other student support services on campus. The IBMS faculty serve as faculty mentors, and students are encouraged to talk to their mentors about how to select a concentration, determining which course electives make sense for future career goals, exploring research interests and opportunities, developing professional networks, and serving on thesis or capstone committees. MIS students are not assigned a faculty advisor but are instead encouraged to develop multiple mentoring relationships with IBMS faculty as well as faculty in the College of Law and Robinson College of Business.

Career Services

The Institute provides specific career support and leadership development services to all current IBMS students and alumni. Students are invited to meet with our IBMS Career Coordinator to discuss individual career questions. Career Services can help students with resume writing, interviewing, job searching, internship development, and networking.
The Office of Academic Assistance and Career Services (OAA) also supports all IBMS student clubs and organizations – students are encouraged to inquire about joining student clubs and organizations while being enrolled in IBMS.

9000.50 Student Organizations

Biomedical Student Association (BMSA)

The Biomedical Student Association (BMSA) is the student organization of the IBMS at Georgia State University. BMSA seeks to develop well-rounded biomedical professionals and promote meaningful interactions between students, faculty and staff, and health professionals. Throughout the school year, BMSA will organize social events, professional development opportunities, and public service events for students, faculty, and staff.

9010 Graduate Admissions

The IBMS accepts students into the Master of Interdisciplinary Studies (MIS) in Biomedical Enterprise program in the fall semester.

9010.10 Master of Interdisciplinary Studies (MIS) in Biomedical Enterprise Application Requirements

For complete application materials instructions, visit the following IBMS website: http://biomedical.gsu.edu/academics/

The following materials are required for admission to the MIS in Biomedical Enterprise. All application materials are submitted through the Institute’s website http://biomedical.gsu.edu/admissions/.

1. $50.00 application fee.
2. A resume or curriculum vitae
3. One official transcript from each college and/or university attended (including Georgia State University). Transcripts are required regardless of length of stay or if the grades are listed on another school’s transcript. Applicants must have a bachelor’s degree or its equivalent at the time of enrollment from a regionally accredited institution.
4. Three letters of recommendation from individuals familiar with the applicant’s intellectual achievement and potential. At least two of these letters must be from faculty or senior administrators at academic institutions.
5. A statement outlining the applicant’s academic and professional goals related to seeking this degree.
6. Official scores on the Graduate Record Examination (GRE). Please note that GRE scores over five years old cannot be accepted. (Applicants with an earned doctorate or J.D. from a regionally accredited institution may not be required to take the GRE). Those applicants should check with the Institute well before the admission deadline to see if this examination requirement may be waived. The School reserves the right to require the GRE, GMAT, or MCAT examination for applicants with an earned doctorate or J.D.)
7. Official scores on the Test of English as a Foreign Language (TOEFL) or via the International
English Language Testing System (IELTS), for applicants whose native language is not English. Applicants living in the Atlanta area may take the Georgia State Test of English Proficiency (GSTEP) in place of the TOEFL or IELTS. Please note that the TOEFL, IELTS, and GSTEP scores over two years old cannot be accepted. The TOEFL, IELTS, and GSTEP examination may not be required for international applicants who have a received a degree from a regionally accredited U.S. institution.

- TOEFL: http://www.toefl.org/
- IELTS: http://www.ielts.org/
- GSTEP: http://alsl.gsu.eu/programs/gstep/

8. A Certificate of Immunization (after acceptance)

9010.20 International Student Admission

It is the policy of Georgia State University to encourage the enrollment of students from other countries. The University subscribes to the principles of international education and to the basic concept that only through education and understanding can mutual respect, appreciation and tolerance of others be accomplished. The recognition of the values of cultural exchange is inherent in our philosophy of education and is predicated on an awareness of the need to foster better cooperation, friendship, and understanding among the peoples of the world. In this regard, we welcome international students to our campus because we believe in a cultural exchange program which will be beneficial to our own student body, to the international students involved, and to metropolitan Atlanta.

English Proficiency: Applicants whose native language is not English must submit scores, not more than two years old, on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Official scores must be reported from the Educational Testing Service to IBMS prior to the application deadline. The TOEFL is not required of international applicants who have received a degree from a regionally accredited U.S. institution. TOEFL information can be found at http://www.toefl.org/. IELTS information can be found at http://www.ielts.org/. Applicants living in the Atlanta area may take the Georgia State Test of English Proficiency (GSTEP) in the place of the TOEFL. For more information about GSTEP: http://www2.gsu.edu/~wwwtep/index.html.

Financial Resources: Applicants who have been accepted and plan to attend Georgia State University on an F-1 or J-1 visa must submit a Financial Statement showing the financial support necessary for the cost associated with the first year of study. This verification does not need to be submitted with your application but will be required before you can enroll if you are accepted.

Course Load: An international student with a student visa is required to carry a full course of study in the fall and spring semesters. A full course of study for graduate students at Georgia State University is 9 semester hours in the fall and spring semesters and 6 semester hours in the summer semester. International students cannot be admitted as non-degree students.

For additional information pertaining to international applicants and students at Georgia State University, please refer to the Office of International Student and Scholar Services on the Georgia State University website at isss.gsu.edu.

9010.30 Re-entry Students
A re-entry student is a student who has been enrolled at Georgia State University and who:

1. Has not maintained an enrollment totaling 6 hours (or more) of degree applicable courses over three consecutive semesters (including summer) until degree completion; or
2. Attended any semester as a transient student and wishes to attend an additional semester as a transient student.

Re-entry is approved by application and is not guaranteed. The application deadlines are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Re-entry</td>
<td>July 15</td>
<td>December 1</td>
<td>May 1</td>
</tr>
</tbody>
</table>

Graduate students previously enrolled in the MIS Biomedical Enterprise program, may only re-enter the same graduate program or status in which they were last enrolled and they may be required to satisfy the degree requirements of the graduate catalog in effect at the time of re-entry. The Office of Academic Assistance and Career Services will notify the student of their requirements and update their program of study. Students will be required to change to the graduate catalog in effect at the time of re-entry when they re-enter the university after a period of two or more consecutive years in which they have earned no academic credit at Georgia State University. Students must be approved for re-entry through the School. Re-entry is not guaranteed, even for students previously enrolled in MIS Biomedical Enterprise program.

To apply as a re-entry student, the following items should be submitted to the Office of Academic Assistance:

- Graduate Re-entry Application (available here: http://biomedical.gsu.edu/admissions)
- $25.00 Application Fee. A check or money order (in U.S. currency) should be made payable to Georgia State University. This fee is nonrefundable.
- Resident Status Form – This form is required to determine if you are an in-state or out-of-state student for tuition purposes. Please attach it to your application
- A Certificate of Immunization (after acceptance)
- Lawful Presence Verification (after acceptance)
- Completed application materials must be mailed to the address below by the deadline date:
  Institute for Biomedical Studies
  Georgia State University
  Office of Academic Assistance and Career Services
  P.O. Box 5035 Atlanta, GA 30303-5035

9020 Graduate Enrollment

Graduate degree and certificate students in the Institute for Biomedical Sciences are responsible for knowledge of all regulations and procedures of the program and the university. Enrollment in a program constitutes a student’s acknowledgment that they are obligated to comply with all academic and administrative regulations and degree requirements. Students are encouraged to read carefully regulations related to the MIS Biomedical Enterprise program.
Summary of Georgia State University Policy on Responsible Conduct Research Training: Georgia State University is committed to promoting research ethics within the University community and modeling integrity across all disciplines and areas of empirical research. As research has become more complex, collaborative, and costly, issues of research ethics similarly have become complex, extensive and important. The federally mandated training of all levels of research students at Georgia State University in the Responsible Conduct of Research (RCR) must prepare them to face these issues in their professional lives. The Scholarship and Research Integrity (SARI) program at Georgia State University, developed in response to the America Competes Act requirements, is designed to offer students enrolled in undergraduate research, research graduate degree programs, and post-doctoral research programs comprehensive training in the RCR in a manner that is tailored to address the issues faced by students in their respective programs. As part of the commitment and policy, graduate research students and post-doctoral research fellows will be required to complete an online RCR training program provided by the Collaborative Institutional Training Initiative (CITI).

http://ursa.research.gsu.edu/ursa/responsible-conduct-in-research/

The Georgia State University IBMS has devised a RCR education program plan to be in compliance with Georgia State University’s RCR policy and to ensure IBMS students graduating from our MIS program complete the required CITI RCR training program.

9020.10 Time Limit for Completion of Degree/Graduate Certificates

Before deciding to enroll in a graduate program of this school, students must examine seriously and realistically their abilities to adjust their personal and professional schedules to accommodate the challenge of graduate study. The maximum time limits set by the faculty for completing the MIS in Biomedical Enterprise program is two years from the first semester of admission. Students or applicants with questions about the commitment needed to complete the MIS in Biomedical Enterprise program should schedule an appointment with the Institute’s Office of Academic Assistance and Career Services.

9020.20 Catalog Editions

Normally, students will be permitted to graduate under the provisions of the graduate catalog in effect at the time of first enrollment. Students may choose to graduate under the provisions of a subsequent graduate catalog; that is, they may choose to change their “catalog edition.” Students who choose to do this must meet all provisions of the subsequent graduate catalog.

Students are required to change to the current catalog edition when they change programs statuses or after certain absences from the program, as explained below in section 9020.30.

9020.30 Continuous Enrollment Requirement and Requests to Re-enter

Students in all graduate degree and graduate certificate programs must maintain an enrollment totaling six (6) hours or more of degree applicable courses over any consecutive three (3) semester period (including summers) until degree completion. In other words, the total enrollment of the current term plus the two terms preceding it must add to six (6) hours or more at all times. The status of all students will be checked by the midpoint of each term for compliance with the Continuous Enrollment Requirement. Any student
whose enrollment is out of compliance will receive a continuous enrollment registration hold preventing all current and future registration. Those students will be notified by an email message sent to their official Georgia State University email account. To resume their programs of study, students with continuous enrollment registration holds must apply for reentry admission by the published deadline (see section 9010.30), must be granted re-entry admission, and must enroll at a credit hour level sufficient to satisfy the continuous enrollment requirement. For more information on the re-entry process, see section 9010.30 or contact the Office of Academic Assistance and Career Services (OAA).

Students who do not attend the semester for which re-entry was originally required must complete a new re-entry form for subsequent semesters.

All students who wish to re-enter one of the graduate level programs or non-degree status after an absence of one year must meet the degree requirements and academic regulations of the graduate catalog current upon return, along with other reentry provisions that may be in effect.

All students who are approved for re-entry will be eligible to retain all Georgia State course credit (and already approved transfer credit, if any) earned previously if their program can be completed within the time limit that was applicable to their program before the absence. The cumulative graduate GPA calculations will include all attempts in all courses at Georgia State University. Time limits would apply.

Students who plan not to register for a particular semester but who intend to continue the program at some later semester should discuss such plans with the Graduate Advisor in order to facilitate reentry at a subsequent time. Failure to comply with this request may complicate reentry in the semester preferred. An absence from the program, whether planned or unplanned, does not exempt students from the requirement to complete the program within the appropriate time limit.

9020.35 Enrollment in Approved Courses

Students must enroll for courses that are part of the approved curriculum for the program to which they have been accepted. Students who do otherwise are subject to loss of credit and/or loss of eligibility to continue to register. Failure to register for degree applicable courses over the course of three consecutive semesters will result in unsatisfactory progress and the rules of Continuous Enrollment Requirement will apply.

9020.40 Course Load

The course load of a master’s student may vary with the circumstances of the individual student each semester. A graduate student may enroll in 1 to 15 credit hours. A full-time course of study for graduate students at Georgia State University is nine (9) credit hours in fall and spring semesters, and six (6) credit hours in summer semesters.

In determining each semester’s course load, a student must balance other time constraints (work, family, civic, and other responsibilities) with the need to make reasonable and timely progress toward completion of the program.

9020.50 Grade Point Average and Course Grade Requirements
For Master's level students, an overall institutional grade point average (GPA) of 3.0 or better must be earned to receive the MIS in Biomedical Enterprise degree. All core courses in the MIS in Biomedical Enterprise degree must be completed with a grade of B or better, and any student earning a grade of B- or below must repeat the core course. No more than six semester hours of grades less than B will be accepted for the degree in all other MIS in Biomedical Enterprise program of study courses. No grade below a C will be accepted toward the degree. The records of students who fall below the 3.00 GPA requirement for all course attempts will be reviewed for continuation in the MIS in Biomedical Enterprise program, and students may receive a scholastic warning or be scholastically dismissed from the MIS in Biomedical Enterprise program.

9020.60 Final Course Grades

The following course grades will be given as final grade options in courses taught by IBMS faculty members. Any deviations—including the availability of plus/minus grading—will be at the discretion of the individual faculty member and specifically stated in his or her syllabus.

<table>
<thead>
<tr>
<th>Final Course Letter Grade</th>
<th>Point Values</th>

9020.70 Application for Graduation

All candidates for the MIS in Biomedical Enterprise must file a formal application for graduation with the University’s Graduation Office at least two semesters in advance of the expected semester of graduation. Deadlines are published on the Georgia State University website: http://registrar.gsu.edu/graduation/. The Graduation Office will inform the Institute when the student files the application. The Institute for Biomedical Sciences will then conduct an audit and inform the student of any remaining requirements—these items will include any graduation clearance requirements. A degree will be awarded only to a student who meets the university academic, residence, and graduation clearance requirements as well as the standards of performance and academic requirements for the MIS in Biomedical Enterprise degree.

Scholastic Warning and Suspension for MIS in Biomedical Enterprise Students

Each student admitted into the MIS in Biomedical Enterprise program in the Institute for Biomedical
Sciences must maintain a minimum cumulative grade point average of 3.00. A student whose cumulative institutional grade point average falls below 3.00 at the end of a semester will be placed on Scholastic Warning. The student will be notified of this standing by the Institute for Biomedical Sciences. If a 3.00 cumulative grade point average is not achieved by the end of the next twelve semester hours or two semesters, whichever is longer, of completed course work approved by the IBMS faculty, the student will be suspended from the graduate program. Transient students must maintain a 3.00 cumulative grade point average in order to continue in that status. Transient students who do not maintain a 3.00 cumulative grade point average may be subject to scholastic exclusion.

A student may apply for reinstatement after one semester as a suspended student. Application for reinstatement must be made no later than six weeks prior to the first day of classes for the semester in which reinstatement is sought.

9030 Student Appeals Procedures

The appeals procedure for graduate students in the MIS Biomedical Enterprise Program will follow different paths, depending on the nature of the student’s appeal. The various types of situations and the appropriate appeals avenues are as follows:

9030.10 Admissions Appeals

At the graduate level, a person who wishes to appeal an admission decision first discusses the matter with the Director of the Office of Academic Assistance and Career Services (OAA) within 5 working days of the date of the denial. If the question is not settled there, a written appeal must be submitted to the OAA Director within 10 working days of the date of the denial or the date of the denial discussion with the OAA Director. (Workdays are counted as Monday through Friday except university staff holidays.) The director will present the appeal to the appropriate Admissions Committee, which will examine the facts presented. The OAA Director, on behalf of the committee, will make a recommendation to the Associate Dean for Academic Affairs. The associate dean will render a written decision to the applicant normally within 10 workdays of the date the applicant’s letter was received by the OAA Director. See Section 1100 of the Graduate Catalog for University level appeals of admission decisions.

9030.20 Petitions for Policy Waivers and Variances, and Appeals, and Student Complaints, Concerns, or Grievances

The petitions for policy waivers and variances, and appeals procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit http://enrollment.gsu.edu/assistance/ or the Student Code of Conduct online: http://codeofconduct.gsu.edu/ for details.

Student Complaints, Concerns, or Grievances

Similarly, the student complaints, concerns, or grievance procedure for students will follow different courses depending on the nature of the student’s appeal. Please refer to University Information Section 1050.80 under Polices and Disclosures in this catalog or visit http://enrollment.gsu.edu/assistance/.
9030.30 Appeal of Exclusions, Dismissals and Terminations

Terminated, dismissed or excluded graduate students with questions about their status should first discuss their situation with the Graduate Advisor in the Office of Academic Assistance and Career Services (OAA). Following this discussion, students who believe they have extenuating circumstances may submit a written appeal of their termination or exclusion to the Director of OAA. The director will review the information submitted in support of the appeal and the student’s total record. The director will then make a recommendation to the associate dean for academic affairs, who will make the decision regarding acceptance or denial of the appeal. The student will receive a written response from the school normally within 10 workdays of the date the appeal is received. (Workdays are counted as Monday through Friday except university staff holidays.)

Requests for such consideration must be submitted, in writing, to the director of OAA within 10 workdays (defined as Monday through Friday except university holidays). Students should write their appeals completely, but concisely, and include all facts germane to their case. Documentation should be provided, where possible, to substantiate statements made. Specific dates of the beginning and ending of particular problems should be included. Only circumstances described in the written and signed appeal as initially submitted will be accepted from the student; oral appeals are not permitted, nor are requests to submit additional information after the appeal has been reviewed. Appeals must be dated, signed, and include the student’s home address and telephone numbers (work and home).

Having been enrolled in too many courses relative to job requirements or other responsibilities or having continued to enroll while experiencing personal, work, or health-related problems very rarely constitutes such extenuating circumstances.

9040 Master Degree Programs

Master of Interdisciplinary Studies (MIS) in Biomedical Enterprise

Contacts:

Timothy L. Denning, Director of Graduate Studies
Yvette Hilaire, Graduate Program Coordinator

Description of the MIS in Biomedical Enterprise Program

Goals and Objectives of the MIS in Biomedical Enterprise Program

Given today’s complex challenges and the need for creative solutions, graduates with an MIS degree need to be able to adopt and use information derived from various traditional disciplines, to think logically and critically about information and new ideas, to be flexible and creative, and to work effectively with individuals from diverse backgrounds. Through interdisciplinary course work, including basic research and team-based projects, as well as experiential learning in a capstone project, graduates from our proposed program will develop the knowledge areas, skills, and strategic approaches that are necessary to make links between critical fields. Graduates will be able to enter or to return to the workforce with increased capacity to multi-task within the workplace and to interface effectively with various stakeholders.
Thus, the goals listed below are the main focus of the MIS in Biomedical Enterprise Program.

- Enable recognition of how successful work across disciplines advances knowledge and solves problems, and develop ability to conduct interdisciplinary work
- Enhance critical thinking skills with regard to cross-cutting problems, proposed interdisciplinary solutions, and their applications
- Increase knowledge of techniques used to enhance creativity
- Develop strengths in communication, from verbal, written, and presentation skills, through ethical conduct and professional dispositions in all settings
- Encourage sensitivity, understanding, teamwork, and leadership among collaborators from diverse backgrounds
- Promote high-level student and faculty engagement in emerging interdisciplinary topics
- Create job-ready graduates with professional dispositions appropriate for smooth interface between relevant fields

The faculty and staff of the Institute for Biomedical Sciences, Robinson College of Business and the College of Law are committed to providing a supportive academic environment that promotes the growth and progress of students engaged in graduate studies.

The Master of Interdisciplinary Studies (MIS) in Biomedical Enterprise program includes a minimum of thirty-six (36) semester credit hours of study at the master’s level beyond the bachelor’s degree.

The programs will combine face-to-face, hybrid, and online instruction to create newly trained graduates with knowledge points and skills sets to address today’s complex challenges at the interface of traditional disciplines. The MIS in Biomedical Enterprise curriculum will begin with a shared proseminar that helps to unify the disciplines of the program, and will conclude with a similar capstone project that provides professional readiness or transition into a subsequent program via an internship or course-based experience. To meet the interdisciplinary goals of the MIS, the Biomedical Enterprise concentration will be offered jointly by the Institute for Biomedical Sciences (IBMS), Robinson College of Business and the College of Law using a cohort model. Each participating entity will be recognized at the university for its instructional and administrative efforts.

**Faculty**

Faculty directly involved with the MIS in Biomedical Enterprise include:

**Institute for Biomedical Sciences:** Christopher Basler, Patricia Denning, Timothy Denning, Andrew Gewirtz, Sang-Moo Kang, Chunying Li, Jian-Dong Li, Didier Merlin, Richard Plemper, JoAnn Tufariello, Baozhong Wang, Zhonglin Xie, and Ming-Hui Zou

**Robinson College of Business:** Michael Jordan, Richard Welke

**College of Law:** Roberta Marie Berry, Yaniv Heled, Patricia Zettler

**College of Arts & Sciences:** John Houghton, Georg Pierce, Eric Gilbert
MIS in Biomedical Enterprise Degree Requirements

Required Core Courses (30 hours)

Electives (6 hours)

Required Core Courses
- BMSC 6000 Proseminar (2)
- BIOL 6694 Biosafety: Principles & Practice (4)
- BIOL 8550 Intro to Graduate Studies in Biology (2)
- LAW 7417 Patent Law (3)
- BIOL 6440 Biotechnology Practicum (2)
- BUSA 6090 Survey of Business Principles (3)
- ENI 7101 Organizational Entrepreneurship (3)
- ENI 8101 Enhancing Customer Value (3)
- ENI 8201 Innovating Customer Value (3)
- BMSC 6010/6020 Internship, with seminar (2)
- BMSC 6030 Capstone (3)

Electives
- 2 Law Electives (3 hours each)
- Optional Science or Business Elective (3)

Proseminar

The aim of the introductory proseminar course will be to teach interdisciplinarity as a discipline itself, with introductions to the educational philosophy behind an interdisciplinary program, discussion of historical challenges resolved through interdisciplinary approaches, and debate on “live” case studies of current issues likely to require interdisciplinary solutions. Critical thinking and creativity leading to successful problem solving are also topics for the proseminar. They are talents and skills that can be nurtured and taught in this course, e.g. by adopting new ways of framing questions, learning to challenge assumptions, combining seemingly disparate ideas, and exploring factors that stimulate or inhibit creativity. Given that communication is key to progress in any discipline, this course will also teach strategies for professional communication and productive teamwork, such as methods for gaining familiarity with team members, setting ground rules and responsibilities, avoiding common problems, and building trust. The proseminar will be delivered with a face-to-face, interactive approach, enabling instructors, guest speakers, and students to discuss and debate current issues.

Summer Internship

Given the direct links between the MIS curriculum in Biomedical Enterprise and placement in jobs in the bioscience business sector, this MIS program of study requires a summer internship in a professional environment. Numerous entities are prepared to collaborate with Georgia State to administer and host bioscience internships for our students. Thus, MIS students will have internship opportunities that range...
from start-up companies, established small businesses, and large enterprises with branch facilities in the region, to governmental research or regulatory agencies, to law firms with emphases such as patent, intellectual property, and/or health law.

In terms of internship administration, students will be assigned, supervised, and evaluated with attention to individual interests, abilities, and needs, along with expectations for high standards of conduct and productivity and intentional practices of careful matching and effective oversight. Specifically, internship sites will be identified and vetted through Legal Affairs and Risk Management at Georgia State. Mutual agreements will lead to formal posting of the internships on an on-line platform hosted by the GSU Office of Career Services, to be accessible exclusively to students in this MIS concentration. When possible, representatives from host sites will then visit the proseminar course (fall semester) to introduce their mission, approach, and internship opportunities, as well as to meet potential student interns. Subsequently (e.g. early spring semester), students will apply to specific internships using the Career Services platform. Host organizations will be able to review applications, consult with program faculty at GSU, interview candidates, and decide on intern matches no later than two months before the start dates. Legal matters related to hiring, clearance, confidentiality, intellectual property, etc., can be addressed in the two months between the match and the start dates.

During the internship, students will be required to participate in an online internship seminar course that will help monitor their experiences and productivity. The seminar instructor will have weekly contact with all interns, thereby assuring the opportunity to raise and address concerns, share best practices for maximizing internship experiences, and gauging student progress in knowledge and skill acquisition. Specific evaluation forms will be provided to internship hosts, students, and the faculty instructor of the internship seminar course. With pre-post format, the evaluations will assess student growth in practical knowledge and professional skills. Triangulation of data from three perspectives (host, student, faculty instructor) will provide deep understanding of the internship experience, which can be used to assess program effectiveness, internship host site appropriateness, and individual student success. The entire internship process will be led by the concentration directors, internship seminar instructor, and the lead program administrator in the IBMS, in collaboration with staff members in Career Services, attorneys in Legal Affairs, and directors in the Office of Risk Management at Georgia State.

Notably, the format and timing of course delivery during and after the internship are flexible and likely to occur at the outer extent of business hours. As above, the internship seminar will be largely online and in the evening, so as to avoid conflict with full-time work in the internship position. In the final semester of the program, which is scheduled to occur after the internship, the courses remaining for these MIS students can be taken in the late afternoon or evening. The program is designed intentionally in this fashion to enable internship hosts to consider hiring immediately the motivated and productive student interns from this program.

**Capstone Project**

The aim of the capstone project is to challenge students to demonstrate their abilities to solve current practical and/or academic problems by using knowledge and skills from multiple disciplines. The capstone project should result in a product that is timely and relevant for the interdisciplinary course of study and be presented to faculty members for assessment based on the value of the product or performance. The key skill sets of critical thinking, creativity, communication, and collaboration must be assessed through the
final project, and the result must be reasonable and be intellectually defensible. Faculty in conjunction with advisors from professional settings will contribute to the design, guidelines, and grading rubrics. Since the project should draw on the whole learning experience in the MIS in Biomedical Enterprise program, successful completion of the capstone project will be designed to accurately predict success of program graduates as they enter the workforce or pursue further degrees subsequent to completion of the MIS degree. Ultimately, the MIS in Biomedical Enterprise program delivery will support successful completion of the program goals described below.

This curriculum will be offered jointly by the Institute for Biomedical Sciences (IBMS), Robinson College of Business and the College of Law using a cohort model. Biotechnology uses living systems to tackle intractable problems in many domains, such as production (e.g. clean and efficient synthesis of chemicals, plastics, and enzymes; growth of food and feed), health (e.g. antibody development, RNA interference therapies, regenerative medicine), and environment (e.g. biofuels, bioremediation, biosensors). Sound business principles and creative business solutions are critical to carrying out the complex process of bringing scientific advances to production and sales for human access. In all steps from idea to global impact, legal regulations must protect intellectual property, while ensuring the quality and efficiency of work using public and private investments to support and promote innovation. Frequent monitoring and feedback can and should assure public trust and protection, while maximizing investment and productivity. Therefore, the presently proposed MIS in Biomedical Enterprise sits at the crossroads of science, business, and law, poised to provide the various skill sets necessary to devise new innovations and bring them to market legally and ethically.

Bioscience industry executives suggest the need for scientists with understanding and skills related not only to the scientific method, but also to business practices and regulatory laws. Interdisciplinary programs are needed to integrate entrepreneurship and legal studies with basic science course content to create a new kind of flexibly-trained professional, with interdisciplinary preparation that can bridge gaps between the sciences and industry challenges. Graduates will be prepared to contribute not only to scientific advance but also to the entrepreneurial initiatives of their companies, academic institutions, or governmental entities. This program will specifically prepare its graduates for positions in the following professional tracks in the biomedical enterprise: research science and technical services, marketing, quality assurance/quality control (QA/QC), development and entrepreneurship, clinical trials, management and administration. With these outcomes in mind, applications will be solicited from individuals with existing backgrounds in basic science (e.g. biology, bioinformatics, chemistry, physics, or neuroscience, including successful laboratory course work and/or work experience), and who also have the interest and motivation to advance their skills with bioinstrumentation and to expand their knowledge base to business and the law.

By the end of the program, MIS graduates with a concentration in Biomedical Enterprise will acquire knowledge and skills as listed below, and master the professional preparation areas below.

**Knowledge and Skills**

- Current, relevant, and confident understanding of the opportunities and challenges existing at the intersection of biotechnology, entrepreneurship, and legal affairs.
- Up-to-date knowledge of biological systems in one or more of the following areas of focus: genetics, proteomics, cell biology, microbiology, immunology, virology, bioinformatics, neuroscience, or pharmacology.
- Experience with state-of-the-art equipment and instrumentation relevant for biotechnology research.
and development, such as genomics, proteomics, NextGen sequencing, flow cytometry, real time PCR, imaging and confocal microscopy, atomic force microscopy, and mass spectrophotometry.

- Ability to identify and participate in legal and ethical laboratory practices, project management, product testing, quality control, and marketing.
- Critical thinking, problem-solving, quantitative, and communication skills applicable to all domains in Biotechnology Enterprise.

Program Goals in Professional Preparation

- Create a new cadre of specialized scientists and practitioners ideally trained to enter or return to the state, national, and international biotechnology workforce.
- Provide an environment for preparing students and professionals to participate in a broad-based and evolving economy in biotechnology, including pharmaceuticals, diagnostics, medical devices, and preclinical or clinical research.
- Develop strengths in communication, from verbal, written, and presentation skills, through ethical conduct and professional dispositions in all settings.
- Promote creativity, teamwork, and leadership through interactive courses and real-world experience.
- Increase the number of individuals from diverse backgrounds who excel at the intersection of biotechnology, entrepreneurship, and law.
Appendix I Course Descriptions

Graduate courses offered by Georgia State University are listed in this section in alphabetical prefix order and course name.

Course Subjects

AAS African-American Studies
ACCT Accounting
AE Art Education
AH Art History
AL Applied Linguistics
ANTH Anthropology
ART Art
AS Actuarial Science
ASTR Astronomy
BA Business Administration
BCOM Business Communication
BIOL Biology
BMSC Biomedical Sciences
BUSA Business Administration – BUSA
CER Ceramics
CHEM Chemistry
CIS Computer Information Systems
COMM Communication
CPI Center Processing Innovation
CPS Counseling & Psychological Services
CRJU Criminal Justice
CSC Computer Science
CSD Communication & Science Disorders
DP Drawing and Painting
ECE Early Childhood Education
ECON Economics
EDB Executive Doctorate in Business
EDCI Education/Curriculum and Instruction
EDLA Language Arts Education
EDMT Mathematics Education
EDRD Reading Education
EDSC Science Education
EDSS Social Studies Education
EDUC Education
EMBA Executive Master of Business Administration
ENGL English
ENI Entrepreneurship Minor
EPEL EPS/Educational Leadership
EPHE EPS/Higher Education
EPRS EPS/Research
EPS Educational Policy Studies
EPSF EPS/Social Foundations
EPY Educational Psychology
ESL English as a Second Language
EXC Exceptional Children
FI Finance
FOLK Folklore
FORL Foreign Language
FREN French
GEOS Geosciences
GERO Gerontology

Computer Skills Prerequisites (CSP)

Some courses offered by the Robinson College of Business require any student who enrolls in that course to be proficient with certain computer skills. For a complete description of CSP requirements, please refer to the “J. Mack Robinson College of Business” chapter of this catalog (see section 7000).

Corequisites

A corequisite identifies another course or courses that should be taken concurrently with the listed course. A student who enrolls in a listed course with corequisites must also enroll in those corequisite courses. A student who has previously completed a corequisite course may not need to repeat it; he or she should consult with an academic adviser before registering to determine specific requirements.

Course Credit Hours
The total semester hours of credit for each course are shown in parentheses immediately following the course title.

Prerequisites

A prerequisite identifies a course or other requirements that a student must have completed successfully before enrolling in the listed course. Any student who has not met prerequisites for a course may be administratively withdrawn from that course at the discretion of the instructor. It is the policy of some university departments to withdraw automatically any student who enrolls in a course without first meeting its prerequisites.
ACCT ACCOUNTING

ACCT 8005  Current Issues in Accounting
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 2, 6
DESCRIPTION  This course will cover current issues in accounting. Issues will be drawn from a wide range of current issues that do not necessarily require or allow an entire semester of study and will pertain to assorted accounting areas, e.g., financial reporting and analysis, internal auditing, forensic accounting, government and not-for-profit accounting, assurance services, cost measurement and control, taxation, performance measurement and control, and governance. May be repeated for credit.

ACCT 8010  Financial Accounting 1
CREDIT HOURS  3.0
PREREQUISITES  Graduate or Undergraduate degree in bus other than AC; ACCT 2101 or MBA 8025 and, ACCT 2102 or MBA 8115.
REQUIREMENTS  CSP: 1, 2, 6, 7
DESCRIPTION  Students will learn the financial reporting environment, the conceptual framework, the financial accounting process, preparation of financial statements, income measurement, and asset valuation.

ACCT 8020  Financial Accounting II
CREDIT HOURS  3.0
PREREQUISITES  ACCT 8010
REQUIREMENTS  CSP 1, 2, 6, 7
DESCRIPTION  Students will learn the valuation of liabilities and investments, reporting of stockholders' equity, accounting for income taxes, postemployment benefits, leases, changes and errors, and preparation of statement of cash flows with complex transactions.

ACCT 8030  Managerial and Accounting Information Systems
CREDIT HOURS  3.0
PREREQUISITES  Graduate or Undergraduate degree in bus other than AC; ACCT 2101 or MBA 8025, and ACCT 2102 or MBA 8115.
REQUIREMENTS  CSP 1, 2, 4, 6, 7
DESCRIPTION  This course examines a wide range of fundamental managerial techniques used by companies for tracking and reporting internal operations. In particular, it focuses on techniques for costing and evaluating products, services, programs, projects, departments and other operational units. The primary emphasis is on developing the needed understanding, insights and skills for capturing, analyzing and applying internal accounting data in order to make optimum managerial-level, cost-related decisions and appropriate managerial performance evaluations. In addition, students are expected to develop analytical skills necessary for evaluating alternative designs of control systems.

ACCT 8040  Topics in Federal Taxation
CREDIT HOURS  3.0
PREREQUISITES  ACCT 8020, with grade of C- or higher
REQUIREMENTS  CSP: 1, 2, 6, 7
DESCRIPTION  This course introduces students to the federal tax concepts applicable to individuals, sole proprietorships, partnerships, corporations, estates, and trusts. In particular, it focuses on developing a professional level of problem-solving skills and critical thinking as well as oral and written communications. Emphasis is placed on differences between tax and financial accounting concepts. In addition, students are exposed to accounting periods and methods, deferred compensation, tax planning, ethical practices, and tax research.
ACCT 8050  Assurance and Information Systems Control
CREDIT HOURS  3.0
PREREQUISITES  ACCT 8020, with a minimum grade of C-
REQUIREMENTS  CSP: 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION  This course develops students knowledge of Accounting Information Systems (AIS) and auditing the AIS focusing on both the processes of the AIS and the evaluation of accounting information. Topics include choosing, extracting and analyzing information to solve business problems, the ethical responsibilities the accountants, evidence accumulation and evaluation, materiality, risk assessment and control of the processes, and legal responsibilities. The course emphasizes the utilization of technology tools in business environments.

ACCT 8090  International Accounting Practices
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4113, with a minimum grade of C-
REQUIREMENTS  CSP: 1, 2, 4, 6, 7
DESCRIPTION  This course provides a detailed examination of International Financial Reporting Standards (IFRS) and their application. It identifies differences between IFRS and Generally Accepted Accounting Principles and analyzes the implications of those differences. It also offers a framework for identifying and analyzing national differences in the applications of IFRS.

ACCT 8060  Financial Accounting in Governmental and Nonprofit Organizations
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4113, with a minimum grade of C-
REQUIREMENTS  CSP: 1, 2, 4, 6, 7
DESCRIPTION  This course provides an indepth study of financial reporting principles and theory used by governmental and nonprofit organizations. Analysis and interpretation of these organizations financial statements is an integral part of the course.

ACCT 8120  Advanced Federal Taxation
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4510 or ACCT 8040, with a minimum grade of C-
REQUIREMENTS  CSP: 1, 2, 6, 7
DESCRIPTION  Same as TX 8020. Students may not receive credit for both TX 8020 and ACCT 8120. This course provides an in depth study of the federal tax law applicable to sole proprietorships, partnerships, corporations, estates, and trusts. In addition, this course introduces students to topics such as the alternative minimum tax, international tax, state and local tax, employee compensation, related party transactions, and tax exempt entities. Some time also is devoted to tax planning, ethical practices, taxation of crossborder business transactions, and tax research.
ACCT 8130  Advanced Accounting Topics
CREDIT HOURS 3.0
PREREQUISITES ACCT 4113 or ACCT 8020, with a minimum grade of C-
REQUIREMENTS CSP: 1, 2, 3, 6, 7
DESCRIPTION This course provides a study of accounting topics related to business mergers and acquisitions, international accounting and foreign currency issues, and other current topics of financial reporting.

ACCT 8310  Seminar in Management Accounting Systems
CREDIT HOURS 3.0
PREREQUISITES ACCT 4310 or MBA 8115 or CIS 3300 and CIS 3730 and ACCT 2101 and ACCT 2102
REQUIREMENTS CSP: 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION This course focuses on inventory management issues including the cost and revenue implications and managing uncertainties in the demand and supply arenas. Students will analyze issues related to distribution management, revenue generation under supply constraints and the importance of supplier alliances and outsourcing of core products and services. The importance of information flow and strategic decision making under these conditions will be discussed.

ACCT 8389  Directed Readings in Accounting
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES Consent of the instructor, good academic standing
DESCRIPTION

ACCT 8391  Field Study in Accounting
CREDIT HOURS 3.0
PREREQUISITES MPA or MBA student with a 2.7 or higher GPA, accounting internship, consent of instructor
REQUIREMENTS (May be repeated once.) CSP: 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION The purpose of this class is to provide course credit for students enrolled in the MPA or MBA program who have an accounting internship. Students are required to submit weekly journals describing their internship experience and a paper at the end of the semester. The topic for the paper has to be approved by the instructor. Students can register for this class only with the consent of the instructor.

ACCT 8410  Seminar in Financial Accounting Theory and Policy
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES ACCT 4113 or ACCT 8020, with a minimum grade of C-
REQUIREMENTS CSP: None
DESCRIPTION This course provides an overview of financial accounting theory and policy with the aim of helping to increase students' understanding and analytical abilities in this complex area. Current and proposed financial accounting standards are analyzed. Major elements of both normative and positive accounting theories are identified and related to the practice of accounting and standard setting. This type of analysis helps to establish an appreciation of the impact of accounting theory on practice and policy.
ACCT 8420  Special Topics in Financial Accounting
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4113 or ACCT 8020, with a minimum grade of C-
DESCRIPTION  This course will cover advanced financial accounting issues such as those related to off-balance-sheet financing, segment and interim reporting, foreign currency transactions, translation of foreign currency financial statements, operation of the SEC, issues related to the adoption of IFRS in the US, accounting for reorganizations and liquidations, and accounting for estates and trusts. The course will also cover why and how managers manage earnings and critically examine a recently passed or proposed financial accounting standard.

ACCT 8610  Advanced Topics in Assurance Services
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4310, ACCT 4610, both with a minimum grades of C-
REQUIREMENTS  CSP: 1, 2, 4, 6, 7
DESCRIPTION  This course covers auditing and assurance topics in depth from professional and research perspectives. The topics include audit judgment research, substantive testing research, fraud, going concern judgments, attestation engagements, international auditing, professional ethics, and litigation issues. Topics of current interest, especially those related to assurance services in an e-business environment and the development of international auditing standards, are also covered.

ACCT 8630  Information Technology Auditing
CREDIT HOURS  3.0
PREREQUISITES  ACCT 4610 or CIS 8000 or MBA 8125
REQUIREMENTS  CSP: 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION  This course focuses on the knowledge and skills required for practice of IT auditing in the post-Sarbanes-Oxley world in which internal control is assessed in financial audits. The course covers assessment of internal control in technology-intensive settings, continuous monitoring and auditing of applications, and auditing of system development. Students work through audit simulations to develop IT audit expertise.

ACCT 8660  Study Abroad: International Accounting
CREDIT HOURS  3.0
PREREQUISITES  None; Consent of instructor
REQUIREMENTS  CSP: 1, 2, 6, 7, 8
DESCRIPTION  This course analyzes the impact of cultural, economic, and other factors on the practice of accounting and taxation. Concepts and practices of business strategy, asset allocation, transfer pricing, business valuation, and other concerns are examined as they relate to the U.S. and host countries. This is accomplished in part through classroom or web discussions of the various issues. The main portion of the learning process is completed through travel with faculty members to the host countries. The students interview and consult with business managers, accounting professionals, academicians, and tax officials in that country.

AS ACTUARIAL SCIENCE

AS 8340  Life Contingencies
CREDIT HOURS  3.0
PREREQUISITES  None
COREQUISITES  AS 4230
REQUIREMENTS  CSP: 2
DESCRIPTION  This course is an introduction to life contingencies as applied in actuarial practice. Topics include present value random variables for contingent annuities and insurance, their distributions and actuarial present values, equivalence principle, and other principles for determining premiums.

AS 8350  Insurance Mathematics
CREDIT HOURS  3.0
PREREQUISITES  AS 8340
DESCRIPTION  This course consists of life insurance as well as non-life insurance mathematics. Topics include insurance and annuity reserves, characterization of discrete and continuous multiple decrement models, paid and incurred loss development, loss reporting and settlement delay.

AS 8389  Directed Readings in Actuarial Science
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  Consent of the instructor, good academic standing
DESCRIPTION

AS 8430  Loss Distributions and Credibility Theory
CREDIT HOURS  3.0
PREREQUISITES  MRM 8320
REQUIREMENTS  CSP: 2
DESCRIPTION  This course provides an introduction to fitting and validating actuarial models, including estimating loss distributions and applying credibility theory, tests of goodness-of-fit for frequency and severity distributions, and credibility of information obtained from various sources.

AS 8810  Actuarial Science Graduate Seminar
CREDIT HOURS  3.0
PREREQUISITES  AS 8340
REQUIREMENTS  CSP: 2, 7
DESCRIPTION  This course introduces the student to the practical considerations of actuarial modeling taught through a seminar format. The interactive approach of the seminar requires students to draw upon knowledge from the basic actuarial courses and learn modeling skills in a hands-on environment. This course emphasizes communication skills, teamwork, and synthesis of subjects in an applied setting. Professional standards applicable to actuarial work are reviewed.

AAS 6042  Diversity and Aging  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as GERO 8124 and SOCI 8124.) A broad overview of aging within the framework of race and ethnicity in American society. Major issues include minority aging research methodology; theories of ethnicity and aging; and life-course, "life-chance," and socialization differences among older adults attributable to race, ethnicity, and/or minority status.

AAS 6044  African-American Anthropology  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as ANTH 6280.) Major writings in the field of African-American Studies; theories, categories, and methods used in studying complex societies are brought to bear upon literature; and the use of ethnographies to provide a comparative perspective for understanding African-American cultures.

AAS 6050  African Social Movements  
CREDIT HOURS  3.0  
DESCRIPTION  An examination of selected social movements in Africa from the end of the 19th century to present.

AAS 6052  Africana Women and Socio Political Change  
CREDIT HOURS  3.0  
DESCRIPTION  An examination of gender and power relationships in the Africana World.

AAS 6055  African Politics  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as POLS 8235.) Comparative theoretical analysis of the politics of Sub-Saharan African countries.

AAS 6056  Geography of Africa  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as Geog 402.) An overview of the physical, economic, and cultural geography of Africa, including North Africa. Emphasis on relationships between Africa's resources, both human and physical, and the development process.

AAS 6060  African Art  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as AH 6000.) Survey of the sculpture, architecture, textiles, body ornament, and performance arts of Africa in terms of form, meaning, and function within society. Objects reintegrated into cultural contexts and examined in light of "tradition" and social and political change.

AAS 6062  Contemporary African Art  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as AH 6030.) Arts and artists of Africa during the colonial and post-colonial eras. Social, political, economic, and cultural frameworks explore shifting notions of tradition, authenticity, and identity as they relate to art, artists, and audiences.

AAS 6063  Art of Egypt, Nubia & Maghrib  
CREDIT HOURS  3.0  
DESCRIPTION  (Same as AH 6010.) Introduction to the arts of North Africa. Painting, sculpture, architecture, ceramics, textiles, and metal arts. Objects and monuments are examined within a cultural and historical framework.

AAS 6065  Black Visual Representation  
CREDIT HOURS  3.0  
DESCRIPTION  The Iconography of the African Diaspora. This course will use interdisciplinary methods to study racialized iconic figures, the production of their images, and their impact across the world.
AAS 6070  African-American Literary Theory
CREDIT HOURS  3.0
PREREQUISITES One undergraduate course in African-American Literature
DESCRIPTION This course explores the history and trends in African-American literary criticism from eighteenth century to the present.

AAS 6073  19th Century African-American Literature
CREDIT HOURS  3.0

AAS 6075  20th Century African-American Literature
CREDIT HOURS  3.0
DESCRIPTION (Same as ENGL 8880.) The study of one or more major twentieth century African-American writers and the study of the theoretical issues surrounding African-American literature.

AAS 6079  African-American Language
CREDIT HOURS  3.0
DESCRIPTION (Same as ENGL 8245.) Examines the cultural and linguistic characteristics which define and connote language use among people of African-American descent in America. Includes history and theories of origin and development. Analysis of grammar, lexicon, and discourse, and studies of issues surrounding language variation in America.

AAS 6080  The Black Arts Movement
CREDIT HOURS  3.0
DESCRIPTION Examines the Black Arts Movement in its many manifestations including music, literature, theater, and the graphic arts of the period.

AAS 6082  African-American Art
CREDIT HOURS  3.0
DESCRIPTION (Same as AH 6620.) Aesthetic expression of African-American artists from colonial times to present. Social, cultural, and creative history of Black America. Diverse contributions made by artists of African descent to the development of American culture, the relationship of art to politics, and formation of racial/cultural identity.

AAS 6090  African-American Religion
CREDIT HOURS  3.0
DESCRIPTION (Same as RELS 6250.) Survey of the development of African-American religion from colonial times to the present, including an examination of both theological arguments and spiritual experiences.

AAS 6095  Race, Class and Gender in Contemporary South Africa
CREDIT HOURS  3.0
DESCRIPTION (Same as AAS 4975.) In this course students learn how class, gender and racial categories have impacted the lives of South Africans.

AAS 6999  Directed Readings
CREDIT HOURS  1.0 TO 9.0
DESCRIPTION A student must have a GPA of 3.0 to be eligible for directed readings.

AAS 8980  Non-Thesis Research

MSA 8000  Consumer and Managerial Decision Making

CREDIT HOURS  3.0

DESCRIPTION
Prequisites: ECON 2105 AND ECON 2106 or MBA 7035. This course presents a microeconomic framework of consumer and managerial decisions from which analytically informed strategies can be developed. The first part presents a model of consumer preferences and how individuals make purchasing choices for products or services. Topics include preferences and utility theory, demand analysis, and the impact uncertainty and incomplete information have on consumer decisions. The second part extends the theory of individual choice to corporate managerial decision-making. Topics covered include risk and return analysis, cost of capital, project selection, and capital budgeting techniques. Illustrative applications using large data will be included as necessary.

MSA 8010  Data Programming for Analytic

CREDIT HOURS  3.0

PREREQUISITES  MRM 8000

DESCRIPTION
This course builds upon the student's foundation of programming principles through the introduction of application programming for data analysis. Major areas covered include inheritance and polymorphism, common programming data structures, and file and database access. Students will implement data analysis applications, which will be evaluated according to advanced programming principles. The programming language will be noted in the course listing for each semester.

MSA 8050  Unstructured Data Management

CREDIT HOURS  3.0

PREREQUISITES  CIS 8040

DESCRIPTION
This course addresses the unstructured data management skills needed for modern data analysis including those salient to big data and real-time data environments. The focus is on unstructured data and its environment. Unstructured data includes web data (blogs, text), user generated content, social media, location-aware data, and digital media among others. Topics covered include extraction methods for real time audio and video data, data capture, cleaning, representation, storage, queries, manipulation, and real-time data management. Also included as they apply to unstructured data environment are data security, governance, and visualization. Students will learn natural language processing and geo-spatial analytical tools.

MSA 8100  Operations Research Models and Methods

CREDIT HOURS  3.0

PREREQUISITES  MSA 8190 or MRM 8000

DESCRIPTION
The focus of this course is operations research (OR) as a discipline of applying advanced analytical methods to help make better business decisions. It introduces formulation, solution techniques, and sensitivity analysis for optimization problems that include linear, integer, network flow, non-linear and dynamic programs such as traditional LP/ILP/MILP models, transportation and network models. Students are exposed to multidisciplinary applications from areas including but not limited to logistics, manufacturing, transportation, marketing, project management, health care, urban planning, and finance. Students use software packages to solve linear, integer, and network problems.

<td>None</td>
<td>The course covers basic probability and mathematical statistical theory, and provides a basic introduction to linear models, with an eye on application. The course starts with a primer on linear algebra, discussing the solution of linear equation systems, the rank of a matrix, determinants, eigenanalysis, and diagonalization; and basic probability theory, including probability spaces, dependence, random variables, (conditional) expectations, and sampling. It continues with the introduction of discrete and continuous distributions, and basic statistical theory of estimation and inference. Topics include consistency, unbiasedness, efficiency, maximum likelihood estimation, central limit theorem, confidence intervals, and hypothesis testing.</td>
</tr>
<tr>
<td>MSA 8200</td>
<td>Econometric Modeling for Analytics</td>
<td>3.0</td>
<td>MSA 8190 or consent of the instructor</td>
<td>This course introduces students to econometric methods used in business analytics with a focus on real-world applications and datasets. The course covers two primary topics: econometric methods for panel data including how to account for basic heterogeneity effects; the most important models used for the analysis of time series including estimation and inference methods for univariate and vector auto-regressive models. After discussing these models in the classical context, the course revisits them using Bayesian methods with a focus on issues of parameter and model uncertainty. The course closes with a discussion of state-space models and Kalman filtering.</td>
</tr>
<tr>
<td>MSA 8300</td>
<td>Value Through Analytics: Model Deployment and Life Cycle Mgmt</td>
<td>3.0</td>
<td>MGS 8040</td>
<td>This course serves as a practicum to apply aspects of the life cycle of a predictive model with real data. Students review all phases of the cycle to identify the need for models based on the business situation, define the appropriate inputs to the model, identify sources of data, and prepare data for modeling. They develop and validate the model, and discuss strategies for deployment. They develop and put in place processes for testing and monitoring the quality of the models to ensure optimal performance. Champion/challenger strategies and standardized as well as custom monitoring reports are discussed. As models degrade over time, strategies for updating and replacing models and assessing the business benefit over time will be addressed to complete the model life cycle.</td>

<td>ANTH 6020</td>
<td>Anthropological Theory</td>
<td>4.0</td>
<td>ANTH 2020 or consent of instructor</td>
<td>Historical treatment of the major theoretical trends in anthropology.</td>
</tr>
<tr>
<td>ANTH 6040</td>
<td>Race, Class, and Gender in Global Perspective</td>
<td>3.0</td>
<td></td>
<td>Exploration of the various ways that perceptions and designations of race, class, and gender intersect with each other and shape the human experience. This includes an analysis how categories of class, ethnicity, and gender affect daily life for people in multiethnic, stratified societies, particularly in terms of how inequities of access to wealth, power, and resources have emerged on global and local levels. Structural violence is an important theme of many of the readings in the class. The idea of race as a social construct rather than a biological phenomenon is another key topic. We will examine how gender identity and gender roles are shaped by culture. Globalization and immigration, and their relationship to gender, race, and class, are foci of the latter part of the course.</td>
</tr>
<tr>
<td>ANTH 6060</td>
<td>Environmental Anthropology</td>
<td>3.0</td>
<td>ANTH 1102, ANTH 2010, ANTH 2020, or ANTH 2030 with grade of C or higher, or consent of instructor</td>
<td>During this course we will examine how humans interact with and are influenced by environmental resources, as well as how our actions impact natural resources and ecological systems. Human populations and cultural groups are therefore (re)situated in nature. To explore environmental anthropology as a subfield, the course is structured as a survey of the discipline, examining topics such as historical ecology, population ecology, cultural constructions of &quot;nature,&quot; the anthropology of environmentalism, political ecology, and global environmental issues.</td>
</tr>
<tr>
<td>ANTH 6070</td>
<td>Ethnobotany</td>
<td>3.0</td>
<td></td>
<td>Ethnobotany is the study of the use of plants by humans. This course provides an overview of the field of ethnobotany and its methods. Students will explore how ethnobotanists collect, analyze, and interpret data and will learn some of the applications of ethnobotany outside of an academic setting.</td>
</tr>
<tr>
<td>ANTH 6080</td>
<td>Consumption and Material Culture</td>
<td>3.0</td>
<td>ANTH 2020 or consent of instructor</td>
<td>This course examines anthropological approaches to material culture and consumption: the practices, relations, and rituals through which things &quot;from food and clothing to shell valuables or money&quot; become meaningful and are used in the organization of social life. Readings include classic works of anthropology and social theory as well as recent ethnographies of western capitalist, colonial/postcolonial and postsocialist settings.</td>

<tr>
<td>ANTH 6140</td>
<td>European Prehistory</td>
<td>3.0</td>
<td>ANTH 2030 or consent of instructor</td>
<td>This course is a survey of the prehistory of Europe from the Paleolithic period until the Roman conquest. Because of the temporal and geographic variability of Europe this survey is selective, focusing on major transitions and themes (e.g., subsistence adaptations, island settlement, trade, technology, the emergence of social complexity, early states, and so forth) and using specific examples (case studies) of regions or sites to highlight them.</td>
</tr>
<tr>
<td>ANTH 6150</td>
<td>Museum Anthropology</td>
<td>3.0</td>
<td>Grade of B or higher in ANTH 2010, ANTH 2020, or ANTH 2030</td>
<td>Museums provide a critical intersection between academic research and the public. This course critiques the mission of museums in a global world and explores how knowledge is conveyed through objects, and how museums can disseminate complex ideas to diverse audiences in accessible and inclusive ways. This course considers the role of museums in identity construction at local, national, and supra-national levels. 3.00 Credit hours.</td>
</tr>
<tr>
<td>ANTH 6170</td>
<td>Mesoamerican Archaeology</td>
<td>3.0</td>
<td>ANTH 2030 or consent of instructor</td>
<td>This course highlights some of the major cultural achievements of Mesoamerican peoples. The class begins with the peopling of the New World over 10,000 years ago and proceeds to cover the origins of agriculture and the development of complex societies from the Olmec to the Aztec. The course draws from the rich iconographic, epigraphic, and archaeological data of the region to explore concepts and specific sites up until the time of Spanish Contact, A.D. 1521.</td>
</tr>
</tbody>
</table>
ANTH 6180  
Archaeology of Southeastern United States  
CREDIT HOURS 4.0  
PREREQUISITES ANTH 2030 or consent of the instructor  
DESCRIPTION The appearance of the earliest inhabitants of the Southeast, the development of complex societies, the effects of Europeans on indigenous culture, and the archaeology of the historic period. Students will be required to participate in three field trips.

ANTH 6190  
Archaeological Practice and the Public  
CREDIT HOURS 3.0  
PREREQUISITES ANTH 2030 or consent of instructor  
DESCRIPTION This course on Public Archaeology covers a great number of fields where professional archaeologists work with public interests, upholding legislation designed to conserve ancient sites and artifacts, managing museum collections, presenting the past to the public, working with developers to reduce the impact of building and construction projects on the remains of the past. At the same time Public Archaeology covers the general public's interest in the archaeological past: from fakes and illicit trade of antiquities to Indiana Jones, to the search for Atlantis.

ANTH 6200  
Urban Anthropology  
CREDIT HOURS 4.0  
PREREQUISITES ANTH 2020 or consent of the instructor  
DESCRIPTION Urban space and social stratification; theories of space, place, and identity; the city in the social imaginary.

ANTH 6210  
The Anthropology of Europe  
CREDIT HOURS 3.0  
DESCRIPTION Cross-listed with ANTH 4210. This course exposes students to ethnographic research among peoples of Europe, with a focus on Mediterranean Europe, particularly Portugal, Italy, Greece, and Spain (FIGS) as member states of the European Union (EU), and as nations in crisis.

ANTH 6240  
Food: History, Ecology, and Political Economy  
CREDIT HOURS 3.0  
PREREQUISITES ANTH 2010 or ANTH 2020, or instructor's consent  
DESCRIPTION Explores the cultural histories of foods or types of food that have had major impacts on global political economy, ecology, and culture from the 14th century to present day.

ANTH 6300  
Human Evolution  
CREDIT HOURS 3.0  
DESCRIPTION Principles and mechanisms of hominid evolution.

ANTH 6310  
Human Variation  
CREDIT HOURS 4.0  
PREREQUISITES ANTH 1102 or ANTH 2010 or consent of instructor  
DESCRIPTION Variation within and between human populations: morphology, gene frequencies and behavior. Biological concepts of race, race classification, and evolutionary processes acting on humans in the past, present, and future.

ANTH 6330  
Primate Behavioral Ecology  
CREDIT HOURS 3.0  
DESCRIPTION Examination of the diversity of free-ranging primates in their natural habitats. Ecological factors affecting diet, locomotor repertoires, body size, and the evolution of social behavior will be emphasized.

</tr>
<tr>
<td>ANTH 6490</td>
<td>The Anthropology of Globalization</td>
<td>4.0</td>
<td>ANTH 2020 with grade of C or higher</td>
<td>This course critically analyzes the concept of globalization by examining the various components that are often invoked in defining/discussing the concept and the current world structure. We will explicitly examine the anthropological components of globalization and determine the manner in which it shapes culture, constructions of identity, restrictions of the body, distributions of economic and natural resources, intercultural contact, and patterns of global inequality.</td>
</tr>
<tr>
<td>ANTH 6520</td>
<td>Anthropology of Public Culture</td>
<td>4.0</td>
<td>ANTH 2020 or consent of instructor</td>
<td>The circulation of commodities, ideas, and practices that produce the condition of being public (and in public) as well as the notion and experience of privacy. Analyzes the production and usage of public and private space (e.g. plazas, malls, homes), museum displays, the social life of commodities (e.g. fashion, antiquities, collectibles), and the role of theatricality in everyday life.</td>
</tr>
<tr>
<td>ANTH 6530</td>
<td>The Archaeology of Ancient Cities</td>
<td>3.0</td>
<td></td>
<td>Cross-listed (undergraduate section: ANTH 4530) Target Student Groups: Anthropology Majors and Graduate Students. Summary of course activities/topics: This course provides an archaeological perspective to help us better understand the historical trajectory of cities cross-culturally. Through critical evaluation of archaeological research on ancient cities, students will come to understand the dramatic impact of cities on human populations across the globe.</td>
</tr>
</tbody>
</table>
ANTH 6550  Field School in Anthropology  
CREDIT HOURS  4.0 TO 8.0  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Anthropological field methods. Students will develop skills in ethnographic, archaeological, and biological methods through field projects. Emphasis will be on providing a holistic interpretation of conditions at the field location.

ANTH 6560  Advanced Field School in Anthropology  
CREDIT HOURS  4.0 TO 8.0  
PREREQUISITES  ANTH 4550 or consent of instructor  
DESCRIPTION  Advanced anthropological field methods. Students expand upon the ethnographic, archaeological, linguistic, and/or biological methods learned in ANTH 6550 through supervised development and completion of their own professional research project.

ANTH 6590  Archaeological Methods  
CREDIT HOURS  4.0  
PREREQUISITES  ANTH 2030 or consent of the instructor  
DESCRIPTION  Data recovery techniques, analytic methods, and theoretical concepts. Experience with archaeological materials.

ANTH 6600  Archaeological Theory  
CREDIT HOURS  4.0  
PREREQUISITES  ANTH 2030 with grade of C or higher or consent of instructor  
DESCRIPTION  Review of the history of theory in anthropological archaeology, followed by a comprehensive overview of the state of contemporary theory and new theoretical directions in the discipline.

ANTH 6670  Research Methods in Sociocultural Anthropology  
CREDIT HOURS  3.0  
PREREQUISITES  ANTH 2020 with grade of C or higher  
DESCRIPTION  Examines various research approaches that constitute sociocultural anthropology. This course dissolves the divisions between qualitative and quantitative research to form an inclusive research methodology. Topics covered include qualitative and quantitative approaches, history of research methodology, defining a population, coding, modeling, social impact analysis, and linguistic and cognitive research.

ANTH 6850  GSU Exchange and Non-GSU Study Abroad  
CREDIT HOURS  3.0 TO 9.0  
PREREQUISITES  Permission of faculty member in the Department of Anthropology at GSU  
DESCRIPTION  This course provides students with an opportunity to receive Anthropology credit hours in a study abroad program or field school, including GSU exchange programs (but not GSU faculty-led study abroad programs) and non-GSU programs. Students may receive credit for programs that involve travel to a society overseas that exposes them to anthropological perspectives and methods of studying and interpreting different ways of life and that provides them with experience in anthropological methods.

ANTH 6980  Selected Topics  
CREDIT HOURS  1.0 TO 3.0  
PREREQUISITES  ANTH 2020 or consent of the instructor  
DESCRIPTION  May be repeated if topics are different.
ANTH 8000  Anthropological Theory and Praxis
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Principal intellectual trends and debates in historical and contemporary anthropological thought and praxis. Emphasis on demonstrating the manifold interconnections, and erasing the conceptual divides, between academic and applied anthropology.

ANTH 8010  Qualitative Methods in Anthropology
CREDIT HOURS 3.0
DESCRIPTION Advanced study in ethnographic research design, data collection and management, analysis, and application. Special emphasis is placed on applied anthropological research methods relative to community intervention, policy formation, and program evaluation in the public and private sectors.

ANTH 8020  Graduate Professionalization Seminar
CREDIT HOURS 1.0
PREREQUISITES Limited to graduate students in Anthropology unless otherwise permitted by instructor
DESCRIPTION This weekly seminar centers on graduate-level topics and skills in anthropology. Its primary aim is to provide a well-rounded supplement to the core graduate curriculum: to give graduate students a space in which to benefit from their peers and from scholars in GSU anthropology, GSU departments in related fields, or elsewhere in the greater Atlanta area. The course will include discussion of selected articles and book chapters from areas of interest; practice presentations of conference posters or defenses by interested students; invited guest lectures by local scholars; tutorials in literature research and other skills; and similar.

ANTH 8030  Research Seminar
CREDIT HOURS 3.0
PREREQUISITES ANTH 8000
DESCRIPTION Keystone course to prepare students to properly design and execute their internship and thesis research projects. Readings, lectures, discussions, and site visits will address the many challenges in conducting applied anthropological research.

ANTH 8040  Seminar in Anthropology
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION Advanced topics in anthropology that vary each offering; may be taken more than once when topics differ.

ANTH 8050  Seminar in Applied Anthropology
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Advanced topics in applied anthropology. May be repeated if topics vary.

ANTH 8060  Writing Seminar in Anthropology
CREDIT HOURS 3.0
DESCRIPTION This course is to support third semester MA students in the process of taking comps and to assist graduating students as they write their MA thesis and practicum papers.

ANTH 8065  Non-thesis research
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION For graduate lab assistant (GLA) or graduate research assistant (GRA) students only.

</table>
AL 8520  Psycholinguistics
CREDIT HOURS  3.0
DESCRIPTION  A broad introduction to psycholinguistics at the graduate level, covering general methodology for the study of psycholinguistics, the nature of language, biological bases of language, language and the brain, animal communication systems, language comprehension, discourse processing, speech perception and production, and first and second language development.

AL 8530  Issues in Second Language Writing
CREDIT HOURS  3.0
DESCRIPTION  (Same as ENGL 8530.) Theories and practices underlying the teaching and learning of second language writing. Emphasis on developing the background necessary for graduate students to examine and refine their own pedagogical positions on the teaching of writing.

AL 8550  Second Language Evaluation and Assessment
CREDIT HOURS  3.0
DESCRIPTION  An overview of language testing with a focus on the development of teacher-generated tests to measure student's achievement in a second language.

AL 8570  Second Language Reading-Writing Relationships
CREDIT HOURS  3.0
DESCRIPTION  Examination of evolving theories of reading and writing as interconnected sociocognitive processes and of the changing nature of these processes in the transition from print to electronic literacies. Exploration of pedagogical implications of the new multiliteracies for second language classrooms.

AL 8610  Teacher Supervision in the Teaching of English as a Second Language to Adults
CREDIT HOURS  3.0
DESCRIPTION  This course focuses on second language (L2) teacher supervision from both teachers' and supervisors' perspectives. Course objectives include deepening awareness of the constructive possibilities supervision can play in the lives of language teachers, supervisors, and other language program administrators.

AL 8620  Technology and Language Teaching
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of computer-based or technology-enhanced language learning and teaching through exploring a working theory of technology and language learning environments, using and discussing existing and potential applications of computer and corpus tools and approaches in the language classroom, and creating projects to use and test knowledge gained through reading, discussion, and hands-on experience.

AL 8630  English for Specific Purposes (ESP)
CREDIT HOURS  3.0
DESCRIPTION  Refers to that branch of ESL teaching and research in which the course content and teaching methods are derived from an analysis of a specific language use situation, such as English for business, English for tour guides, English for English teaching, or English for air traffic control. The course focuses on two aspects of ESP teaching and research that may be said to distinguish them from more general purpose English: authenticity of task and the interaction between language knowledge and specific purpose content knowledge.

</tbody>
</table>
**Teaching Apprenticeship for Graduate Teaching Assistants**

**Credit Hours:** 3.0  
**Description:** In-service teacher training for GTA's. Required for all GTA's in the department. Does not count toward degree requirements.

**Developing MA Portfolio**

**Credit Hours:** 3.0  
**Description:** Development of skills necessary to prepare MA portfolio and MA paper. Special attention is given to (1) documentation and introspection of classroom-based and professional development experiences; and (2) development of research and writing skills. The course includes a series of talks given by faculty members on professional development topics. Does not count toward degree requirements.

**Academic and Professional Socialization for Applied Linguistics**

**Credit Hours:** 3.0  
**Description:** In this doctoral course, students will read about and discuss issues related to being a successful doctoral student and job applicant. Topics include the importance of mentors, time-management, professional development (e.g., writing abstracts for conferences, presenting papers, writing for publication), ethics (e.g., multiple authorship), development of CVs, grant-writing, deconstruction of job ads, jobs (e.g., phone interviews, on-site interviews), and the first year on the job (e.g., research, teachings, and service). Students also keep a reflective journal.

**Quantitative Research Methods**

**Credit Hours:** 3.0  
**Prerequisites:** AL 8710  
**Description:** Focus on the most widely used and useful statistical methods in Applied Linguistics (AL). Examination of statistical concepts and methods fundamental to analysis and explanation of empirical data.

**Qualitative Research Methods**

**Credit Hours:** 3.0  
**Prerequisites:** AL 8710  
**Description:** Overview of issues related to qualitative research methods. Topics include various types of methodology, data collection and analysis. Course is for doctoral and advanced MA students.

**Seminar in Research Methods**

**Credit Hours:** 3.0  
**Prerequisites:** AL 8960 and AL 8961, or permission of instructor  
**Description:** In-depth investigation of various topics related to research methods. May be repeated if topics vary. Course is for doctoral and advanced MA students.

**Current Issues in Linguistic Analysis**

**Credit Hours:** 3.0  
**Prerequisites:** AL 8240  
**Description:** Overview of linguistic theory of particular relevance to applied linguistics. Topics may include syntax, morphology, and cross-language speech perception. May be repeated if topics vary.
AL 8972  Seminar in Language, Cognition, and Communication
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  Latest research in special areas of second language learning as it relates to cognition, behavior, and communication. Topics may include cognitive, social, and/or experimental perspectives regarding biological psychological, social, and cultural factors in the learning and using of second languages. Course may be repeated if topic varies. Course is for doctoral and advanced MA students.

AL 8980  Current Issues in Adult Second Language Acquisition
CREDIT HOURS  3.0
PREREQUISITES  AL 8250
DESCRIPTION  Survey of current research and theory in the field of L2 acquisition. Topics may include cognitive, sociocultural, and discourse theories of second language acquisition. For each topic, examination of underlying epistemologies (including theories and research methods) and evaluations of the implications of established findings for second and foreign language learning by adults. Course is for doctoral and advanced MA students. May be repeated if topics vary.

AL 8990  Current Issues in Preparation of Second Language Teachers
CREDIT HOURS  3.0
PREREQUISITES  AL 8450 or consent of instructor or PhD student status
DESCRIPTION  For prospective educators of ESL and EFL teachers. Focuses on theory, processes, and research options teacher educators may explore to prepare language teachers to work in diverse cultural, linguistic, and social contexts. Expands awareness of social, cultural, professional, and institutional considerations that combine to influence the process of serving as an educator of ESL/EFL teachers, especially of those teachers who work in English for Academic Purposes (EAP) settings with adult learners. Research project focused on L2 teacher learning and/or teacher development required. Course is for doctoral and advanced MA students. May be repeated if topics vary.

AL 8992  Seminar in Language Teaching and Teacher Development
CREDIT HOURS  3.0
PREREQUISITES  AL 8990 or consent of instructor
DESCRIPTION  Designed for prospective educators of ESL and EFL teachers. Surveys current research and theory in second language (L2) teacher learning and professional development of L2 teachers. Participants will complete a research project focused on L2 teacher learning and/or teacher development as part of course requirements. Course may be repeated if topic varies. Course is for doctoral and advanced MA students.

AL 9800  Selected Topics
CREDIT HOURS  3.0
DESCRIPTION  Study of current theory and research in variable topics in Applied Linguistics. Course may be repeated if topic varies.

ART ART
ART 6100  Pedagogy for Teaching Assistants
CREDIT HOURS 3.0
DESCRIPTION For graduate students in the Welch School of Art and Design only. Develop teaching philosophy, syllabus construction, teaching methods, and creation of a teaching portfolio. Must be taken before a graduate student is eligible to teach in the department. Not for degree credit.

ART 6200  Teaching Practicum in Art and Design
CREDIT HOURS 3.0
PREREQUISITES ART 6100
DESCRIPTION Practical experience in teaching art and design classes by shadowing experienced faculty members.

ART 6300  Research Practicum in Art
CREDIT HOURS 3.0
DESCRIPTION Not for degree credit. Supervised research as an assistant to a faculty member.

ART 6400  Laboratory Practicum in Art
CREDIT HOURS 3.0
DESCRIPTION Not for degree credit. Supervised work as a studio laboratory assistant to an art discipline.

ART 6500  Professional Practices in Art and Design
CREDIT HOURS 3.0
PREREQUISITES Open to graduate students in Art and Design only
DESCRIPTION This course introduces students to both the applied and theoretical aspects of professional practices in the arts.

ART 6600  Thesis Writing in Art and Design
CREDIT HOURS 3.0
PREREQUISITES Graduate status in the School of Art and Design
DESCRIPTION This course introduces graduate students in the School of Art and Design to the mechanics of graduate-level research and writing for MFA and MA theses.

ART 6780  Internship
CREDIT HOURS 3.0
DESCRIPTION Practicum in Art and Design classes. Observing, teaching, coordinating, and directing art experiences under the guidance of supervising professor. Required for GTAs.

ART 6850  Visiting Artist Seminar
CREDIT HOURS 3.0
PREREQUISITES MFA status, or permission of area coordinator
DESCRIPTION Specialized graduate course devoted to topics related to the Ernest G. Welch Visiting Artist. The Visiting Artist will be distinguished in his or her area of expertise and will teach on campus during his or her semester of residency.

ART 6980  Directed Study
CREDIT HOURS 1.0 TO 6.0
PREREQUISITES consent of instructor and School director
DESCRIPTION Independent studies initiated by the student.

ART 8700  Graduate Research
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION Conceptual Development using a variety of traditional and experimental approaches to studio art, graphic design, art education, interior design or art history. May be repeated for a maximum of 80 credits.
AE ART EDUCATION

AE 6050 Special Topics in Art Education
CREDIT HOURS 3.0
DESCRIPTION For teachers in elementary school and others not majoring in art education. Lecture, discussion, studio, and field experience.

AE 6200 Art for Preschool through Fifth Grade
CREDIT HOURS 3.0
PREREQUISITES ART 1020, ART 1030, ART 1040 and two 1000-level art history courses with grades of C or higher, 2.5 institutional GPA, 3.0 GPA in art and art history courses
DESCRIPTION Curriculum, materials and practicum. Lecture and laboratory.

AE 6300 Art for Middle and Secondary Schools (TE)
CREDIT HOURS 3.0
PREREQUISITES AE 6200 with grade of B or higher and admission to the art education major (2.5 institutional GPA, 3.0 GPA in art and art history courses, passing scores on GACE Basic Skills test, and successful portfolio review)
DESCRIPTION Curriculum materials, methods assessment and observations. Lecture and laboratory.

AE 6400 Media, Technology, and Visual Presentation
CREDIT HOURS 3.0
PREREQUISITES AE 6200 and admission to the art education major (2.5 institutional GPA, 3.0 GPA in art and art history courses, passing scores on the GACE Basic Skills test, and successful portfolio review)
DESCRIPTION Computer-based educational media, creative applications for technology and visual presentation. Lab Fee $40.00.

AE 6600 Art Education Practicum
CREDIT HOURS 4.0
PREREQUISITES AE 6200, completed with B- or better; 2.5 overall GPA with 3.0 GPA in art courses; passed GACE test or equivalent
DESCRIPTION Cross-listed with AE 4600. 16 hours per week of observations in the school setting with bi-weekly seminars (240 hours of observation per semester). This course is intended for graduate certification Art Education majors.

AE 6750 Student Teaching in Art (TE)
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Observing, teaching, coordinating, and directing art experiences under the guidance of a supervising teacher.

AE 6760 Student Teaching in Art (TE)
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Observing, teaching, coordinating, and directing art experiences under the guidance of a supervising teacher.

AE 6770 Student Teaching in Art (TE)
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Observing, teaching, coordinating, and directing art experiences under the guidance of a supervising teacher.

AE 6780 Student Teaching in Art (TE)
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Observing, teaching, coordinating, and directing art experiences under the guidance of a supervising teacher.

AH ART HISTORY

AH 6000  African Art
CREDIT HOURS  3.0
DESCRIPTION  (Same as AAS 6060.) Survey of the sculpture, architecture, textiles, body ornament, and performance arts of Africa in terms of form, meaning, and function within society. Objects reintegrated into cultural contexts and examined in light of "tradition" and social and political change.

AH 6010  Art of Ancient Egypt and Nubia
CREDIT HOURS  3.0
DESCRIPTION  (Same as AAS 6063.) Survey of the painting, sculpture, architecture, and minor arts in ancient Egypt and Nubia with reference to their chronological development and underlying historical, religious, and cultural meanings.

AH 6011  Art and Architecture of Ancient Egypt I: 4000-1600 BC
CREDIT HOURS  3.0
PREREQUISITES  AH 1700 or consent of instructor
DESCRIPTION  An examination of the art and architecture of ancient Egypt from the Predynastic Period to the Middle Kingdom with reference to stylistic development and historical, religious, and cultural contexts.

AH 6012  Art and Architecture of Ancient Egypt II: 1600-31 BC
CREDIT HOURS  3.0
PREREQUISITES  ART 1700 or consent of instructor
DESCRIPTION  An examination of the art and architecture of ancient Egypt from the New Kingdom to the Ptolemaic Period with reference to stylistic development and historical, religious, and cultural contexts.

AH 6020  Art and Architecture of the Ancient Near East
CREDIT HOURS  3.0
PREREQUISITES  AH 1700 with grade of C or higher, or consent of instructor
DESCRIPTION  An investigation of art and society from the Neolithic period to Alexander the Great, using archaeological data and art historical methods to analyze ancient objects and monuments.

AH 6030  Contemporary African Art
CREDIT HOURS  3.0
PREREQUISITES  ART 1850 or AH 4000/6000
DESCRIPTION  (Same as AAS 6062.) Arts and artists of Africa during the colonial and post-colonial eras. Social, political, economic, and cultural frameworks explore shifting notions of tradition, authenticity, and identity as they relate to art, artists, and audiences.

AH 6110  Art and Architecture of Ancient Greece
CREDIT HOURS  3.0
DESCRIPTION  Aegean and ancient Greek art from 3000-31 B.C. Examination of archaeological methods; development of style; and the social, religious, and political contexts of artistic production.

AH 6120  Art and Architecture of Ancient Rome
CREDIT HOURS  3.0
DESCRIPTION  Roman artistic traditions and building techniques from the time of the Etruscans to the fall of the Roman Empire; examination of the Roman's cultural heritage and influence on socioeconomic and political structures to modern times.

</table>
ASTR 6000 Fundamentals of Astrophysics
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION Three lecture hours a week. This course is prerequisite for all 8000-level astronomy courses. Application of mechanics, electricity and magnetism, and atomic and nuclear physics to the solution of astrophysical problems.

ASTR 6100 Astronomical Techniques and Instrumentation
CREDIT HOURS 3.0
DESCRIPTION Three lecture hours a week. Fundamentals and practical application of photography, spectroscopy, photometry, astrometry, interferometry, and current developments in detector technology and telescope design.

ASTR 6300 Teaching Astronomy
CREDIT HOURS 2.0
DESCRIPTION Course provides a theoretical and practical foundation for science teaching. Topics include univocal and dialogic discourse, questioning strategies, Bloom’s taxonomy, mental models, formative assessment and bridging, the resource framework, motivation and cooperative learning, argumentation, metacognition, nature of science, and qualities of effective teachers. Two lecture hours per week.

ASTR 6310 Teaching Astronomy Lab Practicum
CREDIT HOURS 1.0
DESCRIPTION Students will practice teaching astronomy lessons and apply science teaching theories and methods learned in ASTR 6300. One and one half hours per week.

ASTR 7010 Astronomy for Teachers I
CREDIT HOURS 4.0
DESCRIPTION Designed to give teachers a basic understanding of introductory astronomy, including celestial motions of the stars, sun, moon, and planets; historical development of our understanding of gravitation and orbital motion. Electromagnetic radiation and basic light emitting processes. Telescopes and astronomical instrumentation. Physical nature of the earth, moon, and terrestrial and Jovian planets. Information on teaching resources in astronomy will be available.

ASTR 7020 Astronomy for Teachers II
CREDIT HOURS 4.0
PREREQUISITES ASTR 7010 with grade of C or higher
DESCRIPTION Designed to extend a teacher’s understanding of our observations of the sun and stars with the derivation of their fundamental properties, including the conditions and fusion reactions below their surfaces. Matter between stars and stellar birth; old-age; and death, including neutron stars and black holes. Our Milky Way and other galaxies; quasars and peculiar galaxies; evidence for and interpretation of an expanding universe. Information on teaching resources will be available.

ASTR 7910 Directed Study in Astronomy for Teachers
CREDIT HOURS 1.0 TO 4.0
DESCRIPTION Areas of study and credit to be determined by the department.

BIOL 6010  Mathematical Biology  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MATH 2212 or MATH 1220  
**DESCRIPTION** (Same as MATH 6010.) This course provides an introduction to the use of continuous and discrete differential equations in the biological sciences. Biological topics will include single species and interacting population dynamics, modeling infectious and dynamic diseases, regulation of cell function, molecular interactions and receptor-ligand binding, biological oscillators, and an introduction to biological pattern formation. There will also be discussions of current topics of interest such as Tumor Growth and Angiogenesis, HIV and AIDS, and Control of the Mitotic Clock. Mathematical tools such as phase portraits, bifurcation diagrams, perturbation theory, and parameter estimation techniques that are necessary to analyze and interpret biological models will also be covered.

BIOL 6011  Principles of Paleontology  
**CREDIT HOURS** 4.0  
**PREREQUISITES** Geol 1122K, or consent of instructor  
**DESCRIPTION** (Same as Geol 6011.) Three lecture and three laboratory hours a week. An introduction to the principles of paleontology including taphonomy, taxonomy, evolution, and extinction by examination of the fossil record. Study of commonly preserved organisms and their use in paleoeconomy, paleoenvironmental reconstruction, biostratigraphic correlation, and conservation paleobiology will be stressed as well.

BIOL 6014K  Invertebrate Biology  
**CREDIT HOURS** 4.0  
**PREREQUISITES** BIOL 3840 and BIOL 3850, or equivalent course work  
**DESCRIPTION** Three lecture and three laboratory hours a week. Structure, function, distribution, and taxonomic relationship of invertebrate animals.

BIOL 6015  Vertebrate Biology  
**CREDIT HOURS** 4.0  
**PREREQUISITES** BIOL 3840 and BIOL 3850, or equivalent course work  
**DESCRIPTION** Three lecture and three laboratory hours a week. Diversity, taxonomy, structure, function, distribution, and ecology of living and extinct vertebrates.

BIOL 6040  Neuroethology  
**CREDIT HOURS** 4.0  
**PREREQUISITES** NEUR 3000 or BIOL 4102, or equivalent, with a grade of C or higher  
**DESCRIPTION** Four lecture hours per week. (Same as NEUR 6040). The neural basis of behavior from an ethological perspective. The course will cover discoveries, techniques, and concepts underlying neuroethological research. Developmental, evolutionary, and comparative approaches are emphasized. 4.00 credit hours.

BIOL 6045K  General Ecology  
**CREDIT HOURS** 4.0  
**PREREQUISITES** BIOL 3840 or equivalent  
**DESCRIPTION** BIOL 3820 recommended. Three lecture and three laboratory hours a week. Principles governing distribution and abundance of organisms and their interaction.
BIOL 6050  The Natural Environment of Georgia
CREDIT HOURS  4.0
PREREQUISITES  BIOL 1104K or BIOL 2108K with grade of C or higher, and Geog 1113 or equivalent, or consent of instructor
DESCRIPTION  (Same as Geog 6050.) Three lecture hours a week with a one day weekend lab every other weekend. Georgia is a state with great a diversity of natural communities, in large part because of the many different landscapes present in the state. Through readings, discussions, tests, field outings, projects and in-class exercises, students will become familiar with the principles involved in the structure and function of Georgia's dwindling, but diverse, ecosystems. There will be an emphasis on plant communities and the physical environment, but animal communities and landscape management strategies will also be covered. Locations, diversity, and plant indicator species (especially trees) will be examined in the classroom and in the field, and experiential learning is emphasized.

BIOL 6074  Developmental Biology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3840 and BIOL 3900, or equivalents
DESCRIPTION  Four lecture hours a week. An introduction to developmental biology emphasizing cellular, genetic, and molecular aspects and mechanisms of animal development.

BIOL 6094  Developmental Neurobiology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 or equivalent
DESCRIPTION  (Same as NEUR 6100.) Four lecture hours per week. Introduction to the development of the nervous system. Covers the field of developmental neurobiology from neural induction to the modification of neuronal connections in the adult nervous system and uses a variety of model organisms to demonstrate the rules by which nervous systems develop.

BIOL 6102  Neurobiology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 and BIOL 3840, or equivalents
DESCRIPTION  (Same as NEUR 6010.) Comprehensive basis for understanding brain research, major discoveries in neuroscience, and the methods employed for those achievements. Topics include the neural basis of learning and memory, sensory perception, motor control, neurological diseases, drug action, and behavior.

BIOL 6104  Zoo Biology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3840 or equivalent
DESCRIPTION  Four lecture hours a week. Historical background as well as current issues and developments in zoos. Topics include conservation, SSPs (Species Survival Plans), behavioral enrichment, studbook management, and planning/economics of major exhibits. Course instruction will be on-site at Zoo Atlanta. Students will work directly with animal curators and keepers.

<tbody>
<tr>
<td>BIOL 6110</td>
<td>Neural Plasticity</td>
<td>4.0</td>
<td>NEUR 6010 or BIOL 6102 with a grade of C or higher, or equivalent</td>
<td>Phenomenology and mechanisms of experience-dependent changes in the nervous system. The course will examine plasticity at many levels of analysis, from synaptic mechanisms to clinical strategies, and from molecular neuroscience to cognitive psychology.</td>
</tr>
<tr>
<td>BIOL 6115</td>
<td>Medical Neuroanatomy</td>
<td>4.0</td>
<td>BIOL 3840 or equivalent</td>
<td>Four lecture hours per week. Human brain and spinal cord functional neuroanatomy and associated pathologies. Master’s students only.</td>
</tr>
<tr>
<td>BIOL 6232</td>
<td>Cell Cycle and Cancer</td>
<td>4.0</td>
<td>BIOL 3800 with a C or better</td>
<td>Four lecture hours a week. This course discusses the cell cycle, and how misregulation of this well-orchestrated process results in cancer. Current research in cell cycle and cancer biology will be utilized to stimulate critical thinking and communication about the complex biological processes that go awry in cancer and form the basis for intervention with chemotherapeutic drugs.</td>
</tr>
<tr>
<td>BIOL 6240</td>
<td>Endocrinology</td>
<td>4.0</td>
<td>CHEM 6600 or equivalent</td>
<td>Four lecture hours a week. Basic biochemistry and physiology of the endocrine system, including synthesis and secretion of steroid and protein hormones, mechanisms of hormone action, and endocrinology of reproduction.</td>
</tr>
<tr>
<td>BIOL 6241</td>
<td>Hormones and Behavior</td>
<td>4.0</td>
<td>BIOL 3840 or equivalent</td>
<td>(Same as NEUR 6420 and PSYC 6630.) Four lecture hours per week. Interaction of nervous and endocrine systems in the control of animal behavior, including humans, with emphasis on the mechanisms that adapt behavior to the changing physical and social environments.</td>
</tr>
<tr>
<td>BIOL 6242</td>
<td>Circadian Rhythms</td>
<td>4.0</td>
<td>BIOL 2240 or BIOL 3240, and BIOL 3800 with grades of C or higher, or equivalents</td>
<td>The circulatory, respiratory, gastrointestinal, and renal physiological systems will be emphasized.</td>
</tr>
<tr>
<td>BIOL 6246</td>
<td>Advanced Human Physiology</td>
<td>4.0</td>
<td>BIOL 3840, BIOL 3880, BIOL 3900, and CHEM 3410, or equivalents</td>
<td>CHEM 4600 is recommended. Three lecture and three laboratory hours a week. Mechanism of cell and organ function at the molecular level.</td>
</tr>
</tbody>
</table>
BIOL 6278  Immunology  
CREDIT HOURS 4.0  
PREREQUISITES BIOL 3880 and BIOL 3900, or equivalent  
DESCRIPTION Four lecture hours a week. Comprehensive overview of the immune system and its functions within the context of cell to cell interaction and communication.

BIOL 6282  Tumor Immunology  
CREDIT HOURS 4.0  
PREREQUISITES BIOL 3880 and BIOL 3900 with grades of C or higher, or equivalent course work  
DESCRIPTION Four lecture hours a week. This course discusses the molecular basis of tumorigenesis and the interactions between the immune system and tumors/cancer cells. Research in tumor immunology is based on the premise that tumor cells express antigenic determinants that are not found on normal cells and furthermore, that these antigens can elicit an anti-tumor immune response. Topics covered include: basic tumorigenesis of common solid tumors, basic immunology, tumor antigen expression, types of immune responses to tumors, mechanisms by which tumors escape/suppress the immune response and novel approaches for immunotherapy of advanced cancers. This course will involve critical thinking and communication about the complex biological systems of cancer and the immune system.

BIOL 6284  Medical Biochemistry in Health and Disease  
CREDIT HOURS 4.0  
PREREQUISITES CHEM 6600 with a B or better  
DESCRIPTION Overview of principles of biochemistry and metabolism at both the cellular and whole body level under normal physiological conditions in maintaining physical and mental health and in various disease states. These include exercising, starvation, trauma, infection, pregnancy, aging-related mental illness, obesity, diabetes, cardiovascular diseases and cancer. Four lecture hours a week. Crosslisted with BIOL 4284.

BIOL 6286  Medical Microbiology  
CREDIT HOURS 4.0  
PREREQUISITES BIOL 3880 or equivalent course work  
DESCRIPTION Four lecture hours per week. An overview of significant human and animal pathogens, including aspects of bacterial, viral, protozoan, and helminthic infections and pathogenesis. Pathogen characteristics and features, epidemiology, immunity, and treatment.

BIOL 6428  Microbial Diversity/Systematics  
CREDIT HOURS 4.0  
PREREQUISITES BIOL 3880 or equivalent course work  
DESCRIPTION Four lecture hours per week. Diversity and systematics of selected groups of bacteria and yeasts.

BIOL 6430  Applied Microbiology  
CREDIT HOURS 4.0  
PREREQUISITES BIOL 3880 and CHEM 2400, or equivalent course work.  
DESCRIPTION Prerequisites: BIOL 3880 and CHEM 2400, or equivalent course work. Four lecture hours a week. Microbiology of industrial processes, including quality control, fermentations, biotransformations, strain selection and maintenance.

</tr>
<tr>
<td>BIOL 6500</td>
<td>Human Genetics</td>
<td>4.0</td>
<td>BIOL 3900 or equivalent</td>
<td>Four lecture hours a week. Principles of human heredity, with emphasis on the molecular basis of heredity, detection and treatment of genetic diseases, and genetic counseling.</td>
</tr>
</tbody>
</table>
BIOL 6545  Bioethics and Biotechnology
CREDIT HOURS 4.0
PREREQUISITES BIOL 3900 with a C or higher, or equivalent
DESCRIPTION Four lecture hours a week. Ethical issues raised by recent advances in biotechnology, genomics, and other areas of molecular genetics and cell biology. Specific topics include: eugenics; molecular, cellular and organismal cloning; personalized medicine; stem cell research; the genetics of behavior; and the role of epigenetics in the nature vs. nurture debate.

BIOL 6564  Advanced Genetics
CREDIT HOURS 4.0
PREREQUISITES BIOL 3900 or equivalent
DESCRIPTION Four lecture hours a week. Advanced topics and techniques in prokaryotic and eukaryotic genetic systems, including gene mapping, molecular techniques, regulation of gene expression, genomics, and population genetics.

BIOL 6565  General Oncology
CREDIT HOURS 4.0
PREREQUISITES BIOL 3900
DESCRIPTION Four lecture hours a week. Etiology, pathology, mechanisms of metastasis and treatment of cancer. Students will also analyze current primary literature in the field.

BIOL 6575  Virology
CREDIT HOURS 4.0
PREREQUISITES BIOL 3880 and BIOL 3900, or equivalent course work
DESCRIPTION Four lecture hours a week. Introduction to viruses. Topics covered include structure and replication of viruses; virus isolation and classification; and pathogenesis and epidemiology of virus disease.

BIOL 6576  Neurovirology
CREDIT HOURS 4.0
DESCRIPTION Following an introduction to basic neuroanatomy and neuroimmunology, individual lectures will focus on the diagnosis, treatment, and pathogenesis of several neurologic diseases of virus origin. These include encephalitis, meningitis, chronic inflammatory and demyelinating diseases, HIV/AIDS-associated dementia, peripheral neuropathies, retinitis, and transmissible spongiform encephalopathies caused by prions. The concept of virus latency within the nervous system will be emphasized, as will the possible contributions of viruses or prions toward the onset of Alzheimer's disease.

BIOL 6580  Microbial Pathogenesis
CREDIT HOURS 4.0
PREREQUISITES BIOL 3880 and BIOL 3900, or equivalent course work
DESCRIPTION Four lecture hours a week. This course integrates material from pathogenic microbiology, molecular biology and immunology into an overview of bacterium-host interactions including bacterial attributes, virulence factors and several paradigms of bacterial-host interactions focusing on molecular and genetic approaches.

BIOL 6595  Microbial Physiology and Genetics
CREDIT HOURS 4.0
PREREQUISITES BIOL 3880 and BIOL 3900, or equivalent course work
DESCRIPTION Chemistry 4600 recommended. Four lecture hours a week. Molecular biology of bacteria and their viruses, with an emphasis on the use of microbes as model systems for studying molecular processes. Topics include microbial physiology, genetic exchange, gene expression, recombinant DNA technology, and the molecular basis for microbial pathogenesis.
BIOL 6615  The Development of Modern Western Science
CREDIT HOURS  4.0
DESCRIPTION  Examination of the histories of different scientific disciplines and thought, integrating transformations in the sciences with broader historical changes. Topics include the histories of scientific perception and scientific revolutions; mechanical explanations of nature and the development of the natural sciences; the science of race and gender; the development of neuroscience; comparisons to non-Western science; criticisms of scientific discourses.

BIOL 6630  Enzymology
CREDIT HOURS  3.0
PREREQUISITES  one year of organic chemistry (CHEM 3410) and one semester of biochemistry (CHEM 6600)
DESCRIPTION  Introduction to enzyme catalysis with emphasis on the general concepts of enzyme kinetics and the common tools for studying enzymes.

BIOL 6640  Fundamentals of Bioinformatics
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 or written approval of instructor
DESCRIPTION  (Same as CHEM 6640, CSC 6640, and NEUR 6320.) Four lecture hours per week. A "hands-on" approach to bioinformatics using PCs, the internet, and computer graphics to analyze, correlate, and extract information from biological databases, emphasizing sequence and structure databases for proteins and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function.

BIOL 6648  Biogeography
CREDIT HOURS  4.0
PREREQUISITES  Geog 1112, BIOL 1104K, or BIOL 2108K with grade of B or higher, or consent of instructor
DESCRIPTION  (Same as Geog 6648.) Spatial variations, processes, and environmental constraints influencing distribution of life.

BIOL 6670  Principles and Techniques of Practical Biochemistry
CREDIT HOURS  3.0
PREREQUISITES  one semester of biochemistry (CHEM 4600/6600) with grade of B or higher, or equivalents
DESCRIPTION  (Same as CHEM 4670). A comprehensive and integrated review of principles and modern techniques found in day-to-day biochemical research laboratories. Topics include, but are not limited to: general principles of biochemical investigations, molecular biology and basic techniques, molecular cloning and gene analysis, protein structure, purification and characterization, biomolecular interactions, basic enzyme analysis, spectroscopic techniques, mass spectrometric techniques, centrifugation, electrophoretic, chromatographic, radioisotope and electrochemical techniques.

BIOL 6680  Biological Imaging
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 and PHYS 1112K or PHYS 2212K, or equivalents
DESCRIPTION  Four lecture hours per week. An introduction to the theory of microscopy and various types of microscopes and their applications to biological research. Topics include: microscopes, basic specimen preparation, and staining techniques.

1.330
**BIOL 7955**  Introduction to the Center for Behavioral Neuroscience  
**CREDIT HOURS** 1.0  
**PREREQUISITES**  consent of instructor  
**DESCRIPTION**  Orientation to the research conducted at the Center for Behavioral Neuroscience (CBN). It is intended for members of CBN. Permission of instructor is required.

**BIOL 8010**  Neurobiology I: Cellular Neurobiology  
**CREDIT HOURS** 4.0  
**PREREQUISITES**  BIOL 4102 or BIOL 6102 with grade of B or higher, or equivalent, or consent of instructor  
**DESCRIPTION**  (Same as NEUR 8010 and PSYC 8616.) Four lecture hours a week. The unique cellular and molecular properties of neurons and how these properties enable neurons to perform their computational tasks. Topics include neuronal excitability, synaptic communication, and neural development.

**BIOL 8020**  Neurobiology II: Integrative Neurobiology  
**CREDIT HOURS** 4.0  
**PREREQUISITES**  BIOL 8010 with grade of B or higher, or equivalent, or consent of the instructor  
**DESCRIPTION**  (Same as NEUR 8020 and PSYC 8617.) Four lecture hours a week. How neurons are organized into neural systems that control behavior. Topics include functional anatomy of sensory systems, sensorimotor integration, central pattern generators, motor and control systems, neuromodulation, neuroethology, and the neural basis of learning and cognition.

**BIOL 8040**  Functional Human Neuroanatomy  
**CREDIT HOURS** 3.0  
**PREREQUISITES**  BIOL 3840 or PSYC 8610, or equivalent, or consent of the instructor  
**DESCRIPTION**  (Same as NEUR 8300 and PSYC 8615.) Two lecture and two laboratory hours a week. In-depth study of the neuroanatomy and function of the human central nervous system. Considers neuroanatomical techniques used to study the brain, neuroanatomical basis for the control of sensory and motor systems, as well as cortical, autonomic nervous system, and limbic system anatomy and function. Both normal brain anatomy and pathologies are covered.

**BIOL 8060**  Behavioral Neuroscience  
**CREDIT HOURS** 3.0  
**PREREQUISITES**  BIOL 3840 or PSYC 4110, or equivalent  
**DESCRIPTION**  (Same as PSYC 8610.) Three lecture hours a week. Analysis of functional neural systems in the regulation of behavior, emphasizing the analysis of limbic, hypothalamic, and reticular-cortical mechanisms in behavior.

**BIOL 8065**  Psychopharmacology  
**CREDIT HOURS** 3.0  
**PREREQUISITES**  PSYC 8610 or consent of instructor  
**DESCRIPTION**  (Same as PSYC 8640.) Biological bases of psychopharmacology, including the locus of action for psychoactive substances and the mechanisms by which these substances modify neural activity and cause a change in mood and behavior. Covers neuropsychology, neurochemistry, and pharmacology of classes of psychoactive drugs used to treat mental disorders, as well as those commonly abused that may or may not have therapeutic uses.
BIOL 8070  Advanced Behavioral Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  BIOL 8010 and BIOL 8020, or equivalents, or consent of instructor
DESCRIPTION  (Same as NEUR 8030 and PSYC 8618.) Advanced analysis of functional neural systems involved in the regulation of behavior, emphasizing interactions between limbic, hypothalamic, and cortical brain systems.

BIOL 8110  Concepts in Neurobiology
CREDIT HOURS  2.0
PREREQUISITES  consent of the instructor
DESCRIPTION  (Same as NEUR 8710.) Two lecture hours a week. Lectures and discussions dealing with contemporary topics in neurobiology.

BIOL 8220  Advanced Molecular Cell Biology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800, BIOL 3900, and CHEM 4600, or equivalent, or consent of instructor
DESCRIPTION  Four lecture hours a week. Current concepts in cell biology. The structure and function of the various cellular components and processes will be examined on a molecular, cellular and multicellular level.

BIOL 8248  Advanced Cellular Physiology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 4248, CHEM 4310 and CHEM 4600, or equivalents, or consent of instructor
DESCRIPTION  Four lecture hours per week. Mechanisms and regulation of transport processes in cellular membranes and organelles.

BIOL 8278  Molecular Immunology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 4278 or BIOL 6278 or consent of instructor
DESCRIPTION  Four lecture hours a week. Important concepts of modern immunology and mechanisms of inflammation. Topics include host defense against pathogens, inflammation, innate and adaptive immunity, systemic and cellular level regulatory mechanisms. The course also discusses major current inflammatory diseases and infectious conditions.

BIOL 8310  Concepts in Cell Biology and Physiology
CREDIT HOURS  2.0
PREREQUISITES  consent of the instructor
DESCRIPTION  Two lecture hours a week. Lectures and discussions dealing with contemporary topics in cell biology and physiology.

BIOL 8360  Protein Structure and Function
CREDIT HOURS  3.0
PREREQUISITES  CHEM 6610 or consent of instructor
DESCRIPTION  (Same as CHEM 8360 and NEUR 8200.) Discussion of the structure and function of proteins and of enzyme mechanisms. Topics include protein folding and motions, descriptions of enzyme catalysis at a molecular level, consideration of the energetics of biological processes, and enzyme kinetics.
BIOL 8390  Introduction to Modeling  
CREDIT HOURS  3.0  
PREREQUISITES  Instructor consent (a C or above in pre-calculus is beneficial)  
DESCRIPTION  (Same as NEUR 8390). This is a discussion-based class based on reading assignments and in-class presentations. It prepares non-mathematically literate students for future collaboration with mathematical and computational modelers, without teaching mathematical technicalities. Students from more mathematical backgrounds will learn how to communicate technical ideas to non-mathematicians through collaborative group work. There are no formal examinations for this course.

BIOL 8410  Advanced Microbiology  
CREDIT HOURS  4.0  
PREREQUISITES  BIOL 7880, or equivalent  
DESCRIPTION  Four lecture hours a week. In depth study of the organismal aspects of microbiology with particular emphasis on metabolic functions in eukaryotic microorganisms.

BIOL 8415  Fermentation Microbiology  
CREDIT HOURS  3.0  
PREREQUISITES  BIOL 3880 or equivalent  
DESCRIPTION  To familiarize the advanced student with the issues, problems, fundamentals, and approaches to the scale-up of microbiological processes. Selected team/group demonstrations and tutorials will be conducted with the students to illustrate and reinforce the concepts and examples provided in the lectures.

BIOL 8416  Bacterial and Archaeal Systematics and Taxonomy  
CREDIT HOURS  3.0  
PREREQUISITES  BIOL 3880 or equivalent  
DESCRIPTION  The rationale and approach to microbial systematics and the application of practical taxonomy as related to bacteria and archaea.

BIOL 8458  Advanced Microbial Ecology  
CREDIT HOURS  4.0  
PREREQUISITES  BIOL 3880 and CHEM 4600 with grades of C or higher, or equivalent course work  
DESCRIPTION  Four lecture hours per week. Microbial interactions with their biotic and abiotic environments, with an emphasis on ecological principles, experimental approaches and current literature.

BIOL 8510  Concepts in Microbiology  
CREDIT HOURS  2.0  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Two lecture hours a week. Lectures and discussions dealing with contemporary topics in microbiology.

BIOL 8540  Advanced Methodologies in Biostatistics  
CREDIT HOURS  3.0  
PREREQUISITES  STAT 6752  
DESCRIPTION  (Same as STAT 8540.) General overview of S language, using S-plus for distributions and data summaries, linear statistical models, generalized linear models, non-linear regression models, modern regression, and survival analysis.

BIOL 8550  Introduction to Graduate Studies in Biology  
CREDIT HOURS  2.0  
PREREQUISITES  
DESCRIPTION  (Same as NEUR 8600.) Two lectures hour a week. Analysis, discussion, and review of basic skills, techniques, requirements for compliance in biology, organizational requirements, and requirements for responsible conduct in research (RCR), including ethics, publication, attribution of work, conflict of interest, and human and animal welfare. Course also entails taking and passing the Federal on-line RCR review (CITI).

DESCRIPTION  (Same as CHEM 8970.) May be repeated if topics vary.

BIOL 8980  Topics in Applied and Environmental Microbiology  
CREDIT HOURS  1.0  
DESCRIPTION  May be repeated if topics vary.

BIOL 8999  Thesis Research  
CREDIT HOURS  1.0 TO 25.0  
DESCRIPTION  

BIOL 9991  Doctoral Research Proposal  
CREDIT HOURS  2.0  
PREREQUISITES  Consent of instructor  
DESCRIPTION  Students write and defend a research proposal as a prerequisite for admission to candidacy. Students receive a grade (A-F) based on their written and oral presentations. Restricted to doctoral students in specific disciplines based on programmatic considerations.

BIOL 9992  Doctoral Research Proposal  
CREDIT HOURS  2.0  
PREREQUISITES  Consent of instructor  
DESCRIPTION  Students write and defend a research proposal as a prerequisite for admission to candidacy. Students are evaluated on their written and oral presentations on a S/U basis. Restricted to doctoral students in specific disciplines based on programmatic considerations.

BIOL 9999  Doctoral Dissertation Research  
CREDIT HOURS  1.0 TO 25.0  
PREREQUISITES  Consent of the instructor  
DESCRIPTION  

1.335
BMSC 6000 Biomedical Enterprise Proseminar

CREDIT HOURS 2.0

PREREQUISITES Entry into the Biomedical Enterprise concentration or by permission of instructor.

DESCRIPTION The proseminar course will teach interdisciplinarity as a discipline itself, with introductions to the educational philosophy behind an interdisciplinary program, discussion of historical challenges resolved through interdisciplinary approaches, and debate on “live” case studies of current issues likely to require interdisciplinary solutions. This course will also teach strategies for professional communication and productive teamwork, such as methods for gaining familiarity with team members, setting ground rules and responsibilities, avoiding common problems, and building trust. The proseminar will be delivered with a face-to-face, interactive approach, enabling instructors, guest speakers, and students to discuss and debate current issues.

BMSC 6010 Biomedical Enterprise Internship Seminar I

CREDIT HOURS 1.0

PREREQUISITES [BMSC 6000]

DESCRIPTION Students will have internship opportunities that range from start-up companies, established small businesses, and large enterprises with branch facilities in the region, to governmental research or regulatory agencies, to law firms with emphases such as patent, intellectual property, and/or health law. Students will be required to participate in an online internship seminar course that will help monitor their experiences and productivity. The seminar instructor will have weekly contact with all interns, thereby assuring the opportunity to raise and address concerns, share best practices for maximizing internship experiences, and gauging student progress in knowledge and skill acquisition.

BMSC 6020 Biomedical Enterprise Internship Seminar II

CREDIT HOURS 1.0

PREREQUISITES [BMSC 6000]

DESCRIPTION Students will continue their internship opportunities that range from start-up companies, established small businesses, and large enterprises with branch facilities in the region, to governmental research or regulatory agencies, to law firms with emphases such as patent, intellectual property, and/or health law. Students will be required to participate in an online internship seminar course that will help monitor their experiences and productivity. The seminar instructor will have weekly contact with all interns, thereby assuring the opportunity to raise and address concerns, share best practices for maximizing internship experiences, and gauging student progress in knowledge and skill acquisition.
Biomedical Enterprise Capstone

The aim of the capstone project is to challenge students to demonstrate their abilities to solve current practical and/or academic problems by using knowledge and skills from multiple disciplines. The capstone project should result in a product that is timely and relevant for the interdisciplinary course of study and be presented to faculty members for assessment based on the value of the product or performance. The key skill sets of critical thinking, creativity, communication, and collaboration must be assessed through the final project, and the result must be reasonable and be intellectually defensible. Faculty in conjunction with advisors from professional settings will contribute to the design, guidelines, and grading rubrics.
BA 5000  Master's Orientation
CREDIT HOURS  0.0
DESCRIPTION  This orientation course is designed to assist new Robinson Graduate students in their transition back to the classroom. Students will receive relevant information about the Masters program framework and be introduced to the student services offered by the College. Students will participate in a case analysis, along with a team building activity. Students also will have an opportunity to network with the members of the new program as well as members on the current class. The Staff within Academic Advising and Career Management are on hand for introductions and an initiation of their respective service offerings. Faculty members also share their perspective on success in the return to the classroom.

BA 6999  Responsible Conduct in Research
CREDIT HOURS  0.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 7.
DESCRIPTION  This course is Part 2 of the Scholarship and Research Integrity (SARI) program at GSU, developed in response to the America Competes Act requirements. The SARI program is designed to offer students enrolled in undergraduate research, graduate degree programs, and post doctoral programs comprehensive training in the responsible conduct of research in a manner that is tailored to address the issues faced by students in their respective programs. The SARI program includes two parts: Part 1, CITI online-training, and Part 2, a 5 hours discussion-based course in responsible conduct of research. This course fulfills the latter requirement and covers universal and discipline-specific material regarding how research should be conducted responsibly and ethically.

BA 9000  Doctoral Research
CREDIT HOURS  1.0 TO 18.0
PREREQUISITES  Doctoral standing
DESCRIPTION  Doctoral students who have not yet passed the preliminary examination and are not registered for nine or more semester hours of course work on their program of study must register for this course to satisfy the continuous registration requirement. A grade of S or U will be assigned based on attendance and participation in departmental research activities.

BA 9200  Seminar in University Teaching
CREDIT HOURS  3.0
DESCRIPTION  The seminar is concerned with problems relating to teaching and research in business administration. Various teaching methods including lecture, case and incident methods, sociodrama techniques, and tutorial procedures are examined. The problems of particular subject fields, of different levels of classes of students, and of the function of the examination process are considered.

BA 9260  Theory Development
CREDIT HOURS  3.0
DESCRIPTION  Students understand how to develop theory and surface a theoretical contribution. They understand the distinction between identifying a business problem and a scientific problem, and the approaches to achieve rigor and relevance. They learn about the elements of a theory and the approaches to build theory. They understand the distinction between process and variance models, and the importance of achieving correspondence between theoretical arguments and model specification. They develop an understanding about how to leverage context and time in building theory, and about multi-dimensional constructs and multi-level models. Cumulatively, they develop the skills and understanding to formulate a research question, synthesize the literature, build a theory, and specify a model.
BA 9280  
**Quantitative Research Methods in Business**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course develops skills in designing, evaluating, and understanding quantitative methods and methodologies for research in the social science paradigm. Students also acquire skills in developing research proposals, supporting methodological choices, and understanding how to successfully publish their work. The course is intended for students across the business disciplines.

BA 9300  
**Qualitative Research Methods in Business**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course helps develop knowledge and skills in the application and use of qualitative research techniques. The course provides a survey of the methodological literature on qualitative research methods paired with appropriate article-length exemplars in the disparate business disciplines. This course covers a variety of different research strategies including case study, ethnography, grounded theory, and action research. In addition, students acquire skills in developing a research design, and qualitative data collection and analysis techniques, and authoring research manuscripts.

BA 9320  
**Managerial Decision Making**

**CREDIT HOURS**
3.0

**REQUIREMENTS**
CSP: 1, 2, 6

**DESCRIPTION**
This course introduces students to the subject of managerial decision-making. Decision-making is obviously a very important part of what managers do. Research into managerial decision-making is highly relevant to a wide variety of business school disciplines including: accounting, marketing, managerial sciences, information systems, risk management and insurance, and real estate. Drawing on relevant theories and academic journal articles, the student is introduced to bounded rationality, cognitive biases, bounded awareness and ethicality, framing effects, escalation of commitment, whistle blowing, negotiator cognition, and emotional influences on decision making.

BA 9500  
**Dissertation Research**

**CREDIT HOURS**
1.0 TO 18.0

**PREREQUISITES**
completion of preliminary examination

**DESCRIPTION**
Doctoral students who have passed the preliminary examination must register for this course each term (excluding summer term) until graduation to satisfy the continuous registration requirement. A grade of IP (indicating that satisfactory progress was made on the dissertation) or U (indicating lack of satisfactory progress) is assigned each term. At the end of the term during which the dissertation is completed/defended, a grade of S (satisfactory) or U (unsatisfactory) is assigned to the student.
BUSA 6090  Principles of Entrepreneurship  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  None  
**REQUIREMENTS**  Must meet RCB upper division course requirements minimum GPA of 2.8 and 45 credit hours. CSP: 1, 2, 6, 7.  
**DESCRIPTION**  The purpose of this course is to familiarize the non-business student with the terminology, key principles, concepts, and methods of contemporary entrepreneurship and supporting business disciplines. The course is not intended to replace more in-depth studies in these disciplines, but rather to jump-start such studies for students with little or no background in business. For practicality, the course is designed around a process-driven perspective of entrepreneurship: 1) discover profitable opportunities, 2) evaluate the viability of an opportunity, 3) develop strategies to exploit an opportunity, and 4) plan for successful execution. This course prepares non-business students to take other available courses at the Robinson College of Business and well as its entrepreneurship courses.

BUSA 7090  Survey of Business Principles for Non-Business Graduate Students  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  None  
**DESCRIPTION**  Cross listed with BUSA 3090. BUSA7090 is designed to familiarize the non-business graduate student quickly with key business principles, concepts and terminology. This is a survey course that touches on key areas of business management including marketing, operations, accounting, finance, strategy, ethics, economics and entrepreneurship. The course is not intended to replace more in-depth studies of each of these business disciplines but rather to jump start such studies. The course is specifically designed for non-business students interested in starting their own entrepreneurial ventures. This course will prepare such students to take additional entrepreneurship courses and to participate in various entrepreneurship activities within the university.
Communication Skills for Business helps improve the proficiency and fluency of graduate students who write and speak English as a secondary language (or English speaking students who need remedial work) to develop their written, conversational and presentation skills. The course focuses on the elements of written and spoken communication that are vital in a graduate business program and the US workplace. Students will acquire the necessary skills to complete correct and effective business documents in English and to demonstrate cultural awareness and spoken expertise in conversations and presentations. Students will take this course based on TOEFL, GMAT, and/or GRE scores and an interview assessment or upon recommendation of the student’s professor.

Managers face a wide range of demanding communication tasks every day. They must communicate vision, negotiate for resources, lead meetings, provide performance feedback, and manage new communication technologies, all in an increasingly international workplace. This course prepares students to communicate effectively as managers. Students practice the strategies and techniques in a wide range of written and spoken performance situations. They work individually and in groups on cases and make several presentations during the course.
CPI 8389  Directed Reading in Electronic Commerce

CREDIT HOURS  3.0

PREREQUISITES  Consent of the instructor, good academic

DESCRIPTION

CPI 9200  Action Research in Business Studies

CREDIT HOURS  3.0

PREREQUISITES  Students are admitted into one of RCB's PhD programs

DESCRIPTION  Action research offers unique opportunities to study business practices through projects that are planned, and often executed, in close collaboration with firms and stakeholders. Students critique exemplar action research studies across different business disciplines and they study the roots and contemporary foundation for designing and executing rigorous action research in business studies. The students learn how to organize and present action research projects including: area of concern, theoretical framing, practical problem solving, data collection and analysis, and research contributions. Also, they develop an understanding of how action research can be combined with other research methods and practical problem solving methods to conduct and present business studies.

CPI 9389  Directed Readings in Process Innovation

CREDIT HOURS  1.0 TO 3.0

DESCRIPTION  This course will be taught at a level equivalent to a doctoral seminar and thus limited to doctoral students in Process Innovation and related disciplines. Students may take this course multiple times for course credit as different topics are offered.

*Fees:*
- CER 6050: $80.00
CHEM 6000  Fundamentals of Chemical Analysis
CREDIT HOURS  3.0
PREREQUISITES  CHEM 3410 and MATH 2212 with grades of C or higher
DESCRIPTION  Two lecture and four laboratory hours a week. Chemical equilibria of acid-base systems, metal ion complexes and solubility, and their relationship to chemical analysis, using manual and semiautomatic methods of data collection.

CHEM 6005  Instrumental Analysis
CREDIT HOURS  3.0
DESCRIPTION  Extensive data analysis, report writing and revisions in addition to the laboratory contacts. Contents: signal/noise and electronics; chemical separation; spectroscopic analysis; electrochemistry; mass spectrometry and others. The lab section requires operation of research instruments, multiple team projects, comprehensive data analysis and scientific report writing.

CHEM 6010  Instrumental Methods I: Chromatography
CREDIT HOURS  3.0
PREREQUISITES  CHEM 6000 with grade of B or higher
COREQUISITES  CHEM 6110
DESCRIPTION  Two lecture and three laboratory hours a week. Modern methods, e.g., gas, liquid, thin layer, column, and ion exclusion chromatographic techniques, used to demonstrate the principles of chromatography.

CHEM 6015  Separation in Biosciences
CREDIT HOURS  3.0
PREREQUISITES  CHEM 6000 and CHEM 6010 with grades of B or higher, or equivalent
DESCRIPTION  Two lecture and three laboratory hours per week. Analytical chemistry applications of electrophoresis, gel chromatography precipitation, and ultracentrifugation to molecular recognition and separations in biological systems.

CHEM 6050  Introduction to Fourier-Transform NMR Spectroscopy
CREDIT HOURS  2.0
PREREQUISITES  demonstrated research need and approval of the departmental chair
DESCRIPTION  Introduction to techniques of Fourier-Transform Nuclear Magnetic Resonance Spectroscopy.

CHEM 6100  Chemical Literature
CREDIT HOURS  3.0
PREREQUISITES  CHEM 3110 with grade of B or higher, or equivalent, and consent of instructor
DESCRIPTION  Introduction to the chemical literature. Emphasis on literature searching via database services.

CHEM 6110  Physical Chemistry I
CREDIT HOURS  3.0
PREREQUISITES  CHEM 3410, MATH 2212, PHYS 2211K, and PHYS 2212K with grades of C or higher, or equivalents
DESCRIPTION  Three lecture hours a week. Principles of thermodynamics, transport, and kinetics, and how they serve as a basis for interpreting and interrelating the properties of matter.

</tbody>
</table>
CHEM 6460 Modern Synthetic Methods and Their Applications in Biomedical Sciences  
CREDIT HOURS 3.0  
DESCRIPTION Prerequisites minimum grades of B in both CHEM 4400/6400 and CHEM 4430/6430 or consent of instructor. This course will introduce the most widely used modern synthetic chemistry methods (developed in recent 10 years) and their applications in biomedical sciences to higher level undergraduates (chemistry major) and entry-level graduate students. The main purpose of this course is to build a bridge between classic Advanced Organic Chemistry knowledge and contemporary research of synthetic chemistry, bioorganic chemistry, medicinal chemistry and chemical biology.

CHEM 6490 Special Topics in Organic Chemistry  
CREDIT HOURS 3.0  
PREREQUISITES CHEM 3410 with grade of B or higher, or equivalent  
DESCRIPTION May be repeated if topics are different. Advanced topics in organic chemistry as may fit the needs and interests of the students and faculty. Such topics might be stereoisomerism, heterocycles, alkaloids, organic mechanisms, structure-activity relationships.

CHEM 6600 Biochemistry I  
CREDIT HOURS 5.0  
PREREQUISITES CHEM 3410 with grade of C or higher, or equivalent  
DESCRIPTION Five lecture hours a week. Introduction to biochemical phenomena: proteins, enzymes, vitamins, carbohydrates, lipids, nucleic acids, DNA, RNA, and metabolism.

CHEM 6610 Biochemistry II  
CREDIT HOURS 3.0  
PREREQUISITES CHEM 3410 with grade or B or higher  
DESCRIPTION Three lecture hours a week. Introduction to biochemical phenomena: proteins, enzymes, vitamins, carbohydrates, lipids, nucleic acids, DNA, RNA, and metabolism.

CHEM 6630 Enzymology  
CREDIT HOURS 3.0  
PREREQUISITES one year of organic chemistry (CHEM 3410) with grade of C or higher and one semester of biochemistry (CHEM 6600) with grade of B or higher, or equivalents  
DESCRIPTION (Same as BIOL 6630.) Introduction to enzyme catalysis, with emphasis on the general concepts of enzyme kinetics and the common tools for studying enzymes.

<tbody>
<tr>
<td>CHEM 6640</td>
<td>Fundamentals of Bioinformatics</td>
<td>4.0</td>
<td>PREREQUISITES: BIOL 3800 with grade of C or higher, or equivalent, or written approval of instructor.</td>
<td>DESCRIPTION: (Same as BIOL 6640 and CSC 6640.) Four lecture hours per week. A &quot;hands-on&quot; approach to bioinformatics using PCs, the internet, and computer graphics to analyze, correlate, and extract information from biological databases, emphasizing sequence and structure databases for proteins and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function.</td>
</tr>
<tr>
<td>CHEM 6650</td>
<td>Nucleic Acid Synthesis and Drug Design</td>
<td>3.0</td>
<td>PREREQUISITES: consent of instructor</td>
<td>DESCRIPTION: Lectures on nucleic acid synthesis, mechanism, therapeutics, and detection. Course may be repeated.</td>
</tr>
<tr>
<td>CHEM 6670</td>
<td>Principles and Techniques of Practical Biochemistry</td>
<td>3.0</td>
<td>PREREQUISITES: One semester of biochemistry (CHEM 4600/6600) with grade of B or higher, or equivalent.</td>
<td>DESCRIPTION: This course is cross listed with BIOL 4670/6670. A comprehensive and integrated review of principles and modern techniques found in day-to-day biochemical research laboratories. Topics include, but are not limited to: general principles of biochemical investigations, molecular biology and basic techniques, molecular cloning and gene analysis, protein structure, purification and characterization, biomolecular interactions, basic enzyme analysis, spectroscopic techniques, mass spectrometric techniques, centrifugation, electrophoretic, chromatographic, radioisotope and electrochemical techniques.</td>
</tr>
<tr>
<td>CHEM 6780</td>
<td>Biomolecular Simulations</td>
<td>3.0</td>
<td>PREREQUISITES: CHEM 3410 and CHEM 4120 or equivalents with grades of C or higher, or consent of instructor.</td>
<td>DESCRIPTION: (Same as CHEM 6780.) This is an introductory self-contained course on the application of molecular dynamics and related methodologies by which student with a relatively limited background in chemistry, biology, and computer literacy can learn the fundamentals of research in these areas. In this course, students will learn to do computer calculations that quantify biomolecular interaction concepts discussed in lectures in biology, biochemistry, and biophysics.</td>
</tr>
<tr>
<td>CHEM 6800</td>
<td>Advanced Analytical Chemistry</td>
<td>3.0</td>
<td>PREREQUISITES: consent of instructor</td>
<td>DESCRIPTION: Advanced theories and methods of analytical chemistry. May be repeated if topics are different.</td>
</tr>
</tbody>
</table>
CHEM 6820  Analytical Laboratory
CREDIT HOURS  2.0
PREREQUISITES  consent of instructor
DESCRIPTION  One lecture and three laboratory hours a week. Fundamental principles of analytical chemistry as applied to modern analytical problems.

CHEM 6850  Bioanalytical Chemistry I
CREDIT HOURS  3.0
PREREQUISITES  CHEM 6190 with grade of B or higher, or consent of instructor
DESCRIPTION  Basic concepts of analytical chemistry as applied to biologically-oriented problems.

CHEM 6860  Bioanalytical Chemistry II
CREDIT HOURS  3.0
PREREQUISITES  CHEM 6850 with grade of B or higher, or consent of instructor
DESCRIPTION  Basic principles underlying instrumentation, automation, and laboratory computers used in solving bioanalysis problems.

CHEM 6871  Electrochemical Methods
CREDIT HOURS  3.0
PREREQUISITES  CHEM 4110 with grade of B or higher, or equivalent
DESCRIPTION  Three lecture hours a week. Fundamentals of electrochemistry and application to chemical problems. Special emphasis on electrode reaction mechanisms and interpretation of electrochemical results for organic, inorganic, and biological systems.

CHEM 6890  Responsible Conduct of Research in Chemistry
CREDIT HOURS  2.0
DESCRIPTION  Two lecture hours a week. Responsible conduct of research in chemistry with emphasis on ethics of conducting research, data analysis, conformance to federal and community guidelines, and safety in the chemistry laboratory.

CHEM 6900  Advanced Research Methods
CREDIT HOURS  2.0
COREQUISITES  concurrent enrollment in CHEM 8910, CHEM 8999, or CHEM 9999
DESCRIPTION  Two lecture hours a week. Student learning of interdisciplinary experimental strategies and laboratory procedures in chemistry.

CHEM 6905  Theme-Based Chemistry Laboratory
CREDIT HOURS  2.0
PREREQUISITES  BIOL 3810 with grade of C or higher
DESCRIPTION  Students will work in small groups to develop specific biological or chemical hypotheses, design and carry out experiments to test these hypotheses, and analyze the results they obtain. Topics will vary.

CHEM 7000  Essentials of General Chemistry
CREDIT HOURS  3.0
DESCRIPTION  Three lecture hours a week. Essentials of mass relationships, solutions, gas laws, calorimetry, atomic structure, oxidation/reduction, and chemical nomenclature. For secondary school science teachers not teaching chemistry.
CHEM 7010  Foundations of General Chemistry I  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 7000 with grade of B or higher, or equivalent  
**DESCRIPTION** Three lecture hours a week. Principles of atomic structure, chemical bonding, and molecular structure. For secondary school teachers. Cannot be used for a graduate degree in chemistry.

CHEM 7020  Foundations of General Chemistry II  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 7010 with grade of B or higher, or equivalent  
**DESCRIPTION** Three lecture hours a week. Principles of chemical equilibrium, thermochemistry, acid/base theories, and electro-chemistry. For secondary school chemistry teachers. Cannot be used for a graduate degree in chemistry.

CHEM 7900  Directed Study in Chemistry  
**CREDIT HOURS** 1.0 TO 5.0  
**PREREQUISITES** consent of instructor and advisor  
**DESCRIPTION** Laboratory and recitations to be arranged. Directed study in areas of special interest to teachers or teacher candidates. May be repeated if topics vary.

CHEM 7910  Directed Research in Chemical Education  
**CREDIT HOURS** 1.0 TO 5.0  
**DESCRIPTION** Combined credit received for CHEM 7900 and CHEM 7910 must not exceed fourteen hours. May be repeated if topics vary.

CHEM 8300  Protein Structure and Function  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 6610 with grade of B or higher, or consent of instructor  
**DESCRIPTION** (Same as NEUR 8200.) Discussion of the structure and function of proteins and of enzyme mechanisms. Topics include protein folding and motions, descriptions of enzyme catalysis at a molecular level, consideration of the energetics of biological processes, and enzyme kinetics.

CHEM 8370  Nucleic Acid Structure and Function  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 6610 with grade of B or higher, or consent of instructor  
**DESCRIPTION** (Same as BIOL 8637 and NEUR 8210.) Topics include the structure of nucleic acids, mechanism and control of DNA and RNA synthesis, and interaction of proteins and drugs with nucleic acids.

CHEM 8400  Medicinal Chemistry  
**CREDIT HOURS** 3.0  
**PREREQUISITES** consent of instructor  
**DESCRIPTION** Study of the isolation, characterization, and elucidation of structure and synthesis of medicinally important compounds. The relationship between chemical structure and biological activity of selected drugs, vitamins, hormones, and proteins is reviewed.

CHEM 8440  NMR Spectroscopy for Organic Chemists  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 6050 or the consent of the instructor  
**DESCRIPTION** Theory and application of NMR spectroscopy for characterization and structure elucidation of organic molecules.

CHEM 8850  Graduate Seminar in Chemistry  
CREDIT HOURS  3.0  
PREREQUISITES  Graduate standing in the Department of Chemistry at Georgia State University  
DESCRIPTION  This course deals with the process of giving a scientific seminar. Focus is on production of professional slides, the details of the oral presentation, and development of the ability to answer questions on the material. The course may be repeated.

CHEM 8888  Non-Thesis Paper Writing  
CREDIT HOURS  1.0 TO 4.0  
PREREQUISITES  consent of instructor and the Biotechnology Committee  
DESCRIPTION  Students will write a non-thesis paper based on a review of the literature.

CHEM 8900  Directed Study in Chemistry  
CREDIT HOURS  1.0 TO 5.0  
PREREQUISITES  departmental consent  
DESCRIPTION  May be repeated if topics vary.

CHEM 8910  Directed Research in Chemistry  
CREDIT HOURS  1.0 TO 15.0  
DESCRIPTION  May be repeated if topics vary.

CHEM 8960  Practicum in Chemistry: Laboratory Supervision  
CREDIT HOURS  3.0  
DESCRIPTION  Introduces graduate students to the techniques of good laboratory supervision. This course or its equivalent is required of all chemistry graduate students who serve as laboratory assistants. Credit does not count toward graduation.

CHEM 8970  Topics in Molecular Biological Sciences  
CREDIT HOURS  1.0 TO 2.0  
DESCRIPTION  (Same as BIOL 8970.) May be repeated if topics vary. May be taken for one or two credit hours.

CHEM 8999  Thesis Research  
CREDIT HOURS  1.0 TO 18.0  
DESCRIPTION  

CHEM 9999  Dissertation Research

<td></td>
<td></td>
<td></td>
<td>Two lecture and two lab hours. Seminar combines service learning and digital video production to preserve stories of overlooked local communities.</td>
</tr>
<tr>
<td>COMM 6135</td>
<td>Digital Cinematography</td>
<td>4.0</td>
<td>One lecture and three lab hours per week. A comprehensive introduction to Cinematography covering framing and lighting for different film and electronic imaging formats. Out of class collaboration is required. Student must bear all additional costs for productions during the semester.</td>
</tr>
</tbody>
</table>
COMM 6140  Episodic and Serial Television Production
CREDIT HOURS  4.0
DESCRIPTION  The creative, technical and managerial process of developing serialized entertainment for television as it propagates the Internet, both as audio-visual entertainment and audience response data. Students will learn the development, production, post-production, dissemination and analytic stages of contemporary New Media television practice by working in teams to produce a serial or episodic internet-based TV show. Extensive collaborative production required.

COMM 6145  Digital Editing
CREDIT HOURS  4.0
PREREQUISITES  consent of instructor
DESCRIPTION  Two lecture and two lab hours per week. An intensive exploration of the practice, technique, and aesthetics of editing the motion picture image and sound visual media. Non-linear editing software will be used in the creation of process-oriented exercises and short projects. Students are responsible for the cost of materials required for class projects. Outside class time will be required for collaborative student projects.

COMM 6156  Media Entrepreneurship
CREDIT HOURS  4.0
PREREQUISITES  COMM 6155
DESCRIPTION  Students will develop or continue to develop a media concept, business or technology through an intensive semester long curriculum structured as an incubator/accelerator. This class will study the convergence of media producer and media entrepreneur while students create at the intersection of media, business and technology and culminate with a final presentation of the student's pitch and prototype to media industry professionals.

COMM 6157  Cross-Media Design
CREDIT HOURS  4.0
PREREQUISITES  COMM 6155
DESCRIPTION  Design multimedia stories from the ground up in which movies, video games, web sites, smart phone applications, comic books, and other media are equal partners and all elements of a complete story.

COMM 6158  New Media Production
CREDIT HOURS  4.0
PREREQUISITES  COMM 6155
DESCRIPTION  An exploration of the production visual and audio assets for Internet transmission and interactive media experience, using techniques and forms that best utilize the evolving aesthetics of the digital and interactive media cultures of the moment. New concepts of interactive storytelling in documentary and/or fiction, and for the visualization of characters and their settings will blend cinematic aesthetics with other aesthetic systems.
COMM 6159  Computational Media  
CREDIT HOURS 4.0  
PREREQUISITES COMM 6155  
DESCRIPTION An introduction to the production of creative components of interactive and digital media derived from code and computation that is at the forefront of new forms of personal and public expression. Popular culture in the form of games, websites, interactive television, interactive animation and digital art use computational media, and will be the genres that students will produce.

COMM 6160  Special Topics  
CREDIT HOURS 3.0 TO 4.0  
PREREQUISITES consent of instructor  
DESCRIPTION Graduate faculty and specific tools for this course will change according to the specialized expertise of participating faculty.

COMM 6165  Special Production Topics  
CREDIT HOURS 3.0 TO 4.0  
PREREQUISITES Consent of instructor  
DESCRIPTION Graduate faculty and specific tools for this course will change according to the specialized expertise of participating faculty.

COMM 6170  American Film History I  
CREDIT HOURS 3.0  
DESCRIPTION Discussion of the structural, aesthetic, and social factors that shaped American film from its inception through the classic studio period.

COMM 6180  International Cinemas  
CREDIT HOURS 3.0  
DESCRIPTION An examination of a specific major international film industry or movement and its contributions to world cinema. Films will be studied in their immediate cultural and larger historical and critical contexts. May be repeated once if topic varies.

COMM 6190  Case Studies in National Cinemas/Media  
CREDIT HOURS 3.0  
DESCRIPTION Intensive analysis of a specific national cinema or mediascape, with particular attention paid to the critical, theoretical, and historiographic questions raised by such a study. May be repeated once if topic varies.

COMM 6210  Critical History of Radio and Television  
CREDIT HOURS 3.0  
DESCRIPTION History of television and its origins in radio, focusing on the medium as a technology, an industry, a site of gender and racial representation, a component of American social history, and a cultural forum.

COMM 6220  Media History  
CREDIT HOURS 3.0  
DESCRIPTION This course provides grounding in the major historical landmarks/movements in international cinema and American broadcasting. Its surveys the primary sociocultural, aesthetic, economic, policy, technological, and industrial forces that shaped film and television in the 20th century.

COMM 6240  Documentary Film  
CREDIT HOURS 3.0  
DESCRIPTION The history of non-fiction film and production.

COMM 6250  Producing for Television and Film  
CREDIT HOURS 3.0  
DESCRIPTION Role of the producer in film, broadcasting, and theatre. Refinement of skills in developing program ideas, supervising, and financing productions.

|             | DESCRIPTION                                     |              | Two lecture and two lab hours per week. Intensive exploration of non-linear editing of digital video and audio and title design for the completion of post-production for a short fiction or non-fiction moving image project.                                                                                                                                                                                                                                                                                                                                 }

1.356
COMM 6361  Sound Design
CREDIT HOURS  4.0
PREREQUISITES  COMM 6155
DESCRIPTION  The expressive aesthetics of motion picture sound, its technology and methods of production will provide students the foundations for creating soundtracks for their own films in progress, or for films already completed. Extensive lab time is required. Students must be able to work collaboratively to produce studio and field recordings.

COMM 6365  Experimental Media Production
CREDIT HOURS  4.0
DESCRIPTION  An advanced production course that explores highly-personal avant-garde and experimental media making by any means necessary, including but not limited to: experimental documentary and fiction, found footage/cameraless filmmaking, new media, web video, mobile media, video art, installation, etc.

COMM 6370  Visual Effects for Film
CREDIT HOURS  4.0
DESCRIPTION  This course will explore concepts of visual effects for film, television and games. These concepts will be applied to practical exercises where student will learn to manipulate media through compositing and 2-D animation.

COMM 6375  Music Video Production
CREDIT HOURS  4.0
DESCRIPTION  This advanced course explores the history and developing aesthetics of music video through hands-on production exercises and projects. Participants learn about, analyze, and discuss the variety of modes in which musicians promote themselves, express their worldviews, and tell stories through the music video medium.

COMM 6385  Critical Visual Culture Theory
CREDIT HOURS  3.0
DESCRIPTION  Examines some of the major strands in Critical Theory that have contributed to institute the interdisciplinary field of Visual Culture Studies and the various theories of the image emerging from this field.

COMM 6390  New Media Culture in Theory and Practice
CREDIT HOURS  3.0
DESCRIPTION  Examination of the semiotics, aesthetics, economics, and politics of new media. Combines theoretical readings with hands-on training in the design of websites and multi-media projects.

COMM 6400  Development of Communication and Language Across the Lifespan
CREDIT HOURS  3.0
DESCRIPTION  Theories, nature, basic behavioral aspects and constraints of typical communication and language development across the lifespan.

COMM 6430  Media Industries
CREDIT HOURS  3.0
DESCRIPTION  Examines the historical, technological, economic, political, and social forces shaping the media industries and explores the range of established and emerging theoretical and methodological approaches employed in media industry analysis. 3.0 credit hours.

COMM 6450  Rhetorical Theory and Criticism
CREDIT HOURS  3.0
DESCRIPTION  Development of critical skills useful for evaluating public discourse, with an emphasis on classical and modern theories of rhetoric.

</thead>
<tbody>
<tr>
<td>COMM 6475</td>
<td>Communication and Aging</td>
<td>3.0</td>
<td>(Same as GERO 6475.) A broad overview of the ways in which communication affects, and is affected by, the aging process. Lifespan development and the theory and research in the area of communication and aging.</td>
</tr>
<tr>
<td>COMM 6480</td>
<td>Political Communication</td>
<td>3.0</td>
<td>Political communication in contemporary America with a focus on the rhetoric of political leaders during campaigns and governance.</td>
</tr>
<tr>
<td>COMM 6485</td>
<td>Health Communication</td>
<td>3.0</td>
<td>Provides a comprehensive overview of the major issues, topics, theories and research prevalent in the field of health communication. Topics include interpersonal influence (social support and social network), persuasive message design, and the role of organizations, media, and new communication technology in influencing health attitudes, behaviors, and policy.</td>
</tr>
<tr>
<td>COMM 6490</td>
<td>Communication and Gender</td>
<td>3.0</td>
<td>The influence of gender (social definitions of maleness and femaleness) on public, interpersonal, and mass communication.</td>
</tr>
<tr>
<td>COMM 6500</td>
<td>Visual Communication</td>
<td>3.0</td>
<td>Examination of communication theories that help explain how visual images symbolically interact with audiences. The manifest and latent persuasive functions of visual messages will be explored in a variety of contexts, from the mass media to human interactions.</td>
</tr>
<tr>
<td>COMM 6510</td>
<td>Media and Politics</td>
<td>3.0</td>
<td>Examination of the symbiotic relationship among the media, the political process and the public. Emphasis on how the media’s structures and conventions help identify and frame issues and provide interpretative frameworks for analyzing political messages.</td>
</tr>
<tr>
<td>COMM 6520</td>
<td>Speechwriting</td>
<td>3.0</td>
<td>(Formerly COMM 8500.) Principles and practices in writing manuscript speeches for a variety of contexts, including corporate, organizational, and political. Emphasis on exposition, argumentation, persuasion, and special occasions.</td>
</tr>
<tr>
<td>COMM 6600</td>
<td>Media Management and Marketing</td>
<td>3.0</td>
<td>(Formerly COMM 8630.) Planning, organizing, coordinating, controlling, and marketing the media entity.</td>

<tr>
<td>COMM 6620</td>
<td>Problems in Public Relations</td>
<td>3.0</td>
<td>Explores, critically assesses, and applies theory and research in the analysis of recurring problems in public relations practice, including theories that dominate the field, formative research as applied to planning and implementing campaigns and programs, and evaluative research as applied to measuring public relations effectiveness.</td>
</tr>
<tr>
<td>COMM 6630</td>
<td>Public Relations Writing</td>
<td>3.0</td>
<td>(Formerly COMM 8670.) Experience in constructing and/or analyzing such materials as annual reports, brochures, news releases, position papers, employee publications, and special purpose letters.</td>
</tr>
</tbody>
</table>
COMM 6650  International Communication  
CREDIT HOURS  3.0  
DESCRIPTION  Critical and comparative approaches to the study of communication systems and journalism at the national, regional, and global levels. Analysis of issues and implications of the globalization of mass media, information systems, and culture. Strategies for international communication research.

COMM 6660  Corporate Communication  
CREDIT HOURS  3.0  
DESCRIPTION  Structures, functions and outcomes of corporate communication policies and behaviors; corporate missions, business plans and the design of strategic communication plans to accomplish goals in contexts of corporate cultures, budget audiences, and environmental issues.

COMM 6670  Communication Consulting  
CREDIT HOURS  3.0  
DESCRIPTION  (Formerly COMM 8110.) Methods utilized in providing individuals and organizations with assistance in developing communication skills. Assessment of client needs and implementation of various programs.

COMM 6840  Computer Graphics Imaging  
CREDIT HOURS  4.0  
DESCRIPTION  (Same as CSC 6840.) Study the theories, techniques and tools for creating 3D graphics content. Topics include 3D modeling, camera, lighting, materials, texture mapping, physics based modeling, basic animation, and rendering techniques (such as tracing and radiosity).

COMM 6841  Computer Animation  
CREDIT HOURS  3.0  
PREREQUISITES  COMM 6840  
DESCRIPTION  (Same as CSC 6841.) 3D computer animation including classical animation techniques, cel animation, key framing, storyboarding, physically-based modeling, character animation, lighting, camera placement and motion, motion blur, compositing, and other relevant topics.

COMM 6910  Special Project  
CREDIT HOURS  3.0  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Supervised experience in individual projects developed out of the student's professional or vocational interests and responsibilities.

COMM 6915  Special Production Project  
CREDIT HOURS  3.0 TO 4.0  
PREREQUISITES  Consent of instructor  
DESCRIPTION  Supervised experience in individual projects developed out of the student's professional or vocational interests and responsibilities. There is a fee associated with this course that must be paid on enrollment in the course.

COMM 6940  Television Studies  
CREDIT HOURS  3.0  
DESCRIPTION  Course traces development of television studies. Also looks at recent work in the field as a means of assessing the changing nature of television and of television studies as an area of inquiry. Readings explore range of industrial, sociocultural, textual and audience analyses, approaches and issues.

1.361
COMM 8140  Communication Campaigns  
CREDIT HOURS  3.0  
DESCRIPTION  Discussed major theories and principles of persuasion and attitude change, message design and dissemination strategies as they relate to communication campaigns. Provides knowledge and skills required to create and evaluate persuasive campaigns in many domains, such as health, politics, social issues, and the environment.

COMM 8160  Style and Narrative Analysis  
CREDIT HOURS  3.0  
DESCRIPTION  Methods of qualitative analysis for studying the style and narration of film, television, and/or new media texts. An emphasis on close readings of the formal properties of texts. May be repeated once if content varies.

COMM 8210  Audiences and Cultural Studies  
CREDIT HOURS  3.0  
DESCRIPTION  Situates media audiences within a cultural studies framework to explore various ethnographic and qualitative approaches. Examines the evolution of the cultural studies approach to audiences, from foundational works to current approaches that see audience activity as less about responding to media texts and more about developing multiple interactive practices inspired by and lined with media within the context of class, race, gender and sexuality.

COMM 8385  Critical Visual Culture Theory  
CREDIT HOURS  3.0  
DESCRIPTION  Examines some of the major strands in Critical Theory that have contributed to institute the interdisciplinary field of Visual Culture Studies and the various theories of the image emerging from this field.

COMM 8400  Topics in Communication Research Methods  
CREDIT HOURS  3.0  
DESCRIPTION  Seminar in various topics related to the theories and methods of advanced research in communication. May be taken more than once for credit as content varies.

COMM 8410  Qualitative Methods  
CREDIT HOURS  3.0  
DESCRIPTION  Philosophy and practice of qualitative methods in communication; problems and projects.

COMM 8420  Media Historiography  
CREDIT HOURS  3.0  
DESCRIPTION  Examination of theoretical and methodological approaches to researching media history.

COMM 8430  Media Industries  
CREDIT HOURS  3.0  
DESCRIPTION  Examines the historical, technological, economic, political, and social forces shaping the media industries and explores the range of established and emerging theoretical and methodological approaches employed in media industry analysis. 3.0 credit hours.

COMM 8530  History of Rhetorical Theory I  
CREDIT HOURS  3.0  
DESCRIPTION  Develop familiarity with the origins and evolution of rhetorical theory prior to the mid twentieth century, with an emphasis on major theoretical innovations.

COMM 8535  History of Rhetorical Theory II  
CREDIT HOURS  3.0  
DESCRIPTION  Development of theoretical skills for analyzing rhetorical artifacts, with an emphasis on theoretical innovations post-1965.

CSD COMMUNICATION SCI & DISORDERS

CSD 6480 Hearing Science and Disorders
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course focuses on the application of the principles of hearing science and audiology. Students study acoustics, anatomy and physiology, and disorders of the auditory system. Attention is given to the administration and interpretation of pure tone and speech audiometry.

CSD 6490 Audiologic Rehabilitation
CREDIT HOURS 3.0
PREREQUISITES CSD 4480 or CSD 6480 with a minimum grade of "C" or consent of instructor
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course focuses on the application of the principles of rehabilitation of children and adults with hearing impairment. Emphasis is placed on design and implementation of individualized intervention programs with consideration of the impact of hearing loss, and the selection of appropriate amplification.

CSD 7450 Language Disorders in Young Children
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION Students discuss current perspectives on the assessment and intervention of language disorders in young children from infancy through the preschool years. Emphasis is placed on factors influencing language development, formal and informal procedures for evaluating language skills, and intervention techniques that are functionally based.

CSD 7455 Language Disorders in School Age Children
CREDIT HOURS 3.0
PREREQUISITES SPCH 4400 or COMM 6400 or consent of instructor
DESCRIPTION This course focuses on language disorders in school age children from kindergarten through adolescence. Emphasis is placed on language assessment and intervention principles in school settings, including the relationship between language impairments and reading disorders with specific attention to the impact of these disorders on academic achievement.

CSD 7510 Neuroscience for Communication
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course provides in-depth study of the anatomy and physiology of the nervous system. Particular emphasis is paid to the neural bases of speech, hearing, and language and to the behavioral effects of nervous system damage.

CSD 7520 Speech Sound Disorders
CREDIT HOURS 3.0
PREREQUISITES Phonetics (Spch 3000) with a minimum grade of "C"
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION Students examine normal and disordered speech sound production. Emphasis is placed on speech sound development, evaluation of speech sound disorders, and design of intervention programs. Articulation and phonological treatment approaches are covered, and current techniques are emphasized.

CSD 7590  Contemporary Issues in Communication Disorders
CREDIT HOURS  2.0
PREREQUISITES  Restricted to students majoring in communication disorders
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course provides an overview of the profession of communication disorders including state and national certification requirements, professional ethics, state and federal regulations, writing for the profession, state and national professional associations, and current issues affecting the profession.

CSD 7600  Swallowing and Swallowing Disorders
CREDIT HOURS  3.0
PREREQUISITES  CSD 7510 and CSD 7530
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  Study focuses on the mechanism of normal and disordered swallowing in adults and children. Strategies for the assessment, treatment, and management of swallowing disorders in a variety of clinical settings are emphasized. Observations in various clinical environments are required.

CSD 7610  Motor Speech Disorders
CREDIT HOURS  3.0
PREREQUISITES  CSD 7510 with a minimum grade of "C" or consent of instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  Study focuses on the assessment, management, and treatment of motor speech disorders in adults and children. Emphasis is placed on methods of evaluation and differential diagnosis of the dysarthrias and apraxia of speech as well as approaches to rehabilitation and management of these disorders.

CSD 7630  Fundamentals of Clinical Practice
CREDIT HOURS  2.0
PREREQUISITES  Restricted to students majoring in Communication Sciences and Disorders
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course introduces students to policies and procedures used in clinical practice in communication disorders. Through observation, lecture, and discussion, students examine the implementation of speech-language pathology service in a variety of settings. Emphasis is placed on developing case reviews, writing goals, collecting data, and writing progress notes and reports. Supervision issues, treatment issues, behavior management, and reimbursement policies are discussed. Laboratory participation required.

CSD 7700  Observational Experiences in Communication Disorders
CREDIT HOURS  1.0 TO 2.0
PREREQUISITES  Consent of instructor
DESCRIPTION  This course is designed to provide students with opportunities to observe speech-language pathologists in a variety of clinical, medical, and educational settings as they evaluate and treat clients with communication disorders. Emphasis will be on developing observational and reporting skills. This experience will prepare students for their clinical practicum experiences. (Repeatable).
CSD 7840  Research Methods in Communication Disorders
CREDIT HOURS  3.0
REQUIREMENTS  A minimum Grade of "B" is required for this course
DESCRIPTION  This course focuses on historical, current, and future research directions in Speech and Language Pathology, as well as research methodology. Emphasis will be placed on translation of research into clinical practice.

CSD 7910  Clinical Practicum in Communication Disorders
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  CSD 7630 with a minimum grade of "B" or consent of instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  During this practicum, students provide speech and language services to a variety of clients in the university's Speech-Language-Hearing Clinic. Emphasis is placed on the application of course work to the evaluation and treatment of individuals with communication disorders. (Repeatable).

CSD 7950  Communication Disorders Medical Internship
CREDIT HOURS  3.0 TO 9.0
PREREQUISITES  CSD 7910 with a minimum grade of "B" and consent of instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  In this intensive, full-time practicum experience, the student evaluates and treats individuals with communication disorders in a medical setting such as a hospital, rehabilitation center, or health care facility. (Repeatable).

CSD 7951  Communication Disorders School Internship
CREDIT HOURS  3.0 TO 9.0
PREREQUISITES  CSD 7910 with a minimum grade of "B" and consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  In this intensive, full-time practicum experience, the student evaluates and treats individuals with communication disorders in a school setting. (Repeatable).

CSD 7990  Master's Thesis
CREDIT HOURS  1.0 TO 6.0
PREREQUISITES  Communication Sciences and Disorders major
DESCRIPTION  Students earn credit for supervised development and preparation of the project or thesis for the M.Ed. degree with a major in communication sciences and disorders.

CSD 8310  Advanced Studies in Language Development
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course provides an in-depth study of language development for school age children. Emphasis is placed on current research and application of information to classroom and therapeutic settings.
CSD 8330  Acquired Neurocognitive-Communication Disorders
CREDIT HOURS  3.0
PREREQUISITES  Either COMM 6400 or consent of instructor
DESCRIPTION  Students obtain knowledge about cognitive and communication disorders related to traumatic brain injury, dementia, and right brain damage. Topics include attention, memory, executive function, underlying neuropathologies, and contemporary methods for the evaluation and treatment of these disorders.

CSD 8800  Global Perspectives in Communication Disorders
CREDIT HOURS  3.0
PREREQUISITES  Consent of instructor
DESCRIPTION  This course prepares graduate students to provide services to individuals with communication disorders in a global context. Students gain multicultural experiences as a result of travel to another country. Students develop skills to support the learning of individuals from diverse racial, cultural, ethnic, and socioeconomic backgrounds. Students will develop global perspectives and comparative knowledge of educational, clinical and medical systems in other counties. (Repeatable).

CSD 8810  Directed Readings in Communication Sciences and Disorders
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  Consent of Instructor
DESCRIPTION  This course is designed for individual projects or readings. Students intensively study and/or apply knowledge in selected areas of communication sciences and disorders through focused readings or special projects. The goal of the course is to give students opportunities to acquire knowledge and understanding of specific topics complementing required and elective courses in their planned programs of study. (Repeatable).

CSD 8850  Independent Study in Communication Sciences and Disorders
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  Consent of Instructor
DESCRIPTION  This course is highly personalized to meet the needs and career interests of the student. Students intensively study and/or apply knowledge in selected areas of communication sciences and disorders through focused readings, special projects, or research. The goal of the course is to give students opportunities to acquire knowledge and understanding of specific topics complementing required and elective courses in their planned programs of study. (Repeatable).

CSD 8970  Research Seminar in Communication Sciences and Disorders
CREDIT HOURS  1.0
PREREQUISITES  Consent of Instructor
DESCRIPTION  Students discuss selected topics in Communication Sciences and Disorders. (Repeatable).

CSD 9930  Grant Writing in the Social and Behavioral Sciences
CREDIT HOURS  3.0
PREREQUISITES  Consent of Instructor
DESCRIPTION  Students will become familiar with federal agencies and basics of writing a fundable proposal. Students will prepare a grant proposal of quality for submission to federal agencies supporting research in the behavioral and health sciences.
### CSD 9990

**Dissertation**

- **Credit Hours**: 3.0 TO 9.0
- **Prerequisites**: Consent of Instructor

This course involves the research and writing of a doctoral dissertation. The dissertation and defense are the culminating activities in the student's doctoral program, demonstrating high levels of scholarly and intellectual activity. The dissertation is an original contribution to knowledge in the field of study through disciplined inquiry. (Repeatable).
CIS 8000  Information Technology Project Management

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION  This course examines the defining characteristics of IT projects and introduces the student to a variety of project management techniques that can be applied in an IT project context. Managing scope, time, cost, and quality will be explored. The course will cover management issues associated with packaged software implementation (e.g., ERP systems), in-house developed systems, and outsourced projects.

CIS 8005  Data Programming for Analytics

CREDIT HOURS  3.0
DESCRIPTION  Prerequisites. MRM 8000. This course builds upon the student's foundation of programming principles through the introduction of application programming for data analysis. Major areas covered include inheritance and polymorphism, common programming data structures, and file and database access. Students will implement data analysis applications, which will be evaluated according to advanced programming principles. The programming language will be noted in the course listing for each semester.

CIS 8010  Process Innovation

CREDIT HOURS  3.0
REQUIREMENTS  CSP: 1, 4, 5, 7
DESCRIPTION  Prerequisites: None. This course examines the design of an organization's structure and business processes. The course primarily focuses on the application of information technologies to transform organization and improve their performance. Methods of introducing and implementing information technologies to enable organizational change are examined.

CIS 8020  Systems Integration

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 2, 3, 7
DESCRIPTION  This course focuses on the integration of information systems in organizations, the process by which different computing systems and software applications are linked together physically or functionally. It examines the strategies and methods for blending a set of interdependent systems into a functioning or unified whole, thereby enabling two or more applications to interact and exchange data seamlessly. The course will explore tools and techniques for systems integration as well as proven management practices for integration projects.

CIS 8025  Mobile Application Development

CREDIT HOURS  3.0
PREREQUISITES  CIS 3270 or equivalent
REQUIREMENTS  CSP 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION  This course introduces students to the design and implementation of Android and iOS applications for mobile devices. Students learn how to set up development environments for both platforms and will develop an app for both platforms. In addition, web application development related to mobile apps will be discussed. This course covers object-oriented programming concepts as well as programming languages used for Android and iOS application development.
CIS 8030  
**Software Requirements Management**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
CIS 3210 or CIS 3215 or CIS 3260 or CIS 3270

**DESCRIPTION**  
This course provides an introduction to the fundamentals of software requirements management. Topics covered include requirements gathering, system modeling and software specifications. The major emphasis is on using a variety of modeling tools and techniques to define a system specification. Students are also exposed to emerging topics such as components, patterns and reuse that promise major improvements in software development productivity.

CIS 8040  
**Fundamentals of Database Management Systems**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
CIS 3210 or CIS 3260

**REQUIREMENTS**  
CSP: 1, 2, 3, 4, 5, 6, 7, 8

**DESCRIPTION**  
Developing and managing efficient and effective database applications requires understanding the fundamentals of database management systems, techniques for the design of databases, and principles of database administration. This course emphasized database concepts, developments, use and management in three main sections: database concepts, practice, and emerging trends. Relational database systems are the main focus, but other types, including object- oriented databases, are studied. Practical design of data- bases and developing database applications using modern software tools will be emphasized.

CIS 8045  
**Unstructured Data Management**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
CIS 8040

**DESCRIPTION**  
This course addresses the unstructured data management skills needed for modern data analysis including those salient to big data and real-time data environments. The focus is on unstructured data and its environment. Unstructured data includes web data (blogs, text), user generated content, social media, location-aware data, and digital media among others. Topics covered include extraction methods for real time audio and video data, data capture, cleaning, representation, storage, queries, manipulation, and real-time data management. Also included as they apply to unstructured data environment are data security, governance, and visualization. Students will learn natural language processing and geo-spatial analytical tools.

CIS 8050  
**Mobile and Wireless Networks**

**CREDIT HOURS**  
3.0

**PREREQUISITES**  
None

**REQUIREMENTS**  
CSP: 1, 2, 3, 4, 5, 6, 7, 8

**DESCRIPTION**  
Business Telecommunications and Networks. Formerly CIS 8170. CSP: 1, 2, 3, 4, 5, 6, 7, 8. This course provides a broad introduction to network technologies, architectures, services and management necessary to meet business needs; including network and internetwork designs, applications and telecom industry.

<td>CIS 8060</td>
<td>Supply Chain Management</td>
<td>3.0</td>
<td>CIS 8010, and either MBA 8125 or CIS 8100</td>
<td>CSP: 1, 2, 3, 4, 5, 6, 7, 8 (Same as CPI 8060)</td>
<td>Students develop the ability to conceptualize, design, and implement supply chains aligned with product, market, and customer characteristics. Business competition is now between supply networks rather than individual corporations. Managing the flow of products, information, and revenue across supply chains differentiates the ability of supply networks to fulfill customer needs. Students develop the ability to evaluate how information flows can substitute for the stock of physical resources, such as inventory, and why such systems succeed or fail. They assess how internet technologies, dynamic markets and globalization are impacting supply chain strategies and practices, including logistics, digital coordination of decisions and resources, inventory and risk management, procurement and supply contracting, product and process design, and revenue management.</td>

<td>CSP: 1, 2, 3, 4, 5, 6, 7, 8</td>
<td>This course develops knowledge and skills in risk based information security management geared toward preventive management and assurance of security of information and information systems in technology-enabled environments. It focuses on risk assessments, risk mitigation strategies, risk profiling and sensitivity, quantitative and qualitative models of calculating risk exposures, security controls and services, threat and vulnerability management, financing the cost of security risks, and return on investment for information security initiatives. The course presents several risk assessment models with an ultimate goal of identifying and realizing the unique and acceptable level of information risk for an organization.</td>
</tr>
</tbody>
</table>
CIS 8086  Protecting Information Assets
CREDIT HOURS 3.0
PREREQUISITES None
DESCRIPTION This course provides students with a foundation and understanding of IT auditing services focused on protecting information assets. Topics include security, integrity, and availability of information systems. The course will allow the student to establish the scope, control environments and identify risks associated with information assets. It will also cover the protection of assets involving state-of-the-art technologies such as virtualization and cloud computing. Students will understand how assessing risk is an important first step in undertaking the proper examination of an organization’s IT processes and technologies. Further, the course will cover latest standards and frameworks related to the auditing of information assets.

CIS 8090  Enterprise Architecture
CREDIT HOURS 3.0
PREREQUISITES CIS 8030
DESCRIPTION This course will explore the concepts, principles, and state of the art methods in enterprise architectures, including architectural styles, architecture description languages (ADL), software connectors, dynamism in architectures, and architecture based testing and analysis. The course will help understand the role of architecture in software engineering, specifically during requirements analysis, design (including object oriented design and related notations, such as UML), and implementation. The course will also cover practical applicability of architectures in software reuse and component interoperability platforms (such as CORBA, Enterprise JavaBeans, COM/ DCOM, and NET).

CIS 8100  Management of Information Services
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS CSP: 1, 2, 3, 4, 5, 6, 7, 8
DESCRIPTION This course addresses the many management issues unique to the information services function within organizations. Coverage includes information systems planning, managing the information infrastructure, justifying information technology investments, the costing of services and networks evaluating information system performance, alternative information service delivery modes, managing distributed and end user computing, project and operations management, systems security, and the management of information technology professionals.

CIS 8150  Machine Learning for Analytics
CREDIT HOURS 3.0
DESCRIPTION The course will cover theory, methods, and tools for automated inference from data. This introductory course will include (1) supervised learning, (2) unsupervised learning methods, (3) graphical structure models, and (4) deep learning. The course will prepare students in the fundamentals of machine learning, as well as provide practical skills in apply current software tools to machine inference from large data sets.
CIS 8200  
**Information Systems Strategy**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CIS 8000 or MBA 8125  
**REQUIREMENTS** CSP: 1, 4, 5, 6, 7  
**DESCRIPTION** This course emphasizes the use of information technology to develop distinct competitive advantage in relations with competitors, customers, and suppliers, and with respect to products and services. It examines these central issues: 1) the design of information systems offering strategic advantages; 2) the competitive potential for strategic use of information systems; 3) special issues related to interorganization information systems; 4) special issues related to strategic use of information systems involving international networks; 5) development of financial and audit structures for strategic use of information systems; and 6) the impact of information technology on the global business community.

CIS 8220  
**International Information Technology Issues and Policy**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**REQUIREMENTS** CSP: 1, 2, 4, 5, 6  
**DESCRIPTION** Same as IB 8710. This course examines the role of technology as an integral and key factor in the delivery and support of information and communication technologies in the global economy for both traditional and electronic businesses, and the related technical and managerial issues. The first half of the course is grounded in business strategy and information technology fit, culture and national policy theory. The second half examines business in practice in the different world regions. Illustrative case studies coupled with readings of current press, class discussion, and practitioners from the international business community who provide real-world insight and used to bridge concepts and practice. In a major project, students access the attractiveness of a particular country for a real company.

CIS 8210  
**Global Systems Sourcing**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**REQUIREMENTS** CSP: 1, 2, 3, 4, 5, 6, 7, 8  
**DESCRIPTION** This course is designed to assist students in developing the knowledge and skills needed to work with systems integration vendors and processes. It focuses on the concepts and methods associated with designing, planning, contracting for and overseeing information technology infrastructure and applications. The course familiarizes students with the legal issues related to preparing, distributing, and evaluating requests for proposal (RFP) and subsequent integration contracting matters. Students will prepare and evaluate systems proposals for various sourcing and managing third party relations.

CIS 8300  
**Software Quality Management**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CIS 8030  
**REQUIREMENTS** CSP: 1, 2, 3, 4, 5, 6, 7, 8  
**DESCRIPTION** The course will cover methods and tools for achieving software quality assurance at various levels of a software system including at the module, subsystem, and system levels. State of the art tools and techniques including inspections, version control and configuration management will be covered. Also, the role of standards, policies, and procedures will be discussed. The course will prepare students to develop a software quality assurance program in structured, organized ways. This course should provide practical knowledge of a variety of quality assurance techniques, and an understanding of some of the tradeoffs between techniques.
CIS 8388  
**Capstone Project for MSISAC Program**

**CREDIT HOURS** 1.0 TO 3.0  
**PREREQUISITES** Department approval  
**REQUIREMENTS** CSP: 1, 2, 3, 4, 5, 6, 7, 8  
**DESCRIPTION** This project provides an opportunity for students to apply the knowledge and skills acquired from all courses in the MS ISAC program. The project will be designed to perform work on any of the topics like IT Audit, IT Security, IT Risk Assurance and IT Governance. The student is expected to work on a project for a client organization (external or internal). Students will, individually or in teams, develop a project plan with milestones like project charter, deliverables etc. for the client.

CIS 8389  
**Directed Readings in Information Systems**

**CREDIT HOURS** 1.0 TO 3.0  
**PREREQUISITES** Consent of the instructor, good academic standing  
**DESCRIPTION** Open to CIS majors only. Required for MS/CIS thesis option.

CIS 8391  
**Field Study in Computer Information Systems**

**CREDIT HOURS** 1.0 TO 6.0  
**PREREQUISITES** Department Approval and a GPA 3.3 or greater  
**REQUIREMENTS** CSP: As req  
**DESCRIPTION** by company. This course is designed to provide the senior level under graduate student or Master’s student with an opportunity to apply the business skills learned at the Robinson College of Business (RCB) in an approved site off or on campus. The course immerses students in the planning and execution of complex activities involved in both large and small businesses.

CIS 8630  
**Business Computer Forensics and Incident Response**

**CREDIT HOURS** 3.0  
**PREREQUISITES** ACCT 8680 or CIS 8080  
**REQUIREMENTS** CSP: 1, 6, 7  
**DESCRIPTION** This course provides a strategic exploration into the prevention and response to intentional abuse of business information systems. This abuse frequently leads to diversion of resources, interruptions of service and corruption of data that develop into a variety of losses that can seriously impair an organization’s performance. Students will be prepared to plan and manage organizational incident and forensics preparedness, including information security policies, information controls, information practices, incident response plans, forensic readiness, and preservation of evidence in the form of electronically stored information. The course includes experiments in the use of forensics tools for investigation of organizational policy violations.

CIS 8640  
**IT Services Management and Governance**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Permission of the program director  
**REQUIREMENTS** CSP: 1, 2, 3, 4, 5, 6, 7, 8  
**DESCRIPTION** The course will cover topics such as Service/Help Desk, Configuration Management, Incident Management, Problem Management, Release Management, and Change Management, IT Security, Service Level management, Capacity planning, Business Continuity Management, Availability and IT Financial Management.
CIS 8670
Enterprise Resource Planning Systems: Implementation and Management

CREDIT HOURS
3.0

REQUIREMENTS
CSP: 1, 2, 3, 4, 5, 6, 7, 8

DESCRIPTION
This course will explore the concepts, principles, and state of the art methods in successfully integrating Enterprise Resource Planning (ERP) systems into extant enterprise architectures. The course will help both functional area and IT managers understand the respective role of users, enterprise architects, developers and managers in the selection, preparation, implementation and management of large and complex enterprise applications. This is NOT a hands on ERP tool based course, rather it is a precursor to deeper involvement in ERP management, implementation and, if desired, administration. As such the course will be of value to students in both technical and managerial programs.

CIS 8672
ERP Business Process Scenario and Process Analysis

CREDIT HOURS
3.0

PREREQUISITES
Permission of the program director

REQUIREMENTS
CSP: 1, 2, 3, 4, 5, 6, 7, 8

DESCRIPTION
This course will explore the concepts of organizational structure, master data, transactional data, business scenarios and processes, and business process integration points. Examples of business scenarios and their associated processes are Record to Report (Financial Accounting), Order to Cash (Sales and Distribution), Procure to Pay (Materials Management: Procurement, Inventory, and Warehouse Management), Manufacturing (Production Planning), and Hire to Retire (Human Capital Management). Understanding the integration points between business processes is critical to properly set up and maintain the ERP end state design. Examples include the integration between the Order to Cash post goods issue transaction and Inventory Management and Financial Accounting.

CIS 8674
ERP Customization

CREDIT HOURS
3.0

PREREQUISITES
Permission of program director

REQUIREMENTS
CSP: 1, 2, 3, 4, 5, 6, 7, and 8

DESCRIPTION
This course will explore the concepts and tools for customizing ERP solutions to meet the enterprise's business requirements. Customizing allows the enterprise to ensure that the ERP end state design properly reflects the enterprise's organizational structure and master data and business process requirements. For example, the Order to Cash (OTC) scenario configuration is used to create and maintain the organizational and master data elements. Next, the OTC business processes are configured to leverage the ERP standard functionality. Lastly, when the business requirements cannot be met by the standard functionality, additional customization may be required.

CIS 8676
ERP Technologies

CREDIT HOURS
3.0

PREREQUISITES
Permission of program director

REQUIREMENTS
CSP: 1, 2, 3, 4, 5, 6, 7, and 8

DESCRIPTION
This course will explore state-of-the-art technologies for running an enterprise resource planning (ERP) system. These technologies include Solution Manager, Personas, Mobility, HANA, and Cloud Computing which dramatically reduce total cost of ownership (TCO). Solution Manager supports project implementations, technology and applications, and business operations. Personas provides capabilities to personalize ERP user screens resulting in improved productivity. Mobility features help increase workforce productivity by deploying solutions, such as sales and analytics, to mobile devices. The High-Performance Analytic Appliance (HANA) is an in-memory database system that allows exponentially faster query execution.

</tbody>
</table>
CSC 6110  Introduction to Embedded Systems Laboratory
CREDIT HOURS  4.0
PREREQUISITES  CSC 3210 for CSc student or PHYS 3500 for Physics students or equivalent course work with consent of instructor
DESCRIPTION  (Same as PHYS 4110.) Four lecture hours per week. Topics taken from: review of basic logic functions; automatic systems; microprocessor-based systems and applications; embedded system software survey; microprocessor-based applications; digital communications; and embedded systems programming.

CSC 6120  Introduction to Robotics
CREDIT HOURS  4.0
PREREQUISITES  CSC 3320 and MATH 3030
DESCRIPTION  The course focuses on programming robots. We will use robotic kits for the hardware, and program them using state-of-the-art languages, such as NQC.

CSC 6210  Computer Architecture
CREDIT HOURS  4.0
PREREQUISITES  CSC 3210
DESCRIPTION  Logic design, combinatorial and sequential circuits, input-output devices, memory, processors, controllers, parallel architectures, bit-slicing, reduced instruction sets.

CSC 6220  Computer Networks
CREDIT HOURS  4.0
PREREQUISITES  CSC 3320 and MATH 3030
DESCRIPTION  Introduction to computer networks; details of layered network protocols with emphasis on functionality and analysis. Principles of relevant state-of-the art network standards.

CSC 6221  Wireless Networks and Mobile Computing
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220 with grade of C or higher, or equivalent
DESCRIPTION  Introduction to wireless communication networks and mobile computing. Topics include: wireless communications technology; communication protocols in wireless networks; representative network types such as cellular wireless networks, wireless LANs, wireless ad hoc networks and wireless sensor networks, and mobile communication systems.

CSC 6222  Introduction to Information Security
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220 or CSC 6220 with a grade of C or higher
DESCRIPTION  This course provides an initial overview on the topic of Information Security. It covers the basics of encryption and decryption, program security including viruses and other malicious code, application security, security in operating systems, security in networks and distributed systems, different methods of administering security, and legal and ethical issues in computer security.

CSC 6225  Internetwork Programming
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220
DESCRIPTION  This course provides students with an understanding of the Internet and details regarding the protocols used in the Internet. The students will also learn key components of network programming using the most-widely used application program interface, sockets. Topics to be covered include: Internet Protocol (IP), Transport Layer Protocol- Transmission Control Protocol (TCP), Transport Layer Protocol-User Datagram Protocol (UDP), and Unix/Linux Network Programming.

CSC 6360 Mobile Application Development

CREDIT HOURS 4.0
PREREQUISITES CSC 3410 with C or better grade
DESCRIPTION Crosslisted with CSC 4360. This course will cover the technologies, tools, frameworks and languages that are most commonly used in developing mobile applications for multiple mobile platforms. Topics include mobile application design, user interfaces, mobile application demographic and platform delivery, mobile networking, hosting infrastructure, and mobile security.

CSC 6370 Web Programming

CREDIT HOURS 4.0
PREREQUISITES CSC 2310
DESCRIPTION The course introduces the student to programming techniques required to develop Web applications. Topics include: HTML forms, JavaScript, Servlets and Java Server pages, PHP and MySQL, Web access to Oracle databases, and XML.

CSC 6380 Windowing Systems Programming

CREDIT HOURS 4.0
PREREQUISITES CSC 2310
DESCRIPTION Development of application software within windowed environments. Concepts of programming including graphical user interfaces, event-driven architectures, and object-oriented language programming with an application programming interface.

CSC 6510 Automata

CREDIT HOURS 4.0
PREREQUISITES CSC 2510
DESCRIPTION Theory of computing devices and the languages they recognize.

CSC 6520 Design and Analysis of Algorithms

CREDIT HOURS 4.0
PREREQUISITES CSC 3410 and MATH 3030
DESCRIPTION Techniques for designing efficient algorithms; analysis of algorithms; lower bound arguments; and algorithms for sorting, selection, graphs, and string matching.

CSC 6610 Numerical Analysis I

CREDIT HOURS 3.0
PREREQUISITES MATH 2215 and the ability to program in a high-level language
DESCRIPTION Nature of error; iteration; techniques for nonlinear systems; zeros of functions; interpolation; numerical differentiation; Newton-Cotes formulae for definite integrals; and computer implementation of algorithms.

CSC 6620 Numerical Analysis II

CREDIT HOURS 3.0
PREREQUISITES MATH 3030 or MATH 3435, and the ability to program in a high-level language
DESCRIPTION (Same as MATH 6620.) Gaussian Elimination for linear systems; least squares; Taylor, predictor-corrector and Runge-Kutta methods for solving ordinary differential equations; boundary value problems and partial differential equations.

CSC 6630 Introduction to Matlab Programming

CREDIT HOURS 4.0
DESCRIPTION This course is designed to give science majors experience with the Matlab programming language. Matlab is used for scientific applications involving images, sound, and other signals. No previous programming experience is needed.
CSC 6640  
**Fundamentals of Bioinformatics**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** BIOL 3800 or written approval of instructor  
**DESCRIPTION** (Same as BIOL 6640 and CHEM 6640.) Four lecture hours per week. A "hands-on" approach to bioinformatics using PCs, the internet, and computer graphics to analyze, correlate, and extract information from biological databases, emphasizing sequence and structure databases for protein and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function.

CSC 6650  
**Introduction to Bioinformatics**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 3410, BIOL 1103K, and CHEM 1211K  
**DESCRIPTION** The explosion in biological knowledge due to various genome projects and other high-throughput techniques has created entirely new fields and industries, and a need for trained computational biologists who are familiar with Biology, Statistics, and Computer Science. This course will introduce principles underlying current techniques in the analysis of different kinds of biological data. Topics include: sequence alignment, database searching, microarrays, structure analysis, and phylogenetic tree algorithms.

CSC 6710  
**Database Systems**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 3410  
**DESCRIPTION** An introduction to the fundamental concepts and principles that underlie the relational model of data. Topics include formal query languages; SQL; query optimization; relational database design theory; and physical database design, integrity, security, and concurrency control.

CSC 6720  
**Human-Computer Interaction**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** CSC 2310  
**DESCRIPTION** Techniques and methodologies for development of user interfaces in software systems; topics include interaction styles, interaction devices, user documentation, and interface assessment.

CSC 6730  
**Data Visualization**  
**CREDIT HOURS** 4.0  
**PREREQUISITES** for computer science majors, CSC 2310 with grade of C or higher, or equivalent; for all other majors, consent of instructor  
**DESCRIPTION** Data visualization is about displaying data in visual forms such as charts, diagrams, or 3D models. This course is targeted towards students who are interested in using data visualization in their work as well as those who are interested in developing visualization systems. Topics include the theoretical basis (e.g. Gestalt theory, visual attention, visual complexity theories), visualization techniques (e.g. interactive maps, time series charts, scatterplot maps, trees, networks, graphs, etc.), and visualization tools (e.g. Google Chart Tools, Processing). Students will learn basic visualization principles, how to choose the right kind of display for specific purposes, and how to provide interactive features for the user interface.

CSC 8221  Optical and Wireless Networks
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220/6220
DESCRIPTION  Topics may include various optical and wireless networks, enabling technologies, multiplexing techniques, WDM, broadcast networks, wavelength-routed networks, network architectures, protocols, personal communication service (PCS) networks, location management, network algorithms, and optimization problems.

CSC 8222  Network Security
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220 or CSC 6220
DESCRIPTION  This course provides students with a detailed understanding of the fundamentals of network security. Significant focus will be placed on the five phases of network attacks: reconnaissance, scanning, gaining access/deny of service, maintaining access, and covering tracks. Topics to be covered include: Web security, Security standards-SSL/TLS and SET, Intruders and viruses, PGP and S/MIME for electronic mail security, Firewalls, IDS Secret Key and Public/Private Key Cryptography Cryptographic Hashes and Message Digests, Authentication Systems (Kerberos), Digital signatures and certificates, Kerberos and X.509v3 digital certificates. Also, current network security publications will be surveyed.

CSC 8223  Wireless Sensor Networks
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220 or CSC 6220
DESCRIPTION  This course is intended to provide a general introduction to wireless sensor networks. The course will cover the fundamental concepts and principles; architectures; communication protocols such as MAC protocols, link layer protocols, naming and addressing, time synchronization, localization and position, topology control, and routing protocols; and data management in wireless sensor networks. Students will understand the basic knowledge of wireless sensor networks, be familiar with setting up a wireless network, gain experience of designing and implementing wireless sensor network protocols for different applications, and develop abilities of conducting research in wireless sensor networks.

CSC 8250  Advanced Network Architectures and Protocols
CREDIT HOURS  4.0
PREREQUISITES  CSC 4220 or CSC 6220
DESCRIPTION  This course covers the state-of-art network architectures, protocols, and algorithms. It starts with reviewing issues associated with the network design principles, protocol mechanisms, and implementation techniques. The challenges related to implementing efficient and reliable protocols are then discussed and illustrated through several representative techniques and algorithms such as MPLS and RSVP. In addition, the course introduces fault-management and traffic grooming technologies for emerging networks including dynamic optical, radio and overlay networks. Topics related to service classes and network convergences, as well as interactions among diverse networking paradigms are also covered.

CSC 8520  Applied Combinatorics and Graph Theory
CREDIT HOURS 3.0
PREREQUISITES CSC 4520/6520
DESCRIPTION Development of combinatorial and graphical algorithms. Techniques for the study of complexity with application to algorithms in graph theory, sorting, and searching.

CSC 8530  Parallel Algorithms
CREDIT HOURS 4.0
PREREQUISITES CSC 6520
DESCRIPTION Techniques for designing and analyzing parallel algorithms on shared-memory and other models. Topics may include basic techniques, lists, trees, searching, sorting, graphs, and randomized algorithms.

CSC 8540  Advanced Algorithms in Bioinformatics
CREDIT HOURS 4.0
PREREQUISITES CSC 4520 or CSC 6520 with grade of B or higher
DESCRIPTION This course is an advanced graduate level of the course CSC 4520/6520. It is focused on fundamental algorithmic techniques in bioinformatics, including classical methods such as dynamic programming, support vector machines and other statistical and learning optimization methods. Applications will include restriction mapping, gene prediction, DNA sequencing, phylogenetic trees, haplotype inference, disease association, DNA array analysis, gene networks.

CSC 8550  Advanced Algorithms with Applications to Networks
CREDIT HOURS 4.0
PREREQUISITES CSC 4520/CSC 6520

CSC 8560  Discrete Approximation Algorithms and Metaheuristics
CREDIT HOURS 4.0
PREREQUISITES CSC 4520 or CSC 6520 with a grade of C or higher
DESCRIPTION Approximation algorithms and metaheuristics for combinatorial problems: Set Cover, Steiner Trees, Multiway Cut, k-Center, Feedback Vertex Set, Shortest Superstring, Knapsack, Bin Packing, Minimum Makespan Scheduling, Primal-Dual Approximation Scheduling. Steiner Forest.

CSC 8610  Advanced Numerical Analysis
CREDIT HOURS 3.0
PREREQUISITES MATH 4435/6435 and CSC 4610/6610
DESCRIPTION Advanced topics in numerical analysis. Stability and conditioning, discretization error, and convergence. Examples are drawn from linear algebra, differential and nonlinear equations.

CSC 8620  Numerical Linear Algebra
CREDIT HOURS 3.0
PREREQUISITES MATH 4435/6435 and CSC 4610/6610
DESCRIPTION Computational aspects of linear algebra. Matrix factorization, least squares, orthogonal transformations, eigenvalues, and methods for sparse matrices.

CSC 8901 Perspectives in Computer Science
CREDIT HOURS 1.0
DESCRIPTION For the Course Only Option in the M.S. degree, this seminar course is required. This course covers the topics in central areas of computer science, recent developments and future directions. 1.000 Credit Hours.

CSC 8910 Computer Science Topics Seminar
CREDIT HOURS 1.0 TO 3.0
DESCRIPTION May be repeated if topic varies.

CSC 8920 Computer Science Teaching Pedagogy
CREDIT HOURS 1.0
PREREQUISITES consent of instructor
DESCRIPTION The course covers pedagogical issues related to teaching computer science courses.

CSC 8930 M.S. Project
CREDIT HOURS 1.0 TO 4.0
PREREQUISITES consent of project advisor
DESCRIPTION This course will fulfill the project option in the M.S. degree.

CSC 8940 Computer Science Internship
CREDIT HOURS 1.0 TO 9.0
DESCRIPTION The course will require to document and present the project the student worked on during the internship.

CSC 8950 Directed Research in Computer Science
CREDIT HOURS 1.0 TO 4.0
PREREQUISITES consent of instructor
DESCRIPTION

CSC 8980 Topics in Computer Science
CREDIT HOURS 4.0
PREREQUISITES consent of instructor
DESCRIPTION May be taken more than once if topics are different.

CSC 8981 Research in Computer Science
CREDIT HOURS 1.0 TO 15.0
PREREQUISITES consent of instructor
DESCRIPTION May be repeated.

CSC 8982 Lab in Computer Science
CREDIT HOURS 1.0 TO 15.0
PREREQUISITES consent of instructor
DESCRIPTION May be repeated.

CSC 8999 Thesis Research
CREDIT HOURS 1.0 TO 9.0
PREREQUISITES consent of thesis advisor
DESCRIPTION

CSC 9000 Seminar in Computer Science
CREDIT HOURS 1.0
DESCRIPTION One lecture hour a week. Discussion of current research in computer science.

CSC 9999 Doctoral Dissertation Research
CREDIT HOURS 1.0 TO 20.0
DESCRIPTION
CPS 6010  Professional Identity and Ethics in Mental Health Counseling
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course provides an introduction and overview of the counseling profession. Students learn about the roles, responsibilities, and identity of a mental health counselor; the history of the counseling profession; the various work settings of counselors; professional organizations; professional journals; standards of preparation; credentialing and licensure; ethical and legal issues; current trends and issues; and awareness and action.

CPS 6020  Introduction and Professional Orientation to Elementary and Middle School Counseling
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course provides an overview of the unique issues, history, and ethical/legal concerns of the counseling profession, with an emphasis on the specialty of elementary and middle school counseling. Students become familiar with multicultural diversity, research, technology, professional counselor preparation standards, and professional/organizational issues as they apply to the professional school counselor and counseling profession.

CPS 6030  Introduction and Professional Orientation to Secondary School Counseling
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course provides an overview of the unique issues, history, and ethical/legal concerns of the counseling profession, with an emphasis on the specialty of secondary school counseling. Students become familiar with multicultural diversity, research, technology, professional counselor preparation standards, and professional/organizational issues as they apply to the professional school counselor and counseling profession.

CPS 6040  Introduction to School Psychological Services
CREDIT HOURS 3.0
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course provides an overview of the unique issues of the specialty of school psychological services, including history and ethical/legal concerns. Students become familiar with multicultural diversity, research, and professional/organizational issues as they apply to the school psychologist.
CPS 6050  Introduction to Professional Identity, Practice, and Ethics for Rehabilitation Counselors

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course provides an overview of the unique topics associated with the specialty of rehabilitation counseling including history, laws, professional orientation and roles, employment, and ethical/legal concerns. Students become familiar with multicultural diversity, research, professional/organizational, vocational and rehabilitation counseling, and career development issues as they apply to be rehabilitation counselors.

CPS 6150  Ethical and Legal Standards in Counseling and Psychological Services

CREDIT HOURS  2.0 TO 3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This course provides the rationale of basic ethical, legal, and practical professional standards governing practice in school counseling and school psychology, especially as defined by the American Counseling Association, American School Counselor Association, American Psychological Association, and the National Association of School Psychologists. Roles and responsibilities of counselors and psychologists within multidisciplinary P-12 schools, community organizations, agencies, and private practice settings are discussed, as well as professional credentialing, public policy, and advocacy issues. Emphasis is placed on practice within schools, private practices, agencies, and organizational settings.

CPS 6410  Basic Counseling Skills

CREDIT HOURS  3.0
REQUIREMENTS  Students are graded as satisfactory (S)/unsatisfactory (U)
DESCRIPTION  A minimum grade of "S" is required for passing this course. This course is an introduction to basic counseling skills. It exposes students to the helping skills necessary for effective mental health counseling, rehabilitative counseling, school counseling, and school psychology. The course is applicable to graduate students, in other disciplines, that use intentional interviewing and interpersonal skills to promote personal growth and development in others. This course includes both didactic and experiential learning.

CPS 6450  Group Counseling Systems

CREDIT HOURS  3.0
PREREQUISITES  CPS 6410 with a minimum grade of "S"
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. This course provides the opportunity to learn and apply various systems for group counseling, skills related to group leadership, member participation, goals of selected group systems, multicultural diversity issues affecting group systems, research relevant to group leadership and group systems, and ethical and legal issues related to group counseling.

</table>
CPS 7490  Individual Assessment I  
**CREDIT HOURS** 3.0  
**COREQUISITES** CPS 6040 with a minimum grade of "B"  
**REQUIREMENTS** Students must maintain a "B" average throughout the course  
**DESCRIPTION** This first course covers assessment and evaluation of cognitive function (intelligence) in children and adolescents. A variety of assessment instruments and techniques are reviewed. The student is taught at least three interpretive schemes.

CPS 7500  Individual and Family Over the Life Span  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** A minimum grade of "C" is required for this course  
**DESCRIPTION** The purpose of this course is for students to explore actively the theoretical and research literature regarding human growth and development across the life span. Theoretical understanding of human development from birth to older adulthood including issues of family, culture, race, gender, and their roles in children's, adolescents', and adults' lives are considered. The goal of this course is to encourage independent thinking and clear communication regarding research in the field of human growth and development and ethical considerations related to these topics and to apply the information learned to the student's program of study. (Same as EPY 7500).

CPS 7495  Individual Assessment I: Lab  
**CREDIT HOURS** 2.0  
**COREQUISITES** CPS 7490  
**DESCRIPTION** This supervised lab session provides students with an opportunity for guided practice and feedback on conducting assessments and evaluations of cognitive function (intelligence) in children and adolescents. Students will practice implementing a variety of assessment instruments and techniques.

CPS 7510  Individual Assessment II  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CPS 7490 with a minimum grade of "B"  
**REQUIREMENTS** Students must maintain a "B" average throughout the course  
**DESCRIPTION** This second course covers all aspects of academic assessment including visual-motor skills. In addition, Georgia Department of Education guidelines for determining categories of exceptionality are presented. Theories in developmental psychology are reviewed in the context of accurate academic assessment.

CPS 7515  Individual Assessment II: Lab  
**CREDIT HOURS** 2.0  
**COREQUISITES** CPS 7515  
**DESCRIPTION** This supervised lab session provides students with an opportunity for guided practice and feedback on conducting assessments and evaluations of academic achievement in children and adolescents. Students will practice implementing a variety of assessment instruments and techniques.
CPS 7520 Data-Based Decision Making for Academic Interventions in School Psychology

**CREDIT HOURS**
2.0 TO 3.0

**PREREQUISITES**
CPS 7490 with a minimum grade of "B", CPS 7510 with a minimum grade of "B", and CPS 8440 with a minimum grade of "B"; or take CPS 8440 concurrently

**DESCRIPTION**
Designed to enhance the knowledge, skills, and attitudes of school psychology students, this course is an introduction to the process of linking psycho-educational assessment results to school-based interventions. It prepares school psychology students for their roles in data-based decision making and the development of cognitive and academic competencies of school-aged children, with particular emphasis on the implementation of research-based interventions. It includes review of federal, state, and local policies governing the delivery of remedial and special education services in the schools and offers practical experience in methods for communicating assessment results and recommendations to educators and parents.

CPS 7550 Consultation in School Counseling

**CREDIT HOURS**
3.0

**COREQUISITES**
CPS 7681 with a minimum grade of "S"

**DESCRIPTION**
Students discuss case studies involving consultation techniques with teachers, parents, and others. History, ethical/legal, advocacy, and professional/organizational issues are related to consultation as a form of professional practice. Course may extend beyond one term.

CPS 7570 Psychological Consultation in the Schools I

**CREDIT HOURS**
3.0

**PREREQUISITES**
CPS 6040 with a minimum grade of "B"

**DESCRIPTION**
This course provides an introduction to school-based consultation in school psychology. It considers both the theory and the practice of school-based consultation with a focus on behavioral consultation (i.e., Bergan & Kratochwill, 1990). There is an emphasis on consultation services provided in school settings to assist children with a range of behavioral problems, particularly consultation offered to teachers. This course seeks to bridge theory and practice and to maintain the active participation of students. Course may extend beyond one term.

CPS 7575A Applied Practice I: Mental Health Counseling

This internship is designed to enable students to practice their school counseling skills by assuming the role of school counselor-in-training on their internship sites. Students carry out all of the activities and functions performed by employed school counselors on site. Internship may extend beyond one term. (Repeatable).

CPS 7683  Internship: Rehabilitation Counseling
CREDIT HOURS  2.0 TO 9.0
PREREQUISITES  permission of department for spring only
COREQUISITES  CPS 7663 for fall only with a minimum grade of "S"
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. This internship is designed to enable students to practice their rehabilitation counseling skills by assuming the role of a counselor-in-training on their internship sites. Students carry out all of the activities and functions performed by employed counselors on site. Internship may extend beyond one term. (Repeatable).

CPS 7970  Seminar
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students focus on research and discussion of special topics and analyze the issues facing the practitioner in contemporary society. Seminar may extend beyond one term. (Repeatable).

CPS 7975  Seminar for Graduate Assistants
CREDIT HOURS  3.0 TO 18.0
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).

CPS 8100  Psychobehavioral Diagnosis
CREDIT HOURS  3.0
PREREQUISITES  CPS 6010, CPS 6020, CPS 6030, or CPS 6050 with a minimum grade of "B"
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This course is designed to assist students in the recognition and categorization of psychological and behavioral patterns (syndromes) which are considered dysfunctional, according to the classification system utilized by the American Psychiatric Association in their Diagnosis and Statistical Manual Disorders 5 (2013).
CPS 8260  Program Evaluation, Advocacy, and Leadership in School Counseling

CREDIT HOURS  3.0
PREREQUISITES  CPS 6020 or CPS 6030
DESCRIPTION  This course is designed to prepare the school counselor to prepare the school counselor to effectively carry out the transformed role of the school counselor in the 21st century. This role includes an understanding of program evaluation utilizing student outcome data, becoming an advocate for students, schools, and the field of school counseling, and becoming a leader in promoting, planning, and implementing all aspects of the counseling program in the school.

CPS 8300  Traumatology

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students explore the expanding literature base and attempt to delineate its common concerns, research basis, and practice guidelines for working with trauma.

CPS 8320  Rehabilitation Counseling Placement and Case Management

CREDIT HOURS  3.0
DESCRIPTION  Students will develop vocational and case management skills to assist people with disabilities to transition to employment. Labor market information, employer development and job keeping strategies are emphasized. Students are taught the flow of a rehabilitation case from intake through closure.

CPS 8340  Advanced Multicultural Counseling Strategies and Interventions

CREDIT HOURS  3.0
PREREQUISITES  CPS 6450 with a minimum grade of "S"; CPS 7260 and CPS 7340 with minimum grades of "C"
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  The course is designed to advance student’s multicultural counseling knowledge and skills with diverse populations. Employing culturally relevant and effective intervention strategies and skills is considered an essential component of cultural competence. Students develop an understanding of how client’s cultural, historical, and sociopolitical context may inform accurate assessment, interpretation and treatment interventions. Culturally-based interventions with the goal of developing purposeful, directional, and culturally relevant approaches to working with diverse clients who present with a range of clinical issues are reviewed. Treatment approaches developed from a cultural frame of reference with attention to the intersections of the client’s race, ethnicity, gender, class, acculturation level, and presenting problem are explored.

CPS 8350  Biopsychology and Medication

CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students examine known relationships of biological functioning to psychological perceptions of mental functioning as related to mood, reality testing, attention, and/or focus of concentration. The effectiveness of medication and focus of psychotherapeutic intervention are reviewed and compared.

CREDIT HOURS  3.0 TO 9.0

PREREQUISITES  CPS 7662 with a minimum grade of "S", and CPS 8570 with a minimum grade of "C"

REQUIREMENTS  Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.

DESCRIPTION  The consultation and intervention practicum is a fifteen-week field experience designed to provide opportunities to develop expertise in school-based intervention and consultation. Students are expected to participate in this experience on a part-time basis. A minimum of 300 clock hours is required in an assigned school district where the student receives on-the-job training under the direct supervision of a certified school psychologist. Additional time is required each week for on-campus instruction and supervision. During the practicum, each student is required to participate in a variety of experiences including consultation, prevention (e.g., SST or pre-referral meetings), intervention, and research (e.g., evaluating process and outcome of consultation cases and group interventions). Students are expected to be familiar and in compliance with the American Psychological Association's (APA) Code of Ethics, the National Association of School Psychologist's (NASP) Ethical Standards, and the concept of child advocacy.

CPS 8665  Intervention Strategies for Students with Learning Problems

CREDIT HOURS  3.0

PREREQUISITES  consent of the instructor

REQUIREMENTS  A minimum grade of "C" is required for this course

DESCRIPTION  This course provides students with advanced knowledge of current conceptions of prevention and intervention strategies for children with learning difficulties and disabilities. Students explore current research on the characteristics, etiology, and development of learning difficulties and disabilities with particular emphasis on literacy. Further, students gain substantive practical experience in (a) how to assess a child's current level of literacy development, (b) how to link these data to specific prevention and intervention strategies, and (c) how to design, implement, and evaluate prevention and intervention efforts.

CPS 8680  Internship in School Psychology

CREDIT HOURS  3.0 TO 6.0

PREREQUISITES  CPS 7662 with a minimum grade of "S"

REQUIREMENTS  Course is graded as satisfactory/unsatisfactory

DESCRIPTION  A minimum grade of "S" is required for this course. This is a supervised field placement in public and/or private school settings or related child agency for the purpose of psychoeducational evaluation and concomitant consultation with service components in the area of school psychology. Internship may extend beyond one term. (Repeatable).
CPS 8760  Topical Seminar in School Psychology
CREDIT HOURS  3.0
PREREQUISITES  permission of the instructor
REQUIREMENTS  The course is repeatable and must be taken at least three times by students enrolled in the doctoral program in School Psychology
DESCRIPTION  This is an advanced topical seminar in which students will focus the professional literature and research relevant to important topics in the field of School Psychology. There will be analysis and discussion of these advanced topics with consideration of the implications for research and practice in School Psychology. (Repeatable).

CPS 8810  Directed Readings
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  a directed reading form must be completed and signed by the instructor and the departmental chair before registration
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.
DESCRIPTION  Students participate in individual reading projects under supervision. The directed reading may extend beyond one term.

CPS 8820  Health Psychology
CREDIT HOURS  1.0 TO 3.0
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.
DESCRIPTION  Students explore current research and practice domains in the area of health psychology. Course may extend beyond one term. (repeatable).

CPS 8970  Seminar
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  permission of the instructor
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students focus on research and discussion of special topics and analyze the issues facing the practitioner in contemporary society. Seminar may extend beyond one term. (Repeatable).

CPS 9410  Assessment of Intelligence
CREDIT HOURS  3.0
DESCRIPTION  The course focuses on the formal assessment of cognitive abilities. The primary purpose of the course is to increase students' understanding and application of intellectual assessment. In particular, the course emphasizes the administration, scoring, and interpretation of tests designed to measure cognitive functioning with an emphasis on assessing adults. Students also learn about assessing intelligence in children and how to consider the cultural relevance of various intelligence tests.

CPS 9420  Adult Personality Assessment
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  Students learn the science and practice of psychological assessment, with specific emphasis on personality assessment. The course provides students with a basic understanding of the administration and scoring of the MMPI-2, MCMI-III, MIPS Revised, the 16PF, and other tests. The course also covers knowledge and skills associated with comprehensive interpretation and integrative report writing.
CPS 9480  Supervision of Counseling Services  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CPS 8660 with a minimum grade of "S"  
**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.  
**DESCRIPTION** This course develops the knowledge and skills necessary for the administration and supervision of counseling practice. Course may extend beyond one term.

CPS 9660  Applied Practice III  
**CREDIT HOURS** 3.0  
**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.  
**DESCRIPTION** Students work in an appropriate psychological counseling setting with clients under supervision. Practicum may extend beyond one term.

CPS 9661  Supervision Internship  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PhD standing, CPS 8660 with a minimum grade of "S", CPS 9660 with a minimum grade of "S"  
**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory  
**DESCRIPTION** A minimum grade of "S" is required for this course. Course may be taken one (1) time to meet major area requirement and up to two (2) times for 3.0 credit hours each time to meet the cognate area requirements. Course may be taken a maximum of three (3) times. Students work in the Department of Counseling and Psychological Services supervising masters' level students completing CPS 7660 and CPS 7661 or CPS 7663 and CPS 7683 under supervision of faculty.

CPS 9665  Assessment Practicum  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CPS 9410 and CPS 9420 or permission of the instructor  
**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.  
**DESCRIPTION** Students work in an appropriate psychological assessment setting with clients under supervision.

CPS 9680  Doctoral Internship  
**CREDIT HOURS** 1.0 TO 9.0  
**PREREQUISITES** consent of the instructor; PhD standing  
**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory  
**DESCRIPTION** A minimum grade of "S" is required for this course. Students work under individual supervision in an approved internship setting. Internship may extend beyond one term. (Repeatable).

CPS 9760  School Psychology Research Seminar  
**CREDIT HOURS** 3.0 TO 9.0  
**REQUIREMENTS** Doctoral students in School Psychology must take course for at least three terms  
**DESCRIPTION** This is an advanced graduate research seminar. Students will participate in an active research team that includes students and a faculty member in school psychology. Topics will include a consideration of research design relevant to the research group as well as the content that is the focus of the research team. This seminar may extend beyond one term. (Repeatable).

</thead>
<tbody>
<tr>
<td>CREDIT HOURS</td>
<td>3.0</td>
</tr>
<tr>
<td>DESCRIPTION</td>
<td>A graduate-level statistics course that covers probability theory, hypothesis testing and linear regression. If unsure about prerequisite, contact the professor. To answer cause-and-effect questions, a counterfactual model of causality and a unified methodological framework has been developed over the last three decades. This class aims to teach students to apply and interpret the counterfactual model and associated designs for answering policy-relevant empirical questions. Students will gain a deeper understanding of, and connections among, approaches to answering causal questions and of the nature of evidence itself. The topics comprise experimental designs and a suite of observational designs, including conditioning designs, partial identification designs, multiple control group designs, instrumental variable designs, regression discontinuity designs, synthetic control designs and tests of known effects and sensitivity tests to hidden bias. These topics are examined in a broad range of policy domains (poverty, planning, economic development, politics, crime, social work, health, public finance, environment, and others).</td>

CRJU 8910  **Readings in Criminal Justice**
- **CREDIT HOURS**: 1.0 TO 3.0
- **PREREQUISITES**: Consent of instructor
- **DESCRIPTION**: Permits selected qualified students to pursue a course of readings on a selected topic under the guidance of a faculty member. This course must have the approval of the student’s instructor and the graduate coordinator.

CRJU 8980  **Capstone Seminar in Criminal Justice**
- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: This seminar is the integration experience and assessment tool for non-thesis students. Students will complete written and oral critical analyses of scholarly literature, applying their core knowledge to real-world problems and questions within the fields of criminal justice and criminology.

CRJU 8990  **Thesis**
- **CREDIT HOURS**: 1.0 TO 6.0
- **PREREQUISITES**: Consent of instructor
- **DESCRIPTION**: Individual study of a selected research problem in criminal justice or criminology that requires the analysis of data. Student, with approval of the graduate coordinator and department chair, chooses a chair and at least two additional members to form a thesis committee. The committee must approve student’s proposed and subsequent thesis.

CRJU 9010  **Contemporary Criminal Justice Policy**
- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: Examines the development and implementation of criminal justice policies.

CRJU 9030  **Graduate Orientation Seminar**
- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: Provides incoming Ph.D. students with an orientation to the scholarly infrastructure, standards of the program, and equips them with a set of fundamental tools needed to succeed in subsequent coursework and research endeavors.

CRJU 9450  **Contemporary Criminological Theory**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: CRJU 8050 Criminological Theory or equivalent
- **DESCRIPTION**: Exposes advanced graduate students to the major theories, issues, and debates that guide contemporary efforts to explain crime and criminality.

CRJU 9550  **Directed Teaching Seminar**
- **CREDIT HOURS**: 3.0
- **DESCRIPTION**: Exposes advanced graduate students to the pedagogical literature and develops their abilities to teach undergraduate criminal justice and criminology courses.

CRJU 9610  **Quantitative Research Methods II**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: CRJU 8610
- **DESCRIPTION**: Examines the advanced quantitative methods and analytical strategies used in the study of crime and criminal justice.

CRJU 9630  **Statistics in Criminal Justice II**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: CRJU 8620
- **DESCRIPTION**: Examines the use of multiple linear regression and other advanced techniques used in the study of crime and criminal justice.

EDCI 6240  Education or Incarceration: Schools, Communities, and the Prison Industrial Complex

CREDIT HOURS 3.0

DESCRIPTION As the population of incarcerated people in the U.S. grows to over two million and the rate of African American and Latino Youth Prisoners continues to rise, students in this course will investigate the school-to-prison pipeline, the prison industrial complex, and the implications of education. Through an examination of readings in educational policy, cultural studies, history, and sociology, as well as through dialogue, debate, and fieldwork, students will consider ways to challenge prevailing assumptions about education and incarceration. Cross-listed with EDCI 3240.

EDCI 6450  Principles of Instruction in Middle Childhood Mathematics and Science

CREDIT HOURS 3.0

DESCRIPTION This course provides the pedagogical content knowledge necessary for effective middle school instruction in mathematics and science. Students engage in lesson and curriculum planning, teaching strategies and methods, content, and technology for middle grades mathematics and science education.

EDCI 6560  Principles of Instruction in Middle Childhood Language Arts and Social Studies

CREDIT HOURS 3.0

DESCRIPTION This course provides the pedagogical content knowledge necessary for effective middle school instruction in language arts and social studies. Students engage in lesson and curriculum planning, teaching strategies and methods, content, and technology for middle grades language arts and social studies education.

EDCI 6600  Introduction to Secondary Teaching

CREDIT HOURS 3.0

DESCRIPTION Examines the nature of secondary students and schools. Explores instructional materials, teaching strategies, technology, and effective teaching. Includes experiences in reflective teaching and micro-teaching.

EDCI 7020  Middle Schools in a Diverse Society

CREDIT HOURS 3.0

DESCRIPTION Examines the rationale for middle schools, organizational patterns, nature of students, and the linkages among schools, families, and communities.

EDCI 7100  Service-Learning in Action

CREDIT HOURS 3.0

DESCRIPTION In this course, students examine the nature of service-learning through an analysis of relevant research, theory, and practice. Students also research and evaluate their community's needs. After synthesizing their research and needs assessment for the community, students engage in a service-learning project that is relevant to their major. (EDCI 7100 is cross-listed with EDCI 4100).

EDCI 7400  Curriculum Issues in Middle Childhood Education

CREDIT HOURS 3.0

DESCRIPTION Explores theory and practice of interdisciplinary, child-centered teaching, and effective learning in middle grades classrooms.

<td>Culturally Responsive Pedagogy</td>
<td>3.0 TO 6.0</td>
<td>Student must complete the course with a minimum grade of &quot;S&quot;.</td>
<td>This course is designed to examine the role of culture in child development and learning. Through a process of introspection and application, the candidate reflects on the impact and implications of culture and self-identity in the teaching and learning of various student populations and settings from a political, social, economic, and historic context.</td>
</tr>
<tr>
<td>ECE 6361</td>
<td>Responsive and Student Centered Pedagogy</td>
<td>3.0</td>
<td></td>
<td>This course focuses on the teacher as a reflective practitioner, affirming children’s diverse backgrounds, abilities, interests, personalities, and experiences through exploring concepts of personally relevant pedagogy. Throughout this course, candidates consider their role in the creation of more just and equitable educative opportunities for all children, specifically the ones served daily in our classrooms. This work toward justice will be conceptualized through holistic and descriptive understandings of individual children and through a survey of scholarship on educational equity. Study focuses on strategies for effective communication and partnership between the teacher, student, family, and community. Reflection and application of knowledge will be contextualized in a discussion of the political, social, economic, and historical contexts within the U.S. and the intersection of these contexts and communities, equity in education, and educational practices broadly and locally constructed.</td>
</tr>

Beginning Teachers of Record as Reflective Practitioners I

**CREDIT HOURS**
2.0

**DESCRIPTION**
This course is a field experience course for first semester first year teachers that utilizes a scaffolded, developmental coaching model in order to support beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course focuses on the continued development of critical reflexive and reflective practice for teacher growth and pupil learning. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

Integrative and Iterative Curriculum Design

**CREDIT HOURS**
6.0

**DESCRIPTION**
This course is designed to support beginning teachers of record as they strive to be successful and critically reflective teachers of culturally and linguistically diverse students in urban classrooms. The focus of this course is to consider means for education for democratic purposes and engagement in meaningful and critical curriculum design and implementation. Novice teachers will explore (a) strategies to support reading comprehension and vocabulary development during the elementary years; (b) science and social studies content and methods of inquiry; (c) strategies for integrating the curriculum around science and social studies content; (d) curriculum design that incorporates student interests and queries around critical and important themes and topics; (e) personally relevant and learner centered teaching strategies; and (f) ways that teachers can build on students’ culture and prior knowledge to best meet the needs of students in diverse classrooms. This is a field-based course in which beginning teachers will connect theory to practice as they develop and implement an integrative and iterative curriculum with pupils.

**ECE 6586**  
**Advocating for Students Through the Descriptive Review of a Child**  

**CREDIT HOURS**  
3.0  

**DESCRIPTION**  
This course focuses on the teacher as a critically reflective practitioner, affirming children’s diverse backgrounds, abilities, interests, personalities, and experiences through exploring concepts of reflective teaching, child development, and the creation of a classroom climate which nurtures the holistic development of all children. Throughout this course teachers of record of in urban classrooms will consider their role in the creation of more just and equitable educative opportunities for all children, specifically the ones they serve daily in their classrooms. This work toward justice will be conceptualized through holistic and descriptive understandings of individual children as teachers turn a self-reflexive leans on themselves, their language use, and their practices, and engage dialogically with colleagues inquiring into the unique strengths and vulnerabilities of the individual children each serves. This course will examine issues including child development, diversity, and urban school culture, reflective teaching, and classroom management and the application of these constructs into classroom practice.
ECE 6587 Language and Literacy Development
CREDIT HOURS 3.0
DESCRIPTION This course focuses on the teacher as a reflective practitioner of language and literacy instruction for culturally and linguistically diverse pupils, affirming children's diverse backgrounds, abilities, interests, personalities, and experiences in order to nurture the holistic development of all children. This class explores (a) language and literacy development during the elementary years; (b) theories of learning languages and literacy; (c) teaching strategies and skills that contribute to additive language development and facilitate literacy development for all learners; (d) tools for taking well-reasoned, data-based, and deliberate actions to create meaningful learning opportunities in support of the language and literacy development of each pupil; and (e) ways that teachers can build on pupils' culture and prior knowledge to best meet the needs of learners in diverse classrooms.

ECE 6655 Student Teaching I
CREDIT HOURS 3.0
REQUIREMENTS Students must complete the course with a grade of "B" or higher
DESCRIPTION This is the first of two student teaching field experiences that focuses on the practical application of classroom management, culturally relevant curriculum and instruction, and child development. The candidate is observed and supervised in an urban school environment.

ECE 6656 Student Teaching II
CREDIT HOURS 3.0
PREREQUISITES ECE 6655 with a grade of "B" or higher
REQUIREMENTS Students must complete the course with a grade of "B" or higher
DESCRIPTION This is the second of two student teaching field experiences that focuses on the practical application of classroom management, culturally relevant curriculum and instruction, and child development. The candidate is observed and supervised in an urban school environment.

ECE 6657 ESOL Student Teaching
CREDIT HOURS 2.0
REQUIREMENTS Students must complete this course with a grade of "B" or higher
DESCRIPTION Candidates have supervised field placements in ESOL classrooms as well as in non-ESOL classrooms with significant culturally and linguistically diverse student populations. The candidates are observed and supervised in urban school environments in various K-12 grade level placements. This field experience focuses on the practical application of culturally relevant curriculum, instruction, and assessment.

ECE 6660 Mentorship in the Urban Classroom I
CREDIT HOURS 3.0
REQUIREMENTS Students must complete the course with a grade of "B" or higher
DESCRIPTION This is the first of two mentorship field experiences. The candidate must have teacher certification through the Alternative Preparation Program in the Department of Early Childhood Education at Georgia State University and currently hold a position as a first year teacher in an urban elementary school. This field based course is designed to actively support the teacher during the first year of teaching using a systematic form of reflection to mentor and assess professional development.
ECE 6661  Mentorship in the Urban Classroom II  
CREDIT HOURS  3.0  
PREREQUISITES  ECE 6660 with a minimum grade of "B" or higher.  
REQUIREMENTS  Students must complete the course with a grade of "B" or higher  
DESCRIPTION  This is the second of two mentorship field experiences. This field based course continues to actively support the teacher during the first year of teaching using a systematic form of reflection to mentor and assess the professional portfolio as a repository to collect, synthesize, and analyze artifacts of the teaching competence.

ECE 6800  Urban Education Capstone Seminar  
CREDIT HOURS  3.0  
REQUIREMENTS  Students must complete the course with a grade of "C" or higher  
DESCRIPTION  The candidate synthesizes and reflects upon the completion of coursework during the second year of the program. The candidate integrates the learning and understandings by developing and implementing an action research project related to the critical issues and trends of urban education in the schooling context.

ECE 6830  Critical Theories and Research in Urban Education I  
CREDIT HOURS  3.0  
REQUIREMENTS  Students must complete the course with a grade of "C" or higher  
DESCRIPTION  The candidate attains an in-depth understanding of the research and practice in facilitating urban education by examining historical contexts of schooling, shifting societal beliefs, and traditional as well as contemporary educational theories and practice.

ECE 6831  Critical Theories and Research in Urban Education II  
CREDIT HOURS  3.0  
REQUIREMENTS  Students must complete the course with a grade of "C" or higher  
DESCRIPTION  The candidate attains an in-depth understanding of the research and practice in facilitating urban education by examining historical contexts of schooling, shifting societal beliefs, and traditional as well as contemporary educational theories and practice.

ECE 7280  Early Writing Development  
CREDIT HOURS  3.0  
DESCRIPTION  This course provides in-depth experiences, analysis, and construction of ideas related to expressive communication among young children, especially regarding their written language. Readings, discussions, and activities will relate to theories of development, learning, and cognition, composition theory, young children’s expressive communication, and the writer’s craft. Talk about culture, multilingualism, and the value of diversity will permeate all of these topics. Cross-listed with EDLA 7280.

ECE 7360  Reading Recovery Clinical for Teachers I  
CREDIT HOURS  3.0  
PREREQUISITES  Restricted to Reading Recovery students  
COREQUISITES  ECE 7370  
DESCRIPTION  This course is designed to help teachers in training develop an in-depth knowledge of the principles and procedures of the Reading Recovery program and to implement these principles and procedures with at-risk regular education first-grade children in local school districts. (1.5 lecture hours and 1.5 laboratory hours a week.).

<tr>
<td>ECE 7370</td>
<td>Reading Recovery Clinical for Teachers II</td>
<td>3.0</td>
<td>Restricted to Reading Recovery students</td>
<td>This course is designed to help teachers in training further develop an in-depth knowledge of the principles and procedures of the Reading Recovery program and continue to explore these teaching methods and procedures, for acceleration of learning, and subsequent discontinuing from the program with at-risk regular education first-grade children in local school districts. (1.5 lecture hours and 1.5 laboratory hours a week.).</td>
</tr>
<tr>
<td>ECE 7380</td>
<td>Reading Recovery Clinical for Teachers III</td>
<td>3.0</td>
<td>Restricted to Reading Recovery students; ECE 7360; and ECE 7370</td>
<td>The course is designed to help teachers in training develop further the principles and procedures of the Reading Recovery program and continue to explore these teaching methods and procedures, acceleration of learning, discontinuing from the program with at-risk regular education first-grade children in local school districts. Other issues discussed include midyear selection of students, guidelines for program withdrawal, records management, data collection, system-wide implementation, and evaluating and reporting the results of the Reading Recovery program. (1.5 lecture hours and 1.5 laboratory hours a week.).</td>
</tr>
<tr>
<td>ECE 7390</td>
<td>Curriculum in the Early Childhood Classroom I</td>
<td>3.0</td>
<td></td>
<td>Students examine and adapt current theory and professional standards when planning mathematics, science, social studies, and language arts instruction in the early childhood classroom. Faculty model integration and collaborative approaches; participants continually reflect upon classroom implementation. For the Collaborative program, IP grades are assigned each term until all course requirements have been completed.</td>
</tr>
<tr>
<td>ECE 7393</td>
<td>Number and Operation in the Elementary Classroom</td>
<td>3.0</td>
<td></td>
<td>This course explores mathematics content and appropriate related pedagogy for understanding mathematical practices with whole numbers at the P-5 elementary level. Topics include counting, cardinality and comparing numbers; number problem structures; children's invented problem-solving strategies; representations of children's solutions; and developing number sense. ECE 7393 is cross-listed with ECE 9393.</td>
</tr>
<tr>
<td>ECE 7394</td>
<td>Geometry and Measurement in the Elementary Classroom</td>
<td>3.0</td>
<td></td>
<td>This course will explore content and pedagogy of geometry and measurement concepts for elementary children. The course will explore attributes of 2- and 3-dimensional shapes as well as classifying, dividing, combining and transforming those shapes. Geometry topics will also include congruence, similarity, slides, flips, turns, and symmetry. Measurement topics will include attributes appropriate for the elementary classroom including distance, weight, area, volume, temperature and time; tools for measuring, the metric system and conversions. ECE 7394 is cross listed with ECE 9394.</td>
</tr>
</tbody>
</table>
ECE 7395  Rational Numbers and Algebra in the Elementary Classroom  CREDIT HOURS 3.0  DESCRIPTION This course explores mathematics content and appropriate related pedagogy for understanding mathematical practices with rational numbers and algebraic concepts at the P-5 elementary level. Topics include concepts and operations with fractions and decimals; understanding equivalence; relational thinking; and making and justifying conjectures about general properties of arithmetic. ECE 7395 is cross listed with ECE 9395.

ECE 7396  Data Analysis and Probability in the Elementary Classroom  CREDIT HOURS 3.0  DESCRIPTION This course will explore the Data Analysis and Probability Standard in the NCTM Standards for grades PreK-5. Topics in data analysis will include asking good questions, collecting data, representing/displaying data, measures of central tendency (mean, median and mode) and making predictions. Topics in probability will include basic concepts of probability such as theoretical and experimental probability, sample space, and calculating probability. Appropriate methods and materials for each topic will be discussed. ECE 7396 is cross listed with ECE 9396.

ECE 7400  Curriculum in the Early Childhood Classroom II  CREDIT HOURS 3.0  PREREQUISITES ECE 7390  DESCRIPTION Students examine and adapt current theory and professional standards when planning mathematics, science, social studies, and language arts instruction in the early childhood classroom. Faculty model integration and collaborative approaches; participants continually reflect upon classroom implementation. Course work is taken over two consecutive terms. IP grades are assigned each term until all course requirements have been completed.

ECE 7410  Critical Issues in Early Childhood Education I  CREDIT HOURS 3.0  DESCRIPTION Students examine critical issues in the field such as diversity, technology, leadership, assessment and others, and their impact on instructional practice in a collaborative setting. For the Collaborative program, IP grades are assigned each term until all course requirements have been completed.

ECE 7420  Critical Issues in Early Childhood Education II  CREDIT HOURS 3.0  COREQUISITES ECE 7410 and EPSF 7120  DESCRIPTION Students examine critical issues in the field such as diversity, technology, leadership, assessment and others, and their impact on instructional practice in a collaborative setting. Course work is taken over two consecutive terms. IP grades are assigned each term until all course requirements have been completed.
ECE 7500  |  Guided Inquiry into Educational Advocacy
---|---
**CREDIT HOURS** | 3.0
**DESCRIPTION** | Through this hybrid elective course, candidates will have opportunities to explore areas of interest pertaining to issues that affect children, candidates, schools, curriculum, policy, families, and stakeholders relevant to education writ large. This course is largely self-driven and monitored as candidates are given a measure of autonomy, intellectual freedom, and idiosyncratic options for expressing understandings gained pertaining to the issue(s) selected for study. Key goals of the course intend that candidates: a) Develop tools for informing themselves on critical issues of particular interest or concern. b) Acquire strategies for reaching out to particular stakeholders who are positioned to best act upon those issues. c) Share, publish, and/or disseminate resources for stakeholders and/or colleagues, thereby establishing or strengthening informed communities of activism. d) Develop expertise that will position themselves well in future endeavors impacting the lives of candidates, families, classrooms, and/or communities within and around schools. ECE 7500 will be cross-listed with ECE 4500.

ECE 7575  |  Induction Teachers as Change Agents I
---|---
**CREDIT HOURS** | 2.0
**PREREQUISITES** | ECE 6585
**DESCRIPTION** | This course is a field experience course that utilizes a scaffolded, developmental coaching model in order to support second year first semester beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course is closely tied to the other courses in the ECE M.A.T. in order to support novice teachers committed to social justice and structural change. These educators will engage in inquiry to identify, understand, and mitigate issues in the local context that prevent equitable opportunities for all learners. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

ECE 7576  |  Teacher Inquiry for Critical Change
---|---
**CREDIT HOURS** | 3.0
**DESCRIPTION** | This course is part of a yearlong engagement in teacher research that will bring about a change in classroom practice, communities, and the lives of P-5 students and their families. The goal of this course is for teacher-researchers to work toward the mitigation of educational and systemic inequities through systematic and iterative processes of inquiry. This course is the embodiment of Freire’s construct of praxis, the merging of contemplation and deliberate action alongside others in a shared ecological context (classroom, school, community, state, nation).
Language Foundations of Literacy Learning: From Acquiring Oral Language to Reading Words

This course examines the relationship between oral language development and reading acquisition. Language within this course is viewed as composed of three dimensions: sociolinguistic, linguistic, and development. An additional focus is on how oral language influences young children’s acquisition of word reading. Topics include: (a) the relationship between oral language development and acquiring an understanding of the alphabetic principle; (b) the significance of the concept of word; (c) reading sight words; (d) progression of word reading beyond sight word reading; and (e) effective instructional and assessment strategies. Cross-listed with EDLA 7580.

Induction Teachers as Change Agents II

This course is a field experience course that utilizes a scaffolded, developmental coaching model in order to support second year first semester beginning teachers of record as they grapple with constructs such as the creation of pupil centered and personally relevant curriculum and instruction. This course is closely tied to the other courses in the ECE M.A.T. in order to support novice teachers committed to social justice and structural change. These educators will engage in inquiry to identify, understand, and mitigate issues in the local context that prevent equitable opportunities for all learners. Structures of support are available for beginning teachers as they strive for an increased level of professionalization and claim opportunities to engage with communities, families, and pupils to bring about equitable educative opportunities for all children. Candidates will be observed and coached in their own classrooms. In order to ensure candidates preparedness for teaching in a range of P-12 classrooms they will also be observed and coached in complementary educational settings.

Practicum II: Advanced Teaching and Supervision

This course is a supervised practice in an approved instructional setting. A member of the faculty maintains close supervision. A minimum grade of "B" is required for this course.
ECE 7740  
Internship in Early Childhood Classroom I  
CREDIT HOURS 3.0  
REQUIREMENTS A minimum grade of "S" is required.  
DESCRIPTION This is a field experience in the P-5 classroom which encourages the educator to implement a program based on the assumption that learning is a constructive process which builds upon the knowledge and experience of the learner. The teacher functions as a collaborator with parents and children to focus on strategies for enhancing child learning. Students in the Mathematics Education concentration must enroll in this course concurrent with one of the following courses: ECE 7393, ECE 7394, ECE 7395, or ECE 7396.

ECE 7750  
Internship in Early Childhood Classroom II  
CREDIT HOURS 3.0  
PREREQUISITES ECE 7390  
COREQUISITES ECE 7400 and EPY 7090  
REQUIREMENTS A minimum grade of "S" is required for this course.  
DESCRIPTION This is a continuation of the previous field experience in the P-5 classroom which encourages the educator to implement a program based on the assumption that learning is a constructive process which builds upon knowledge and experience of the learner. The teacher functions as a collaborator with parents and children to focus on strategies for enhancing child learning. Internship may extend beyond one term.

ECE 7760  
Invent to Learn  
CREDIT HOURS 3.0  
DESCRIPTION Educators examine how to facilitate opportunities for children to learn through creating and inventing. Using Constructionist and Social Constructivist theories of learning to understand design thinking, integrated pedagogy, project-based learning, problem-based learning, tinkering, play, and making. The course offers opportunities for students to build projects and create multimedia explanations for why their projects are meaningful and research-based.

ECE 7800  
Capstone Experience  
CREDIT HOURS 3.0 TO 9.0  
DESCRIPTION This culminating seminar/independent study course allows participants to document, interpret, synthesize, and present benchmarks of professional development over the program. Capstone experience may extend beyond one term.

ECE 7850  
Apprenticeship in Creative and Innovative Education  
CREDIT HOURS 3.0  
DESCRIPTION This apprenticeship is designed to support students in cultivating dispositions and skills key in operating education-related programs, partnerships, or enterprises. Students participate in an apprenticeship with a local agency (e.g., cultural center, museum, community guild, educational enterprise, non-profit organization) or university entity to gain hands-on experience in the operations, management, and development of learning sites. (Repeatable).
ECE 7930  
Research and Theories of Creative Learning  
CREDIT HOURS 3.0  
DESCRIPTION This course is designed to explore research and theories related to creative learning practices of children and adolescents. Students examine and critique: theories instrumental in the development of creativity as a field; research focused on fostering children's creative and problem-solving practices; current discourses connecting creativity and national and global issues related to education.

ECE 7960  
Seminar in Creative and Innovative Education  
CREDIT HOURS 1.0  
DESCRIPTION This seminar provides an introduction and overview for masters work in Creative and Innovative Education. It focuses on key experiences (e.g., planning apprenticeships with community partners, developing specialization pathways, pitching ideas, writing grants and seeking funding, and marketing programs) that support students in designing, developing, and implementing creative and innovative educational programs for children. (Repeatable).

ECE 7963  
Practicum in Interventions  
CREDIT HOURS 3.0  
DESCRIPTION The course focuses on the principles of early intervention for diagnosing literacy problems for students, including an understanding of emergent literacy, the reading and writing process, knowledge of instructional implications of research in early literacy, special education, psychology, and other fields that deal with the treatment of students with literacy and learning difficulties. Special attention will be placed on designing individualized and small-group instructional interventions targeted toward those students in greatest need or low proficiency levels as well as instructional interactions and/or experiences that support greater understanding of principles related to emergent and early literacy.

ECE 7964  
Comprehensive Literacy Model for School Improvement  
CREDIT HOURS 3.0  
PREREQUISITES Master's degree or a minimum of 9 hours of appropriate reading coursework  
DESCRIPTION This course is designed as a summer institute for teachers and school teams interested in implementing a comprehensive literacy model, including a framework for literacy, individual and small group interventions, literacy team meetings, assessment walls and progress monitoring, school plans and literacy coaching. This course is one of the six course requirement for the literacy coach course of study.
**ECE 7965**

**Intervention Designs for Struggling Readers**

**CREDIT HOURS**
3.0

**PREREQUISITES**
In addition to completing the Comprehensive Intervention Model (CIM) Institute the previous summer, participants are required to have completed ECE 7963 Practicum in Interventions or be a trained Reading Recovery teacher, Reading Recovery teacher leader or Literacy Collaborative Coordinator.

**DESCRIPTION**
This year-long training course focuses on preparing K-6 educators to differentiate reading and writing instruction within a range of settings for students experiencing difficulty in literacy learning. The training consists of intensive study of the Comprehensive Intervention Model Framework (a Response to Intervention Framework) and focuses on gaining in-depth knowledge and skills in designing and implementing a portfolio of small-group interventions for K-6 students. (Repeatable).

**ECE 7975**

**Seminar for Graduate Assistants**

**CREDIT HOURS**
3.0 TO 18.0

**REQUIREMENTS**
Course is graded as satisfactory/unsatisfactory

**DESCRIPTION**
A minimum grade of "S" is required for this course. This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).

**ECE 7980**

**Theory and Practice in Literacy**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Master's degree or a minimum of 9 hours of appropriate reading coursework

**DESCRIPTION**
This course examines theory of cognitive, linguistic and cultural learning for their practical implication for teaching students in the elementary grades. A focus is placed on designing and implementing research-based interventions for struggling readers.

**ECE 7981**

**Supervision and Organization of Literacy Programs**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Master's degree or a minimum of 9 hours of appropriate reading coursework

**DESCRIPTION**
This course focuses on preparing reading specialists and literacy coaches for supervising and organizing a school-wide literacy program, including organizational techniques and instructional approaches. An additional focus will be on developing the knowledge and skills of a literacy coach in three major areas: coaching teachers, providing professional development to school personnel, and evaluating a school's literacy program. This course is one of the six course requirements for the PCL-Literacy Coach course of study.
**ECE 7982**  
**Professional Experiences in Reading**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Master’s degree or a minimum of 9 hours of appropriate reading coursework and ECE 7981 Supervision and Organization of Literacy Programs or Consent of Instructor  
**DESCRIPTION** This course focuses on practical experiences with a literacy program in a school. Requires field experiences as a literacy coach in a school, attendance at scheduled seminars, and a portfolio that demonstrates competency as a reading professional, including conducting literacy team meetings and staff development, coaching teachers, making evidence-based curricula decisions, and collecting data for school improvement. This course is one of the six course requirement for the PCL-Literacy Coach course of study.

**ECE 7983**  
**Literacy Coaches as Agents of Change**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Master’s degree or a minimum of 9 hours of appropriate reading coursework and ECE 7981 Supervision and Organization of Literacy Programs or Consent of Instructor  
**DESCRIPTION** This course focuses on the roles and responsibilities of a literacy coach, including specialized techniques and language prompts for scaffolding teachers. An emphasis is placed on observing change over time in knowledge levels and types of self-reflection. Other responsibilities include modeling lessons, conducting team meetings, leading teacher study groups, selecting materials, and collecting and analyzing data for school improvement. This course is one of the six course requirement for the PCL-Literacy Coach course of study.

**ECE 7984**  
**Curriculum Design and Evaluation of Literacy Programs**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Master’s degree or a minimum of 9 hours of appropriate reading coursework  
**DESCRIPTION** This course focuses on designing and assessing literacy curriculum, including evaluating literacy programs and materials and analyzing their evidence-based rationales, aligning curriculum to state and professional standards, creating activities and rubrics to match curriculum, and using school-embedded professional development to achieve literacy goals. This course is one of the six course requirement for the PCL-Literacy Coach course of study.

**ECE 8000**  
**Issues in International Education**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** The course is designed to increase students' knowledge and awareness of social, economic, and political issues related to international education. Students will also examine and compare policies and practices of educational systems in various countries in the world. The course is presented and studied online. It comprises twelve units on international educational issues such as citizenship, culturalism, and multiculturalism equality and Education, inclusion and norms, values and beliefs. Each unit provides an overview of the issues associated with the topic as well as materials that outline those issues. Student/activities/projects require the gathering of data from a variety of sources, synthesizing those data and presenting a summary.
**ECE 8021**  
**Child Development and Beyond**  
3.0  
EXPLORING HISTORICAL AND CONTEMPORARY THEORIES AND PRACTICES RELATED TO HUMAN DEVELOPMENT IN CHILDHOOD AND EARLY ADOLESCENCE, STUDENTS IN THIS COURSE EXAMINE AND CRITIQUE THE ORIGINS, GOALS, AND ASSUMPTIONS OF DEVELOPMENTAL DISCOURSES (E.G., DEVELOPMENTALLY APPROPRIATE PRACTICE, READINESS). STUDENTS EXAMINE EFFECTS OF THESE DISCOURSES ON CURRENT EDUCATIONAL PRACTICE AND DRAW IMPLICATIONS FOR DESIGNING AND IMPLEMENTING IN-SCHOOL AND OUT-OF-SCHOOL EXPERIENCES WITH CHILDREN THAT ENHANCE CREATIVE LEARNING.

**ECE 8100**  
**Children in Society**  
3.0  
THE PURPOSE OF THIS COURSE IS TO EMPower EDUCATORS TO TEACH FOR A MORE EQUITABLE SOCIETY. ISSUES OF DIVERSITY, INCLUDING RACE, SOCIAL CLASS, LANGUAGE, INTELLIGENCE, ETC. WILL BE EXPLORED TO DEEPEN UNDERSTANDINGS OF DIVERSITY SO THAT EDUCATORS MAY BE AGENTS OF CHANGE. EDUCATORS WILL EXAMINE HOW CULTURAL PRACTICES, POLICIES, AND MEDIA POSITION AND REPRESENT CHILDREN IN US AND INTERNATIONAL SOCIETIES. THEY WILL ALSO EXAMINE HOW CHILDREN THEMSELVES ARE ADVOCATING AND INFLUENCING POLICIES, PRACTICES, AND MEDIA THROUGH THEIR OWN SOCIALLY NETWORKED ACTIVITIES AND CHILD-MADE MEDIA PRODUCTS. ECE 8100 MAY BE CROSS-LISTED WITH ECE 9360.

**ECE 8200**  
**Critical Pedagogy in Practice**  
3.0  
THIS COURSE IS DESIGNED TO DEVELOP TEACHERS AS LEARNER CENTERED PRACTITIONERS. COURSE CONTENT CONNECTS THEORIES IN CRITICAL PEDAGOGY TO TEACHING IN EARLY CHILDHOOD AND ELEMENTARY CLASSROOMS. COURSEWORK OFFERS PARTICIPANTS OPPORTUNITIES TO EXPLORE THEIR IDENTITIES AS TEACHERS AND THEIR POTENTIAL TO BECOME TRANSFORMATIVE EDUCATORS. PARTICIPANTS EXPLORE THE POSSIBILITY OF CREATING AUTHENTIC, LEARNER CENTERED CLASSROOMS THAT MODEL A JUST SOCIETY. COURSE IS OFFERED ON-LINE BUT PARTICIPANTS WILL BE GIVEN OPPORTUNITIES TO INTERACT FACE-TO-FACE DURING THE SEMESTER. THE CONTENT OF THIS COURSE SUPPORTS THE ED.S. PROGRAM GOALS AND IS BASED UPON THE FIVE CORE PROPOSITIONS AS DEFINED BY NBPTS.

**ECE 8300**  
**Reading Recovery Theory I**  
3.0  
RESTRICTED TO READING RECOVERY STUDENTS  
COREQUISITES  
ECE 8360, ECE 8370, AND ECE 8700  
DESCRIPTION  
STUDENTS EXAMINE THE THEORETICAL AND RESEARCH FOUNDATION FOR READING RECOVERY, ITS HISTORY, ISSUES FOR IMPLEMENTATION, AND THE NATURE OF THIS SYSTEMIC EDUCATIONAL INNOVATION.

**ECE 8310**  
**Reading Recovery Theory II**  
3.0  
RESTRICTED TO READING RECOVERY STUDENTS AND ECE 8300  
COREQUISITES  
ECE 8320, ECE 8380, ECE 8390, AND ECE 8700  
DESCRIPTION  
STUDENTS EXAMINE THE THEORETICAL AND RESEARCH FOUNDATION FOR READING RECOVERY ISSUES FOR IMPLEMENTATION OF THIS SYSTEMATIC EDUCATIONAL INNOVATION. EMPHASIS IN THIS COURSE SHIFTS TO A FOCUS ON DEVELOPING AND UNDERSTANDING OF CLAY’S THEORIES OF READING AND EMERGENT LITERACY IN COMPARISON TO THOSE OF OTHER THEORISTS IN THE FIELD.
ECE 8320  Reading Recovery Theory III
CREDIT HOURS  3.0
PREREQUISITES  Restricted to Reading Recovery students and ECE 8300
COREQUISITES  ECE 8310, ECE 8380, ECE 8390, and ECE 8700
DESCRIPTION  Students examine the theoretical and research foundation for Reading Recovery issues for implementation of this systemic educational innovation. Emphasis in this course continues on developing an understanding of Clay's theories of reading and emergent literacy in comparison of those of other theorists in the field.

ECE 8360  Reading Recovery Clinical for Leaders I
CREDIT HOURS  3.0
PREREQUISITES  Restricted to Reading Recovery students
COREQUISITES  ECE 8300, ECE 8370, and ECE 8700
DESCRIPTION  This course is designed to help teacher leaders in training develop an in-depth knowledge of the principles and procedures of the Reading Recovery program and to implement these principles and procedures with at-risk regular education first grade children within local school districts. (1.5 lecture hours and 1.5 laboratory hours a week).

ECE 8370  Reading Recovery Clinical For Leaders II
CREDIT HOURS  3.0
PREREQUISITES  Restricted to Reading Recovery students
COREQUISITES  ECE 8300, ECE 8360, and ECE 8700
DESCRIPTION  This course is designed to help teacher leaders in training develop further an in-depth knowledge of the principles and procedures of the Reading Recovery program and to continue to explore these teaching methods and procedures, for acceleration of learning, and subsequent discontinuing from the program with at-risk regular education first grade children within local school districts. (1.5 lecture hours and 1.5 laboratory hours a week).

ECE 8380  Reading Recovery Clinical for Leaders III
CREDIT HOURS  3.0
PREREQUISITES  Restricted to Reading Recovery students and ECE 8370
COREQUISITES  ECE 8320, ECE 8390, and ECE 8700
DESCRIPTION  This course is designed to help teacher leaders in training develop further the principles and procedures of the Reading Recovery program and to continue to explore these teaching methods and procedures, acceleration of learning, discontinuing from the program, regular education first-grade children within local school districts. Other issues discussed include midyear selection of students, guidelines for program withdrawal, records management, data collection, system-wide implementation, reporting, and evaluation of the Reading Recovery program. (1.5 lecture hours and 1.5 laboratory hours a week).

ECE 8390  Reading Recovery Clinical for Leaders IV
CREDIT HOURS  3.0
PREREQUISITES  Restricted to Reading Recovery students and ECE 8360
COREQUISITES  ECE 8310, ECE 8320, and ECE 8380
DESCRIPTION  The fourth in a four-course sequence is designed to help teacher leaders in training refine the principles and procedures of the Reading Recovery program and to continue to explore these teaching methods. Other issues discussed include late-year selection of students, program withdrawal, and problems of children receiving incomplete programs, end-of-year management and instructional issues, and planning for teacher training. (1.5 lecture hours and 1.5 laboratory hours a week).
ECE 8400  
Teacher Development  
3.0  

The course is designed to develop identities of teacher as researcher, child-centered practitioner, and professional learner in the context of teacher development. Participants will examine not only the multiple educational contexts and conditions that may inhibit or promote teacher knowledge, growth and change but also stimulate inquiry essential to better understand the characteristics, perceptions, tasks and training needs of teachers over the lifespan of their professional development. Introduction of program requirements for completion of Teacher Support and Coaching Endorsement begins in this course. May extend beyond one term.

ECE 8420  
Essentials of Elementary Science  
3.0  

This course introduces the science content and pedagogy of early elementary classrooms. Participants will learn Life, Physical, Earth and Space Disciplinary Core Ideas based on the Framework for K-12 Science Education. They will also develop lesson plans using the 5E Model and the 3 Dimensional Planning as outlined in the Framework for Science Education. Special attention is paid to 1) common misconceptions in early elementary topics and 2) safety. This is a required course for the K-5 Science Endorsement but non-endorsement candidates can take this course as an elective.

ECE 8430  
Mastery of Elementary Science  
3.0  

This course addresses the content of upper elementary classrooms. Students will learn Life, Physical, Earth and Space Disciplinary Core Ideas based on the Framework for K-12 Science Education including content such as: cells, ecosystems, heredity of traits, energy, chemical reactions, climate and Earth’s systems. The pedagogy will focus on assessment, differentiation and engaging a diverse community of learners to be inclusive of all students. This is a required course for the K-5 Science Endorsement but non-endorsement candidates can take this course as an elective with permission from the instructor.

ECE 8440  
Leadership in Elementary Science  
3.0  

This course addresses interdisciplinary and challenging science concepts from the K-5 progression of the Framework for K-12 Education such as, plate tectonics, natural selection, conservation of energy and wave properties. Participants will prepare to become leaders in their schools through their deeper investigation of the Crosscutting Concepts and Science and Engineering Core Ideas as well as STEM (Science Technology Engineering and Mathematics) practices in the elementary classroom. This is a required course for the K-5 Science Endorsement.

<tbody>
<tr>
<td>ECE 8680</td>
<td>Internship in Teacher Support</td>
<td>3.0</td>
<td>ECE 8400</td>
<td>Minimum grade of &quot;S&quot; required for this course</td>
<td>This course provides participants with opportunities to engage in field-based opportunities in P-5 schools and classrooms to encourage development as teacher researchers, mentors, and leaders. Additionally, participants function in a collaborative way with other professionals to enhance their own and others' growth and development. This course also provides support for teacher development experiences. Program requirements for completion of the Teacher Support and Coaching (TSC) Endorsement continue in this course. Internship may extend beyond one term. (Repeatable).</td>
</tr>
<tr>
<td>ECE 8700</td>
<td>Reading Recovery Supervision</td>
<td>3.0</td>
<td>Restricted to Reading Recovery students</td>
<td>ECE 8300, ECE 8360, and ECE 8370</td>
<td>This course prepares students for the role of Reading Recovery teacher leader. Special attention is given to the understanding of how theory and research support the Reading Recovery program, issues related to effective implementation, theories and models of professional development, supervision, and systemic change. Students develop skills for administering, implementing, evaluating, and improving district and regional early literacy intervention programs and further develop skills for facilitating professional development of classroom teachers and educators. Issues that impinge on program development and change and the professional development of educators are explored. Teacher leaders in training apply knowledge of teacher effectiveness and supervision theory and supervision of Reading Recovery teachers. (Repeatable).</td>
</tr>
<tr>
<td>ECE 8800</td>
<td>Capstone Experience</td>
<td>6.0</td>
<td>Minimum grade of &quot;S&quot; is required for this course</td>
<td></td>
<td>The capstone experience is designed by faculty and participants to provide a final reflection and documentation of an individual's work. As a culminating experience, it incorporates components of the program including self assessment, reflection, articulation of work to an outside audience, peer assessment, research analysis, and an action research project. The format for the capstone is negotiated by faculty and participants but must include emphasis on the three strands of the program: early childhood education, leadership, and research.</td>
</tr>
<tr>
<td>ECE 8920</td>
<td>Constructivist Theories and Research in Early Childhood Education</td>
<td>3.0 TO 6.0</td>
<td></td>
<td></td>
<td>This course addresses constructivist theories of learning and how these theories apply to research. The focus is on how theory, research, and practice can improve learning and teaching in early childhood classrooms. Constructivist principles guide course development. The goals of this course primarily addresses being committed to children's learning, engaging in scholarship, creating new knowledge and being members of learning communities. The course content and organization are planned to support the program's commitment to prepare educational professionals focused on pupil learning and development and the program themes: Teacher Researcher, Learner-centered Practitioner, and Professional Learner. May extend beyond one term.</td>

<td>ECE 9360</td>
<td>Curriculum, Issues, and Historical Perspectives in Early Childhood and Elementary Education</td>
<td>3.0</td>
<td></td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>The focus of this course is on curriculum models, current issues, and historical perspectives in early childhood education and their implications for research, teaching, and leadership in the profession. Participants examine their beliefs and experiences related to young children, analyze critical and contemporary issues in early childhood and elementary education, including the political and societal contexts for those issues, and become advocates for young children and their families. ECE 9360 may be cross-listed with ECE 8100.</td>
</tr>
<tr>
<td>ECE 9380</td>
<td>Discourse Analysis</td>
<td>3.0</td>
<td></td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>This course focuses on the study of language within social contexts, particularly as applied to teaching and learning within educational settings. Students will have opportunities to read and explore the theories and analytic techniques of a number of researchers, as well as do their own analyses of discourse-based data. (Same as EPRS 9380).</td>
</tr>
<tr>
<td>ECE 9393</td>
<td>Number and Operation in the Elementary Classroom</td>
<td>3.0</td>
<td></td>
<td>A minimum grade of &quot;B&quot; is required for this course</td>
<td>This course will explore the mathematics content, appropriate related pedagogy, and research base for understanding mathematical practices with whole numbers at the P-5 elementary level. Topics include counting, cardinality and comparing numbers; number problem structures; children's invented problem-solving strategies; representations of children's solutions; and developing number sense. ECE 9393 is cross-listed with ECE 7393.</td>
</tr>
</tbody>
</table>
ECE 9394  Geometry and Measurement in the Elementary Classroom

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course will explore content, pedagogy, and research base of geometry and measurement concepts for elementary grades P-5. The course will explore attributes of 2-and 3-dimensional shapes as well as classifying, dividing, combining and transforming those shapes. Geometry topics will also include congruence, similarity, slides, flips, turns, and symmetry. Measurement topics will include attributes of distance, weight, area, volume, temperature and time; tools for measuring, the metric system and conversions. ECE 9394 is cross listed with ECE 7394.

ECE 9395  Rational Numbers and Algebra in the Elementary Classroom

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course explores mathematics content and appropriate related pedagogy for understanding mathematical practices with rational numbers and algebraic concepts at the P-5 elementary level. Topics include concepts and operations with fractions and decimals; understanding equivalence; relational thinking; and making and justifying conjectures about general properties of arithmetic. ECE 9395 is cross listed with ECE 7395.

ECE 9396  Data Analysis and Probability in the Elementary Classroom

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course will explore the content, pedagogy, and research base for the data analysis and probability curriculum of the elementary grades P-5. Topics in data analysis will include asking good questions, collecting data, representing/displaying data, measures of central tendency (mean, median and mode) and making predictions. Topics in probability will include basic concepts of chance, theoretical, and experimental probability, sample space, and calculating probability. ECE 9396 is cross listed with ECE 7396.

ECE 9400  Teacher Development

CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course focuses on theory and research related to teacher change and development and practices related to teacher development. The course includes an internship in which participants work with a student teacher to promote teacher development.
ECE 9420  
Early Literacy Learning  
3.0  
A minimum grade of "B" is required for this course  
This course will focus on literacy learning using theory and research from the domains of literacy and child development. Integrating the work of emergent literacy scholars with child development scholars should enrich understandings of the beginnings of literacy development and may enhance understanding of older students who struggle as readers and writers. It will address questions such as: How do the first years of a child's experience set the trajectory of meaning-construction. How might human developmental theories inform an understanding of how a child develops as a reader, writer, language user. Why might a child who demonstrates success in solving problems and navigating in his/her own culture be labeled as deficient when he or she begins formal reading instruction. (Cross-listed with EDRD 7260).

ECE 9800  
Scholarly Inquiry  
3.0  
This course provides an introduction to doctoral work in Early Childhood and Elementary Education by preparing students to become reflexive members of scholarly communities. Focusing on intellectual discussion and scholarly reading and writing practices and processes, students examine how academics work within such constructs as research, theory, collaboration, critical and conceptual thinking, self-reflection, intellectual ambiguity, and social action. (Repeatable).

ECE 9810  
Directed Reading in Early Childhood Education  
1.0 TO 3.0  
consent of the instructor  
A minimum grade of "B" is required for this course.  
This course includes individual readings on special topics in early childhood education. These areas must be ones not covered by any course regularly taught in the Department of Early Childhood Education or an extension of a previously completed course. (Repeatable).

ECE 9820  
Teacher-Child Relationships in Early Childhood  
3.0  
A minimum grade of "B" is required for this course  
Aside from parents, teachers are a most significant influence in children’s lives. Educational research has begun to focus on the child-teacher relationship using theories that offer ways of thinking about child-adult relationships within schools and other educational contexts. This course will explore research and theory on teacher-child relationships as they affect social, emotional, cognitive, and academic development among young children.

ECE 9890  Research Apprenticeship
CREDIT HOURS  3.0
PREREQUISITES  ECE 9850
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The student learns to conduct research through close participation with an experienced faculty researcher. At the end of the course the student is prepared to conduct research independently.

ECE 9910  Developing Doctoral Students as Scholarly Writers
CREDIT HOURS  3.0
DESCRIPTION  Students examine the literature on scholarly writing, analyze exemplary writing, and study the writing processes involved in writing for publication. Students work with peers and instructor on their own writing currently in progress. Course may extend beyond one term. Course is graded as satisfactory/unsatisfactory. (Repeatable).

ECE 9960  Advanced Research and Theory in Child Development
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course focuses on the major theories of child development. Original works by the major theorists are read and discussed and effects of theories on research and practice are examined. Participants critically examine the major theories of development, families of theories, the relationship between theory and research, and the research base for the various theories. Participants study cognitive, affective, and social aspects of development.

ECE 9990  Dissertation
CREDIT HOURS  3.0 TO 9.0
REQUIREMENTS  A minimum grade of "S" is required for this course.
DESCRIPTION  Involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).

ECON 8100  Applied Microeconomic Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  ECON 3910 and ECON 6030 or MGS 9910  
DESCRIPTION  This course provides comprehensive coverage of microeconomic topics by analyzing the applications of the theory. A graphical and intuitive approach is stressed in addition to the mathematical. Topics include both the standard and the new consumer theory, production and cost analysis, modern theories of the firm and markets, and basic welfare economics. Applications useful to business students are also provided.

ECON 8110  Macroeconomic Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  ECON 3900 and ECON 6030 or MGS 9910  
DESCRIPTION  This course covers the theory of aggregate demand and supply, sector demand functions (consumption, investment, money), disequilibrium models, economic growth, inflation, unemployment and expectations, stabilization, and control.

ECON 8150  Monetary Economics and Policy  
CREDIT HOURS  3.0  
PREREQUISITES  ECON 4500  
DESCRIPTION  This course introduces the student to monetary theory and the institutions and policy through which phenomena influence national economic performance. The brand of monetary theory developed is based on a simple inter-generational model with foundations planted in the microeconomic theory of choice (on the demand for money side). Monetary macroeconomics and open economy macro-economics are treated extensively to recognize the importance of international economic phenomena and foreign sector policy as influences on the outcomes of domestic monetary policy actions.

ECON 8180  Applied Economic Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  ECON 8100 and ECON 8110  
DESCRIPTION  Tools and techniques that are used for policy purposes and for forecasting by business and government will be studied. Large-scale econometric models, leading indicators, anticipations surveys, and other devices will be analyzed in order to determine the range of their usefulness for the decision maker. Model evaluation at the industry, firm, or regional level also will be pursued.

ECON 8210  Health Economics and Policy  
CREDIT HOURS  3.0  
DESCRIPTION  This course analyzes both individual and public policy decisions surrounding health and resource allocation issues in the health care sector of the U.S. and other economies. The demand, production, cost, and financing of health are examined using a variety of conceptual and empirical models. The economic evaluation of alternative health care programs and policy implications is also discussed.

ECON 8220  Human Resources and Labor Markets  
CREDIT HOURS  3.0  
PREREQUISITES  ECON 3910 and MBA 7030  
DESCRIPTION  The course examines the operation of labor markets, the determination of labor supply, labor demand, and wages, and the impact that market forces and institutions have on the practice of human resource management and employment relations. A variety of public policy issues related to the labor market are also considered.

<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 8230</td>
<td>Experimental Economics</td>
<td>3.0</td>
<td>ECON 8100 or MBA 7030</td>
<td>This course introduces the student to economics experiments, providing the tools and concepts to evaluate and conduct economics experiments. Students will be encouraged to think about the empirical and policy implications of theories taught in other economics classes and to learn skills that are used to conduct empirical analysis (using both experimental and field data). We consider the historical development of experimental economics, market experiments (where policy issues such as market power and regulation are considered), bargaining and games (where we will focus on bargaining and collective action problems), and individual decision-making experiments (focusing on decision making under risk).</td>
</tr>
<tr>
<td>ECON 8300</td>
<td>Urban Economics</td>
<td>3.0</td>
<td>ECON 8080 or ECON 3910</td>
<td>This course examines the underlying causes of urban economic problems and evaluates alternative public policies for dealing with specific problems including congestion, discrimination, poverty, affordable housing, and central city decay. Emphasis is placed on the spatial characteristics of the urban economy as well as on market failures arising from the presence of externalities.</td>
</tr>
<tr>
<td>ECON 8310</td>
<td>Economics of Educational Policy</td>
<td>3.0</td>
<td></td>
<td>This course explores policy issues associated with K-12 education, focusing on issues raised since the publication of A Nation At Risk. The course first provides an economic conceptual framework in which to evaluate education policy alternatives and then examines education reform proposals that have been advanced over the last two decades.</td>
</tr>
<tr>
<td>ECON 8320</td>
<td>Environmental and Natural Resource Economics and Theory</td>
<td>3.0</td>
<td>ECON 2106 or ECON 8100 or PMAP 8141 or MBA 7030 or consent of the instructor</td>
<td>The goal of this course is to stimulate critical thinking about today’s environment and natural resource problems and the public policies designed to alleviate them. It attempts to broaden students’ approaches to evaluating the state of their environment and the policies that affect the environment through critical analyses of case studies concerning current environmental issues. Students will gain experience in applying principles of economic analysis to evaluate today’s environmental issues and public policy.</td>
</tr>
<tr>
<td>ECON 8380</td>
<td>Directed Readings in Economics</td>
<td>1.0 TO 6.0</td>
<td>consent of the instructor</td>
<td></td>
</tr>
<tr>
<td>ECON 8430</td>
<td>Theory of the Firm and Business Strategy</td>
<td>3.0</td>
<td>ECON 8100</td>
<td>An application of microeconomic theory and industrial organization to topics for internal firm organization and strategic business decision-making. Topics vary, but typically include transactions cost analysis and empirical implications, multiproduct cost concepts, vertical integration, product differentiation and product quality, durable good pricing, innovation and patents, spatial competition, delivered (base point) pricing, price discrimination, product building, network economies and information implications, and special topics in regulatory economies and transitional adjustments in deregulated industries.</td>
</tr>
</tbody>
</table>
**ECON 8440**  Industrial Organization and Antitrust Economics  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  ECON 3910 or MBA 7030  
**DESCRIPTION**  This course applies microeconomic analysis to the study of firm strategies and industry behavior, with special emphasis on those horizontal and vertical interactions that have been subject to antitrust scrutiny. Specific examples include price fixing, mergers, tying contracts, exclusive dealer and territorial arrangements, price discrimination, boycotts and reciprocity, and various predation strategies. Doctrinal disputes are explored and specific cases studied in light of the academic literature in industrial organization.

**ECON 8460**  Economics of the State and Local Public Sector  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  ECON 8080 or PMAP 8141 or MBA 7030  
**DESCRIPTION**  This course focuses on the application of economic principles to fiscal decisions of state and local governments. Three major topics are discussed: the description and analysis of revenue sources including taxes, lotteries, and debt; intergovernmental fiscal relations including grants, school-aid programs, and the allocation of functions between levels of government; and the provision of public services.

**ECON 8470**  International Public Economics  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  ECON 8080 or PMAP 8141 or MBA 7030  
**DESCRIPTION**  This course is a survey of topics in international public economics with an emphasis on world-wide practices. The purpose of the course is to provide students with case studies of international experiences developed using standard tools of public economics so that students can analyze these and other topics outside the classroom. The course uses the concepts of public economics (public goods, externalities, economic efficiency, equity, and income distribution) to analyze issues such as the following: Which level of government should provide which goods. How should a tax system be structured in developing, transitional, and developed economies. How many levels of government should exist. How can taxes be more effectively collected. At the end of the class, students will be familiar with the more important policy questions facing countries around the world and will be better equipped to analyze alternative policy reforms.

**ECON 8500**  History of Economic Thought  
**CREDIT HOURS**  3.0  
**PREREQUISITES**  ECON 2106  
**DESCRIPTION**  This course deals with the development of political economy from its Greek origins through the twentieth century. The continuity of intellectual and economic thought and their relationship to changing social and political settings are stressed. Particular emphasis is placed on the Classical and neo-Classical authors and their critics.
**ECON 8600  Economics of Development**

**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 8100 and ECON 8740  
**DESCRIPTION** This course examines the microeconomic foundations of issues of development in poor countries. The course will focus on the study of household behavior and the analysis of how institutions in developing countries work. Topics include the neoclassical unitary household model, intra-household bargaining and allocation, the effect of incomplete and imperfect markets on labor and land market arrangements, savings and credit institutions in the face of imperfect information, and risk sharing and its effects on decisions, and social interactions in decision-making.

**ECON 8710  Introduction to Statistical Foundations for Econometrics**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Basic probability and statistics; multivariate calculus is recommended  
**DESCRIPTION** The course provides probability and statistical tools necessary for studying econometrics at graduate level. Topics covered include basic techniques of probability theory, estimation, hypothesis testing, estimation methods, and matrix algebra. Applications of these concepts to economic problems and illustrations from business and economics are emphasized.

**ECON 8740  Applied Statistics and Econometrics**

**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 8100 and ECON 8740  
**DESCRIPTION** This course develops basic knowledge of applied statistics and applied econometrics with particular emphasis on the relationship between economic variables. The first part of the course reviews statistical measures, random variables, and probability distributions. It will examine the role of a random sample and estimation and testing of parameters. The second part will introduce estimation approaches such as simple ordinary least squares and then multiple regression. These techniques will be applied to real data for the purpose of policy analysis in areas as diverse as health, labor markets, finance, development, and taxation.

**ECON 8780  Financial Econometrics**

**CREDIT HOURS** 3.0  
**PREREQUISITES** ECON 8740 or ECON 9720 with grade of C or higher  
**DESCRIPTION** The course provides background in financial econometric methods to conduct applied empirical work using financial data. The topics covered are predictability of asset returns; modeling of volatility (ARCH-GARCH and stochastic volatility); high-frequency data models; extreme values and VaR; multivariate time series analysis (VAR, cointegration, principal components, factor analysis); continuous-time models; and econometrics of option pricing models and term-structure of interest rates.

</thead>
<tbody>
<tr>
<td>ECON 8840</td>
<td>Applied Statistics and Econometrics II</td>
<td>3.0</td>
<td>ECON 8740</td>
<td>The course provides training in preparing and managing data and introduce estimation approaches such as discrete choice models, truncated and censored regression models, panel data analysis, instrumental variable models, and evaluation methods. These techniques will be applied to real data for the purpose of policy analysis in the areas of labor markets, industrial organization, finance, economic development, and taxation.</td>
</tr>
<tr>
<td>ECON 8850</td>
<td>International Trade</td>
<td>3.0</td>
<td>ECON 3910 or MBA 7030</td>
<td>This course develops an understanding of the economic basis for trade. It also examines trade policies nations adopt, common markets, international resources flows, and the multinational corporation.</td>
</tr>
<tr>
<td>ECON 8860</td>
<td>Economics of Global Finance</td>
<td>3.0</td>
<td>ECON 2105 and ECON 2106</td>
<td>This course deals with the functioning of the international monetary system and its financial markets which set or influence foreign exchange rates. It develops an open economy macro model showing balance of payments equilibrium, and assesses policies to deal with imbalances. It examines the impact of international capital flows.</td>
</tr>
<tr>
<td>ECON 8899</td>
<td>Causal Inference and Evidence-based Policy</td>
<td>3.0</td>
<td></td>
<td>A graduate-level statistics course that covers probability theory, hypothesis testing and linear regression. If unsure about prerequisite, contact the professor. To answer cause-and-effect questions, a counterfactual model of causality and a unified methodological framework has been developed over the last three decades. This class aims to teach students to apply and interpret the counterfactual model and associated designs for answering policy-relevant empirical questions. Students will gain a deeper understanding of, and connections among, approaches to answering causal questions and of the nature of evidence itself. The topics comprise experimental designs and a suite of observational designs, including conditioning designs, partial identification designs, multiple control group designs, instrumental variable designs, regression discontinuity designs, synthetic control designs and tests of known effects and sensitivity tests to hidden bias. These topics are examined in a broad range of policy domains (poverty, planning, economic development, politics, crime, social work, health, public finance, environment, and others).</td>

<td>May be repeated for credit; does not count toward degree requirements. This course is designed for graduate research and teaching assistants seeking to conduct supervised research on topics related to duties or instructional technologies. A grade of S or U will be assigned based on attendance and participation in departmental research activities.</td>
</tr>
</tbody>
</table>
ECON 9000  Doctoral Research  
CREDIT HOURS 1.0 TO 18.0  
DESCRIPTION Doctoral students who have not yet passed their field examinations and are not registered in nine or more hours of course work on their program of study must register for this course to satisfy continuous registration requirements. A grade of S or U will be assigned based on attendance and participation in departmental research activities.

ECON 9010  Microeconomic Analysis I  
CREDIT HOURS 3.0  
PREREQUISITES Only Ph.D. students in economics, business and political science, except by special permission from the instructor  
DESCRIPTION This course is designed for Ph.D. students who plan to take the entire microeconomics theory core sequence at Georgia State University (ECON 9010, ECON 9030). This course provides comprehensive coverage of microeconomic topics by analyzing the applications to the theory. Topics include basic introduction to game theory, consumer theory, and the economics of risk and uncertainty.

ECON 9020  Macroeconomic Analysis I  
CREDIT HOURS 3.0  
PREREQUISITES ECON 3900 and ECON 6030 or MGS 9910  
DESCRIPTION This course covers the theory of aggregate demand and supply, sector demand functions (consumption, investment, money), disequilibrium models, economic growth, inflation, unemployment and expectations, stabilization, and control.

ECON 9030  Microeconomic Analysis II  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8030 and ECON 9010  
DESCRIPTION This course is the second of the two part sequence in Microeconomic theory. Topics covered include: Producer theory, partial and general equilibrium analysis, welfare economics and information economics.

ECON 9040  Macroeconomic Analysis II  
CREDIT HOURS 3.0  
PREREQUISITES ECON 9020 and ECON 8030  
DESCRIPTION This is the second of two advanced macroeconomics courses designed to bring graduate students to the frontier or current research. Topics in this course include money and monetary policy, growth theory, and theories of economics fluctuations. Strong attention will be paid to policy implications.

ECON 9080  Topics in Macroeconomic Theory  
CREDIT HOURS 3.0  
PREREQUISITES ECON 9040  
DESCRIPTION This second course in advanced macroeconomic theory covers special topics in contemporary macroeconomics. While some topics may vary from year to year in response to theoretical developments, primary emphasis is placed upon the overlapping generations model, money, multiple equilibria, and optimal consumption.

ECON 9150  Advanced Monetary Theory  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8130  
DESCRIPTION This course covers topics in the following areas: the role of money as a causal factor in a modern economic system; alternatively formulated demand for and supply of money functions; integration of value and monetary theory; and dynamic models of monetary behavior.
### ECON 9180  Economics of Uncertainty

- **Credit Hours**: 3.0
- **Prerequisites**: ECON 9010 and ECON 9030 with a C+ or higher, or consent of instructor
- **Description**: Topics in the economics of uncertainty including the utility analysis of choices involving risk, models of risk aversion, the theory of the firm under uncertainty, information and search models, and market equilibrium under uncertainty.

### ECON 9190  Applied Game Theory

- **Credit Hours**: 3.0
- **Prerequisites**: ECON 9010 and ECON 9030 with a C+ or higher, or consent of instructor
- **Description**: The purpose of this course is to introduce the basic tools of game theoretical analysis to graduate students in economics and other subjects. Topics include basic decision theory and measurement of payoffs, games in normal (strategic) and extensive forms, Nash equilibrium and its refinements, existence results, perfect and imperfect information, mixed strategies, introduction to repeated games, games with incomplete information, and cooperative games. Many applications of game theory in economics and other subjects will be discussed.

### ECON 9200  Advanced Labor Economics

- **Credit Hours**: 3.0
- **Prerequisites**: ECON 8100 and ECON 8750
- **Description**: This course provides a theoretical and empirical foundation for the analysis of issues in the areas of labor supply, labor demand, and human capital. There is a strong emphasis on the policy implications of the theoretical models and empirical techniques studied.

### ECON 9230  Topics in Advanced Labor Economics

- **Credit Hours**: 3.0
- **Prerequisites**: ECON 8100 and ECON 8750
- **Description**: This course is designed to familiarize the advanced Ph.D. student with the current state of the labor economics literature in a broad range of topic areas and with the theoretical and empirical foundations on which that literature is built. The topics included will vary from year to year.

### ECON 9300  Seminar in Urban Economics

- **Credit Hours**: 3.0
- **Prerequisites**: ECON 8100 and ECON 8300 or equivalent
- **Description**: This course covers economic theory, concepts, and methods of analysis for the study of the structure, operation, and development of urban economics. Theories and evidence are reviewed in the areas of spatial economics, urban transportation, housing markets, urban poverty, and local public finance.

### ECON 9310  Environmental and Resource Economics I

- **Credit Hours**: 3.0
- **Prerequisites**: ECON 8100 and ECON 8120
- **Description**: This course is part of a two-course sequence designed to provide students with a working knowledge of the most important models and analytical techniques used in the design of public policy for the management and conservation of natural and environmental systems; environmental benefits measurement; and dynamic models of natural resource management.

<td>ECON 9010 and ECON 9030 with a B- or higher, or consent of instructor</td>
<td>This course covers probability and statistical tools necessary for studying econometrics. Topics covered include basic techniques of probability theory, estimation, hypothesis testing, and maximum likelihood methods. Applications of these concepts to economic problems and illustrations from economics are emphasized.</td>
</tr>
</tbody>
</table>
ECON 9720  Econometrics II  
CREDIT HOURS 3.0  
PREREQUISITES ECON 9710 or MGS 9920  
DESCRIPTION This course covers the econometric techniques for linear models. Subjects include the classical linear regression model, generalized least squares, instrumental variable methods, and generalized method of moments. An introduction to asymptotic distribution theory is provided. Emphasis is placed on inference and specification testing. Brief introductions to time series techniques and dichotomous choice models are included.

ECON 9730  Advanced Econometrics  
CREDIT HOURS 3.0  
PREREQUISITES ECON 9720 or MGS 9950  
DESCRIPTION The course deals with advanced econometric methods for the analyses of cross-section and panel data. Topics include generalized method of moments, semiparametric and nonparametric methods, and extensive coverage of panel data, discrete response, censored and selection models. Empirical implementation is an essential component of the course.

ECON 9740  Time Series Econometrics  
CREDIT HOURS 3.0  
PREREQUISITES ECON 9720  
DESCRIPTION This course is designed to provide students with the necessary theoretical and applied tools to conduct research involving time series data. The topics covered are stationary univariate (ARMA) and multivariate (VAR), and nonstationary univariate (unit roots) and multivariage (spurious regressions and cointegration) time series models; forecasting, estimation and asymptotic theory in the context of time series models; nonlinear models (ARCH/GARCH, regime shifts) and others.

ECON 9750  Topics in Econometrics  
CREDIT HOURS 3.0  
PREREQUISITES ECON 9720 and ECON 9730  
DESCRIPTION The course provides in-depth treatment of selected current topics in econometrics. Topics include program evaluation, spatial econometrics, survival analysis, and data management.

ECON 9800  International Trade Theory  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8100  
DESCRIPTION A rigorous development of the pure theory of international trade, examining the economic factors which in the long-run determine the structure of trade. The classical, neoclassical, and modern theories of international trade; the gains from trade; and factor movements are all analyzed in detail. Trade theory is also applied to commercial policy and economic integration.

ECON 9880  International Monetary Economics  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8100 and ECON 8110  
DESCRIPTION This course deals in a systematic fashion with the monetary aspects of international trade and investment. Topics covered include the foreign exchange market, the balance of payments, adjustment under alternative monetary systems, international capital movements, and policies to maintain external and internal balance.

### EDUC 7777  
**Field Experiences in International Education**

**Credit Hours:** 3.0  
**Requirements:** Students must participate in the international travel required for this course  
**Description:** Modern communication technologies have increasingly made the countries of the world more interdependent. This interdependency can be either positive or negative. This course seeks to provide students with a global perspective on education and society, and its impact on both culture and world affairs. This course will concentrate specifically on the educational system and customs of the host country. Lectures and class discussions, utilizing the student's first hand experiences, will be directed toward cultural analysis of the host country with special focus on how educational systems help shape national consciousness. [cross-listed with EDUC 3333].

### EDUC 8360  
**Teacher Support Specialist**

**Credit Hours:** 3.0  
**Description:** Provides education and training in the skills and knowledge and attitudes needed to be a student teacher supervisor, mentor, coach, and supervisor.

### EDUC 8660  
**Teacher Support Specialist Internship**

**Credit Hours:** 3.0  
**Prerequisites:** EDUC 8360  
**Description:** Provides an internship using the skills and knowledge and attitudes needed to be a student teacher supervisor, mentor, coach, and supervisor.
EPS 7810  Directed Readings and Research  
CREDIT HOURS  1.0 TO 3.0  
PREREQUISITES  consent of the department chair  
DESCRIPTION  Provides opportunity for students to focus attention on a specific area of interest. Directed reading may extend beyond one term. (Repeatable).

EPS 7975  Seminar for Graduate Assistants  
CREDIT HOURS  3.0 TO 18.0  
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.  
DESCRIPTION  This course is designed to inform the students of policies and procedures needed to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).

EPS 7990  Master's Thesis  
CREDIT HOURS  1.0 TO 6.0  
PREREQUISITES  Restricted to master's-level students  
REQUIREMENTS  The course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.  
DESCRIPTION  Students earn credit for supervised development and preparation of the thesis. The thesis may extend beyond one term. (Repeatable).

EPS 7991  Master's Project  
CREDIT HOURS  1.0 TO 6.0  
REQUIREMENTS  The project is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for this course.  
DESCRIPTION  Students earn credit for supervised development and preparation of the master's project. (Repeatable).

EPS 8360  Educational Policy Making and Analysis  
CREDIT HOURS  3.0  
DESCRIPTION  This course offers an introduction to theories of the public policy making process with an applied focus on education policy. The course includes an overview of the stages of the policy process including agenda setting, formation, implementation, and evaluation, discussion of the intergovernmental structure of educational policy making in the United States including the formal and informal roles of governmental institutions and interest groups, and examination of the tools of policy analysis. Students utilize the frameworks and methods to review and analyze current issues in educational policy.

EPS 8780  Social Network Analysis  
CREDIT HOURS  3.0  
DESCRIPTION  This is a basic introductory, hands-on course, employing the social network analysis (SNA) examples in both social and natural science. SNA is a study of the patterns of relations between actors (i.e., people, information, biological elements, etc.). In addition to qualitative and quantitative research methods, SNA provides a valuable alternative perspective to help us understand how the social relationships affect individual actor behaviors and collective behaviors. It is of particular value in analyzing social media data.

EPS 8800  Independent Study  
CREDIT HOURS  3.0  
PREREQUISITES  consent of the department chair  
REQUIREMENTS  contract between student and sponsoring Educational Policy Studies faculty member  
DESCRIPTION  Provides in-depth study of selected area(s). It is highly personalized to meet the needs and career interests of the student. The independent study may extend beyond one term. (Repeatable).
**EPS 8810** Directed Reading and Research
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES consent of the instructor and the department chair
DESCRIPTION The student conducts intensive study and produces a formal report of his or her findings. The directed reading may extend beyond one term. (Repeatable).

**EPS 8950** Professional Development Seminar
CREDIT HOURS 1.0
DESCRIPTION This course provides students with guidance and information about the job-search process and related transitions. Students will develop skills relevant to job-seeking, such as: writing a CV, preparing research for publication, and drafting research statements.

**EPS 8970** Seminar in Educational Policy Studies
CREDIT HOURS 3.0
DESCRIPTION Study and exploration of selected issues related to policies and educational leadership are discussed. (Repeatable).

**EPS 9260** Issues of Race, Class, and Gender in Education
CREDIT HOURS 3.0
PREREQUISITES A minimum grade of "C" is required for this course
DESCRIPTION Examines historical and contemporary interrelationships of hegemony, domination, and power undergirding sociocultural viewpoints, institutional forces, and policy discourses in education. Focuses upon the study of theory and praxis for equity and justice.

**EPS 9270** Research in Educational Policy Studies
CREDIT HOURS 3.0
PREREQUISITES A minimum grade of "C" is required for this course
DESCRIPTION This course examines the political, conceptual, and ethical issues related to the development and implementation of educational policies. Selected policies affecting P-12 and postsecondary education are discussed. Research on policy issues is analyzed and criticized as one instance of the practice of educational research.

**EPS 9980** Research Seminar in Educational Policy Studies
CREDIT HOURS 3.0
PREREQUISITES EPS 9260 and EPS 9270
DESCRIPTION Students study course topics decided by the seminar participants as well as a topic of their own choosing. Emphasis is on critical analysis and communication across areas of policy studies.

**EPS 9990** Dissertation
CREDIT HOURS 3.0 TO 9.0
PREREQUISITES Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for the completion of the dissertation.
DESCRIPTION Involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).
EPY EDUCATIONAL PSYCHOLOGY

EPY 7080  The Psychology of Learning and Learners
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of major behavioral, cognitive, and sociohistorical approaches to learning with consideration of learning across the life span. Sources for individual differences in learning are discussed.

EPY 7090  The Psychology of Learning and Learners: The Young Child
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of major behavioral, cognitive, and sociohistorical approaches to learning with a special emphasis on learning in the young child. Sources for individual differences in learning are discussed.

EPY 7500  Individual and Family over the Lifespan
CREDIT HOURS  3.0
DESCRIPTION  The purpose of this course is for students to actively explore the theoretical and research literature in human growth and development across the lifespan. Theoretical understanding of human development from birth to older adulthood including issues of family, culture, race, gender, and their roles in children's, adolescents', and adults' lives are considered. The goal of this course is to encourage independent thinking and clear communication regarding research in the field of human growth and development, to explore ethical considerations related to this topic, and to apply the information learned to the student's program of study. (Same as CPS 7500).

EPY 7660  Practicum in Applied Behavior Analysis
CREDIT HOURS  3.0
PREREQUISITES  Admission to the M.S. program in Applied Behavior Analysis or in Educational Psychology at Georgia State University or by special permission of the Applied Behavior Analysis Program Coordinator
DESCRIPTION  Students must have completed with a grade of B or higher the following courses: EPY 8020, EPY 8850, and EPY 8970. This course will provide students with opportunities for supervision of clinical work in applied behavior analysis. The course will follow the experience guidelines set forth by the Behavior Analyst Certification Board (bacb.com). The purpose of this course is to provide additional learning opportunities in the areas of working directly with clients/customers, implementing treatment plans, and monitoring and analyzing data to make data-based decisions. Students enrolled in practicum will be required to find placement at an approved practicum site that will allow them to meet the specified hour requirements. (Repeatable).

EPY 7975  Seminar for Graduate Assistants
CREDIT HOURS  3.0 TO 18.0
REQUIREMENTS  A minimum grade of "S" is required for this course.
DESCRIPTION  This course is designed to inform students of policies and procedures to complete an assistantship. Professional ethics associated with teaching, research planning, management, and accounting procedures are reviewed. The course focuses on the teaching and research being conducted in order to further the understanding of all students involved in teaching and research. (Repeatable).
EPY 7990  Master's Capstone  
**CREDIT HOURS** 1.0 TO 6.0  
**PREREQUISITES** Restricted to MS Educational Psychology students  
**REQUIREMENTS** A minimum grade of "S" is required for this course  
**DESCRIPTION** Students earn credit for supervised development and preparation of the project, thesis, or comprehensive examination for the M.S. degree with a major in educational psychology. The master's thesis may extend beyond one term. The thesis is graded as satisfactory/unsatisfactory. (Repeatable).

EPY 8010  Professional Studies in Educational Psychology  
**CREDIT HOURS** 3.0  
**PREREQUISITES** two graduate methodological courses or consent of instructor  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This seminar is designed for beginning doctoral students and advanced master's students majoring in Educational Psychology. Study focuses on major trends, issues, and research in the field of educational psychology. Students will learn how to critically read articles related to Educational Psychology, write a literature review, and write an empirical proposal.

EPY 8020  Principles of Behavior Analysis  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students become grounded in the principles of behavior analysis laying the foundation for applying the principles of behavior analysis to social and educational issues. This course meets the objectives of Content Areas 2 and 3 for Board Certification in Behavior Analysis.

EPY 8030  Advanced Applied Behavior Analysis  
**CREDIT HOURS** 3.0  
**PREREQUISITES** EPY 8020  
**DESCRIPTION** Students survey topics in the use of applied behavior analysis such as direct instruction, behavior reduction, functional analysis, and ethical issues in the use of various procedures. Students read primary sources with an emphasis on empirical findings.

EPY 8050  The Psychology of Instruction  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students analyze theoretical models and psychological bases of instructional techniques. Research on psychology of instruction is critically evaluated.

EPY 8070  Understanding and Facilitating Adult Learning  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course examines the nature of the adult learner and presents an in-depth look at current theories of adult learning during the young and middle adult years. Practical applications of these principles are provided in terms of formal and informal settings.

EPY 8080  Memory and Cognition  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students survey the core areas of research on cognition in adults (e.g., memory, comprehension, metacognition) and critically examine recently published research. Theoretical issues and implications for education are addressed.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPY 8120</td>
<td>Motivational Factors in Learning and Behavior</td>
<td>3.0</td>
<td>Students study motivational processes in educational settings. Individual differences in motivation and the interaction of learning and motivational processes are major areas of focus.</td>
</tr>
<tr>
<td>EPY 8180</td>
<td>Learning and the School-Age Child (5 to 18 Years)</td>
<td>3.0</td>
<td>Students critically examine and evaluate theoretical and empirical research on the factors that affect learning of students from 5 to 18 years of age. The relevance of the literature to educational practice is emphasized.</td>
</tr>
<tr>
<td>EPY 8200</td>
<td>Advanced Developmental Psychology: Cognition and Intellect</td>
<td>3.0</td>
<td>Students examine theories of the development of thinking from birth through adolescence by reading and discussing recently published research. Implications for education and learning are emphasized.</td>
</tr>
<tr>
<td>EPY 8220</td>
<td>Advanced Developmental Psychology: Personality and Socialization</td>
<td>3.0</td>
<td>Study focuses on the emergence of human personality within a sociocultural matrix. Students evaluate recent empirical reports and study the application of scientific knowledge to educational practice.</td>
</tr>
<tr>
<td>EPY 8240</td>
<td>Development of Racial, Ethnic, and Cultural Identity</td>
<td>3.0</td>
<td>Students study and explore the myths and realities of racial, ethnic, and cultural identity in the United States. This class focuses on the components of ethnicity and analyzes how cultural identification influences behavior. Students gain knowledge of the major theories related to racial, ethnic, and cultural identity and apply their knowledge of these theoretical constructs to specific domains of interest. This course is grounded in a developmental perspective with an emphasis on educational, personal, and professional contexts. In addition, this class utilizes a constructivist approach in that students utilize their personal experiences as a basis for developing knowledge.</td>
</tr>
<tr>
<td>EPY 8250</td>
<td>Psychology of Inner-City Children</td>
<td>3.0</td>
<td>Students analyze the special problems that arise in the relationship between teachers and students in the inner city community, review innovative programs (with field observations), and investigate psychological, cultural, and ecological factors which most strongly influence education in this setting.</td>
</tr>
<tr>
<td>EPY 8810</td>
<td>Directed Reading or Research in Educational Psychology</td>
<td>1.0 TO 6.0</td>
<td>Students study selected areas. The directed reading may extend beyond one term. (Repeatable).</td>

EPY 8850  Introduction to Single-Case Methodology
CREDIT HOURS  3.0
DESCRIPTION  The content of this course includes types of research questions appropriate for single-case research, data collection procedures, and selection, implementation, and analysis of research designs.

EPY 8860  Applications of Single-Case Methodology
CREDIT HOURS  3.0
PREREQUISITES  EPY 8850
DESCRIPTION  This course focuses on applications of single-case methodology in the areas of education and developmental disabilities. It examines research questions, design selection and implementation of intervention procedures, and analysis.

EPY 8960  Seminar in Educational Psychology
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  consent of the instructor
DESCRIPTION  Students discuss selected topics in educational psychology. (Repeatable in different areas).

EPY 8961  Professional Development Seminar in Educational Psychology
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "S" is required for this course.
DESCRIPTION  Students discuss current issues and topics in educational psychology, as well as, learn about the components of responsible conduct of research, and the tools and resources available for engaging in scholarship at the department, college, and university levels.

EPY 8970  Ethics for Behavior Analysts
CREDIT HOURS  3.0
DESCRIPTION  Students will be introduced to the Behavior Analyst Certification Board Guidelines for Responsible Conduct. They will reflect upon these guidelines as they apply to their particular professional situations and in terms of how the guidelines apply in various environments in which certified behavior analysts work.

EPY 9000  Facilitating College Teaching
CREDIT HOURS  3.0
PREREQUISITES  Ph.D. student status
DESCRIPTION  Students review adult learning literature and prepare syllabi, tests, and portfolios. They practice implementing effective teaching strategies and learn to incorporate technology in their teaching and assessment. They also consider legal and ethical issues in college teaching.

EPY 9660  Internship in Educational Psychology
CREDIT HOURS  3.0
PREREQUISITES  EPY 9000 and consent of instructor
DESCRIPTION  This internship provides intensive experience for students in educational psychology under the supervision of a faculty member. Internship may extend beyond one term. (Repeatable).

EPY 9990  Dissertation
CREDIT HOURS  3.0 TO 9.0
REQUIREMENTS  A minimum grade of "S" is required for completion of the dissertation.
DESCRIPTION  Involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).

<td>For the writer who has made a serious commitment to prose fiction. Strong emphasis on critique of student work with the goal of eventual publication. Discussion of current literary markets, grants and prizes, and trends in fiction writing and reviewing. May be repeated if topics vary.</td>
</tr>
</tbody>
</table>
ENGL 8050  Modern Drama  
CREDIT HOURS 3.0  
DESCRIPTION Central trends in modern drama, with readings in modern English, American, and European dramatists.

ENGL 8060  Literary Criticism  
CREDIT HOURS 3.0  
DESCRIPTION An introduction to literary theory and criticism including an historical survey.

ENGL 8065  Foundations of Modern Critical Theory  
CREDIT HOURS 3.0  
DESCRIPTION Survey of the philosophical, psychological, and political writings that form the basic foundations of modern critical theory. Works studied range from the late 18th to the mid 20th centuries and may include texts by Kant, Hegel, Marx, Nietzsche, Freud, Bataille, Heidegger, Benjamin, Horkheimer, and Adorno.

ENGL 8070  Contemporary Literary Theory  
CREDIT HOURS 3.0  
DESCRIPTION A survey of contemporary ideas, issues, and concepts in literary theory from New Criticism to the present day.

ENGL 8075  Feminist Literary Theory  
CREDIT HOURS 3.0  
DESCRIPTION Survey of contemporary ideas, issues, and concepts in feminist literary theory.

ENGL 8080  Modern Grammar  
CREDIT HOURS 3.0  
DESCRIPTION Fundamentals of present-day English language constructions in writing and speech: phonology, morphology, syntax, and discourse. Focuses on applying modern linguistic theories to the analysis of form, function, and meaning of English utterances. Especially recommended for those who expect to teach English or English Language Arts.

ENGL 8090  History of the English Language  
CREDIT HOURS 3.0  
DESCRIPTION Development of the structure and history of the English language from its Indo-European roots through Old English, Middle English, Early Modern English to Present-Day English. Attention will also be given to social and regional variations of English and the International Phonetic Alphabet (IPA).

ENGL 8100  Directed Individual Research  
CREDIT HOURS 3.0  
PREREQUISITES consent of the Director of Graduate Studies  
DESCRIPTION Specialized research projects for doctoral and advanced M.A. students. May be repeated if topics vary.

ENGL 8115  Technical Writing  
CREDIT HOURS 3.0  
DESCRIPTION (Formerly ENGL 6110.) Study of scientific and technical styles; practice in various formats, including reports, proposals, instructional manuals, and professional papers.

ENGL 8120  Proseminar: Writing for Academic Publication  
CREDIT HOURS 3.0  
DESCRIPTION Study of academic writing and publication opportunities; focus on submitting conference abstracts, book reviews, and journal articles for publication; prospectus writing for M.A. and Ph.D. theses and dissertations. Students will have the opportunity to develop and expand their research in the field in which they choose to write a thesis or dissertation.

<tr>
<td>ENGL 8172</td>
<td>Medieval and Renaissance Rhetoric</td>
<td>3.0</td>
<td>Historical foundations of rhetorical theory and practices from Augustine to Madame de Scudery, covering the Middle Ages through the Renaissance in Great Britain, Europe, the Middle-East, and Asia, with emphasis on major figures, technological advances, and feminist rhetoric.</td>
</tr>
</tbody>
</table>
ENGL 8173 18th & 19th Century Rhetoric
CREDIT HOURS 3.0
DESCRIPTION This course explores the importance of enlightenment rhetoric's influence upon subsequent developments in oratory, belles-lettres rhetoric, composition pedagogy, print rhetoric, and the varied venues of rhetorical engagement. This is not a course in enlightenment philosophy, although we will certainly read philosophers from the period. Rather, we will look to the enlightenment period (broadly defined) to locate the origins of contemporary fields housed in English departments. This lens will necessitate our expanding the traditional boundaries of the enlightenment period. In particular, we will examine the influence of Scottish enlightenment theories and practices upon American pedagogy (broadly defined).

ENGL 8174 Twentieth and Twenty-first Century Rhetoric
CREDIT HOURS 3.0
DESCRIPTION Contemporary scholarship from foundational Twentieth-Century rhetorical theories to current diverse perspectives that inform Rhetoric and Composition Studies.

ENGL 8175 Topics in Rhetoric and Composition
CREDIT HOURS 3.0
DESCRIPTION Focused study of a problem, question, issue, genre, or specialized subject not covered in other courses. May be repeated as topic varies.

ENGL 8180 Composition Theory
CREDIT HOURS 3.0
DESCRIPTION An introduction to the field of Composition Studies, including bibliographical resources and competing theoretical debates; the relationships of literature, rhetoric, and literacy theory to composition studies; the application of composition theory to pedagogy; and major social, political, and curricular contexts for writing.

ENGL 8195 Composition Pedagogy
CREDIT HOURS 3.0
DESCRIPTION An introduction to methods and contemporary practices for teaching writing in classroom and writing center settings; practical applications focusing on strategies for course development and assignment design, response, assessment, and reflective classroom practices.

ENGL 8201 Contemporary Poetry
CREDIT HOURS 3.0
DESCRIPTION Survey of contemporary poetry. Designed for but not limited to creative writing students. May be repeated if topic varies.

ENGL 8202 Contemporary Fiction Craft
CREDIT HOURS 3.0
DESCRIPTION Study of fiction technique through the reading and analysis of contemporary fiction. Designed for fiction writers. May be repeated if topic varies.

ENGL 8203 Twentieth-Century American and British Poetry Craft I
CREDIT HOURS 3.0
DESCRIPTION Close analysis of selected works by major American and British poets, primarily of the first half of the 20th century. Designed for, but not limited to, creative writing students.
<table>

</tr>
<tr>
<td>ENGL 8510</td>
<td>Late British Romantic Literature</td>
<td>3.0</td>
<td>Selected works by late Romantic authors such as Byron, Mary Prince, Hemans, Dorothy Wordsworth, Shelley, DeQuincey, and Keats.</td>
</tr>
</tbody>
</table>
ENGL 8530  Issues in Second Language Writing
CREDIT HOURS  3.0
DESCRIPTION  Theories and practices underlying the teaching and learning of second language writing. Emphasis on developing the background necessary for graduate students to examine and refine their own pedagogical positions on the teaching of writing.

ENGL 8620  English Victorian Poetry
CREDIT HOURS  3.0
DESCRIPTION  Selected works by such authors as Tennyson, Browning, Arnold, Christina Rossetti, the Pre-Raphaelites, Hopkins, and Hardy.

ENGL 8630  Nineteenth-Century English Non-Fiction Prose
CREDIT HOURS  3.0
DESCRIPTION  Selected works by such writers as Coleridge, DeQuincey, Darwin, Hazlitt, Gaskell, Carlyle, George Eliot, Newman, and Wilde.

ENGL 8640  Topics in Nineteenth-Century British Literature and Culture
CREDIT HOURS  3.0
DESCRIPTION  In-depth study of writers and issues of the period 1800-1900. May be repeated if topics vary.

ENGL 8650  Nineteenth-Century British Fiction
CREDIT HOURS  3.0
DESCRIPTION  Selected works by authors such as Austen, the Brontes, Dickens, Eliot, Hardy, Stoker, Gaskell, and others.

ENGL 8670  Literature of Transition, 1880-1920
CREDIT HOURS  3.0
DESCRIPTION  Selected works by authors such as Hardy, Wilde, Pater, Conrad, and others.

ENGL 8700  Twentieth-Century English Poetry
CREDIT HOURS  3.0
DESCRIPTION  Selected poems written in English (excluding American poetry).

ENGL 8750  Twentieth-Century English Prose
CREDIT HOURS  3.0
DESCRIPTION  Selected novels, short stories, and non-fiction prose works written in English (excluding American works).

ENGL 8755  Twentieth-Century Irish Literature
CREDIT HOURS  3.0
DESCRIPTION  Study of issues surrounding Irish writing and selected works by authors such as Yeats, Synge, Joyce, Bowen, Friel, Heaney, Boland, and Ni Dhomhnaill.

ENGL 8756  Topics in Twentieth-Century English Literature
CREDIT HOURS  3.0
DESCRIPTION  Focused study of a specialized topic, theme, or theoretical approach. May be repeated if topics vary.

ENGL 8810  American Poetry of the Twentieth Century
CREDIT HOURS  3.0
DESCRIPTION  Development of American poetry from the turn of the century to the present, with an emphasis on the major poets. May be repeated if topics vary.

ENGL 8830  American Renaissance, 1820-1865
CREDIT HOURS  3.0
DESCRIPTION  Selected works by Thoreau, Emerson, Whitman, Hawthorne, Melville, and others.
ENGL 8831  Nineteenth-Century African-American Literature
CREDIT HOURS  3.0

ENGL 8840  American Realism and Naturalism, 1865-1914
CREDIT HOURS  3.0
DESCRIPTION  Selected works by Clemens, James, Howells, Wharton, Crane, Norris, Chopin, Harper, Johnson, Hopkins, and others.

ENGL 8850  Southern Literature
CREDIT HOURS  3.0
DESCRIPTION  A survey of fiction, poetry, drama, non-fiction and memoir, and historical writing from and about the American South from settlement to the present.

ENGL 8855  Early American Literature and Culture
CREDIT HOURS  3.0
DESCRIPTION  (Formerly ENGL 6820.) Investigation of literary, historical, theological, and cultural traditions from the seventeenth to the early nineteenth century.

ENGL 8860  Modern American Fiction, 1900-1945
CREDIT HOURS  3.0
DESCRIPTION  Selected short stories and novels by authors such as Anderson, Cather, Dos Passos, Dreiser, Faulkner, Hemingway, Lewis, Stein, West, and Wright.

ENGL 8870  Contemporary American Fiction, 1946 to the Present
CREDIT HOURS  3.0
DESCRIPTION  Selected short stories and novels by authors such as Baldwin, Barth, Bellow, Cheever, Ellison, Mailer, Malamud, O’Connor, Oates, Percy, Roth, and Styron.

ENGL 8880  Twentieth-Century African-American Literature
CREDIT HOURS  3.0
DESCRIPTION  (Same as AAS 6075.) The study of one or more major twentieth-century African-American writers and the study of the theoretical issues surrounding African-American literature.

ENGL 8891  Major American Writers, 1600-1916
CREDIT HOURS  3.0
DESCRIPTION  Selected works by one or more authors such as Mather, Bradstreet, Clemens, Dickinson, James, Hawthorne, Whitman, and Cather. May be repeated if topics vary.

ENGL 8892  Major Twentieth-Century American Writers
CREDIT HOURS  3.0
DESCRIPTION  Selected works by one or more authors such as Faulkner, Hemingway, Dos Passos, Morrison, Stevens, Frost, O’Neill, Albee, Williams, Ellison, or Welty. May be repeated if topics vary.

ENGL 8893  Topics in American Literature and Culture, 1500-1916
CREDIT HOURS  3.0
DESCRIPTION  Focus on themes or topics in American literature and culture from the beginnings to World War I. Sample topics might include the American Jeremiad, Transcendentalism, or the Rise of American Humor. May be repeated if topics vary.
ENGL 8894  Topics in Twentieth-Century American Literature and Culture
CREDIT HOURS 3.0
DESCRIPTION Focus on themes or topics (Western American Literature, American Historical Fiction, The City in American Literature, American Musical Theatre as Dramatic Literature, Reading Jazz, etc.) that may be studied in American fiction, poetry, drama, or non-fiction. May be repeated if topics vary.

ENGL 8900  Topics in English
CREDIT HOURS 3.0
DESCRIPTION Topics may relate to an individual author, a comparison between two authors, a theme, a genre, the relationship between literature and its social context. May be repeated if topics vary.

ENGL 8910  American Drama
CREDIT HOURS 3.0
DESCRIPTION Selected works by such twentieth-century playwrights as O'Neill, Glaspell, Hansberry, O'edets, Hellman, Miller, Williams, Albee, Mamet, Shepard, Fornes, Kennedy, Norman, and Wilson.

ENGL 8999  Thesis Research
CREDIT HOURS 1.0 TO 9.0
DESCRIPTION

ENGL 9030  Non-Thesis Individual Research
CREDIT HOURS 1.0 TO 18.0
DESCRIPTION An independent study course for students who are conducting research with faculty or preparing for comprehensive examinations at the M.A., M.F.A., and Ph.D. levels.

ENGL 9050  Topics in Contemporary Literary Theory and Criticism
CREDIT HOURS 3.0
DESCRIPTION In-depth study of specific areas, schools, developments, or major figures in contemporary literary theory and criticism (e.g., semiotics, psychoanalysis, poststructuralism, cultural studies, queer theory, Foucault, Lacan, Jameson, Kristeva, etc.). May be repeated if topics vary.

ENI ENTREPRENEURSHIP MINOR

ENI 7101  Organizational Entrepreneurship

CREDIT HOURS  3.0
PREREQUISITES  2.8 GPA and 45 credit hours, Non-RCB Majors; BUSA 6090
REQUIREMENTS  CSP: 1, 2, 6, 7
DESCRIPTION  The course explores contemporary concepts, theories, methods, and tools for systematic and sustainable entrepreneurship within established organizations (companies, non-profits, and public sector organizations). Whether recognized or not, every organization has a continual stream of potential opportunities to create customer demand. However, the complexity and speed of business obscures these opportunities (and threats). Students learn a rigorous and disciplined methodology for discovering and prioritizing opportunities for demand creation and perilous threats that can result in demand destruction. Additionally, the course investigates the emerging micro startup approach that involves a small team of entrepreneurs who innovate a new offering and/or business model.

ENI 8101  Improving the Customer Experience

CREDIT HOURS  3.0
PREREQUISITES  [ENI 7101], 2.8 GPA and 45 credit hours. For non-RCB Majors, BUSA 6090.
REQUIREMENTS  CSP: 1, 2, 6, 7
DESCRIPTION  The course deals with the application of a strategic entrepreneurship approach to dynamic business growth called Demand Creation. To prosper in today’s intensely competitive business environment, established organizations must effectively exploit current offerings/business models in ways that maximize customer demand for these offerings. Building on the foundation of [ENI 7101], the course focuses on the value enhancement side of Demand Creation by identifying and exploiting the best opportunities to increase the demand for current products/services by raising customer value while simultaneously reducing the cost structure of the offerings (allowing price reduction without margin erosion). Students apply the Demand Creation methodology for improving and extending current offerings.
**ENI 8102 Innovating Customer Value**

**CREDIT HOURS**
3.0

**PREREQUISITES**
[ENI 7101], 2.8 GPA and 45 credit hours. For non-RCB majors: BUSA 6090.

**REQUIREMENTS**
CSP: 1, 2, 6, 7

**DESCRIPTION**
The course deals with the application of a strategic entrepreneurship approach to dynamic business growth called Demand Creation. To prosper in today’s intensely competitive business environment, established organizations must effectively innovate new offerings/business models in timely response to changing social/business realities with the aim of maximizing profitable revenue and creating beneficial social outcomes. Building on the foundation of [ENI 7101], the course focuses on the value innovation side of Demand Creation—discovering and exploiting the best opportunities to fulfill important and unsatisfied customer needs via new offerings and business models in a way that maximizes an organization’s growth potential.

---

**ENI 8301 Managing for Dynamic Growth**

**CREDIT HOURS**
3.0

**PREREQUISITES**
[ENI 8101] and [ENI 8102]. For non-RCB majors: BUSA 6090.

**REQUIREMENTS**
CSP: 1, 2, 6, 7

**DESCRIPTION**
The course explores managerial action for strategic entrepreneurship within established organizations—companies, non-profit organizations and public sector organizations. The business environment today is both complex and fast, resulting in unprecedented levels of uncertainty. Entrepreneurial organizations exploit this uncertainty to achieve dynamic growth by proactively enhancing and innovating offerings, business models and strategies in timely response to changing social/business realities with the aim of maximizing profitable revenue and creating beneficial social outcomes. Building on the foundation of both [ENI 8101]/8102, the course focuses on developing an entrepreneurial workforce, developing the requisite organizational capabilities for dynamic growth, and related strategies.

---

**ENI 8302 Leading for Entrepreneurship**

**CREDIT HOURS**
3.0

**PREREQUISITES**
[ENI 7101]. For non-RCB majors: BUSA 6090.

**REQUIREMENTS**
CSP: 1, 2, 6, 7

**DESCRIPTION**
The course explores the intersection of leadership and entrepreneurship within established organizations—companies, non-profit organizations and public sector organizations. It is widely recognized that all established organizations must engage in entrepreneurial activities to one degree or another if they are to remain viable. Entrepreneurial efficacy, in large part, depends on effective leadership. But unlike conventional notions of leadership as a static leader-follower paradigm (military model), leadership in the entrepreneurial context requires entrepreneurial agents to dynamically alternate between leading and following as appropriate to the circumstances.

EPRS 7900  Methods of Research in Education
CREDIT HOURS  3.0
DESCRIPTION  Students study research methods, procedures, and designs. Preparation of research abstracts in education and related fields is included.

EPRS 7910  Action Research
CREDIT HOURS  3.0
DESCRIPTION  This course provides an overview of the research methods and philosophy of practitioner self-study.

EPRS 7920  Classroom Testing, Grading, and Assessment
CREDIT HOURS  3.0
PREREQUISITES  college algebra
DESCRIPTION  The development and application of classroom assessment instruments and the use of standardized measurement instruments in educational settings are emphasized.

EPRS 8450  Popular Culture as a Qualitative Text
CREDIT HOURS  3.0
DESCRIPTION  This course interrogates popular culture as a qualitative text. Qualitative research methods such as semiotics, textual analysis, and content analysis will be utilized to explore how identities like race, class, gender, and sexuality are represented and constructed in popular culture forms. Many forms of popular culture will be investigated with the intent to analyze, critique, and understand. Forms to be considered include television, film, music, digital media, as well as aspects of material culture such as dress, games, and toys. In addition to learning how to analyze popular culture through media textual analysis, the course will also examine the history of popular culture, its power, and complexities as well as how it is used as a tool of revealing, producing and reproducing ideology and political struggle.

EPRS 8500  Qualitative/Interpretive Research in Education I
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This is the introductory course in a sequence of three courses (including the core requirement EPRS 8500 and the elective courses EPRS 8510 and EPRS 8520) designed to provide theoretical and practical understandings of qualitative/interpretive research. This course provides students with an overview of the broad field of qualitative methodology, as well as an introduction to historical, philosophical, and policy research methodologies. Students will study theoretical underpinnings of qualitative research and research design. In addition, students will learn how to evaluate qualitative studies and write literature reviews.
**EPRS 8510 Qualitative Research in Education II**

**CREDIT HOURS** 3.0

**PREREQUISITES** EPRS 8500 with a grade of "C" or higher or instructor permission

**REQUIREMENTS** A minimum grade of "C" is required for this course

**DESCRIPTION** This is the second course in a sequence of three courses (including the core requirement EPRS 8500 and the elective courses EPRS 8510 and EPRS 8520) designed to provide theoretical and practical understandings of qualitative research. This course provides students with an understanding of and practical experience in qualitative research methods.

---

**EPRS 8520 Qualitative Research in Education III**

**CREDIT HOURS** 3.0

**PREREQUISITES** EPRS 8510 with a grade of "C" or higher or permission of the instructor

**REQUIREMENTS** A minimum grade of "C" is required for this course

**DESCRIPTION** This is the third course in a sequence of three courses (including the core requirement EPRS 8500 and the elective courses EPRS 8510 and EPRS 8520) designed to provide theoretical and practical understandings of qualitative research. This course provides students the chance to expand fieldwork skills and increase their theoretical understanding of qualitative methods and methodology.

---

**EPRS 8530 Quantitative Methods and Analysis in Education I**

**CREDIT HOURS** 3.0

**DESCRIPTION** This is the introductory course in a sequence of three courses (including the core requirement EPRS 8530 and the elective courses EPRS 8540 and EPRS 8550) designed to provide theoretical and applied understandings of quantitative research. Fundamentals of research and hypothesis testing are taught and then built upon for instruction in experimental, quasi-experimental, and correlational designs along with the requisite statistical tools for analyzing data from these designs. In addition, skills are developed in the use of SPSS, reviewing research articles, and writing research papers.

---

**EPRS 8540 Quantitative Methods and Analysis in Education II**

**CREDIT HOURS** 3.0

**PREREQUISITES** EPRS 8530 with a grade of "C" or higher or instructor permission

**REQUIREMENTS** A minimum grade of "C" is required for this course

**DESCRIPTION** This is the second course in a sequence of three courses (including the core requirement EPRS 8530 and the elective courses EPRS 8540 and EPRS 8550) designed to provide theoretical and applied understandings of quantitative research. In this course, fundamentals of experimental design and quasi-experimental design are built upon for instruction in research designs of more than two populations, designs with more than one independent variable, repeated-measures designs, and the ANOVA techniques appropriate for these designs. Fundamentals of hypotheses testing are extended with the introduction of sampling distributions and power analysis, and this course introduces designs for multiple predictor variables of a single criterion variable. Skills at using SPSS, reviewing research articles, and writing research reports are further developed.
EPRS 8550  Quantitative Methods and Analysis in Education III
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8540 with a grade of "C" or higher or instructor permission
REQUIREMENTS  A minimum grade of "C" is required for this course
DESCRIPTION  This is the third course in a sequence of three courses (including the core requirement EPRS 8530 and the elective courses EPRS 8540 and EPRS 8550) designed to provide theoretical and applied understandings of quantitative research. In this course, fundamentals of correlational designs are extended for instruction in designs incorporating one or more independent variables to predict or to explain one dependent variable, including simple linear regression, multiple regression, and logistic regression. This course also provides continued development of skills in the use of SPSS and in writing and reviewing research reports.

EPRS 8600  Computer Use in Educational Research
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8540 with a grade of "C" or higher or instructor permission
DESCRIPTION  This course provides an introduction to programming using SAS and Visual Basic in the context of education. Students will learn how to use SAS to read, reorganize, analyze, and simulate data. With Visual Basic, students will learn how to create graphical interfaces within the Microsoft Windows operating system.

EPRS 8620  Program Evaluation I
CREDIT HOURS  3.0
PREREQUISITES  EPRS 7900 and EPRS 7920 or consent of the instructor
DESCRIPTION  Students study the formative and summative evaluations of primarily educational products, processes, programs, and systems. Models, philosophies, and methods as well as current controversies and applications, are examined.

EPRS 8640  Case Study Methods
CREDIT HOURS  3.0
DESCRIPTION  This course is an introduction to qualitative design, analysis, and reporting of the particularity and complexity of case study and the relation of case study to educational evaluation.

EPRS 8660  Bayesian Statistics
CREDIT HOURS  3.0
PREREQUISITES  EPRS 8540 with a grade of "C" or higher or permission of instructor
DESCRIPTION  This course provides an introduction to Bayesian statistics including Bayes theorem, beta priors and binomial data, normal priors and data, and empirical Bayes.

<tr>
<td>EPRS 9571</td>
<td>Hierarchical Linear Modeling II</td>
<td>3.0</td>
<td>EPRS 9570 or permission of the instructor</td>
<td></td>
<td>This is the second course in a sequence of two courses (including EPRS 9570) designed to provide theoretical and applied understandings of hierarchical linear modeling. The foundational knowledge of HLM and the basic designs involving multilevel data are built upon for instruction in advanced applications of HLM in educational research, including cross-classified modeling, growth curve analysis, and meta-analysis. Additional instruction is provided in programming HLM software, interpreting the output from the software, and writing research reports of HLM designs and analyses. The course culminates in a research project that students may want to develop into a dissertation or other potentially publishable work.</td>
</tr>
<tr>
<td>EPRS 9600</td>
<td>Advanced Computer Methods for Educational Research</td>
<td>3.0</td>
<td>EPRS 8600 and EPRS 8540; or instructor permission</td>
<td></td>
<td>Advanced topics in SAS are taught, including programming simulation studies and the use of IML.</td>
</tr>
<tr>
<td>EPRS 9900</td>
<td>Advanced Research</td>
<td>3.0</td>
<td>EPRS 8540 or consent of the instructor</td>
<td></td>
<td>Students study the identification, planning, and implementation of research projects in education.</td>

EPRS 9920  Seminar in Special Topics in Qualitative Research

CREDIT HOURS  3.0

PREREQUISITES  Permission of Instructor

DESCRIPTION  This course is designed for students to research and discuss special topics in qualitative research and analyze issues facing qualitative researchers.
(Repeatable- may be taken as many as three times).
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPSF 7100</td>
<td>Critical Pedagogy</td>
<td>3.0</td>
<td>Students learn ways to enhance and stimulate opportunities for democratic schooling. Topics address teaching for social action through community service, critical literacy, multiculturalism, and post colonialism.</td>
</tr>
<tr>
<td>EPSF 7110</td>
<td>Multicultural Education</td>
<td>3.0</td>
<td>Students explore educational reforms in relation to race, ethnicity, culture, gender, and diversity within a democratic framework. Emphasis is placed on examining the economic, political, and social frames that affect the quality of education within a multicultural, social reconstructionist perspective.</td>
</tr>
<tr>
<td>EPSF 7120</td>
<td>Social and Cultural Foundations of Education</td>
<td>3.0</td>
<td>Students analyze the roles of schools in the social order from the perspectives of the humanities and the social sciences.</td>
</tr>
<tr>
<td>EPSF 7450</td>
<td>Curriculum Foundations for the Educational Leader</td>
<td>3.0</td>
<td>This course prepares students to engage in curriculum design, implementation, and evaluation with a critical focus on social, philosophical, and historical foundations as a basis for that work.</td>
</tr>
<tr>
<td>EPSF 8010</td>
<td>Cultural Studies in Education: Film</td>
<td>3.0</td>
<td>Images of education presented in popular films are analyzed from a variety of perspectives for their representations of such phenomena as school work, knowing, knowledge, and education.</td>
</tr>
<tr>
<td>EPSF 8040</td>
<td>Cultural Studies in Education: Gender</td>
<td>3.0</td>
<td>Students examine the sociocultural relationship between gender and education in U.S. society. Focuses on how schools teach about gender and the ways females and males respond to differing learning contexts.</td>
</tr>
<tr>
<td>EPSF 8260</td>
<td>Sociology of Inner-City Children</td>
<td>3.0</td>
<td>Students study problems facing culturally different children. Concepts, problem-solving procedures, and attitudes which aid constructive interaction between culturally different teachers and learners are explored.</td>
</tr>
<tr>
<td>EPSF 8270</td>
<td>Philosophy of Education</td>
<td>3.0</td>
<td>Students study major philosophical writings, their relation to the roles of students and teachers, and their relation to the aims of schooling. Students develop philosophy positions and research a philosopher of their choice. Findings are presented to the class for discussion and analysis.</td>
</tr>
<tr>
<td>EPSF 8280</td>
<td>Anthropology of Education</td>
<td>3.0</td>
<td>Students study the field of cultural anthropology as it relates to contemporary issues in education. The course focuses on education as a social institution.</td>
</tr>
<tr>
<td>EPSF 8310</td>
<td>Sociology of Education</td>
<td>3.0</td>
<td>Students study the myriad relationships between formal systems of education and the dominant characteristics of post-industrial society. Content is derived from current thought and writing in sociology and educational theory and practice.</td>
</tr>
<tr>
<td>Course Code</td>
<td>Course Title</td>
<td>Credit Hours</td>
<td>Description</td>

<tr>
<td>-------------</td>
<td>--------------------------------------------------</td>
<td>--------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>EPSF 8320</td>
<td>Politics and Policy in Education</td>
<td>3.0</td>
<td>Students study political and educational policy processes in relation to such problems as globalization and the nation-state, local and community development, social identification and political participation, pressure groups and indoctrination, academic freedom, and school reforms.</td>
</tr>
<tr>
<td>EPSF 8330</td>
<td>Globalization and Education Policy</td>
<td>3.0</td>
<td>This graduate course offers an in-depth examination of the way globalization discourses have an impact on educational policy. Students will analyze debates over the knowledge economy and globalizing the curriculum. Case studies from selected nation-states will be used to enhance understandings of educational policy borrowing and lending, privatization in education, international benchmarking and testing, citizenship and social exclusion, and policy modeling in non-governmental organizations (NGOs).</td>
</tr>
<tr>
<td>EPSF 8340</td>
<td>History of American Education</td>
<td>3.0</td>
<td>Students examine American educational thought and practice emphasizing developments in the nineteenth and twentieth centuries. Special attention is paid to recent works in the field which emphasize the social purpose and context of the U.S. public school.</td>
</tr>
<tr>
<td>EPSF 8350</td>
<td>Comparative Educational Systems</td>
<td>3.0</td>
<td>This graduate course offers a study of comparative educational systems around the globe. Students will examine the structural systems of educational provision in various countries. Topics also include theory in comparative education, educational reform policies, culture and equality in schooling, challenges to early childhood care, and international aid and human rights for education.</td>
</tr>
<tr>
<td>EPSF 8440</td>
<td>Curriculum Design and Analysis</td>
<td>3.0</td>
<td>This course prepares students to lead a school in curriculum design, implementation, and evaluation with a critical focus on social, philosophical, and historical foundations as the basis for that work.</td>
</tr>
<tr>
<td>EPSF 8630</td>
<td>Critical Policy Studies</td>
<td>3.0</td>
<td>This course describes and clarifies the domains constitutive of critical policy studies as a field that: explores policy documents in order to change educational practices toward social justice; questions who benefits most from particular social arrangements; and reveals the degrees to which education policy is inherently political.</td>
</tr>
<tr>
<td>EPSF 9260</td>
<td>Epistemology and Learning</td>
<td>3.0</td>
<td>A minimum grade of “C” is required for this course. Students investigate definitions of knowledge and theories of knowledge in the process of developing their own epistemology positions. Knowledge claims are evaluated in relation to multiple ways of learning, and students present their ideas to the class for consideration and critique.</td>

</table>
**EXC 6350  Orientation to Deafness**  
CREDIT HOURS: 3.0  
DESCRIPTION:  This course is an overview of the field of deafness. Topics include psychosocial aspects of deafness, educational settings, modes of communication, technology, vocational opportunities, social-emotional development, and needs of the deaf and hard of hearing population with multiple disabilities. EXC 6350 will be cross-listed with EXC 4350.

**EXC 6360  Audiological Considerations**  
CREDIT HOURS: 3.0  
DESCRIPTION:  An introduction to the types and causes of hearing loss, orientation to hearing testing, and characteristics and needs of individuals with hearing loss. EXC 6360 will be cross-listed with EXC 4365.

**EXC 6370  American Sign Language and Deaf Culture I**  
CREDIT HOURS: 3.0  
DESCRIPTION:  This course prepares students to understand and use American Sign Language grammar, signs, finger spelling, and non-manual markers at the survival level. Students receive an orientation to deaf culture and explore the state’s American Sign Language QCC. (Taught with EXC 4370.).

**EXC 6380  American Sign Language and Deaf Culture II**  
CREDIT HOURS: 3.0  
PREREQUISITES:  EXC 4370 or EXC 6370 or a survival rating on the Signed Communication Proficiency Interview  
DESCRIPTION:  This course prepares students to understand and use the grammar, signs, finger spelling, and non-manual markers of American Sign Language at the intermediate level. Students increase their understanding of deaf culture and explore the American Sign language QCC. (Taught with EXC 4380.).

**EXC 6560  Educational Evaluation of Students with Disabilities**  
CREDIT HOURS: 3.0  
DESCRIPTION:  This course is the study of the process of gathering information regarding the individual strengths and needs of students with disabilities. It introduces both formal and informal evaluation procedures used in special education settings. Students select and administer both formal and informal assessment instruments and use the data from these assessments for eligibility decision making, instructional planning, and progress monitoring. Limitations of assessment tools related to test bias and cultural and linguistic concerns are addressed in the areas of test selection, administration, interpretation of test results. Technology that facilitates the assessment process is used throughout the course. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).

**EXC 6570  Individual and Classroom Management**  
CREDIT HOURS: 3.0  
PREREQUISITES:  Admission to Behavior/Learning Disabilities program  
DESCRIPTION:  The course is designed to promote skill development in the use of empirically validated methodology on the formation of interventions and effective management strategies for individuals as well as groups across a variety of learning environments. Participants develop an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interactions, active engagement in learning, and self motivation. A case study approach is used to promote reflection, evaluation, synthesis, and application of principles learned. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).
**EXC 6580**  
**Instructional Methods for Students with Behavior/Learning Disabilities**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Admission to Behavior/Learning Disabilities program  
**DESCRIPTION** This course focuses on the fundamental elements of design, implementation, and evaluation of individualized programs based on educationally relevant characteristics of students with mild behavioral and learning disabilities. Research-based strategies and materials for instruction and technology use in the areas of reading, math, and written language are described and demonstrated with an emphasis on explicit teaching approaches. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).

**EXC 6590**  
**Functional and Social Methods for Students with Behavior/Learning Disabilities**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Admission to Behavior/Learning Disabilities program  
**DESCRIPTION** This course focuses on development, implementation, and evaluation of strategies and methods to promote the acquisition of critical functional life skills in students with mild disabilities. A major focus is the use of integrated thematic instruction which embeds functional skills in the content area. Adaptive behaviors and strong determination of students’ success in various contexts are also included. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, twice).

**EXC 6600**  
**Infusing Co-teaching Strategies across the Content Areas**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Instructional models for both special and general education teachers have significantly changed over the last decade as greater numbers of students with disabilities are served in inclusive co-taught classrooms. In this course, students will examine consultative strategies, cooperative teaching techniques, and other culturally-responsive methods that have been designed to foster student performance in diverse inclusive settings. The primary focus of the course is on the development of the collaborative and technical skills of co-teaching across the content areas. EXC 6600 will be cross-listed with EXC 4600.
EXC 6661  Practicum I: Special Education
General Education Curriculum: Consultative

CREDIT HOURS  3.0

PREREQUISITES  Admission to Behavior/Learning Disabilities Program and EXC 4010

DESCRIPTION  This field-based experience is the first of two required practica for students seeking initial licensure in special education. This practicum provides students with an opportunity to develop and practice skills in delivering instruction and assessment with students who have mild disabilities. Practicum requirements may be completed on the job for those students who are currently employed as a classroom teacher in an approved setting. Students not employed by an approved school will be placed by the program. They will be required to proof of tort liability coverage and have completed a criminal background check through the College of Education Office of Academic Assistance. Students complete the requirements for this practicum with a supervising teacher in a public school setting. The placement requires 15-20 hours per week in classroom settings working with students with mild disabilities. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, once).

EXC 6671  Educational Partnerships and Practicum II: Special Education
General Education Curriculum: Consultative

CREDIT HOURS  3.0

PREREQUISITES  EPY 2050, EXC 4010, EXC 6560, EXC 6570, EXC 6580, EXC 6590, and EXC 6661.

DESCRIPTION  This is the second of two required practica for students preparing for initial licensure in special education general education curriculum: consultative. This course includes the study of family systems and parenting perspectives, effective communication, and models of collaboration. Students are placed in public school settings for the entire school day during the semester of their practicum. Practicum requirements may be completed on the job for those students who are currently employed as a classroom teacher in an approved setting. Students not employed by an approved school will be placed by the program. They will be required to show proof of tort liability coverage and have completed a criminal background check through the College of Education Office of Academic Assistance. Students complete the requirements for this practicum with a supervising teacher in a public school setting. The placement requires 15-20 hours per week in classroom settings working with students with mild disabilities. Various means of collaboration within the school setting are discussed as well as roles and responsibilities of school personnel in consultation, collaboration, and teamwork during the required seminars. Learners demonstrate an understanding of the importance of collaboration in specific special education activities such as pre-referral teams, assessment, IEP/ITP meetings, and consultation with general education teachers regarding strategies for working with students with disabilities. This course requires additional assignment(s) beyond those at the initial level. (Repeatable, once).

EXC 7160  Strategies for Social and Emotional Behavior in Students with Behavior and Learning Disabilities

CREDIT HOURS  3.0

REQUIREMENTS  A minimum grade of "B" is required for this course

DESCRIPTION  This course examines techniques for individual and group behavior management as well as curriculum and teaching strategies for promoting the social and emotional development of students with behavior and learning exceptionalities. Both reactive and proactive strategies for working with students are covered.

EXC 7170  Methods for Teaching Functional Life Skills to Students with Behavior and Learning Disabilities

CREDIT HOURS  3.0

REQUIREMENTS  A minimum grade of "B" is required for this course

DESCRIPTION  This course trains teachers to implement appropriate strategies and methods for students with behavior and learning exceptionalities in developing critical life skills. A major focus is the use of the thematic approach that allows the training of functional life skills embedded in the content areas of academics, social, and adaptive behavior across age levels. The curricular base for the course is functional life skills including topics in career education.

EXC 7190  Alternative Approaches to Literacy Instruction for Students with Disabilities

CREDIT HOURS  3.0

PREREQUISITES  consent of the instructor

REQUIREMENTS  A minimum grade of "B" is required for this course

DESCRIPTION  Students study the design, implementation, and evaluation of reading, writing, and spelling instruction for students with disabilities, with an emphasis on an explicit, direct approach to instruction as supported by research. Students study explicit instructional procedures in phonological awareness, decoding, comprehension, writing, spelling. Commercial programs that are research-based and that meet the needs of students with disabilities are reviewed and demonstrated. EXC 7190 is cross-listed with EXC 4190.

EXC 7250  Characteristics of Severe Intellectual Disability and Autism

CREDIT HOURS  3.0

DESCRIPTION  This course includes the study of the cognitive, social, communication, and learning characteristics of students with moderate, severe, and profound mental retardation and autism. Discussions focus on social philosophies and service delivery issues.

EXC 7260  Characteristics of Severe Physical and Multiple Disabilities

CREDIT HOURS  3.0

REQUIREMENTS  A minimum grade of "B" is required for this course

DESCRIPTION  This course analyzes the impact of physical, sensory, and health impairments on learning and the resulting educational implications. Major physical, sensory, and health impairments that are often found in school age populations are addressed.

1.496
**EXC 7315** Assessment and Curricular Planning for Students with Autism Spectrum Disorders

**CREDIT HOURS** 3.0

**REQUIREMENTS** A minimum grade of "B" is required for this course

**DESCRIPTION** This course addresses contemporary assessments and models for evaluating students with ASD. Students will acquire competency in a variety of assessments used for screening, diagnosing, and identifying skill targets for instruction across socialization, communication, sensory, behavior, self-help, and academic domains. Diagnostic prescriptive assessment will be linked to program development and ongoing classroom data collection.

**EXC 7320** Methods of Teaching Low Functioning Students with Autism Spectrum Disorders

**CREDIT HOURS** 3.0

**REQUIREMENTS** A minimum grade of "B" is required for this course

**DESCRIPTION** This course provides an examination of the unique learning styles of students functioning on the lower end of the autism spectrum and how their disability may affect behavior and learning. Empirically-validated methods for teaching communication, socialization, self-help, and basic academics will be discussed along with the application of these methods across environments.

**EXC 7325** Methods of Teaching High Functioning Students with Autism Spectrum Disorders

**CREDIT HOURS** 3.0

**REQUIREMENTS** A minimum grade of "B" is required for this course

**DESCRIPTION** This course will prepare professionals to plan and implement effective programs for children and youth with Aspergers and those who are functioning at the high end of the autism spectrum. Empirically-based strategies for enhancing functioning in academics, communication, socialization, and behavioral flexibility will be discussed. EXC 7325 is cross-listed with EXC 4325.

**EXC 7330** Physical and Health Management of Students with Disabilities

**CREDIT HOURS** 3.0

**REQUIREMENTS** A minimum grade of "B" is required for this course

**DESCRIPTION** This course includes a wide variety of techniques to meet the student's physical and health needs including how to position the student for optimal instruction, lifting and handling procedures, feeding techniques, and health care procedures (e.g., tube feeding, catheterization).

**EXC 7350** Psychosocial Characteristics of Deafness

**CREDIT HOURS** 3.0

**REQUIREMENTS** A minimum grade of "B" is required for this course

**DESCRIPTION** Students examine information related to psychological and sociological implications of deafness crucial to understanding the characteristics of individuals who are deaf or hard of hearing. This information is presented within an historical and philosophical framework.
EXC 7360  Language Development in Students Who Are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  Consent of Instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to provide students with techniques and strategies for assessing and teaching reading and written language skills to students with hearing loss. Assessment, lesson planning, and effective instruction are addressed. This course is cross-listed with EXC 4460.

EXC 7390  Reading and Writing Instruction for Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to provide students with techniques and strategies for assessing and teaching reading written language skills to students with hearing losses. Assessment, lesson planning, and effective instruction are addressed. This course is cross-listed with EXC 4390.

EXC 7400  Methods of Teaching Students Who Are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to provide students with techniques and strategies for assessing and teaching students who are deaf/hard of hearing whether in resource, self-contained, or inclusive settings. Lesson planning, classroom management, curriculum, and effective instruction are addressed. This course is cross-listed with EXC 4400.

EXC 7410  Educational Assessment of Atypical Deaf Students
CREDIT HOURS  3.0
PREREQUISITES  Consent of Instructor; undergraduate degree in deaf education
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course reviews the administration and/or adaptation of assessment tools in speech, language, academic subjects, and cognitive skills of students who are deaf/hard of hearing and have additional learning disorders and relates these to IEPs programming and classroom procedures.

EXC 7420  Methods for Teaching Atypical Students Who are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course presents advanced methods, techniques, and instructional issues regarding the education of deaf/hard of hearing students who have additional learning disorders. Course content covers issues of characteristics, planning, programming, curriculum, and management of additional learning disorders.

EXC 7430  Auditory and Speech Development in Students Who Are Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  The purpose of this course is to prepare teachers of students who are deaf/hard of hearing to provide appropriate assessment and intervention to enhance speech and listening skills in clinical and classroom contexts. This course is cross-listed with EXC 4430.
EXC 7460  Mathematics Instruction in Special Education I
CREDIT HOURS  3.0
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course provides core mathematics knowledge for K-8 teachers emphasizing the use of algebraic thinking to connect mathematics, its ideas, and application through conjecture, inventing, and problem solving. This course emphasizes problem solving, sets, whole numbers, functions, numerations systems, whole number computation, integers, fractions, decimals, and percents. Part I of a two part course. (Repeatable, twice).

EXC 7650  Characteristics of Young Children with Disabilities
CREDIT HOURS  3.0
PREREQUISITES  consent of the instructor
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course focuses on legislation and learning and behavioral characteristics of young children with disabilities.

EXC 7660  Methods of Teaching Young Children with Disabilities
CREDIT HOURS  3.0
PREREQUISITES  EXC 7650
REQUIREMENTS  A minimum grade of "B" is required for this course
DESCRIPTION  This course includes instructional methods, materials, and curriculum used in teaching young children with disabilities. Three-hour weekly field placement is required as part of course.

EXC 7810  Directed Reading and Research in Special Education
CREDIT HOURS  1.0 TO 6.0
PREREQUISITES  consent of instructor
DESCRIPTION  Students intensively study selected areas of special education through special reading or conducting special projects depending on the needs of the student. Directed reading may extend beyond one term. (Repeatable).

EXC 7920  Practicum I: Deaf/Hard of Hearing
CREDIT HOURS  3.0
PREREQUISITES  contact the department
DESCRIPTION  This intensive practicum course provides opportunity for initial in-depth experiences with deaf and hard of hearing students. This practicum may extend beyond one term. This course is cross-listed with EXC 4920.

EXC 7925  Practicum I: Intellectual Disabilities
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  contact the department
DESCRIPTION  This intensive practicum course provides opportunity for initial in-depth experiences with students with intellectual disabilities. This practicum may extend beyond one term. EXC 7925 may be cross-listed with EXC 4925.

EXC 7926  Practicum I: Autism
CREDIT HOURS  3.0
PREREQUISITES  contact the department
DESCRIPTION  This intensive practicum course provides opportunity for initial in-depth experiences with students with autism. This practicum may extend beyond one term.
EXC 7927  Practicum I: Physical and Health Disabilities  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
DESCRIPTION  This intensive practicum course provides opportunity for initial in-depth experiences with students who have orthopedic impairments. This practicum may extend beyond one term.

EXC 7929  Practicum I: Early Childhood  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
DESCRIPTION  This intensive practicum course provides opportunity for initial in-depth experiences with early childhood students. This practicum may extend beyond one term.

EXC 7930  Practicum II: Deaf/Hard of Hearing  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
REQUIREMENTS  A minimum grade of "B" is required for this course  
DESCRIPTION  This intensive practicum course provides opportunity for full-time, in-depth experiences with students who have orthopedic impairments. This practicum may extend beyond one term.

EXC 7935  Practicum II: Severe Intellectual Disability  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
REQUIREMENTS  A minimum grade of "B" is required for this course  
DESCRIPTION  This intensive practicum course provides opportunity for full-time, in-depth experiences with students with severe mental retardation. This practicum may extend beyond one term. EXC 7935 may be cross-listed with EXC 4935.

EXC 7936  Practicum II: Autism  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
REQUIREMENTS  A minimum grade of "B" is required for this course  
DESCRIPTION  This intensive practicum course provides opportunity for full-time, in-depth experiences with students with autism. This practicum may extend beyond one term.

EXC 7937  Practicum II: Physical and Health Disabilities  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
REQUIREMENTS  A minimum grade of "B" is required for this course  
DESCRIPTION  This intensive practicum course provides opportunity for full-time, in-depth experiences with students who have orthopedic impairments. This practicum may extend beyond one term.

EXC 7939  Practicum II: Early Childhood  
CREDIT HOURS  3.0  
PREREQUISITES  contact the department  
REQUIREMENTS  A minimum grade of "B" is required for this course  
DESCRIPTION  This intensive practicum course provides opportunity for full-time, in-depth experiences with early childhood students. This practicum may extend beyond one term.
**EXC 7940**  
Practicum: Deaf/Hard of Hearing  
**CREDIT HOURS** 3.0  
**PREREQUISITES** contact the department  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** This intensive practicum course provides opportunity for advanced in-depth experiences with deaf/hard of hearing students. This practicum may extend beyond one term. This course is cross-listed with EXC 4940.

**EXC 7941**  
Current Issues in Special Education  
**CREDIT HOURS** 3.0  
**PREREQUISITES** M.Ed  
**REQUIREMENTS** A minimum grade of "B" is required for this course  
**DESCRIPTION** in Special Education students. This course provides students with the opportunity for advanced in-depth study and discussion of current important issues in the special education profession.

**EXC 7980**  
Research in Special Education: Master’s Capstone  
**CREDIT HOURS** 1.0 TO 6.0  
**PREREQUISITES** M.Ed  
**REQUIREMENTS** A minimum grade of "S" is required for this course  
**DESCRIPTION** Special Education students. Students earn credit for supervised development and preparation of the action research project, research thesis, master’s project, or comprehensive examination for the M.Ed. degree with a major in Special Education. The master’s thesis or action research project may extend beyond one term. The research thesis or action research project, and master’s project is graded as satisfactory/unsatisfactory. (Repeatable).

**EXC 8770**  
Positive Behavioral Interventions and Supports  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course examines the three-tiered proactive and preventative positive behavioral interventions and supports (PBIS) framework for implementation for all students within a variety of educational environments and across age spans (preschool through secure juvenile justice settings). Each tier will be discussed along with appropriate strategies and interventions. This course emphasizes the PBIS data-based decision-making process and fidelity of implementation in terms of student academic and social outcomes appropriate for a variety of school staff (e.g., teachers, administrators, school psychologists, correctional education, etc.). Note: Course open to students in graduate degree programs from any college in the university; consent of instructor required for students in post-baccalaureate programs.

**EXC 8810**  
Directed Reading or Research in Special Education  
**CREDIT HOURS** 1.0 TO 6.0  
**PREREQUISITES** consent of instructor  
**DESCRIPTION** This independent study course is for intensive study of selected areas of special education not covered in course work. Directed reading may extend beyond one term. (Repeatable).

**EXC 8961**  
Professional Development Seminar in Special Education  
**CREDIT HOURS** 1.0 TO 3.0  
**REQUIREMENTS** Course is graded as satisfactory/unsatisfactory  
**DESCRIPTION** A minimum grade of "S" is required for this course. Students discuss current issues and topics in special education and develop a personal line of research leading to a residency study and preparation for their dissertation. The seminar may extend beyond one term. (Repeatable).
EXC 8980  Professional Investigation and Writing in Special Education
CREDIT HOURS 3.0
PREREQUISITES EXC 8010 or consent of instructor
REQUIREMENTS A minimum grade of "B" is required for this course
DESCRIPTION This course for educational specialist students in special education provides the knowledge and skills to complete the research and writing of a school improvement project.

EXC 9660  Internship in Special Education I
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION This internship provides intensive experience for students to teach college level courses in special education under the supervision of a faculty member. Internship may extend beyond one term.

EXC 9900  Research Seminar in Special Education
CREDIT HOURS 1.0 TO 3.0
DESCRIPTION Students analyze advanced research in special topics. (Repeatable). [Cross-listed with PSYC 9900L].

EXC 9981  Grant Proposal Writing in Special Education
CREDIT HOURS 3.0
PREREQUISITES EPRS 8530; two course sequence (6 units) in quantitative or single-case methodology
DESCRIPTION This course provides students with the opportunity to locate and develop private and public grant proposals with an emphasis on special education funding.

EXC 9985  Ethics and the Advancement of Research
CREDIT HOURS 3.0
PREREQUISITES Admission into the doctoral program
DESCRIPTION This seminar will include discussion and assignments related to (a) ethics in the conduct of research, especially applied research with vulnerable populations, (b) tracing the development over time of a line of research, and (c) requirements of evidence-based practices.

EXC 9990  Dissertation
CREDIT HOURS 3.0 TO 9.0
REQUIREMENTS Course is graded as satisfactory/unsatisfactory. A minimum grade of "S" is required for completion of the dissertation.
DESCRIPTION This course involves the research and writing of the doctoral dissertation. Dissertation may extend beyond one term. (Repeatable).
EDB EXEC DOCTORATE IN BUSINESS

EDB 9000  Leadership To Create Human Value
CREDIT HOURS  3.0
DESCRIPTION  Leadership is critical for creating and sustaining value in organizations. The academic investigation of leadership focuses on: 1) What is leadership. 2) What are human values. 3) What is the relation between leadership and human values. The course examines these questions to help students untangle concepts of leadership, authority, and status; understand the competing human values in leadership theories; identify the boundary conditions that pertain to leadership theories; and strike an appropriate balance between learning about leadership and learning to lead. The course favors the practical over the theoretical and focuses on theories supported by evidence, including adaptive leadership, transformational leadership, transactional leadership, and competing values leadership.

EDB 9020  Philosophy and Practice of Engaged Scholarship
CREDIT HOURS  3.0
DESCRIPTION  This course explores the different forms of engaged scholarship. It focuses on the research process that can enable students to generate both scholarly contributions and practical knowledge, which is at the core of Robinson’s Executive Doctorate program. The course is designed to enable students to develop a research focus and understand the research process. It examines the roles of theory and models in the research process and the differences between variance and process models. Students learn how to formulate a problem, motivate a research question, synthesize relevant literatures, draw on relevant theoretical perspectives, and develop variance and process models.

EDB 9030  Theory and Practice of Managing Organizations
CREDIT HOURS  3.0
DESCRIPTION  This course examines the theory and practice of managing collaboration and change in organizations. The focus is on achieving coordination and cooperation among autonomous and self-interested, yet interdependent parties. Dominant management and organization theories are examined and applied to real-world issues within different industrial contexts. The course introduces the students to a select variety of theoretical frameworks, it investigates the possible roles of such frameworks in designing engaged scholarship research, and it engages all students in exploring specific management and organization theories that are relevant for their research interests.

EDB 9040  Emerging Markets and Global Models for Business
CREDIT HOURS  3.0
DESCRIPTION  This course examines how globalization impacts market intelligence analysis, organization design, and business operation with a focus on differences in business models and practices around the globe. The course is designed to help students appreciate and analyze how cultural, political, and economic systems in emerging markets impact international business activities. The course examines key players in emerging markets, makes comparisons to developed markets, and assesses the informational and institutional voids that exist. It explores how managers can develop strategic alliances that may be employed to create competitive advantage. Emerging markets in regions such as the Americas, Eastern and Central Europe, Asia, and Middle East-North Africa will be examined in more detail.
EDB 9050  Qualitative Research I
CREDIT HOURS 3.0
DESCRIPTION
This course introduces the student to qualitative research approaches, including action research, case study research, ethnographic research, and grounded theory. Relative strengths and weaknesses are discussed along with examples of how each approach has been used in practice. The course introduces several data collection techniques that are widely used in qualitative research, namely interviews, participant observation, fieldwork, and using documents. Research design issues associated with qualitative or small sample studies are discussed. Issues such as reliability and validity are explored. The differences between positivist, interpretivist, and critical perspectives are discussed. In addition, students are introduced to the Institutional Review Board (IRB) Process.

EDB 9060  Global Economic Systems & Issues
CREDIT HOURS 3.0
DESCRIPTION
This course provides a framework to understand global macroeconomic developments and their effects on businesses. These global developments include: the growth process countries have followed and the various policies that have been implemented; interest rates, exchange rates in international settings, and asset prices in the global economy; causes and consequences of trade deficits and external imbalances; emerging market economies' financial crises; causes of currency, banking and financial crises in emerging market and advanced economies; short- and long-term effects of monetary and fiscal policy; the drive to reform the international financial architecture; and, the role of international economic institutions like the IMF, the World Bank, and the World Trade Organization.

EDB 9070  Qualitative Research II
CREDIT HOURS 3.0
DESCRIPTION
This course provides concepts and tools for qualitative data analysis. The course exposes students to a variety of approaches, including hermeneutics, semiotics, narrative analysis, and content analysis, with particular emphasis on grounded theory and case study research. Students are introduced to grounded theory coding, memo writing, theoretical sampling, saturation, sorting, and use of qualitative data analysis software. Various techniques for analyzing case study evidence are explored including pattern matching, explanation building, and within-case and cross-case analysis. Perspectives on what it means to draw conclusions and build theory from qualitative data are explored. The course concludes with guidance on how to write and publish qualitative research.

EDB 9080  Quantitative Research 1
CREDIT HOURS 3.0
DESCRIPTION
This course provides students with a command of the core concepts and tools needed to design quantitative studies and to collect, evaluate and analyze quantitative data. The course covers empirical data collection methods, such as surveys. It also covers sampling techniques, various types of data and appropriate analytical techniques. These include an introduction to univariate and bivariate statistics (i.e., chi-square, t- and z-tests, the ANOVA family, correlation, and regression). In addition, the course helps students gain proficiency in using SPSS software to analyze and interpret empirical results.
EDB 9100  QUANTITATIVE RESEARCH II  3.0
DESCRIPTION
This course introduces students to quantitative methods such as experiments, field studies, and use of secondary data. It strengthens student's ability to design and execute quantitative research with an emphasis on construct measurement (i.e., development of measurement scales associated with key variables of interest) and topics such as theoretical modeling, framing research questions, developing hypotheses, model refinement, reliability, scientific validity, and statistical conclusion validity. The course reinforces the knowledge base developed in Quantitative Research I (EDB 9080) with focus on univariate, bivariate and multivariate statistics (t-test, the ANOVA family, correlations, factor analysis, and OLS regression), nonparametric statistics, and structural equation modeling.

EDB 9110  INFLUENCES AND LIMITATIONS ON EXECUTIVE DECISION MAKING  3.0
DESCRIPTION
Although executives make decisions continually, many are unaware of the hidden, yet substantial influences that cognitive and organizational factors have on the processes they follow and the outcomes that result. This course examines the human factors that influence and guide executive decision making. It also explores organizational influences on executive decisions, including organizational structure, and social and political forces. It investigates the actions executives can take if they seek to address their human limitations and organizational limitations affecting their executive responsibilities.

EDB 9120  EVIDENCE-BASED MANAGEMENT  3.0
DESCRIPTION
This course develops the student's knowledge and skills related to the role of scientific and organizational evidence in management thinking and decision making. Students will learn to recognize management practices based on habit, fads, convention and unrealistic levels of confidence and how to improve these practices with principles based on relevant scientific findings and unbiased organizational facts. Students will learn how to: identify, access, and use an organization's data challenges; create decision-making information from organizational facts; and find, appraise, interpret and apply scientific evidence as managers.

EDB 9130  ETHICAL ISSUES CONFRONTING CONTEMPORARY BUSINESS LEADERS  3.0
DESCRIPTION
This course examines ethical issues confronting contemporary business leaders on different levels, including the individual, the group, the organization, the industry, and society. Course content is applied to students' experiences grounded in the assumption that ethics principally concerns cooperative behavior—abiding by rules, conventions and principles; acting in the interest of both self and others; and exploring and determining with others ends and appropriate means. Considering ethics as a potentially important dimension of every human activity, the course examines different types of cooperation and different forms of ethical inquiry that enable human flourishing. As such, this course strives toward developing comprehensive ethical expertise for business leaders.
EDB 9140  Laboratory for Business Driven Research
CREDIT HOURS  3.0
DESCRIPTION  This course is a workshop-oriented forum in which students will meet with their peers and the faculty to discuss obstacles encountered in their research as well as solutions for how to overcome them.

EDB 9150  Creating and Disseminating Research Knowledge
CREDIT HOURS  3.0
DESCRIPTION  This course develops an understanding of the role of executive doctorates in the creation and dissemination of new knowledge. Among the topics to be covered are how to develop a program of research to create knowledge within particular domains of theory and practice; approaches to present, discuss, and defend the results of rigorous engaged scholarship; methods of knowledge dissemination including publication in internal (e.g. white papers) and external (e.g. practitioner or academic publications) outlets; and the process of crafting engaged scholarship research for dissemination through these various outlets.

EDB 9170  Dissertation
CREDIT HOURS  3.0 TO 6.0
DESCRIPTION  During the last three semesters students will register for a total of 12 hours of independent dissertation work aimed at addressing a contemporary business problem. During this period, students will be expected to develop and defend a proposal, organize an independent research project, and write and defend a coherent dissertation. This course may be taken multiple times for credit.

EDB 9171  Dissertation Seminar
CREDIT HOURS  1.0 TO 9.0
DESCRIPTION  Completed all other EDB course work, permission of the academic program director. The seminar is intended for students who have not finalized their Executive Doctorate dissertation within the designated three years of the program. The objective is to facilitate the participants' dissertation work. During the seminar, the students will meet on a regular basis to present status of dissertation work, to receive critique and guidance on their dissertation, to review relevant research methodology, and, to review key challenges and approaches in dissertation writing. A grade of IP (satisfactory progress was made on the dissertation) or U (satisfactory progress) is assigned each term. At the end of the term during which the dissertation is completed/defended, a grade of S (satisfactory) or U (unsatisfactory) is assigned. May be repeated once for credit.
EMBA 8000  Introduction to Executive Management  
CREDIT HOURS  
3.0  
PREREQUISITES  
Consent of director of EMBA program  
DESCRIPTION  
This course provides an introduction to executive management education. The role of general management, in which the executives have responsibilities for a broad spectrum of tasks, is established. Six themes that transcend any one course and continue through the entire program are identified and introduced. The themes are oral communications, written communications, quantitative analysis, computer skills, interpersonal skills, and an international perspective. Basic skills in accounting and mathematics are covered.

EMBA 8005  Cross-Cultural Business Practices  
CREDIT HOURS  
3.0  
DESCRIPTION  
Prerequisite: Consent of director of EMBA program. This course is directed toward understanding the changing demographics of the workplace in the United States and the impact culture has on how business is conducted both in the U.S. and in other countries. Emphasis is placed on the awareness of the cultural differences and the recognition of their impact on business norms and practices.

EMBA 8007  Fundamentals of Accounting  
CREDIT HOURS  
1.5  
PREREQUISITES  
Consent of director of EMBA program  
DESCRIPTION  
This course covers the fundamentals of accounting principles. Specifically included are accounting concepts, principles, traditions, and terminology, the accounting model, introduction to the financial statements (balance sheet, income statement, and statement of cash flows), and the bookkeeping process from analysis of transactions through adjustments to the preparation of a balance sheet and income statement.

EMBA 8010  Strategic Digital Transformation  
CREDIT HOURS  
1.0 TO 3.0  
PREREQUISITES  
Approval of EMBA Director  
DESCRIPTION  
This course will address three fundamental questions: (1) Why should firms bother embracing digital technologies to transform their existing business models. (2) What are they typical challenges associated with digital business transformation. (3) How can firms overcome these challenges through web, mobile, social and big data analytics.

EMBA 8015  Leading through Strategic Communication  
CREDIT HOURS  
1.0 TO 3.0  
PREREQUISITES  
Approval of EMBA director  
DESCRIPTION  
This course presents excellent written and oral business communication as a leadership strategy critical to success in the global workplace. Students master a communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice influencing and persuading others through strategically aligned business documents that are clear, precise, and readable including communications to executive level readers. Students will also develop skills in the effective design and delivery of persuasive presentations, delivering unwelcome information, and effective, productive group communication, and negotiations.

<tr>
<td>EMBA 8025</td>
<td>Financial &amp; Cost Accounting</td>
<td>3.5</td>
<td>None</td>
<td>This course introduces financial accounting concepts and principles along with elements of financial analytical methods. It is designed to lay a foundation for the Executive MBA curriculum, especially subsequent accounting and finance courses. This course is also a study of the major accounting methods used for costing products, services, programs, projects, departments, and other operational units and cost objects. The primary emphasis is on developing the needed understanding, insights, and skills to correctly use such data in making various kinds of managerial decisions.</td>
</tr>
<tr>
<td>EMBA 8100</td>
<td>Organizational Behavior for Executives</td>
<td>1.5</td>
<td>Consent of director of EMBA program</td>
<td>Designed for the experienced manager, this course is an extensive study of human behavior in the workplace. Among the topics addressed are theories considered critical to the understanding of workplace motivation, communication, leadership, rewards and sanctions, team building, workplace stress, and organization structuring and design. Particular attention is paid to managing persons in complex environments (including the rapidly changing nature of jobs and work and work in international/multicultural settings).</td>
</tr>
<tr>
<td>EMBA 8150</td>
<td>Data Analytics and Decision Making</td>
<td>1.5 TO 3.0</td>
<td>Consent of director of EMBA program</td>
<td>This course focuses on quantitative decision making. Analytics is a major component of business decision making to gain competitive advantage. Students will work with data to create predictive models. The course will include time series and regression techniques as well as Bayesian analysis for decision making. Model development, validation, interpretation, and practical application will be addressed.</td>

EMBA 8250  
**Strategic Marketing Management**

**CREDIT HOURS**
1.5

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
The purpose of this course is to provide students with an understanding of the current and future problems faced by the marketing manager. Emphasis is placed on the practical applications of the theories developed in marketing and related literature. More specifically, the marketing mix, including product, price, promotion, and place, is discussed in relation to the environmental characteristics, including competition, technology, governmental regulation, and recent megatrends. Special attention is also given to market opportunity analysis, marketing tactics, marketing strategy and decision making, and evaluation.

EMBA 8260  
**Strategic Marketing Simulation**

**CREDIT HOURS**
1.5

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
Strategic Marketing Simulation immerses students in a sequence of complex decisions that senior managers must make as they choose 'where' and 'how' to compete in a simulated industry. A number of issues are involved in the simulation including: 1) how to create and capture value; 2) where to compete (segmentation and target marketing); 3) developing competitive advantages; and, 4) choosing when to take offensive and defensive positions in a market. These decisions are reflected in the strategic market planning process and the simulation requires each team to align their firm's skills and resources with their value proposition. In other words, they must develop and execute a profitable strategy.

EMBA 8355  
**Operations and Quality Management**

**CREDIT HOURS**
1.5

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
This course is directed toward the management and control of operating systems with an emphasis on supply chain management. Specific topics include matching operating decisions to a firm's strategy; design of operations control systems; unique operations considerations in the services, design, selection and improvement of processes; capacity planning; quality management; and the management of inventories.

EMBA 8389  
**Directed Readings in the Executive MBA Program**

**CREDIT HOURS**
1.0 TO 3.0

**PREREQUISITES**
Consent of director of EMBA program, good academic standing

EMBA 8400  
**Managerial Economics**

**CREDIT HOURS**
2.0

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
This course uses the basic tools of microeconomics and macroeconomics to analyze management decisions and the competitive strategies of firms in a market economy. Microeconomic concepts of supply and demand, production, cost, and market structure are combined with the macroeconomic issues of aggregate demand and supply and national income determination to develop an analysis of the overall economic environment in which firms operate.
**EMBA 8425 Strategic Assessment in Global Market**

**CREDIT HOURS**
1.0 TO 3.0

**PREREQUISITES**
Approval of EMBA Director

**DESCRIPTION**
This course provides EMBA students with tools and frameworks for devising transnational business strategy. Drawing on political economy and managerial strategy, the course examines the intersection of organizational decision-making and "country risk." Evolving globalization and political economic management are examined, and attention is focused on how organizations around the world respond to local and global challenges. The course employs comparative qualitative and quantitative analysis across key country cases, such as India, Brazil, and China. Students engage in scenario-based cooperative exercises to solve organizational challenges on the global playing field.

**EMBA 8450 Asset Valuation, Analysis and Selection**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
This course considers conceptual and policy issues associated with the financial management of the non-financial firm. Students develop skills in financial analysis and interpretation and examine the various economic profit-based metrics used by financial executives. The dominant paradigms of risk and return are considered, and techniques for the valuation of both financial and real assets are analyzed. Included are capital budgeting techniques for making optimal asset and financing decisions as used in project financing and the setting of hurdle rates and the use of simulation in the conduct of risk management. Financial management practices in other countries are considered. Case analysis is employed, and personal computers are used as a supporting tool.

**EMBA 8500 Corporate Financial Policy**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
This course focuses on the determination and evaluation of the corporate capital strategies. Topics considered include financial structure, leasing, cost of capital, dividend policy, and valuation. The financial topics are combined with the investment strategies to yield a synthetic view of financing-investment interactions and their impact on firm value. The related topics of mergers, acquisitions, and leveraged buyouts are addressed. Case analysis in the classroom will draw upon the background readings in the professional and academic literature and from the lectures. Personal computers are used as a supporting technique.

**EMBA 8550 Cost Analysis**

**CREDIT HOURS**
1.5

**PREREQUISITES**
Consent of director of EMBA program

**DESCRIPTION**
This course is a study of the major accounting methods used for costing products, services, programs, projects, departments, and other operational units and cost objects. The primary emphasis is on developing the needed understanding, insights, and skills to correctly use such data in making various kinds of managerial decisions.
EMBA 8600  Digital Enablement
CREDIT HOURS  1.5
PREREQUISITES  Consent of director of EMBA program
REQUIREMENTS  CSP: 1, 2, 3, 4, 5, 6
DESCRIPTION  This course examines the basic components of information technology and how emerging technology has lead to the development of diverse and important business applications. The course provides the student with an understanding of the various kinds of technology and their role in developing an information technology infrastructure. Topics include the basic components of information technology, telecommunications, and electronic commerce. The first half of the course is a comprehensive overview of the various kinds of information technologies. This is then augmented with strategies for successful systems development and implementation. Together these components provide the manager with the skills to properly manage the acquisition technologies within the firm.

EMBA 8650  International Management Practices
CREDIT HOURS  4.5
PREREQUISITES  Consent of director of EMBA program
DESCRIPTION  This course entails the overseas visit to directly observe the practices and concepts of business in foreign countries. The students visit a series of businesses in one or more countries, both U.S. companies doing business in the countries and country-national companies. In addition, discussions are organized between the students and members of the governments in the countries, U.S. business people in the countries, and American Chambers of Commerce in the countries. Time is allowed for students to become familiar with the cultural aspects of the countries visited.

EMBA 8700  Firms, Markets, Context
CREDIT HOURS  1.5
DESCRIPTION  This course introduces several core concepts that are relevant to inquiry in almost every business discipline and useful in every course in this curriculum. These ideas are also central to your development as a leader in a global economy. The primary purpose of this course if to imbue in each student an interdisciplinary conceptual framework for thought and analysis in the first year of MBA study. Students should be able to identify, describe and discuss within theoretical frameworks the following concepts as they appear in everyday market interactions. 1.The Theory of the Firm 2.The Concept of Strategy 3.Firm Level Competitive Advantage 4. Industry Analysis.

EMBA 8710  Resource Based Management
CREDIT HOURS  2.0
DESCRIPTION  This course is designed to build on the EMBA 8700 Firms, Markets and Context. There are three goals in this module. First, the course expands on the material from EMBA 8700 by looking at the basis of resource based competitive advantage. Second, the course developes how resource-based competitive advantage anchors strategic action in innovation strategy, technology strategy and corporate diversification strategy. Third, the course looks at the role of the CEO in creating value in these environments.
EMBA 8730  Strategic Implementation and Execution
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES Approval of EMBA director
DESCRIPTION This course is a study of the major financial information processes used for tracking and reporting internal operations and their impact on the execution of corporate strategy. In addition, the course deals with how in practice the generated reports are used for evaluating performance and controlling operations. Key topics of the course include responsibility accounting, performance indicators, and the behavior patterns stimulated by such reporting and budgeting systems. The primary emphasis is on developing the understanding, insights, and skills needed to effectively use such financial reports and other available information to appropriately evaluate managers, performance and control operations.

EMBA 8800  Executive Leadership and the Senior Management Team
CREDIT HOURS 3.0
DESCRIPTION Course members become immersed in the leadership challenges associated with management of an enterprise at the corporate, business unit, and line of business levels, including those challenges encountered in multinational corporations. Focusing on the responsibilities of both the general manager and the senior management team, individuals encounter challenging settings where executives have responsibility for the enterprise’s overall performance rather than just a single business function. Leadership of the strategy process, facilitating organization building, and assurance of effective enterprise performance are unifying themes throughout the course.

EMBA 8810  Corporate Strategy and Responsibility
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES Approval of EMBA director
DESCRIPTION This intensive course introduces executives to the roles that executives play in defining, leading, managing, and responding strategically to the responsibilities of the corporation. The course uses simulations, interactive case-studies with the corporate executives who lived them, and ethical reflection exercises to teach executives to assess and respond to the social, ethical and environmental issues confronting global enterprises and lead effective corporate policies and responses. Special attention is paid to building the four components of ethical behavior, namely, ethical sensitivity, judgment, motivation, and implementation.

EMBA 8820  Leading the Enterprise
CREDIT HOURS 2.0
PREREQUISITES Consent of director of EMBA program
DESCRIPTION Individuals become immersed in the role of executive leaders who are accountable for delivering measurable, successful performance within globally competitive organizations. Assuming various CxO roles, they are charged with responsibility for recognizing and capitalizing on opportunities and responding to ever-changing strategic and operational circumstances, all while seeking to enhance the value and position of the enterprise (whether public, private, or not-for-profit.) This course integrates strategic, operational, and financial practices in the context of executive and general manager leadership.
Valuation of Financial Assets

CREDIT HOURS
3.0

COREQUISITES
MBA 8135

REQUIREMENTS
CSP: 1, 2, 6

DESCRIPTION
This course develops core competencies that all finance graduates regardless of area of specialization should possess. Topics include foreign exchange markets, interest rate risk measures, term structure theory, introductory option pricing, futures markets, swaps, and valuation. This course is required of all MBA students seeking a major or a concentration in finance as well as all M.S. in finance students. This course is a prerequisite for all other finance electives except FI 8020 and FI 8040 and may be taken in the same semester as MBA 8135.

Financial Analysis and Loan Structuring

CREDIT HOURS
3.0

COREQUISITES
MBA 8135

REQUIREMENTS
CSP: 1, 2, 6

DESCRIPTION
This course provides students with the skills to analyze a business, determine its funding needs, and design a financing structure to satisfy those needs (primarily, private debt instruments). There is minimal discussion of pricing; the focus is credit analysis. The principal teaching method is case analysis, and a significant course objective is the development of logical thinking and communication skills. The case mix includes companies of all sizes including small- and medium-sized firms. Students have the opportunity to evaluate the needs of a variety of businesses that differ with respect to type, industry, profitability, growth, cyclicality, and degree of distress.

Survey of International Finance

CREDIT HOURS
3.0

PREREQUISITES
MBA 8135

REQUIREMENTS
CSP: 1, 2, 6

DESCRIPTION
This course surveys the conceptual and institutional aspects of financial decision making in multinational firms in a global economic environment. The students are introduced to foreign exchange risk with special emphasis on the mechanics of foreign exchange and related derivatives markets as well as the parity conditions in international finance. Institutional realities of regional economic blocks, foreign exchanges regimes, euro markets, and balance of payments are discussed to highlight their impact on financial management.

Current Issues in Finance

CREDIT HOURS
1.0 TO 6.0

COREQUISITES
MBA 8135

REQUIREMENTS
CSP: 1, 2, 6

DESCRIPTION
This course allows for in-depth analysis of select, topical issues in finance. Coverage is drawn from current issues in financial markets that do not necessarily require an entire semester of study. As examples, topics could include corporate governance, executive compensation, financial market regulation, and financial system reform. Reliance is placed on authoritative faculty having specific expertise in a topic area, readings from the current professional literature, guest speakers, case studies, and group projects. The topic of each offering will be announced in advance, and students may take this course multiple times for course credit as different topics are covered.

<td>Co-require: MBA 8135. This course addresses the leadership, design, and organization of the finance function in a modern corporation for effectively promoting the development of human capital and firm value. First, an economics-based framework for leading and organizing a finance department is established with a focus on the optimal assignment of decision rights, the design and alignment of incentive and compensation systems, and performance review and evaluation. Next, a bridge is built between economic theory and practice with the use of case studies and guest speakers representing leading corporate organizations.</td>
</tr>
<tr>
<td>FI 8200</td>
<td>Derivative Markets I</td>
<td>3.0</td>
<td>FI 8000</td>
<td>CSP: 1, 2, 6</td>
<td>This course focuses on the valuation, uses, and regulation of derivative instruments-contracts or agreements whose values derive from the prices of underlying assets such as equities, commodities, interest rates, and currencies. The course is presented from the perspective of corporate risk managers and institutional professionals who use these valuable risk-shifting instruments for controlling market risks. Coverage is presented of both exchange and off-exchange derivatives including futures, options, forwards and swaps, and structured products such as hybrid debt having embedded derivative features. The course keeps abreast of global trends, trading developments such as electronic markets, and new products such as electricity, weather, bandwidth, and credit derivatives.</td>
</tr>
<tr>
<td>FI 8240</td>
<td>Global Portfolio Management</td>
<td>3.0</td>
<td>FI 8000</td>
<td>CSP: 1, 2, 6</td>
<td>This course explores in greater depth than possible in FI 8000 the practical aspects of investment valuation and portfolio management in a global framework. The focus is on market microstructure, bond- and equity-portfolio management and overall asset allocation. Practical aspects of portfolio management are introduced through lectures and class discussions of journal articles and cases.</td>
</tr>
<tr>
<td>FI 8260</td>
<td>Hedge Funds And Their Trading Strategies</td>
<td>3.0</td>
<td>FI 8000</td>
<td>CSP: 1, 2, 6</td>
<td>This is an advanced graduate elective course on hedge funds, which have emerged as popular investment vehicles. The course will cover institutional topics including the history and evolution of hedge funds, the differences between hedge funds and mutual funds, funds of hedge funds, and key sources of information such as databases, indices, and benchmarks. The course will investigate hedge fund risk-return characteristics, performance evaluation, risk management, asset allocation, and managerial compensation. Trading strategies to be considered will include long-short equity, merger arbitrage, relative value arbitrage, convertible arbitrage, fixed income arbitrage, and trend-following.</td>
</tr>
</tbody>
</table>
**FI 8300**  
**Advanced Corporate Finance**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** FI 8000  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION**  
This course develops a framework and tools for analyzing corporate investment and financing decisions. Students become familiar with the cutting-edge techniques for evaluating capital investments, the central issues in capital structure and dividend policy decisions, and the interaction between financing and investment decisions. Techniques covered provide the tools necessary to evaluate strategic investments in technology, mergers and acquisitions, corporate restructurings, and research and development. Skills are developed for the valuation of firms in traditional and new technology industries as well as security offerings such as initial public offerings. Reliance is placed on a variety of pedagogical vehicles including problem solving, case studies, lectures, and group projects.

**FI 8310**  
**Investment Banking**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8135 and FI 8000  
**DESCRIPTION**  
Requirements: CSP: 1, 2, 6. This course covers the three distinct activities of investment banking: (1) underwriting—new issues of securities, (2) fee banking—activities that earn a fee like advising on corporate restructurings, securities and economic research, and other types of financial consulting, and (3) transactions—trading in the secondary markets, proprietary trading for the firms own account, and retail brokerage. The emphasis of the course will be on equity underwriting and advising in corporate restructuring activities. It will also focus on the principles of firm valuation. These tools will be used to value, for example, an initial public offering firm, the target firm in a takeover contest, and a leveraged buyout firm.

**FI 8320**  
**Corporate Financial Strategy**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** FI 8000  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION**  
This course uses a combination of lectures, case analyses, class discussion, and team projects to develop the ability and skills necessary to make strategic financial decisions within the firm. The emphasis is on investment and financial decision-making and their impact on firm value; capital market imperfections and their impact on the capital acquisition process; and corporate governance and its impact on firm value. Specific topics will vary according to current relevance and may include the estimation of divisional cost of capital, project analysis including flexibility and real options, incentive alignment, corporate governance, and the influence of alternative financing choices on firm value.

**FI 8350**  
**Corporate Restructuring and Workouts**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** FI 8000  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION**  
This is an advanced course examining corporate restructuring. It exposes students to a broad range of restructuring strategies that can be employed to increase firm value. Class coverage and case discussions will illustrate how the various corporate restructuring strategies can be used to improve firm performance. The course begins with a brief consideration of mergers and acquisitions. It then focuses on restructuring strategies available to individual firms to improve their competitive situation and enhance shareholder value. Topics here include spin-offs, equity carve-outs, split-offs, sell-offs, leveraged recapitalizations and LBOs. This is followed by a consideration of restructuring of financially distressed firms under both out of court and formal bankruptcy circumstances.

</table>
The Financial System

Credit Hours: 3.0
Prerequisites: FI 8000
Requirements: CSP: 1, 2, 6
Description:
This is a macro-finance course, focusing on the broad issue of funds flows through the entire economy. The course analyzes the dynamic and complex pattern of world-wide funds flows, the identity of the major players in the system and the factors influencing their behavior in financial markets, the basis for the myriad financial assets available, the crucial importance of a well-developed financial system for economic development, the influence of the legal/regulatory system, and financial innovation. Special attention is placed on the structure and role of interest rates.

Finance and Banking in the Global Economy

Credit Hours: 3.0
Prerequisites: FI 8000
Requirements: CSP: 1, 2, 6
Description:
This course allows for in-depth study of select finance and banking topics of global significance. Coverage is drawn from cutting-edge issues such as the global financial architecture, the management of risk exposures (market/credit/operational/other risks), financial value chains, regulatory frameworks and developments, project financing decisions, corporate governance, and the interaction of product-market strategies and financial strategies. Topic coverage will also include newer developments in the financial world such as, for example, Islamic banking, microfinance, peer-to-peer lending, or credit derivatives.

Financial Analysis of Asset & Wealth Management

Credit Hours: 3.0
Prerequisites: FI 8000
Requirements: CSP: 1, 2, 6
Description:
This course introduces the student to a financial analysis of the major agents in the economy – the household; small business; publicly-traded corporation; and the financial institution. The major elements of value, stock and flow are critically examined for each of the agents with analytical emphasis given to financial concepts such as cash versus accrual accounting, fair value, and financial accounting principles. The course also examines the structure and economics of the investment and wealth advisory business, evaluating the intersection of the demand for services with the supply. Integration of the various elements of asset and wealth management is done through a course project.

The Theory of Asset Valuation

Credit Hours: 3.0
Prerequisites: Consent of instructor
Requirements: CSP: 6
Description:
This course acquaints students with the modern theory of asset valuation. Topics covered may include the relationship between no-arbitrage conditions and the existence of equilibrium pricing measures, spanning, market completeness and the uniqueness of the pricing functional, and the pricing of derivative securities in both continuous-time and discrete-time stochastic economies. The specific topics covered depend on the instructor and the needs of the students.

FORL FOREIGN LANGUAGE

FORL 6021  Foreign Language Educators and Technology
CREDIT HOURS  3.0
DESCRIPTION  Introduction to the selection and use of technology resources in the Pre-K-12 classroom with special emphasis on foreign language instruction. Students research and evaluate current trends in media-based learning as well as media resources developed specifically for foreign language instruction. Students learn how to integrate appropriate technologies into their classroom instruction in order to enhance pupil learning, language performance and cultural understandings. Students design, plan and produce educational materials using technology hardware and software, including authentic websites and related material in their foreign language.

FORL 6030  Practicum in Foreign Language Education
CREDIT HOURS  3.0
DESCRIPTION  Introduction to world language teaching theories, curriculum design, standard-based education, and planning for instruction. Observation, lesson planning, and supervised teaching with a variety of instructional techniques in P-8 and 9-12 world language classrooms.

FORL 6125  (TE) Methods and Materials for Teaching Foreign Languages, P-8
CREDIT HOURS  3.0
DESCRIPTION  Knowledge of learner characteristics, foreign language curricula and standards, content reinforcement, unit and lesson planning, coordination of materials and technology, and techniques of effective lesson implementation for grade levels P-8.

FORL 6126  (TE) Methods and Materials for Teaching Second Languages, 9-12
CREDIT HOURS  3.0
DESCRIPTION  Knowledge of learner characteristics, foreign language curricula and standards, content reinforcement, unit and lesson planning, coordination of materials and technology, and techniques of effective lesson implementation for grade levels 9-12.

FORL 6128  Teaching Foreign Languages at the College Level
CREDIT HOURS  3.0
DESCRIPTION  Theories of second language acquisition; practical methods of foreign language instruction at the college level.

FORL 8223  Modern Foreign Language Pedagogy: Theory and Practice
CREDIT HOURS  3.0
DESCRIPTION  Methodology of foreign language teaching as reflected in the latest research and as applied in the classroom situation; evaluation of current techniques and materials as models for production and utilization of materials by students.

FORL 8226  Teaching Literature in the Foreign Language Classroom
CREDIT HOURS  3.0
DESCRIPTION  How to select, annotate, and teach literary texts in the foreign language classroom. Candidates analyze current theories of teaching reading and design activities and assessments that reflect effective practices. May be offered separately in French, German, and Spanish.

DESCRIPTION
GEOS 6000  Advanced Topics in Physical and Historical Geology
CREDIT HOURS 4.0
DESCRIPTION Course covers selected topics in physical and historical geology. Provides graduate students with background for coursework and research in geology. Topics include geologic time, rock and fossil records, plate tectonics, evolution of the crust and lithosphere, geologic history of North America.

GEOS 6003  Aqueous Geochemistry
CREDIT HOURS 4.0
PREREQUISITES Geol 1121K, 1122K, MATH 2212, and CHEM 1212K
DESCRIPTION (Same as Geog 6680.) Four lecture hours a week. Theoretical aspects of aquatic chemistry with applications to natural water systems. Major topics include thermodynamic theory, sorption systematics, oxidation-reduction reactions, mineral-water interaction, and isotope geochemistry applied to hydrogeology.

GEOS 6005  Geology of Georgia
CREDIT HOURS 3.0
PREREQUISITES Geol 1121K, or equivalent, or consent of the instructor
DESCRIPTION One lecture hour a week. A minimum of five days in the field must be fulfilled to receive credit in the course. Before enrolling in the course, students should confirm in advance their availability on announced weekends. Nature, distribution, and significance of lithologies, structures, and ages of rocks in Georgia and other southeastern states. Geologic and tectonic history of the southern Appalachians, with emphasis on plate tectonic models. Critical discussion of the literature with emphasis on notable controversies.

GEOS 6006  Sedimentary Environments and Stratigraphy
CREDIT HOURS 4.0
PREREQUISITES Geol 3002
DESCRIPTION Three lecture and three laboratory hours a week, plus field trips. Properties of sediments; origin, classification, and description of sedimentary rocks; principles of stratigraphy; analysis of sedimentary facies and environments of deposition.

GEOS 6007  Hydrogeology
CREDIT HOURS 4.0
PREREQUISITES Geol 1121K, Geol 1122K and MATH 2212
DESCRIPTION Four lecture hours a week. Overview of the principles of hydrogeology and their application, including the hydrological cycle, geology of groundwater occurrence, mathematical development of flow equations, surface-groundwater interaction, flow to wells, and advection-dispersion theory.

GEOS 6008  Rock Fracture and Fluid Flow
CREDIT HOURS 4.0
PREREQUISITES GEOL 4007 and GEOL 4013 with a C or higher or consent of instructor
DESCRIPTION Formation and analysis of rock fracture and its relationship to hydraulic properties of dual porosity aquifers, exploration of deep aquifers, flow equations in fractured porous and crystalline rock, hydraulic testing of fractured rock, spatial and statistical methods of exploration of karst aquifers, geophysical and statistical methods of detection of fractured aquifers. 3.000 Credit hours.
GEOS 6011 Principles of Paleontology
CREDIT HOURS 4.0
PREREQUISITES Geol 1122K with grade of C or higher
DESCRIPTION Three lecture and three laboratory hours a week. An introduction to the principles of paleontology including taphonomy, taxonomy, evolution, and extinction by examination of the fossil record. Study of commonly preserved organisms and their use in paleoecology, paleoenvironmental reconstruction, biostratigraphic correlation, and conservation paleobiology will be stressed as well.

GEOS 6013 Structural Geology
CREDIT HOURS 4.0
PREREQUISITES Geol 1121K, Geol 1122K and Geol 3002
DESCRIPTION Three lecture and three laboratory hours a week. Introduction to the principles of structural geology including theories and methods of analysis of: stress, strain, rheology, fractures, folding, faulting, foliation, and lineation. The study of geologic maps and cross sections.

GEOS 6015 Crystallography and Optical Mineralogy
CREDIT HOURS 4.0
PREREQUISITES Geol 3002
DESCRIPTION Three lecture and three laboratory hours a week. Principles of crystallography and optical mineralogy. Laboratory study of minerals using the polarizing microscope.

GEOS 6016 Igneous and Metamorphic Petrology
CREDIT HOURS 4.0
PREREQUISITES Geol 4015
DESCRIPTION Prerequisite or corequisite: Geol 4015. Three lecture and three laboratory hours a week. Nature, distribution, and origin of igneous and metamorphic rocks in relation to tectonic setting and experimental studies. Laboratory study of igneous and metamorphic rocks in hand specimen and thin section.

GEOS 6017 Environmental Geology
CREDIT HOURS 4.0
PREREQUISITES Geol 1121K and CHEM 1211K
DESCRIPTION Four lecture hours per week. Application of geological and geochemical concepts to the study of Earth’s near surface environment. Topics may include water supply and pollution, global warming, ozone depletion, soil contamination, natural disasters, mineral resources, environmental management, and selected regulations. Quantitative treatment of population growth and water resources.

GEOS 6020 Urban Environments
CREDIT HOURS 3.0
DESCRIPTION Examines the physical environmental processes relating to soil, climate, water, and ecosystems that characterize urban environments as opposed to more natural or rural ones. Explores the human-environmental interface in urban areas as reflected in issues such as environmental justice, sustainability, resilience, population growth, unequal distribution of resources, and public health. Sustainability will be particularly emphasized. The City of Atlanta is used as a living laboratory for the course.

GEOS 6023 Terrestrial Sediments
CREDIT HOURS 3.0
PREREQUISITES Geol 4006 or consent of instructor
DESCRIPTION Three lecture hours a week. Weathering, transport, deposition, and diagenesis of continental sediments. Selected examples of fluvial, lacustrine, volcaniclastic, and/or eolian sedimentation and facies models. Stable and radiogenic isotopes and geochronology in continental sediment. Sedimentary, mineralogical, and geochemical records of tectonics and paleoclimate.
GEOS 6030  X-Ray Methods and Techniques  
CREDIT HOURS  4.0  
DESCRIPTION  Prerequisite Geol 3002. This course describes the theory and use of x-ray diffraction and x-ray fluorescence methods for the Geosciences primarily although the theory is applicable to other natural sciences. Topics covered include: generation of x-rays, diffraction, identification of minerals and crystalline materials, theory and use of x-ray fluorescence in major and trace elemental measurements. Laboratory provides hands-on experience with sample preparation, data gathering and synthesis. By the end of this course, it is the instructor’s hope that all students will be able to conduct independent, unsupervised analytical research using GSU’s X-ray labs and equipment. The 6000 level course will feature term project and oral presentation.

GEOS 6042  Environmental Instrumentation  
CREDIT HOURS  4.0  
PREREQUISITES  CHEM 1212K or equivalent; MATH 2212 (calculus with one variable)  
DESCRIPTION  Covers the theoretical and practical aspects of analytical instrumentations and methodologies used for modern-day analysis of environmental samples (water, soils, sediments, biological tissues, etc.) including the basis for each analysis, limitations and potential sources of errors.

GEOS 6050  Natural Environment of Georgia  
CREDIT HOURS  4.0  
DESCRIPTION  Georgia is a state with great a diversity of natural communities, in large part because of the many different landscapes present in the state. Through readings, discussions, tests, field outings, projects and in-class exercises, students will become familiar with the principles involved in the structure and function of Georgia's dwindling, but diverse, ecosystems. There will be an emphasis on plant communities and the physical environment, but animal communities and landscape management strategies will also be covered. Locations, diversity, and plant indicator species (especially trees) will be examined in the classroom and in the field, and experiential learning is emphasized.

GEOS 6095  Seminar in Geological Sciences  
CREDIT HOURS  1.0  
PREREQUISITES  at least twelve hours in geology  
DESCRIPTION  One lecture hour a week. Current research topics in geological sciences. May be repeated once.

GEOS 6097  Topics in Geographical Sciences  
CREDIT HOURS  1.0 TO 3.0  
PREREQUISITES  consent of instructor  
DESCRIPTION  One to three lecture hours a week. Detailed presentation of a selected topic in geographical sciences. May be repeated for credit for a maximum of six credit hours if topic is different.

<tr>
<td>GEOS 6402</td>
<td>Geography of Africa</td>
<td>3.0</td>
<td>(Same as AAS 6056.)</td>
<td>(Same as AAS 6056.) An overview of the physical, economic, and cultural geography of Africa, including North Africa. Emphasis on relationships between Africa's resources, both human and physical, and the development process.</td>
</tr>
<tr>
<td>GEOS 6404</td>
<td>Geography of East Asia</td>
<td>4.0</td>
<td></td>
<td>Examination of physical and human geographic components of East Asian regional development, from Singapore through Korea. Topics include cultural framework, utilization of resources to support population growth and migration, environmental degradation, agricultural transformation, and urban impacts of rapid modernization.</td>
</tr>
<tr>
<td>GEOS 6408</td>
<td>Geography of the Middle East and North Africa</td>
<td>4.0</td>
<td></td>
<td>An examination of the physical and human geography of the Middle East, from Iran to Morocco. Emphasis is placed on forces that define and shape the Middle East today, including the peace process, water resource management, economic development, and the balance between religious and secular life.</td>
</tr>
<tr>
<td>GEOS 6515</td>
<td>Qualitative Methods in Geography</td>
<td>4.0</td>
<td></td>
<td>This course provides the theoretical knowledge and practical skills required to carry out qualitative research in geography. It focuses on the need and merits of qualitative research, the &quot;how to&quot; of various qualitative research methods, and issues related to ethics, the researcher-researched relationship, and positionality.</td>
</tr>
</tbody>
</table>
GEOS 6518  Digital Cartography  
CREDIT HOURS  4.0  
PREREQUISITES  Geog 2206 with grade of C or higher  
DESCRIPTION  An introduction to the principles, methods, theory, and practices of contemporary digital cartography.

GEOS 6520  Quantitative Spatial Analysis  
CREDIT HOURS  4.0  
PREREQUISITES  MATH 1070 with grade of C or higher, or consent of instructor  
DESCRIPTION  Techniques of spatial analysis of geographic data; emphasis on sampling, measurements, and pattern analysis of points, lines, and areas on maps.

GEOS 6530  Introduction to Remote Sensing  
CREDIT HOURS  4.0  
PREREQUISITES  natural science lab sequence or consent of instructor  
DESCRIPTION  (Same as Geol 6530.) Three lecture and two lab hours per week. A survey of remote sensing technology, aerial photograph and satellite image interpretation and digital processing, and applications in engineering and environmental sciences.

GEOS 6532  Introduction to Geographic Information Systems  
CREDIT HOURS  4.0  
PREREQUISITES  Geog 2206 or Geog 6518 with grade of C or higher, or consent of instructor  
DESCRIPTION  Fundamental concepts and applications of raster and vector-based geographic information systems involving the integration and synthesis of geographic data with map overlays, databases, computer graphics, and/or remote sensing imagery.

GEOS 6533  Community Geographic Information  
CREDIT HOURS  4.0  
DESCRIPTION  GEOS 6532 or GEOS 6158 or permission of instructor Critical assessment and application of Community Geographic Information Systems (CGIS) and related community-based applications of geospatial technologies, geographic analysis, map communication, and geographic inquiry in local settings with community partners.

GEOS 6534  Advanced Geographic Information Systems  
CREDIT HOURS  4.0  
PREREQUISITES  Geog 6532 with grade of C or higher, or consent of instructor  
DESCRIPTION  Advanced concepts of geographic information systems including an examination of a variety of applications of GIS technology.

GEOS 6536  GIS Programming  
CREDIT HOURS  4.0  
PREREQUISITES  GEOS 6534  
DESCRIPTION  Programming for advanced GIS users.
GEOS 6538  Urban Health Geographic Information Systems
CREDIT HOURS  4.0
DESCRIPTION  The course is an upper-level undergraduate course to graduate level course developed to introduce students to measurement and analysis associated with spatial patterns of diseases. This course is proposed to address contemporary diseases of public health importance and present the quantitative skills that can be used in understanding how spatial patterns arise and what they imply for intervention. Objectives of the courses: (1) examine patterns of disease in place and time; (2) apply geospatial technologies and methods in public health; (3) examine diffusion of disease; and (4) conduct spatial epidemiological studies of selected infectious and noninfectious diseases. By the end of the course, students will gain hands-on experience with a variety of methods and GIS tools useful for the spatial analysis of medical data. Prerequisite: Getting Started with GIS a 9-hour free web course provided by ESRI (http://training.esri.com/gateway/index.cfm?fa=catalog.webCourseDetail&CourseID=1911).

GEOS 6640  Geomorphology
CREDIT HOURS  4.0
PREREQUISITES  Geog 1113 or Geol 1122K with grade of C or higher, or consent of instructor
DESCRIPTION  (Same as Geol 6640.) Three lecture and two laboratory hours a week. Classification and analysis of land forms using theoretical and quantitative approaches; emphasis upon surface processes in various environments.

GEOS 6642  Weather and Climate
CREDIT HOURS  4.0
PREREQUISITES  Geog 1112 with grade of B or higher, or consent of instructor
DESCRIPTION  Dynamic elements of weather and climate systems of climate, classification, and the regional distribution of climatic types; relationship between climatic systems and the distribution of soil and vegetation types.

GEOS 6644  Environmental Conservation
CREDIT HOURS  4.0
PREREQUISITES  Geol 1121K/1122K or Geog 1112/1113 with grade of B or higher, or consent of instructor
DESCRIPTION  (Same as Geol 6644.) Social and policy perspectives of natural resource management; development of the American conservation movement, federal land policy, and significant environmental legislation; analysis of local and global environmental issues.

GEOS 6646  Water Resource Management
CREDIT HOURS  4.0
PREREQUISITES  Geog 1112/1113 or Geol 1112K, or consent of instructor
DESCRIPTION  General characteristics of water resources, principles and methodology, planning procedures, political, socioeconomic, and legal aspects of water resources management.

</table>
GEOS 6832  Geography Internship  
CREDIT HOURS  3.0  
PREREQUISITES  Advanced standing, approval of sponsoring faculty advisor and department chair  
DESCRIPTION  Academic training and professional experience through short-term internships at public or private agencies. Paper required. May be taken more than once, but only three credits may be applied toward major requirements.

GEOS 6834  Applied Research in GIS  
CREDIT HOURS  1.0 TO 3.0  
DESCRIPTION  Applied GIS research that demonstrates the ability of the student to apply GIS knowledge to real-world situations.

GEOS 7002  Introduction to Earth Materials  
CREDIT HOURS  4.0  
PREREQUISITES  Geol 1121K  
DESCRIPTION  Three lecture and three laboratory hours a week, plus field trips. Fundamentals of crystallography and mineralogy; classification, identification and origin of the common rock-forming minerals and rocks.

GEOS 7021  General Geology for Teachers I  
CREDIT HOURS  4.0  
DESCRIPTION  Three lecture and three laboratory hours per week. Designed to give teachers a basic understanding of the Earth and Earth systems, with emphasis on internal processes. Topics include minerals, rocks and the rock cycle, structure of the Earth’s interior, volcanic activity, earthquakes, economic resources, plate tectonics, and the origin of mountain belts. For general science and Earth science teachers. Not open to students who have taken Geol 1121K or its equivalent.

GEOS 7022  General Geology for Teachers II  
CREDIT HOURS  4.0  
PREREQUISITES  Geol 7021 or equivalent  
DESCRIPTION  Three lecture and three laboratory hours per week. Designed to extend the teacher’s understanding of the Earth and Earth systems, with emphasis on external processes and Earth history. Topics include sedimentary processes and environments, landscape development, geologic time and the fossil record, radiometric dating of rocks, and the origin of the Earth. For general science and Earth science teachers. Not open to students who have taken Geol 1122K or its equivalent.

GEOS 7112  Introduction to Weather and Climate for Teachers  
CREDIT HOURS  4.0  
DESCRIPTION  Three lecture and two laboratory hours a week. Designed to give teachers a basic understanding of weather and climate, with emphasis on spatial processes and human impacts on weather and climate. This course is primarily intended for students in the Masters of Arts in Teaching program in the College of Education who will be secondary science teachers, but it is open to other graduate students as well. Not open to students who have taken Geog 1112 or its equivalent.

GEOS 8001  Soils, Clays, and Weathering  
CREDIT HOURS  4.0  
PREREQUISITES  Geol 1121K, Geol 3002, and CHEM 1212K  
DESCRIPTION  (Same as Geog 8044.) Three lecture hours and three laboratory hours per week. A study of the processes forming clay minerals in rocks and soils. Introduction to X-ray diffraction as a technique to identify clay minerals and common rock-forming minerals in rocks and soils.

</table>
GERO 8320  Psychology of Aging  
CREDIT HOURS 3.0  
DESCRIPTION Psychological contributions to the understanding, prevention, and treatment of normal and abnormal changes of later life.

GERO 8330  Mental Health and Aging  
CREDIT HOURS 3.0  
DESCRIPTION This course is designed to examine conceptual frameworks and research findings related to mental health and illness in the elderly. Topics to be covered include common psychological problems of older adults and assessment and treatment principles recommended for working with older adults with mental health problems.

GERO 8340  Dementia  
CREDIT HOURS 3.0  
DESCRIPTION This course provides a selective overview of many of the dementias, including dementia of the Alzheimer's type, vascular dementia, frontotemporal dementia and Lewy Body dementia.

GERO 8700  Special Topics in Gerontology  
CREDIT HOURS 3.0  
DESCRIPTION Critical analysis of a selected topic in gerontology, such as widowhood, long-term care, older women, or elder abuse. May be taken more than once if topics are different.

GERO 8800  Directed Readings in Gerontology  
CREDIT HOURS 3.0  
DESCRIPTION Individual reading in a selected area of gerontology, directed by a faculty member. A student may take no more than 3 credit hours of GERO 8800.

GERO 8850  Capstone Seminar in Gerontology  
CREDIT HOURS 3.0  
DESCRIPTION Prerequisite GERO 8910 with a grade of S. The purpose of the seminar is to provide students with an opportunity to explore research modalities pertinent to gerontology and to develop their capstone project design. Students will be encouraged to begin using their knowledge and critical thinking skills to explore and develop their capstone projects. 3.00 Credit hours. Target Group: GERO MA students.

GERO 8910  Gerontology Internship  
CREDIT HOURS 1.0 TO 6.0  
PREREQUISITES GPA of 3.0 in the gerontology program of study  
DESCRIPTION Requires 150 internship hours working in an aging organization or agency and integrative seminars. Provides a field education experience aimed at practical application of knowledge, values, and skills learned in the classroom.

GERO 8990  Research Practicum  
CREDIT HOURS 3.0 TO 15.0  
DESCRIPTION Research apprenticeship under faculty direction.

GERO 8999  Thesis Research  
CREDIT HOURS 1.0 TO 9.0  
DESCRIPTION
GMBA 7035  Economics for Manager
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: None
DESCRIPTION  This course uses basic macroeconomic concepts to develop a basic model of the macroeconomy emphasizing real world data and relationships. The goal is for managers to understand the main forces and trends in the economy, how they are interrelated, and how policymakers try to affect them. Because changes in the macroeconomy affect industries and firms throughout the economy, it is important for managers to understand how these changes can affect managerial decisions, particularly in terms of the concepts discussed in the context of microeconomics. The performance of the economy is presented in the context of industries and firms studied in microeconomics.

GMBA 8025  Financial Accounting
CREDIT HOURS  3.0
REQUIREMENTS  CSP: 1, 2, 4, 6, 7
DESCRIPTION  This course takes a user-oriented approach to the study of financial statements. Students study the role of the financial statements and the annual report in the financial reporting process. Using ratio analysis, students analyze past firm performance and make forecasts of future performance. Students also study the effects of differing accounting methods on financial statement analysis.

GMBA 8030  Global Legal and Regulatory Issues
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: None
DESCRIPTION  This course analyzes the legal and regulatory issues facing businesses, with an emphasis on how those issues affect businesses seeking to enter the international marketplace. The course begins by delineating how law is made on both a domestic and international scale. Students will learn how the major markets regulate from the inside out and how the global community regulates, via treaty, multinational organizations, etc., from the outside in. The course then examines how law creates both advantages for and limitations upon international transactions. Students will then explore tools for facilitating the advantages and appreciating the limitations with particular focus on issues of international trade, international contracts and international dispute resolution.

GMBA 8090  International Business Environment
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: None
DESCRIPTION  The course is divided into two parts. The first part provides an intensive study of the changing economic, political, financial, and cultural environment in which organizations compete, both traditionally and digitally. The second part of the course encompasses specific business operations through a global lens, including import, export, counter trade, manufacturing and materials management; marketing and research and development; human resource management; accounting; and financial management.
Managerial Accounting

**CREDIT HOURS**
3.0

**REQUIREMENTS**
None

**DESCRIPTION**
Prequisites: None. The focus of this course is on managing with accounting data, giving attention to limitations and behavioral implications of using such information in decision-making. Students will determine what financial information international managers need to plan, monitor and improve their critical processes, products and services. This course explores tasks such as cost analysis and management, cost-volume-profit analysis, cost allocation, activity-based costing, cost drivers, performance measurement, variance analysis, balancing the scorecard, compensation schemes and responsibility centers.

Information Technology and Global Competition I

**CREDIT HOURS**
1.5

**PREREQUISITES**
None

**REQUIREMENTS**
CSP: 1, 2, 4, 6, 7

**DESCRIPTION**
This casebased course module serves as an introduction to the relationship between information systems (IS) and business processes in the modern organization, particularly in an international setting. Directed at general managers, the module provides an overview of the cycle of business investment in IS. This cycle begins with a needs assessment stage, identifying opportunities or challenges relating to business processes; matching IT resources and application solutions to these needs are the second stage. The third stage is creating and deploying systems, whether these are developed inside the organization or acquired externally. It also covers the retiring of systems. With rapidly changing technology, the IT industry itself is analyzed for emerging developments and potential impacts.

Corporate Finance

**CREDIT HOURS**
3.0

**REQUIREMENTS**
CSP: None

**DESCRIPTION**
Prerequisite. None. This course focuses on the financial management of both publicly-held and private corporations. Students are presented with a conceptual framework for understanding and addressing problems commonly faced by corporate decision-makers and provided opportunities to apply these concepts to contemporary business situations. Topics covered include but are not limited to: the valuation and role of debt and equity, capital acquisition and the organization of domestic and international financial markets, the relationship between risk and return including the capital asset pricing model, capital budgeting/project evaluation techniques, cost of capital, cash flow estimation, project risk analysis, real options, company valuation, and capital structure decisions.

Marketing Management

**CREDIT HOURS**
3.0

**REQUIREMENTS**
CSP: None

**DESCRIPTION**
Prerequisite. None. This course explores the managerial aspects of the marketing function. Quantitative and qualitative analysis of the company and its customers and competition will be emphasized through the use of case analysis. The course is organized around the key marketing decision variables: promotions, product, pricing, and distribution, and around the various marketing processes of strategy formulation, organization and implementation.
GMBA 8150  
Global Operations and Logistics I  
CREDIT HOURS 1.5  
PREREQUISITES None  
REQUIREMENTS None  
DESCRIPTION This course focuses on the basic concepts, principles and techniques for efficient and effective operations. Special emphasis is placed on the planning and execution of the operating systems of an organization. Fundamental operation topics such as operations strategy, capacity, just-in-time inventory management, resource scheduling, and supply chain management are covered in the context of both the domestic and international marketplace.

GMBA 8160  
Human Resources Management and Organizational Behavior I  
CREDIT HOURS 1.5  
PREREQUISITES None  
REQUIREMENTS CSP: 1, 6, 7  
DESCRIPTION This course introduces what managers need to know about organizational structure and people in organizations. The course begins with an overall framework and then moves into individual topics, including a treatment of the functional and potentially dysfunctional consequences of combining people and organizational structure.

GMBA 8170  
International Finance I  
CREDIT HOURS 1.5  
PREREQUISITES None  
REQUIREMENTS CSP: None  
DESCRIPTION Prerequisite. None. We focus on the international corporate finance environment and on foreign exchange risk management. We start the basics of risk and return, applied to an international asset portfolio setting. We proceed with a general overview of the determination of exchange rates. We will study different foreign exchange rate systems and how capital and trade flows may affect the balance of payments of countries and, consequently, their currencies. We will then learn about foreign exchange parity relations and forecasting. We proceed to study the foreign exchange market and begin studying risk management tools, such as futures and options.

GMBA 8190  
International Affairs and Economic Integration  
CREDIT HOURS 3.0  
PREREQUISITES None  
REQUIREMENTS None  
DESCRIPTION This course examines regional integration and global business strategies in different regions of the world. Students examine globalization and regionalization and then conduct an analysis of business strategies and options for a chosen company. NGO, government (business chambers, local and national government), private sector (local research centers, manufacturing and service firms) sources and case studies are used to provide primary and secondary data and to support the development of presentations on business competitiveness strategy in the region of focus. This course may be repeated for different world regions.

</table>
Commercial Diplomacy

GMBA 8620
CREDIT HOURS: 1.5
PREREQUISITES: None
REQUIREMENTS: CSP: None
DESCRIPTION: This course examines commercial diplomacy from the company-specific point of view. In particular, the program focuses on the concerns of the line-of-business or country manager. The course makes extensive use of visiting speakers and materials which address the central question of how companies relate to a broader environment that includes political/legal/economic risk assessment, business-government relations, relations with non-governmental organizations and the larger civil society, and linkages to the institutions of trade regimes.

Strategic Business Communication

GMBA 8630
CREDIT HOURS: 1.5
PREREQUISITES: None
REQUIREMENTS: CSP: 1, 6, 7
DESCRIPTION: This course presents written and oral business communication as a management strategy through a strategic communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice drafting and editing clear, precise, and readable written business documents, crafting effective communications to executive level readers. Students will also develop skills in listening, managing groups, dealing with conflict, and leveraging the power of diversity at both the individual and cultural level. Finally, students will develop and deliver individual presentations using appropriate and effective visual support to persuade and motivate.

Policy & Strategy

GMBA 8990
CREDIT HOURS: 3.0
PREREQUISITES: None
REQUIREMENTS: None
DESCRIPTION: This capstone course will bring together components of all the courses taken up to this point. Students will analyze the managerial implications of the material covered in their courses, field experiences and visits to develop a working knowledge of corporate strategy, competitive strategy, strategy in uncertainty, global strategy for multinationals and strategic management of innovation. This course will be applied to cases and real-time scenarios, requiring students to use all of their skills in readiness for their role as global managers and leaders.

GRD 8999  Thesis Research

CREDIT HOURS  6.0 TO 12.0

PREREQUISITES  consent of thesis advisor

DESCRIPTION  Preparation of thesis and graduate exhibition.
HA 8160  Introduction to the Health Care System
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course introduces and describes the healthcare delivery system and the
resources that comprise it. The theoretical basis for the system, as well as
the overall planning, organization, management, evaluation, quality, and
major health policy issues are discussed.

HA 8190  Health Policy and Ethics
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course concentrates on health policy issues in the planning, delivery and
organization of health services. Examination of policy issues focuses on
the relative roles of the public and private sectors and the control
procedures used to implement these policies. Ethical issues and problems and
their resolutions are presented within a decision-making framework.

HA 8250  Health Economics and Financing
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course explores central problems in the economics and financing of health
care services in the U. S. and other economies. The demand, production,
cost, and allocation of health care services are examined through the use of a variety
of conceptual and empirical models. The effects of financing methods on the
availability, quality, and planning of health care are also explored.

HA 8389  Directed Readings in Health Administration
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  Consent of the instructor, good academic standing
DESCRIPTION

HA 8391  Health Administration Field Study
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course is designed to provide Master of Health Administration students with an opportunity to apply
the health administration skills learned at the Robinson College of Business (RCB)
is an approved site off campus. The course immerses students in the planning
and execution of complex activities involved in both large and small
healthcare organizations. The settings for the activities may change over time.
While students are under the general supervision of the faculty, they are
expected to display responsible independent action and to interact
frequently with healthcare executives.

HA 8440  Executive Leadership in Health Care
CREDIT HOURS  3.0
PREREQUISITES  HA 8160 or HA 8190
REQUIREMENTS  None
DESCRIPTION  This course is designed to provide a detailed understanding of the
administration and organization of healthcare systems, including analysis of
management problems, planning, evaluation, operations, and policy
analysis within the healthcare environment.
HA 8450  Legal Environment of Health Care  
CREDIT HOURS  3.0  
PREREQUISITES  Consent of the instructor  
REQUIREMENTS  CSP: 1, 6  
DESCRIPTION  (Same as LGLS 8450.) This course provides students with a study of the legal aspects of the health care business. The course covers the role of government in regulating health care and health applications of the law, of torts/malpractice, contracts, and administrative law. It equips students to recognize legal issues in the health care environment and to manage legal risks in decision making.

HA 8460  Human Resource Management in Health Care  
CREDIT HOURS  3.0  
PREREQUISITES  None  
REQUIREMENTS  None  
DESCRIPTION  This course is designed to acquaint students with the basic concepts of human resource management in health care organizations. Principles and organization of the human resource management function are introduced.

HA 8550  Healthcare Planning and Financial Management  
CREDIT HOURS  3.0  
PREREQUISITES  HA 8160 or HA 8190 and MBA 8135  
REQUIREMENTS  CSP: 1, 2, 6  
DESCRIPTION  This course is designed to integrate and apply knowledge, concepts, and methods in financial management to the ongoing operation and planning for healthcare organizations. The course builds upon an operational knowledge of financial management theory, concepts, and methods. Students have the opportunity to apply these ideas to "real-world" healthcare business cases and use spreadsheet analyses to make financial and operational decisions. Topics covered include financial and operational analysis of healthcare entities, cost accounting, financial forecasting, time value analysis, financial risk concepts, debt and equity financing, capital acquisition and structure decisions, capital budgeting and project risk assessment.

HA 8620  Operations Management and Quality in Health Care  
CREDIT HOURS  3.0  
PREREQUISITES  MBA 7025 or MATH 1070  
REQUIREMENTS  None  
DESCRIPTION  This course is an introduction to the application of operations management techniques to health care organizations. Topics include: systems theory, waiting lines and queueing theory, quality assurance, project management, facility location and design, health information systems, work design and productivity, forecasting, and simulation.
Managed Care and Integrated Health Systems

CREDIT HOURS: 3.0
PREREQUISITES: HA 8160 or HA 8190
REQUIREMENTS: None
DESCRIPTION: This course examines the managed care industry and integrated health systems, including health maintenance organizations, preferred provider organizations, physician hospital organizations, and a variety of other types of managed care plans and related organizations. The managed care industry and integrated health systems are examined from the perspective of hospital, physician, management service organizations, payers, and patients. The course also includes material on quality assurance, risk management, marketing, negotiating contracts, and underwriting and rating issues.

Care Management and Delivery Systems

CREDIT HOURS: 3.0
PREREQUISITES: HA 8160
REQUIREMENTS: None
DESCRIPTION: This course focuses on care management in various components of the health care delivery system, particularly the ambulatory care sector. Models of population access and movement through the health care system are emphasized, and the distinctive characteristics of quality assessment, utilization review, and administrative management for each component are discussed. Topics include organization, financial management, operations management, information systems, and quality assessment appropriate for each major health care component.

Health Information Systems

CREDIT HOURS: 3.0
PREREQUISITES: MBA 7025
REQUIREMENTS: CSP: 1, 2, 6
DESCRIPTION: This course focuses on the critical role of e-health and information systems in the planning, operation, and management of health care organizations. Topics addressed include the analysis, design, selection, implementation, operation, and evaluation of health information systems in a variety of settings such as health systems, hospitals, and medical practices.

Health Services Research and Evaluation Methods

CREDIT HOURS: 3.0
PREREQUISITES: HA 8160 or HA 8190 and MBA 7025 or MATH 1070, and MBA 8125
REQUIREMENTS: None
DESCRIPTION: This course is designed to provide students with the technical skills in health services research, including program evaluation and survey research methods, analytical epidemiology, and collection and analysis of health services data.

<tr>
<td>HIST 7040</td>
<td>Issues and Interpretation in Public History</td>
<td>3.0</td>
<td>An introduction to key theoretical, methodological, and practical issues addressed by historians who bring history to a wider public beyond the university. Issues include questions of audience and authority in presenting history; the relationship between history and memory; the politics and ethics of public history; and the applications of history in diverse formats and media. This course is designed for, but not limited to, students who might consider work in the varied fields of public history.</td>
</tr>
<tr>
<td>HIST 7045</td>
<td>Introduction to Graduate Studies</td>
<td>1.0</td>
<td>A general introduction to the professional practices in the history discipline, designed for graduate students who are not pursuing careers in teaching. Required of all candidates for graduate degrees in history, except those who complete HIST 7050. Recommended to be taken in the first year of residence if possible. A grade of B+ is required of all M.A. and Ph.D. candidates.</td>
</tr>
<tr>
<td>HIST 7050</td>
<td>Introduction to Graduate Studies and Pedagogy in History</td>
<td>4.0</td>
<td>A general introduction to the professional practices and pedagogical issues in the history discipline. Required for all candidates for graduate degrees in history, except those who are approved to take HIST 7045 instead. All GTAs must take HIST 7050. Recommended to be taken in the first year of residence if possible.</td>
</tr>
<tr>
<td>HIST 7060</td>
<td>Research Seminar</td>
<td>4.0</td>
<td>A general introduction to the professional skills and practices involved in undertaking original research aton the thesis or dissertation level. Assignments include a draft MA thesis or dissertation proposal, a series of presentations, and a substantial paper based on original research. Required of all candidates for graduate degrees in history except MA non-thesis track, to be taken in the last year of course work and with the primary adviser's prior approval, if possible. A grade of B or higher is required of all MA thesis track and PhD candidates.</td>

</tr>
<tr>
<td>HIST 8625</td>
<td>Politics of Preservation</td>
<td>3.0</td>
<td>Examines the cultural politics of historic preservation since the nineteenth century. This course examines social, cultural and economic conflicts over decisions about what buildings and sites to preserve, and how they should be interpreted by looking at sites ranging from historic houses and period rooms presented as museum installations to restored villages and communities to dramatic reuse of historic space for cultural tourism. This course also explores the contemporary politics of space and historical memory in Atlanta today.</td>
</tr>
</tbody>
</table>
HIST 8630  The American Built Environment
CREDIT HOURS  3.0
DESCRIPTION  Explores the history, design, and meaning of ordinary buildings in the U.S. from houses and resorts to skyscrapers and factories. Topics include theories of "high" culture and "low," definitions of house and home, the cultural significance of real estate, and how to assign value to mass-produced landscapes. Students will learn to use buildings as evidence of larger social, economic, and political trends in the 19th and 20th century, and to interpret buildings through methodologies and theories from urban and architectural history, cultural geography, anthropology, and sociology.

HIST 8635  U.S. Cities
CREDIT HOURS  3.0
DESCRIPTION  The history of the U.S. city from colonial times to the present, focusing on spatial development, technological change, and their relationship to civic culture.

HIST 8640  Preservation Planning
CREDIT HOURS  3.0
DESCRIPTION  Planning tools for the identification and preservation of the historic environment. May be repeated if topics vary.

HIST 8645  Historic Resource Evaluation
CREDIT HOURS  3.0
DESCRIPTION  An introduction to the philosophical and practical aspects of historic resource survey and evaluation, including application of the National Register of Historic Places criteria.

HIST 8650  Historic American Landscapes and Gardens
CREDIT HOURS  3.0
DESCRIPTION  American landscapes and gardens with respect to the social, cultural, historical, and geographic factors that influence their design and development.

HIST 8655  The American Suburb
CREDIT HOURS  3.0
DESCRIPTION  (Same as Geog 8655.) Since the 19th century the suburb has been the type metropolitan environment most Americans prefer to live in, and since 1980 the U.S. has been a predominantly suburban nation. Surveys the history of the suburb as an idea and as a physical, social, and political community, using literature from urban and architectural history, cultural geography, anthropology, and sociology. Explores the history and meaning of suburbia as traditionally defined (white, affluent, residential) as well as the emergence of other types of communities, including working-class, African-American, industrial, and multifamily suburbs.

HIST 8660  Case Study in International Preservation
CREDIT HOURS  4.0
DESCRIPTION  The study of preservation and conservation programs and processes in foreign countries, through lectures, readings, and site visits. Comparison of preservation and public history as it is practiced in foreign programs with the approaches taken in the United States. Field trips abroad are required. May be repeated for credit if topics vary.
HIST 8665  Cultural Landscape Preservation
CREDIT HOURS  3.0
DESCRIPTION  (No prerequisites or restrictions.) Cultural Landscape Preservation is a graduate level course in the Heritage Preservation Program (other graduate students may also register) designed to develop an understanding and vocabulary about cultural landscapes; articulate landscape preservation concepts through verbal and written mediums; understand techniques, processes, and policies related to the documentation and preservation of cultural landscapes; and work collaboratively to develop a Cultural Landscape Report.

HIST 8680  Internship
CREDIT HOURS  1.0 TO 15.0
PREREQUISITES  consent of the department
DESCRIPTION  Required for students seeking concentration in archival administration. Through a prescribed field experience students are given the opportunity to apply knowledge, theory, and understanding gained from courses. May be repeated if topics vary.

HIST 8690  American Architectural History
CREDIT HOURS  3.0
DESCRIPTION  Major themes in American architecture from European colonization to modernism. Selected architects, buildings, and vernacular traditions are examined.

HIST 8700  Case Studies in Historic Preservation
CREDIT HOURS  3.0
DESCRIPTION  Research seminar in techniques of documentation and analysis of historic sites and districts.

HIST 8720  Museum Studies
CREDIT HOURS  3.0
DESCRIPTION  Comprehensive overview of museums in the U.S., their history, philosophical backgrounds, and ethical issues. Museum management, artifact accession, and exhibition production will be examined.

HIST 8725  History and Theory of Museums
CREDIT HOURS  3.0
DESCRIPTION  This course offers an introduction to the social, cultural, and political history of museums and to museum studies as a theoretical and interpretive discipline. We will focus on the formation of the modern museum and emphasize the U.S. context. Museums have always been conceived as centers for the production and dissemination of knowledge, but what criteria and whose authority determine the categories museums include - categories like art, history, science, nature and civilization. This course will explore these questions by looking at historical and theoretical discourse on museums in course readings and through our own investigation of museums through research and museum visits.

HIST 8730  Exhibit Planning and Production
CREDIT HOURS  3.0
DESCRIPTION  This course examines the process by which museums create exhibitions, from planning and research through object identification and selection, community involvement, script and text preparation, design, fabrication, installation and maintenance. The course brings students into contact with theory, and provides application of theory through their conceptualization and installation of an interpretive history exhibition.
HIST 8740  
**Material Culture**

CREDIT HOURS 3.0

DESCRIPTION Provides an overview of interdisciplinary approaches to diverse material culture traditions including furniture, architecture, decorative arts, clothing and adornment, foodways, and other aspects of material life. Students explore issues of material form and structure, geographic diffusion, function, construction techniques, and multiple ways of understanding material objects in context, including cultural landscapes, performance, consumption, embodiment, and the role of the senses. This course will emphasize material culture as a means of understanding everyday life historically, as well as contexts for the exhibition and interpretation of material objects in contemporary public contexts such as museums.

HIST 8750  
**Public History Education Planning and Practice**

CREDIT HOURS 3.0

DESCRIPTION This course is intended as an introduction to key theoretical, methodological, and practical issues related to creating public history programs for and with a wider public in a variety of contexts including museums, historic sites, festivals, community projects, and other public history contexts. Students will study best practices in interpretive planning and collaboration, theories of learning, program strategies, and assessment and evaluation techniques.

HIST 8760  
**Heritage Tourism**

CREDIT HOURS 3.0

DESCRIPTION This course examines Heritage Tourism in the United States by looking at the cultural politics of marketing the past, exploring decisions made by local communities and national institutions about what histories to present to the public.

HIST 8800  
**Directed Study in Public History**

CREDIT HOURS 3.0

DESCRIPTION Independent study documenting and analyzing issues, programs and themes relating to case studies in public history. Emphasis on individual research and/or major project production.

HIST 8810  
**Seminar in the History of Gender**

CREDIT HOURS 4.0

(Read as WGSS 8810.) Relationship between the ideology of gender and social or cultural practices; special attention to race, religion, work, politics, or empire. Topics vary according to instructor. May be repeated if topics vary.

HIST 885  
**Special Topics in Heritage Preservation**

CREDIT HOURS 3.0 TO 4.0

DESCRIPTION Analysis of selected topics in public history or historic preservation such as cultural resource management historic site management, museum management or curatorial studies. May be repeated if topics differ.

HIST 8890  
**Special Topics in History**

CREDIT HOURS 3.0 TO 4.0

DESCRIPTION Analysis of a selected historical issue or topic, such as modernization, religion, revolution, role of women, and peasant societies. May be repeated for credit if topics vary.

HIST 8900  
**Directed Readings**

CREDIT HOURS 1.0 TO 4.0

DESCRIPTION For students preparing for field examinations. May be repeated for credit if topics vary.
HIST 8975  Study Abroad  
CREDIT HOURS  3.0 TO 4.0  
DESCRIPTION  Through international travel, students are given an opportunity to participate in on-site study of the historical, intellectual and cultural past of various societies. May be repeated for credit if topics vary.

HIST 8999  Thesis Research  
CREDIT HOURS  1.0 TO 15.0  
DESCRIPTION  May be repeated for credit if topics vary.

HIST 9010  Directed Research in the History of the Americas  
CREDIT HOURS  1.0 TO 4.0  
PREREQUISITES  consent of the Director of Graduate Studies  
DESCRIPTION  May be repeated for credit if topics vary.

HIST 9020  Directed Research in the History of Europe  
CREDIT HOURS  1.0 TO 4.0  
PREREQUISITES  consent of the Director of Graduate Studies  
DESCRIPTION  May be repeated for credit if topics vary.

HIST 9030  Directed Readings in the History of Asia, Africa or the Middle East  
CREDIT HOURS  1.0 TO 4.0  
PREREQUISITES  consent of the Director of Graduate Studies  
DESCRIPTION  May be repeated for credit if topics vary.

HIST 9999  Dissertation Research  
CREDIT HOURS  1.0 TO 15.0  
DESCRIPTION  May be repeated for credit if topics vary.

IB INTERNATIONAL BUSINESS

IB 5000  MIB Energizer Orientation
CREDIT HOURS  0.0
PREREQUISITES  None
REQUIREMENTS  All MIB students must enroll in IB 5000 in their first semester of enrollment
DESCRIPTION  This course is for zero credit, and there is no charge. It is graded on a Satisfactory/Unsatisfactory basis. The objectives of the orientation program are: 1. To develop a sense of community and identify for the MIB students. 2. To begin the process of program planning and career planning, including internship details, community resources, mentor program. 3. To enhance cultural awareness through exercises and develop classroom skills through case study & team building exercises.

IB 8080  Legal Aspects of International Business
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  Students not enrolled in MIB must obtain instructor consent
DESCRIPTION  This course addresses the business and legal issues of international business and commercial transactions. The course addresses types of international business transactions: import/export, distributorships, technology transfers, and foreign direct investment. The course also addresses the international regulation of trade and international dispute resolution. Students gain practical skills, including negotiating international contracts, working with overseas agents and partners, protecting intellectual property rights, and evaluating foreign markets for investment. Teaching methodologies vary and may include: hands-on work with international business documents, in-class problems and activities, case studies on foreign markets, contract negotiations, and guest speakers from consulates.

IB 8090  International Business Environment
CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  None
DESCRIPTION  This course is divided into two parts. The first part provides an intensive study of the changing economic, political, financial, and cultural environment in which organizations compete, both traditionally and digitally. The second part of the course encompasses specific business operations through a global lens, including import, export, counter trade, manufacturing and materials management; marketing and research and development; human resource management; accounting; and financial management.

IB 8092  Analyzing International Business Problems
CREDIT HOURS  3.0
PREREQUISITES  None
DESCRIPTION  The course reviews and applies the fundamental analytical frameworks in international and cross-cultural business. The course has a primary focus on models and decision support tools for making optimal decisions encountered by the firm in international market entry and expansion. The perspective is of the manager who integrates data, insights, and intelligence with decision making tools in order to arrive at rational choices in internationalization. Managerial decisions addressed in the course include: international market opportunity analysis; assessment of foreign market entry risk; international market research; cross cultural frameworks for analyzing customers; foreign location analysis; and others.
IB 8100  
**International Entrepreneurship**  
**CREDIT HOURS**  
3.0  
**PREREQUISITES**  
IB 8090 or consent of instructor  
**REQUIREMENTS**  
None  
**DESCRIPTION**  
This course considers theory, research, and practical advice about how to take a small- or medium-sized business or a new venture (traditional or dot.com) international. In addition to readings and lectures, students explore complex written cases and participate in class discussions with visiting speakers involved with international entrepreneurship. In a major project, students explore the feasibility of an international business venture.

IB 8180  
**Doing Business in Emerging Markets**  
**CREDIT HOURS**  
3.0

**REQUIREMENTS**  
None  
**DESCRIPTION**  
MIB students must complete IB 8090 as the prerequisite. This course examines regional integration and global business strategies in different regions of the world. Students examine issues of globalization and regionalization and then conduct an analysis of business strategies and options for a chosen company.

IB 8389  
**Directed Readings in International Business**  
**CREDIT HOURS**  
1.0 TO 6.0  
**PREREQUISITES**  
Consent of the instructor, good academic standing  
**DESCRIPTION**  

IB 8400  
**International Exchange Program Credit**  
**CREDIT HOURS**  
1.0 TO 6.0  
**PREREQUISITES**  
Acceptance to a RCB International Exchange Program  
**REQUIREMENTS**  
None  
**DESCRIPTION**  
This course is provided as a vehicle for awarding credit to graduate students who successfully complete course work as part of an international exchange program of the Robinson College of Business.
### IB 8410
**Study Abroad: Analysis of Regional International Business Practices**

**CREDIT HOURS**
3.0 TO 6.0

**PREREQUISITES**
Consent of the respective program director

**DESCRIPTION**
This course number serves as a generic number for study abroad programs sponsored by the Robinson College of Business and the Institute of International Business. An in-country experience is a required segment of the course. Specific region and/or discipline focus may vary by offering. Contact the Institute of International Business for the current list of program options.

### IB 8500
**International Business Internship**

**CREDIT HOURS**
1.0 TO 6.0

**PREREQUISITES**
Enrollment in MIB program; established language fluency in language of host country prior to approval for an internship; consent of Director of the Institute of International Business

**DESCRIPTION**
The internship experience is a supervised work program in an organization outside the United States in a non-English-speaking country. Foreign nationals may intern with organizations in the United States or other English-speaking countries. The Institute of International Business assists students in locating international internships and assists foreign nationals in locating internships in the United States. Students are encouraged to be actively involved in the internship selection process. The internship must be for at least one semester (minimum of 120 days in-country) of full-time work and must be related to the student's program of study. Fluency in the business language of the host country must be established prior to the internship. All internships must be approved in advance by the Director of the Institute of International Business.

### IB 8510
**International Business Field Study**

**CREDIT HOURS**
3.0

**PREREQUISITES**
None - Students not enrolled in MIB must obtain instructor consent

**DESCRIPTION**
The field study is a supervised practical application experience, an internship, or consulting experience, culminating in a term paper or thesis. It provides students the opportunity to learn and apply international business skills in a professional setting. Students are responsible for choosing their field study topic and presenting a plan of study to be approved by their academic advisor.

### IB 8550
**Special Topics in International Business**

**CREDIT HOURS**
3.0

**PREREQUISITES**
None - Students not enrolled in MIB must obtain instructor consent

**DESCRIPTION**
Students in this course will examine current issues of significance to internationalizing enterprises. A modular structure of the course enables treatment of such topics as global social responsibility, cross-cultural proficiency, competing with emerging market firms, and foreign market opportunity assessment.
**International Management**

**IB 8600**

**CREDIT HOURS** 3.0

**PREREQUISITES** None

**REQUIREMENTS** None

**DESCRIPTION** This course focuses on the management of the multinational corporation (MNC). The main course objectives are to critically analyze specific managerial challenges and opportunities faced by MNCs; to provide knowledge and conceptual frameworks necessary for understanding and managing MNCs; and to train and develop skills critical for international managers (e.g., writing and oral presentation skills, information skills, cultural sensitivities).

---

**Commercial Diplomacy**

**IB 8620**

**CREDIT HOURS** 3.0

**PREREQUISITES** IB 8090 or permission of instructor

**REQUIREMENTS** CSP: 1, 2, 6, 7

**DESCRIPTION** This course examines commercial diplomacy from the company specific point of view. In particular, the course focuses on the concerns of the line-of-business or country manager. The course makes extensive use of visiting speakers and materials that address the central question of how companies relate to a broader environment that includes political/legal/economic risk assessment, business/government relations, relations with nongovernmental organizations and the larger civil society, and linkages to the institutions of trade regimes.

---

**International Business Negotiation**

**IB 8630**

**CREDIT HOURS** 3.0

**PREREQUISITES** None

**REQUIREMENTS** None

**DESCRIPTION** International Business Negotiation focuses on negotiation in the global business setting. This course will cover the fundamental deal making and dispute resolution negotiation concepts covered in general negotiation class, but in a multi-cultural environment. Culture affects negotiators' strategies for using influence and information; the issues to be negotiated; negotiators' interests and priorities, as well as the social, economic, legal, and cultural environment in which negotiations are conducted. Through simulations, cases, videos, and class discussion, students develop an understanding of cross-cultural negotiations and build skills that can be used to make deals and resolve disputes in a global environment.

---

**Technology and Global Competition**

**IB 8680**

**CREDIT HOURS** 3.0

**PREREQUISITES** None

**REQUIREMENTS** None

**DESCRIPTION** This course examines the role of technology in shaping corporate strategy for competing in a global environment. Technology is broadly defined to include product and process technologies as well as information and communication technologies which form the core of the new digital economy. Readings from international business, strategic management, and innovation theory are used to learn how to evaluate a successful technology strategy. Special attention is placed on the political, cultural, legal, and economic differences of operating in a global marketplace.

<tbody>
<tr>
<td>IB 8690</td>
<td>Global Operations Management</td>
<td>3.0</td>
<td></td>
<td></td>
<td>This course introduces recent innovations in global operations management as they relate to a global business strategy. The course integrates concepts from organizational behavior, marketing, accounting, economics, and leadership to instill an appreciation of the complexity of developing and managing a global production system. Topics include global business strategy, improving global operating performance, supply-chain performance and production rationalization, and establishing new limits of global operations performance.</td>
</tr>
<tr>
<td>IB 8710</td>
<td>International Information Technology Issues and Policy</td>
<td>3.0</td>
<td>None</td>
<td>CSP: 1, 2, 4, 5, 6 (Same as CIS 8220)</td>
<td>This course examines the role of technology as an integral and key factor in the delivery and support of information and communication technologies in the global economy for both traditional and electronic businesses, and the related technical and managerial issues. The first half of the course is grounded in business strategy and information technology fit, culture, and national policy theory. The second half examines business in practice in the different world regions. Illustrative case studies coupled with readings of current press, class discussion, and practitioners from the international business community who provide real-world insight are used to bridge concepts and practice. In a major project, students assess the attractiveness of a particular country for a real company.</td>
</tr>

<tr>
<td>IB 9910</td>
<td>Seminar in International Business Theory</td>
<td>3.0</td>
<td>CSP: 1, 2, 3, 4, 6, 7</td>
<td></td>
<td>This seminar provides doctoral candidates with a comprehensive overview of the field of international business. We address an eclectic assortment of theoretical and empirical approaches to the study of cross-border business. We explore interesting research questions raised by the interdisciplinary literature. An important objective is to familiarize participants with the evolution of thought in international business, theory of the MNC, and contemporary perspectives. Each participant is given an opportunity to frame and design potential research projects in the field.</td>
</tr>
</tbody>
</table>
IB 9920  Cultural Frameworks and Cross-Cultural Behavior
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS CSP: 1, 2, 3, 4, 6, 7
DESCRIPTION The primary objective of the seminar is to examine the conceptual foundations of culture and how culture affects organizational behavior in comparative and multicultural contexts. Conceptualizations of culture are studied from a number of different disciplinary perspectives. We examine how alternate conceptualizations of culture influence research design issues. Also addressed are critical methodological issues in implementing a cross cultural study, with a particular focus on psychometric considerations, as well as recent research on the ways in which cultures vary. We also investigate how national culture affects teams, leadership, conflict, and negotiation.

IB 9930  Global Interorganizational Relationships
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS CSP: 1, 2, 3, 4, 6, 7
DESCRIPTION This seminar provides an in-depth review and analysis of inter-enterprise relationships in an international context, tracing key theoretical and empirical literature. Cross-border trading arrangements involve organizational actors from different cultural and institutional settings, necessitating the use of multiple theoretical perspectives to assess the complex structure and processes. Also discussed are contemporary forms of international business phenomena such as global supply chains, international strategic alliances, and other cross-border, enterprise arrangements.

KH 7470  Using Technology to Assess in Health, Physical Education, and Adapted Physical Education  
CREDIT HOURS  3.0  
DESCRIPTION  This course is designed to teach students how to integrate technology into the physical education setting, using it to measure, document, and enhance student learning.

KH 7480  Curriculum Development for Health, Physical Education, and Adapted Physical Education  
CREDIT HOURS  3.0  
DESCRIPTION  A study of curriculum development in health and physical education focusing on current theories and models including factors affecting the curriculum, proper scope and sequence, scheduling, implementation and change theories, and curriculum evaluation techniques.

KH 7500  Physiology of Exercise  
CREDIT HOURS  3.0  
PREREQUISITES  Physiology of Exercise (KH 3650) or consent of instructor  
DESCRIPTION  Students examine the acute responses and chronic adaptations of human physiological systems to exercise and physical activity, including bioenergetics, neuromuscular, cardiovascular, pulmonary, endocrine, and renal systems. Factors affecting exercise performance are evaluated including ergogenic aids, environmental conditions, age, and gender.

KH 7510  Biomechanics  
CREDIT HOURS  3.0  
PREREQUISITES  Biomechanics (KH 3600) or consent of instructor  
DESCRIPTION  Students investigate the anatomical and mechanical factors which influence human motion and perform analyses of complex human motions with the goal of optimizing human movement performance.

KH 7530  Applied Anatomy for Sports Medicine  
CREDIT HOURS  4.0  
PREREQUISITES  Anatomy in Kinesiology and Health (KH 2220) or consent of instructor  
DESCRIPTION  Orthopedic human anatomy and function are extensively examined. Cadaver dissection experiences are included.

KH 7580  Concepts of Orthopedic Rehabilitation  
CREDIT HOURS  3.0  
PREREQUISITES  KH 7530 or consent of instructor  
DESCRIPTION  Current concepts and techniques utilized in orthopedic rehabilitation of activity-related injuries are presented and discussed.

KH 7610  Sport Law  
CREDIT HOURS  3.0  
DESCRIPTION  Students apply law to selected aspects of education, commercial, and professional sports.

KH 7660  Practicum in Athletic Training  
CREDIT HOURS  1.0 TO 5.0  
PREREQUISITES  consent of instructor  
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory  
DESCRIPTION  A minimum grade of “S” is required for this course. Students participate in a variety of professional activities related to the field of athletic training. These activities may include surgical observations, physician observations, attendance at professional meetings, and other related instructor approved activities. Practicum may extend beyond one term. (Repeatable).
KH 7662  Internship in Sports Management
CREDIT HOURS  1.0 TO 6.0
PREREQUISITES  consent of faculty adviser and consent of instructor
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. Students receive practical administrative experience in a selected sport setting. Internship may extend beyond one term.

KH 7680  Sport Marketing Field Research
CREDIT HOURS  3.0
DESCRIPTION  This course provides an introduction to and hands-on experience of sport marketing survey research conducted in real sport business settings. Every sport business must have reliable information about consumers to make decisions and develop successful marketing plans -- sports consumer research is what provides this complex and essential data. Through developing an understanding of the sports consumer, marketers are able to develop strategies to enhance the sports product or event experience, while identifying key factors that affect the consumers' decision-making process, consumer spending trends, sports tourism, sponsor, and stakeholder data, and event and facility experience.

KH 7690  Practicum in Sports Administration
CREDIT HOURS  1.0 TO 3.0
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. Students gain practical experience in sports marketing, sports information, coaching, or related areas of sports administration through a supervised experience in an appropriate sport setting. Practicum may extend beyond one term.

KH 7710  Practicum in Exercise Science
CREDIT HOURS  1.0
PREREQUISITES  Completion of all course work (except KH 7750) and permission of instructor
REQUIREMENTS  Students must pass a standardized exit exam to complete this requirement
DESCRIPTION  A minimum grade of "S" is required for this course.

KH 7750  Internship in Exercise Science
CREDIT HOURS  6.0
PREREQUISITES  KH 4350, KH 4360, KH 4630, KH 7500
REQUIREMENTS  Course is graded as satisfactory/unsatisfactory
DESCRIPTION  A minimum grade of "S" is required for this course. Provides students with practical experience in a specific area of professional interest such as corporate fitness/work site health promotion, cardiac rehabilitation, hospital-based wellness, community or commercial fitness, etc. A total of 250 contact hours must be completed. Internship may extend beyond one term.

KH 7780  Drug Use Prevention and Intervention
CREDIT HOURS  3.0
DESCRIPTION  This course addresses family, school, and community factors placing children and youth at risk for tobacco, alcohol, and other drug use; investigates tobacco, alcohol, and other drug effects on child and adolescent health and academic performance; and emphasizes prevention and risk reduction strategies appropriate for inclusion in coordinated and comprehensive school health education.

KH 8380  Laboratory Methods in Exercise Physiology

CREDIT HOURS  3.0

DESCRIPTION  Techniques and procedures for measuring acute responses and chronic adaptations to physical activity and exercise. Students will gain an understanding of the underlying principles of measurement technology, calibration, operation, and maintenance of equipment, and principles of accurate and reliable physiological assessment. Students will also have the opportunity for practical experience performing assessments such as resting metabolic rate, fuel utilization, maximal oxygen consumption, pulmonary function, blood lactate and glucose responses to exercise, body composition, and/or others.

KH 8385  Obesity and Related Diseases

CREDIT HOURS  3.0

PREREQUISITES  Clinical Exercise Physiology (KH 4360) or consent of the instructor

DESCRIPTION  Students in this course will develop in-depth knowledge of standardized body composition assessments, obesity and related chronic diseases, including diabetes, inflammatory diseases, hypertension, energy balance, lipid and lipoprotein profiles and healthy lifestyle choices for disease management. They will also develop practical skill in assessing body composition and obesity, and selecting and maintaining healthy lifestyle choices. (KH 8385 may be cross-listed with KH 4380).

KH 8410  Classroom Management Theory and Strategy in Health, Physical Education and Adapted Physical Education

CREDIT HOURS  3.0

DESCRIPTION  This is a completely online course during which students will discuss various classroom management theories and strategies; and will have the opportunity to implement classroom management fundamental concepts in authentic Health/PE/APE teaching situations.

KH 8420  Comprehensive School Physical Activity Programs

CREDIT HOURS  3.0

DESCRIPTION  This is a completely online course during which students will learn how to develop, implement and assess Comprehensive School Physical Activity Programs.

KH 8550  Sport and Movement Studies for Athletes with Disabilities

CREDIT HOURS  3.0

DESCRIPTION  This course is designed to provide students with an understanding of current research findings underlying the advancement of sport for athletes with disabilities and skills in designing independent research on athletes with disabilities.

KH 8600  Physical Activity Interventions and Behavior Change

CREDIT HOURS  3.0

PREREQUISITES  KH 6280 or consent of instructor

DESCRIPTION  Study and discuss the psychological and behavioral perspectives of physical activity promotion, theoretical strategies to promote physical activity, and research-based interventions to change physical activity behavior for a variety of populations including those with special needs such as older adults, children and adolescents, and persons with disabilities.
**KH 8610  Curriculum Theory in Physical Education**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Approval of instructor

**DESCRIPTION**
Students will become familiar with several major contemporary theories that guide the design and implementation of P-16 physical education programs. Included theories will be: constructivism, social learning, critical analysis, behaviorism, health promotion, and cognition. Students will articulate their personal theory regarding physical education curriculums to compare and contrast with the major theories presented in KH 8610.

**KH 8620  Assessment Theory in Physical Education**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Approval of instructor

**DESCRIPTION**
Students will become familiar with several major contemporary theories that guide the assessment of teaching and learning in P-16 physical education programs. Students will articulate their personal positions regarding assessment theory and current assessment practices in physical education in KH 8620.

**KH 8630  Instructional Design for Physical Education**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Approval of instructor

**DESCRIPTION**
Students will learn how to design instructional systems that can be used to achieve intended learning outcomes in a variety of physical education settings. Students will become familiar with the relevant literature in learning psychology as it can be applied in P-16 physical education instruction. Students will develop a unique instructional system in KH 8630.

**KH 8640  Lab Techniques for Sports Medicine**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course provides an introduction to techniques used in collecting and analyzing data for research in sports medicine. Course meetings will consist of both lecture and laboratory sessions for which students will collect, analyze, and interpret data. Students will submit a scientific report on the results of in-class laboratory activities.

**KH 8650  Physical Education for Students with Developmental, Physical, and Sensory Disabilities**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course will provide K-12 Health and Physical Education teachers with techniques and knowledge for the design and implementation of effective instruction for students with disabilities in inclusive and self-contained physical education settings.

**KH 8655  Inclusion Through Disability Sport**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course is designed for K-12 health and physical educators and professionals in the field of sport and physical activity interested in working with individuals with disabilities. Through sport participation, students will learn the fundamental skills, rules, and strategies of selected disability sports and be able to develop programs for individuals with and without disabilities using games and activities derived from the field of disability sport.

<tr>
<td>KH 9680</td>
<td>Internship in Adapted Physical Activity (APA)</td>
<td>1.0 to 3.0</td>
<td>Approval of instructor</td>
<td>This course was created to provide structure and professional development for students completing their Ph.D. in Kinesiology with a concentration in Physical Education Teacher Education with a cognate in Adapted Physical Education within the Department of Kinesiology and Health. This course is designed to provide intensive experiences for students to work with individuals with disabilities in sport, physical education and recreation settings under the supervision of a faculty member. The goal of the course is to give doctoral students an opportunity to continue to develop practical skills working with individuals with disabilities. In so doing students bring real life experiences with them to their college classroom and will continue to be connected to the issues professionals face while working with students with disabilities in sport and educational settings. This understanding will lead to better collaborations between schools, not-for-profit agencies and institutions of higher education and increased advocacy for students with disabilities at all levels. (Repeatable).</td>
</tr>
<tr>
<td>KH 9820</td>
<td>Research in Kinesiology</td>
<td>1.0 to 6.0</td>
<td>Consent of instructor</td>
<td>A minimum grade of &quot;S&quot; is required for this course. Prior to registration, the student must submit a proposal (including goals and objectives, research activities and expected outcomes, and evaluation criteria) to his or her Doctoral Advisory Committee. The student works under the direct guidance of a faculty member to develop and apply research skills in sport science. Research activities may include learning and implementing relevant research techniques as well as designing, conducting, and presenting an original research study. Research may extend beyond one term. (Repeatable).</td>
</tr>
</tbody>
</table>
KH 9830  Research on Teaching and Learning in Physical Education

CREDIT HOURS  3.0

PREREQUISITES  Approval of instructor

DESCRIPTION  Students will become familiar with the empirical research on teaching and learning in P-16 physical education programs. Course content will include extensive readings from multiple paradigms of inquiry in this field, including quantitative, qualitative, mixed-methods, and meta-analytic research. Students will complete a comprehensive review of research on one line of inquiry on teaching and/or learning in physical education.

KH 9960  Advanced Research Seminar in Kinesiology

CREDIT HOURS  1.0 TO 4.0

DESCRIPTION  Current research topics and techniques and professional development activities are discussed in group sessions with program faculty. Students complete complementary individual research projects.

KH 9990  Dissertation

CREDIT HOURS  3.0 TO 9.0

REQUIREMENTS  Course is graded as satisfactory/unsatisfactory

DESCRIPTION  A minimum grade of "S" is required for completion of the dissertation. The student engages in dissertation research approved by his or her committee. Successful completion requires a significant contribution to knowledge in the area of sport science. Dissertation may extend beyond one term. (Repeatable).

<td></td>
</tr>
<tr>
<td>LAW 6020</td>
<td>Professional Responsibility</td>
<td>3.0</td>
<td>This course focuses on the development of professional identity, ethical decision making, and the role of lawyers in society, and covers confidentiality, conflicts of interest, and the interpretation of the rules of professional conduct. As prescribed by the instructor, the course may also include discussion of other topics such as bar admission, attorney discipline, malpractice, ineffective assistance of counsel in criminal cases, judicial ethics, fees, advertising, solicitation and the ethics of the adversary system. LAW 6020 must be taken before or concurrently with LAW 6030.</td>
<td></td>
</tr>
<tr>
<td>LAW 6021</td>
<td>Transition to Practice</td>
<td>6.0</td>
<td>This limited enrollment course provides an accelerated transition to the practice of law for students in the midpoint of their law school experience by teaching fundamental knowledge, skills and values needed to begin a legal career in a wide variety of settings. Students will learn how to handle a case from initial client meeting through conclusion of representation, first with a simulated case using online case management software and in-class role plays, and then by representing actual domestic violence victims to obtain orders of protection from in Superior Court. Students will also learn about managing a law firm through both instruction and fieldwork with a private attorney working in an area of interest to them. Students will become competent in interpreting and applying the Georgia Rules of Professional Conduct in real-life situations and will understand the attorney discipline system in Georgia as well as basic common law principles arising from malpractice and attorney disqualification decisions. Significant differences between the Georgia and ABA Model Rules of Professional Conduct will be covered. The course satisfies the Professional Responsibility requirement.</td>
<td></td>
</tr>
</tbody>
</table>
LAW 6022  
The Client Relationship  

CREDIT HOURS  
3.0  

DESCRIPTION  
In this course, students will learn how to develop effective and ethical relationships with clients, become competent in recognizing moral dilemmas in real life situations encountered by lawyers, and begin to acquire the professional judgment necessary to resolve the kind of complex problems that arise in legal practice. Students will become skilled in interpreting and applying the Georgia Rules of Professional Conduct and will understand the attorney discipline system in Georgia as well as basic common law principles arising from malpractice and attorney disqualification decisions. Significant differences between the Georgia and ABA Model Rules of Professional Conduct will be covered. Students will regularly perform lawyering exercises that develop client relationship skills and ethical decision making. They will write one or more papers that apply what they have learned to analyze videotaped lawyer-client meetings and propose what they would have done in the situation. There will also be short quizzes and/or a final examination. This course satisfies the Professional Responsibility requirement. Enrollment limited to 48.

LAW 6030  
Lawyering: Advocacy  

CREDIT HOURS  
3.0  

PREREQUISITES  
LAW 6010  

COREQUISITES  
LAW 6030 must be taken in the same academic year as LAW 6010, and after or concurrently with LAW 6020.  

DESCRIPTION  
This course provides students with an introduction to the lawyer skills required in representing a client from the initial interview, through discovery and pre-trial motions, to a jury trial. The course is taught by practicing trial lawyers and focuses on skills training. The course combines written assignments and in class performances. The course is graded pass/fail but at least two students in each section will earn a grade of "A" (a 90 or the student's previous semester cumulative average, whichever is higher).

LAW 6040  
Landlord-Tenant Mediation Clinic I  

CREDIT HOURS  
3.0  

DESCRIPTION  
This is a full academic year, two-semester clinic. Students must enroll in both the fall and spring semesters. Second- and third-year students may apply. Please see law.gsu.edu/landlord-tenant-mediation-clinic/ for information.

LAW 6041  
Landlord-Tenant Mediation Clinic II  

CREDIT HOURS  
3.0  

DESCRIPTION  
Continuation of LTMC I. Students must take both I and II.
LAW 6050  Capital Defenders Clinic I  
CREDIT HOURS  3.0  
DESCRIPTION  
A three-hour clinical course taught in partnership with Georgia Capital Defenders, a new state agency responsible for representing all indigent defendants statewide in capital cases at trial and on direct appeal. Students will assist in the representation of clients of Capital Defenders and will work on all aspects of the representation, including fact investigation, witness interviewing, legal research and drafting, and generally assisting in preparing cases for trial and sentencing hearings. Students will be supervised by the professor and attorneys in the office. Grading is on a pass/fail basis. Permission of the professor is required.

LAW 6051  Capital Defenders Clinic II  
CREDIT HOURS  3.0  
DESCRIPTION  
See Course Description for LAW 6050, Capital Defenders Clinic I.

LAW 6090  HeLP Legal Services Clinic I  
CREDIT HOURS  4.0  
PREREQUISITES  2.30 GPA  
DESCRIPTION  
The Clinic offers students the opportunity to develop basic lawyering skills, such as client interviewing, counseling and representation; negotiation; research and drafting; and case management. HeLP offices based at Children's handle cases involving guardianship, Medicaid, housing, SSI, family law, education and employment issues. Students will interact directly with clients under the supervision of the Clinic's Associate Directors. The HeLP Clinic is an interdisciplinary learning experience. Students will also work collaboratively with Residents and Medical Students from Morehouse School of Medicine and Emory University School of Medicine. HeLP Clinic students are also required to perform client intake in the Emergency Department of Childrens at Hughes Spalding as part of a clinic program called, ED Mondays, and to attend patient rounds with residents at Childrens at Hughes Spalding. Weekly class sessions cover substantive and procedural law, as well as Clinic administrative procedures and lawyering skills. These sessions will also include more formal discussions of specific case issues. Additionally, students meet weekly with their assigned Supervisor to discuss and evaluate their assigned cases. Students are also required to be in the Clinic a minimum of seven hours per week exclusive of class time. In order to work inside the hospital, students must be tested and confirm vaccinations for certain diseases. Work in the Clinic will likely require travel to Children's at Scottish Rite, Children's at Egleston, and Children's at Hughes Spalding. Students enrolled in the Clinic must attend a mandatory day-long Orientation session. Students will be notified of the date of the session upon registration.

<td>LAW 6091</td>
<td>HelP Legal Services Clinic II</td>
<td>4.0</td>
<td>2.30 GPA and LAW 6090. This is a continuation of HelP Clinic I. Students will handle the more advanced aspects of the cases developed in HelP Clinic I. Limited Enrollment.</td>
</tr>
<tr>
<td>LAW 6092</td>
<td>Prerequisite: 2.3 GPA</td>
<td>2.0 OR 3.0</td>
<td>The Olmstead Disability Rights Clinic is a year-long off-site clinic taught in partnership with the Atlanta Legal Aid Society’s Disability Integration Project. The clinic focuses on advocacy arising out of the United States Supreme Court’s Olmstead decision. Classroom meetings and materials will cover four main areas: (1) advocacy and litigation skills; (2) substantive law relating to the rights of people with disabilities; (3) current Georgia issues and (4) case rounds to discuss the cases and issues students work on in their client advocacy. Students will represent individual clients in Olmstead related advocacy and perform community education. Grading is pass/fail.</td>
</tr>
<tr>
<td>LAW 7005</td>
<td>Accounting for Lawyers</td>
<td>2.0 TO 3.0</td>
<td>This course is designed to develop a robust knowledge of the interplay of accounting, finance, and the markets in the practice of trial and transactional law. The student will apply that knowledge in a series of case studies requiring one to prepare and deconstruct financial statements, draft and interpret contracts, prepare and critique business valuations, and build and challenge liability and damages models. Instructor’s permission to enroll is required for students who hold graduate degrees in accounting or finance, or are MBA’s, CPA’s, CFA’s or the equivalent.</td>
</tr>
<tr>
<td>LAW 7006</td>
<td>Access to Justice: Law Reform I</td>
<td>2.0 OR 3.0</td>
<td>This course is the first component of a year-long course. Students who enroll in Access to Justice: Law Reform I must also enroll in Access to Justice: Law Reform II (LAW 7007) in the succeeding semester. During the first semester of the course, students will learn about the workings of the civil and criminal justice systems as they operate in Fulton and/or Dekalb County, focusing on the experience of low-income individuals. They will identify a specific access to justice problem and work in teams to research and produce a thorough description of the problem. Enrollment is limited and students must obtain the permission of the instructor prior to registering for this course.</td>
</tr>
<tr>
<td>LAW 7007</td>
<td>Access to Justice: Law Reform II</td>
<td>2.0 OR 3.0</td>
<td>This course is the second component of a year-long course. Students enrolling in Access to Justice: Law Reform II must also enroll in Access to Justice: Law Reform I (LAW 7006) in the preceding semester. During the second semester, students will engage in further research of the access to justice problem they have identified in part I of the course and propose a solution to the problem. They will also work to organize an event at which their proposals will be presented. Enrollment is limited and students must obtain the permission of the instructor prior to registering for this course.</td>
</tr>
</tbody>
</table>
LAW 7010  Administrative Law
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 6000 is recommended but not required
DESCRIPTION An introduction to general administrative law and procedure. This course surveys the roles, functions, and processes of federal administrative agencies through an examination of the adjudicative, investigative and rule-making functions of federal agencies, the relationship of administrative agencies to other branches of government, and the right and scope of judicial review of agency actions.

LAW 7015  Administrative Law Seminar
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES LAW 6000
DESCRIPTION Students who have completed LAW 7010 will be given priority in enrollment. Limited enrollment. This course is devoted to the exploration of problems which currently confront state and/or federal administrative agencies. In addition to their reading assignments and participation in class discussions, students will be required to complete a paper on an approved topic. The paper may be used to satisfy the writing requirement.

LAW 7020  Admiralty
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION The study of federal admiralty and maritime jurisdiction (U.S. Constitution, Art. III, Sec.2) including the practice and procedure of federal courts in admiralty cases and state courts under the "saving to suitors" clause (28 U.S.C. sec 1333). The course surveys the substantive law applicable to admiralty and maritime matters including international law-treaties and conventions, conflict of laws rules, and federal laws dealing with the topics of maritime liens and ship mortgages, charter parties, carriage of goods, remedies for personal injury and wrongful death for injured seamen and maritime workers (including the Jones Act and Longshore and Harbor Workers' Compensation Act), collision, salvage, general average contribution, marine insurance, and limitation of shipowner's liability. When possible, the class will tour the Georgia Ports Authority terminals in Savannah, Georgia, during the semester.

LAW 7025  Wrongful Convictions
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This course provides an opportunity to study systemic errors in the criminal justice system that lead to the conviction of innocent people. Topics include: (1) the factors that contribute to wrongful convictions including eyewitness misidentification, false confessions, ineffective assistance of counsel, jailhouse informants, police and prosecutorial misconduct, junk science, and forensic fraud, (2) potential reforms that could be implemented to guard against the conviction of the innocent, (3) legal and philosophical problems related to the concept of innocence, and (4) legal doctrine and case law addressing claims of innocence and regulating access to post-conviction relief.

<tbody>
<tr>
<td>LAW 7031</td>
<td>Advanced Criminal Litigation</td>
<td>2.0 TO 3.0</td>
<td>LAW 6000 and LAW 6030</td>
<td>Limited enrollment. A simulation course addressing the substantive knowledge and advocacy skills essential to the trial of a felony criminal case.</td>
</tr>
<tr>
<td>LAW 7036</td>
<td>Advanced Evidence</td>
<td>2.0 TO 3.0</td>
<td>LAW 6010</td>
<td>Limited to 14 students. This course combines classroom demonstrations and exercises in the application of the rules of evidence with analysis and discussion of currently troublesome evidentiary issues.</td>
</tr>
<tr>
<td>LAW 7041</td>
<td>Advanced Income Taxation</td>
<td>2.0 TO 3.0</td>
<td>LAW 7095</td>
<td>Concentration on one or more areas of current interest in income taxation. Topics will vary from year-to-year. Format will vary and may be offered as a seminar.</td>
</tr>
<tr>
<td>LAW 7045</td>
<td>Advanced Issues in Trial Advocacy Seminar</td>
<td>2.0 TO 3.0</td>
<td>LAW 6010 and LAW 6030</td>
<td>Limited enrollment. Utilizing both traditional and more innovative methodologies and course readings, students will address selected advanced topics pertaining to the art and science of trial advocacy.</td>
</tr>
<tr>
<td>LAW 7050</td>
<td>Advanced Legal Research</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>Limited enrollment. The course will concentrate on advanced legal research techniques using computer technology and book resources. Topics covered by the course include research in legislative histories, administrative law, tax, and labor. Project required.</td>
</tr>
<tr>
<td>LAW 7051</td>
<td>Advanced Legal Writing</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>In this course, students build on the skills developed in Research, Writing and Advocacy I and II (LAW 5070 and LAW 5071), performing research and preparing a number of legal documents, both objective and persuasive. Particular emphasis on logical organization, clarity of expression, and overall effectiveness of written communication to achieve the writer’s goal.</td>
</tr>
<tr>
<td>LAW 7052</td>
<td>Lawyering: Practice-Ready Writing</td>
<td>3.0</td>
<td>LAW 6030</td>
<td>This course is a third-year simulation-based advanced writing course, focusing on communication for law practice. The course follows a law firm model in which students handle multiple mock transactional and litigation cases from initial client intake through resolution, drafting applicable documents throughout the representation. The course will reinforce foundational professional skills as students &quot;practice&quot; being a lawyer. Limited to 12 students.</td>
</tr>
<tr>
<td>LAW 7055</td>
<td>Alternative Methods of Dispute Resolution (ADR)</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>The objective of this course is to educate students about the dispute resolution mechanisms that provide a viable alternative to litigation and the appropriate uses and limitations of each model. Specific topics include conciliation, negotiation, mediation, arbitration, mini-trials, summary jury trials, rent-a-judge, and the use of the ombudsman. Policy, practical and ethical issues raised by these alternatives are examined through the case law and the relevant statutes. Videotapes of simulated mediations and negotiations, as well as lectures by experienced guest ADR practitioners, are used to complement classroom instruction.</td>
</tr>
</tbody>
</table>
LAW 7061  Advanced Alternative Dispute Resolution
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 7060
DESCRIPTION  Limited enrollment. An advanced study of the mechanisms that provide alternatives to litigation, with a focus on the design and development of dispute resolution systems within organizations and within other contexts. The course will examine the field of dispute systems design within its historical and legal contexts with a focus on potential advantages and disadvantages of these types of systems. Students will also be provided with a practical framework to apply dispute systems design and other advanced ADR concepts in specific situations and will study employment dispute resolution programs, consumer dispute resolution programs, early case assessment, and other conflict management trends.

LAW 7062  Mediation: Law and Practice
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  Recommended: LAW 7060. This course provides an in-depth exposure to the mediation process by focusing on both theory and skills. In addition to learning the theoretical and legal framework supporting institutionalized mediation, students will learn how to mediate and how to represent parties in mediations.

LAW 7063  American Constitutional History
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  A study of the history of the United States Constitution and the role of the Supreme Court in constitutional adjudication.

LAW 7064  Animal Law
CREDIT HOURS  2.0 OR 3.0
DESCRIPTION  This course considers the developing area of animal law and the broad spectrum of statutory, administrative, and case law that animal law encompasses. The course will focus the ways animal law intersects with other, well-established areas of law. Selected topics include the study of standing and justiciability issues, difficulties associated with defining the term "animal," torts committed both by and against animals, animals in sports and entertainment, and federal statutes, such as the Endangered Species Act and the Animal Welfare Act.

LAW 7065  Antitrust Law
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  A study of the implementation of federal trade regulation statutes focusing on the competitive tensions of the contemporary economy and the relationship between economic theory and antitrust policy.

LAW 7075  Appellate Advocacy I
CREDIT HOURS  1.0
DESCRIPTION  Minimum grade of C+ in the RWA sequence, and a passing grade in Legal Bibliography are required for Moot Court Board candidacy. Preparation and argument of an appellate brief in the GSU Moot Court Competition. This competition constitutes the first step in the selection process for Moot Court. S/U grade.
**LAW 7076**  
**Appellate Advocacy II**  
**CREDIT HOURS**  
1.0  
**DESCRIPTION**  
By invitation upon completion of LAW 7075. These students are candidates-in-training for positions on the Moot Court Board and on competition teams. During the semester, certain students will represent the College of Law in the Georgia Intrastate Moot Court Competition and in the ABA National Appellate Advocacy Competition. By the completion of the semester, students will become members of the Moot Court Board and assume responsibility for running the GSU Moot Court program. S/U grade.

**LAW 7078**  
**Georgia Appellate Practice**  
**CREDIT HOURS**  
2.0 TO 3.0  
**PREREQUISITES**  
Suggested: LAW 6010, LAW 7010, LAW 7165  
**DESCRIPTION**  
The course will cover both federal appellate practice and procedure, as well as issues pertaining to the state law applicable to the Georgia Supreme Court and Court of Appeals. Procedurally, it will pick up with the entry of judgement in the trial court. The course will address specific rules of appellate procedure and their interpretation, but the emphasis will be on the synthesis of judicial authorities and statutory interpretation, strategic thinking and planning, and the application of theory in the practical settings faced by the practitioner.

**LAW 7079**  
**Arts and Entertainment Law**  
**CREDIT HOURS**  
2.0 TO 3.0  
**DESCRIPTION**  
A study of specific substantive areas of the law as they relate to the arts. Areas expected to be covered include, but are not limited to, copyrights, trademarks, rights of publicity, tax, contracts, agency, antitrust, and the continental doctrines of "droit moral" (moral rights) and "droit de suite" (resale royalties to the original artist or author). In addition, the recently enacted Visual Artists Rights Act of 1990 and the effect of the recent signing of the GATT Implementation Bill will also be discussed. There will either be an in-class or a take-home exam. Enrollment is limited only by the availability of the classroom space.

**LAW 7089**  
**Advanced Bankruptcy Reorganization**  
**CREDIT HOURS**  
2.0 TO 3.0  
**PREREQUISITES**  
LAW 7091, LAW 7095 and LAW 7395.  
**DESCRIPTION**  
An intensive study of the substantive and procedural bankruptcy issues confronting consumer or business debtors seeking financial liquidation under Chapter 7 and financial reorganization under Chapter 11 or 13 of the Bankruptcy Code. Among the issues to be considered are the extent of property exemptions, the requirements for liquidating non-exempt assets, the allocation of creditors’ claims between secured and unsecured positions and the comparative benefits of the Chapter 7 and Chapter 13 discharges.

**LAW 7091**  
**Basic Bankruptcy**  
**CREDIT HOURS**  
2.0 TO 3.0  
**DESCRIPTION**  
An intensive study of the substantive and procedural bankruptcy issues confronting consumer or business debtors seeking financial liquidation under Chapter 7 and financial reorganization under Chapter 11 or 13 of the Bankruptcy Code. Among the issues to be considered are the extent of property exemptions, the requirements for liquidating non-exempt assets, the allocation of creditors’ claims between secured and unsecured positions and the comparative benefits of the Chapter 7 and Chapter 13 discharges.
LAW 7093  Bankruptcy and Tax Seminar
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  LAW 7090 and LAW 7095. This seminar is devoted to exploration of the interface between bankruptcy and tax. The seminar will examine not only the often times conflicting policies embodied in both codes, but also substantive topics including the treatment and priority of tax claims and liens, the taxation of debtors and bankruptcy estates, the tax consequences of bankruptcy reorganizations, the carry over of tax attributes in bankruptcy, and bankruptcy court jurisdiction over tax matters. This course may satisfy the College of Law writing requirement.

LAW 7094  Bankruptcy Assistance and Practice Program I
CREDIT HOURS  3.0
PREREQUISITES  LAW 7091 or LAW 7176, and a cumulative GPA of 2.30.
DESCRIPTION  A collaborative course that brings students together with bankruptcy judges and attorneys. Partnered with a local bankruptcy practitioner, and working under the third year practice act, students will handle consumer bankruptcy cases from client intake through a Chapter 7 discharge and Chapter 13 plan confirmation. Students will participate in client counseling, creditor negotiations, bankruptcy court litigation, and other fundamental aspects of a bankruptcy case. The course consists of two components: the practical component and a classroom component. The classroom component will meet once each week throughout the semester. This course does NOT count against the maximum number of clinical hours that students may count toward graduation.

LAW 7095  Basic Federal Taxation I
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  An introduction to federal income taxation, with emphasis on fundamental doctrines and major structural aspects of the Internal Revenue Code. Includes: definition of income, basic rules relating to the deduction of items, limitation on deductions, and introduction to capital gains and non- of taxation of entities such as corporations and introduction to taxation of estates and trusts. recognition transactions, and an introduction to tax accounting.

LAW 7096  Basic Federal Taxation II
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 7095
DESCRIPTION  A continuation of Basic Federal Taxation I, with emphasis on more sophisticated provisions of the Internal Revenue Code that apply to individuals. Includes: limitation on tax shelters, advanced tax accounting concepts, advanced capital gains and loss provisions, and an introduction to alternative tax entities such as corporations, partnerships, limited liability companies, estates and trusts.

LAW 7097  Bankruptcy Assistance and Practice Program II
CREDIT HOURS  3.0
PREREQUISITES  LAW 7094
DESCRIPTION  Continuation of Bankruptcy Assistance and Practice Program I.
LAW 7098 Biotechnology Law, Policy and Ethics
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This course provides an introduction to the legal, policy, and ethical issues surrounding biotechnologies. The course surveys a variety of federal and state laws and international treaties addressing biotechnology research, patenting, and applications. The course will examine the distinctive legal, policy, and ethical issues associated with biotechnologies in selected topic areas, which may include genetically modified foods, nanotechnology, xenotransplantation, patenting of genes/patenting of life, stem cell research, gene therapy, preimplantation genetic diagnosis, sex-selection reproductive technologies, germline genetic engineering of human beings, and human reproductive cloning.

LAW 7099 Bioethics and the Law
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This course examines contemporary interdisciplinary issues that arise at the intersection of law, medicine, and ethics. Its primary focus is on life and death. It provides an introduction to bioethics and addresses medical, legal, ethical, and policy issues in genetics and biotechnology, human subjects research; human reproduction and decision making at the beginning of the life; dying and decision making at the end of life; and rationing health care. Interdisciplinary readings will draw from the legal medical and ethics literature.

LAW 7100 Unincorporated Business Associations
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION An introduction to the statutory framework and common planning problems for closely held businesses like partnerships, limited liability companies, limited partnerships and other non-corporate business entities. In hands-on simulations, students work with opposing counsel and co-counsel teams to negotiate and draft complex agreements throughout the semester.

LAW 7101 Corporations
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION A survey of the state and federal laws governing the formation and operation of corporations.

LAW 7102 Transaction Assistance and Practice Program
CREDIT HOURS 2.0 OR 3.0
PREREQUISITES Completion of or concurrent registration in Corporations LAW 7101
DESCRIPTION This course focuses on common legal issues facing businesses and nonprofits in the context of transactional and corporate law. Students will develop the necessary skills to determine and assess a real client's business needs in a given situation and effectively address those needs in a written legal document. Under the supervision of local practitioners, students will handle transactional and corporate legal challenges being faced by a local nonprofit. 2 or 3 credits. 2.3 minimum GPA.

The tax implications to both shareholders and the entity will be examined. The course will cover transfers of property to a newly formed or preexisting corporation, normal distributions, redemptions, converting a C corporation to an S corporation, and the effect of liquidating distributions on both forms of corporations. NOTE: The maximum number of credit hours a student may earn for taking any combination of LAW 7110, LAW 7415 and LAW 7127 is four (4).</td>
</tr>
</tbody>
</table>
**LAW 7130**  
**Seminar on European Civil Litigation**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** This seminar addresses the form and features of civil litigation in the context of central and eastern European national legal orders. The seminar also exposes the student to the general legal environment and structure of the legal profession in central and eastern European states. This seminar is conducted at predetermined venues in Europe, and it includes filed visits and site excursions to relevant courts and other judicial institutions on the European continent.

**LAW 7131**  
**Comparative Law Seminar**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** This Seminar addresses the basic principles relevant to commercial arbitration as a dispute resolution device in international commerce within the context of different national legal orders, including a consideration of the history and origins of arbitration in the resolution of international trade and commercial disputes; the relation of international commercial arbitration and the national and international legal order; the arbitration agreement, with special emphasis on the arbitral clause as it relates to the scope of arbitrability; the arbitral process prior to award, inclusive of a review of the procedural rules of major international arbitral institutions; the authority of arbitrators in the arbitral process; special procedural issues in the conduct of international commercial arbitration such as pre-award attachment; provisional remedies; discovery; and judicial intervention in international commercial arbitration; and the arbitral award and its enforcement, with emphasis on national law and international agreements supporting the recognition and enforcement of international commercial arbitral agreements and awards, especially the United Nations Convention and national legislation adopted to implement it. (Taught in summer abroad program in Austria).

**LAW 7136**  
**Complex Litigation**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** This course examines procedural issues in civil litigation that arise when the simple two-party, single claim model is transformed into multi-claim, multiparty litigation. Coverage will focus on joinder devices in complex cases with particular emphasis on the class action device and its jurisdictional and due process implications, the problems of duplicative state and federal litigation, judicial control of complex cases, the discovery process, the multi-district litigation procedures and the case management movement, and issues relating to preclusion in complex cases. The complex litigation course is designed to build upon the basic course in civil procedure and to be a comprehensive exploration of advanced procedural topics.

**LAW 7137**  
**Cyberlaw**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** The emergence and ongoing development of computers and cyberspace technologies present a host of challenging legal issues. This overview course will examine some of these issues and highlight the tensions that exist between individuals, corporations, and governments for control over and/or ownership of the global Internet and its content. The course will offer insight into such issues as governance of the Internet and jurisdiction over Internet speakers, free expression and censorship, privacy, hacking and security, and protection of intellectual property rights. No prior knowledge of Internet technology is needed or required, but a willingness to learn about the technology on which the Internet is built is essential.
LAW 7138  Computers and the Law Seminar
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  A study of specific substantive areas of
the law as they relate to both computer
hardware and software. Areas covered
include, but are not limited to,
copyrights, trademarks, patents,
misappropriation of trade secrets,
antitrust, contracts, and "anti-hacking"
laws. Class enrollment is limited to 15
students, with instructor approval.
Ideally, the students should have some
background in either copyright law or in
computer science. A substantial paper
evidencing sufficient research is
required. There will also be an exercise in
software licensing. There will be no final
examination.

LAW 7140  Conflict of Laws
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  The study of issues in choice of law
including techniques for ascertaining
applicable law from among competing
state laws when a legal transaction (e.g.,
contract, tort, U.C.C., descendents'
estate divorce, child custody) has a nexus
with two or more states or foreign
countries. The course includes
consideration of federal constitutional
issues of due process, full faith and credit
as they affect the application of state
laws, conflicts between federal and state
law, and federal court practice and
procedure in conflict of laws. Applicable
international law, treaties, and
conventions are also treated.

LAW 7145  Constitutional Law: Survey of
the First Amendment
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 6000
DESCRIPTION  A study of the federal constitutional
protection afforded expression and
religion by the First Amendment of the
United States Constitution.

LAW 7151  Constitutional Law Seminar
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  LAW 6000. A seminar on selected
problems in constitutional law. A paper
is required.

LAW 7153  Design and Construction Law
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  A study of the legal problems common to
the construction industry focusing on the
structure and negotiation of construction
contracts, claims procedures, arbitration
and litigation.

LAW 7155  Consumer Protection
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  An examination of consumer rights and
remedies related to advertising, deceptive
trade practices, debt collection, consumer
credit and truth-in-lending.

LAW 7158  Copyrights
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  Analysis of federal copyright law as it
pertains to works of art, motion pictures,
music, literature, and computers. In
addition to case law, both the Copyright
Acts of 1909 and 1976 will be covered, as
well as recent legislative developments.

LAW 7161  Corporate Finance
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 7101 or LAW 7470
DESCRIPTION  Enterprise and securities evaluation,
capital structure and senior securities,
dividends, mergers, and disclosure
requirements.
LAW 7163  Advanced Corporate Law
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 7101
DESCRIPTION This course will provide an opportunity for in-depth study of one or more areas of corporate law, for example: theories and consequences of the corporate form and limited liability; the rights of various claimants such as bondholders, preferred shareholders and holders of common stock; corporate finance (including capital structure, leverage, and valuation); the duties of loyalty and care and the business judgment rule; "other constituency" statutes; other corporate agents, including attorneys, accountants, and investment bankers; proxy regulations; and struggles for control.

LAW 7164  Seminar on Corporate Governance
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 7101
DESCRIPTION This seminar will provide an opportunity for students to explore issues of corporate governance, examining how publicly held corporations are organized internally and regulated externally. Topics could include: the composition of the board, and the functions and powers of directors and officers in publicly held corporations; the composition and functions of board committees, such as the audit committee; the scope of the duty of care and the business judgement rule problems of reliance on others, etc.; the role of directors and shareholders in transactions in control and tender offers; and derivative actions. The particular focus of the seminar may vary; accordingly, academic credits awarded will range from two to three semester hours depending upon the scope and depth of the research subject selected by the instructor. A written research paper will be required, which will satisfy the writing requirement.

LAW 7165  Criminal Procedure: Investigations
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION Formerly Criminal Procedure I. This course covers the constitutional regulation of the police in the area of criminal investigations, focusing particularly on the Fourth and Fifth Amendments. Among other things, the course will cover the exclusionary rule, search and seizure, the meaning of probable cause, the arrest power, the privilege against self-incrimination and police interrogation. It may also cover the right to counsel during police interrogations.

LAW 7167  Criminal Procedure: Adjudication
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION Formerly Criminal Procedure II. This course covers the adjudication of criminal cases after a defendant has been arrested, including the charging decision, setting of bail, the grand jury, discovery, guilty pleas and plea bargaining, right to trial by jury and jury selection, effective assistance of counsel, sentencing, and double jeopardy. It may also cover appellate and collateral review.
LAW 7169  Criminal Appellate Practicum  
CREDIT HOURS 4.0  
PREREQUISITES LAW 7165 and LAW 7167. 2.30 GPA or better required.  
DESCRIPTION This course provides students with an introduction to the theory and practice of criminal law at the appellate level. Students will work in teams to prepare legal briefs in active cases in the United States Court of Appeals for the Eleventh Circuit, the Supreme Court of Georgia, and the United States Supreme Court. At the same time, students will study the broad fundamentals of appellate law and also develop in-depth understanding of the specific issues relevant to their case work to achieve a refined understanding of appellate practice in the state and/or federal courts. Limited enrollment. Admission only by application and permission of professor. Applicants must have a cumulative gpa of at least 2.30 at the time of enrollment.

LAW 7170  Criminal Justice: Fieldwork and Law Reform  
CREDIT HOURS 3.0  
DESCRIPTION Open to a limited number of second and third year students. Consent of instructor required. Students must submit an application and be available for a possible interview. Students will learn about the criminal justice system as it actually operates in metropolitan Atlanta and develop a law reform proposal about a specific aspect of that system. The course will use a wide variety of teaching methods including assigned readings drawn from both the legal scholarship and social science research, classroom lectures and discussions, and group fieldwork at locations such as police stations, jails and courthouses. Each student will select some aspect of the criminal justice system for independent research out of which will develop a written project proposing improvement or reform. The project must demonstrate mastery of applicable substantive criminal law and procedure and application of that knowledge to data gathered through the student's own fieldwork. Examples of fieldwork would be carefully documented court-watching, analysis of data collected from public records, and interviews of relevant participants in the criminal justice system.

LAW 7172  Philosophy of Criminal Law  
CREDIT HOURS 2.0 OR 3.0  
DESCRIPTION This course explores some of the basic philosophical problems underlying criminal law. Some of the topics we will consider include the preconditions for criminal responsibility and punishment, why we punish, and which conditions might excuse punishment even when a person causes or intends harm.

<tr>
<td>LAW 7184</td>
<td>Domestic Violence Law</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>This course is an introduction to the legal, social, and policy issues involving domestic violence. The course will examine federal and state laws addressing domestic violence, as well as explore the social, psychological, and cultural issues that are involved in domestic violence and that affect the legal representation of parties in domestic violence cases.</td>
</tr>
<tr>
<td>LAW 7186</td>
<td>Education Law</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>A study of the role that law plays in shaping basic education in the United States. The course will examine the interrelationship of law and education policy, the part played by the courts in school governance, and the role of the federal government in the educational system.</td>
</tr>
</tbody>
</table>
LAW 7187  Business Torts  
CREDIT HOURS  2.0 OR 3.0  
DESCRIPTION  This course surveys economic tort claims and other remedies that may be available for commercial disputes, including bad faith breach of contract, conversion, tortious interference with contracts and prospective business relationships, misrepresentation and fraud, breach of fiduciary duty, unfair and deceptive trade practices, Civil RICO and conspiracy.

LAW 7190  Seminar in Education Law  
CREDIT HOURS  2.0 TO 3.0  
DESCRIPTION  An in-depth study of selected topics in education law. Students will explore legal issues through assigned readings, class discussion, collaborative exercises, class presentations, and individual written papers. Topics may include issues related to early childhood, K-12, and higher education. The course may be used to satisfy the writing requirement.

LAW 7191  Employee Benefits  
CREDIT HOURS  2.0 TO 3.0  
PREREQUISITES  LAW 7095  
DESCRIPTION  Survey of the taxation and other legal principles applicable to the basic forms of retirement plan arrangements, including qualified and non-qualified plans, defined benefit and defined contribution plans, individual retirement arrangements, and multi-employer plans. When taught in the three-hour format, course will include a study of employee welfare benefit plans, including medical benefit plans and cafeteria plans.

LAW 7192  Eminent Domain and Taking Seminar  
CREDIT HOURS  2.0  
DESCRIPTION  This course will examine Eminent Domain and Regulatory Taking issues. The seminar will focus on state and federal legislation, and governmental practices, within the framework of both constitutional authority and constitutional restraint. Substantive and procedural aspects of taking law will be explored through the study of judicial applications in a variety of specific areas, such as environmental regulations, exactions on development, and zoning restrictions.

LAW 7193  General Employment Law  
CREDIT HOURS  2.0 TO 3.0  
DESCRIPTION  Examines the expanding body of state and federal law as it affects the modern employment relationship and the conflict between traditional employer prerogatives and individual employee rights. This course will not duplicate the coverage in labor law or employment discrimination. Each of these courses is freestanding and may be taken without the others.

LAW 7195  Employment Discrimination Law  
CREDIT HOURS  2.0 TO 3.0  
DESCRIPTION  A study of the major federal laws barring discrimination in employment, with emphasis on Title VII of the Civil Rights Act and the Age Discrimination in Employment Act. The course will examine the procedures, methods of proof and defenses in discrimination cases, and address special problems in the areas of affirmative action, testing, gender discrimination, and remedies.
LAW 7197  The Law of Electronic Commerce  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
This course explores the legal issues involved in conducting electronic commerce. Topics include the following: Setting up a web site from which to conduct business, obtaining a domain name, determining liability for content, and complying with legal requirements of privacy and security. Students learn the law which regulates electronic transactions including sale of goods, licenses of software and information, and electronic payments. The course also examines issues which arise when disputes occur, such as jurisdiction, choice of law, and alternative dispute resolution of on-line disputes.

LAW 7199  The Law of Democracy  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
This course explores the law regulating our political process, the principles that shape our political institutions and the relationship between democratic procedures and contemporary politics. With a primary focus on constitutional and federal law, the course examines topics such as individual rights of access to participation in the political process, the role of associations such as political parties and the regulation of party primaries, as well as topics such as redistricting, political and racial gerrymandering, voting rights, campaign finance, the use of direct democracy, and alternative voting systems.

LAW 7200  Environmental Law  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
A survey of legal principles and policies relating to the development, protection, and enhancement of the physical environment. Attention will be given to the judicial review of agency decision making, pollution control, hazardous waste and resource management, energy development and allocation, and conservation.

LAW 7201  International Environmental Law  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
This course is concerned with the international legal response to environmental problems. The course covers comparative environmental law, major multinational treaties (and their enforcement regimes) addressing global environmental problems, and the issues concerning the "conflict" between international trade and international and domestic environmental and natural resource protection.

LAW 7202  Selected Topics in Environmental Litigation  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
This course will examine the problems, and current and potential legal responses to, the disproportionate distribution of environmental harms in our society. It may be taught as a seminar.

LAW 7203  Natural Resources and Water Law  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
This course will provide an overview of present and future law and policy issues relating to the utilization of natural resources, particularly the water resource. Both federal and state materials will be utilized. We will focus our attention on law and policy issues relating to (1) mineral resources, (2) timber resources, (3) public lands (4) coastal zone management, (5) public outdoor recreation, (6) endangered species, and (7) water resources.

<tbody>
<tr>
<td>LAW 7204</td>
<td>Urban Environmental Law Seminar</td>
<td>2.0 TO 3.0</td>
<td>LAW 5050, LAW 7200 or LAW 7203</td>
<td>This seminar will examine the range of environmental issues facing urban areas, exploring the extent to which it is appropriate to legislate and regulate solutions for urban environmental problems differently than for non-urban (rural, agricultural, e.g.) areas. To this end, the seminar not only will study topics like improving air quality and providing clean water in urban areas, but also the inter-relation of such goals with transportation and growth management, and urban and public health planning. Additional topics will include lead poisoning, indoor air pollution, brownfield reclamation, environmental justice and emergency preparedness for environmental contamination. Federal and state statutes and regulations will be evaluated throughout the seminar, as will local ordinances. To the greatest extent possible, the seminar will evaluate the Atlanta metropolitan area as a case study for the topics covered.</td>
</tr>
<tr>

<td></td>
<td>Survey of estate and gift taxation with primary emphasis on federal tax law in these areas.</td>
</tr>
<tr>
<td>LAW 7206</td>
<td>Comparative Environmental Law: Urban Issues</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>Examines Brazilian legal and regulatory responses to issues such as urbanization and its threat to the biodiversity of the Atlantic Rainforest, water and wastewater management in a less developed country, the use of international and legal instruments to improve urban air quality, ecosystem conservation, and environmental education. Brazilian experience and efforts will be compared to U.S. and other legal responses where relevant.</td>
</tr>
<tr>
<td>LAW 7207</td>
<td>Environmental Health Law &amp; Policy: Comparative Perspectives</td>
<td>3.0</td>
<td></td>
<td>Examines a range of legal and policy responses to questions of environmental health law and policy in Rio de Janeiro. In conjunction with graduate students in public health, students are asked to consider appropriate legal, regulatory and policy responses to a range of environmental health challenges, from the effects of pesticides on consumers to efforts to control communicable and insect-born disease. Because this course is offered abroad, students are also asked to consider the appropriate role of foreign lawyers and policymakers in formulating appropriate responses to the environmental health challenges studied.</td>
</tr>
<tr>
<td>LAW 7208</td>
<td>Cross-Cultural Communication in International Dispute Resolution</td>
<td>3.0</td>
<td></td>
<td>Taught in Rio de Janeiro, Brazil. Surveys the impact that culture has on international dispute resolution processes. This course will explore cultural differences in social customs, business practices, religious and ethical values, and language in the context of various dispute resolution processes through classroom discussions, simulations and role plays. Students will develop and enhance their skills in critical thinking, listening and cross-cultural communications and will have the opportunity to learn about and observe the use of these skills with lawyers and other professionals in Rio.</td>
</tr>
</tbody>
</table>
**LAW 7209  Creative Conflict Prevention and Community Improvement**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Taught in Rio de Janeiro, Brazil. Will study creative responses to community conflict in Rio and other Brazilian communities and will examine their impact on law and society. The course will offer students the opportunity to examine and discuss the dispute resolution design process with professionals and to visit Brazilian community programs to observe firsthand active conflict prevention programs.

**LAW 7210  Estate Planning Seminar**

**CREDIT HOURS** 2.0 TO 3.0  
**PREREQUISITES** LAW 7510  
**DESCRIPTION** In-depth coverage of selected topics related to the planning of estates, including planning for intrafamily transfers, use of the marital deduction, charitable giving, retirement plan benefits, life insurance, owners of closely held businesses, estate-freezing techniques, postmortem planning, and international estate planning. Student writing project is designed to satisfy the legal writing requirement.

**LAW 7216  Family Law**

**CREDIT HOURS** 2.0 TO 3.0  
**PREREQUISITES** LAW 5011 and LAW 5050  
**DESCRIPTION** A study of the law relating to the creation, functioning, and dissolution of the family as a unit, with a focus on marriage, family obligations, divorce, annulment, child custody, and property division. Other topics may include adoption, legitimacy, and procreation.

**LAW 7220  Family Law Seminar**

**CREDIT HOURS** 2.0 TO 3.0  
**PREREQUISITES** LAW 7216  
**DESCRIPTION** A seminar on selected problems in family law. A paper is required.

**LAW 7222  Federal Tax Policy Seminar**

**CREDIT HOURS** 2.0 OR 3.0  
**PREREQUISITES** LAW 7095  
**DESCRIPTION** This seminar examines the legal, economic, and political considerations relevant to formulating federal tax policy. Specific topics will vary from year to year but may include the nature of the income tax, tax expenditures, using tax rules to achieve nonrevenue objectives, equity and efficiency issues, alternative tax regimes, wealth transfer taxes, taxation of international income, fundamental tax reform, tax compliance and enforcement, and current tax policy legislative initiatives. Grades will be based on participation in weekly class discussions and preparation of a substantial (25+-page) paper on an approved federal tax policy topic. The paper produced in this course will satisfy the College of Law’s Upper Level Legal Writing Requirement. Enrollment limited to 16. Pre- or co-requisite: Basic Federal Taxation I (2-3 credits).

**LAW 7225  Federal Courts**

**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** The study of the federal constitutional and statutory provisions establishing and regulating federal courts. Topics treated include the "case and controversy" requirement, federal subject matter jurisdiction and its regulation by Congress, original and removal jurisdiction, the law applied in federal courts in civil actions, and the rules of procedure followed in federal courts.

</tbody>
</table>
LAW 7244  Public Health Law
CREDIT HOURS
2.0 TO 3.0
DESCRIPTION
This course provides an introduction to legal issues in public health practice. It addresses the legal authorities for intervention in public health practice, and surveys a variety of federal, state, and local laws and policies affecting public health. Law's role in preventing disease, injury, and disability is explored through particular topic areas such as reproductive health, environmental hazards, workable health, sexually transmitted diseases, tobacco-related illness, vaccine-preventable diseases, and injury control.

LAW 7245  Immigration Law and Practice
CREDIT HOURS
2.0 TO 3.0
DESCRIPTION
A study of the immigration, nationality, and naturalization laws of the United States. Among the topics to be discussed are: the immigrant selection system, the issuance of nonimmigrant and immigrant visas, grounds of excludability of aliens and of waiver of excludability, grounds for deportation, change of status within the United States, administrative procedures, administrative appeals, judicial review, nationality by birth and by naturalization, revocation, and naturalization and expatriation. appeals, reviewing proposed administrative decisions, and researching in preparation and support of writing appellate briefs and memoranda to the Board of Immigration Appeals in Washington, D.C. Where permissible, third-year students may present selected cases under the supervision of a staff attorney.

LAW 7247  Health Legislation and Advocacy I
CREDIT HOURS
3.0
DESCRIPTION
This course is the first of a two-semester sequence. It examines the process by which proposed legislation becomes enacted into law at the state level, including drafting, legislative organization and procedure, ethics and lobbying, and the appropriations process. It will focus on health-related legislation, policy and advocacy. Students will have the opportunity to work with a community partner (such as a non-profit health advocacy group, health related government agency, or non-profit health-related enterprise) on a written project that relates to upcoming proposed health-related legislation in the Georgia General Assembly, that proposes new legislation, or that involves other legislation-related health policy or advocacy issues. Students who enroll in LAW 7247 must also enroll in LAW 7248 in the succeeding semester.

LAW 7248  Health Legislation and Advocacy II
CREDIT HOURS
3.0
DESCRIPTION
This course is a continuation of Health Legislation and Advocacy I. Under the instructor's supervision, students will work with their community partners to track proposed health related legislation or policy, provide legal research for use during the General Assembly's session, prepare testimony, briefings, or other assistance during the session, and work with the relevant legislative committees and other 'players' in the legislative process.
LAW 7249  Genetics and the Law
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This course explores legal and policy issues that arise in the context of the new biotechnologies that incorporate genetic analysis. Topics include the history of genetic research in the U.S., the Human Genome Project, genetic privacy, DNA as a forensic tool, and the role of genetics in new biotechnologies related to reproduction, medical treatment and research, genetic engineering, and pharmacogenetics.

LAW 7251  Law and Social Welfare
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION Formerly Public Interest and Social Welfare Law. This course is an introduction to the laws and policies that address social welfare and poverty in American society. The course will explore state and federal laws addressing social welfare, including welfare reform, benefit programs, Medicaid, Medicare, food stamps, consumer fraud, problems of the uninsured, and access to appropriate education, affordable housing, and safe environments. The course will also include an examination of the nature of poverty, socio-economic inequalities in U.S. society, and the challenges faced by those who provide legal representation to economically disadvantaged and other vulnerable populations.

LAW 7252  Human Rights and Children
CREDIT HOURS 2.0 OR 3.0
DESCRIPTION This course explores the status of the child under international law, the rights of the child under international and regional human rights conventions, and mechanisms available for enforcing such rights. The course begins with an overview of these issues. The course will then focus on selected issues, including trafficking of children, commercial sexual exploitation of children, child labor, children in armed conflict, juvenile justice, and rights to health care and education. In examining each of these specific issues, we will explore the relevant human rights law, efforts to enforce such law, and shortcomings in the existing legal regimes. Case studies will be drawn from a number of countries. In addition, special attention will be given to the U.S. approach to child rights generally and to the specific topic issues explored in the course.

LAW 7253  Human Subjects Research
CREDIT HOURS 2.0 OR 3.0
DESCRIPTION This course examines legal and ethical considerations in research with human subjects. We will explore in detail the ethical and regulatory framework that governs human subjects research in the U.S., including the historical basis that led to the adoption of the regulations, how that history shaped the current regulations, and how new technologies, such as genetic technologies and stem cell research, challenge the regulatory framework.
LAW 7254  Seminar on Public Health Law in Historical Context: Vaccination, Quarantine, and the War on STDs

CREDIT HOURS  2.0 OR 3.0
PREREQUISITES  LAW 7243, LAW 7244, or LAW 7253, or with the written permission of the instructor
DESCRIPTION  This seminar will focus on themes that have appeared in the history of public health law and research, as analyzed in several key publications. It will give students a general introduction to how the unique powers associated with public health law, such as the potential use of coercion in the application of medical interventions on both an individual and population basis, have developed. It will also engage students in an exploration of the role of the government, the scientific establishment, and individual scientists/investigators who were involved in two now discredited research programs carried out by the US Public Health Service. The seminar will culminate in student research projects that will generate a paper and a class presentation. The paper will fulfill the upper level writing requirement.

LAW 7255  International and Comparative Health Law

CREDIT HOURS  2.0 OR 3.0
DESCRIPTION  This course explores the developing field of international health law. The course will examine the legal, ethical, and political issues that arise in the context of addressing current challenges to global health, and look at the role played by governments, the private sector, and Non-Governmental Organizations (NGOs) in meeting the health needs of the world’s population. The course will focus on contemporary legal responses to issues such as global disparities in health; public health emergencies; pharmaceuticals and the balancing of trade and public health considerations; health and human rights; and infectious diseases.

LAW 7256  Independent Research

CREDIT HOURS  1.0 TO 3.0
DESCRIPTION  No more than two credit hours will be counted toward graduation requirements. Students may in their senior year undertake a project which involves investigation, research, and scholarship and culminates in a research paper of publishable quality, as determined by their supervising faculty member. Independent research may satisfy the writing requirement, but only if taken for two credit hours.

LAW 7257  Health Fraud & Abuse

CREDIT HOURS  2.0 OR 3.0
DESCRIPTION  This course will focus on real world experience of prosecuting and defending healthcare fraud cases. It will cover the key statutes and regulations, including the False Claims Act, Stark law, Anti-Kickback Statute and more; nuts and bolts of a healthcare fraud investigation; as well as insight into client counseling and professional responsibility concerns in the fraud and compliance space. The course will provide students with opportunities to hone litigation drafting and oral argument skills while applying the substance of the course.
LAW 7258  Legal Preparedness for Public Health Emergencies

Description:
This course focuses on laws and policies related to preparedness for and response to public health emergencies. Students will be introduced to the different types of public health emergencies, including contagious disease outbreak, natural disasters, and bioterrorism; explore the authority and limitations of federal/state/local government to respond, as well as decision-making structure and processes; and examine the legal and ethical issues that arise during emergencies such as allocation of scarce resources; credentialing of health care workers and other volunteers across state lines; liability of emergency response; and consideration of special populations such as Native Americans, children, elderly, and persons with special needs. Students will participate in several case studies or hypothetical table-top exercises, commonly used in emergency response to test policies and plans.

CREDIT HOURS
2.0 TO 3.0

LAW 7259  Great Cases in Bioethics

Description:
The field of Bioethics has developed over the past thirty years as a product of several shifts in American cultural consciousness, particularly in the role of doctors as they relate to patients. An ongoing conversation about the impact of law in shaping medical practice also influenced the current complexion of Bioethics as an area of study. A number of legal cases stand as signposts for critical moments in the history of Bioethics. They mark the changing public perception of the intersection of science, medicine, personal values and law. This seminar explores approximately one dozen of those cases, in areas such as reproduction, medical confidentiality, withdrawal and withholding of treatment, and definitions of death. Students should be prepared to participate in class discussion, complete a major class presentation as well as a seminar paper on a topic of their choice.

CREDIT HOURS
2.0 OR 3.0

LAW 7260  Special Topics in Bioethics

Prerequisites:
LAW 6030

Description:
Examines issues in Bioethics.

CREDIT HOURS
2.0 TO 3.0

LAW 7266  Insurance Law

Description:
From a perspective of the history and development of the principles governing insurance contracts and the state regulation of the business of insurance, this course will consider the issues associated with the fundamental principles of insurance law, insurable interest, formation and structure of insurance policies, insurance contract interpretation, insurance agency, duties of insurers and policyholders, an analysis of policies and related issues arising from property insurance, liability insurance, automobile insurance, life insurance and disability insurance and a study of the principles of insurance bad faith.

CREDIT HOURS
2.0 TO 3.0

LAW 7268  International Intellectual Property

Description:
Intellectual property lawyers face a variety of issues that transcend national borders. This course introduces the principles, treaties and institutions that regulate intellectual property rights at the international level, and surveys major cross-border issues in intellectual property with a focus on copyright, patents and trademarks.

<tr>
<td>LAW 7273</td>
<td>International Law</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>This course surveys the basic principles of law governing, primarily, the legal interrelationships of sovereign states within the context of the global legal order. Considered are the origins and sources of public international law; participation in the international legal order; the legal implications of the doctrine of sovereignty over land, sea, and air; jurisdictional aspects of international law; international obligations; the resolution of international disputes; and the law of international cooperation.</td>
</tr>
</tbody>
</table>
LAW 7274  International Criminal Law
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION Jurisdiction in international criminal law, specific applications (e.g., Foreign Corrupt Practices Act, Money Laundering, Terrorism), procedural issues (e.g., mutual assistance, extradition), and international courts. At the discretion of the instructor, International Criminal Law may be offered as a seminar with a research paper required.

LAW 7275  International Business Transactions
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION A systematic approach to legal problems arising in transactions that involve entities operating in two or more nations. As well as examining international trade accords and relevant commercial law, this course surveys United States law, practice and procedure relating to the import and export of goods and transnational flow of services.

LAW 7276  Seminar in European International Commercial Arbitration
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This seminar is intended to serve as an introduction to the basic legal concepts, doctrines and principles that are relevant to the current status of international commercial arbitration as a dispute resolution mechanism alternative to litigation in national court systems. Course objectives include familiarizing the student with the basic features of the modern system of international commercial arbitration and examining the transnational framework of international commercial arbitration, including its regulation in selected foreign legal orders. (Taught in summer abroad program in Austria).

LAW 7277  International Human Rights
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION An introduction to international human rights law and institutions. This course deals with the development of the international protection of human rights and focuses on the work of the United Nations, the Council of Europe, and the role of nongovernmental international human rights organizations and the human rights policy of the United States.

LAW 7278  International Human Rights Seminar – Immigration
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION A seminar on selected problems in international human rights law. A paper is required. Public International Law or International Human Rights is helpful but not required.

LAW 7280  International Moot Court
CREDIT HOURS 1.0
DESCRIPTION This course is open to those students chosen to represent GSU College of Law in the annual Jessup International Law Moot Court Competition.
LAW 7281  
**International Human Rights: Practical Applications Seminar**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** At least two classes relating to international law and/or human rights, one of which must be LAW 7273 or LAW 7277.  
**DESCRIPTION** The objective of this course is to give students an opportunity to integrate their knowledge about international human rights law with the fundamentals of civil and criminal procedure, constitutional law, evidence, and professional responsibility in a real-world context. Each year the course will focus on a contemporary human rights issue and, to the extent possible, the students will assess the situation and develop a work product as if they were representing the "client" at issue. Limited enrollment. Admission only by application and permission of professor. Applicants must have a cumulative GPA of at least 2.30 at the time of enrollment.

LAW 7282  
**International Human Rights: Practical Applications Seminar**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** At least 2 classes relating to international law and/or human rights, one of which must be LAW 7273 or LAW 7277. The objective of this course is to give students an opportunity to integrate their knowledge about international human rights law with the fundamentals of civil and criminal procedure, constitutional law, evidence, and professional responsibility in a real-world context. **CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** Please contact Professor Saito for details at nsaito@gsu.edu.

LAW 7285  
**International Trade Seminar**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** This seminar is intended for students who have developed an understanding of the international legal process through prior course work or who, by virtue of unique personal experience, are capable of dealing with advanced issues of international law in the field of economic and business regulation. The focus of the seminar will vary, but possible topics might include the United Nations Code of Conduct on Transnational Corporations, the Organization for Economic Enterprises, the United Nations Commission on Trade and Development Code of Conduct on Restrictive Business Practices and its Code on Transfer of Technology, and the International Labor Organization Tripartite Declaration on Multinational Enterprises and Social Policy.
LAW 7288
International and Foreign Legal Research
CREDIT HOURS
2.0
DESCRIPTION
This course will provide an overview of international and foreign legal research. Students will receive a solid grounding in the practical skills and knowledge required for research in these areas. Foreign legal systems, international treaties, intergovernmental organizations and other related topics will be addressed. Theoretical principles -- such as developing cost-and time-efficient research strategies -- will also be covered. Electronic resources will be the primary focus of the class, though students will learn about, use and evaluate print resources as well. Students will be evaluated based on legal research assignments, in-class presentations and a take-home exam which tests their understanding of research tools and ability to perform foreign and international legal research tasks.

LAW 7289
International Law and U.S. Foreign Relations
CREDIT HOURS
2.0 TO 3.0
DESCRIPTION
This course examines the intersection between international law, U.S. law, and U.S. foreign policy. It centers on case studies, including Guantanamo Bay and the torture memos, the U.S. posture towards the International Criminal Court, and the invasion of Iraq, alongside the international news of the day. By working through such controversies, students will be exposed to competing international and domestic interpretations of sovereignty, the use of force, the role of the Security Council, the authority of the International Court of Justice, and even the nature of international law itself. Discussions of foreign policy will be grounded in core provisions of international law and U.S. law. International Law and U.S. Foreign Relations.

LAW 7291
Interviewing and Counseling
CREDIT HOURS
2.0 TO 3.0
DESCRIPTION
This course is designed to help students understand and develop skills in interviewing and counseling methods and techniques. Students will learn through reading, discussion, extensive role-playing, and self-reflection. Students will also learn to develop strategies for addressing moral and ethical issues which can arise when interviewing and counseling clients in different legal contexts. Enrollment may be limited.

LAW 7293
Seminar On Judicial Power
CREDIT HOURS
2.0 TO 3.0
DESCRIPTION
This seminar will explore the subject of judicial power by comparing the United States with other democracies in the world, in particular the world's largest democracy, India. Topics may include judicial activism, especially in regard to the presidential election and impeachment, access to justice, the right to liberty and due process, and affirmative action. The seminar will meet weekly for part of the semester with assigned readings from both U.S. and non-American materials. A final paper (minimum 25 pages) is required. Students are expected to do independent research for the final paper. (Note: all materials relating to the Indian legal system are in English.) Individual instructor- student conferences on paper topic selection may take place at the initiative of either student or instructor. Failure to prepare for and attend class regularly may result in required withdrawal from the course. The course grade will be based on the final paper, class presentations and class participation.

1.624
**LAW 7328  Law and Business of Immigration**

**CREDIT HOURS**
2.0 OR 3.0

**PREREQUISITES**
Recommended but not required as prerequisites: LAW 7245, LAW 7521, LAW 7193, LAW 7195, or LAW 7191.

**DESCRIPTION**
This course examines the intersection of immigration, labor, and employment issues from law and business perspectives. Using both legal analysis and business school-type case studies, the course introduces major areas of labor and employment law and explores the rights of immigrant workers under each area of law. The course also covers business immigration, including visas available to skilled and unskilled foreign workers and employers' obligations to verify workers' immigration status. Finally, the course examines international labor supply and demand issues from the perspectives of workers and employers. The course is interdisciplinary and highly participatory, and will expose students both to doctrinal legal questions and to the realities of employing and representing, immigrant workers.

**LAW 7330  Law and the Elderly**

**CREDIT HOURS**
2.0 TO 3.0

**DESCRIPTION**
A study of legal problems that are common to elderly clients, including Social Security, SSI, Medicare, nursing home law, pensions, and age discrimination. This course may also consider issues relating to guardianships, conservatorships, housing problems, voluntary euthanasia, and abuse of the elderly.

**LAW 7331  Law and Health Equity**

**CREDIT HOURS**
3.0

**DESCRIPTION**
This course is an introduction to understanding socioeconomic causes of chronic and mental health illnesses in low-income and minority communities, and will emphasize the need for legal solutions to such diseases. In this course, the students will analyze the applicability of current laws, policies and regulations in creating safe and healthy neighborhoods for vulnerable populations. Students will work with Neighborhood Planning Units (NPUs) as community partners in order to assess the impact of and provide recommendations for the mitigation of health disparities in underserved communities in the Atlanta area.

**LAW 7333  Law and the Internet**

**CREDIT HOURS**
2.0 TO 3.0

**DESCRIPTION**
This course will introduce students to use of the Internet as a resource for legal research; to legal issues arising on the Internet (e.g., privacy, censorship, security, e-mail fraud); and to ways to make substantive legal information available to others on the Internet.
LAW 7335  Law and Literature  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
Literature can provide a humanistic perspective for understanding law, affording insights into the nature of law and social justice. This course will examine the interplay of law and literature primarily through texts about crime and punishment. Each class will explore one or more interrelated themes, including the tension between law and equity, authority and legitimacy, retribution and redemption, civic duty, revenge and betrayal. Readings will include works by Sophocles, Shakespeare, Melville, Conrad, Camus, Fugard, Traver, Glaspell and others. Students will be required to write three short papers during the semester and one substantial final work which, if satisfactory, may be used to fulfill the upper level writing requirement.

LAW 7336  Fundamentals of Law Practice  
CREDIT HOURS 4.0  
DESCRIPTION  
Students will learn practice skills and ethical decision making through simulating the work of a small, general practice law firm. The course grade will be based on written work, performance in simulation exercises, class participation, and performance in simulation exercises and actual client representation. Enrollment is limited and consent of the instructor is required.

LAW 7339  Managing Corporate Integrity  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
This course introduces management and law students to the fundamental issues and current best practices in managing legal/ethical compliance and corporate social responsibility. Topics and cases will cover both domestic and international business issues. Special attention is given to preparing law and management students to understand and manage the demands on U.S. and international corporations making complex business decisions on the face of increasing expectations for transparency and accountability. Structured around real-world cases that simulate the challenges of today’s domestic and global markets, the course equips students to manage and integrate the differing perspectives of lawyers and managers. The course uses focused readings in law and management, interactive case-studies, simulations, and class discussions that include presentations by corporate executives. Prior study of Corporations and Professional Responsibility recommended, but not required.

LAW 7341  Law and Mental Health  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION  
Formerly Law and Psychiatry. An examination of the interrelationship of law and psychiatry and the role of psychiatric experts in the legal process. The course will address civil aspects of mental health law such as commitment of the mentally ill, competency, testamentary capacity, and the law of psychic damages; and, criminal aspects of forensic psychiatry including criminal responsibility, competency to stand trial, juristic psychology, dangerousness determinations, and coerced behavioral change.
### LAW 7349  Law and Religion

**CREDIT HOURS**
2.0 OR 3.0

**DESCRIPTION**
This course will present an exploration of the historical formation and current judicial interpretations of the establishment and free exercise clauses of the First Amendment, as well as the theories of church and state, and religion and law, that support and contest these interpretations. The course will also compare and contrast the prevailing models of these protections in Europe and the United States, as well as explore intersections of law and religion, including the effect of religion on law and of law on religion, the degree to which law should accommodate religious beliefs and practices, the concept of legal pluralism, and the secularization of the American legal system.

### LAW 7350  Law Review

**CREDIT HOURS**
1.0

**DESCRIPTION**
One hour per semester for a maximum of five hours. For upper-level students who serve on the editorial board or as candidates for the Georgia State University Law Review. By invitation only.

### LAW 7355  Law and Emerging Technologies

**CREDIT HOURS**
2.0 TO 3.0

**DESCRIPTION**
Limited enrollment. This seminar will examine various technological developments in areas such as medicine, agriculture, energy, and information technology and explore the legal frameworks pertaining to these technologies while highlighting the legal challenges. Students will be required to complete a paper on an approved topic.

### LAW 7357  The Law of Social Enterprise

**CREDIT HOURS**
2.0 TO 3.0

**DESCRIPTION**
This course will cover the existing and developing law of "social enterprise." Although there is no universally accepted legal definition of "social enterprise," the term generally refers to using market-based approaches (such as selling products or services) to solve complex social problems, instead of using more traditional, and primary charitable, methods to solve such problems. The principal focus of the course will be upon federal and state laws that are uniquely applicable when an organization engages in social enterprise. For example, the course will consider laws limiting the conduct of commercial activities by nonprofit organizations as well as laws requiring for-profit organizations to maximize shareholder wealth, even when doing so is arguably detrimental to employees, the environment, the community or other stakeholders. Successful completion of at least one of the following courses is a prerequisite, although it may be taken concurrently with this course: Corporations, Unincorporated Business Associations, Business Tax, or Nonprofit Organizations.

</thead>
<tbody>
<tr>
<td>LAW 7363</td>
<td>History of the Common Law in England and America</td>
<td>2.0 TO 3.0</td>
<td>This course examines the origins, development and characteristics of core Anglo-American legal concepts and institutions. Using primary source materials (cases, statutes, codes, ordinances) and occasional narrative overviews for context, the course explores how and why fundamental Anglo-American legal concepts (e.g., trespass) and legal institutions (e.g., jury) have changed over time due to complex social, economic, and religious factors. The course will help students situate Anglo-American legal doctrines and institutions within their historical context and illuminate how modern American legal practice and jurisprudence has been shaped by the past. The course is interdisciplinary and highly participatory, and will expose students to the realities of internal and external legal change.</td>
</tr>
<tr>
<td>LAW 7364</td>
<td>Seminar in Georgia Legal History</td>
<td>2.0 TO 3.0</td>
<td>This seminar introduces the student to basic principles of historical methodology and historiography and to selected legal aspects of primary names in Georgia history drawn from sources in the colonial and revolutionary period; the western and expansion of the State and the growth of sectionalism, the War of 1861-1865 and Reconstruction; the emergence of modern Georgia in the twentieth century. Resources in the seminar encompass a special emphasis on the use of primary and secondary materials traditionally associated with historical inquiry as well as with resources customarily employed in legal research.</td>
</tr>
<tr>
<td>LAW 7365</td>
<td>Legal History</td>
<td>2.0 TO 3.0</td>
<td>A study of the origins, development and characteristics of American legal institutions and the basic themes in American law which have shaped practice and jurisprudence.</td>
</tr>
<tr>
<td>LAW 7375</td>
<td>Legislation</td>
<td>2.0 TO 3.0</td>
<td>An examination of the legislative process and statutory interpretation, including examination of how legislation is enacted; constitutional limitations upon legislative enactments; amendment, revision and repeal; the interrelationship between courts and legislatures; and the interpretive process and the principles and techniques which guide courts in that process.</td>
</tr>
<tr>
<td>LAW 7380</td>
<td>Legislative Drafting Seminar</td>
<td>2.0 TO 3.0</td>
<td>The principal focus of this course is on the development of skills in (1) the drafting of statutes and/or ordinances, (2) advocacy in the legislative process, and (3) advocacy in the interpretation of statutes and ordinances. Weekly problems in interpretation and/or drafting will be assigned and discussed in a seminar setting.</td>
</tr>
<tr>
<td>LAW 7385</td>
<td>State and Local Government Law</td>
<td>2.0 TO 3.0</td>
<td>Formerly Local Government Law. This course examines the relationship between local, state, and federal governments. It includes a study of the sources and limits of local government authority in the context of constitutional and statutory law. Among the topics considered are delegation of state authority, government spending and financing, conflicts and preemption, the use of special purpose government entities, and annexation and incorporation.</td>
</tr>
</tbody>
</table>
LAW 7386 Advanced Local Government Law
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 7385 or LAW 7320 recommended but not required.
DESCRIPTION This course will provide an opportunity for in-depth study of one or more Local Government Law issues that may include, but are not limited to: public finance, taxation, bond issuance, and revenues; state and local government structures, including municipal incorporation, annexation, regionalism, consolidation, dissolution, and federation; exercise of local government powers, including land use powers; home rule and preemption; intergovernmental conflicts and cooperation; transfer of functions and delegation of governmental power; and privatization of public services and outsourcing. This course may be taught in seminar format.

LAW 7390 Mass Communications Law
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION Topics to be covered may include broadcast and cable rules and regulations, free press and fair trial, libel, privacy and the press, journalist’s privilege, the law of news gathering, and access and reply to the press.

LAW 7395 Mergers and Acquisitions
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION The law relating to transactions by means of which two or more corporations combine with but one corporate entity surviving, or in which one business entity obtains another by purchase, exchange, or the like.

LAW 7397 International Perspectives on Urban Law and Policy
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION International Perspectives on Urban Law and Policy is a course taught by visiting foreign or international law professors specializing in land use, planning, and environmental law, on the comparative legal aspects of metropolitan growth management and control as it affects the human, built and physical environments. This course is 2 credit hours with the option of an additional credit hour for writing a paper. The paper may be either independent research on a topic of your choice, or a paper written in conjunction with participation in a week-long Study Abroad offering (over Spring Break) focused on urban law and policy issues.

LAW 7405 Moot Court Board I
CREDIT HOURS 1.0
DESCRIPTION After having successfully completed Legal Bibliography and RWA, prospective Board members with overall GPA’s of 2.7 or higher are invited to participate in the group. Successful completion shall be deemed to be a grade of Satisfactory in Legal Bibliography and either an overall average of 2.7 or higher in RWA or a 3.0 or higher in the second semester of RWA. (For full details, consult bylaws of Moot Court.) Members will either be a part of Competition Teams or serve as Case Counsels who develop Appellate Advocacy problems. Academic credit is awarded to members.

LAW 7406 Moot Court Board II
CREDIT HOURS 1.0
PREREQUISITES LAW 7405
DESCRIPTION

LAW 7407 Moot Court III
CREDIT HOURS 1.0
DESCRIPTION
LAW 7408  Moot Court IV  
CREDIT HOURS 1.0  

DESCRIPTION

LAW 7410  Multistate Taxation  
CREDIT HOURS 2.0 TO 3.0  
PREREQUISITES LAW 7095  
DESCRIPTION An examination of state and local taxation, including requirements of uniformity and equality, ad valorem property taxes, sales and use taxes, due process restrictions, exemption and immunity from taxation, and tax procedures.

LAW 7411  Nonprofit Organizations: Law and Taxation  
CREDIT HOURS 3.0  
PREREQUISITES LAW 7095 (may be taken concurrently).  
DESCRIPTION This course will cover the corporate governance and tax issues that affect nonprofit organizations. The major topics discussed will include organization, state regulation, tax exemption, and restrictions on lobbying and political activity. The course will also examine private foundations, unrelated business income taxation, and charitable deduction rules. Approximately one-third to one-half of the course will focus upon state-law applicable to nonprofits (using the Georgia Code as a statutory model) while the remaining portion of the course will focus upon the taxation of nonprofits. Basic Federal Taxation is a pre-requisite, although it may be taken concurrently.

LAW 7413  National Security Law  
CREDIT HOURS 2.0 TO 3.0  
PREREQUISITES LAW 6000  
DESCRIPTION This seminar explores the constitutional architecture for the American national security enterprise and the role played by the three branches of government. Topics of study include the use of armed force to maintain the security of the nation and its consistency with statutory and constitutional constraints. Recent topics include anti-terrorism, anticipatory self-defense and preemptive war; targeted killing and the use of drones; intelligence gathering authority for the CIA, FBI and NSA and its constraint by the Fourth Amendment; the Foreign Intelligence Surveillance court system; data mining; detention of terrorists and military combatants; preventive detention; detention of material witnesses; extraordinary rendition, material support crimes; and trial by military commissions. Students are evaluated on the basis of an assigned paper or project. Papers may satisfy the writing.

LAW 7414  Negotiation  
CREDIT HOURS 2.0 TO 3.0  
DESCRIPTION Students may not enroll in this course if they have taken or are taking LAW 7060 - Alternative Dispute Resolution. This course provides the fundamentals of negotiation. It offers both a theoretical understanding of the negotiation process and practical skills of an effective negotiator. The course combines readings, simulated role plays and exercises, and written assignments.
**LAW 7415**  
**Partnership Taxation**  
**CREDIT HOURS** 2.0 TO 3.0  
**PREREQUISITES** LAW 7095  
**DESCRIPTION** This course will cover the federal income taxation of partnerships (including limited liability companies) from formation through distributions to liquidations. The tax implications to both the partners (or members) and the entity will be examined. The course will cover transfers of property to a newly formed or preexisting partnership or limited liability company; normal distributions; "inside" and "outside" basis adjustments; sales of partnership or membership interests; partnership and limited liability company liquidations and partner and member withdrawals. NOTE: The maximum number of credit hours a student may earn for taking any combination of LAW 7110, LAW 7415 and LAW 7127 is 4.

**LAW 7416**  
**Patent Drafting and Prosecution**  
**CREDIT HOURS** 1.0 TO 3.0  
**PREREQUISITES** LAW 7270 and/or LAW 7417  
**DESCRIPTION** Topics include types of patent applications, inventor interviews, analysis of prior art, preparation of the patent specification, claim drafting, inventorship/ownership determination, amendment practice, and argument practice, with coverage of U.S. law and regulations governing patent prosecution practice. A technical background is helpful, but not required, to take this course.

**LAW 7417**  
**Patent Law**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** An introduction to patentability, patent infringement, and patent and trademark licensing.

**LAW 7419**  
**Civil Pre-Trial Litigation**  
**CREDIT HOURS** 2.0 TO 3.0  
**PREREQUISITES** LAW 6030 and prior approval of the instructor.  
**DESCRIPTION** This capstone class involves aspects of tort law, procedural law, contract interpretation, statutory interpretation, and litigation skills such as mediation, depositions, negotiation, drafting and client counseling. It also exposes students to some of the business decisions that occur over the course of civil litigation. The class will be conducted primarily through simulation exercises. Limited enrollment.

**LAW 7420**  
**Products Liability**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** This course will examine the legal responsibility of product suppliers for harms caused by product defects and misrepresentations. Appropriate parties, causes of actions, and varieties of defects will be among the topics discussed.

**LAW 7421**  
**Georgia Products Liability Seminar**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION** This course will examine Georgia laws relating to the legal responsibility of product suppliers for harms caused by product defects and misrepresentations. Appropriate parties, causes of actions, and varieties of defects will be among the topics discussed.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAW 7423</td>
<td>Probate Procedure and Practice</td>
<td>2.0 TO 3.0</td>
<td>LAW 7510</td>
<td>This course will cover substantive Georgia law pertaining to the Georgia probate court system, including the following areas: subject matter jurisdiction; personal jurisdiction; venue principles; and process and service of process. In addition, the course will contain a skills component that is designed to familiarize students with the most common types of proceedings they will handle in probate courts, including the administration of intestate estates, probate of wills, will contests, year's support proceedings, guardianships of minors, and guardianships of incapacitated adults.</td>
</tr>
<tr>
<td>LAW 7425</td>
<td>Public International Law</td>
<td>2.0 TO 3.0</td>
<td></td>
<td>This course surveys the basic principles of law governing, primarily, the legal interrelationships of sovereign states within the context of the global legal order. Considered are the origins and sources of public international law; participation in the international legal order; the legal implications of the doctrine of sovereignty over land, sea, and air; jurisdictional aspects of international law; international obligations; the resolution of international disputes; and the law of international cooperation.</td>
</tr>
<tr>
<td>LAW 7433</td>
<td>Race, Ethnicity and the Law</td>
<td>2.0 TO 3.0</td>
<td>LAW 6000 recommended but not required.</td>
<td>Race has played a central role in American law from the Constitutional Convention through the civil rights movement to debates on affirmative action. This course will look at the evolution of &quot;race&quot; as a legal construct and its relation to ethnicity in our legal system. Examining cases, statutes, and analysis from diverse viewpoints, the course will consider the concept of a &quot;colorblind&quot; legal system in light of these historical developments.</td>
</tr>
<tr>
<td>LAW 7434</td>
<td>Racial Justice Seminar</td>
<td>2.0 OR 3.0</td>
<td></td>
<td>This seminar will use a contemporary or historic case study of racialized injustice as a lens through which students will examine the legal and social context in which such harms occur and the availability of remedies offered by statutory, constitutional, and international human rights law. It will include experiential learning opportunities. For example, depending upon the topic addressed, students will interview people affected by the issue, explore options for redress, and prepare materials that will or could be utilized to implement remedial measures. Writing credit will be an option.</td>
</tr>
<tr>
<td>LAW 7435</td>
<td>Real Estate Transactions</td>
<td>2.0 TO 3.0</td>
<td>LAW 5050</td>
<td>This is the basic course in conveyancing. The simple transfer of residential real estate is studied: listing agreements, contracts for sale, financing, closing, recording, and warranty obligations.</td>
</tr>
</tbody>
</table>
LAW 7437  Advanced Real Estate Transactions
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 7435
DESCRIPTION  This second-level elective in real estate integrates material from taxation, property law, and other related subjects in the context of major development projects. Typical large commercial developments such as shopping centers or office complexes are studied from acquisition, through construction to final financing arrangements.

LAW 7441  Regulated Industries
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  Governmental regulation of the selected industries not subject to the legal controls applicable to the economy at large: conventional public utilities such as gas, electric, telephone, and pipeline; domestic ground and air transportation; and mass communications. Aspects of these industries to be covered will include control of entry, determination of rates, and regulation of services and practices.

LAW 7445  Remedies
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  This course is concerned with the equitable and legal remedies which are available to protect property interests, personal interests, and business interests. In addition to its emphasis on protectable real and personal property interests, the course will also include: (1) examination of public policy considerations relative to urban housing problems, the control of nuisance, and the resolution of ownership controversies and attempts by contracting parties to alter damage rules; (2) remedies in employer-employee disputes; and (3) a miscellany of tortious interest protection including defamation, product disparagement, injury to feelings, and physical injury and death. Damage remedies, restitutitory remedies, and specific performance and injunctive relief will be the focus of the course.

LAW 7451  Sales
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 5011
DESCRIPTION  The study of commercial sales transactions with emphasis on Article 2 of the Uniform Commercial Code.

LAW 7453  Forensic Evidence
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 6010
DESCRIPTION  This course will examine selected topics in the forensic sciences devoted to the investigation and trial of both civil and criminal cases. Primary attention will be given to the investigation and trial of criminal cases. The course topics will consist of both legal and scientific aspects of the investigative and trial processes. Legal analyses will focus primarily on issues of criminal and civil discovery and the debate over the legal requirements for an area of forensic science to be utilized at trial.
LAW 7454  Forensic Medicine
CREDIT HOURS 2.0 OR 3.0
DESCRIPTION This is an interdisciplinary course exploring the interaction between the practices of law and medicine. The course highlights the challenges and advantages of using forensic medicine in legal proceedings and how it affects the fields of health and law. It addresses subjects such as toxic causation, disease epidemiology, vaccination litigation, paternalistic medicine, medical malpractice, fraud and abuse, government/ regime sponsored experiments, mental health problems, and issues associated with the beginning and end of life. In class, students will be able to identify controversy and common ground and work on problem-solving techniques in cases that both reply upon and sometimes criticize forensic medicine. The course will improve understanding about how law and medicine interact to create public policy and impact public perception. Students will write a final paper for the course that examines a specific area of forensic medicine and how the legal system has, continues to, and, in the future, will shape that practice.

LAW 7460  Securities Regulation
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 7101
DESCRIPTION The Securities Act of 1933 as well as portions of the Securities and Exchange Act of 1934. Requirements for registration under the 1933 Act as well as the exemptions therefrom. Rule 10(b) (5) liability as well as liability under Sections 11 and 12 of the 1933 Act.

LAW 7468  Sentencing
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This class will broadly examine the purposes, principles and practices of criminal sentencing in the United States. While federal sentencing law has received the most attention in recent years, particularly since the creation of the Federal Sentencing Guidelines, it is impossible to understand the current dynamics or the likely future trends of federal sentencing without also taking state practices into account. As such, this course will examine sentencing law and incarceration practices in both the federal and state systems. This course will also assess a variety of alternative sanctions, including the death penalty, probation, and various other judicial and administrative sanctions, as well as some of the collateral consequences that accompany criminal conviction.

LAW 7469  Society and the Supreme Court Seminar
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION This seminar takes an institutional look at the Supreme Court, exploring in detail the different facets of the Court’s procedures and operations. The course examines the nomination process; the process by which the court shapes and controls its docket; the process of deciding cases on the merits; and other institutional issues, including the role of the solicitor general, the role of the amici curiae briefs, and the relationship of the Court to the press and the public, etc.

</tbody>
</table>
LAW 7495  Refugee and Asylum Law
CREDIT HOURS 2.0 OR 3.0
DESCRIPTION
This course explores the international and domestic legal regimes for the protection of refugees and asylees. Topics include the history of the U.N. Convention on the Status of Refugees, the implementation of that convention through the U.S. Refugee Act of 1980 and subsequent related legislation, political and judicial efforts to define the extent of the protections afforded under international and domestic law, current proposals to amend the laws, and the practice of asylum law in the United States. The central goal of this course is to prepare you to represent an asylum seeker in the United States, while giving you a strong foundation in the laws that protect refugees and asylum-seekers. To this end, the course aims to: (1) give you a substantive basis in the law and the tools you need to answer questions of law that arise in your future practice; (2) orient you in the relevant procedures and highlight the skills you will need in order to meaningfully engage with clients seeking asylum; and (3) introduce you to issues in law and policy that your generation of lawyers must struggle with, and hopefully resolve. This class emphasizes learning by doing, so you should not only be prepared to participate actively in class discussion, but poised to engage in group exercises and the representation of a simulated client created for this class, which will occupy much of the second half of the course.

LAW 7496  United States Taxation of International Transactions
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 7095 and LAW 7110 or consent of instructor.
DESCRIPTION
Examines the income tax provisions of the United States Internal Revenue Code which affect international transactions and activities, including import, export, and performance of services.

LAW 7500  Water Rights
CREDIT HOURS 2.0 TO 3.0
PREREQUISITES LAW 5050
DESCRIPTION
Limited enrollment. This seminar will focus on the issues of law and policy arising in allocation of water resources. After introductory sessions dealing with basic legal principles involved in acquiring, maintaining, transferring, and adjudicating property rights in water, students will present in-class analyses of current topics in water resource allocation. Each student presentation will form the basis of a research paper to be completed within five weeks of the final class. Students are urged to begin consultation with the instructor to identify topic areas during the semester before the course offering.

LAW 7506  White Collar Crime
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION
A study of the prosecution and defense of persons for nonviolent crime for financial gain typically committed by means of deception and in the course and under color of legitimate economic activity.

LAW 7510  Wills, Trusts and Estates I
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION
Basic survey of the legal framework surrounding the transfer of property through intestate succession, wills, and trusts. Includes coverage of powers of appointment and an introductory overview of wealth transfer taxation.

LAW 7511  Fiduciary Administration
CREDIT HOURS 2.0 TO 3.0
DESCRIPTION
Issues relating to the transfer of property through wills and trusts (including coverage of future interests and the rule against perpetuities) and coverage of fiduciary administration and the probate process.
LAW 7515  Women and the Law
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  A survey of legal issues relating to women, including criminal law, gender discrimination, family law, special statutory programs, and constitutional law.

LAW 7521  Workers Compensation
CREDIT HOURS  2.0 TO 3.0
PREREQUISITES  LAW 5060
DESCRIPTION  An examination of common features of state workers' compensation statutes including concepts of accident, course of employment, injuries arising out of employment, and causation as well as related problems.

LAW 7599  The Future of Legal Education: Comparative Perspectives
CREDIT HOURS  1.0 TO 2.0
DESCRIPTION  Limited enrollment. Consent of the instructor required. This is a one-time course linked to the College of Law’s 25th Anniversary International Conference on the Future of Legal Education to be held in Spring 2008.

LAW 7600  Tax Law Clinic: Tax Court I
CREDIT HOURS  4.0
PREREQUISITES  LAW 7095
DESCRIPTION  This clinic will permit students to assist individual clients to prepare their cases for presentation before the Small Claims Division of U.S. Tax Court and before the administrative appeals offices of the Internal Revenue Service. Under appropriate supervision, students will provide advice in a wide range of matters arising under the Internal Revenue Code. They will interview clients, research legal issues, analyze facts, prepare protests and petitions. This course may be taken by a limited number of students, and students seeking to enroll must have an overall GPA of 2.30.

LAW 7601  Tax Law Clinic: Tax Court II
CREDIT HOURS  4.0
PREREQUISITES  LAW 7095 and LAW 7600
DESCRIPTION  This is a continuation of Tax Law Clinic Tax Court I. Students will handle the more advanced aspects of the cases developed in Tax Court I. Their activities will include actual presentation of taxpayer positions before the I.R.S. and arguing cases before the U.S. Tax Court. This course may be taken by a limited number of students, and students seeking to enroll must have a minimum GPA of 2.30.

LAW 7602  Investor Advocacy Clinic I
CREDIT HOURS  3.0
PREREQUISITES  2.30 GPA, successful completion of all first year courses, prior completion of Law 7801 Business Arbitration Practicum or concurrent enrollment in Law 7801 Business Arbitration Practicum
DESCRIPTION  Students in the Investor Advocacy Clinic will focus on the representation of small investors with claims against their brokers in FINRA mediation and arbitration. Under appropriate supervision, students will gain experience and knowledge in investigating potential claims, interviewing and counseling clients, preparing case documents, negotiating settlements and participating in the FINRA mediation and/or securities arbitration process. Students will also engage in community education and outreach to benefit potential investors. Participating students will have the opportunity, through live client representation and community outreach, to develop valuable lawyering skills and gain exposure to substantive business law issues as well as alternative dispute resolution methods. Enrollment is limited and students must obtain the permission of the instructor prior to registering for this course.

**DESCRIPTION**

**LAW 7631**

**CREDIT HOURS** 3.0  
**DESCRIPTION** Business transactions require well-crafted contracts that properly reflect and clarify the parties' intentions and anticipate various outcomes to the transaction, including counter-party risk assessment and risk transfer. Lawyers and businesspeople together must think these things through. This course will focus on anticipating and providing for contingencies, securing value in and licensing intellectual property, examining choices and options for the deal, obtaining collateral to secure the performance; consider appropriate contract forms; and address risk, liability indemnity and insurance to protect and accomplish the business purpose. Students will draft and assess contracts (both actual and fictional) for goods, services, secured transactions, real estate, construction, and international contracts to illustrate the application and range of contract and risk practice.

**LAW 7632**

**CREDIT HOURS** 2.0  
**PREREQUISITES** LAW 6020  
**DESCRIPTION** An introduction to the in-house practice of law and the different practical and ethical issues faced by in-house attorneys. The course will focus on the role of the in-house legal function in a corporation; the structure and management of corporate legal departments; the relationships between the legal department, corporate management and the board of directors; attorney-client privilege, internal investigations, and advising and counseling internal business clients; retaining and managing outside counsel; corporate compliance and enterprise risk management; and professional responsibility and ethics issues for in-house attorneys.

<td>2.0 TO 3.0</td>
<td>This course will examine how Brazil and the United States conceive of criminal justice.</td>
</tr>
<tr>
<td>LAW 7654</td>
<td>Ecosystem Management Law</td>
<td>2.0 TO 3.0</td>
<td>Recommended prior courses: LAW 7200 (Environmental Law) and/or LAW 7320 (Land Use Law) Beginning in the 1970's, the nation federalized environmental protection with a series of major pieces of legislation. Each of these laws focused on the clean up of a single environmental medium, mandating cleaner air, water, soils, etc. Increasingly, however, diverse interests from real estate financing companies to local government officials have called for an integrated approach that combines land use planning techniques and environmental law and regulation. Ecosystem Management Law will explore these laws, regulations, and techniques for environmental management. The course is thus recommended for those students who wish to position themselves for careers in real estate, land use, and environmental law.</td>
</tr>
<tr>
<td>LAW 7655</td>
<td>Comparative Ecosystem Management Law</td>
<td>1.0 TO 3.0</td>
<td>This course, which can only be taken immediately before or after a student enrolls in LAW 7654 (Ecosystem Management Law) will be a one-week, intensive comparative law course held between the Fall and Spring semesters. The course will require students to research and write a short research paper related to the comparative legal themes explored in the course.</td>
</tr>
</tbody>
</table>
**LAW 7656**  
**Law, Environmental Sustainability and Development**  
**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION**  
The first part of this course is an intensive, week-long field course in the city of Nova Friburgo, located in Rio de Janeiro state approximately two hours from Rio de Janeiro’s international airport. During this week, students will both hear from and visit with different stakeholders competing for the resources of the extensive Tres Picos State Park, which abuts the city, and go on field trips related to their lectures and conversations. The speakers will be lawyers, government officials, engineers, biologists, farmers and environmental activists, among others. In this way, students will have a better grasp of the magnitude of the challenges facing park administrators and local governments as they work responsibly to manage natural resources taking into account the environmental, social, economic and political consequences of their decisions and activities. The second half of the course, which will take place in Rio de Janeiro, will be skills-based and will introduce students to negotiation and mediation techniques in the context of resolving questions like those disputes among stakeholders studied in the first week.

**LAW 7657**  
**Comparative Family Law**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
This course will explore and critically examine the intersection of law, family and society. Using various principles of jurisprudence, sociological theory, and empirical research, as well as guest speakers and site visits, to compare and contrast Brazilian and U.S. models of family formation and family dissolution. In addition, this course will examine how race, gender and class mediate relational power in whose family life is defined, regulated, and protected under the law versus whose family is created outside the shadow of the law. Topics include marriage, divorce, parent’s and children’s rights, “third party” rights, domestic violence, adoption, and reproductive technology.

**CREDIT HOURS** 2.0 TO 3.0  
**DESCRIPTION**
LAW 7661  Comparative Mergers and Acquisitions Law
CREDIT HOURS  2.0 OR 3.0
DESCRIPTION  This course compares and contrasts the systems for regulating negotiated and hostile business combinations-mergers, stock purchases (including tender offers), asset transfers, and other available transactions in various countries. Emphasis will be placed on underlying policies and the ramifications of those policies on corporate constituencies in and outside the core corporate governance structure (i.e., "other constituencies" as well as directors, officers, and shareholders). Course work will include both legal drafting and expository writing.

LAW 7662  Conflict Prevention and Community Improvement
CREDIT HOURS  2.0 TO 3.0
DESCRIPTION  Please see http://law.gsu.edu/metrogrowth/4866.html for information and details.

LAW 7663  Comparative Legal Institutions and Institutional Legitimacy
CREDIT HOURS  3.0
DESCRIPTION  This course will examine, compare and contrast the Brazilian and United States legal systems, focusing in particular on the role of courts and the judiciary. Topics will include the method of judicial selection, retention, and training; and the major social, legal, and political challenges that each country's courts currently face. In addition to a comparative overview of the U.S. and Brazilian civil and criminal justice systems and the Brazilian judiciary, the course will address how the U.S. and Brazilian systems have responded, in the civil and criminal arenas, to two specific challenges -- access to justice and decisional delay (as prompted by caseload volume) -- and how those challenges have impacted the overall objective of accomplishing and maintaining institutional legitimacy. The course will, finally, consider how differences in culture and society affect different outcomes.

LAW 7664  International and Comparative Equality Law Seminar
CREDIT HOURS  2.0 TO 3.0

LAW 7670

Doing Business and Environmental Protection: Comparative Perspectives on the Regulatory State in the U.S. and Argentina

CREDIT HOURS
3.0

DESCRIPTION
This course will examine the regulatory and administrative state in a comparative law context, using U.S. and Argentine administrative law as they affect business regulation and environmental regulation. Co-taught by U.S. and Argentine faculty members, the materials present U.S. and Argentine law as well as comparative analyses of both. The course will be divided into three principle sections. First, it will introduce students to the constitutional bases for executive regulation in both legal systems. Second, the course will examine different regulatory responses to environmental protection law and regulation in the U.S. and Argentina. Third and finally, the course will ask students to consider the consequences of those legal and regulatory strategies for the regulation of business, with a focus on trans-national business between the U.S. and Argentina. The foundational U.S. administrative law statute (the Administrative Procedure Act) will be compared to comparable Argentine laws.

LAW 7671

Comparative Business Law

CREDIT HOURS
3.0

DESCRIPTION
This course offers a comparative survey of various topics of business law of the United States and Argentina. Co-taught by both U.S. and Argentine business law faculty, the materials present U.S. and Argentine law as well as comparative analyses of both. The principal topics addressed will be the legal structure of business entities, issues related to the limited liability of corporate entities, fiduciary duties and liabilities of corporate officials, and government regulation. Because it is a comparative law course, the topics will be addressed from the perspective of both U.S. and Argentine law. Additionally, the course will address related areas of commercial law, principally the rules concerning negotiable instruments and secured transactions. To that end, Articles 3 and 9 of the U.S. Uniform Commercial Code will be compared to the counterpart Argentine statutes and commercial code.

LAW 7700

Business Succession Planning Capstone

CREDIT HOURS
4.0

PREREQUISITES
LAW 7510, and either LAW 7127 or LAW 7110

COREQUISITES
LAW 7110 may be taken concurrently

DESCRIPTION
This course will integrate and apply the knowledge gathered from Wills, Trusts, and Estates; Basic Taxation; and Professional Responsibility to a real-life business succession fact pattern. The course will bridge the gap between academic studies and the practice of law. Students will engage in significant experiential learning exercises in which writing and oral skills are developed.

<tr>
<td>LAW 7800</td>
<td>Health Care Transactions and Regulatory Practicum</td>
<td>3.0</td>
<td>LAW 7240</td>
<td>This advanced health law course brings students together with practicing health law attorneys to learn and apply substantive laws and practical skills to handle a range of model health care transactions. Students will work in teams of associates under the supervision of the professor and one or more adjunct professors to engage in health care contract drafting, review, negotiations, regulatory analysis, legal memoranda, and professional advisement. The model health care transactions will involve fictitious clients and include hospital-physician agreements and health care joint ventures and/or acquisitions. Students will be evaluated on the basis of the completion of transactional projects, written work, and oral communication. Students will also receive ungraded feedback and opportunity to refine and improve final, graded work products. This course will count toward the Health Law Certificate lawyering skills requirement.</td>
</tr>
<tr>
<td>LAW 7801</td>
<td>Business Arbitration Practicum</td>
<td>2.0</td>
<td></td>
<td>This course brings together skills and substantive law in an experiential course where students engage in all aspects of a business arbitration proceeding. Students will learn the practice and procedure of business arbitration through a simulated arbitration proceeding. They will represent a claimant in initiating an arbitration from client intake and interviewing through filing a proceeding. Students will also work as defense counsel, interviewing and counseling their clients and answering a proceeding. Students will prepare for and complete a negotiation for either a claimant or a respondent and prepare for an arbitration hearing. Throughout the course, students will engage in best practices for case management and maintain a client file through electronic case management software. Students will receive substantial feedback on their work, including drafts. Participating students will develop valuable lawyering skills, case management procedures and gain experience in alternative dispute resolution methods.</td>

</table>
LAW 9004  Alternative Methods of Dispute Resolution (ADR) for LL.M. Students

CREDIT HOURS  4.0

DESCRIPTION  Generally limited to foreign-trained lawyers in the LL.M. program. Other LL.M. students may enroll with written permission of the professor. The objective of this course is to educate foreign-trained lawyers in the LL.M. program about the dispute resolution mechanisms that provide viable alternatives to litigation and the appropriate uses of each method. Focusing mostly on American methods of dispute resolution, the course also covers international methods and venues for comparative purposes. Through readings, simulations and role plays, students will learn the theories and skills necessary for effective problem solving and advocacy in negotiation, mediation and arbitration. Political, practical and ethical issues raised by these alternatives are embedded in readings, class presentations and discussions, as well as in role plays.

LGLS 8350  The Law and Business of Immigration

CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS None
DESCRIPTION (Same as LAW 7328.) This course examines immigration, labor, and employment issues from law and business perspectives. The course covers employers' obligations to verify workers' immigration status, the visas available to foreign workers, and employer liability for the hiring and employment practices of subcontractors. It also explores the standing of immigrant workers under labor and employment laws and international labor supply and demand issues from the perspectives of workers and employers. The course is interdisciplinary and highly participatory and exposes students both to doctrinal legal questions and to the realities of employing, and representing, immigrant workers.

LGLS 8389  Directed Readings in Legal Studies

CREDIT HOURS 1.0 TO 3.0
PREREQUISITES Consent of the instructor, good academic standing
DESCRIPTION

LGLS 8450  Legal Environment of Health Care

CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
REQUIREMENTS CSP: 1, 6
DESCRIPTION (Same as HA 8450.) This course provides students with a study of the legal aspects of the health care business. The course covers the role of government in regulating health care and health applications of the law, of torts/malpractice, contracts, and administrative law. It equips students to recognize legal issues in the health care environment and to manage legal risks in decision making.

<td>CSP: 1, 3, 4, 7</td>
<td>Various optimization techniques are surveyed with an emphasis on the why and how of these types of models as opposed to a detailed theoretical approach. Students develop optimization models which relate to their areas of interest. Spreadsheets are used extensively to accomplish the mathematical manipulations. Emphasis is placed on input requirements and interpretation of results.</td>
</tr>
</tbody>
</table>
MGS 8150  Business Modeling
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS CSP: 1, 2, 3, 4, 5, 6
DESCRIPTION This course covers the development, implementation, and utilization of business models for managerial decision making. Various techniques for analytical modeling, such as forecasting, optimization, simulation, decision analysis, and classification, are discussed. Students gain mastery in developing complex financial models implemented in decision support systems that cover applications in strategic planning, financial management, operations/project management, and marketing research. These topics are covered in the context of emerging information technology architecture.

MGS 8170  Statistical Modeling
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS CSP: 1, 6
DESCRIPTION This course presents applications of important statistical models for organizational analysis and decision making. Applied research based on observational studies is emphasized. The SAS statistical package is employed to analyze data using various statistical techniques. Examples of statistical models and techniques include exploratory data analysis, factor analysis, regression analysis, discriminant analysis, and cluster analysis.

MGS 8200  Introduction to the Management of People, Processes and Projects
CREDIT HOURS 3.0
DESCRIPTION The purpose of this course is to provide a solid foundation in the key theories and tools of systems thinking, communication, problem solving and critical thinking in management contexts and in the basic components of organizations. Students will apply these tools and conceptual knowledge to basic problems of people, processes and projects in organizations.

MGS 8300  Human Resource Management
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS None
DESCRIPTION This course provides a survey of the field of human resource management. Topics covered include strategic human resource management, recruitment, selection, performance evaluation, training and development, compensation, and labor relations.

MGS 8320  Legal and Ethical Environment of Human Resource Management
CREDIT HOURS 3.0
PREREQUISITES None
REQUIREMENTS None
DESCRIPTION This course examines legal issues related to various aspects of human resource management. Students review legislation and case law related to discrimination, employment-at-will, negligence, contingent workers, safety, compensation, and labor. Emphasis is placed on avoiding unnecessary litigation.

<td>MBA 8000 or MBA 8135 or MGS 8200</td>
<td>CSP: 1, 2, 7</td>
<td>Cross listed with FI 8410. This study abroad program provides an opportunity to examine the business climate in foreign markets, with field experience in a specific foreign market. Students will gain insight into financial and managerial issues, with emphasis on the capital structure of firms, the organization of financial markets, and cross-cultural influence on corporate governance practices and managerial decision making and entrepreneurship. The in-country experience will allow students to observe and discuss first-hand how companies work within that market.</td>
</tr>
<tr>
<td>MGS 8420</td>
<td>Enhancing Leadership Skills</td>
<td>3.0</td>
<td></td>
<td></td>
<td>Participants in this course are introduced to various processes and tactics that are used to enhance leadership skills, as well as to various perspectives on important leadership skill content that can help to guide and motivate their development as leaders. They undergo assessments of their leadership-relevant skills and characteristics, and receive guidance on how to improve as leaders. Skills improvement comes from enhanced insight and knowledge, activities conducted in class, as well as from out-of-class tasks that participants design themselves. The course is premised on the assumption that participants have had some leadership experience, since the course requires participants to reflect on their leadership experiences and skills so that their leadership skills can be improved.</td>

</table>
**MGS 8770 Service Operation Management**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of instructor

**REQUIREMENTS**
CSP: 1, 2, 3

**DESCRIPTION**
This course focuses on the analysis of service sector performance and methods designed to improve service operations from a competitiveness standpoint. The topics covered are cross-functional in nature including operations, marketing, human resource management, information technology and entrepreneurship and are presented as an integrated systems approach to the service organization.

**MGS 8860 Management Studies Abroad**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of the instructor

**REQUIREMENTS**
None

**DESCRIPTION**
Emphasizing a collaborative rather than competitive learning environment, this course examines the interrelatedness of economic, political, legal, social, and cultural factors on cross-cultural management issues. Concepts of human behavior, motivation, strategy, and labor/management relations are linked to practice in different national settings. An extensive international on-site program is an integral part of this program. Interviews are conducted at a broad range of organizations and industries. Objectives include cultivating a global mindset and developing a richer understanding of international business challenges relating to management. Company visits showcase evolving corporate profiles in the global marketplace.

**MGS 9150 Reading Seminar in the Decision Sciences**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of the instructor

**REQUIREMENTS**
None

**DESCRIPTION**
The coverage of this course is highly variable. The course allows a student with a special interest in an area to pursue his or her interest in whatever depth and direction are appropriate. Examples of such areas are topics not covered in other course offerings and special in-depth coverage beyond normal course offerings. Instruction and guidance are normally on a tutorial basis.

**MGS 9300 Seminar in Human Resource Management**

**CREDIT HOURS**
3.0

**PREREQUISITES**
Consent of the instructor

**REQUIREMENTS**
None

**DESCRIPTION**
This course presents doctoral students with an in-depth review of the research literature in human resource management. Topics such as the history and development of human resource management, job analysis, employee recruitment and selection, performance appraisal, compensation, and the legal environment of human resource management are examined. Emphasis in the course is given to issues of theory and research methodology.
MGS 9389  Directed Reading in Managerial Sciences  
CREDIT HOURS 3.0  
PREREQUISITES Consent of the instructor and PhD coordinator; good academic standing  
DESCRIPTION Requiresents: CSP: None. This PhD-level course allows a student with a special interest in an area to pursue that interest in whatever depth and direction are appropriate. Examples of such areas are topics not covered in other course offerings and special in-depth coverage beyond normal course offerings. Instruction and guidance are normally on a tutorial basis. Because topics may vary, students may take this course multiple times.

MGS 9400  Seminar in Organizational Behavior  
CREDIT HOURS 3.0  
PREREQUISITES Consent of the instructor  
REQUIREMENTS CSSP: None  
DESCRIPTION Operating from an interdisciplinary framework, this seminar is designed to explore the function, structure, and goals of organizations as political, social, and economic units. Emphasis in this course is placed primarily upon the patterns of relationships that are manifested during the various phases of organizational development. Special attention is also given to all forms and types of research, both of an ephemeral and a classical nature, which provide an understanding of the complexities of organizations and organizational behavior.

MGS 9410  Seminar in Organization Design and Implementation  
CREDIT HOURS 3.0  
PREREQUISITES Consent of the instructor  
REQUIREMENTS CSP: None  
DESCRIPTION This seminar is designed to train theorists/researchers/practitioners in the design, redesign, and implementation of effective organizations. The seminar focuses on the analysis, planning, implementation, and evaluation of the structural changes necessary to improve and maintain productivity and on the quality of work life.

MGS 9470  Seminar in Advanced Topics in Contemporary Behavior  
CREDIT HOURS 3.0  
PREREQUISITES Consent of instructor  
REQUIREMENTS CSP: None  
DESCRIPTION This course is devoted to the investigation of significant topics in organizational behavior. It is intended primarily for advanced doctoral students. The course can be repeated when the topics vary; topics are announced in advance.

<tbody>
<tr>
<td>MGS 9610</td>
<td>Seminar in Competitive Strategy</td>
<td>3.0</td>
<td>Ph. D</td>
<td>CSP: 1, 6, 7</td>
<td>This course is a doctoral level seminar on the major theoretical and empirical approaches to business-level strategy or competitive strategy research. The main objective of the course is to familiarize students with the basic assumptions concepts and theories underlying these topics in the field. The course is intended to expose students to the major theoretical 'lenses' that underpin current research in the field and the major research issues to which they are applied. Students will analyze and discuss the major questions in the field and explore ways in which those questions may be addressed both theoretically and empirically.</td>
</tr>
<tr>
<td>MGS 9640</td>
<td>Seminar in Strategy Formulation</td>
<td>3.0</td>
<td>Ph.D. student status</td>
<td>CSP: 1, 6, 7</td>
<td>The objective of this doctoral seminar is to acquaint students with the theories and research related to strategy formulation. Students will read, critically analyze and discuss classic and current writings on the processes associated with strategy formulation and the various contexts that affect the process by which competitive strategies are developed in organizations. Topics included in this literature include theories of organizational change, decision making processes, top management team attributes, organizational resources, and characteristics of the external operating environment. Student will explore ways in which emerging issues in strategy formulation can be addressed both conceptually and empirically.</td>
</tr>
<tr>
<td>MGS 9920</td>
<td>Probability and Statistical Theory I</td>
<td>3.0</td>
<td>MGS 9910 and introductory statistics equivalent to MATH 1070</td>
<td>Requirement: CSP: 1. This course presents a general outline of the mathematical theory of probability and statistics. Topics include random variables, discrete and continuous probability distributions, sampling distribution theory, estimation, and multivariate distributions.</td>
<td></td>
</tr>
<tr>
<td>MGS 9940</td>
<td>Design and Conduct of Experiments</td>
<td>3.0</td>
<td>MGS 9920</td>
<td>Requirement: CSP: 1, 2, 6, 7. This course examines epistemologies and methods that lie at the heart of experimental research. It covers validation of experimental instruments, internal and external validity, and statistical conclusion validity derived through the family of ANOVA techniques, regression, and structural equation modeling. Students learn how to properly design an experiment and how to handle problems that come up in actually conducting experiments.</td>
<td></td>
</tr>
<tr>
<td>MGS 9950</td>
<td>Regression Analysis</td>

**MIT 8210  Global Systems Sourcing**

**CREDIT HOURS**
3.0  

**PREREQUISITES**
None  

**REQUIREMENTS**
CSP: 1, 2, 3, 4, 5, 6, 7, 8  

**DESCRIPTION**
This course is designed to assist students in developing the knowledge and skills needed to work with systems integration vendors and processes. It focuses on the concepts and methods associated with designing, planning, contracting for and overseeing information technology infrastructure and applications. The course familiarizes students with the legal issues related to preparing, distributing, and evaluating requests for proposal (RFP) and subsequent integration contracting matters. Students will prepare and evaluate systems proposals for various sourcing and managing third party relations.

3.0  

**PREREQUISITES**
None  

**REQUIREMENTS**
CSP: 1, 2, 3, 4, 5, 6, 7, 8  

**DESCRIPTION**
Because of the many advances in information technology and the corresponding development techniques, new business opportunities are constantly emerging, and with them the need to manage these applications effectively. This course explores these new application areas and the management approaches needed to make them successful.
Organizational Change Management

CREDIT HOURS
3.0

DESCRIPTION
CSP: 1, 2, 3, 4, 5, 6, 7, 8. Toward the end of the 20th century, the fundamental processes in conducting business evolved with help of enabling technologies. Enterprise Resource Planning (ERP), supply chain management, e-Procurement with B2B technology, agent technologies and shopbots, trust and electronic payment systems and adaptive enterprise computing are just a few of the newer technologies now permeating today’s organization. The purpose of this course is to examine key technologies adapted for use in the 21st century organization.

IT Management Capstone Project

CREDIT HOURS
0.0 TO 6.0

DESCRIPTION
Master of Science students approved for the thesis option must continuously enroll in this research course each semester until the thesis is completed and presented.
**MK 8010  Marketing Metrics**

**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**DESCRIPTION** This course is designed to emphasize and teach the critical role of analysis in marketing decision-making. Drawing on concepts from economics, finance, and accounting, as well as best-practice marketing metrics, the course will present a series of metrics designed to guide marketers in formulating and evaluating key decisions. Students will also learn to evaluate and analyze marketing problems presented in the form of case analyses.

**MK 8100  Buyer Behavior**

**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**REQUIREMENTS** CSP: None  
**DESCRIPTION** This course provides an opportunity for study of the behavior of buyers of business-to-business and consumer goods and services. Objectives include increasing the student's understanding of buyers and their behavior and providing the student with experience in applying this knowledge in marketing management decisions. Topics such as life style analysis, organization, individual and family decision making, consumerism, behavioral models, attitude formation and change, information seeking, and market segmentation are explored using readings, projects and case materials.

**MK 8200  Marketing Research**

**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION** Marketing research focuses on the generation of primary data to improve decisions. This course helps students determine when research should be conducted and on designing the appropriate means for gathering and interpreting information. The course examines a range of methods of data collection made possible and develops skills in converting data to useful information that will improve marketing efforts. The course uses client-based group projects, extensive hands-on assignments, and readings to develop conceptual, analytical and communication skills.

**MK 8300  Marketing Communications and Promotions**

**CREDIT HOURS** 3.0  
**PREREQUISITES** MBA 8145  
**REQUIREMENTS** CSP: None  
**DESCRIPTION** This course focuses on the development and implementation of integrated marketing communications. Students learn about the development of a brand-building communications plan that covers advertising, packaging, sales promotion, direct marketing, and public relations. The course combines theory and application exercises designed to provide experiences in developing a comprehensive integrated marketing communications plan.

<td>MBA 8145</td>
<td>CSP: 1, 2, 3</td>
<td>The objective of this course is to familiarize students with applications of planning techniques for new products. The course emphasizes the use of market research data and marketing models for new product development and management. The main topics covered in this course are idea generation, concept evaluation, optimal product design, test marketing, product positioning, market segmentation, market share estimation, product packaging, advertising testing, pricing, brand name selection, brand equity and global product planning.</td>
</tr>
</tbody>
</table>
MK 8700  Digital & Social Media Marketing

CREDIT HOURS  3.0
PREREQUISITES  MBA 8145
REQUIREMENTS  CSP: 1, 2, 3, 4, 7
DESCRIPTION  This course offers a comprehensive understanding of the digital and social media marketing landscape including different platforms, media, tools, and metrics. Based on this understanding, students will learn how different marketing objectives of the organization such as customer management, branding, sales, PR, promotion, communication and so on can be accomplished through digital and social media marketing strategies for both business-to-consumer as well as business-to-business settings.

MK 8705  Digital Marketing Analytics

CREDIT HOURS  3.0
PREREQUISITES  MBA 8145
REQUIREMENTS  CSP: 1, 2, 3, 4, 7
DESCRIPTION  This course offers a comprehensive understanding of the digital and social media marketing landscape (including search engines, popular social media platforms, mobile phones etc.) with an emphasis on state-of-the-art analytical tools and metrics required to succeed in the digital marketing space. Based on this understanding, students will learn how to measure, track, monitor and hence improve, optimize and efficiently manage different marketing programs in digital and social media platforms.

MK 8710  Customer Relationship Management

CREDIT HOURS  3.0
PREREQUISITES  MBA 8145
REQUIREMENTS  CSP: 1,2,6
DESCRIPTION  Customer Relationship Management (CRM) is a comprehensive set of processes and technologies for managing the relationships with potential and current customers and business partners across marketing, sales, and services areas regardless of the channel of distribution. This course focuses on the development and implementation of relationship marketing strategies via the use of CRM initiatives. Topics covered in the course include: relationships marketing; operational, analytical, and collaborative CRM; reasons for CRM implementation failure; and the role of CRM in marketing management.

MK 8715  Brand and Customer Analytics

CREDIT HOURS  3.0
PREREQUISITES  MBA 8145
REQUIREMENTS  CSP: 1, 2, 3, 4, 6, 7
DESCRIPTION  This course is designed to teach analytic techniques related to brand and customer management. Students will gain experience with state of the art techniques, such as the efficient allocation of marketing resources, new product management, effective branding strategy and customer engagement value, which includes customer lifetime value and customer referral value.

MBA 7025  Statistical Business Analysis

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 2, 4, 6, 7
DESCRIPTION  This course deals with the basics of converting corporate data into actionable information for managerial decision making. Statistical data analysis techniques in the context of Business Intelligence are covered with applications in various functional areas of business. Specific techniques include data visualization, descriptive statistics, estimation, hypothesis testing, modeling relationships, basic forecasting techniques, and optimization techniques for decision support. The contextual topics focus on the implementation of six sigma methodologies for corporate performance management.

MBA 7035  Economics for Manager

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 2, 6, 7
DESCRIPTION  This course uses basic macroeconomic concepts to develop a basic model of the macroeconomy emphasizing real world data and relationships. The goal is for managers to understand the main forces and trends in the economy, how they are interrelated, and how policymakers try to affect them. Because changes in the macroeconomy affect industries and firms throughout the economy, it is important for managers to understand how these changes can affect managerial decisions, particularly in terms of the concepts discussed in the context of microeconomics. The performance of the economy is presented in the context of industries and firms studied in microeconomics.

MBA 8000  Managing in the Global Economy

CREDIT HOURS  3.0
DESCRIPTION  Managing in the Global Economy provides students with an integrated managerial framework based on economic principles to facilitate effective decision making across and within functional areas, across and within global borders, and across and within organizational boundaries. Students will learn to formulate strategic decisions and to face complex challenges through lecture, case study, discussion and exercises that emphasize critical thinking within an economic paradigm. Key concepts include the power of markets, the influence of technology on markets and organizations, the impact of incentives on actions, and how information influences decisions and actions.

MBA 8015  Strategic Business Communication

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 6, 7
DESCRIPTION  This course presents written and oral business communication as a management strategy critical to success in the workplace by introducing a communication model useful to identify objectives, analyze audiences, choose information, and create the most effective arrangement and channel for written and oral messages. Students will practice drafting and editing clear, precise, and readable written business documents including communications to executive-level readers. Students will also develop skills in the effective design and delivery of unwelcome information, technical information to non-technical audiences, and group communication.

Global Competitive Strategy  

CREDIT HOURS  
3.0  

PREREQUISITES  
All of the Functional Core course requirements, must apply to take the capstone core courses  

REQUIREMENTS  
CSP: 1, 2, 4, 6  

DESCRIPTION  
This course explores methods of directing an entire organization or a significant division in an internationally competitive environment. The perspective is that of the general manager who must integrate many business functions to successfully lead a multinational organization. Topics include the identification of organizational competence in light of external environmental and international conditions, the development of business/corporate strategy that addressed the international marketplace, and the internal processes required for successful implementation of that strategy.

Financial Engineering

| CREDIT HOURS | 3.0 |
| PREREQUISITES | MBA 8135 and FI 8000 concurrently |
| REQUIREMENTS | CSP: 1, 2, 7 |
| DESCRIPTION | This course introduces students to continuous-time financial models essential for the practice of mathematical risk management. It begins with a discussion of the fundamental mathematical tools from continuous-time stochastic processes including Ito's formula, change of measure, and martingales. This provides a framework for financial concepts including hedging, complete markets, and incomplete markets. The mathematical tools and financial concepts are applied to the risk management and valuation of financial derivatives based on stocks and bonds, separately, and insurance company liabilities with embedded financial options. The course concludes with a consideration of models that jointly value stocks, bonds and non-traded assets. |

Interest Rate Models

| CREDIT HOURS | 3.0 |
| PREREQUISITES | MRM 8600 and MRM 8610 |
| REQUIREMENTS | CSP: 1, 2, 7 |
| DESCRIPTION | This course provides a detailed study of pricing of interest rate securities based on stochastic term structure models. A review of stochastic calculus is given; short rate and HJM models are introduced, developed and compared. |

Quantitative Financial Risk Models

| CREDIT HOURS | 3.0 |
| PREREQUISITES | MRM 8600 |
| REQUIREMENTS | CSP: None |
| DESCRIPTION | Emphasis is on the development of "hands-on" experience which includes the calibration of models and discussion of the data issues faced in the application of these models. This course is intended for all students considering a career in quantitative risk management, whether in the insurance, banking, or non-financial sector. |

Advanced Credit Risk Models

| CREDIT HOURS | 3.0 |
| PREREQUISITES | MRM 8000 and MRM 8600 and MRM 8610 |
| DESCRIPTION | The course introduces students to the most important theoretical and operational aspects of credit risk models. The content is organized in six modules, which cover single and multi-name credit products, reduced form and structural models of credit risk, as well as fundamentals of counterparty risk pricing and management. The course provides a rigorous introduction to credit risk modeling and management methodologies that are relevant for risk managers, asset managers, structurers, and traders working across different asset classes. |
MATH 6010 Mathematical Biology
CREDIT HOURS 3.0
PREREQUISITES MATH 2212 or MATH 1220 with grade of C or higher
DESCRIPTION (Same as BIOL 6010.) This course provides an introduction to the use of continuous and discrete differential equations in the biological sciences. Biological topics will include single species and interacting population dynamics, modeling infectious and dynamic diseases, regulation of cell function, molecular interactions and receptor-ligand binding, biological oscillators, and an introduction to biological pattern formation. There will also be discussions of current topics of interest such as Tumor Growth and Angiogenesis, HIV and AIDS, and Control of the Mitotic Clock. Mathematical tools such as phase portraits, bifurcation diagrams, perturbation theory, and parameter estimation techniques that are necessary to analyze and interpret biological models will also be covered.

MATH 6030 Mathematical Music Theory
CREDIT HOURS 3.0
DESCRIPTION Specific aspects of group theory, algebraic combinatorics on words, similarity and distance measures, topology and geometry, and topos theory that are used in the analysis of general objects of music (scales, chords, rhythmic patterns) as well as in specific applications (development of software, music cognition, analysis of pieces from different time periods and genres). Acquire a repertoire of mathematical tools and techniques that are not always covered in the core courses of the major.

MATH 6211 Optimization
CREDIT HOURS 3.0
PREREQUISITES MATH 3435 or MATH 3030 with a grade of C or higher
DESCRIPTION Lagrange multipliers, gradient methods (steepest descent), search techniques, variational methods and control problems; other varying topics such as dynamic programming, nonlinear programming.

MATH 6250 Complex Analysis
CREDIT HOURS 3.0
PREREQUISITES MATH 3000
DESCRIPTION Complex numbers, analytic functions, complex series, Cauchy theory, residue calculus, conformal mapping.

MATH 6258 Vector Calculus
CREDIT HOURS 3.0
PREREQUISITES MATH 2215
DESCRIPTION (Same as PHYS 6510.) Vector algebra, curvilinear motion, vector fields, gradient, divergence, Laplacian, line and surface integrals, integral theorems.

MATH 6265 Partial Differential Equations
CREDIT HOURS 3.0
PREREQUISITES A course in ordinary differential equations
DESCRIPTION (Same as PHYS 6520.) First-order equations, classification of linear second-order equations, separation of variables, Fourier series, orthogonal functions, Green's functions.

</table>
MATH 8320  Functional Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 8110 with grade of C or higher  
DESCRIPTION  This course is an introduction to the fundamental concepts of functional analysis and operator theory. Its topics include: Hilbert spaces, Banach spaces, Frechet spaces, bounded linear operators on Banach spaces, Riesz and Fredholm theory of compact operators, the spectral theorem for normal operators, the three pillars of linear analysis (Hahn-Banach, open mapping, Banach-Steinhaus theorems), Krein-Milman theorem, Gelfand's theory of commutative C*-algebras.

MATH 8330  Harmonic Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 8110 with grade of C or higher  
DESCRIPTION  This course is an introduction to the fundamental concepts of harmonic and Fourier analysis. Its topics include: Fourier series and integrals in one and several dimensions; convolutions; Poisson summation; Fourier analysis on locally compact Abelian groups; commutative Banach algebras; selected applications to number theory, partial differential equations, engineering, numerical methods (such as fast Fourier tranform and fast multiplication).

MATH 8340  Several Complex Variables  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 8110 with grade of C or higher  
DESCRIPTION  This course is an introduction to the fundamental concepts of complex analysis and complex geometry in two or more variables. Its topics include: local and global analysis and algebra of holomorphic functions, power series in several complex variables, plurisubharmonic functions, domains of holomorphy, pseudoconvex domains, Reinhardt domains, Cauchy-Riemann equations, Stein manifolds, open and closed Riemann surfaces, embeddings into affine or projective space.

MATH 8350  Differential Manifolds  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4662 with grade of C or higher  
DESCRIPTION  This course is an introduction to the fundamental concepts of analysis, geometry and topology of differential manifolds. Its topics include: local and global analysis and algebra of smooth functions (implicit function theorem, inverse function theorem, smooth partition of unity, rank theorem, Sard's lemma, Morse lemma), embedding into Euclidean space, differential forms (Stokes theorem, de Rham cohomology, orientation class, cohomology of spheres and projective spaces, harmonic forms, Hodge decomposition), tensor analysis, curvature, Lie groups, homogeneous spaces.

MATH 8360  Topics in Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 8110 with grade of C or higher  
DESCRIPTION  This course is a topics course in analysis whose content may vary from semester to semester and from instructor to instructor. Possible topics include advanced themes in functional analysis (orthogonal functions, positive functions on groups, Bochner's theorem, operator theory, operator algebras), Lie groups and Lie algebras (basic theory, representations of compact Lie groups, structure theory of semi-simple Lie algebras), analysis of linear elliptic and parabolic differential equations (existence and regularity for Dirichlet problem, Neumann problem in Holder and Sobolev spaces).

</tr>
<tr>
<td>MATH 8450</td>
<td>The Probabilistic Method in Combinatorics</td>
<td>3.0</td>
<td>MATH 8440 with grade of C or higher</td>
<td>This advanced course discusses the probabilistic method on combinatorics. Topics include linearity of expectation, the second moment method, the local lemma, correlation inequalities, martingales, large deviation inequalities, pseudo-randomness and random graphs.</td>
</tr>
<tr>
<td>MATH 8460</td>
<td>Topological Graph Theory</td>
<td>3.0</td>
<td>MATH 6420 (Graph Theory) with a grade of C or higher</td>
<td>This course studies embeddings of graphs in surfaces, and graphs as topological spaces. The topics may include planar graphs, surfaces, combinatorial embeddings, contractibility of cycles, the genus problem, the width of embeddings, embedding extensions and obstructions, tree-width and the excluded minor theorem, colorings of graphs on surfaces. Credit Hours: 3.0.</td>
</tr>
<tr>
<td>MATH 8500</td>
<td>Systems Biology</td>
<td>3.0</td>
<td>Grade of C or higher in MATH 6010 or MATH 6275</td>
<td>Cross-listed with NEUR 8500. This course provides an introduction to systems biology from mathematical modeling point of view. It will introduce biology students to mathematical modeling, and mathematical students to systems biology. Biological topics will include gene systems, protein systems, metabolic systems and signaling systems. Mathematical tools will include basic modeling concepts, approximation, static networks, linear vs. nonlinear systems and how to linearize nonlinear systems, and parameter estimation and optimization. Specific case studies will include integrative analysis of genome, protein, and metabolite data, systems biology in medicine and drug development, and synthetic biology.</td>

</table>
MATH 8525  Applied Stochastic Processes  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752 Mathematical Statistics II or MATH 4010/6010 Mathematical Biology  
DESCRIPTION  This course deals with stochastic processes taking place at different spatial and temporal scales, with the emphasis on simulation and analysis of biological processes. Topics include Probabilistic and deterministic models, Discrete and Continuous Probability Distributions, Poisson processes, Discrete and Continuous Markov Chains, Discrete Time Branching Processes, Continuous Birth and Death Processes, Population Dynamics, and Stochastic Differential Equations. The potential biological applications include logistic growth processes, epidemic models, enzyme kinetics, competition processes, stochastic ion channels and random walk models for neural spike trains. 3.0 Credit Hours.

MATH 8530  Topics in Applied Mathematics  
CREDIT HOURS  3.0  
DESCRIPTION  May be taken more than once if topics are different.

MATH 8535  Applied Matrix Algebra  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4435/6435 with a grade of C or higher  
DESCRIPTION  Matrix algebra: its concepts, results, techniques and methods applicable to statistics, bioinformatics, neuroscience, systems biology, economics, and related fields. The topics may include advanced operations on matrices, projectors and idempotent operators, generalized inverses, inequalities for eigenvalues, matrix approximations, optimization problems in statistics and econometrics, quadratic subspaces, inequalities with applications in statistics, non-negative matrices and their models in applied sciences.

MATH 8540  Advanced Topics in Ordinary Differential Equations and Dynamic Systems  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4275 or MATH 6275 with grade of C or higher  
DESCRIPTION  (Same as PHYS 8540.) This course is a graduate-level presentation of the mathematical theory of ordinary differential equations and nonlinear dynamical systems. It is designed for students who want to study the advanced topics of qualitative theory of ordinary differential equations and do research in dynamical systems. Topics include existence and uniqueness theorems; IVP and Picard iterates; stability; variational equation and Floquet theory; Jordan normal form; the center manifold theorem; relaxation oscillations and method of averaging; Smale horseshoe and transverse homoclinic orbits; Lyapunov exponents and topological entropy.

MATH 8550  Biologic Networks  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 6420 with grade of C or better  
DESCRIPTION  This course will be a comprehensive introduction of graph theory to the structural analysis of biological networks at the interface of biology and discrete mathematics. The course covers graph structure properties and graph algorithms with applications to biology problems such as protein interaction networks, metabolic networks, ecological networks, and correlation networks. The course provides knowledge on establishing mathematical models and tools on solving these models for various bioinformatic related problems.
MATH 8560  Informatics of Neural and Cardiovascular Systems
CREDIT HOURS 3.0
PREREQUISITES MATH 4010/6010 or MATH 6275 or MATH 4751/6751 with grades of C or higher
DESCRIPTION (Same as NEUR 8360) This course studies informatics in application to biological systems, the emerging fields of science that appeared at a cross-road of mathematics, biology, and medicine. It is designated for graduate students. Biological topics will include gating properties of ion channels, with particular application to cardiac diseases and cancer. The models of ion channels, neural and cardiac cells will be introduced. Electrical activity of biological cells will be analyzed with modern mathematical methods. The role of stochasticity in information processing by biological systems will be analyzed. Application of the mathematical modes for genetic diseases (epilepsy, arrhythmias) will be discussed.

MATH 8570  Computational Methods and Modeling for the Life Sciences
CREDIT HOURS 3.0
PREREQUISITES MATH 6010 (Mathematical Biology) or MATH 6275 (Applied Dynamical Systems) with a grade of C or higher
DESCRIPTION (Same as NEUR 8370.) Advanced computational and mathematical modeling methods for generating and analyzing deterministic dynamic models in the context of scientific data. Biological case studies may be drawn from many areas involving all scales of inquiry, from molecules to ecosystems.

MATH 8610  Advanced Numerical Analysis
CREDIT HOURS 3.0
PREREQUISITES MATH 4435/6435 and MATH 4610/6610 or CSC 4610/6610
DESCRIPTION (Same as CSC 8610.) Advanced topics in numerical analysis. Stability and conditioning, discretization error, convergence. Examples are drawn from linear algebra, differential and nonlinear equations.

MATH 8620  Numerical Linear Algebra
CREDIT HOURS 3.0
PREREQUISITES MATH 4435/6435; and MATH 4610/6610 or CSC 4610/6610
DESCRIPTION (Same as CSC 8620.) Computational aspects of linear algebra. Matrix factorization, least squares, orthogonal transformations, eigen-values; and methods for sparse matrices.

MATH 8800  Topics in Mathematics
CREDIT HOURS 3.0
DESCRIPTION May be taken more than once if topics are different.

MATH 8801  Graduate Research in Mathematics
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION May be repeated for credit.

MATH 8802  Graduate Laboratory in Mathematics
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION May be repeated for credit.

MATH 8820  Research
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor and chair of department
DESCRIPTION Independent investigation of topics of common interest to student and instructor.
MATH 8950 Directed Research in Mathematics
CREDIT HOURS 1.0 TO 15.0
PREREQUISITES consent of the instructor
DESCRIPTION

MATH 8999 Thesis Research
CREDIT HOURS 1.0 TO 15.0
PREREQUISITES thesis option
DESCRIPTION

MATH 9116 Teaching College Mathematics
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION Research-based investigation of teaching college-level mathematical sciences courses: placement, prerequisites, remedial courses, services courses, preparing syllabi, grading, technology, pedagogical strategies.

MATH 9126 Epistemology of Advanced Mathematics Concepts
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION An investigation of various epistemological frameworks in the context of collegiate level mathematics courses. Constructivism, Platonism, Cognitivism, Empiricism, and Information Processing. Comparison of the epistemologies as they apply to post-secondary mathematics concepts.

MATH 9136 Learning Theories Relevant to Collegiate Mathematics Education
CREDIT HOURS 3.0
PREREQUISITES MATH 9126 with grade of C or higher
DESCRIPTION The course focuses on a variety of learning theories relevant to collegiate mathematics education and advanced mathematical thinking including: cognitive, social, constructivists, semiotics, situated learning, behaviorist, etc. The course will look at the influence of learning theories on how mathematics educators view learning, conduct research about learning, and subsequently develop teaching methodologies.

MATH 9166 Internship in Teaching College Mathematics
CREDIT HOURS 3.0
PREREQUISITES consent of instructor and approval to teach in the Department of Mathematics and Statistics
DESCRIPTION Teaching of at least one undergraduate mathematics course using at least two distinct pedagogical strategies.

MATH 9185 Research Seminar in Undergraduate Mathematics Education
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION Student will read, discuss, and report on current publications in the field. Can be taken more than once for credit.

MATH 9999 Dissertation Research
CREDIT HOURS 1.0 TO 18.0
PREREQUISITES consent of department
DESCRIPTION Doctoral Dissertation Research.

<tbody>
<tr>
<td>EDMT 6560</td>
<td>Principles of Mathematics Instruction</td>
<td>3.0</td>
<td>Students examine instructional procedures, teaching strategies, technology, and evaluation procedures for middle and secondary school mathematics.</td>
</tr>
<tr>
<td>EDMT 7360</td>
<td>Integration of Technology in Mathematics Instruction</td>
<td>3.0</td>
<td>Students examine the role of technologies in the teaching and learning of mathematics, with a particular focus on classrooms within urban environments. Course includes hands-on experience with graphing calculators, computer software tools, Internet resources, and instructional materials for integrating technology in mathematics instruction.</td>
</tr>
<tr>
<td>EDMT 7530</td>
<td>Mathematics Concepts for Middle Childhood Education I</td>
<td>3.0</td>
<td>Develops selected topics in middle school mathematics including number systems, number theory, number and number relations, computation and estimation, algebra concepts, patterns, and functions. The course emphasizes problem solving, communicating, reasoning, connecting mathematical ideas, and using technology.</td>
</tr>
<tr>
<td>EDMT 7560</td>
<td>Theory and Pedagogy of Mathematics Instruction</td>
<td>3.0</td>
<td>Students examine classroom practices in mathematics through implementation of reflective practice and action research. A review of the literature includes an examination and articulation of theoretical frameworks for mathematics teaching and learning as they relate to classroom practice. Research focuses on equity, teaching, learning, curriculum, assessment, and technology issues in a standard-based classroom.</td>
</tr>
<tr>
<td>EDMT 7400</td>
<td>Mathematics Concepts for Special Learners</td>
<td>3.0</td>
<td>Students explore the full range of materials and strategies for developing mathematical competence in special learners. The course emphasizes diagnosis, remediation, concept learning, and mathematical problem solving taught in a concrete, student-centered manner.</td>
</tr>
</tbody>
</table>
EDMT 7570  Special Topics for Secondary Mathematics Education  
**CREDIT HOURS** 3.0  
**PREREQUISITES** EDCI 7660  
**COREQUISITES** EDCI 7680  
**DESCRIPTION** This course is designed for those who are preparing to become secondary mathematics teachers. Prospective teachers will revisit and extend their own mathematics knowledge as they develop specialized mathematics knowledge, skills, and ways of reasoning needed for teaching mathematics. The specialized mathematics knowledge is different from what it takes to pass a mathematics course as a student. The course is content rich. Prospective teachers will learn ways of understanding what their own students are doing mathematically, probe and make sense of their understanding, and develop ways to further scaffold for students' learning. Specifically, the course will provide prospective secondary mathematics teachers with content knowledge for teaching and how to apply such knowledge in their classrooms.

EDMT 8290  The Study of Learning and Instruction in Mathematics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students examine psychological bases for the study of teaching and learning of mathematics. Findings of research in mathematics education related to the learning of selected topics in the school curriculum are explored. Research methods, theoretical constructs, and research perspectives in mathematics education are investigated. (Repeatable).

EDMT 8420  Topics in the School Mathematics Curriculum  
**CREDIT HOURS** 1.0 TO 3.0  
**DESCRIPTION** Students explore the content and pedagogy related to selected topics in the school mathematics curriculum. May be repeated for credit when topics change. (Repeatable).

EDMT 8430  Sociocultural and Sociohistorical Issues of Mathematics Education  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students explore cultural, economic, political, and social structures and discourses as they relate to mathematics, mathematics teaching and learning, and research in mathematics. Course includes an examination of how research in mathematics and mathematics education is framed and enacted within different theoretical frameworks. (Repeatable).

EDMT 8550  Trends and Issues of Teaching Mathematics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Students examine current problems, trends, and curriculum issues related to teaching mathematics in middle and secondary schools. (repeatable).

EDMT 8820  Ethnomathematics and the Historical Development of Mathematics  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course involves the observation of mathematical concepts as it emerged throughout and within cultural activities as creative expressions of human thought. The primary purpose of this course is to provide an alternative lens to view mathematical knowledge as it transpired across civilizations and within various non-western cultures.

EDMT 9870  Advanced Research Seminar in Mathematics Education  
**CREDIT HOURS** 1.0 TO 3.0  
**PREREQUISITES** EDCI 9900 or consent of the instructor  
**DESCRIPTION** This seminar is designed for advanced doctoral students in mathematics education. Students explore research methodology, research findings, and design of experiments in mathematics education. Seminar may extend beyond one term. (Repeatable).

<tbody>
<tr>
<td>MUS 6010</td>
<td>Performance Laboratory</td>
<td>0.0</td>
<td>Coached chamber ensemble and/or studio-class performance. Includes repertoire review, master classes, peer analysis and critique, and recital preparation. (May be repeated.).</td>
</tr>
<tr>
<td>MUS 6011</td>
<td>Singing in Italian</td>
<td>1.0</td>
<td>Two lab classes per week. Developing the ability to pronounce the Italian language on sight through the study of the International Phonetic Alphabet and its application to Italian vocal literature.</td>
</tr>
<tr>
<td>MUS 6031</td>
<td>Singing in French</td>
<td>1.0</td>
<td>Two lab classes per week. Developing the ability to pronounce the French language on sight through the study of the International Phonetic Alphabet and its application to French vocal literature.</td>
</tr>
<tr>
<td>MUS 6050</td>
<td>Review of Aural Skills</td>
<td>1.0</td>
<td>Two lecture hours per week. An intensive review of basic aural skills, including rhythmic, melodic, and harmonic transcription; error detection and reading. Students must earn a grade of B or higher in order to successfully complete this course. Credits earned in this course may not be applied to the Master of Music degree.</td>
</tr>
<tr>
<td>MUS 6080</td>
<td>Practicum in Piano Pedagogy</td>
<td>2.0</td>
<td>piano pedagogy course(s) and an acceptable level of performance skill. Supervised teaching of elementary and/or intermediate-level piano students (child or adult level) in private or group lessons.</td>
</tr>
<tr>
<td>MUS 6090</td>
<td>Jazz Pedagogy/Marching Band Techniques</td>
<td>1.0</td>
<td>Principles of jazz instruction for music educators. Design and charting for the contemporary style drill utilizing drafting instruments and computer-aided instruction.</td>
</tr>
<tr>
<td>MUS 6100</td>
<td>Jazz Combo Arranging</td>
<td>1.0</td>
<td>MUS 6070 with grade of B or higher, or consent of instructor. Contemporary arranging techniques for the small jazz combo; rhythm section and up to five wind instruments; basic jazz nomenclature and instruments.</td>
</tr>
<tr>
<td>MUS 6110</td>
<td>Instrumentation and Orchestration</td>
<td>3.0</td>
<td>MUS 2450 and MUS 2550, or equivalent. Three lecture hours per week. Exploration of the technical capabilities and idiomatic performance practices of instruments found in the orchestra and the wind ensemble. Additional instruction in arranging and transcribing techniques for chamber ensembles, the orchestra, and wind ensemble.</td>
</tr>
<tr>
<td>MUS 6140</td>
<td>Arranging for Chorus</td>
<td>1.0</td>
<td>MUS 6070 with grade of B or higher, or consent of instructor. Arranging for large and small vocal ensembles with and without accompaniment.</td>
</tr>
<tr>

</tr>
<tr>
<td>MUS 6150</td>
<td>Review of Music History</td>
<td>3.0</td>
<td>A review of music history in Western civilization from the Medieval period to the present. Credits earned in this course may not be applied to the Master of Music program.</td>
</tr>
<tr>
<td>MUS 6160</td>
<td>Review of Harmony, Form, and Analysis</td>
<td>3.0</td>
<td>Three lecture hours per week. Intensive review of diatonic and chromatic harmony, formal stereotypes, and basic analytical techniques. Credits earned in this course may not be applied to the Master of Music degree.</td>
</tr>
<tr>
<td>MUS 6170</td>
<td>Arranging for the Large Jazz Ensemble</td>
<td>1.0</td>
<td>Contemporary arranging techniques for rhythm section and two, three, and four wind instruments.</td>
</tr>
<tr>
<td>MUS 6180</td>
<td>Developing Rhythmic Sensitivity</td>
<td>1.0</td>
<td>Practical applications of concepts necessary to perform, teach, notate, and take dictation of beginning, intermediate, and advanced rhythmic patterns.</td>
</tr>
<tr>
<td>MUS 6210</td>
<td>Composition Seminar</td>
<td>2.0</td>
<td>Two lecture hours per week. Exploration of the processes and aesthetics of contemporary musical composition with additional topics to include a survey of contemporary music since 1960, advanced musical notation, advanced orchestration, and an exploration of the business of being a composer. Repeatable for credit and required of all students working in the composition area.</td>
</tr>
<tr>
<td>MUS 6360</td>
<td>Advanced Keyboard Skills</td>
<td>2.0</td>
<td>Development of advanced keyboard skills in sight playing; chord patterns; transposing; harmonizing classical, folk and popular melodies; arranging for keyboard(s); improvising; and accompanying and introductory score reading. Successful completion of this course by applied piano and piano pedagogy majors waives the piano proficiency examination.</td>
</tr>
<tr>
<td>MUS 6410</td>
<td>Piano Pedagogy I</td>
<td>3.0</td>
<td>Approaches and materials for children and high school students at the elementary and intermediate levels. Focus will include the job market, methods, curriculum building, musicianship training, technical development, practice strategies, ensemble playing, use of technology in teaching, and professional etiquette as a clinical/adjudicator.</td>

MUS 6750  Group Instruction in Jazz Keyboard
CREDIT HOURS  1.0
PREREQUISITES  MUS 2720 with grade of B or higher, or consent of instructor
DESCRIPTION  One lecture and one lab hour per week. Basic and intermediate jazz keyboard realization. Harmonic, melodic, and rhythmic elements will be investigated. Principles of chord progressions, comping techniques, modes, extension tones, and bass lines for lead-sheet realization.

MUS 6760  Advanced Keyboard Harmony
CREDIT HOURS  1.0
DESCRIPTION  Realization of figured bass, improvisation of chord progressions, transposition, instrumental score reading, and rhythm reading at the keyboard. Satisfies the requirements in keyboard proficiency for the concentration in music theory.

MUS 6770  Advanced Aural Skills
CREDIT HOURS  1.0
PREREQUISITES  MUS 6050 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Two lecture hours a week. Continued development of aural skills, with particular emphasis on aural analysis and the transcription of chromatic music.

MUS 6790  Advanced Jazz Improvisation I
CREDIT HOURS  1.0
PREREQUISITES  MUS 2780 with grade of B or higher, or consent of instructor
DESCRIPTION  Jazz improvisation including compositional techniques, altered dominant scales, minor ii-v7s, ballad interpretation, memorization, and chord substitutions.

MUS 6791  Advanced Jazz Improvisation II
CREDIT HOURS  1.0
PREREQUISITES  MUS 6790 with grade of B or higher, or consent of instructor
DESCRIPTION  Continuation of MUS 6790. Advanced improvisation concepts and performance skills emphasizing composition, altered dominant scales, minor ii-v7s, ballad interpretation, memorization and chord substitutions.

MUS 6792  Jazz Theory
CREDIT HOURS  2.0
PREREQUISITES  MUS 2450 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Major and minor scale harmony, modulation, minor key analysis, dominants, reharmonization, and modal interchange.

MUS 6820  World Music
CREDIT HOURS  3.0
DESCRIPTION  Comparative survey of various nonwestern musical cultures.

MUS 6850  Jazz Styles
CREDIT HOURS  2.0
PREREQUISITES  MUS 2450, MUS 2780, or MUS 6070 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Examines important events and musical figures in the evolution of jazz by analysis of playing styles, compositions and innovations that influenced the direction of jazz in the twentieth century. African roots of jazz and the music of Armstrong, Morton, Ellington, Parker/Gillespie, Coltrane, and Miles Davis.

MUS 6890  Selected Topics
CREDIT HOURS  1.0 TO 3.0
PREREQUISITES  consent of the instructor
DESCRIPTION  Discussion and readings on selected topics.

<td>3.0</td>
<td>MUS 2450 or MUS 6070 with grade of B or higher, or consent of instructor</td>
<td>Literature for small string and wind chamber ensembles.</td>
</tr>
<tr>
<td>MUS 6940</td>
<td>Orchestral Literature</td>
<td>3.0</td>
<td>MUS 2450 or MUS 6070 with grade of B or higher, or consent of instructor</td>
<td>Orchestral literature from 1700 to 1900.</td>
</tr>
<tr>
<td>MUS 6941</td>
<td>Orchestral Literature II</td>
<td>3.0</td>
<td>MUS 2450 or MUS 6070 with grade of &quot;C&quot; or higher, or consent of instructor</td>
<td>Standard symphonic repertoire from 1900 to 2000. Crosslist with MUS 4961 Orchestral Literature II. Identify specific works that have had a major impact upon the evolution of the symphony orchestra as an instrument.</td>
</tr>
<tr>
<td>MUS 6980</td>
<td>Electroacoustic Music Composition</td>
<td>3.0</td>
<td>MUS 4730 or MUS 6730 with grade of C or higher, or consent of instructor</td>
<td>Crosslist with MUS 4980. Investigation of methods of electroacoustic music composition using MIDI, hardware synthesizers, and software tools. Focus on unique tool development using the MAX programming environment and associated technologies. Approaches to advanced composition with electroacoustic means from both scientific and aesthetic perspectives. Required laboratory work.</td>
</tr>
<tr>
<td>MUS 6981</td>
<td>Computer Music</td>
<td>3.0</td>
<td>MUS 4730 or MUS 6730 with grade of B or higher, or consent of instructor</td>
<td>Introduction to software synthesis computer music using the Csound acoustic compiler. Survey of fundamental synthesis techniques, fundamentals of Csound programming, and strategies for sound design and composition. Required laboratory work.</td>
</tr>
<tr>
<td>MUS 6982</td>
<td>Advanced Topics in Computer Music</td>
<td>3.0</td>
<td>MUS 4981 or MUS 6981 with grade of B or higher, or consent of instructor</td>
<td>Advanced topics in software synthesis computer music using the Csound acoustic compiler. Survey of digital signal processing, advanced synthesis methods, and score development. Course work culminates in a significant computer music project. Required laboratory work.</td>
</tr>
<tr>
<td>MUS 7050</td>
<td>New Music Ensemble</td>
<td>1.0</td>
<td>audition or consent of the instructor</td>
<td>Chamber ensemble that performs primarily post-World War II music, but also some earlier music. Student compositions may be performed. Participation in New Music Week during Spring semester required.</td>
</tr>
<tr>
<td>MUS 7060</td>
<td>Wind Ensemble</td>
<td>1.0</td>
<td></td>
<td>Study, rehearsal, and concert performance of wind literature of various periods and styles. May be repeated for credit.</td>

<tr>
<td>MUS 7080B</td>
<td>Choral Ensemble: Vocal Jazz</td>
<td>1.0</td>
<td>Study and performance of vocal jazz ensemble repertoire.</td>
<td></td>
</tr>
<tr>
<td>MUS 7081</td>
<td>Choral Union</td>
<td>1.0</td>
<td>The Choral Union is open to all GSU students who want to sing in a choir. No audition is required. The Choral Union sings a wide variety of music and typically performs two concerts per semester.</td>
<td></td>
</tr>
<tr>
<td>MUS 7082</td>
<td>Women’s Chorus</td>
<td>1.0</td>
<td>Study, rehearsal, and performance of repertoire for women’s chorus. Open to music majors and non-majors. (May be repeated for credit.).</td>
<td></td>
</tr>
<tr>
<td>MUS 7083</td>
<td>Master Singers</td>
<td>1.0</td>
<td>The Georgia State University Master Singers is an auditioned choral ensemble that sings repertoire of all styles and periods.</td>
<td></td>
</tr>
</tbody>
</table>
MUS 7090  Jazz Band  
CREDIT HOURS  1.0  
PREREQUISITES  audition and consent of the instructor  
DESCRIPTION  Study, rehearsal, and concert performance of jazz literature of various periods and styles. May be repeated for credit.

MUS 7110  Brass Ensemble  
CREDIT HOURS  0.5  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Performance of chamber music for brass instruments; includes historical and stylistic considerations and the study of ensemble performance problems. May be repeated for credit for a maximum of four semester hours.

MUS 7120  Chamber Music for Strings  
CREDIT HOURS  0.5  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Performance of chamber music for orchestral string instruments; includes historical and stylistic considerations and the study of ensemble performance problems. May be repeated for credit for a maximum of four semester hours.

MUS 7130  Chamber Music for Woodwinds  
CREDIT HOURS  0.5  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Performance of chamber music for woodwind instruments; includes historical and stylistic considerations and the study of ensemble performance problems. May be repeated for credit for a maximum of four semester hours.

MUS 7140  Percussion Ensemble  
CREDIT HOURS  0.5  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Performance of chamber music for percussion instruments; includes historical and stylistic considerations and the study of ensemble performance problems. May be repeated for credit for a maximum of four semester hours.

MUS 7150  Guitar Ensemble  
CREDIT HOURS  0.5  
DESCRIPTION  Performance of chamber music for guitar; includes historical and stylistic considerations and the study of ensemble performance problems. May be repeated for a maximum of four semester hours.

MUS 7160  Jazz Combos  
CREDIT HOURS  0.5  
PREREQUISITES  Audition and consent of the instructor  
DESCRIPTION  Rehearsal and performance of jazz literature for the small jazz combo (trio to sextet) with balanced instrumentation. Basic jazz improvisation, improving listening skills, combo arranging, and memorization of jazz “standards.”

MUS 7200  Principles and Strategies of General Music Instruction  
CREDIT HOURS  3.0  
DESCRIPTION  Advanced understanding and practice of general music education. Emphasis on current research and strategies for maximizing musical growth. Correlated with the national standards in music education.

MUS 8900  Non-Thesis Research in Music  
**CREDIT HOURS**: 1.0 TO 6.0  
**DESCRIPTION**: Supervised elective research not associated with thesis or directed-study credit.

MUS 8910  Final Project in Composition  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: at least 2 terms of APCP 8000 with grade of B or higher, or equivalent, and consent of the instructor  
**DESCRIPTION**: Composition of an original, major musical work.

MUS 8920  Research or Teaching Assistantship in Music  
**CREDIT HOURS**: 3.0 TO 12.0  
**DESCRIPTION**: Prerequisite MUS 8100. Does not count toward degree requirements. Assisting of music faculty members in their research or teaching classes of one's own under the supervision of a faculty member. Required of all graduate students receiving a stipend. May be repeated for credit.

MUS 8950  Practicum in Music Education  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: MUS 8240 and MUS 8400 with grades of B or higher, or consent of instructor  
**DESCRIPTION**: Development, reflection and critical analysis of advanced teaching competencies through a planned field project.

MUS 8960  Proseminar in Music Education  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: For Ed.S. and Ph.D. students; others require consent of the instructor  
**DESCRIPTION**: Examination of the major and current literature in philosophy, history, psychology, sociology, and creativity in music education. Topics may vary. May be repeated for credit.

MUS 8970  Instrumental Conducting Project  
**CREDIT HOURS**: 3.0  
**DESCRIPTION**: Terminal project for the degree in instrumental conducting, consisting of a public concert and paper.

MUS 8980  Advanced Research Project in Music Education  
**CREDIT HOURS**: 3.0  
**PREREQUISITES**: MUS 8240, MUS 8400, and MUS 8950 with grades of B or higher, or consent of instructor  
**DESCRIPTION**: Independent research on a selected topic under supervision of a music education faculty member. For Ed.S. students in music education.

MUS 8999  Thesis  
**CREDIT HOURS**: 1.0 TO 9.0  
**DESCRIPTION**:

NEUR 6010  Neurobiology
CREDIT HOURS  4.0
PREREQUISITES  BIOL 3800 and BIOL 3840, or equivalents
DESCRIPTION  (Same as BIOL 6102) Comprehensive basis for understanding brain research, major discoveries in neuroscience, and the methods employed for those achievements. Topics include the neural basis of learning and memory, sensory perception, motor control, neurological diseases, drug action, and behavior.

NEUR 6015  Cellular and Molecular Neuroscience
CREDIT HOURS  4.0
PREREQUISITES  NEUR 3000, BIOL 4102, NEUR 6010, or BIOL 6102, or equivalent
DESCRIPTION  Topics include excitable membranes and cells, ion channels, synaptic transmission and plasticity, ion channels and receptors, neural development, and axon guidance. An elective for graduate Neuroscience majors. 4.000 credit hours.

NEUR 6020  Cognitive Neuroscience
CREDIT HOURS  4.0
PREREQUISITES  NEUR 3000 or permission of instructor
DESCRIPTION  Covers the neural basis of cognition, learning, emotion, memory and language, and the methods used to investigate these areas of research.

NEUR 6030  Computational Neuroscience
CREDIT HOURS  4.0
PREREQUISITES  NEUR 3000, MATH 2201 or equivalent, with grades of C or higher
DESCRIPTION  A project-based course focused on building and testing computational models of neurons, networks, and neural circuits that mediate animal behavior. An elective for Neuroscience majors. 4.000 Credit hours.

NEUR 6040  Neuroethology
CREDIT HOURS  4.0
PREREQUISITES  NEUR 3000 or BIOL 4102, or equivalent, with a grade of C or higher
DESCRIPTION  Four lecture hours per week. The neural basis of natural animal behavior. This course covers sensorimotor coding of behavior in a diverse array of animals including bats, owls, electric fish, and songbirds. It provides a unique perspective for students who want to understand the general principles underlying neural control of behavior. Developmental, evolutionary, systems, and comparative approaches are emphasized. Students will read classic papers as well as cutting-edge primary literature. An elective for Neuroscience majors.

NEUR 6050  Statistics for Neuroscience
CREDIT HOURS  4.0
PREREQUISITES  NEUR 3000 or equivalent (BIOL 4010) with a grade of C or higher
DESCRIPTION  Three lecture and one laboratory hour per week. Introduction to research design, data analysis, and scientific communication as applied to neuroscience research questions. Topics include fundamentals of hypothesis testing and research design, descriptive data collection techniques, and data analysis and interpretation using correlation, regression, t-tests, and univariate design.
NEUR 6060  Neurophysiology
CREDIT HOURS 4.0
PREREQUISITES NEUR 3000, BIOL 4102, NEUR 6010, or BIOL 6102, or equivalent with a grade of C or above
DESCRIPTION The physiology of nervous systems, including the physiological bases of excitability, synaptic transmission and integration, sensory and motor processing, and behavioral choice. Current experimental and computational approaches to neurophysiological questions will be discussed. An elective for neuroscience majors. 4.0 Credit hours.

NEUR 6070  Sensory Neuroscience
CREDIT HOURS 3.0
PREREQUISITES NEUR 3000 or BIOL 4102, or PSYC 4110, NEUR 6010, or BIOL 6102 with a grade of C or higher
DESCRIPTION Three lecture hours per week. The course will cover the neural basis of sensation and perception, from neural coding in the sense organs to cortical representation leading to perception. The neurobiology of vision, audition, somatosenses (touch and pain), and chemical senses (taste and smell) will be covered. An elective for Neuroscience majors.

NEUR 6080  Clinical Neuroscience
CREDIT HOURS 4.0
PREREQUISITES NEUR 3000 with a grade of C or higher
DESCRIPTION This course will examine the neurobiological basis of mental disorders such as depression and schizophrenia as well as of neurological conditions such as Parkinson’s and Alzheimer’s Diseases. Additional topics include psychoneuroimmunology, stress and coping, the role of genetics and epigenetics in neurological and neuropsychiatric disorders, and the role of gut microbes in health and disease. An elective for neuroscience majors. 4.0 Credit hours.

NEUR 6100  Developmental Neurobiology
CREDIT HOURS 4.0
PREREQUISITES BIOL 3800 or equivalent
DESCRIPTION (Same as BIOL 6094.) Four lecture hours per week. Introduction to the development of the nervous system. Covers the field of developmental neurobiology from neural induction to the modification of neuronal connections in the adult nervous system and uses a variety of model organisms to demonstrate the rules by which nervous systems develop.

NEUR 6110  Neural Plasticity
CREDIT HOURS 4.0
PREREQUISITES NEUR 6010 or BIOL 6102 with grade of C or higher, or equivalent
DESCRIPTION (Same as BIOL 6110 and PSYC 8625.) Four lecture hours per week. Phenomenology and mechanisms of experience-dependent changes in the nervous system. The course will examine plasticity at many levels of analysis, from synaptic mechanisms to clinical strategies, and from molecular neuroscience to cognitive psychology.

NEUR 6115  Medical Neuroanatomy
CREDIT HOURS 4.0
PREREQUISITES BIOL 3840 with grade of C or higher, or equivalent
DESCRIPTION Four lecture hours per week. Human brain and spinal cord functional neuroanatomy and associated pathologies. Elective for the Ph.D. program in Neuroscience.
NEUR 6150  Drugs and the Nervous System
CREDIT HOURS 3.0
PREREQUISITES PSYC 1100 and PSYC 2050 with grades C or higher, or consent of instructor
DESCRIPTION This provides an in-depth and advanced exploration of the neuronal and chemical mechanisms underlying psychoactive drug action as well as compulsive drug usage. The focus will be both on drugs of abuse as well as pharmacological interventions in neural/behavioral disorders. An elective for Neuroscience majors. 3.000 credit hours.

NEUR 6200  Endocrinology
CREDIT HOURS 4.0
PREREQUISITES CHEM 6600 or equivalent
DESCRIPTION (Same as BIOL 6240.) Four lecture hours a week. Basic biochemistry and physiology of the endocrine system, including synthesis and secretion of steroid and protein hormones, mechanisms of hormone action, and endocrinology of reproduction.

NEUR 6250  Neuroscience of Memory
CREDIT HOURS 3.0
PREREQUISITES NEUR 3000, BIOL 4102, or equivalent
DESCRIPTION An introduction to the neural bases of memory. The course begins with a review of the historical background, experimental methods, and relevant principles of neuroscience. The Neuroscience of memory will then be reviewed at different levels of biological organization, including molecular/cellular, neural circuit, neural systems, and behavioral.

NEUR 6300  Introduction to Psychophysiology
CREDIT HOURS 4.0
DESCRIPTION (Same as PSYC 6140.) Three lecture and two laboratory hours a week. Laboratory course in the use of physiological techniques in understanding psychological phenomena. Includes applications of methodologies such as EMG, EEG, ERP, and MRI. Demonstrates how these measures inform scientists about the workings of the brain and peripheral nervous system in producing thinking and behavior.

NEUR 6310  Neurobiology Laboratory
CREDIT HOURS 4.0
PREREQUISITES BIOL 4102, or equivalent, and consent of instructor
DESCRIPTION (Same as BIOL 6180.) Two lecture and six laboratory hours a week. Laboratory techniques in neuroscience, including intra- and extracellular electrophysiology, computational methods, neuroanatomy, immunocytochemistry, and neuroethology.

NEUR 6320  Fundamentals of Bioinformatics
CREDIT HOURS 4.0
PREREQUISITES BIOL 3800 or written approval of instructor
DESCRIPTION (Same as BIOL 6640, CHEM 6640, and CSC 6640.) Four lecture hours per week. A "hands-on" approach to bioinformatics using PCs, the internet, and computer graphics to analyze, correlate, and extract information from biological databases, emphasizing sequence and structure databases for proteins and nucleic acids, and introducing the computing skills necessary for bioinformatics. Topics include: sequences and three-dimensional structures of proteins and nucleic acids, the major databases, algorithms for sequence comparison, data mining, and prediction of structure and function.
NEUR 6330  Functional Neuroimaging
CREDIT HOURS  3.0
PREREQUISITES  Consent of instructor
DESCRIPTION  (Same as PHYS 6710.) Three lectures hours a week. Foundations of physics principles applied to brain processes, different imaging modalities, and neuroimaging data analysis methods. Topics include physiological basis of functional neuroimaging, physics of different imaging modalities (fMRI, PET, EEG, MEG, fNIR, TMS), experimental design, neuroimaging data analysis, and applications in cognitive neuroscience. This course is appropriate for graduate students in physics, chemistry, biology, neuroscience, psychology, mathematics, statistics, and computer science with an interest in the use of functional neuroimaging.

NEUR 6350  Numerical Methods for Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  MATH 4010 (Mathematical Biology) or MATH 4610 (Numerical Analysis) or MATH 4275 (Applied Dynamical Systems)
DESCRIPTION  This class develops hands-on practical skills in numerical problem solving for dynamical systems models applied to neuroscience. Students will design and test complex scientific calculations using various software tools, including the application of bifurcation analysis, phase plane analysis, and simulation tools. Students will undertake three projects to demonstrate such calculations. 3 credit hours.

NEUR 6360  Mathematical Biology
CREDIT HOURS  3.0
PREREQUISITES  Grade of C or higher in MATH 2212 or MATH 2202
DESCRIPTION  This course provides an introduction to the use of continuous and discrete differential equations in the biological sciences. Biological topics will include single species and interacting population dynamics, modeling infectious and dynamic diseases, regulation of cell function, molecular interactions and receptor-ligand binding, biological oscillators, and introduction to biological pattern formation. There will also be discussions of current topics of interest such as Tumor Growth and Angiogenesis, HIV and AIDS, and Control of the Mitotic Clock. Mathematical tools such as phase portraits, bifurcation diagrams, perturbation theory, and parameter estimation techniques that are necessary to analyze and interpret biological models will be also covered. 3 credit hours.
NEUR 6370  Applied Dynamical Systems
CREDIT HOURS 3.0
PREREQUISITES MATH 3260 and MATH 3435
DESCRIPTION An introduction to discrete and continuous dynamical systems. Topics include: phase space; linear and nonlinear systems; structural stability; classification of equilibrium states, invariant manifolds; Poincare maps, fixed points and period orbits; stability boundaries; local bifurcations; homoclinic orbits; routes to chaos in dissipative systems; applications from physics, biology, population dynamics, economics.

NEUR 6400  Primate Behavior: Field and Laboratory
CREDIT HOURS 3.0
PREREQUISITES BIOL 3840 or PSYC 4110 or consent of the instructor
DESCRIPTION (Same as PSYC 6116.) Two lecture and two laboratory hours a week. Nonhuman and human primate origins of cognition, language, mythology, rituals, tool use, nonverbal expressions, symbolism, sexuality, and aggression.

NEUR 6420  Hormones and Behavior
CREDIT HOURS 4.0
PREREQUISITES BIOL 3840 or equivalent
DESCRIPTION (Same as BIOL 6241 and PSYC 6630.) Four lecture hours per week. Interaction of nervous and endocrine systems in the control of animal behavior, including humans, with emphasis on the mechanisms that adapt behavior to the changing physical and social environments.

NEUR 6500  Philosophy of Science
CREDIT HOURS 3.0
DESCRIPTION (Same as PHIL 6130.) Varieties of scientific explanation; hypothesis formation and confirmation; paradigms, laws, and theories; the status of unobservable entities; holism and reductionism; science and values, nature and scope of scientific progress; limits of scientific explanation.

NEUR 6510  Philosophy and Cognitive Science
CREDIT HOURS 3.0
DESCRIPTION (Same as Phil 6340.) An interdisciplinary examination of the problems, theories, and research strategies central to the study of the human mind and of other cognitive systems. Basic readings will come from a variety of disciplines, including philosophy, neuroscience, and psychology. Topics of investigation may include perception, mental representation, language, modularity, consciousness, emotions, moral psychology, action, mental disorders, folk psychology, and animal minds.

NEUR 6520  Philosophy of Mind
CREDIT HOURS 3.0
DESCRIPTION (Same as PHIL 6330.) Topics such as theories of mind; the connection between mental and physical states; the relation between mind, language, and the world; and artificial intelligence.

NEUR 6530  Neuroethics
CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
DESCRIPTION (Same as PHIL 6780.) Neuroethics considers how ethical theories inform neuroscientific practice and how neuroscientific discoveries inform ethical theorizing. Topics may include ethical protocols for neuroscience research, ethical and legal implications of neuroscientific research, and implications of neuroscience for debates about moral behavior and judgment. 3 Credit Hours.

<td>BIOL 3840 or PSYC 8610, or consent of the instructor</td>
<td>(Same as BIOL 8040 and PSYC 8615) In-depth study of the neuroanatomy and function of the human central nervous system. Considers neuroanatomical techniques used to study the brain, neuroanatomical basis for the control of sensory and motor systems, as well as cortical, autonomic nervous system, and limbic system anatomy and function. Both normal brain anatomy and pathologies are covered.</td>
</tr>
</tbody>
</table>
NEUR 8310  Research Methods in Psychology
CREDIT HOURS  3.0
DESCRIPTION  (Same as PSYC 8010.) Types of research design including experimental designs, quasi-experimental designs, single-case designs, and case studies; related research issues including aspects of philosophy of science, measurement, reliability, internal and external validity, and artifacts.

NEUR 8320  Psychological Research Statistics II
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8035 or PSYC 8410
DESCRIPTION  (Same as PSYC 8420.) Statistical analysis of psychological data with an emphasis on multiple and logistic regression and their interpretation. Statistical considerations when planning research such as power analysis are also discussed.

NEUR 8330  Psychological Research Statistics III
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8320 or PSYC 8420
DESCRIPTION  (Same as PSYC 8430.) Advanced topics in the statistical analysis of psychological data including various forms of factor analysis, psychometric methods and theories, structural equation modeling and its use in theory construction, and multivariate analysis of variance.

NEUR 8340  Dynamical Foundations of Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  MATH 4010/6010, MATH 4275/6275, or PHYS 4180/6180 with grade of C or higher
DESCRIPTION  (Same as MATH 8515.) This course deals with computational and mathematical neuroscience with the emphasis on models of neurons and neural networks described in terms of dynamical systems, time continuous and discrete. Topics include biophysics and dynamics of single and coupled neurons, bifurcations and transitions between various types of neuronal activities; modeling of synapses, dendrites and axons; locomotion and small networks; neural coding in single cells and at the population level; dynamics of large networks, including spike computing with population codes; networks learning and behavioral changes.

NEUR 8350  Advanced Bioinformatics
CREDIT HOURS  4.0
PREREQUISITES  NEUR 6320 or equivalent, ability to program in Java or C++ or equivalent, and consent of instructor
DESCRIPTION  (Same as BIOL 8630, CHEM 8630 and CSC 8630.) Advanced topics in bioinformatics, computer and internet tools, and their applications. Computer skills for the analysis and extraction of functional information from biological databases for sequence and structure of nucleic acids and proteins. Students will complete a computer-based bioinformatics project.
NEUR 8360  Informatics of Neural and Cardiovascular Systems  
CREDIT HOURS 3.0  
PREREQUISITES MATH 4010/6010 or MATH 6275 or MATH 4751/6751 with grades of C or higher  
DESCRIPTION (Same as MATH 8560). This course studies informatics in application to biological systems, the emerging fields of science that appeared at a cross-road of mathematics, biology, and medicine. It is designated for graduate students. Biological topics will include gating properties of ion channels, with particular application to cardiac diseases and cancer. The models of ion channels, neural and cardiac cells will be introduced. Electrical activity of biological cells will be analyzed with modern mathematical methods. The role of stochasticity in information processing by biological systems will be analyzed. Application of the mathematical modes for genetic diseases (epilepsy, arrhythmias) will be discussed.

NEUR 8380  Computational Neuroscience  
CREDIT HOURS 3.0  
PREREQUISITES MATH 2211, BIOL 4102, or NEUR 8010 with grades of B or higher, or equivalent, or consent of instructor  
DESCRIPTION Three lecture hours per week. Realistic modeling dynamics of neurons and neuronal networks with emphasis on testing data-driven hypotheses. Topics include modeling intracellular calcium dynamics, voltage dependent channels, synapses, activity of neurons, and synchronization regimes of neuronal networks. 3.000 credit hours.

NEUR 8370  Computational Methods and Modeling for the Life Sciences  
CREDIT HOURS 3.0  
PREREQUISITES MATH 6010 or MATH 6275 with a grade of C or higher  
DESCRIPTION (Same as MATH 8570.) Some familiarity with basic biological concepts will be assumed. Advanced computational methods for generating and analyzing deterministic dynamic models in the context of scientific data. Biological case studies may be drawn from many areas involving all scales of inquiry, from molecules to ecosystems.

NEUR 8385  Systems Biology  
CREDIT HOURS 3.0  
PREREQUISITES Grade of C or higher in MATH 6010 or MATH 6275  
DESCRIPTION This course provides an introduction to systems biology from mathematical modeling point of view. It will introduce biology students to mathematical modeling, and mathematical students to systems biology. Biological topics will include gene systems, protein systems, metabolic systems and signaling systems. Mathematical tools will include basic modeling concepts, approximation, static networks, linear vs. nonlinear systems and how to linearize nonlinear systems, and parameter estimation and optimization. Specific case studies will include integrative analysis of genome, protein, and metabolite data, systems biology in medicine and drug development, and synthetic biology.

<td>This graduate level course extends mathematical methods and models of biological systems, covered in MATH 4010/6010 (BIO 6930) ❝Mathematical Biology❞. The main focus will be on multidimensional and spatial models of biological systems. The topics will include the dispersal of biological populations and age structure on population growth; rates of spread of invading organisms and population persistence; branching random walks and chain reactions; stochastic and Markov models of biological systems; cellular automata models with deterministic and stochastic rules, related to the infectious disease transmission and control; the Game of Life, and pattern formation in biological networks of different nature.</td>

<td>Topics in Behavioral Neuroscience</td>
<td>1.0</td>
<td>Consent of instructor (Same as PSYC 8956.) May be repeated if topics vary.</td>
</tr>
<tr>
<td>NEUR 8750</td>
<td>Seminar in Philosophy of Science</td>
<td>3.0</td>
<td>(Same as PHIL 8130.) Basic philosophic issues and problems attending any reasonable adequate discussion of that nature, function and limits of natural science and its relationship to the social sciences. Includes such topics as the logic of hypothesis construction, testability, criteria of confirmation, physical laws and their role in scientific explanation, the nature of scientific theories, scientific realism, the completability of science, the social sciences, scientism, and the difference between philosophy and science. May be repeated if topic varies. A maximum of six credit hours may be applied toward the degree.</td>
</tr>
<tr>
<td>NEUR 8760</td>
<td>Seminar in Philosophy of Mind</td>
<td>3.0</td>
<td>(Same as PHIL 8330.) Examination of issues in philosophy of mind. Topics may include: dualism, behaviorism, identify theories, functionalism, eliminative materialism, mental content, mental causation, consciousness, qualia, subjectivity. May be repeated once if topic varies.</td>
</tr>
</tbody>
</table>
NEUR 8761 Seminar in Moral Psychology
CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
DESCRIPTION (Same as PHIL 8770.) An in-depth examination of select topics in moral psychology, such as moral intuitions, moral disagreement, agency and responsibility, virtues, altruism, etc. May be repeated if topic varies. 3 Credit Hours.

NEUR 8762 Topics in Neuroethics
CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
DESCRIPTION (Same as PHIL 6790) Study of specific issues in neuroethics, such as cognitive enhancement, neuromarketing, neurolaw, neuroscience and free will, etc. 3 Credit Hours.

NEUR 8763 Seminar in Ethics
CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
DESCRIPTION (Same as PHIL 8700) Topics such as Greek ethics, Kantian ethics, utilitarianism, feminist ethics, and religious ethics. May be repeated if topic varies. 3 Credit Hours.

NEUR 8764 Seminar in Bioethics
CREDIT HOURS 3.0
PREREQUISITES Consent of the instructor
DESCRIPTION (Same as PHIL 8740) Examination of contemporary issues in bioethics. Topics may include: research ethics-human and non-human subjects; end-of-life decision making; eugenics and The Human Genome Project; reproductive-cloning, freezing embryos, artificial insemination; abortion-maternal/fetal relations, embryonic stem cell research; and health care disparity-race, gender, and income. May be repeated if topic varies. 3 Credit Hours.

NEUR 8770 Seminar in Philosophy and Cognitive Science
CREDIT HOURS 3.0
DESCRIPTION (Same as PHIL 8340.) An in-depth examination of specific issues concerned with the interdisciplinary study of mind, drawing on research from philosophy, neuroscience, psychology, anthropology, linguistics, computer science, and ethology. Topics may include: mental representation and language, sensation and perception, inference and reasoning, innateness and modularity, the emotions, learning and conceptual change, moral cognition and development, consciousness and self-consciousness, mental deficits and disorders, animal and computer models of cognition, folk psychology and reductive strategies in neurobiology; a careful reading of one or more recent influential books in philosophy or cognitive science.

NEUR 8780 Seminar in Neuroscience
CREDIT HOURS 1.0
DESCRIPTION Current research topics in neuroscience. Repeatable.

NEUR 8790 Topics in Neuroscience
CREDIT HOURS 1.0 TO 4.0
PREREQUISITES Consent of instructor
DESCRIPTION This course provides in depth training on a subject matter in neuroscience. Includes learning to read and critique scientific literature. May be repeated if topics vary.

NEUR 8800 Master's Research
CREDIT HOURS 1.0 TO 25.0
DESCRIPTION Master's research. Repeatable course.

<td>NURS 6910</td>
<td>Caring for Families and Communities</td>
<td>5.0</td>
<td>For RNs only: The course focuses on the acquisition and application of evidenced-based nursing practice with the goal of improving health at the individual and population levels. Emphasis is placed on health promotion and disease and injury prevention in collaboration with the client and key stakeholders. Under faculty supervision, the student develops and refines professional practice (3 hrs didactic credit; 2 hrs clinical credit [90 clinical contact hrs]).</td>
<td></td>
</tr>
<tr>
<td>NURS 6930</td>
<td>Leadership and Management in Nursing</td>
<td>3.0</td>
<td>Must be a Registered Nurse (RN)</td>
<td>The Leadership and Management in Nursing course is for registered nurses (RNs). The course focuses on the development, design and application of principles of leadership and management of health care delivery systems. Emphasis is placed upon assuming responsibility for nursing practice including decision making and nursing actions. Serves as one of the two Critical Thinking through Writing (CTW) courses required of all Nursing majors.</td>
</tr>
<tr>
<td>NURS 7000</td>
<td>Research Methods for Advanced Practice Nurses</td>
<td>3.0</td>
<td>Admission to master's program in the School of Nursing</td>
<td>Quantitative research approaches are emphasized, and qualitative research is introduced. Emphasis is on the critique and utilization of nursing research in advanced practice. Beginning skills in conducting research are introduced and serve as a foundation for the applied clinical and research projects.</td>
</tr>
<tr>
<td>NURS 7001</td>
<td>Culture, Health Literacy, and Disparities in Healthcare</td>
<td>3.0</td>
<td>Admission to master's program in the School of Nursing</td>
<td>Strategies to prepare healthcare providers to care for a changing and diverse population will also serve as a major focus of the course.</td>

<td>NURS 7500</td>
<td>This course provides an overview of aging from societal and health perspectives. The course explores ethical and legal issues with a special focus on end-of-life considerations. The course emphasizes the normal aging process and health care problems common to the geriatric population.</td>
</tr>
<tr>
<td>NURS 7030</td>
<td>Clinical Practicum in Adult Health Nursing I</td>
<td>7.0</td>
<td>NURS 7500, NURS 7550</td>
<td>Pre- or co-requisites NURS 7310, NURS 7320. This course is designed for students to implement advanced nurse practice roles while under the supervision of a clinical preceptor. Advanced practice interventions will be used to initiate improvement of care to aggregates of acute or chronically ill patients across the adult life span. Students will analyze the nature of acute tertiary care and the system in which acute illnesses occur. Two credit hours class, five credit hours clinical practice. (225 clinical practice hours).</td>
</tr>
</tbody>
</table>
NURS 7040  Clinical Practicum in Adult Health Nursing II

CREDIT HOURS  6.0
PREREQUISITES  NURS 7030
DESCRIPTION  This course is designed for students to function in the advanced nurse practice role independently while collaborating with a clinical preceptor. An analysis and evaluation of advanced nurse practice interventions with regard to patient and fiscal outcomes in aggregates of acute or chronically ill patients across the adult life span will be emphasized. One hour credit seminar; five hour credits clinical practice (total 225 clinical practice hours).

NURS 7060  Directed Readings

CREDIT HOURS  1.0 TO 3.0
DESCRIPTION  Individual readings on special topics in nursing and related areas under the guidance of a faculty member.

NURS 7080  Advanced Practice in the Ambulatory Health Care of Women

CREDIT HOURS  6.0 OR 7.0
PREREQUISITES  NURS 7500, NURS 7550; NURS 7340 (FNP only); NURS 7050 (AH only)
COREQUISITES  NURS 7310, NURS 7320
DESCRIPTION  The course is designed to prepare the student to provide health promotion, health maintenance activities and management of the woman during the reproductive years and throughout the lifespan Sociopolitical and cultural issues related to women's health will also be discussed. The student is also provided an opportunity to integrate and apply theoretical and clinical knowledge acquired in previous courses. Nurse practitioner clinical skills will be refined and evaluated in a collaborative relationship with nurse practitioners, certified nurse midwives, physicians, and other health care providers. For Six Credit Hours: Three credit hours lecture; three credit hours clinical practice (135 clinical practice hours). For Seven Credit Hours: Three credit hours lecture; four credit hours clinical practice (180 clinical practice hours).

<td>NURS 7090</td>
<td>Advanced Practice with the Childbearing Family</td>
<td>9.0</td>
<td>NURS 7080</td>
<td>Emphasis is placed on the development of a broad knowledge of the physiological and pathophysiological changes occurring during the periconceptual, antepartum, intrapartum, and postpartum periods. The course is designed to prepare the student to provide health promotion, health maintenance activities and management of the child bearing woman. Nursing assessment and management competencies will include the selection of appropriate diagnostic studies, pharmacological and other treatment interventions in collaboration with the responsible primary health care provider. Three credit hours lecture; six credit hours clinical practice (270 clinical practice hours).</td>
</tr>
<tr>
<td>NURS 7100</td>
<td>Advanced Psychiatric Care of Pediatric and Geriatric Clients</td>
<td>6.0</td>
<td>Graduate of the Psychiatric NP/CNS Adult Program</td>
<td>This course focuses on assessment of the child, adolescent, and geriatric psychiatric mental health client. It also focuses on current treatment modalities for each age group. Students will engage in nursing and psychosocial diagnostic decision making in a variety of hypothetical and clinical scenarios. National priorities for mental health care and a critical analysis of the current delivery system will be discussed.</td>
</tr>
<tr>
<td>NURS 7120</td>
<td>Theories of Advanced Psychiatric Nursing</td>
<td>3.0</td>
<td></td>
<td>Pre requisite: Admission to the PMH program. Pre requisites or co-requisites: NURS 7310, NURS 7320, NURS 7500, NURS 7550, NURS 7900. This course provides concepts critical to the advanced practice of psychiatric nursing. Human responses will be examined using psychodynamic, behavioral, cognitive, humanistic, and other paradigms. Critical analysis of historic psychiatric thought will be done in the context of current research findings and sociocultural trends. Concepts that provide a basis for caring and humanistic approaches to mental health and mental illness will be explored.</td>
</tr>

</tbody>
</table>
NURS 7160  Psychiatric Mental Health Nursing of Families and Groups
CREDIT HOURS 6.0
PREREQUISITES NURS 7000, 7120, 7140, 7170, 7310, 7320, 7340, 7420, 7500, 7550, 7600, 7900
COREQUISITES NURS 7190
DESCRIPTION This course is designed to provide knowledge of theories related to family and group therapy and opportunity for clinical practice with acquired knowledge. Nursing assessment, interventions and evaluations for family and group therapy will be covered. Students will examine pertinent models of family and group psychotherapy and utilize critical thinking to determine treatment options. Consumer activism, family empowerment, cultural and ethical considerations, research priorities and legislative issues will be discussed. One seminar credit hour; 3 clinical credit hours (140 clinical practice hours).

NURS 7170  Advanced Psychopharmacology
CREDIT HOURS 2.0
PREREQUISITES NURS 7000, NURS 7120, NURS 7310, NURS 7320, NURS 7340, NURS 7500, NURS 7600, NURS 7750, NURS 7900
COREQUISITES NURS 7140, NURS 7420
DESCRIPTION This course is designed to provide the advanced practice health care provider with knowledge of effect of pharmacological agents on the behavioral and central nervous system, the application of these agents in prevention and treatment of psychopathological dysfunction, and developing skills in the use of prescriptive drug protocols for adult populations.

NURS 7190  Seminar on Complex Cases
CREDIT HOURS 2.0
PREREQUISITES NURS 7000, NURS 7120, NURS 7140, NURS 7310, NURS 7320, NURS 7340, NURS 7420, NURS 7500, NURS 7550, NURS 7600, NURS 7900
COREQUISITES NURS 7160
DESCRIPTION This course offers complex cases involving adults and older adults with medical and mental illness and/or substance abuse. Students will discuss various advanced practice roles within psychiatric nursing, ie. consultation, education, administration, liaison, and independent practice.

NURS 7200  Nurse as Educator: Instructional Methods
CREDIT HOURS 3.0
PREREQUISITES Entrance to Nursing graduate level professional programs
DESCRIPTION This course offers an overview of the role of nurse as educator and will focus on the variety of instructional methods employed by nurse educators to facilitate learning in the adult within a variety of settings. Distance learning and use of information technology in the educator role will also be explored.

NURS 7210  Nurse as Educator: Assessment and Evaluation
CREDIT HOURS 3.0
PREREQUISITES Entrance to Nursing graduate level professional programs
DESCRIPTION This course will focus on the variety of assessment strategies employed by nurse educators to evaluate learning in the adult in a variety of settings. Curriculum development and program evaluation will also be explored.
NURS 7310  Advanced Pathophysiological Concepts in Nursing, Part 1
CREDIT HOURS  3.0
DESCRIPTION  This is one of two courses designed to facilitate the student's understanding of physiology and pathophysiology related to advanced nursing practice in adults and children. Physiological and pathophysiological phenomena are examined from a physical and experiential perspective. During Part 1 the following systems will be addressed: genetics, cardiovascular, pulmonary, musculoskeletal, fluids and electrolytes, and neurological.

NURS 7320  Advanced Pathophysiological Concepts in Nursing, Part 2
CREDIT HOURS  3.0
DESCRIPTION  This is one of two courses designed to facilitate the student's understanding of physiology and pathophysiology related to advanced nursing practice in adults and children. Physiological and pathophysiological phenomena are examined from a physical and experiential perspective. During Part 2, the following systems will be addressed: hematology, immunology, endocrinology, digestive, cancer, and renal.

NURS 7340  Common Health Problems of Adults
CREDIT HOURS  5.0 TO 10.0
PREREQUISITES  NURS7310 OR NURS7320 NURS 7500, NURS 7550
COREQUISITES  NURS7310, NURS 7320
DESCRIPTION  In this course the student will provide health promotion and maintenance activities for adult clients and their families either through direct intervention or by appropriate referral. The student will assess for and manage common health problems of adult clients across the lifespan in ambulatory health care settings. Nursing assessment and management competencies will include the selection of appropriate diagnostic studies, pharmacological and other treatment interventions in collaboration with the responsible primary health care providers. Content this semester also focuses on nurse practitioner role socialization.

NURS 7342  Common Health Problems of Children and Adolescents
CREDIT HOURS  6.0
PREREQUISITES  NURS 7340
DESCRIPTION  Four hours lecture, 9 hours of clinical/week. This course focuses on the health promotion and health maintenance of infants, children, and adolescents. Theories of growth and development are reviewed. Content in relation to parenting behaviors is included. An emphasis is placed on the assessment and management of common child and adolescent health problems.
NURS 7360  Advanced Practicum
CREDIT HOURS  4.0
PREREQUISITES  NURS 7340, NURS 7342, NURS 7080
DESCRIPTION  Four hours seminar/term, 12 hours of clinical/week. Final course in the primary health care sequence: student is provided the opportunity to integrate and apply theoretical and clinical knowledge acquired in previous courses. The student may select the clinical area in which intensive practice is desired. Clinical skills will be refined and evaluated in collaborative relationships with Nurse Practitioners, Physicians, and other primary health care providers. Four credit hours clinical practice (total 180 clinical practice hours).

NURS 7420  Common Health Problems and Issues Pertinent to Children and Adolescents
CREDIT HOURS  2.0 TO 9.0
PREREQUISITES  NURS 7500, NURS 7550
COREQUISITES  NURS 7310, NURS 7320
DESCRIPTION  This course focuses on the role of the advanced practice nurse in caring for children and adolescents. It includes developmental issues pertinent to each age group and common health problems; also, critical thinking and diagnostic reasoning are utilized in the management of the common problems based on pathophysiological findings. Four credit hours lecture; five credit hours clinical practice (225 clinical practice hours).

NURS 7430  Chronic Health Problems in Children and Adolescents
CREDIT HOURS  7.0
PREREQUISITES  NURS 7420
DESCRIPTION  This course focuses on the role of the advanced practice nurse in child health as they work with children using diagnostic reasoning, case management, education and referral. Four credit hours lecture; three credit hours clinical practice (135 clinical practice hours).

NURS 7440  Advanced Practicum in Child Health
CREDIT HOURS  10.0
PREREQUISITES  NURS 7430, Co-requisite: NURS 7940
DESCRIPTION  This course provides an opportunity for the advanced practice nurse in child health to implement the role while collaborating with preceptors in providing care to children adolescents and their families. Two credit hours lecture; eight credit hours clinical practice (total 360 clinical practice hours).

NURS 7500  Advanced Health Assessment
CREDIT HOURS  3.0
DESCRIPTION  This asynchronous online course is designed to teach advanced health assessment of individuals across the lifespan, infancy through geriatrics. Emphasis is on acquiring and analyzing significant data in order to develop a comprehensive and holistic assessment. Students will apply the diagnostic reasoning process in order to formulate a clinical impression or diagnosis. Two credit hour lecture, one credit hour on-site laboratory and clinical practice (45 clinical practice hours).

NURS 7550  Pharmacology for the Advanced Practice Nurse
CREDIT HOURS  3.0
DESCRIPTION  This course is designed to provide the advanced practice health care provider with a knowledge of pharmacological agents used in the treatment of adults, adolescents, and young children. Emphasis is placed on indications, mechanisms of action, prescriptive drug regimes, and dosages for specific health problems.
NURS 7600  The Culture of Healthcare
CREDIT HOURS  2.0
DESCRIPTION  This course is designed to introduce the student to advanced practice nursing. The role of the advance practice nurse will be emphasized in the context of different health systems and populations.

NURS 7610  Leadership & Organizational Behavior in Healthcare Systems
CREDIT HOURS  3.0
PREREQUISITES  Admission to Master's Program or permission of the instructor
DESCRIPTION  Leadership is a core concept in managing innovation. Leadership theory and the role of a leader in nursing and healthcare organizations are the key topics of this course. In addition, this course includes an introduction to organizational structures, theory, and practice.

NURS 7620  Leadership in Promoting Innovations in Nursing and Health Care Systems
CREDIT HOURS  3.0
PREREQUISITES  NURS 7610
DESCRIPTION  Leadership for innovation and change is a primary focus for this advanced nursing master's degree. This course builds on the previous leadership and organizational course with an additional emphasis on change theory and competencies useful to implement change. Content related to operational and strategic planning, development of objectives, proposal development and grant writing will be explored. The course will also focus on exploration of new ideals.

NURS 7630  Healthcare Policy, Healthcare Law and Medical Ethics
CREDIT HOURS  3.0
PREREQUISITES  NURS 7610; HA 8160 (prerequisites or co-requisites)
DESCRIPTION  Policy affects the delivery of health care services. This course focuses on the development of public policy and factors that affect change in policy. Also, the role of professional organizations in the development of standards of practice that guide the provision of nursing services is analyzed. The basics of health care law will be included. Medical ethics as they relate to informatics, use of new technology and administrative issues will be addressed.

NURS 7660  Health Care Technology and Clinical Informatics
CREDIT HOURS  3.0
DESCRIPTION  Admission to the master's program in the School of Nursing. Innovations in technology and informatics are changing the delivery of health care services. Nurse leaders must be prepared to evaluate the effectiveness of these innovations. This course includes an introduction to medical technology and clinical informatics assessment. The basic knowledge and competencies that describe the field of health care informatics are discussed. In addition, strategies to evaluate new technologies in health care will be addressed.

NURS 7950 Theoretical Foundations and Research Methods for Advanced Practice Nursing
CREDIT HOURS 3.0
PREREQUISITES Admission to the Master's program in the School of Nursing
DESCRIPTION This course focuses on developing the skills necessary for advanced practice nurses to critique and utilize theory and research in advanced practice. An overview of the relationships among theory, practice and research are addressed. Nursing theories, as well as theories from other professions, are explored and applied to both research and practice. Aspects of the development and process of both quantitative and qualitative nursing research are introduced.

NURS 7980 Research Practicum Directed research in collaboration with a faculty member
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION For graduate assistants. Does not count toward degree requirements.

NURS 8000 Human-Environment Interactions and Health
CREDIT HOURS 3.0
PREREQUISITES Permission of instructor
DESCRIPTION This course focuses on health from the perspective of human-environment interactions. Concepts of human interaction, health, and environment are critically examined. Research approaches and issues related to the investigation of human-environment interactions are explored based on a review of research.

NURS 8001 Introduction to Epidemiology for Health Professionals
CREDIT HOURS 3.0
PREREQUISITES Admitted to Graduate Nursing Program
DESCRIPTION Introduction to Epidemiology for Health Professionals is a core course in the Nursing doctoral program. The course is designed to introduce students to the concepts of epidemiological methods and their practical applications in the understanding of determinants and distributions of health-related events. The course will cover basic principles of epidemiology, including disease control, surveillance, screening, study design, risk estimation, bias and causation. The course will demonstrate the multidisciplinary environment and ecological approaches to the understanding of disease etiology and prevention. Additionally, this course will explore the interface between epidemiology and policy development. Both synchronous and asynchronous web-based learning will be utilized in this course.

NURS 8012 Qualitative Research Methods
CREDIT HOURS 3.0
PREREQUISITES NURS 8035
COREQUISITES NURS 8040
DESCRIPTION This course is designed to enable the student to examine the epistemology underlying various qualitative approaches and to gain beginning skills in one qualitative research approach. Course activities are designed to provide students with experiences in data generation, data analysis methods, critique and report generation. Each student will participate in knowledge generation from a qualitative perspective.
**NURS 8035**  
**Theoretical and Philosophical Foundations for Nursing**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Permission of the instructor  
**DESCRIPTION** This course is designed to serve as a basis for doctoral study in nursing. Selected issues and approaches related to philosophy, theory, science, research and practice will be explored. Models for evaluation of theory will be considered and used in analyzing theoretical frameworks, which have been constructed by nurse scholars and others.

**NURS 8040**  
**Theory Construction**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Permission of instructor, NURS 8035  
**DESCRIPTION** This course is designed to develop the student's ability to construct and utilize theory to guide research. Different approaches to the use of theory in quantitative and qualitative research will be examined.

**NURS 8045**  
**Introduction to Advanced Nursing Research**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Admission to the doctoral program  
**DESCRIPTION** This course is the introductory course for advanced nursing research. Quantitative and qualitative approaches to nursing research are included. An overview of research designs, ethical parameters, methods, and data analysis techniques are discussed. Students identify an area of study, describe the problem, construct a purpose statement, and develop an annotated bibliography for the area. This course will include experiences for students to develop knowledge and skills related to the support, analysis, and dissemination of research.

**NURS 8050**  
**Quantitative Research Methods I**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Permission of Instructor  
**DESCRIPTION** The first course in a two course sequence focuses on the application of basic quantitative research designs to nursing research. The advantages and limitations of quantitative methodologies will be presented including usefulness for knowledge development in nursing. Emphasis is on descriptive, correlational, and comparative designs and their application. Students will begin development of a quantitative research proposal based on guidelines of a selected funding agency.

**NURS 8051**  
**Quantitative Research Methods II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** NURS 8050  
**DESCRIPTION** This second course in a two course sequence focuses on the application of diverse quantitative research designs in nursing research, including experimental, multivariate, and meta-analytic. Instrument selection and development will also be addressed. Course activities will provide students with experiences in quantitative data generation and analysis, and in further development of a quantitative research proposal.

**NURS 8060**  
**Directed Reading**  
**CREDIT HOURS** 1.0 TO 3.0  
**PREREQUISITES** Permission of instructor  
**DESCRIPTION** Individual readings on special topics in nursing and related areas under guidance of a faculty member.
**NURS 8070  Comprehensive Examination**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Permission of adviser  
**DESCRIPTION** The comprehensive examination is required for progression to doctoral candidacy. The purpose of the comprehensive examination is to ascertain the student's readiness to conduct the dissertation. The comprehensive examination should address the dissertation topic area, anticipated research methodologies, and related theoretical perspectives. Students register for this course at each attempt to complete the comprehensive examination. Maximum of two attempts are allowed.

---

**NURS 8100  Health in Vulnerable Populations**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Admission to PhD program and PH 8001  
**DESCRIPTION** This course focuses on vulnerable populations from the perspective of health. Selected issues in the conduct of research with vulnerable populations will be discussed. Strategies to foster health promotion, health protection and health restoration will be explored. Students will select a vulnerable population and conduct a critical analysis of the science in a specific topic area.

---

**NURS 8120  Univariate Statistics for Health Care Professionals**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Admission to PhD program or permission of the instructor  
**DESCRIPTION** This course focuses on application of univariate statistical analysis methods to answer research questions and test hypotheses about clinical research data. The course includes addressing threats to statistical conclusion validity, determining the level of measurement of study variables and how this influences the choice of statistical tests, formulating an analysis plan based on research questions/hypotheses, and conducting and interpreting the output of statistical analysis. Analyzing actual clinical data using SPSS statistical software is emphasized including alternative analytic approaches such as data transformation, if the data do not meet statistical assumptions.

---

**NURS 8140  Multivariate Statistical Analysis for Health Care Professionals**

**CREDIT HOURS** 3.0  
**PREREQUISITES** NURS 8120 or permission of the instructor  
**DESCRIPTION** The second of a two course sequence in applied statistical analysis, focuses on the application of multivariate statistical analysis methods to answer research questions and test hypotheses about clinical research data. Multivariate statistical approaches in both analysis of variance and linear regression frameworks are presented. In addition, the course addresses complex analytic situations including analysis of change, repeated measures, and multiple correlated dependent variables. Special topics are also covered including meta analysis, power analysis for multivariate hypotheses and necessary components of data analysis sections of grant proposals. Analyzing actual clinical data using SPSS statistical software is emphasized including alternative analytic approaches such as data transformations, if the data do not meet statistical assumptions.
**NURS 8160 Introduction to Health Systems**

**CREDIT HOURS:** 3.0  
**PREREQUISITES:** Master's degree in nursing  
**DESCRIPTION:** Introduction to Health Systems will build upon students understanding of health care systems and delivery in the United States. This will be accomplished through a focused study of measurement and determinants of individual and population based health. A comparison will be made of other health systems' components and interdependence and an evaluation of other health systems' performance and outcomes with that of the U.S.

**NURS 8200 Special Topics in Nursing and Health I**

**CREDIT HOURS:** 3.0  
**PREREQUISITES:** Permission of the instructor  
**DESCRIPTION:** This course is designed to provide an in-depth knowledge and critique of research and theory related to specific topics of significance to nursing and related disciplines. Topics will vary each term.

**NURS 8205 Perspective on Leadership, Research, Ethics and Policy**

**CREDIT HOURS:** 3.0  
**PREREQUISITES:** Admission to the PhD program or permission of the instructor  
**DESCRIPTION:** This course presents perspectives on ethics, policy, and leadership as they relate to research. Scientific and professional ethics will be examined from the research perspective. The influence of ethics and research findings in the development of policy will be explored. The influence of leadership, ethics, and research on health policy and the delivery of health care services will be explored.

**NURS 8230 Phenomenological Inquiry**

**CREDIT HOURS:** 3.0  
**PREREQUISITES:** NURS 8012 or permission of the instructor  
**DESCRIPTION:** The focus of this course is to introduce the concept of phenomenological inquiry and to analyze its applications of its use in selected disciplines. The work of Husserl, Heidegger, Sartre and Merleau-Ponty will be used to develop an understanding of the historical underpinnings of the phenomenological movement. Implications of knowledge development will be examined.

**NURS 8240 Advanced Data Management Using SPSS**

**CREDIT HOURS:** 3.0  
**PREREQUISITES:** NURS 8045  
**DESCRIPTION:** This course focuses on the use of SPSS for managing research data. The course assumes a working knowledge of basic data management skills in SPSS including establishing and modifying the data dictionary using the SPSS data editor, and working with data output files. The course will focus on importing and exporting data into and out of SPSS and using commands within the syntax window to create programming language to code questionnaires, address missing data issues, and conduct major analyses.

**NURS 8250 Writing for Publication**

**CREDIT HOURS:** 1.0  
**DESCRIPTION:** This course presents a process for developing one's scholarship through dissemination of knowledge through publication. Pragmatic approaches of the processes involved in developing a manuscript for submission for publication in an academic venue will be addressed. The focus will be on the entire process of publishing from formation of ideas to the final closing phases for a published article. Writing both clinical and research manuscripts will be addressed. Students will have the opportunity to develop their own manuscript for submission.

<td>Evidence Based Practice</td>
<td>3.0</td>
<td>Must be a Registered Nurse (RN)</td>
<td>This course provides the DNP student with an overview of evidence based management, organizational behavior and change theories applied to health care. The role of the DNP graduate as an effective system leader of interprofessional care teams will be examined.</td>
</tr>
</tbody>
</table>
NURS 8675  Health and Law: Vulnerable Populations and Disparities
CREDIT HOURS 3.0
DESCRIPTION The role of professional organizations in the development of standards of practice that guide the provision of nursing services is analyzed. The basics of health care law will be included. Medical ethics as they relate to informatics, use of new technology and administrative issues will be addressed. Additional content pertaining to health related disparities will be included. Selected issues in the conduct of research with vulnerable populations will be discussed. Strategies to foster health promotion, health protection and health restoration will be explored.

NURS 8700  Scholarly Writing
CREDIT HOURS 2.0
PREREQUISITES Must be a registered nurse (RN)
DESCRIPTION This course is designed to provide learners with an opportunity to disseminate knowledge through scholarly writing. The focus will be on generating ideas, manuscript development, and the publishing process. Topics will include ethics in writing style and grammar, and manuscript organization and editing.

NURS 8990  Research Practicum
CREDIT HOURS 1.0 TO 6.0
PREREQUISITES Permission of instructor
DESCRIPTION This course provides students the opportunity to participate in the research process with a faculty member who is actively engaged in research.

NURS 8992  Capstone Project
CREDIT HOURS 2.0
PREREQUISITES Must be a Registered Nurse (RN)
DESCRIPTION This course will introduce the student to the role of the Doctor of Nursing Practice. The student will explore the role using the essentials of DNP education and its application to their own role as a clinical scholar. Use of informatics, technology, scholarship, and evidence based nursing will be required. The requirements for the DNP scholarly project will be examined and discussed in relation to various advanced practice nursing roles. The student will choose an area for scholarship immersion, identify a topic for their scholarly project, and begin to design their professional portfolio.

NURS 8994  Capstone Project Planning
CREDIT HOURS 2.0
PREREQUISITES Must be a Registered Nurse (RN)
DESCRIPTION This course is the second course in the Doctor of Nursing Practice (DNP) practicum experience. In this course the student will have opportunities for directed practice experiences with mentors in the chosen area of specialization. Students will gain knowledge planning their scholarly projects and building their knowledge base and skills at a higher level of complexity. In this course the student with the assistance of faculty will design and plan the DNP scholarly project.

NUTR 6300  Nutrition Counseling Skills
CREDIT HOURS  3.0
PREREQUISITES  Current student in good standing in the Master of Science in Health Science, Nutrition
DESCRIPTION  This course focuses on the application of a helping model and interviewing and counseling skills to help clients achieve and maintain dietary behavior change. The course includes practicing effective interpersonal relationship skills and the implementation of different nutrition counseling theories and strategies. Role play and mock counseling sessions will engage students to effectively communicate in both in-patient and out-patient settings, in working with difficult patients and with patients living in environments leading to non-compliance. The course will also encourage communication skills that foster collaboration with other health care professionals/team and the ability to help triage patients appropriately into expanded care/programs/classes. While practicing a variety of nutrition counseling strategies, the student will become more aware and comfortable with effective communication as a dietetics professional, in recognizing barriers to dietary change in a variety of settings, and in implementing a holistic approach to improved health.

NUTR 6500  Macronutrients
CREDIT HOURS  3.0
PREREQUISITES  None for students accepted into the M.S. in Health Sciences concentration in Nutrition Program
DESCRIPTION  Course covers to the digestion, absorption, biochemical functions, and metabolism of carbohydrates, lipids, and protein. Emphasis is placed on the role of macronutrients in human nutrition.

NUTR 6700  Micronutrients
CREDIT HOURS  3.0
PREREQUISITES  None for students accepted into the M.S. in Health Sciences concentration in Nutrition Program
DESCRIPTION  This course covers the digestion, absorption, biochemical functions, and metabolism of vitamins, minerals, and trace elements. Emphasis is placed on the role of micronutrients in human nutrition.

NUTR 6800  International Nutrition
CREDIT HOURS  3.0
PREREQUISITES  Permission of Instructor
DESCRIPTION  The course will provide the student with the opportunity to understand major issues in international nutrition that influence health, survival, and development capacity of people living in developing societies and various approaches to improving nutritional well-being of those populations.

NUTR 6955  Nutrition Policy and Program Planning
CREDIT HOURS  3.0
PREREQUISITES  None for students accepted into the Health Science degree program with a specialization in nutrition. Others must seek consent of the instructor.
DESCRIPTION  This course focuses on the policy making process at the federal and state levels and the process of program planning and evaluation, as related to food and nutrition programs. Group projects and independent assignments are included to help students develop a conceptual framework for developing, implementing and evaluating nutrition policies and programs.
NUTR 6970  Communicating Nutrition Science to the Public
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  This interactive course is designed to give students a hands-on experience with nutrition and health communications various media formats. Students will evaluate and create nutrition and health messaging for target audiences across traditional, digital and social media formats, plan and practice media interviews, and write feature articles for web and print publication.

NUTR 6990  Entrepreneurial Nutrition
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  Students learn successful techniques of entrepreneurship in dietetics. Business plans will be formulated for development of private practice in dietetics.

NUTR 7101  Nutrition Issues
CREDIT HOURS  3.0
PREREQUISITES  SNHP 6000 and NUTR 4200 or NUTR 7200 or consent of instructor
DESCRIPTION  This course includes advanced level study of evidence based practice guidelines and strength of evidence for medical nutrition therapy of diseases prevalent in vulnerable populations and for other food and nutrition issues. Nutrition and laboratory assessment parameters and food safety issues specific to individual diseases are examined, as well as the role of complementary and alternative medicine in medical nutrition therapy of individual diseases.

NUTR 7103  Advanced Food Investigations and Clinical Problems
CREDIT HOURS  3.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  Development of food products to meet specialized clinical needs.

NUTR 7104  Reproductive and Pediatric Nutrition
CREDIT HOURS  3.0
PREREQUISITES  NUTR 7200 or consent of the instructor
DESCRIPTION  The role of nutrition is examined in adolescent and adult pregnancy, lactation, infancy, and childhood. Nutrition aspects of family planning, complications of pregnancy, management of low birth weight infants, and special feeding problems and practices of infancy and childhood are included.

NUTR 7105  Geriatric Nutrition
CREDIT HOURS  3.0
PREREQUISITES  NUTR 4200 or NUTR 7200 or consent of instructor
DESCRIPTION  A systems approach is used to discuss macro-nutrient requirements in human aging. Topics covered include nutrition assessment, nutrition in chronic disease management, health promotion and disease prevention, food intake patterns, and federal and state nutrition services for older adults.

NUTR 7106  Advanced Sports Nutrition
CREDIT HOURS  3.0
PREREQUISITES  NUTR 6104 or consent of the instructor
DESCRIPTION  This course focuses on the relationships between nutrition, strength, endurance and physical performance with an emphasis on nutrient utilization during exercise. Practical considerations for the nutrition assessment of athletes are discussed.

NUTR 7107  Advanced Clinical Nutrition
CREDIT HOURS  3.0
PREREQUISITES  NUTR 6104
DESCRIPTION  A large segment of the course is devoted to review of journal articles dealing with the most recent information on the significance and management of selected disease states.
NUTR 7108 Nutrition Assessment

CREDIT HOURS 3.0

PREREQUISITES NUTR 6104 or consent of the instructor

DESCRIPTION This course covers the indirect and direct methods used in the assessment of nutrition status. Both traditional and new methods of assessment are discussed, including anthropometric techniques, nutrition history screens, soft tissue assessment, biochemical assessment, dietary survey techniques, and demographic assessment.

NUTR 7109 Body Composition Assessment

CREDIT HOURS 3.0

PREREQUISITES Graduate student in the Byrdine F. Lewis School of Nursing and Health Professions or consent of instructor.

DESCRIPTION Assessment of body weight, body dimensions, and body composition is of considerable interest to those working in the health professions, as the information derived from these assessments is associated with health risks. In addition, the health professionals' ability to accurately plot changes in body composition over time is important for determining whether the patient/client is changing in a way that reduces or increases health risk. There are numerous strategies for assessing body dimensions and composition, ranging from weight/height growth charts used with children, to skinfolds, and to more sophisticated analysis techniques that involve bioelectrical impedance and dual-energy x-ray absorptiometry. This course will review both the historical and new methods available to health professionals for the assessment of body dimensions and body composition, with special emphasis on the strengths and weaknesses of each technique and how these techniques may be appropriately used with the client/patient.

NUTR 7200 Nutrition and Disease

CREDIT HOURS 3.0

PREREQUISITES NUTR 3500/6500 and NUTR 3700/6700 or equivalent and consent of instructor

DESCRIPTION This course introduces students to the role of nutrition in the prevention and management of diseases and conditions related to the gastrointestinal tract, cardiovascular system, the renal system, and pulmonary function. Anemias, metabolic disorders, inflammation, immunological disorders, and osteoporosis are also reviewed.

NUTR 7250 Medical Nutrition Therapy Laboratory

CREDIT HOURS 1.0

PREREQUISITES None for students accepted into the Coordinated Program (without a verification statement)

DESCRIPTION This course introduces students to medical nutrition therapy through evidence based practice. Medical nutrition therapy for the prevention and treatment of the following conditions is covered: gastrointestinal, liver, gallbladder, pancreas, renal trauma, pulmonary and special feeding techniques. For each condition, nutrition assessment and food and nutrient interactions with commonly prescribed medications are discussed, as well as complementary and alternative therapies.

NUTR 7280 Nutritional Genomics

CREDIT HOURS 3.0

PREREQUISITES NUTR 3500 and NUTR 3700

DESCRIPTION Course covers how nutrients affect gene expression, how nutrients and genes interact, how nutrients affect the process of select diseases, and epigenomics (alteration of gene expression without genetic change)
**NUTR 7810**  
**Interpretation of Clinical Laboratory Values for Health Professionals**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** CHEM 1151K, CHEM 1152K, AND EITHER human physiology OR biochemistry  
**DESCRIPTION** The course will provide the student with the opportunity to understand the interrelationships between clinical laboratory test results and the disease process occurring in the patient. Laboratory values from hematology, clinical chemistry and urinalysis, and microbiology/immunology will be interpreted for infectious diseases, liver diseases, kidney diseases, hematologic disorders, and metabolic disorders. Appropriate case studies will be used to illustrate clinical significance.

**NUTR 7899**  
**Nutrition Project**  
**CREDIT HOURS** 1.0 TO 3.0  
**PREREQUISITES** Consent of instructor  
**DESCRIPTION** This course includes supervised independent study in an area of special interest to the student.

**NUTR 7900**  
**Special Problems in Nutrition and Dietetics**  
**CREDIT HOURS** 1.0 TO 12.0  
**PREREQUISITES** NUTR 6104 and consent of the instructor  
**DESCRIPTION** Individual study of a selected topic under the direction of a faculty member.

**NUTR 7950**  
**Topics in Advanced Medical Nutrition Therapy**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** SNHP 6000, NUTR 4200 or NUTR 7200  
**DESCRIPTION** Advanced study in an issue of medical nutrition therapy across the continuum of basic biochemistry and physiology through public health and clinical application. Evidence based practice is stressed, with attention to relationships of basic research to practice, assessment methodologies, targeting specific populations and individuals for appropriate interventions, development of outcome measures, and formation of future research questions. Current recommendations and programs are discussed.

**NUTR 7980**  
**Research Practicum**  
**CREDIT HOURS** 1.0 TO 15.0  
**DESCRIPTION** Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.

**NUTR 7990**  
**Nutrition Capstone Project**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Consent of faculty advisor  
**REQUIREMENTS** A minimum of six semester hours must be taken.  
**DESCRIPTION** This course includes individual study of a selected project in nutrition, food science or laboratory science under the direction of an approved project chair. Students must develop and orally present, explain, and defend their project as part of the capstone requirement.

**Credit Hours:** 3.0

**Prerequisites:** SNHP 6000 and consent of faculty advisor

**Requirements:** A minimum of six semester hours must be taken.

**Description:** This course includes individual study of a selected investigation in nutrition, food science or laboratory science under the direction of an approved thesis chair and thesis committee. Students must develop and orally present, explain and defend their thesis as part of the capstone requirement.
PFP PERSONAL FINANCIAL PLANNING

PFP 8389 Directed Readings in Personal Financial Planning

CREDIT HOURS 1.0 TO 3.0

PREREQUISITES Consent of the instructor, good academic standing

DESCRIPTION

PFP 8400 Introduction to Wealth Management

CREDIT HOURS 3.0

PREREQUISITES None

REQUIREMENTS CSP: None

DESCRIPTION This course introduces the student to the concepts of wealth management and personal financial planning. The course surveys the technical domains of wealth management, the processes for the efficient delivery of advisory services, and client behaviors and their role in the delivery of advice. The course considers the economics of the advisory business, evaluating the intersection of the demand for advisory services with the supply. Integration of the various elements of wealth management is done through a comprehensive planning assignment.

PFP 8420 Financial Advice and Planning over the Life Cycle

CREDIT HOURS 3.0

PREREQUISITES None

REQUIREMENTS CSP: None

DESCRIPTION This course examines financial decision making over the life cycle. Among the main topics covered are setting financial objectives, insurance and risk management, planning for adequate retirement income, social security and other government benefits, income tax planning, qualified plans, pre- and post-retirement investment planning, planning for long-term care, and planning for incapacity.

PFP 8460 Law, Enterprise, and Planning for Asset Transfer

CREDIT HOURS 3.0

PREREQUISITES None

REQUIREMENTS CSP: None

DESCRIPTION This course examines how law affects financial planning from the formation of the enterprise, be it a household or a business. The course analyzes the arrangement of future wealth transfers to maximize the personal and financial well-being for an individual and the individual's survivors. This involves study of legal, tax and human factors surrounding the efficient transfer of property. Main topics include a study of wills, trusts, probate and non-probate transfers, and federal transfer taxation.

PFP 8520 Advanced Studies in Wealth Management and Advisor Practice

CREDIT HOURS 3.0

PREREQUISITES None

REQUIREMENTS CSP: None

DESCRIPTION This course is designed as a capstone for students in the wealth management program. The emphasis is on integrating knowledge from the program and building the skills for a successful advisory practice. The course assesses the student's relative strengths across the domains of wealth advisory practice. The course also examines practice management and profitability of advisory firms. Students participate in case study role play exercises to build communication skills. Students identify a wealth management client and complete the advisory process. Students also prepare a wealth management paper suitable for submission to a professional journal.
PHIL 6010  Plato
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Plato's philosophy, which may include the relationship between virtue and knowledge, the theory of recollection, the theory of forms, the nature of sensible objects, and the relationship between the individual and the state. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6020  Aristotle
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Aristotle's philosophy, which may include early and later theories of substance, methodology, the study of nature, the soul, and ethics. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6030  Topics in Ancient Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Investigation of a specific theme, philosopher, or text, such as Aristotle's ethics, the philosophy of Socrates, Plato's Republic, Stoicism, Hellenistic ethics, or Aristotle's philosophy of mind. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6050  Topics in Modern Philosophy
CREDIT HOURS  3.0
DESCRIPTION  Intensive study of works of modern philosophers such as Descartes, Spinoza, Leibniz, Malebranche, Hobbes, Locke, Rousseau, Berkeley, Hume, Reid, Kant, and Hegel. The course may be organized around the works of a single philosopher, or it may survey the development of a particular area of modern philosophy (such as moral philosophy, political philosophy, metaphysics, epistemology, or aesthetics). May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6055  Hume
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Hume's philosophy. Topics may include the relation between his theoretical and moral philosophy, skepticism, causation, necessity, the foundations of human knowledge, self-consciousness, personal identity, reason, will, sentiment, naturalism, and normativity. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6060  Kant
CREDIT HOURS  3.0
DESCRIPTION  Advanced introduction to the major areas of Kant's theoretical and/or practical philosophy. Topics may include: Kant's conception of the task and method of philosophical inquiry, the relation of metaphysics and epistemology to natural science, skepticism, causality, freedom, the moral law, and the religious, political, and social ramifications of Kant's moral philosophy. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

</tr>
<tr>
<td>PHIL 6130</td>
<td>Philosophy of Science</td>
<td>3.0</td>
<td>(Same as NEUR 6500.) An examination of philosophical problems associated with the nature, scope, and significance of the sciences. Topics may include: scientific versus non-scientific world views; explanation and its limits; confirmation; paradigms, laws, and theories; intertheoretic reductions; realism versus antirealism; science and human values. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.</td>
</tr>
<tr>
<td>PHIL 6150</td>
<td>Topics in Epistemology</td>
<td>3.0</td>
<td>Investigation of selected contemporary or classical topics in epistemology. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.</td>
</tr>
</tbody>
</table>
PHIL 6300  Metaphysics
CREDIT HOURS  3.0
DESCRIPTION  Topics may include personal identity and human nature; space, time, matter, and causality; freedom and determinism; teleology; and conceptions of divinity. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6330  Philosophy of Mind
CREDIT HOURS  3.0
DESCRIPTION  (Same as NEUR 6520.) An examination of various theories of the mind-body relationship, such as dualism, identity theory, and functionalism, and of specific issues such as consciousness, mental representation, mental disorders, the emotions, artificial intelligence, personal identity, and free will. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6340  Philosophy and Cognitive Science
CREDIT HOURS  3.0
DESCRIPTION  (Same as NEUR 6510.) An interdisciplinary examination of the problems, theories, and research strategies central to the study of the human mind and of other cognitive systems. Basic readings will come from a variety of disciplines, including philosophy, neuroscience, and psychology. Topics of investigation may include perception, mental representation, language, modularity, consciousness, emotions, moral psychology, action, mental disorders, folk psychology, and animal minds. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6350  Topics in Metaphysics
CREDIT HOURS  3.0
DESCRIPTION  Study of specific issues in metaphysics, such as free will, causation, time, personal identity, possible worlds, existence of God, realism, etc. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6500  Symbolic Logic
CREDIT HOURS  3.0
DESCRIPTION  This course will cover the fundamentals of propositional and predicate logic, and selected topics in such areas as the logic of identity and relations, modal logic, or meta-logic. Emphasis placed on construction of proofs in formal systems.

PHIL 6530  Philosophy of Language
CREDIT HOURS  3.0
PREREQUISITES  one course in philosophy or consent of instructor
DESCRIPTION  Efforts in twentieth-century philosophy to account for the unique capacities of language to represent the world and to communicate our beliefs about it. Topics may include the nature of language, theories of meaning and reference, semantic paradoxes, private language, speech acts, and non-human language. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHIL 6700  Ethics
CREDIT HOURS  3.0
DESCRIPTION  Major Western theories, such as relativism, egoism, emotivism, utilitarianism, deontology, naturalism, intuitionism, virtue, ethics, existential ethics, and feminist ethics. May be repeated but only if content varies. A maximum of six credit hours may be applied toward the degree.

PHOT PHOTOGRAPHY

PHOT 6000  Introduction to Photography For Non-Major Grads
CREDIT HOURS  3.0
DESCRIPTION  Introduction to photography for non-major graduates within a fine arts context for non-major graduates. Operation of the DSLR camera and lenses.
FEES  $125.00

PHOT 6010  Film and Darkroom for Non-Major Grads
CREDIT HOURS  3.0
PREREQUISITES  PHOT 6000 with grade of B or higher
DESCRIPTION  Intermediate-level course emphasizing technical competency with 35mm and medium format cameras, black-and-white film exposure and development, silver-gelatin print processing, and archival presentation.
FEES  $125.00

PHOT 6020  Digital Photography
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  Introduction to computer-assisted imaging. Basic understanding of Macintosh computer operation is essential.

PHOT 6025  Photo 1 for Non-Photo Major Grads
CREDIT HOURS  3.0
DESCRIPTION  Cross-listed with PHOT 3020 Essentials of DSLR camera in context of contemporary photographic practice. Target students are non-photo studio art major grads.

PHOT 6030  Digital Video for Artists
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  Introduction to computer-assisted imaging. Basic understanding of Macintosh operation is essential.

PHOT 6050  Photography
CREDIT HOURS  3.0
DESCRIPTION  For non-photo major graduate students interested in undergraduate photography courses that do not have a cross-listed number. Instructor permission required. May be repeated up to 5 times for credit.
FEES  $125.00

PHOT 6080  Directed Study
CREDIT HOURS  3.0 TO 6.0
PREREQUISITES  consent of instructor
DESCRIPTION  For students not majoring in Photography. Individual research. May be repeated for a maximum of twelve hours.

PHOT 8000  Advanced Studio Problems
CREDIT HOURS  6.0
DESCRIPTION  For the M.F.A. photography major. Technical and conceptual examination of individual projects.

PT 6709 Professional Practice I: The Doctoring Professions

CREDIT HOURS 2.0

PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION This is the first in a three course series on professional practice designed to enhance student growth and professional development. This course focuses on written and oral communication issues and skills, and addresses professional and patient perspectives. Students will be introduced to the history of physical therapy, the American Physical Therapy Association and its foundational documents including the Guide to Physical Therapist Practice. Physical therapy professional attributes and professional behaviors will be highlighted. Chart review, an introduction to documentation and an introduction to 3rd party payer systems practice will be included.

PT 6805 Human Gross Anatomy II

CREDIT HOURS 1.0

PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION This is the laboratory component of PT 6800 Human Gross Anatomy II. This course is designed to present an understanding of basic and clinical human anatomy. Detailed regional analyses of the head, neck, trunk and spine will be performed.

PT 6810 Functional Anatomy II

CREDIT HOURS 2.0

PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses

DESCRIPTION This course introduces the student to the theory and practical application of basic tests and measures related to the anatomical structures in the spine. Examination procedures that will be taught include: palpation, muscle strength testing, ROM and flexibility testing, sensory testing, special tests and introduction to the evaluation of the results from these tests and measurements. This course is designed to apply content from Human Gross Anatomy II (PT 6800) to the functioning human being.
PT 6900  PT Management of Cardiopulmonary Disorders
CREDIT HOURS  4.0
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION  This course primarily addresses the scientific basis of cardiopulmonary dysfunction and therapeutic intervention which may be utilized by a healthcare professional team in rehabilitation of individuals with cardiopulmonary pathologies. Assessment and physical rehabilitation are emphasized. The spectrum of cardiopulmonary diseases from primary prevention to secondary prevention and long term rehabilitation will be presented.

PT 6910  Exercise Physiology
CREDIT HOURS  2.0
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION  This course provides fundamental knowledge about the adaptability of human physiological systems in meeting a range of exercise demands. Areas covered include energy transfer during rest and exercise, physiologic and performance adaptations, and exercise prescription for health adults. Research evidence regarding how exercise and physical activity impact health and wellness is included.

PT 6950  Introduction to Radiology and Imaging in Physical Therapy
CREDIT HOURS  1.0
PREREQUISITES  Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION  This course is designed to present the basic concepts of diagnostic imaging as related to physical therapy practice. This course includes an overview of physical principles, diagnostic capabilities, and key points for patient education. Application to physical therapy and treatment strategies will be covered. Major diagnostic imaging procedures commonly experienced by patients with physical therapy-related diagnoses will be addressed; including radiographs, ultrasound, magnetic resonance imaging, computerized tomography, positron emission tomography, single photon emission computerized tomography, fluoroscopy, and myelogram.
PT 7025  
**PT Management: Acute Medical, Surgical Pathology**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Entry into the PT Program and successful completion of all prior DPT courses  
**DESCRIPTION** This course exposes the student to a variety of medical and surgical conditions commonly encountered by the physical therapist. Basic principles of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics will be addressed. Key concepts of drug administration, dose-response relationships, drug interactions, and factors influencing the effectiveness of medications are discussed. Students will answer clinical questions to distinguish the diverse classes of drugs as well as understand both practical and theoretical implications of drug use for selected populations. Specific medical and surgical conditions will be discussed, as well as related laboratory values, diagnostics and medical management will be discussed in the context of physical therapy management.

---

PT 7030  
**Physical Therapy Interventions I**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION** This course is designed to provide the student with practical experience in clinical examination skills and interventions. The course will emphasize physical therapy interventions including but not limited to positioning, functional mobility training, gait training, passive and active exercise, chest physical therapy, and the application of heat and cold modalities.

---

PT 7040  
**Physical Therapy Interventions II**

**CREDIT HOURS** 2.0  
**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION** This course will emphasize patient examination, evaluation, and intervention including: wound care (integumentary system) and hydrotherapy modalities. You will practice your clinical reasoning skills to select, perform and interpret tests and measures, and to design appropriate plans of care. You will begin the essentials of patient management: to assess, evaluate, diagnose, prognosticate and intervene for patients with a variety of conditions across a variety of settings.

---

PT 7130  
**Physical Therapy Interventions III**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Successful completion of all prior physical therapy coursework and/or clinical internships  
**DESCRIPTION** In this course, you will develop skills in the delivery of physical therapy patient management in accordance with the Guide to Physical Therapy Practice. This course will emphasize patient/client interventions and management techniques including: therapeutic exercises and patient education. You will utilize clinical reasoning skills to select interventions based on the evaluation of physical therapy examination results. These essentials of patient management will assist you in selecting appropriate interventions for patients with a variety of conditions across the life span.

<tr>
<td>PT 7135</td>
<td>PT Interventions III B Introduction to Modalities</td>
<td>1.0</td>
<td>Successful completion of all prior physical therapy course work and/or clinical internships</td>
<td>In this course, you will develop skills in the delivery of physical therapy modalities for patient management in accordance with the Guide to Physical Therapy Practice. This course will include the rationale for selecting a therapeutic modality based on known physiologic effects of the agent, the safety and use of the agent, therapeutic goals, documentation and evidence to support use of agents for neuromusculoskeletal conditions. Physical agents studied will include: ultrasound, electrotherapeutic modalities, physical agents, laser and traction. You will utilize clinical reasoning skills to select modalities based on the evaluation of physical therapy examination results for patients with a variety of conditions across the lifespan.</td>
</tr>
<tr>
<td>PT 7140</td>
<td>Tai Chi- Therapeutic Exercise</td>
<td>3.0</td>
<td></td>
<td>PT 7140/4140 is a graduate/undergraduate course introducing Tai Chi as a therapeutic exercise. The course addresses the benefits of Tai Chi exercise, Tai Chi's origins, philosophy, and development. Scientific evidence of Tai Chi's benefits to health is discussed. The course introduces all the styles and forms of Tai Chi and the application of Tai Chi to self defense, exercise, rehabilitation, and meditation. Students learn how to perform and to teach Tai Chi. Application of the principles and practices of Tai Chi to various impairments and disabilities is demonstrated.</td>
</tr>
<tr>
<td>PT 7250</td>
<td>Clinical Internship II</td>
<td>6.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This is the second of five clinical internships. The student will complete 8 weeks of a full-time internship with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis and interventions related to current and completed course work.</td>
</tr>
<tr>
<td>PT 7600</td>
<td>Research Methodology</td>
<td>3.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This is the first of a four course sequence on evidence-based practice designed to provide the knowledge and skills necessary to critically analyze and use scientific literature to improve clinical practice, develop a research question, collect and interpret data, and disseminate results in professional forums. In this course, the student is introduced to principles of evidence-based practice, scientific methods, research design, hypothesis generation and testing, measurement theory, and analysis of data across experimental and survey paradigms.</td>
</tr>
</tbody>
</table>
Essentials of Medical Screening

CREDIT HOURS 2.0
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION This course introduces the student to principles of medical screening with emphasis on the evaluation of examination data to determine if a patient is appropriate for physical therapy intervention. The art and science of a patient/client referral to other healthcare professionals is introduced per the APTA Code of Ethics, APTA Guide to Professional Conduct and the Guide to Physical Therapist Practice. The rationale for when and why specific diagnostic imaging and testing procedures are ordered will be presented. Emphasis will be placed on how to relate/apply the information in clinical decision-making by the physical therapist.

Movement Sciences

CREDIT HOURS 3.0
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION This course exposes the student to basic principles of movement science and motor control, kinematics and kinetics related to movement with application of these principles to the study of gait and transitional movements across the lifespan. Biomechanical rationale for movement analysis will be emphasized.

Movement Sciences II

CREDIT HOURS 2.0
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION Motor control insights, gleaned from Movement Sciences I and their expansion in Movement Sciences II, become the umbrella for understanding how normal and abnormal movements emerge and from which therapeutic intervention is constructed and motor patterns are evaluated. This course builds on the principles of movement science and motor control by exposing the student to the theories of motor learning and the application of principles of biomechanics and kinesiology to abnormal movement. The principles of motor learning are included for structuring and progressing treatment.

PT Management of Musculoskeletal Disorders I

CREDIT HOURS 3.0
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses
DESCRIPTION This lecture/laboratory course is the first in a series of five musculoskeletal courses designed to teach examination, evaluation, diagnosis, prognosis, management and determine outcomes in patients with musculoskeletal dysfunctions. This course will focus on musculoskeletal dysfunctions of the cervical and thoracic spine, craniomandibular joints, and rib cage. The disablement model and the International Classification of Function will be utilized as a basis for examination, evaluation, diagnosis, prognosis, management and outcome assessment. This course will further promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the cervical and thoracic spine and upper extremities.
**PT 7626**  
**PT Management of musculoskeletal Disorders II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION** This lecture/laboratory course is the second in a series of five musculoskeletal courses designed to teach examination, evaluation, diagnosis, prognosis, management and determine outcomes in patients with musculoskeletal dysfunctions. This course will focus of musculoskeletal dysfunctions of the shoulder, elbow, forearm, wrist and hand. The disablement model and the International Classification of Function will be utilized as a basis for examination, evaluation, diagnosis, prognosis, management and outcome assessment. This course will further promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the cervical and thoracic spine and upper extremities.

**PT 7660**  
**Complementary and Alternative Therapies**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course provides students with information about Complementary and Alternative Therapies (CAT) including the applications of CAT in therapeutic situations. The curing medicine and therapeutic modalities addressed include Acupuncture and Acupressure, Traditional Chinese Medicine, Herbal Medicine, Energy Medicine, Ayurvedic Medicine, Body/ Mind Therapy, Homeopathic Therapy, Massage and Touch Therapy and Nutrition and Diet.

**PT 7630**  
**Life Span I**  
**CREDIT HOURS** 2.0  
**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION** This course will provide an overview of typical development from infancy to adolescence, in all developmental domains, with a focus on motor development as well as normal aging process. The course material is presented and discussed in the context of clinical cases. Emphasis is placed on the principles, processes, and phases of growth. Normal physiologic changes with aging will be presented for adults and the impact of these changes on physical therapy management of older adults will be emphasized.

**PT 7700**  
**Research**  
**CREDIT HOURS** 2.0  
**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION** This course is the second in a series of four courses designed to continue the inquiry process. This course will emphasize the developmental sequence of a research project from initiation through completion of the process and presentation of the product.

**PT 7709**  
**Professional Practice II: Psychosocial Aspects of Disability and Disease**  
**CREDIT HOURS** 2.0  
**PREREQUISITES** Successful completion of all previous semesters' course work  
**DESCRIPTION** Students explore the basic concepts and principles essential to the understanding of the therapist/client/ family reactions to disability and disease. Concepts of behavior management, death and dying, lifestyle adaptation, and attitudes toward disability are presented with respect to their influence on physical, psychosocial, and cultural aspects of an individual's quality of life. Examination of legal and ethical issues that impact physical therapy delivery are also discussed.
PT 7710  
PT Management Neuroanatomy I  
CREDIT HOURS 3.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION This course is designed to introduce basic and applied neuroanatomical and neurophysiological principles. Topics include terminology and neuroanatomical relationships, cellular neurophysiology, structure and function of the central, peripheral, and autonomic nervous systems and their ability to respond to environmental demands. The student will evaluate human behavior and performance in relation to function and dysfunction of the nervous system.

PT 7715  
PT Management Neuroanatomy I  
CREDIT HOURS 1.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION This is the laboratory component of PT Management Neuro I. This course is designed to introduce basic and applied neuroanatomical and neurophysiological principles. Topics include terminology and neuroanatomical relationships, cellular neurophysiology, structure and function of the central, peripheral, and autonomic nervous systems and their ability to respond to environmental demands. The student will evaluate human behavior and performance in relation to function and dysfunction of the nervous system.

PT 7725  
PT Management of Musculoskeletal Disorders III: Lumbar, Pelvis and Hip  
CREDIT HOURS 3.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION This lecture/laboratory course is the first in a series of five musculoskeletal courses designed to teach examination, evaluation, diagnosis, prognosis, management and determine outcomes in patients with musculoskeletal dysfunctions. This course will focus on musculoskeletal dysfunctions of the lumbar spine, pelvis, and hip. This course will further promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the lumbopelvic region and lower extremities. Students will synthesize the concepts of clinical reasoning and clinical decision making with an emphasis on evidence based medicine.

PT 7726  
Patient Management Musculoskeletal IV: Knee, Foot and Ankle  
CREDIT HOURS 2.0  
PREREQUISITES Entry into the PT program and successful completion of all prior DPT courses  
DESCRIPTION This lecture/laboratory course is the fourth in a series of five musculoskeletal courses designed to teach examination, evaluation, diagnosis, prognosis, management and determine outcomes in patients with musculoskeletal dysfunctions. This course will emphasize the knee, foot and ankle. This course will promote development of knowledge in differentiating musculoskeletal dysfunctions/disorders in the lower extremities and the concept of regional interdependence with the hip, pelvis and lumbar spine.
Evidence-based Practice II

**PT 7800**

**CREDIT HOURS** 1.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** This course is a distance learning web-based course designed to facilitate application of evidence based practice in the clinical setting. The student will have the opportunity to use the techniques associated with evidence based practice in physical therapy to answer a clinical question prompted by a patient encounter. Students will disseminate their findings to classmates, and may present the EBP paper to the staff at the clinical internship site. This enhances the efficacy of patient/client interventions and outcomes and promotes best practice paradigms.

PT Management of Neuromuscular Disorders: Application

**PT 7820**

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** This course is designed to expose the student to rehabilitation approaches for treatment post Cerebrovascular Accident, Traumatic and Acquired Brain Injuries and Disorders, Multiple Sclerosis, Movement Disorders to include Parkinson’s Disease and Huntington’s Disease and an introduction to basic post amputation physical therapy management. Pathophysiology, clinical manifestations, diagnostic procedures, evidence based practices and interdisciplinary management, along with prevention are included in discussion of the above pathologies commonly encountered in neurologic physical therapy practice. This is the third section of a five section series for management of the neurologically impaired patient/client.

PT Management of Neuromuscular Disorders: Evaluation

**PT 7810**

**CREDIT HOURS** 3.0

**PREREQUISITES** Entry into Physical Therapy Program and successful completion of all prior DPT courses

**DESCRIPTION** This course is designed to introduce students to the physical therapy examination, evaluation, diagnosis, prognosis and management of individuals with the movement dysfunction secondary to progressive and non-progressive acquired neuromuscular disorders. This course will lay the foundation for clinical decision making with the neurological patient population, including conducting an adult neurological examination, gathering an understanding of common diagnostic tools in this patient population and an introduction to a variety of interventions and approaches for individuals with disorders of the nervous system. The Neuromuscular Disorders series is designed to prepare the student to manage and treat a variety of progressive, non-progressive, catastrophic, non-catastrophic or acquired disorders of the central nervous system in adults.

Prosthetics and Orthotics

**PT 7825**

**CREDIT HOURS** 2.0

**PREREQUISITES** Entry into the PT program and successful completion of all prior DPT courses

**DESCRIPTION** This course is designed to prepare the student to: evaluate the need for lower limb orthoses and prostheses, prescribe appropriate orthoses and prostheses as a member of the prosthetic and orthotic team, evaluate fit and function of orthoses and prostheses, and implement a comprehensive plan of care for those patients utilizing orthoses and prostheses, including comprehensive gait analysis and gait training.

</table>
**PT 8720**  
**Lifespan III: Pediatric Physical Therapy Application**

**CREDIT HOURS:** 1.0  
**PREREQUISITES:** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION:** This laboratory course will provide practical experiences of clinical examination and intervention skills that parallel the lecture component of the course. The course will emphasize concepts of clinical decision-making for children with disabilities.

**PT 8725**  
**PT Management of Neuromuscular Disorders IV**

**CREDIT HOURS:** 3.0  
**PREREQUISITES:** Entry into PT program and successful completion of all prior DPT courses  
**DESCRIPTION:** This course is designed to prepare the student to manage a selection of progressive and non-progressive disorders of the central and peripheral nervous systems. Conditions discussed will include motor neuron disease with an emphasis on amyotrophic lateral sclerosis, acute and chronic peripheral neuropathy and comprehensive exploration of vestibular disorders. The student will learn principles and procedures for interview, examination, evaluation PT diagnosis, prognosis and intervention related to management of the individual as part of a multi-disciplinary team. Psychosocial issues will be integrated into the management approach. This is the fourth section of a five section series for management of the neurologically impaired patient/client.

**PT 8730**  
**PT Management of Neuromuscular Disorders V**

**CREDIT HOURS:** 2.0  
**PREREQUISITES:** Entry into PT program and successful completion of all prior DPT courses  
**DESCRIPTION:** This course focuses on the examination, evaluation, diagnosis, prognosis and management of patients/clients with neuromuscular disorders affecting the spinal cord and peripheral nervous system. Pathophysiology, clinical manifestations, diagnostic and imaging procedures, evidence-based practice, and interdisciplinary team management, and prevention are included in the discussion of pathologies of the spinal cord and peripheral nervous system. This is the fifth section of a five section series for management of the neurologically impaired patient/client.

**PT 8800**  
**Research IV: Dissemination**

**CREDIT HOURS:** 1.0  
**PREREQUISITES:** Entry into the PT program and successful completion of all prior DPT courses  
**DESCRIPTION:** This is the fourth in a four-course sequence on research in physical therapy. These courses emphasize the developmental sequence of a research project from initiation through completion of the process and presentation of the product. Preparation and presentation of the research project is required in poster and platform style at a state or national meeting. Research is written in manuscript format in preparation for submission to a peer-reviewed journal.

<tr>
<td>PT 8825</td>
<td>PT Management of Musculoskeletal Disorders V</td>
<td>3.0</td>
<td>Successful completion of all prior DPT course work and/or clinical internships</td>
<td>This course emphasizes the best practice models for the examination, evaluation, diagnosis, prognosis, and management of patients/clients with musculoskeletal disorders. A variety of classification systems are presented to identify patients who will most likely benefit from selected interventions. This course will focus on the principles and techniques necessary to perform a competent physical therapy examination and intervention program for common musculoskeletal dysfunctions of the UE, LE, and spine including thrust and non-thrust techniques. Where little evidence exists, a pragmatic approach integrating basic and clinical sciences and clinical reasoning principles will be used in the clinical decision-making process.</td>
</tr>
<tr>
<td>PT 8840</td>
<td>PT Interventions</td>
<td>3.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>In this course, you will develop skills in the delivery of physical therapy patient management in accordance with the &quot;Guide to Physical Therapy Practice.&quot; This course will emphasize patient examination, evaluation, and intervention including EMG/NCV testing, hydrotherapy, women's health, industrial medicine (functional capacity examinations), compression, diathermy, frequency specific microcurrent, and introduction to dry needling. Students enhance their ability to identify patients most likely to benefit from selected interventions based on evidence-based practice, research, and patient values.</td>
</tr>
<tr>
<td>PT 8850</td>
<td>Clinical Internship IV</td>
<td>7.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This is the fourth of five clinical internships. The student completes 10 weeks of full-time internship with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis and interventions related to current and completed coursework.</td>
</tr>
<tr>
<td>PT 8900</td>
<td>Special Problems in Physical Therapy</td>
<td>3.0</td>
<td></td>
<td>Individual study of a selected problem of interest under the direction of a faculty member.</td>
</tr>
<tr>
<td>PT 8920</td>
<td>Special Topics in Physical Therapy</td>
<td>1.0 TO 12.0</td>
<td></td>
<td>Individual study of a selected topic under the direction of a faculty member.</td>
</tr>
<tr>
<td>PT 8930</td>
<td>Special Topics in Physical Therapy: Musculoskeletal Elective</td>
<td>3.0</td>
<td>Successful completion of all prior courses</td>
<td>This elective lecture/laboratory course is designed to deepen the student's knowledge and performance of examination, evaluation, diagnosis, prognosis and management of patients with musculoskeletal dysfunctions.</td>
</tr>
<tr>

<td>PT 8931</td>
<td>Special Topics II: Anatomy Elective</td>
<td>3.0</td>
<td>Entry into the PT Program and successful completion of all prior courses</td>
<td>An advanced laboratory course designed to challenge students with an in-depth understanding of clinical human anatomy. Detailed dissections of human body will be created by students for teaching purpose or study and publication. Students will create a project which will consist of a teaching module to be submitted to MedEd Portal or disseminated at the GSU CEU conference.</td>
</tr>
<tr>
<td>PT 8932</td>
<td>Special Topics III: Complementary &amp; Alternative Therapies</td>
<td>3.0</td>
<td>Entry into the PT Program and successful completion of all prior courses</td>
<td>This course is designed to introduce students to complementary medicine. Topics include Yoga, Feldenkrais and Tai Chi and applications of these complementary medicine/therapies in physical therapy and rehabilitation will be addressed. The evidence showing the effectiveness of yoga for a variety of conditions including cardiovascular, neurological, musculoskeletal, and psychological conditions will be discussed. The strategies inherent in the Feldenkrais Method for teaching new or regaining lost movement skills will be addressed. The effects of relaxation, mind-body harmony and balance training in Tai Chi will be experienced.</td>
</tr>
<tr>
<td>PT 8933</td>
<td>Special Topics III: Advanced Practice in Pediatric Physical Therapy</td>
<td>3.0</td>
<td>Entry into the PT Program and successful completion of all prior courses</td>
<td>This elective course will emphasize advanced concepts in pediatric physical therapy, including specialized topics related to working with children with disabilities. This course is intended for students who are planning to specialize in pediatric physical therapy and will enable students to advance their skills in clinical decision making and evidence-based practice. This course provides an advanced overview of examination, evaluation, diagnosis, prognosis, management, and intervention of children with neuromuscular disorders utilizing clinical case examples.</td>
</tr>
<tr>
<td>PT 8934</td>
<td>Special Topics: EKG</td>
<td>3.0</td>
<td>Completion of all second year PT courses</td>
<td>This course presents a study of basic electrocardiography (EKG). Cardiac anatomy and physiology, genesis of the 12-lead EKG, determination of heart rate from EKG and modulation of HR by autonomic nervous system, analysis of normal and aberrant rhythms and conduction patterns, electrical axis, cardiac hypertrophy, and ischemia/infarct patterns are included in the content. A programmed learning, method-based approach is used to give students stools necessary to interpret EKGs.</td>

<tr>
<td>PT 8935</td>
<td>Special Topics: Vestibular/Women’s Health/Wound Care/Canine Therapy</td>
<td>3.0</td>
<td>Completion of all second year PT courses</td>
<td>This course will expose students to several specialty areas of physical therapy, to include Pelvic health, Vestibular Rehab, Wound Care &amp; Canine Therapy. Students will observe treatment in each of these practice areas and present a single case study from their observation experience as the only project for the course.</td>
</tr>
<tr>
<td>PT 8950</td>
<td>Clinical Internship V</td>
<td>7.0</td>
<td>Entry into the PT program and successful completion of all prior DPT courses</td>
<td>This is the last of five clinical internships. The student completes 10 weeks of a full-time internship with the major emphasis being the application of patient examination, evaluation, diagnosis, prognosis, and interventions related to current and completed coursework. Students demonstrating the core values of professionalism and outstanding clinical and academic performance may request an area of practice (based on availability) that they want to experience prior to graduation.</td>
</tr>
<tr>
<td>PT 8999</td>
<td>Capstone Project in Physical Therapy</td>
<td>2.0</td>
<td>PT 7600 - Note: A minimum of six credit hours must be taken (maximum 2 hours per semester)</td>
<td>Directed research culminating in a written product related to the art or science of physical therapy.</td>
</tr>
<tr>
<td>PT 9000</td>
<td>Comprehensive Examination</td>
<td>1.0</td>
<td>Successful completion of all prior DPT courses</td>
<td>The purpose of the comprehensive review is to ascertain the student’s readiness to graduate and to sit for the national licensing examination. Test-taking strategies and an intense review of the curriculum prepare students for entry into the physical therapy profession. Successful completion of the comprehensive examination is required for completion of the DPT program.</td>
</tr>

</table>
PHYS 6300  Teaching Physics
CREDIT HOURS  2.0
DESCRIPTION  Course provides a theoretical and practical foundation for science teaching. Topics include univocal and dialogic discourse, questioning strategies, Bloom's taxonomy, mental models, formative assessment and bridging, the resource framework, motivation and cooperative learning, argumentation, metacognition, nature of science, and qualities of effective teachers. Two lecture hours per week.

PHYS 6310  Teaching Physics Lab Practicum
CREDIT HOURS  1.0
DESCRIPTION  Students will practice teaching physics lessons and apply science teaching theories and methods learned in PHYS 6300. One and one half hours per week.

PHYS 6340  Neurophysics
CREDIT HOURS  3.0
PREREQUISITES  NEUR 3000 and PHYS 2212 with grades of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Three lecture hours per week. Course provides fundamental findings of physics of neuronal systems. The course covers such topics as introduction to biomechanics, membranes, transport, electroosmotic effects, ion pumping, cellular homeostasis, the Hodgkin-Huxley formalism, energetics of spiking, neural coding, and dynamics of neurons and neuronal networks. It also covers methods of recording of neuronal activity.

PHYS 6410  Introduction to Nuclear and Particle Physics
CREDIT HOURS  3.0
PREREQUISITES  Introduction quantum mechanics at a level of PHYS 3402 or higher with a grade of C or higher
DESCRIPTION  Three lecture hours a week. Properties of nuclei; nuclear models; nuclear reactions and radioactive decay processes; properties of elementary particles, their symmetries and interactions; standard model of elementary particles.

PHYS 6500  Advanced Topics in Physics
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  This course presents advanced topics of special interest in physics as may fit the needs and interests of advanced undergraduate/graduate students and faculty. Topics may be in the fields of nuclear physics, nanophysics, solid state physics, optics and electronics, and neurophysics. May be repeated if topics are different.

PHYS 6510  Mathematics of Physics I
CREDIT HOURS  3.0
DESCRIPTION  (Same as MATH 6258.) Three lecture hours a week. Algebra of vectors, vector calculus, divergence, gradient, curl, line integrals, surface integrals, divergence theorem of Gauss, Stokes's theorem, conservative fields, orthogonal curvilinear coordinates, matrices, eigenvalue problems.
PHYS 6520  Mathematics of Physics II  
CREDIT HOURS 3.0  
PREREQUISITES a course in ordinary differential equations  
DESCRIPTION (Same as MATH 6265.) Three lecture hours a week. Derivation and solution of partial differential equations of physics, wave equation, Laplace's equation, Schroedinger's equation, power series solution of ordinary differential equations, special functions of mathematical physics, Fourier series, Sturm-Liouville systems, complex analysis, and integration.

PHYS 6810  Introduction to Quantum Mechanics  
CREDIT HOURS 3.0  
DESCRIPTION Three lecture hours a week. Schroedinger's theory of quantum mechanics; solutions of Schroedinger's equation; perturbation theory; one-electron atoms; magnetic moments, spin, and relativistic effects; identical particles; and multi-electron atoms.

PHYS 6710  Functional Neuroimaging  
CREDIT HOURS 3.0  
PREREQUISITES consent of instructor  
DESCRIPTION (Same as NEUR 6330.) Three lecture hours a week. Foundations of physics principles applied to brain processes, different imaging modalities, and neuroimaging data analysis methods. Topics include physiological basis of functional neuroimaging, physics of different imaging modalities (fMRI, PET, EEG, MEG, fNIR, TMS), experimental design, neuroimaging data analysis, and applications in cognitive neuroscience. This course is appropriate for graduate students in physics, chemistry, biology, neuroscience, psychology, mathematics, statistics, and computer science with an interest in the use of functional neuroimaging.

PHYS 6910  Solid State Physics  
CREDIT HOURS 3.0  
PREREQUISITES PHYS 3401 and PHYS 3402 with grades of C or higher, or equivalent, or consent of instructor  
DESCRIPTION Three lecture hours a week. Atoms in crystals (crystal structure); waves in crystals; crystal binding, lattice constants; lattice vibrations and other thermal properties of solids, free electrons in crystals, energy bands, and semiconductors.

PHYS 6720  Introduction to Magnetism and Magnetic Materials  
CREDIT HOURS 3.0  
DESCRIPTION Fundamentals of magnetism in solids, nanostructures and ferrofluids. Wide range of topics overviewing basic physics phenomena observed in magnetic materials and nanostructures will be covered, including static and dynamic phenomena, nanostructures and their applications in electronics and spintronics, ferrofluids, and the experimental approaches used to study magnetic phenomena.

PHYS 7000  Gateway to Physics  
CREDIT HOURS 2.0  
DESCRIPTION Two lecture hours a week. This course is intended for anyone curious about physics and its relevance to contemporary life. It is primarily for students in the Masters of Arts in Teaching program in the College of Education but is also appropriate for students in medicine, law, and business, natural sciences, social sciences, humanities, music, and fine arts. No background in physics is necessary. The course engages a broad spectrum of resources and experiential opportunities (e.g. popular science books & articles, videos, websites, lab tours, field trips, service learning opportunities, and guest presenters) to explore compelling interconnections between physics and other disciplines and career interests. Course topics may include Physics and the Human Body, Physics and the Nanoscale, Physics and the Cosmos, Physics and Technology, Physics and Art, and Chaos & Complexity.

</tbody>
</table>
**PHYS 8100**  
**Electromagnetic Theory I**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 6520 with grade of C or higher, or equivalent  
**DESCRIPTION** Three lecture hours a week. Electrostatics, Poisson's and Laplace's equations, Green's functions; boundary-value problems in electrostatics; multipoles, electrostatics of macroscopic media, dielectrics; and magnetostatics.

**PHYS 8110**  
**Electromagnetic Theory II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 8100 with grade of C or higher, or equivalent  
**DESCRIPTION** Three lecture hours a week. Time-varying fields, Maxwell equations, conservation laws; plane electromagnetic waves and wave propagation; wave guides and resonant cavities; special theory of relativity; simple radiating systems, and radiation by moving charges.

**PHYS 8120**  
**Plasma Physics and Magnetohydrodynamics**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 8100 and PHYS 8110 with grades of B- or higher  
**DESCRIPTION** Three lecture hours a week. This course provides an introduction to the physics of plasmas, with an emphasis on developing a physical understanding of the non-intuitive nature of plasmas, and acquiring the basic techniques required for carrying out research in plasma physics. Crosslisted with ASTR 8120.

**PHYS 8150**  
**Computational Methods for Physics and Astronomy**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Some prior programming experience is expected. Solving physics problems using modern numerical methods, with a practical “hands-on” approach to coding-writing. A wide range of subjects will be covered including numerical analysis (integration, differentiation, differential equations), error analysis (error propagation, bootstrapping), modeling and fitting (maximum likelihood, maximum a posteriori), time series analysis (correlations, Fourier transforms, principal component decomposition, wavelets), optimization (root finding, minimization engines), image processing (filtering, registration and comparison, inverse methods) and parallel programming.

**PHYS 8210**  
**Quantum Mechanics I**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 6810 with grade of C or higher, or consent of instructor  
**DESCRIPTION** Three lecture hours a week. Postulates, Schroedinger's equation, one-dimensional problems, three-dimensional problems, scattering, transformation theory, perturbation theory, Born approximation, and variation method.

**PHYS 8220**  
**Quantum Mechanics II**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PHYS 8210 with grade of C or higher  
**DESCRIPTION** Three lecture hours a week. Spin, relativistic effects, many-electron atoms, second quantization, radiation field, Dirac equation, and Feynman diagrams.
PHYS 8310  Statistical Mechanics
CREDIT HOURS  3.0
DESCRIPTION  Three lecture hours a week. Classical and quantum mechanical statistical theories of many body systems. Topics include the ergodic theorem, distributions, quantum statistics, thermodynamic interpretations, and applications.

PHYS 8370  Advanced Neuroimaging
CREDIT HOURS  3.0
DESCRIPTION  Advanced magnetic resonance (MR) imaging and spectroscopy principles and applications to neuroscience, including experimental design and data analysis and interpretation. Covers relaxation theory and measurement, anatomic imaging, diffusion imaging, perfusion and arterial spin labeling (ASL) imaging of blood flow, and 1H and multinuclear magnetic resonance spectroscopy (MRS). Three lecture hours a week.

PHYS 8380  Computational Neuroscience
CREDIT HOURS  3.0
PREREQUISITES  NEUR 8010 with grade of B or higher, or equivalent, or consent of instructor
DESCRIPTION  Three lecture hours per week. Realistic modeling dynamics of neurons and neuronal networks with emphasis on testing data-driven hypotheses. Topics include modeling intracellular calcium dynamics, voltage dependent channels, synapses, activity of neurons, and synchronization regimes of neuronal networks.

PHYS 8410  Atomic Physics
CREDIT HOURS  3.0
PREREQUISITES  PHYS 6810 with grade of C or higher, or consent of instructor
DESCRIPTION  Three lecture hours a week. Theory of atomic spectra; scattering theory.

PHYS 8420  Molecular Physics
CREDIT HOURS  3.0
PREREQUISITES  PHYS 6810 with grade of C or higher
DESCRIPTION  Three lecture hours a week. Molecular structure, molecular orbital theory, and molecular spectra.

PHYS 8500  Advanced Topics in Physics II
CREDIT HOURS  3.0
PREREQUISITES  consent of instructor
DESCRIPTION  Advanced topics of special and/or current interest in physics research as may fit the needs and interests of doctoral students and faculty. Topics may be in the fields of nuclear physics, nanophysics, solid state physics, optics and electronics, and neurophysics. May be repeated if topics are different.

PHYS 8510  Solid State Physics
CREDIT HOURS  3.0
PREREQUISITES  PHYS 6910 with grade of C or higher, or consent of instructor
DESCRIPTION  Three lecture hours a week. Thermal, electrical, magnetic, and mechanical properties of solids; crystal structure; reciprocal lattice; X-ray diffraction; nearly free electrons; band structure and modifications; homogeneous and inhomogeneous semiconductors; defects and dislocations; dielectric properties of insulators; and superconductors.

</table>
POLS 8273  Political Economy of Development
CREDIT HOURS  3.0
PREREQUISITES  POLS 8200 or consent of the instructor
DESCRIPTION  Comparative analysis of theoretical and historical perspectives on the politics of economic growth and development in the developing world.

POLS 8290  Studies in Comparative Politics
CREDIT HOURS  3.0
PREREQUISITES  POLS 8200
DESCRIPTION  Topics may include area studies, comparative governmental systems, state building, comparative legal development, and regime change. May be taken more than once for credit if topic varies.

POLS 8299  New Books in Comparative Politics
CREDIT HOURS  3.0
PREREQUISITES  POLS 8200
DESCRIPTION  Course focuses on recent (and, in many cases, award winning) books in Comparative Politics. It has multiple goals: 1) to read a series of excellent recent books, and, by doing so, to fully engage some of the major theoretical innovations and currents in the field; 2) to engage some important theoretical arguments (often times in dialogue with each other); and 3) to provide an opportunity for discussing what makes a good book.

POLS 8400  International Politics
CREDIT HOURS  3.0
DESCRIPTION  Concepts and theories in international politics.

POLS 8411  International Organizations and Institutions
CREDIT HOURS  3.0
PREREQUISITES  POLS 8400 recommended
DESCRIPTION  Examination of the nature, causes, and consequences of international organizations and institutions from a variety of theoretical perspectives.

POLS 8422  NGOs and World Politics
CREDIT HOURS  3.0
DESCRIPTION  Survey of the current state of the literature on non-governmental organizations (NGOs) and global civil society; exploration of the various roles NGOs play in several of the policy areas including the environment, human rights, international development, trade, humanitarian crises, women’s issues, and security.

POLS 8427  Politics of Human Rights
CREDIT HOURS  3.0
PREREQUISITES  none  No other restrictions or cross listing
DESCRIPTION  Survey of the literature on the theory and politics of human rights. Explores the causes of extreme violence and human rights abuses, including state terror, sexual violence, and genocide and examines existing international tools to prevent and address human rights abuses.

POLS 8430  International Political Economy
CREDIT HOURS  3.0
PREREQUISITES  POLS 8400 recommended
DESCRIPTION  Analysis of contending theoretical approaches in explaining the politics of the international political economy.
POLS 8435  Studies in International Political Economy  
CREDIT HOURS  3.0  
PREREQUISITES  POLS 8400 recommended  
DESCRIPTION  Topics may include theoretical analysis of trade, monetary, and financial regimes, and North-South relations. May be taken more than once for credit if topic varies.

POLS 8450  United States Foreign Policy  
CREDIT HOURS  3.0  
DESCRIPTION  Substance and process of U.S. foreign policy.

POLS 8459  Studies in Foreign Policy  
CREDIT HOURS  3.0  
DESCRIPTION  Topics may include theories of foreign policy making, U.S. national security policy, U.S. foreign economic policy, and comparative foreign policy. May be taken more than once for credit if topic varies.

POLS 8465  International Relations of East Asia  
CREDIT HOURS  3.0  
DESCRIPTION  Examination of East Asia (Northeast Asia and Southeast Asia) as a regional subsystem in the international system, focusing on security, economic and transnational societal relations in the region. Analysis of conflict and cooperation in the region, using various theoretical frameworks from the international relations literature.

POLS 8470  Military Conflict and International Security  
CREDIT HOURS  3.0  
PREREQUISITES  POLS 8400 recommended  
DESCRIPTION  Examination of the nature, causes, and international responses to the problem of military conflict, both between and within nation-states.

POLS 8475  War and Public Opinion  
CREDIT HOURS  3.0  
PREREQUISITES  POLS 8400 recommended  
DESCRIPTION  Examines public opinion about war and international relations. Topics include public preferences surrounding issues of war and peace, how public opinion responds to war, and how the public opinion shapes and constrains the choices of leaders and foreign policy makers in democratic states.

POLS 8480  Transitional Justice and the Politics of Memory  
CREDIT HOURS  3.0  
DESCRIPTION  The course will provide a philosophical and theoretical framework for thinking about memory and transitional justice. It focuses on specific transitional justice institutions such as the Nuremberg Trials, the South African Truth and Reconciliation Commission, the International Criminal Tribunals for the former Yugoslavia and Rwanda, the International Criminal Court, as well as selected domestic and hybrid trials and truth commissions in many regions of the world.

POLS 8485  Ethics of International Relations  
CREDIT HOURS  3.0  
DESCRIPTION  Course provides a survey of contemporary ethical questions in international relations. Among the questions considered: What significance do ethical considerations have in international affairs. Is ethical conduct in international relations possible, in the world of nation states with national interests and power politics. And how, in normative terms, should we evaluate international acts. Focus is on contemporary debates about just and unjust war, use of force, humanitarian intervention, treatment of civilians in war, human rights, democratization, and development.

Data Driven Decision Making

CREDIT HOURS 3.0

REQUIREMENTS CSP 1, 2, 3, 4, 5, 6, 7, 8

DESCRIPTION Evidence-based decision making is critical to an organization's ability to compete in the global economy. This course explores the role of data in driving decisions made by managers across and within functional boundaries. Specifically, students learn to understand, visualize, and present data that supports organizational decision-making processes. They also learn how to create data-driven models such as regression and decision trees to make decisions to address critical challenges faced by organizations and society. The course features hands-on exercises with appropriate software.

Entrepreneur & Enterprise

CREDIT HOURS 3.0

PREREQUISITES None

DESCRIPTION This is an introductory survey course for students who might be interested in starting their own businesses or who might develop new businesses in the corporate environment. The environment of entrepreneurship and the behavior of entrepreneurs are studied. Students learn how to recognize and evaluate new business opportunities. Major activities in the course may include interviewing entrepreneurs and studying the feasibility of a business idea.

Analytics Experience

CREDIT HOURS 1.5

PREREQUISITES PMBA 8000 and PMBA 8025

COREQUISITES PMBA 8040

DESCRIPTION The course is housed in the Insight Lab, the “big-data analytics” facility where analytics students and faculty conduct research and work with companies on obtaining analytical insights from data. It also teaches students to find solutions to big data challenges facing real companies and organizations. The specific problems that students will address depend on what research projects and company projects are ongoing at the time of the course. Student teams will compete to produce and communicate the best solution.

Managerial Accounting and Control Systems

CREDIT HOURS 1.5

PREREQUISITES PMBA 8000 and PMBA 8025

COREQUISITES PMBA 8015 and PMBA 8030 and PMBA 8040 and PMBA 8045

DESCRIPTION This course demonstrates how managerial accounting and control systems can help managers make affective operating and strategic decisions within the firm. In particular, this course uses cases and other materials to demonstrate how cost, planning, and performance measurement systems can help managers increase the effectiveness of small and large firms within their current and future operating environment. To help students develop the analytical skills necessary for evaluating alternative designs of control systems, this course also introduces economic and behavioral theories of managerial control.

<td>PMBA 8000 and PMBA 8025 and PMBA 8040</td>
<td>PMBA 8015 and PMBA 8030 and PMBA 8040 and PMBA 8045</td>
<td>CSP: 1, 6</td>
<td>This course develops competencies necessary for professionals to harness the power of digital innovation in business and society. Students will learn how established and entrepreneurial firms can leverage digital innovation to transact with markets, to source goods/services, to develop real-time context-aware processes, and to attract equity. Topics include how to leverage information technology (IT) to innovate business models, how to digitize products and services, how to apply business analytics to derive insights from structured and unstructured data, and how to leverage the power of Big Data for digital innovation. Students will also learn how to keep pace with IT developments that generate new capabilities, disrupt existing business models, and give rise to new business models.</td>

</table>
**PMBA 8155 Operations Management**

**CREDIT HOURS** 3.0  
**PREREQUISITES** PMBA 8000 and PMBA 8025  
**COREQUISITES** PMBA 8015 and PMBA 8030  
**REQUIREMENTS** CSP: 1,2,6, 7  
**DESCRIPTION**  
This course focuses on the basic concepts, principles, and techniques for efficient and effective operations. Special emphasis is placed on process improvement and supply chain management. Topics such as operations strategy, product and service design, process analysis, lean production, materials and inventory management, quality management, six sigma, project management, and supply chain management will be covered in the context of domestic and international marketplaces.

**PMBA 8165 Leading Organizations and People**

**CREDIT HOURS** 3.0  
**PREREQUISITES** PMBA 8000 and PMBA 8025  
**COREQUISITES** PMBA 8015  
**REQUIREMENTS** CSP: 1,6, 7  
**DESCRIPTION**  
What do managers need to know about leading organizations and people within organizations. This class will develop an understanding of the key issues managers need to master in order to manage the interface between people and organizations. The course begins with a focus on the individual within the organization, including topics of attitudes, motives, and personality. The course then progresses to a broader focus on the organization as a whole, including topics of power and political concerns, group and organizational leadership, and organizational culture.

**PMBA 8820 Global Competitive Strategy**

**CREDIT HOURS** 3.0  
**PREREQUISITES** Consent of director of PMBA program  
**COREQUISITES** PMBA 8015  
**REQUIREMENTS** CSP: None  
**DESCRIPTION**  
This course explores methods of directing an entire organization or a significant division in an internationally competitive environment. The perspective is that of the general manager who must integrate many business functions to successfully lead a multinational organization. Topics include the identification of organizational competence in light of external environmental and international conditions, the development of business/corporate strategy that addresses the international marketplace, and the internal processes required for successful implementation of that strategy.

**PMBA 8850 Applied Leadership**

**CREDIT HOURS** 3.0  
**PREREQUISITES** PMBA 8000  
**COREQUISITES** PMBA 8820  
**REQUIREMENTS** CSP: 1, 6, 7  
**DESCRIPTION**  
This course is designed to integrate and apply the tools of strategic leadership. Students will gain fundamental insights into the principles, tools and skills of strategic leadership as well as a deepened understanding of their own strategic leadership style and skills. The course culminates in a behavioral simulation in which students adopt executive roles in the running of an international financial services firm in order to apply course concepts and tools. Upon completing the simulation, students receive extensive quantitative and qualitative feedback experience regarding their collective and individual results.
PSYC PSYCHOLOGY

PSYC 6030 Cross-Cultural Psychology
CREDIT HOURS 3.0
PREREQUISITES PSYC 1101
DESCRIPTION The influence of culture on human cognition, emotion, and behavior with focus on theory and research in developmental personality-social, health, and organizational psychology.

PSYC 6116 Primate Behavior: Field and Laboratory
CREDIT HOURS 3.0
PREREQUISITES BIOL 3840 or PSYC 4110 or consent of the instructor
DESCRIPTION (Same as NEUR 6400.) Two lecture and two laboratory hours a week. Nonhuman and human primate origins of cognition, language, mythology, rituals, tool use, nonverbal expressions, symbolism, sexuality, and aggression.

PSYC 6130 Sensation and Perception
CREDIT HOURS 3.0
PREREQUISITES (Same as NEUR 6410.) Experimental analysis of sensory and perceptual processes at both a physiological and a psychophysical level. The five primary sensory systems will be covered: vision, audition, touch, taste, and smell.

PSYC 6630 Hormones and Behavior
CREDIT HOURS 4.0
PREREQUISITES PSYC 3030 or BIOL 3840
DESCRIPTION Interaction of nervous and endocrine systems in the control of behavior of mammals, including humans, with emphasis on the mechanisms that adapt behavior to the changing physical and social environment.

PSYC 6650 Psychology: Special Topics
CREDIT HOURS 1.0 TO 6.0
PREREQUISITES permission of the instructor
DESCRIPTION Special Topics in Psychology.

PSYC 6801 Survival Skills in Academia
CREDIT HOURS 3.0
DESCRIPTION (Same as BIOL 6801 and NEUR 6600.) Guidance and direction for graduate students on how to accomplish many of the day-to-day tasks encountered by researchers and instructors throughout their careers in academia. Topics covered include how to write and publish scientific papers, grantpersonship, scientific ethics, posters and oral presentations, mentoring, and job interviewing.

PSYC 7955 Introduction to the Center for Behavioral Neuroscience
CREDIT HOURS 1.0
PREREQUISITES consent of instructor
DESCRIPTION Orientation to the research conducted at the Center for Behavioral Neuroscience (CBN). It is intended for members of the CBN. Permission of the instructor is required.

PSYC 8010 Research Methods in Psychology
CREDIT HOURS 3.0
DESCRIPTION (Same as NEUR 8310.) Types of research design including experimental designs, quasi-experimental designs, single-case designs, and case studies; related research issues including aspects of philosophy of science, measurement, reliability, internal and external validity, and artifacts.

PSYC 8012 Developmental Methods
CREDIT HOURS 3.0
PREREQUISITES PSYC 8410 or PSYC 8420, or consent of instructor
DESCRIPTION Research methods and statistical techniques as applied to developmental data, including systematic observational methods, repeated measures analyses as applied to longitudinal data, growth curve analyses, and other techniques used in developmental psychology.

<tbody>
<tr>
<td>PSYC 8014</td>
<td>Research Methods in Community and Applied Social Psychology</td>
<td>3.0</td>
<td></td>
<td>Major approaches to research in community psychology and related disciplines, such as applied social psychology, health psychology, and environmental psychology. Emphasizes experimental and quasi-experimental design, survey research, and epidemiology, and introduces the students to some qualitative methods.</td>
</tr>
<tr>
<td>PSYC 8015</td>
<td>Theories of Development</td>
<td>3.0</td>
<td></td>
<td>Seminal theories of child development and empirical research derived from those theories will be considered.</td>
</tr>
<tr>
<td>PSYC 8020</td>
<td>Assessment I</td>
<td>4.0</td>
<td>PSYC 8020</td>
<td>Clinical interviewing, intellectual assessment, report writing, psychometric theory, and ethical and diversity issues relevant to assessment.</td>
</tr>
<tr>
<td>PSYC 8025</td>
<td>Foundations of Clinical Psychology: Science and Practice</td>
<td>4.0</td>
<td></td>
<td>This course will lay the foundation for later learning of assessment and therapy techniques and skills. Course content will include psychometrics relevant to assessment, intervention, and research settings as well as basics of clinical interviewing and non-specific skills (e.g., empathy, reflective listening). These skills and theory will be taught such that they cut across assessment, intervention, and research settings.</td>
</tr>
<tr>
<td>PSYC 8030</td>
<td>Assessment II</td>
<td>4.0</td>
<td>PSYC 8020</td>
<td>Personality assessment; evaluation of children’s academic, intellectual, and behavioral functioning; and ethical and diversity issues relevant to assessment.</td>
</tr>
<tr>
<td>PSYC 8035</td>
<td>Foundations of Clinical Psychology: Assessment</td>
<td>4.0</td>
<td></td>
<td>This course will provide the foundation skills necessary for conducting standardized assessments. Administration, scoring, and interpretation of intellectual, achievement, and personality tests will be the primary foci of the course.</td>
</tr>
<tr>
<td>PSYC 8045</td>
<td>Foundations of Clinical Psychology: Therapy</td>
<td>4.0</td>
<td></td>
<td>This course will survey a number of theoretical orientations and highlight applied aspects of therapy. All students enrolled in the course will carry at least one (1) therapy client, as the course will integrate classroom learning and experiential aspects of therapy.</td>
</tr>
<tr>
<td>PSYC 8050</td>
<td>Diversity Issues in Clinical Practice and Psychological Research</td>
<td>3.0</td>
<td></td>
<td>How diversity (primarily racial and ethnic) affects individual attitudes and actions, clinical practice, and psychological research. Students read from a variety of psychological and other sources, engage in experiential field work, and participate in class discussion and exercises.</td>
</tr>
<tr>

<tr>
<td>PSYC 8060</td>
<td><em>Issues of Human Diversity in Psychology</em></td>
<td>3.0</td>
<td>Examines issues involved in the psychology of human diversity through the study of human behavior in a sociocultural context. Covers similarities and differences in the experiences of diverse groups as influenced by the context in which those experiences occur. Paradigms and concepts used to define and to conduct research on human diversity are also discussed.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8200</td>
<td><em>Introduction to Community Psychology</em></td>
<td>3.0</td>
<td>Principles and theory of community psychology with emphasis on design, operation, and evaluation of community programs.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8220</td>
<td><em>Community Interventions, Social Change, and Prevention</em></td>
<td>3.0</td>
<td>Introduction to the field of prevention and social intervention in the discipline of community psychology. The prevention focus of the course will present basic concepts and conceptual models associated with prevention of social problems. The intervention focus of the course will present concepts, values, strategies, and tactics of community intervention and social change. Applications will be discussed regarding specific social problems and social settings.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8230</td>
<td><em>Assessment, Consultation, and Evaluation in Community Psychology I (ACE I)</em></td>
<td>3.0</td>
<td>Covers the professional theory needed to conduct professional consultation in a wide range of community settings, with an emphasis on the role of program evaluation in the larger process of program management, development, and implementation. Methodologies include experimental, quasi-experimental and qualitative research design.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8260</td>
<td><em>Assessment, Consultation, and Evaluation in Community Psychology II (ACE II)</em></td>
<td>3.0</td>
<td>PSYC 8230 with a grade of B- or higher In-depth examination of psychological consultation in mental health, community organizational, governmental, and other human service delivery settings. Focuses on applied research in ecological assessment and evaluation of settings and programs, using experimental, quasi-experimental, qualitative and observational methodologies.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8280</td>
<td><em>Psychology, Advocacy, and Organizing</em></td>
<td>3.0</td>
<td>To educate students in the role of psychological research in informing, framing, and advocating for public policy. Focus will be placed on the area of the instructor’s substantive policy research (e.g. education, domestic violence). To develop students' understanding of scholarly and community-based literature on community organizing and civic participation, with an emphasis on the principles and practices of effective community organizing via an understanding of social power dynamics.</td>

<tr>
<td>PSYC 8410</td>
<td>Psychological Research Statistics I</td>
<td>3.0</td>
<td>PSYC 3010, or equivalent</td>
<td>(Same as NEUR 8035.) Statistical analysis of psychological data with an emphasis on the logic of basic analytic techniques. Includes discussion of data screening, hypothesis testing, bivariate measures of association, and simple between- and within-subjects analysis of variance.</td>
</tr>
<tr>
<td>PSYC 8420</td>
<td>Psychological Research Statistics II</td>
<td>3.0</td>
<td>PSYC 8410</td>
<td>(Same as NEUR 8320.) Statistical analysis of psychological data with an emphasis on multiple and logistic regression and their interpretation. Statistical considerations when planning research such as power analysis are also discussed.</td>
</tr>
<tr>
<td>PSYC 8430</td>
<td>Psychological Research Statistics III</td>
<td>3.0</td>
<td>PSYC 8420</td>
<td>(Same as NEUR 8330.) Advanced topics in the statistical analysis of psychological data including various forms of factor analysis, psychometric methods and theories, structural equation modeling and its use in theory construction, and multivariate analysis of variance.</td>
</tr>
<tr>
<td>PSYC 8490</td>
<td>Scientific and Professional Ethics in Psychology</td>
<td>3.0</td>
<td></td>
<td>Introduction to psychology as a science and profession, with consideration of ethical standards of psychologists and current ethical issues.</td>
</tr>
<tr>
<td>PSYC 8500</td>
<td>History of Psychology</td>
<td>3.0</td>
<td></td>
<td>(Same as NEUR 8500.) Broad historical basis of psychology as a science. An account of the historical development and contemporary status of various theoretical systems of psychology.</td>
</tr>
<tr>
<td>PSYC 8510</td>
<td>Social Psychology</td>
<td>3.0</td>
<td></td>
<td>Survey of the content of experimental social psychology, including such areas as interpersonal perception, social motivation and learning, attitude and measurement and change, and such group processes as conformity, leadership, norm formation, and group productivity.</td>
</tr>
<tr>
<td>PSYC 8511</td>
<td>Special Topics in Social Psychology</td>
<td>1.0 TO 3.0</td>
<td></td>
<td>Focused and systematic examination of theoretical and empirical issues associated with a particular topic from social psychology, such as stereotyping and prejudice, identity, or relationships.</td>
</tr>
<tr>
<td>PSYC 8520</td>
<td>Cognitive, Affective, and Social Aspects of Behavior</td>
<td>3.0</td>
<td></td>
<td>Overview of theory and research related cognitive, affective, and social aspects of behavior.</td>
</tr>
<tr>
<td>PSYC 8531</td>
<td>Special Topics in Evolution</td>
<td>1.0 TO 3.0</td>
<td></td>
<td>Focused and systematic examination of theoretical and empirical issues associated with particular topics from the evolution of behavior, sociality, and cognition. These include topics such as the evolution of cooperation, conflict, social justice, interpersonal relationships, mating systems and sexual relationships, brain and cognition, communication, language and culture.</td>

<td>Focused and systematic examination of theoretical and empirical issues associated with a particular topic from cognitive psychology, such as memory, sound, or attention and executive function.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8551</td>
<td>Cognitive and Linguistic Development</td>
<td>3.0</td>
<td>Theory, research, and emerging trends in the development of cognitive and linguistic processes from infancy to adolescence. Both normative and atypical patterns of development will be considered.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8552</td>
<td>Social and Emotional Development</td>
<td>3.0</td>
<td>Theory, research, and emerging trends in the development of social and emotional processes from infancy to adolescence. Both normative and atypical patterns of development in a variety of social and cultural contexts will be considered.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8553</td>
<td>Advanced Developmental Seminar</td>
<td>3.0</td>
<td>In-depth examination of contemporary topics and issues in developmental psychology from infancy through adolescence. May be repeated if topic varies.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8600</td>
<td>Principles of Cognitive Neuroscience</td>
<td>3.0</td>
<td>The integrated study of cognitive sciences and neurosciences (i.e. the neural systems underlying cognitive processes). The topics covered include basic neuroanatomy and physiology, neuroimaging methods, and the study of various mental processes linked to brain structure and function in normal human populations, with discussion of the potential relationships between neural circuitry and the formation of internal experience through the integration of sensation, perception, prediction, action, and evaluation.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8610</td>
<td>Behavioral Neuroscience</td>
<td>3.0</td>
<td>This course will cover neuroanatomy and neurophysiology topics, including functional neural systems including sensory and motor systems, cortical and autonomic nervous systems. Normal function will contrasted with clinical cases and pathologies.</td>
<td></td>
</tr>
<tr>
<td>PSYC 8615</td>
<td>Functional Human Neuroanatomy</td>
<td>3.0</td>
<td>BIOL 3840 or PSYC 8610, or consent of the instructor (Same as BIOL 8040 and NEUR 8300.) In-depth study of the neuroanatomy and function of the human central nervous system. Considers neuroanatomical techniques used to study the brain, neuroanatomical basis for the control of sensory and motor systems, as well as cortical, autonomic nervous system, and limbic system anatomy and function. Both normal brain anatomy and pathologies are covered.</td>

<td>PSYC 8616</td>
<td>Neurobiology I: Cellular Neurobiology</td>
<td>4.0</td>
<td>BIOL 4102 or BIOL 6102 with grade of B or higher, or equivalent, or consent of instructor</td>
<td>(Same as BIOL 8010 and NEUR 8010.) The unique cellular and molecular properties of neurons and how these properties allow neurons to perform their computational tasks. Topics include neuronal excitability, synaptic communication, and neural development.</td>
</tr>
<tr>
<td>PSYC 8617</td>
<td>Neurobiology II: Integrative Neurobiology</td>
<td>4.0</td>
<td>PSYC 8616 or BIOL 8010 with grade of B or higher, or consent of instructor</td>
<td>(Same as BIOL 8020 and NEUR 8020.) How neurons are organized into neural systems that control behavior. Topics include functional anatomy of sensory systems, sensorimotor integration, central pattern generators, motor and control systems, neuromodulation, neuroethology, and the neural basis of learning and cognition.</td>
</tr>
<tr>
<td>PSYC 8618</td>
<td>Advanced Behavioral Neuroscience</td>
<td>3.0</td>
<td>PSYC 8616 and PSYC 8617, or BIOL 8010 and BIOL 8020, or consent of instructor</td>
<td>(Same as BIOL 8070 and NEUR 8030.) Advanced analysis of functional neural systems involved in the regulation of behavior, emphasizing interactions between limbic, hypothalamic, and cortical brain systems. Topics include: genetic determinants of behavior, behavioral plasticity: learning and memory, reproductive behavior, sleep and biological rhythms, drinking and eating, emotion, aggression, stress, language and cognition, behavioral disorders (thought, mood, stress, and anxiety), and drug abuse.</td>
</tr>
<tr>
<td>PSYC 8620</td>
<td>Introduction to Clinical Neuropsychology</td>
<td>3.0</td>
<td>PSYC 8610 or PSYC 8618, or consent of instructor</td>
<td>(Same as NEUR 8400.) Topics include laterality, handedness, cerebral dominance, basic neuroanatomy, aphasia, neglect, amnesic syndromes, agnosia, alexia, split brain research, and recovery of function.</td>
</tr>
<tr>
<td>PSYC 8625</td>
<td>Neural Plasticity</td>
<td>4.0</td>
<td>NEUR 6010 or BIOL 6102 with grade of C or higher, or equivalent</td>
<td>(Same as NEUR 6110 and BIOL 6110.) Four lecture hours per week. Phenomenology and mechanisms of experience-dependent changes in the nervous system. The course will examine plasticity at many levels of analysis, from synaptic mechanisms to clinical strategies, and from molecular neuroscience to cognitive psychology.</td>
</tr>

PH 7011  
**Introduction to Epidemiology**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
This course will cover basic principles of epidemiology, including outbreak investigation, disease control, and analysis of risk factors. Topics will include the history of epidemiology, overview of interdisciplinary collaborations, and examples of the use of epidemiology in developing and evaluating public health interventions. Class exercises will include developing case investigation forms, investigation of food borne disease, and establishing the cause of illness outbreaks.

PH 7012  
**Health Program Planning Implementation and Evaluation**  
**CREDIT HOURS** 3.0  
**PREREQUISITES** PH 7160 or instructor approval  
**DESCRIPTION**  
This course introduces the skills and techniques required to research and develop health programs at the community, state and national levels. Students will be presented with the concepts, processes and techniques used in health program planning, implementation, and evaluation. The students will engage in planning, implementation and evaluation exercises. The course will emphasize the importance of teams and partnerships in successful health promotion programs.

PH 7014  
**Epidemiology of STDS and HIV**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
This course will provide a comprehensive overview of the public health of HIV/AIDS and other sexually transmitted diseases (STDs) such as syphilis, chlamydia, gonorrhea, and hepatitis. Topics covered will focus on HIV/STD surveillance, epidemiology, behavior, prevention, and policy but include related aspects of history, medicine, society, politics, law, ethics, evaluation, advocate/activist community, and emerging developments. Though an international perspective will be provided, topics will be presented primarily in the context of domestic HIV/STD public health, particularly within the state of Georgia. HIV/STDs will be studied to assess similarities and differences of acquiring these infections and strategies/challenges for their prevention and control. Presentations will be made by expert guest speakers as they are available and appropriate. By the end of the course, students will gain a comprehensive and practical understanding of HIV/STD public health and develop/improve skills that public health professionals routinely use as scientific writing, speaking, making presentations and critical thinking.

PH 7016  
**Introduction to Health Promotion**  
**CREDIT HOURS** 3.0  
**DESCRIPTION**  
This course examines the philosophical, theoretical, and epidemiological assumptions underlying the planning, implementation, and evaluation of contemporary health promotion programs. Emphasis will be given to: (1) major trends in the health promotion practice and research, (2) the essential skills associated with effective health promotion practice, and (3) the strategic importance of carrying out health promotion programs and policies in the context of various cultural and organizational entities that make up a community system.
PH 7017  Fundamentals of Biostatistics I
CREDIT HOURS  4.0
PREREQUISITES  College algebra
DESCRIPTION  This course provides an introduction to biostatistics with a focus on applications to public health research and practice. Emphasis is placed on interpretation and conceptual understanding. Topics include descriptive statistics, classical statistical inference, and an introduction to statistical modeling with linear regression. Fundamentals of data analysis are introduced with the use of statistical software.

PH 7019  Public Health Research Methods
CREDIT HOURS  3.0
PREREQUISITES  PH 7011 or PH 7021 or PH 7711; and PH 7017 or equivalent
DESCRIPTION  This course provides classroom instruction and application of research methods for studying public health problems. It provides general introduction to research methods, emphasizing systematic approaches to collection and analysis of qualitative and quantitative data. Students will learn to identify the kinds of research problems for which qualitative and quantitative methods are appropriate, and to critique research in terms of design, technique, analysis and interpretation. Topics will include questionnaire design, ethical conduct and informed consent, sample size determination, data management, manuscript preparation, and grant application methods.

PH 7020  Principles of Tobacco Control
CREDIT HOURS  3.0
DESCRIPTION  Progress in reducing tobacco use is one of the ten greatest achievements of the 20th Century; however, tobacco use still remains as the leading preventable cause of death in America. The control of tobacco use draws upon many if not all of the academic disciplines that compose public health. In many ways the study of tobacco control serves as a case study for understanding the broad field of public health. This course will provide an overview of the history and evolution of tobacco in society, with particular emphasis on variety of public health disciplines used to reduce tobacco use, including behavior change, communications, law, regulation, public policy and community action.

PH 7022  Health Behavior Theory for Public Health Research
CREDIT HOURS  3.0
DESCRIPTION  This course will provide an overview of health behavior theories and how theory is used to guide health promotion research and practice. The goals of health promotion are to understand and identify risk factors and determinants of health-related behaviors and design effective interventions to address those risk factors and determinants that are modifiable. Behavioral theories from multiple levels will be explored that address the complex interrelationships between individuals and their relevant environments.
Health Disparities

This course will examine the social, political, and economic context of health disparities among racial/ethnic groups and other disenfranchised subgroups (e.g., the poor, uninsured, non-English speaking populations). This course is not intended to provide the answers to the multitude of problems associated with health disparities. Rather, it is intended to increase students' knowledge base and encourage discussion about health disparities. Emphasis will be placed on: 1) the conceptualization and measurement of health disparities, 2) examination of empirical evidence for disparities, and 3) understanding the practical and strategic importance of developing policy with regard to disparities. Students from a variety of disciplinary backgrounds will be presented with tools to conduct research on and utilize intervention strategies to reduce health disparities.

Fundamentals of Biostatistics II

This course focuses on the analysis of continuous outcome data from public health research and practice, building on the methods learned in PH 7017: Fundamentals of Biostatistics I. Multiple linear regression is covered, including model specification, assumptions, estimation, diagnostics, selection, inference, and interpretation. Analysis of variance and covariance (ANOVA/ANCOVA) are included as special cases of the general linear model. Emphasis is placed on the application of these techniques to real data examples using appropriate statistical software.

Introduction to Probability Theory and Statistical Inference

This course provides an introduction to the fundamental knowledge of derivatives and integrals found in statistical inference. The course introduces the theory of probability, special discrete and continuous distributions, expectations and variance, joint and conditional distributions, maximum likelihood estimation, and bias. Emphasis is placed on the development of critical thinking skills and how concepts in this course are used in public health and biomedical studies.

Leadership and Public Health

This course provides public health students and others with the principles and practices of public health leadership and management. The topics will include the development of leadership and managerial skills and will deal with topics as legal issues, strategy and human resource issues. The goal of the course is to prepare students to achieve success in public health and other organizations.

Social and Behavioral Aspects of Public Health

The social and behavioral sciences are a core element of the practice of public health. Disciplines such as psychology, sociology, economics, anthropology, policy and communications underpin our understanding of health behavior and help devise interventions to improve population health. This course will review the contribution of the various social and behavioral sciences disciplines in improving the public health with special attention to approaches which influence health behavior, health policies and lead to community participation and empowerment.

<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PH 7150</td>
<td>Environmental Health</td>
<td>3.0</td>
<td>This introductory course will provide a basic multidisciplinary understanding of the science (biology/toxicology, chemistry, and engineering), practice, and selected laws and policy of environmental health sciences (EH sciences). Topics include: types and sources of environmental contaminants; exposure assessment, including media and pathways; the role of human behavior and time-location-activity patterns; toxicology and the risk assessment paradigm; basics of environmental and occupational epidemiology; and, communicating to the public about technical aspects (science, potential risks) of EH sciences.</td>
</tr>
<tr>
<td>PH 7155</td>
<td>Air Quality and the Environment</td>
<td>3.0</td>
<td>Air quality is a significant public health concern that affects millions of people across the globe. The quality of air that we breathe, especially in urban environments, is an important determinant of our health. This course examines the nature of air pollution, how it is characterized and the health impacts of exposure. The class will review relevant epidemiological, toxicological and clinical research; conduct hands-on fieldwork; and study current events.</td>
</tr>
<tr>
<td>PH 7160</td>
<td>Introduction to the Health Care System</td>
<td>3.0</td>
<td>This course introduces and describes the health delivery system and the resources that comprise it. The theoretical basis for the system as well as the principal means of system organization and evaluation are discussed.</td>
</tr>
<tr>
<td>PH 7170</td>
<td>Public Health Policy</td>
<td>3.0</td>
<td>This course examines the relationship between research and policymaking. Complex health policy problems facing federal, state, and local policymakers today will be discussed.</td>
</tr>
<tr>
<td>PH 7265</td>
<td>Epidemiology and the Prevention of Violence</td>
<td>3.0</td>
<td>This course examines the public health approach to the prevention of interpersonal and self-directed violence. This approach has four steps: Defining the problem; identifying the risk and protective factors; developing interventions or policies to address the problem; and, broadly implementing effective intervention and prevention programs. This includes a focus on scientific research which is essential for developing effective intervention and prevention programs. With these basic precepts as the underpinnings of the course, the areas of violence prevention to be covered are: child maltreatment, youth violence, intimate partner and sexual violence, elder abuse, and suicidal behavior.</td>
</tr>
<tr>
<td>PH 7275</td>
<td>Chronic Disease Epidemiology</td>
<td>3.0</td>
<td>This course focuses on review of major issues in chronic disease epidemiology, summarization of relevant pathology and analogies of population determinants and strategies for prevention. Topics include risk factors, trends, interventions and health care issues. An interdisciplinary approach to prevention and control will be addressed. Readings and discussions on classical and contemporary research papers in cardiovascular diseases will be emphasized throughout the course.</td>

Global Water, Sanitation and Hygiene

PH 7297
CREDIT HOURS 3.0
DESCRIPTION This course will emphasize water, sanitation and hygiene in both developing and developed countries from an environmental health perspective. We will examine effective, appropriate, accessible and affordable measures to reduce the global burden of disease from environmental exposures. We will examine the risk-based framework to assess health effects from exposures to pathogenic (disease-causing) microbes and toxic chemicals in environmental media. Exposures to various agents of health concerns via water, wastes, air, vectors and other transmission routes will be considered, as will the various prevention and control measures intended to reduce these exposures.

Sampling of the Environment

PH 7299
CREDIT HOURS 3.0
DESCRIPTION This introductory course will provide a basic understanding of how environmental media such as food, water, soil, and air are sampled and tested for contaminants of public health concern. The course will cover both chemical and microbiological contaminants.

Urban Health

PH 7300
CREDIT HOURS 3.0
DESCRIPTION Urban health explores the relationship between the urban setting and the health of people living, working, and playing in cities. It develops an understanding of many features of cities, both individually and collectively, and how they influence people’s health. It compares and analyzes various aspects of place, people, and systems associated with cities. The course is presented as an interdisciplinary exploration in which many disciplines contribute and work collectively to understanding and improving public health. The course challenges students with real-life aspects of the city to learn firsthand about various factors that influence health and to provide real-life investigation of theory.

Urban Health Seminar

PH 7325
CREDIT HOURS 1.0
DESCRIPTION The Urban Health Seminar features presentations of research topics currently being pursued by the faculty of the Georgia State University Partnership for Urban Health Research. Research topics, methods, strengths, limitations, findings, and implications will be presented and discussed with learners. The sum of the seminar presentations will illustrate the interdisciplinary nature of the field of urban health.

Built Environment and Health

PH 7340
CREDIT HOURS 3.0
DESCRIPTION This is a course about understanding the built environment and its influence on human health, and how to affect improvement in the built environment to improve health status. The course will emphasize contemporary problems of U.S. cities. Group and off-campus activities are among the required elements of the course.
PH 7345  Introduction to Risk Assessment  
CREDIT HOURS 3.0  
DESCRIPTION This course will introduce the fundamentals of the risk assessment process for evaluating human health risks, with a focus on environmental health and quantitative microbial risk assessment. Topics include the risk assessment framework, exposure assessment, probability, risk modeling, evaluating chemical and microbial risks, and use of risk assessment as a policy tool.

PH 7355  Prevention Methods  
CREDIT HOURS 3.0  
PREREQUISITES PH 7011  
DESCRIPTION The course will be taught in a lecture/discussion format, with presentations by the instructor on methodologic and substantive issues that relate to prevention. Emphasis will be on intervention methods and their evaluation, with illustrations from some of the major efforts at disease prevention that have been attempted. The course assumes a basic knowledge of epidemiologic methods and the management and analysis of epidemiology data. The actual topics will change from year to year, depending on the interests and research of the faculty/student group.

PH 7365  Epidemiology of Adolescent and Young Adult Health Risk Behaviors  
CREDIT HOURS 3.0  
DESCRIPTION This course will provide an introduction to adolescent and young adult health risk behaviors and their joint occurrences from a population perspective. Topics covered will focus on individual and social behaviors that include and contribute to unintentional injuries and violence, alcohol and drug abuse, sexual risk taking behaviors that contribute to unintended pregnancies and sexually transmitted diseases, unhealthy dietary behaviors, and physical inactivity. Emphasis will be placed on presentations and discussions of the prevalence, trends, and risk and protective factors across health risk behaviors among adolescents and young adults in the U.S. However, international perspectives will also be provided for comparisons and context. By the end of the course, students will gain a comprehensive overview and understanding of the scope and costs of health risk behaviors, current research findings and implications for prevention and intervention strategies including policies.

PH 7521  Evaluation Research  
CREDIT HOURS 3.0  
DESCRIPTION An examination of the techniques and practice of program evaluation for effectiveness in program administration. The course contrasts deductive and inductive approaches. The instructor illustrates the advantages of using evaluation as a mechanism for program improvement.
PH 7522  Qualitative Research
CREDIT HOURS  3.0
DESCRIPTION
This course will introduce students to the qualitative research methods most commonly used in the field of Public Health. We will explore the theoretical foundations of qualitative research as well as the efficacy of a qualitative approach. Students will also practice the skills necessary to successfully conduct qualitative research, learning to conceptualize effective research questions, to determine the most appropriate data collection method, to negotiate relationships with research participants and to analyze the present qualitative data.

PH 7525  Statistical Computing
CREDIT HOURS  3.0
PREREQUISITES
PH7017 or equivalent
DESCRIPTION
This course is an in-depth introduction to one or more statistical software programs widely used in public health. Topics covered in this course include application of basic informatics techniques, including the storage, access, management, organization, visualization, and evaluation of public health data. Focus is on the development of skills for writing, debugging, and documenting software syntax files and program scripts.

PH 7535  Dissemination and Implementation Science
CREDIT HOURS  3.0
DESCRIPTION
This course will cover dissemination and implementation science as it relates to implementing public health programs and policies. It will review implementation frameworks and research design strategies for evaluating implementation outcomes in applied settings. It will review the issues in implementation research, that is, the challenges of taking research to practice ranging from buy-in of programs by staff and leaders, model fidelity, community and cultural considerations, and other challenges.

PH 7540  Introduction to Public Health Laboratories
CREDIT HOURS  3.0
DESCRIPTION
This is an in-depth course on the role of laboratory analysis in public health. It will focus on development of an understanding of the way laboratory data are collected and integrated into the public health system. The role of state and federal laboratories will be examined as will various laboratory methods in a laboratory setting. We will also examine the current challenges and possibilities for enhancing the role of public health laboratories and how knowledge about this area can enhance the integration into the field of public health. The course will be approximately half lecture and half laboratory experiments. Students will gain experience in performing basic laboratory analysis in both clinical and environmental fields.

PH 7555  Disability and Public Health
CREDIT HOURS  3.0
DESCRIPTION
This course will address the evolving view of disability in the field of public health. Students will be introduced to a broad range of topics in order to increase their understanding of the contemporary experience of disability in America. This course will examine how intersection of education, employment and environment impacts the health and well being of people with disabilities. Topics will include: models and approaches to disability; a brief history of public health and overview of epidemiology; a brief history of disability rights; state and federal programs and legislation for people with disabilities; health promotion and the prevention of secondary conditions; health disparities; sexual health; end of life decision-making; and redefining the role of public health in addressing disability.
PH 7565 Disability Policy
CREDIT HOURS 3.0
DESCRIPTION This course provides an overview of the major health policy issues impacting Americans with disabilities. The evolution of models and approaches to understanding disability will be presented to provide a conceptual framework to analyze disabilities within public health. The course will examine key pieces of legislation related to disability, such as the Americans with Disabilities Act, the Developmental Disabilities Act, the Individuals with Disabilities Education Act, and health financing components of Medicare and Medicaid. Students will gain an awareness of complexities of disability policy and its relationship to health outcomes for Americans with disabilities. Topical areas for analysis and discussion will assist students in generating policy solutions to eliminate disparities in health for Americans with disabilities.

PH 7570 Childhood Obesity Prevention
CREDIT HOURS 3.0
DESCRIPTION Obesity is one of the biggest public health challenges in the 21st century. Devising effective policy and practice to combat childhood obesity is a high priority for government officials and many other professionals across numerous sectors. This course reviews the latest evidence-based research on community and policy interventions to prevent unhealthy weight gain and improve the health and well-being of children. The course will examine evidence available on what is and what is not effective and provide guidance on how to implement and evaluate promising interventions for obesity prevention.

PH 7600 Global Health
CREDIT HOURS 3.0
DESCRIPTION This course combines classroom and interactive instruction to introduce core topics and pertinent issues in global health with a focus on developed and developing countries. It introduces key global health concepts and underscores the critical links between health, disease, and socioeconomic development. Utilizing a multidisciplinary approach, the course addresses a variety of contemporary global health topics including: essentials of global health; globalizaton and health; global burden of disease, measurement and trends; culture, behavior and global health; water, sanitation and global health; health and human rights; global health partnerships, and the millennium development goals. The course also examines challenges associated with global health issues and the global efforts and strategies underway to prevent and control them.

PH 7711 Epidemiologic Methods I
CREDIT HOURS 3.0
PREREQUISITES PH 7017 or equivalent (co-requisite or prerequisite)
DESCRIPTION This course will introduce the major methods used in epidemiology, including measures of association and their relationship to study design, strategies for assessing validity (bias, misclassification), confounding, standardization, attribution, assessment of results (sensitivity, specificity, and predictive value, interobserver correlation), hypothesis testing, sampling, causation, and ethical considerations. Students will work with a problem set that addresses each of these issues, and will be asked to read key historical articles that established the basis for many of them. The methods will be placed in the context by use of examples and current epidemiologic issues.
PH 7900  Contemporary Issues in Public Health
CREDIT HOURS  1.0 TO 6.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  This course provides an advanced research- or theory- oriented treatment of special or emerging topics in public health practice. The course can be repeated when topics vary.

PH 7950  Public Health Internship
CREDIT HOURS  3.0 TO 6.0
PREREQUISITES  Consent of the Instructor
DESCRIPTION  This course involves supervised field placement for the purpose of utilizing and extending the theories, concepts and practices learned through previous coursework. The work may involve a project.

PH 7960  Public Health Practicum
CREDIT HOURS  2.0 TO 6.0
PREREQUISITES  PH7011 or PH7117, PH7140, PH7150, and PH7160; plus two prescribed concentration courses
DESCRIPTION  The practicum is a planned, supervised and evaluated practice experience where graduate professional public health degree students develop skills in basic public health concepts and demonstrate the application of these concepts through a practice experience that is relevant to students' areas of specialization, concentration and/or division. These opportunities can take place in a variety of governmental or non-governmental agencies and organizations and include local, state, national and international public health agencies to the extent possible and appropriate.

PH 7980  Research Practicum
CREDIT HOURS  1.0 TO 15.0
DESCRIPTION  Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.

PH 7990  Thesis
CREDIT HOURS  3.0 TO 6.0
PREREQUISITES  Consent of instructor
DESCRIPTION  Individual research and study of a selected topic of public health under the direction of the student's faculty advisory or designated faculty member.

PH 7991  Capstone
CREDIT HOURS  3.0 TO 6.0
PREREQUISITES  Consent of Instructor
DESCRIPTION  An applied practice project requiring the integration of knowledge and skills acquired through academic coursework and research.

PH 8100  Special Topics
CREDIT HOURS  1.0 TO 6.0
DESCRIPTION  In depth exploration of public health issues and research in urban and/or international environments. Course may be taken again for additional credit if topic varies.
**PH 8190**  
*Presenting and Critiquing Research*

**CREDIT HOURS**  
1.0

**DESCRIPTION**  
The purpose of the seminar is to enhance the culture of scientific thinking and encourage engagement in academic discussion and debate. The seminar would involve student, faculty, or guest presentations and discussion of research in progress, completed/published research or related public health topics. The intent of this seminar would be to provide an ongoing venue for the discussion of research ideas, presentation of interim results, problem-solving necessary for the conduct of the research or the interpretation of results, and discussion of findings. Students would gain exposure to this process in the consideration of their own work, as well as that of faculty and outside researchers. The research seminar would also be used to enhance student professional presentation and writing skills, as well as application of theory, methods and statistics skills.

**PH 8200**  
*Grant writing*

**CREDIT HOURS**  
1.0

**DESCRIPTION**  
The purpose of this seminar is to acquaint students with a variety of types of professional writing required of public health professionals, including grant proposals, journal articles, presentation proposals and papers, and theses and dissertations. The scope of the course includes both the form and content of a range of technical documents as well as the processes of writing, peer review, and critique. This seminar would provide an opportunity for students to hone grantsmanship skills through both the writing and reviewing of a grant application. The seminar would also serve as a venue for students to identify sources and processes for research funding.

**PH 8210**  
*Review Paper*

**CREDIT HOURS**  
1.0

**DESCRIPTION**  
The student will complete a publishable review paper on a relevant topic in public health. The purpose of this seminar is to provide students with an opportunity to develop further professional writing skills in the context of a mentoring experience. This seminar will be graded Satisfactory or Unsatisfactory (S/U).

**PH 8230**  
*Professional Development Seminar*

**CREDIT HOURS**  
1.0

**DESCRIPTION**  
The purpose of this seminar is to provide mentoring that will enhance student preparation for professional interactions in the public health field. The seminar will offer an ongoing venue for the discussion of issues related to professional development. The course will include guest lectures related to Ph.D. level careers in public health in government, academia, and research. Other topics that will be covered in the course include: vita development, statement of purpose, interviewing skills, teaching, and professional conduct in networking. The ultimate outcome of the seminar will be for the student to effectively present a line of research and be prepared for the public health job market. This seminar will be graded Satisfactory or Unsatisfactory (S/U).

<tbody>
<tr>
<td>PH 8250</td>
<td>Health Economics and Policy</td>
<td>3.0</td>
<td>PH7160</td>
<td>The course will provide an introduction to health care finance with a particular emphasis on the various meanings of 'cost' and public health issues. Students will be presented with the foundations of public and private health care financing, program operations and parameters with respect to coverage and payment, and the role the states play in federally supported programs. The course will familiarize students with federal, state, and local funding mechanisms and outline the tools used to evaluate the impact of insurance programs on the health care delivery system. The problems of the uninsured, health care coverage and access, scarce health care resource allocation, and cultural challenges will be discussed, with an emphasis on learning how or if public and private funding and insurance programs can successfully address such problems.</td>
</tr>
<tr>
<td>PH 8260</td>
<td>Spatial Population Health I</td>
<td>3.0</td>
<td>Statistics and Multivariate Regression Analysis or instructor approval</td>
<td>This course will prepare students to master the development and exploration of spatial data for use in population health research. The course will cover finding and obtaining data, geocoding and crosswalking data, developing metadata, and other aspects of data development that are unique to spatial data. The course will also cover descriptive and exploratory analyses of the data as means of checking the quality and reliability of the data. The course will equip students with methodological tools for conducting descriptive statistical analysis, exploratory spatial analysis, and the basic principles of mapping and smoothing data to enhance translation of spatial data properties.</td>
</tr>
<tr>
<td>PH 8261</td>
<td>Spatial Population Health II</td>
<td>3.0</td>
<td>PH 8260; and PH 8721 or PH 8820 or PH 9820 or instructor approval (generally given to those with competence in statistics and multivariate regression analysis)</td>
<td>This course will prepare students to conduct advanced univariate exploratory spatial analysis, and advanced multivariate, confirmatory analyses using spatial data. Several geospatial analytic methodologies will be explored, each suited to a particular type of data or set of research questions. The course will include principles for design of socio-ecological conceptual models, with a review of many models in use today in health services research. A major focus of the course will be using visualization techniques to effectively translate research findings from complex multivariate models to lay audiences and policy makers.</td>
</tr>
<tr>
<td>PH 8285</td>
<td>Social Determinants of Health</td>
<td>3.0</td>
<td></td>
<td>This course will provide an overview of the concepts and methods for research into how social factors over a person’s life course determine health attitudes and behaviors, disease incidence and prevalence, and health status of populations. A study of social determinants of health includes traditional approaches of social epidemiology and includes factors that affect health care coverage, access, and efficiency of care delivery. The course consists of instructor lectures and student participation using a seminar format.</td>
</tr>
</tbody>
</table>
**PH 8290 Population Health Informatics**

3.0

This course will introduce concepts, methods, and issues related to the application of health information for surveillance and management of population health. The concept of public health informatics differs from other areas of health informatics because it is focused on the application of existing data for promotion of health and disease prevention in populations and communities. The course consists of instructor lectures and student participation using a seminar format.

**PH 8350 Biological Basis for Disease**

3.0

This course will cover the basic biological concepts of human health and disease. It will present human anatomy and physiology, genetics, immunology, and nutrition in the context of infectious and non-infectious causes of disease. The complex interaction of the human body with agents of disease and with the environment will be presented as it relates to risk factors, methods of prevention, and treatment options.

**PH 8721 Epidemiologic Methods II**

3.0

PH 7021 or PH 7711; Prerequisite or corequisite: PH 7027 or PH 8027 or PH 9810

The methodological issues important to the design of epidemiologic studies of both infectious and noninfectious disease will be covered at an intermediate level. The material to be covered is intended to broaden and extend the student's understanding of the elements of study design, data analysis, and inference in epidemiologic research, including issues related to causation, bias and confounding. The primary aims of the course are to provide a working knowledge of the fundamentals of epidemiology as well as to serve as a foundation for more advanced study of epidemiologic methods. The course will provide the student with a rigorous approach to critical reading of the medical literature. Each week articles reporting on research using varied designs and methods will be reviewed in order to illustrate the application of epidemiologic principles. By the end of the course, the student will be able to critique an article and identify its strengths and weaknesses.

**PH 8790 Special Topics in Epidemiology**

1.0 TO 6.0

PH8721 and PH8820 or instructor approval

An in-depth exploration of specific epidemiologic issues and research. Course may be taken again for additional credit if topic varies.
PH 8820  
**Categorical Data and Generalized Linear Models**

**CREDIT HOURS**: 3.0  
**PREREQUISITES**: PH 7027 or PH 8027 or instructor approval  
**DESCRIPTION**: This course focuses on the analysis of non-continuous (e.g., categorical and count) outcome data from public health research and practice. An overview of the generalized linear model will be provided. Topics include binary/multinomial/ordinal logistic and Poisson regression. Emphasis is placed on the application and interpretation of these techniques in real data settings using appropriate statistical software.

PH 8830  
**Advanced Statistical Topics**

**CREDIT HOURS**: 3.0  
**PREREQUISITES**: PH7027 or PH8027 or PH9820 or instructor approval  
**DESCRIPTION**: This is a survey course of advanced statistical topics in public health research and practice, including the analysis of study data with longitudinal, hierarchical, or multilevel structures. Using an applied and practical approach to each statistical technique, focus is on model specification, estimation, selection, inference, and interpretation. Understanding is emphasized with applications using statistical software and examples drawn from the current public health literature.

PH 8880  
**Public Health Study Abroad**

**CREDIT HOURS**: 1.0 TO 12.0  
**PREREQUISITES**: Instructor Approval  
**DESCRIPTION**: Through international travel, this course will provide an educational and cultural opportunity for students interested in global public health research and public health practice as conducted in other areas of the world. Students may study a variety of public health issues, engage in community-based research, and/or provide support to public health organizations in their host city and country. This course number serves as a generic number for study abroad programs sponsored by or done in partnership with the School of Public Health. An in-country experience is a required segment of the course. Specific region and/or discipline focus may vary by offering. Most public health study abroad opportunities are applicable to all graduate degree and certificate concentrations. If an opportunity is only applicable to a certain degree level and/or concentration, the corresponding degree level or concentration restriction will appear on that specific study abroad course offering and in its course listing comments area. Also, this course is variable credit; the instructor will inform students on the appropriate amount of credit hours students should register for given their planned course workload. Students must adjust their own variable credits prior to the end of registration (http://registrar.gsu.edu/registration/registration-guide/how-to-change-credit-hours-for-variable-hours-courses/). Contact the School of Public Health for the current list of study abroad options (http://publichealth.gsu.edu/academic/study-abroad/).

PH 9140  Advanced Research Methods  
CREDIT HOURS  3.0  
PREREQUISITES  Enrolled in a doctoral-level program of study  
DESCRIPTION  This course introduces students to advanced topics in research design and statistical analysis. The first part of the course focuses on research design, and the second focuses on familiarizing students with advanced statistical techniques. Students will develop a working knowledge of analytical techniques and understand how to apply them in a research setting.

PH 9150  Public Health Ethics  
CREDIT HOURS  3.0  
PREREQUISITES  Enrolled in a doctoral-level program of study  
DESCRIPTION  This course addresses a range of issues in public health ethics. The first part of the course will introduce ethical frameworks and concepts relevant to public health. It also describes the overlap and distinctions between public health and medical ethics. Students will use a case-based approach to address ethical dilemmas.

PH 9180  Doctoral Professional and Research Seminar I  
CREDIT HOURS  3.0  
DESCRIPTION  The intent of this seminar series is to provide students with opportunities for scientific and professional growth in the field of public health. Part 1 of the seminar series will focus on developing a public health research trajectory. Topics of focus will include developing research ideas, funding opportunities for student research, how to submit research ideas to regional and national conferences, and preparing and reviewing peer review manuscripts. Students will be encouraged to use this seminar as a time for scientific thinking, academic discussion and debate, and as an ongoing venue for discussion of research ideas, presentation of interim results, and discussion of findings.

PH 9181  Doctoral Professional and Research Seminar II  
CREDIT HOURS  2.0  
DESCRIPTION  The intent of this seminar series is to provide students with opportunities for scientific and professional growth in the field of public health. Part 2 of the seminar series will focus on student professional development and will include guest lecturers related to Ph.D. public health careers in government, academia, and research. Professional development topics will be covered including: vita development, interviewing skills, approaches to teaching, professional conduct at conferences, networking, career development, and how to be successful in the academic job market. This seminar will be graded Satisfactory or Unsatisfactory (S/U).

PH 9220  Principles of Health Services Research I: Themes  
CREDIT HOURS  3.0  
DESCRIPTION  The objective of this course is to provide advanced public health graduate students with a sufficient background to be conversant in the history and current debate on key themes in contemporary health services research. Completion of the course will provide sufficient background for specialized advanced study in each of the topics covered. The course will primarily consist of lectures followed by critical discussion on selected readings. Topics will include, but not be limited to: healthcare organization and financing, workforce development, population health informatics, access to care, patient safety and quality of care, chronic care management, provider performance management, comparative effectiveness, and health services research management. Readings and class discussions will primarily be organized around theme-related reports from the Institute of Medicine.
**PH 9240**  
**Principles of Health Services Research II: Methods**

**CREDIT HOURS**
3.0

**DESCRIPTION**
The objective of this course is to provide advanced public health graduate students with an introduction to theory, methods, and application of statistical and experimental design methods being used in contemporary health services research. Completion of the course will provide sufficient background for use of the methods in study design and analysis of health services research studies as subsequent specialized coursework in each of the topics covered. The course will primarily consist of a lecture covering on topic combined with a computer lab. Topics will include, but not be limited to: quasi-experimental design and propensity score models, hierarchical models, segmented (interrupted) time series models, mediation and moderation models, Markov and semi-Markov models, competing risk models, multi-part regression models, imputation methods, and cluster randomized trials.

**PH 9741**  
**Advanced Topics in Epidemiologic Methods**

**CREDIT HOURS**
3.0

**PREREQUISITES**
PH 9731 and PH 9820 or instructor approval

**DESCRIPTION**
Introduces advanced topics in epidemiologic methods, including causal modeling, inverse probability weighting, propensity scores, sensitivity analysis, imputation for missing data, approaches to multiple comparisons, Bayesian adjustment of risk estimates, recursive portioning, and modeling for prediction.

**PH 9731**  
**Epidemiologic Methods III**

**CREDIT HOURS**
3.0

**PREREQUISITES**
PH8721 or PH7031 and PH9810 or instructor approval

**DESCRIPTION**
This is the third course in the epidemiologic sequence and will cover newer techniques and issues in epidemiology, such as generalized linear models, hierarchical linear models, causal evaluation of observational studies, basic Bayesian approaches and an introduction to structural equation modeling. The course will use a mixed format of seminar, lecture, and student presentation. The instruction will focus on problems taken from the literature and on analytic approaches in SAS and other languages.

**PH 9810**  
**Biostatistical Methods I**

**CREDIT HOURS**
3.0

**PREREQUISITES**
graduate level introductory statistics

**DESCRIPTION**
This course covers the foundations of statistical inference (e.g., population parameter, estimate, and sampling distribution) as well as schemas of statistical inference (e.g., hypothesis testing, confidence intervals, and statistical power). Common public health measures and tests of bivariate and multivariate associations are introduced within the general linear model framework, which incorporates a number of different statistical models including multiple linear regression and ANOVA. Equal emphasis is placed on conceptual understanding as well as practical application and interpretation in real data settings.
**PH 9820 Biostatistical Methods II**

**CREDIT HOURS**: 3.0

**PREREQUISITES**: PH 9810 or instructor approval

**DESCRIPTION**: This course focuses on regression models for continuous and discrete data, building on the methods learned in PH 9810: Biostatistical Methods I. The generalized linear model framework is introduced, which incorporates a number of different statistical models including linear, logistic, and Poisson regressions. Attention is paid to model estimation, statistical inference for regression coefficients and predictive values, regression diagnostics, variable selection, and assessment of model fit. Equal emphasis is placed on conceptual understanding as well as practical application and interpretation in real data settings.

**PH 9960 Public Health Doctoral Practicum**

**CREDIT HOURS**: 3.0

**PREREQUISITES**: Consent of instructor

**DESCRIPTION**: The practicum should reflect the student's interest and professional goals. The practicum is supervised application of skills, concepts and theories in an approved research or practice-based public health setting. A member of the faculty maintains close supervision. Practicum may extend beyond one term for a maximum of two terms. Course is graded as satisfactory/unsatisfactory. A grade of S is required for this course. Requirements for practicum may be waived for students who demonstrate competency in these areas by providing documentation of work completed.

**PH 9990 Dissertation**

**CREDIT HOURS**: 3.0 TO 9.0

**PREREQUISITES**: Completion of comprehensive doctoral examination

**DESCRIPTION**: Involves the research and writing of the doctoral dissertation. Successful completion requires a significant contribution to the theoretical, conceptual, empirical, or practice base in the field of public health. Dissertation may extend beyond one term. Doctoral students who have passed the comprehensive examination must register for this course each term until graduation to satisfy the continuous registration requirement. A grade of IP (indicating that satisfactory progress was made on the dissertation) or U (indicating lack of satisfactory progress) is assigned each term. At the end of the term during which the dissertation is completed/defended, a grade of S (satisfactory) or U (unsatisfactory) is assigned to the student.
PMAP 8010  Social Policy

**CREDIT HOURS**  3.0

**DESCRIPTION**  This course introduces students to contemporary social policy questions in the U. S. and how to analyze policy alternatives for addressing these questions. Specific social policy issues are chosen for discussion on the basis of their relevance to current public policy debates.

PMAP 8011  Politics and Policy

**CREDIT HOURS**  3.0

**DESCRIPTION**  A course designed to familiarize the student with the scope of policy studies. Particular emphasis will be given to the study of the policy process and the influence of the larger economic, political, and governmental context on public policies, as well as an understanding of the effect of policies on target groups, institutions, and society more generally.

PMAP 8021  Scope and Theory of Planning

**CREDIT HOURS**  3.0

**DESCRIPTION**  This course will acquaint students with the history of urban planning in the United States and the legal and administrative context in which planning takes place. It will describe several models of planning processes, and consider their appropriateness under different circumstances, the role of citizen involvement in planning, and planning ethics. Also considered are examples of recent planning practice.

PMAP 8031  Urban Political Economy

**CREDIT HOURS**  3.0

**DESCRIPTION**  The conceptual base for and development of public-private partnerships. Includes such community and human resource development partnerships as UDAG and JTPA. Selected case studies will be used.

PMAP 8111  Public Service and Democracy

**CREDIT HOURS**  3.0

**DESCRIPTION**  This course provides students with an introduction to the study, practice, and structure of public administration and management in the United States. Major disciplinary and conceptual foundations of public administration are covered, including theories of organization and bureaucracy, administrative behavior and management, politics and administration, and public policy-making.

PMAP 8121  Applied Research Methods and Statistics I

**CREDIT HOURS**  3.0

**DESCRIPTION**  An introduction to methods and statistics for applied research in the public and nonprofit sectors. Topics include the scientific method in applied research, elementary research design, measurement, qualitative research, computer-assisted data analysis, and beginning statistics including descriptive statistics, crosstabulation, introductory inferential statistics, and graphical presentations.

PMAP 8131  Applied Research Methods and Statistics II

**CREDIT HOURS**  3.0

**PREREQUISITES**  PMAP 8121

**DESCRIPTION**  Advanced methods and statistics in applied research. Topics include survey research, experimental and quasi-experimental designs, sampling, and intermediate statistical techniques including analysis of variance, correlation and regression, and time-series analysis. Ethics of applied research in public administration and urban policy are also examined.
PMA 8141  Microeconomics for Public Policy
CREDIT HOURS  3.0
DESCRIPTION  The purpose of this course is to introduce principles of microeconomics to students for use when analyzing public policy for effective public administration and planning. The course will consider basic concepts of microeconomic principles including market failure, public goods, supply and demand, pricing, and externalities. These concepts will be presented using practical examples involving the public sector, and students will practice application through problem solving.

PMA 8161  Public Budgeting and Finance
CREDIT HOURS  3.0
PREREQUISITES  PMA 8111 or PMA 8011 and PMA 8121 or consent of the instructor
DESCRIPTION  A survey of the practice and problems of modern fiscal management in government with special emphasis on budgetary procedures and the means of budgetary analysis.

PMA 8171  Public Management Systems and Strategies
CREDIT HOURS  3.0
DESCRIPTION  Analysis of contemporary approaches to the management of public and nonprofit organizations focusing primarily on problem-solving strategies and techniques for use at the executive and operating levels.

PMA 8201  International Nongovernmental Organizations
CREDIT HOURS  3.0
DESCRIPTION  This course studies relief and development NGOs in poor countries. The course begins with an overview of the state of the world economy and strategies for economic growth. It then turns to such topics as: the role of NGOs in economic development and the formation of social capital, particularly within the context of globalization and democratization; relationships between NGOs, businesses, and national and international public agencies; and the challenges in accountability, advocacy, management and leadership.

PMA 8203  Nonprofit Advocacy, Law, and Policy
CREDIT HOURS  3.0
DESCRIPTION  Policy directs and shapes the activities of nonprofits in many ways including how they structure themselves, raise funds, and advocate for policy change. This course examines both how policy influences nonprofits as well as how nonprofits impact policy. It will address the role of nonprofit organizations in the public policy process including advocacy strategies and techniques and examine in turn how laws shape nonprofit involvement in that process. The course will also review state and federal policy that enables and regulates nonprofits including legal forms, tax exemption, fundraising regulations, and employee compensation. Students will gain an understanding of where policy intersects with nonprofit activities and learn how to operate within a basic nonprofit legal framework.
PMAP 8210 The Nonprofit Sector
CREDIT HOURS 3.0
DESCRIPTION The course provides an overview of the nonprofit sector in society with a consideration of the nonprofit sector's relationship to the state and to for-profit sectors. Attention will be given to the social settings in which nonprofit organizations exist, and to contemporary public policy issues regarding the nonprofit sector.

PMAP 8213 Financing and Resource Development for Nonprofit Organizations
CREDIT HOURS 3.0
PREREQUISITES PMAP 8141 and PMAP 8210 or consent of instructor
DESCRIPTION Economic sustainability and effective pursuit of social missions are two of the principal challenges facing contemporary nonprofit leadership. Addressing these challenges requires leaders and managers to be knowledgeable and adept at securing adequate and appropriate sources of income for their organizations. Nonprofit organizations support themselves through many different sources including charitable gifts and grants, government grants and contracts, earned income from fees, memberships and sponsorships, returns on investment, volunteer labor, gifts-in-kind and other sources. This course is intended to illuminate the theoretical rationales and practical considerations involved in developing and utilizing particular sources of income and in selecting appropriate combinations or portfolios, so that nonprofit organizations can effectively advance their particular missions, sustain the infrastructure of their organizations, remain financially healthy, and manage risk and change.

PMAP 8221 Fundraising for Voluntary Nonprofit Organizations
CREDIT HOURS 3.0
DESCRIPTION A study of fundraising cycles and techniques for nonprofit volunteer organizations; fundraising through volunteers; board development and management for fundraising and public relations.

PMAP 8223 Nonprofit Human Resources
CREDIT HOURS 3.0
PREREQUISITES PMAP 8210
DESCRIPTION The purpose of this course is to examine the theoretical and practical aspects of managing paid and voluntary human resources in nonprofit organizations. The course reviews basic issues in nonprofit human resource management, including recruitment, retention and compensation, and explores several specialized issues, such as performance, motivation, diversity, and conflict management. The course also reviews theory and recent research on attracting, motivating, and managing volunteers. Finally, the course explores emerging trends in nonprofit human resources, including the effects of recent public policy changes on the nonprofit labor force.

PMAP 8232 Social Enterprise
CREDIT HOURS 3.0
DESCRIPTION Social enterprise couples the resources generated by market activities with the social ambitions of nonprofit organizations. Spurred on by the social entrepreneurship movement, social enterprises transform communities through highly innovative problem solving. Their purpose is to carve out new routes to sustainable solutions to social problems on local, national and international levels. This course will examine social enterprises from both nonprofit and business perspectives and provide students with a broad overview of their purposes, forms, funding, management approaches, and impact.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PMAP 8251</td>
<td>Grant Writing and Management</td>
<td>3.0</td>
<td>This course introduces students to the world of grant writing and management and provides them with an opportunity to experience writing actual grants. Students will learn the process of identifying prospective funders, developing relationships with funders, understanding the basics of writing grants, submitting proposals, working as a collaborative, and preparing for the follow up. Students will apply course learning to write and prepare actual grant proposals.</td>
</tr>
<tr>
<td>PMAP 8261</td>
<td>Nonprofit Financial Management</td>
<td>3.0</td>
<td>This course is designed to teach students how to use financial information to make decisions in nonprofit organizations. The first half of the course is devoted to financial accounting, focusing on understanding and using the information found on financial statements. The second half of the course focuses on using principles of financial management to make operating and capital budgeting decisions and to analyze long-term financial options.</td>
</tr>
<tr>
<td>PMAP 8271</td>
<td>Disaster Policy and Emergency Management</td>
<td>3.0</td>
<td>This course focuses on the design of disaster policies and implementation of emergency management programs to manage hazards and to deal with natural, technological, and other man-made disasters. Emphasis is on the roles of public agencies, nonprofit organizations, and private firms, as well as volunteers, in disaster mitigation, preparedness, response, and recovery efforts in the U.S. and other nations and the development of national and international standards for emergency management programs. Case studies are drawn from recent focusing events, such as the 9/11 attacks, the 2004 Sumatran tsunami, and the Hurricane Katrina disaster, and students are introduces to the profession of emergency management.</td>
</tr>
<tr>
<td>PMAP 8281</td>
<td>Disaster Relief and Humanitarian Assistance</td>
<td>3.0</td>
<td>This course focuses on national and international disaster relief, from the politics and economics of international relief and national disaster assistance efforts to the logistics of relief operations and managing volunteers. The foci are the roles of governmental and nongovernmental organizations in disaster relief, policy issues in complex emergencies (e.g., security for relief workers in natural disasters complicated by political conflict), the development of sustainable assistance programs, links between humanitarian assistance and sustainable development, and the development of international standards for humanitarian assistance, such as the Sphere Project.</td>

<td>PMAP 8300</td>
<td>Planning for Resilient Communities</td>
<td>3.0</td>
<td>The linkage between population growth, urbanization patterns, natural hazards and exposure has become increasingly obvious with mounting disasters. How do we make communities more resilient to disasters, and what is the role of planners and policy-makers. Students learn about the social, environmental and economic impacts of disasters on communities, and how to formulate planning and policy strategies for to promote community resiliency.</td>
</tr>
<tr>
<td>PMAP 8311</td>
<td>Urban Demography and Analysis</td>
<td>3.0</td>
<td>This course addresses the role of demography in urban policy and planning, and the impact of a changing population and their activities on our cities and communities. This course makes in-depth use of the U.S. census data in deriving measurements and conducting analysis on regional and local economic and social conditions with emphasis on both the spatial and temporal perspectives. Substantive topics to be discussed include racial/ethnic composition, immigration, housing, employment, poverty and economic development, transportation, as well as land use and urban spatial structure.</td>
</tr>
<tr>
<td>PMAP 8321</td>
<td>Economic Development Policy</td>
<td>3.0</td>
<td>An overview of recent literature and examples of options available to communities as they plan and finance economic development activities.</td>
</tr>
<tr>
<td>PMAP 8331</td>
<td>Urban Development and Sustainable Cities</td>
<td>3.0</td>
<td>Causes and consequences of urban development and growth management are introduced in the light of economics and public policy theories, within the context of legal and constitutional framework. In addition to prevalent growth patterns (e.g. sprawl vs. smart growth), issues related to the physical and environmental dimension of urban development such as infrastructure, sustainable environment, housing, transportation are discussed in detail.</td>
</tr>
<tr>
<td>PMAP 8341</td>
<td>Urban Transportation Planning</td>
<td>3.0</td>
<td>This course will cover automobile, public transit, airport, bicycle, pedestrian, and non-traditional transportation modes. Land use, sprawl, demand management, coordinated human services, and project prioritization are topics which will be covered.</td>
</tr>
<tr>
<td>PMAP 8351</td>
<td>Local Government Management</td>
<td>3.0</td>
<td>An examination of the challenges governing America’s urban areas from a public management perspective. A special effort will be made to integrate course materials with developments in the Atlanta metropolitan area.</td>
</tr>
<tr>
<td>PMAP 8411</td>
<td>Law for Public Managers</td>
<td>3.0</td>
<td>This course introduces students to a range of legal issues relevant to employees in public organizations. Attention is given to the legal rules and principles that guide public managers in administering their organizations. Also considered is how laws and regulations impact current working relationships between government and private concerns. Other issues involve which judges enforce government contracts and agency regulations.</td>
</tr>
</tbody>
</table>
PMA P 8431  Leadership and Organizational Behavior
CREDIT HOURS  3.0
DESCRIPTION  Examination and application of theories of leadership and organizational behavior, with attention to communication, motivation, group dynamics, organizational change, leadership and decision making in public organizations.

PMA P 8501  Managing Public Money
CREDIT HOURS  3.0
PREREQUISITES  PMA P 8161
DESCRIPTION  This course includes discussion of topics that are relevant to budgeting and financial management in the public sector such as capital investment decisions, cost-benefit and cost-effectiveness analysis, cash flow management, debt management, and the evaluation of organizational financial condition.

PMA P 8505  Local Government Debt Issuance and Administration
CREDIT HOURS  3.0
PREREQUISITES  PMA P 8501 or PMA P 8161 or consent of the instructor
DESCRIPTION  A survey of the instruments, procedures and challenges facing local government debt administrators.

PMA P 8521  Evaluation Research: Design and Practice
CREDIT HOURS  3.0
PREREQUISITES  PMA P 8121 or consent of the instructor
(Cross-listed with POLS 8720.) An examination of the techniques and practice of program evaluation for effectiveness in program administration. The course contrasts deductive and inductive approaches. The instructor illustrates the advantages of using evaluation as a mechanism for program improvement.

PMA P 8531  Policy Analysis
CREDIT HOURS  3.0
PREREQUISITES  PMA P 8131 or consent of the instructor
DESCRIPTION  This course provides focused study about policy analysis and process techniques. This course concentrates on policy development decision strategies. Students will conduct problem solving exercises using a number of decision methods appropriate to policy analysis and evaluation. Students will leave the course with an understanding of the policy-making process at all levels of government and a knowledge of different techniques available to develop, implement, and assess policy initiatives.

PMA P 8561  GIS Applications
CREDIT HOURS  3.0
DESCRIPTION  Geographic Information System (GIS) technology is widely used for planning and policy analysis in government agencies, and in the private and non-profit sectors. This introductory course provides students with a good conceptual foundation in data types and sources, coordinate systems, map design, spatial analysis and GIS applications. Students also learn the basic functions of ArcGIS software to integrate data from a variety of sources, conduct basic spatial analysis and produce quality map products.
Causal Inference and Evidence-based Policy

**CREDIT HOURS**
3.0

**DESCRIPTION**
A graduate-level statistics course that covers probability theory, hypothesis testing and linear regression. If unsure about prerequisite, contact the professor. To answer cause-and-effect questions, a counterfactual model of causality and a unified methodological framework has been developed over the last three decades. This class aims to teach students to apply and interpret the counterfactual model and associated designs for answering policy-relevant empirical questions. Students will gain a deeper understanding of, and connections among, approaches to answering causal questions and of the nature of evidence itself. The topics comprise experimental designs and a suite of observational designs, including conditioning designs, partial identification designs, multiple control group designs, instrumental variable designs, regression discontinuity designs, synthetic control designs and tests of known effects and sensitivity tests to hidden bias. These topics are examined in a broad range of policy domains (poverty, planning, economic development, politics, crime, social work, health, public finance, environment, and others).

Public Service Capstone: Advanced Projects in Management and Finance

**CREDIT HOURS**
3.0

**PREREQUISITES**
PMAP 8521

**DESCRIPTION**
This course is a capstone for students with a specialization in public management and finance. The course involves projects that may require service delivery assessment, operations analysis, program evaluation, fiscal analysis, or policy analysis. Typically, student teams are asked to develop and assess options to address important problems facing public and nonprofit organizations. Projects will vary based on the needs of clients, but all will require implementing a work plan for evaluating a public problem, collecting and analyzing data, developing findings and recommendations, writing a final report, and presenting findings to the client.

Directed Readings

**CREDIT HOURS**
1.0 TO 6.0

**PREREQUISITES**
Consent of the instructor

**DESCRIPTION**
This course provides the opportunity for students to focus attention on a specific area of interest. It may not be used to substitute for a course that is offered on a regular basis.

Research in Public Administration and Policy

**CREDIT HOURS**
3.0 TO 15.0

**PREREQUISITES**
Consent of instructor

**DESCRIPTION**
May be repeated for credit; does not count toward degree requirements. This course is designed for graduate research and teaching assistants seeking to conduct supervised research on topics related to project duties or instructional technologies.

PMAP 8981  Practicum
CREDIT HOURS  3.0 TO 6.0
PREREQUISITES  consent of the instructor
DESCRIPTION  The practicum is supervised application practice either in the student's own work setting or an approved field practice site. May include a project.

PMAP 8991  Thesis
CREDIT HOURS  3.0 TO 6.0
PREREQUISITES  consent of the instructor
DESCRIPTION  Individual study of a selected topic under the direction of the student's faculty adviser or other designated faculty member which leads to a paper acceptable to a thesis committee composed of faculty members.

PMAP 9111  Advanced Research Methods I
CREDIT HOURS  3.0
DESCRIPTION  This course will cover advanced analytical and modeling methods. Topics may include: nonparametric statistical methods, path analysis, principal component and factor analysis, or econometrics.

PMAP 9121  Advanced Research Methods II
CREDIT HOURS  3.0
PREREQUISITES  PMAP 9111
DESCRIPTION  This course will cover experimental and quasi-experimental design, a survey of research methods and evaluation. Case study and qualitative analysis may also be included.

PMAP 9131  Research Seminar in Public Policy
CREDIT HOURS  3.0
DESCRIPTION  This course will familiarize students with standards for published research and the variety of research methods used in public policy. The course will also provide students with practice in critiquing and writing reviews of research papers. The chief requirement is to design and execute original empirical research.

PMAP 9141  Advanced Topics in Program Evaluation
CREDIT HOURS  3.0
DESCRIPTION  This course provides an in-depth examination of the field of program evaluation. The course covers the development of the evaluation field, including its history, theory, and principles, and the techniques of evaluation, including program theory and logic models, evaluation research designs, cost-effectiveness and cost-benefit analysis, performance monitoring and organizational scorecards, and trends in the field.

PMAP 9151  Scope and Theory of Public Policy
CREDIT HOURS  3.0
DESCRIPTION  This course is designed to provide doctoral students a detailed familiarity with the context of public policy studies, including both institutions and practices. It will provide an overview of the core literature, including: intellectual bases of public policy studies, the history of public policy studies, analysis of institutional structure, and other topics.
PMA 9171 Logic of Policy Inquiry
CREDIT HOURS 3.0
DESCRIPTION This course presents the conceptual foundations of models of policy inquiry. Topics include the scientific, rational-actor, and ethical models. The ethical values underlying cost benefit analysis, pareto-optimal models, and market models are also examined.

PMA 9181 Dissertation Colloquium
CREDIT HOURS 3.0
DESCRIPTION This course is a seminar focusing on dissertation research preparation. It provides discussions of dissertation topics and research strategies, and assistance to students in writing and public presentation skills. The course culminates with each student conducting a public colloquium in which they present their preliminary dissertation proposals to other students and faculty.

PMA 9211 Applying Research to Policymaking: Examples from Health Care Policy
CREDIT HOURS 3.0
DESCRIPTION The goal of this course is to understand the relationship between research and policy so that students may contribute more effectively to both in their careers. Through a series of case studies taken from health care policy, the class will explore the relevance of good research to various steps in the policy-making process. We will examine when research influences policy, when it does not, and why.

PMA 9221 Doctoral Seminar in Nonprofit Research
CREDIT HOURS 3.0
PREREQUISITES Enrollment in a Georgia State University doctoral program or advanced master's degree student intending to apply to a doctoral program
DESCRIPTION This course introduces early stage doctoral students to the research literature in nonprofit sector-related studies in order to assist them in framing doctoral dissertations in this field. The approach is multidisciplinary-involving nonprofit research undertaken within various disciplinary frameworks including public policy, economics, political science, sociology, history, and management studies. Students will read and analyze selected review articles, formulate their own research projects, develop their own reviews of the literature, and prepare and present an original research paper intended for delivery at a scholarly conference.

PMA 9225 Doctoral seminar on Urban Development
CREDIT HOURS 3.0
PREREQUISITES Ph.D. students. Master students with the consent of instructor.
DESCRIPTION This class covers a wide range of urban development related topics and exposes students to the theoretical foundation, important literature, and analytical tools in the urban research field. Students are expected to critically review the literature and develop a research proposal/paper.
PMAP 9331 Foundations of Public Administration
CREDIT HOURS 3.0
DESCRIPTION This is a doctoral seminar on the history of public administration as a field of scholarly thought and inquiry. It is designed to provide students with the intellectual foundation they require for subsequent study in subfields of public administration and policy. Emphasis is placed on the study of the ideas, value systems, and theoretical frameworks that have combined to form public administration as a field.

PMAP 9341 Policy Design and Implementation
CREDIT HOURS 3.0
DESCRIPTION This is a doctoral seminar in policy theory and practice. The purpose of the seminar is to provide a strong theoretical foundation for doctoral students in policy studies and related fields. Course content will include: policy design and formulation, policy typologies, policy implementation theories and concepts, and policy administration or the oversight of policy implementation by third parties.

PMAP 9361 Health Policy Research Issues
CREDIT HOURS 3.0
DESCRIPTION The goal of this course is to examine the relationship between research and health policy so that students may contribute more effectively to both in their careers. Using a systems thinking approach, students will analyze contemporary health policy issues and identify when, how, and why research is utilized throughout various stages of the policymaking process. The translation of research findings into effective communicative materials for various audiences including policymakers, practitioners, and the general public will be emphasized. Interdisciplinary approaches to health policy research will be integrated into the class through readings and guest speakers.

PMAP 9381 Public Budgeting Theory and Research
CREDIT HOURS 3.0
DESCRIPTION This course provides academic immersion into public budgeting theory and research. The course requires exploration of the scholarly foundations of governmental budgeting as well as past and current reform efforts, both in the United States and abroad. The state of the practice in public budgeting is examined for evidence of its intersection with theoretical perspective. The course presents normative and descriptive considerations of public budgeting, the scholarly bases behind various orientations to process, and the knowledge base regarding enduring issues surrounding this vital governmental process.

PMAP 9391 Public Financial Management Theory and Research
CREDIT HOURS 3.0
DESCRIPTION This course is designed to provide doctoral students immersion into public financial management theories and research which promote the efficient and effective use of financial resources to achieve an accountable and sustainable public service.

PMAP 9501 Special Topics in Public Policy
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES consent of instructor
DESCRIPTION This course provides an advanced, research- or theory-oriented treatment of topics in public policy. The course can be repeated when topics vary. The course is intended primarily for doctoral students.

PMAP 9901 Dissertation Research
CREDIT HOURS 1.0 TO 18.0
DESCRIPTION Doctoral students at the dissertation stage will register for this course.

<tr>
<td>EDRD 6600</td>
<td>Introduction to Materials and Methods in Reading Instruction</td>
<td>3.0</td>
<td>Intended for students who do not have a background in education or who are not majoring in language and literacy education. This course introduces students to classroom approaches to reading instruction. Foci include examination of how children learn to read and analysis of specific strategies and materials used to teach reading. Students are involved in observing and analyzing literacy programs in field experience settings.</td>
</tr>
<tr>
<td>EDRD 7260</td>
<td>Early Literacy Development and Instruction</td>
<td>3.0</td>
<td>Students examine theories and research on language and literacy development in childhood. Psychological, social, and cultural factors that influence early literacy development are related to educational implications for students' understanding and effective use of language and literacy. Instructional approaches for developing phonemic awareness, phonics, fluency, vocabulary, and comprehension abilities of beginning readers are explored. Cross-listed with ECE 9420.</td>
</tr>
<tr>
<td>EDRD 7600</td>
<td>Theory and Pedagogy in the Study of Literacy</td>
<td>3.0</td>
<td>This course addresses the theories, methodologies, and materials used to teach reading and writing instruction, language development, and literacy strategies. Students will learn about the theories and practical application for teaching reading to all students including those representing diverse cultural and linguistic communities.</td>
</tr>
<tr>
<td>EDRD 7550</td>
<td>Literacy Assessment and Curriculum Development</td>
<td>3.0</td>
<td>This course involves advanced study of the planning and managing of classroom literacy events based on assessment information. Emphases include a supervised classroom experience where students (1) examine ways of recording, analyzing, and using assessment information in daily classroom instruction to inform curriculum development; (2) consider cultural, psychological, social, and political issues associated with traditional ability groups and alternative approaches to ability grouping that can be implemented to meet students' needs; and (3) understand and assess reading programs.</td>
</tr>
<tr>
<td>EDRD 7630</td>
<td>Literacy in the Content Areas</td>
<td>3.0</td>
<td>This course will analyze reading and writing instructional strategies and materials in the content area classrooms. Emphases are on the process of reading and writing in the middle and secondary schools, the role of text complexity, instructional planning, adolescent literacy development, digital texts, comprehension, vocabulary, and study strategies.</td>
</tr>
</tbody>
</table>
EDRD 7650  Individualized Literacy Assessment and Instruction  
CREDIT HOURS 3.0
PREREQUISITES EDRD 6600 or EDRD 7600 or equivalent
DESCRIPTION This course introduces the use of formal and informal assessments of students' reading and writing abilities. Emphases include instructional strategies for working with a variety of literacy learners across the developmental continuum and a practicum experience in which students compile literacy profiles of students using a case study approach.

EDRD 8210  Family and Community Literacies  
CREDIT HOURS 3.0
DESCRIPTION This course will examine scholarship by literacy and language researchers who utilize diverse methodologies and theoretical orientations in understanding families' literate and community lives. This course will consider critical contemporary perspectives through the examination of: a) research on family and community literacies and practices; b) research on the role of class and culture in literacy; c) research on popular culture and digital and social media; and d) research on family and school involvement.

EDRD 8280  Literacy for a Diverse Society  
CREDIT HOURS 3.0
DESCRIPTION Restricted to Ed.D. and PhD students. This course involves students in an in-depth study of cultural, social, and political factors affecting the acquisition of literacy, literacy instruction, literacy achievement, and literacy assessment of various groups within the United States and groups outside the United States. Special attention is given to the relationship of class, gender, and ethnicity to literacy.

EDRD 8310  Theoretical Models and Processes of Literacy Learning  
CREDIT HOURS 3.0
DESCRIPTION Restricted to Ed.D. and Ph.D. students. This course focuses on critical interpretation and evaluation of research and theoretical writing in the field of literacy (i.e., topics focus on reading, literature, and/or writing). Emphases included historical changes in the field, models of reading and/or literacy process, and paradigms underlying literacy research. (Repeatable when topics change.).

EDRD 8550  Trends and Issues in Language and Literacy Education  
CREDIT HOURS 3.0
DESCRIPTION In this course students examine theory and pedagogy in language and literacy education. Students analyze current instructional practices and issues in reading, language arts, and English and study future directions in these fields. (Repeatable when topics change.).

EDRD 8610  Professional Learning and Leadership of Literacy  
CREDIT HOURS 3.0
DESCRIPTION This course introduces students to organization, administration, and leadership skills of (P-12) literacy (reading, English language arts) programs. Students analyze existing programs for elementary, middle, and high schools, examine roles of literacy personnel, and address methods of program evaluation and ways to improve literacy programs.
EDRD 9870  Advanced Research Seminar in Language and Literacy Education

CREDIT HOURS  1.0 TO 3.0

DESCRIPTION  This seminar is for advanced doctoral students in language and literacy education. Students explore research methodology, research findings, and design of research in language and literacy. Seminar may extend beyond one term. (Repeatable).
RE 8000  
**Real Estate Concepts and Practices**

**CREDIT HOURS** 3.0  
**PREREQUISITES** none  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION** This course is an introduction to the principles of real property analysis and use. Subjects include the nature of real estate and real property, fundamentals of real property law, public and private limits on the rights of ownership, fundamentals of equity investment and financial analysis, fundamentals of property valuation and market analysis, principles of location theory, and an introduction to legal documents such as the contract, the lease, and the warranty deed. Where applicable, e-commerce is incorporated into the course material. The course is accentuated with exercises in the use of the financial calculator, the spreadsheet software, and the Internet.

RE 8020  
**Real Estate Investment Analysis**

**CREDIT HOURS** 3.0  
**PREREQUISITES** none  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION** This course builds a foundation for further study of real estate investments by introducing the student to basic issues and by providing the fundamental tools of analysis. Topics include real estate markets, income tax implications, capital structure, leases, data sources (for example, those available on the Internet), and portfolio considerations. Discounted cash flow models are developed and enhanced to incorporate concerns of inflation and uncertainty. Alternative models of analysis that are more appropriate under conditions of extreme data poverty are also examined.

RE 8030  
**Real Estate Financing**

**CREDIT HOURS** 3.0  
**PREREQUISITES** None  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION** This course examines the legal, economic, institutional, and strategic elements of the real estate financing process, including both residential and income property financing instruments and techniques. Macroeconomic considerations and financial market issues are investigated. Decision-making techniques and research methods using traditional and technical databases and resources such as the Internet are incorporated in the class format.

RE 8035  
**Real Estate Investments Trusts**

**CREDIT HOURS** 3.0  
**PREREQUISITES** RE 8000 or RE 8020 or RE 8030  
**REQUIREMENTS** CSP: 1, 2, 6  
**DESCRIPTION** Presenting information on valuation parameters for Real Estate Investment Trusts and other public real estate companies, this course focuses on the relationship of various performance metrics, sources and uses of capital, and management decisions to overall entity valuation. Underlying concepts associated with cash flow analysis, net present value, internal rate of return and yield capitalization are treated. Different sectors within the real estate investment arena as well as tools and resources available to conduct relative valuations are incorporated into discussions. In-class illustrations will be used to highlight analytical techniques.
RE 8040  | Legal and Regulatory Environment of Real Estate
---|---
CREDIT HOURS | 3.0
PREREQUISITES | None
REQUIREMENTS | CSP: 1, 6
DESCRIPTION | (Same as LGLS 8040). This course deals with the basic legal concepts and legal instruments associated with real estate and with the legal and governmental environment within which the use and development of real estate are regulated. Attention is given to real property law as a risk management process with emphasis upon acquiring, managing, and disposing of space in the built environment and the decision-making process. Applications of legal data sources, both traditional and electronic, are examined as a part of the decision-making process.

RE 8060  | Applied Real Estate Market Analysis
---|---
CREDIT HOURS | 3.0
PREREQUISITES | None
REQUIREMENTS | CSP: 1, 2, 6, 7
DESCRIPTION | This course examines the processes used to analyze the supply and demand for real estate. General methodologies for market studies are developed and then applied to the selected property type. The course also explores demographic, technological, economic, and social trends that will affect these real estate markets in the future.

RE 8050  | Real Estate Development
---|---
CREDIT HOURS | 3.0
PREREQUISITES | None
REQUIREMENTS | CSP: None
DESCRIPTION | This course is a review of the real estate development process focusing on the physical/design dimension. It examines building economy through review of design, construction, and analysis procedures such as site suitability analysis, cost engineering, and life-cycle costing. The course considers the impact of technology and virtual economic arrangements on the form and design of physical structures and the function of changing technical and economic activities on space needs. Traditional and technical databases and resources are incorporated.

RE 8070  | Quantitative Analysis for Real Estate
---|---
CREDIT HOURS | 3.0
PREREQUISITES | RE 8020
REQUIREMENTS | CSP: 1, 2, 6
DESCRIPTION | Responding to the needs of real property analysts often operating in environments of data poverty, this course develops the student’s skills in quantitative analysis. Standard tools, such as parametrical statistical estimation and linear regression, are examined to determine their relevance to problems confronted in real estate. Projects include the analysis of large electronic databases. The course also introduces nonparametric and other small sample tools not typically encountered in the business curriculum but which are of critical importance to real estate.

<td>RE 8080</td>
<td>Real Estate Project Planning and Development</td>
<td>3.0</td>
<td>RE 8020 or RE 8030 and RE 8060</td>
<td>CSP: 1,2,6</td>
<td>This course employs specific techniques of real property analyses and project planning to solve problems in real property projects. The student uses real estate financial and market analyses and physical and legal/regulatory aspects of real property to address specialized problems and solutions for real property projects. Focusing on the pre-architectural phase of development management, this course considers the impact of technological changes on development and construction along with the impact of changing technical and economic activities on product design and development. Traditional and technical databases and resources such as the Internet are incorporated in the class format.</td>
</tr>
<tr>
<td>RE 8090</td>
<td>Real Estate Case Analysis</td>
<td>3.0</td>
<td>RE 8020 and RE 8030 and RE 8060</td>
<td>CSP: 1,2,6</td>
<td>The full scope of real estate decision-making is integrated in this course. Students get the opportunity to use their knowledge of real estate investment, finance, marketing and management in a case study format. Legal, ethical, political and international issues are incorporated in the cases. The course also offers a forum to examine topics of current significance.</td>
</tr>
<tr>
<td>RE 8100</td>
<td>Strategic Management of Real Property in the Corporate Environment</td>
<td>3.0</td>
<td>None</td>
<td>CSP: 1, 2, 6</td>
<td>This course examines the applications of management theory to the acquiring, holding and disposing of space over time by the non-real estate firm. Topics may include the role of real estate in achieving the overall goals of the firm, integrating space with human resources and information technology, and the impact of real estate on the portfolio of corporate assets. Both descriptive and prescriptive views are presented as well as the differing roles of senior management and corporate real estate managers, the impact of electronic commerce on the management of real estate assets, and the strategic role of corporate real estate in the global business environment.</td>

</table>
**RE 8400  Advanced Real Estate Investment Analysis**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: RE 8020
- **REQUIREMENTS**: CSP: 1, 2, 6
- **DESCRIPTION**: This course provides for advanced application of theory and techniques for analysis of the equity position in real estate using selected readings and cases. It considers the impact of leverage, different forms of financing, leasing, and federal tax policies and concentrates on the basic productivity of real estate assets based on net cash flows. Consideration is also given to combinations of assets and their effect on the risk and return of a portfolio of assets. The focus is on commercial grade assets, with special attention to various property types, data availability, measures of risk and return, and portfolio theory. The impact of the electronic availability of data and property-specific information, both locally and globally, is examined in applied materials.

**RE 8450  Taxation of Real Estate Investment**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: RE 8000 or RE 8020 or TX 8020
- **REQUIREMENTS**: CSP: None
- **DESCRIPTION**: In this course the student examines the income tax codes of the federal government and the state of Georgia. These various subparts of these tax codes are initially review and analyzed and then placed into the context of real estate equity investment analysis. Subjects shall include, but not limited to: basis, depreciation, at-risk rules, passive loss rules, capital gain/loss treatment, like-kind exchanges, installment sales, various tax entity classifications, estate and trust tax considerations.

**RE 9480  Seminar in Real Estate Behavioral Research**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: RE 8040 or RE 8210 or RE 8400
- **REQUIREMENTS**: CSP: 1, 4
- **DESCRIPTION**: This course familiarizes the student with the behavioral approach to research in real estate. Framework and theory of behavioral research are presented, as are methods of data development and evaluation. Current research is surveyed, and the student is required to develop a dissertation-quality research proposal.

**RE 9490  Seminar in Real Estate Finance and Land Economics Research**
- **CREDIT HOURS**: 3.0
- **PREREQUISITES**: RE 8020 or RE 8030 or MGS 9940 or MGS 9950, and MGS 9960; or consent of instructor
- **REQUIREMENTS**: CSP: None
- **DESCRIPTION**: This seminar is designed for students to develop skills in research methodology and gain further insights into real estate finance and land economics. The students develop skills in basic inquiry, formulating problem statements, general and working hypotheses, and the delineation of appropriate research methods. The Ph.D. candidate investigates alternative research techniques, with an emphasis on positive logical and empirical research. The course also entails critical analysis of existing research in real estate economics.
RE 9580  Seminar in Real Estate Research I

CREDIT HOURS: 3.0

DESCRIPTION: This seminar will focus on publishing real estate research in high quality journals. Students will develop the skills to write an abstract, do an exhaustive literature search, use appropriate methodology, and locate data, analyze results, and formulate conclusions. Students will also be instructed in how to respond to journal editors and journal referees. As a logical output from the course, the student will be required to submit a paper to a top journal for review.

RE 9590  Seminar in Real Estate Research II

CREDIT HOURS: 3.0

DESCRIPTION: This seminar will focus on publishing real estate research in high quality journals. Students will develop the skills to write an abstract, do an exhaustive literature search, use appropriate methodology, locate data, analyze results, and formulate conclusions. Students will also be instructed in how to respond to journal editors and journal referees. As a logical output from the course, the student will be required to submit a paper to a top journal for review.

</thead>
<tbody>
<tr>
<td>RELS 6030</td>
<td>Introduction to Human Rights</td>
<td>3.0</td>
<td>Introduces students to historical and contemporary debates around human rights. Drawing on scholarship from disciplines such as history, anthropology, sociology, political philosophy, religious studies, and literature, students will review case studies in order to bring different scholarly perspectives to bear on human rights claims in a globalized world.</td>
</tr>
<tr>
<td>RELS 6040</td>
<td>Augustine and Aquinas</td>
<td>3.0</td>
<td>(Same as PHIL 6040.) Selected works of the major religious philosophers of the Middle Ages with emphasis on their views on topics such as God, sin, human nature, free will, faith, and politics.</td>
</tr>
<tr>
<td>RELS 6060</td>
<td>Evil and God</td>
<td>3.0</td>
<td>What is evil. Does the existence of evil in the world challenge belief in God. When we encounter famine, disease, hurricanes, torture, war, or poverty, who (or what) do we hold responsible. How can bad things happen to good people. The course will examine how these questions are approached in religious thought, and also in philosophy, literature, and film.</td>
</tr>
<tr>
<td>RELS 6080</td>
<td>Religious Dimensions in Human Experience</td>
<td>3.0</td>
<td>Examines religions as integral aspects of human cultures. Integrates theoretical and methodological approaches to religious studies that center on human experiences, expressions, practices and beliefs with examples from particular historical and geographical locations. Topics and source materials may include material culture, archaeology, visual culture, literature, aesthetics, film and ethnography.</td>
</tr>
<tr>
<td>RELS 6090</td>
<td>Jesus Inside and Outside the Gospels</td>
<td>3.0</td>
<td>Comparative study of portrayals of Jesus as they have evolved over the past two millennia. Topics may include the differences between the Synoptic and Johannine materials, non-canonical gospels, the way Jesus is depicted in texts from other religions (e.g., Quran, Gandhi's &quot;What Jesus Means to Me&quot;), and visual depictions of Jesus, including in modern media such as film and the internet.</td>
</tr>
<tr>
<td>RELS 6100</td>
<td>Religious Studies Study Abroad</td>
<td>3.0</td>
<td>Provides students with opportunities to study religious life and practice outside of the United States. Includes travel to selected sites for visitation and study led by faculty familiar with the site's history and religious significance. Also includes direct supervision of students' on-the-ground experience of religious life around the globe. Open to majors and non-majors. No foreign language necessary; instruction will be in English. Enrollment must be approved by program director.</td>
</tr>
<tr>
<td>RELS 6150</td>
<td>Religion, Nation, and Law</td>
<td>3.0</td>
<td>This course will explore and dissect the relationship and roles between religion, law, and nation-building. The course will explore nation-states and empires, secularism, the relationship between religious to the secular in the particular context of law. The course will also examine comparison of the legal recognition of religious minorities and personal status legal systems in empires and nation-states.</td>
</tr>
</tbody>
</table>
RELS 6200  
**Religion in America**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Introduction to the religious experiences of Americans from colonial times to the present. Topics may include Native American religion, Puritanism, Mormonism, spiritualism, Reform Judaism, Catholic modernism, Islam, fundamentalism, and African-American religion.

RELS 6225  
**Psychology and Religion**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course will survey the fields of psychology and religious studies. Addressing this tension, our course is designed to create a constructive, respectful dialogue between both perspective. Can we conceive ways in which religious behavior and the study of religion may inform, or even construct, psychological theory. Conversely, how do psychological perspectives and cognitive science tell a richer, deeper story of what is happening in religious experiences. We will consider postmodern and qualitative critiques to such investigations, as well as the emerging field in “explaining” religion through cognitive science and evolutionary theory. This course will also consider Eastern forms of religious expression and spirituality.

RELS 6240  
**Death and the Afterlife**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** Introduction to the general beliefs and practices associated with death and the afterlife in several world religious traditions. Topics may include religious perspectives on the process of dying, treatment of the body, methods of grieving, views of suicide and martyrdom, and contemporary issues surrounding death and the afterlife.

RELS 6245  
**Cognitive Foundations of Religion**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** This course will explore the neural foundations and cognitive mechanisms of religious behavior and experiences. This course will also look at the evolutionary development of religion, the more recent findings in cognitive processing of particular religious beliefs, and the neural imaging of religious experiences.

RELS 6250  
**African-American Religion**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** (Same as AAS 6090.) Survey of the development of African-American religion from colonial times to the present, including an examination of both theological arguments and spiritual experiences.

RELS 6255  
**Religion, Race, Nation**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** From colonialism to black nationalism to globalization, how do the three issues of religion, race, and nation affect each other. How has religious thought dealt with issues of race, and how has the concept of race been shaped by religious thought. How do racial and religious communities differ. We will approach these questions using theory, world literature, and film.

RELS 6260  
**Religion and Literature**  
**CREDIT HOURS** 3.0  
**DESCRIPTION** (Same as ENGL 6260.) Examines how religious institutions, beliefs, and values have been presented in and challenged within novels. Readings include works by authors from various religious communities as well as theoretical work done by scholars working in the field of religion and literature.

</thead>
<tbody>
<tr>
<td>RELS 6270</td>
<td>Women and Religion</td>
<td>3.0</td>
<td>(Same as WGSS 6370.) Multicultural exploration of the role of women and female divinities in diverse religious traditions; readings from ancient myths to contemporary feminist theology.</td>
</tr>
<tr>
<td>RELS 6290</td>
<td>Pilgrimage</td>
<td>3.0</td>
<td>Exploration of the central role played by pilgrimage in world religious traditions, including study of its vital social and religious functions. Examples from Judaism, Christianity, Islam, Hinduism, Buddhism, as well as theoretical readings on the phenomenon of pilgrimage.</td>
</tr>
<tr>
<td>RELS 6295</td>
<td>Religion, Sport and Spirituality</td>
<td>3.0</td>
<td>A comparative study of the ancient and modern Olympics with an emphasis on the religious character of these games. Questions explored may include: why were the games shut down by the newly Christianized Roman Empire for religious reasons, and why were they revived in the nineteenth century?</td>
</tr>
<tr>
<td>RELS 6400</td>
<td>Internship in Religious Studies</td>
<td>3.0</td>
<td>Supervised worked coupled with academic instruction. Students may propose internships they have been able to arrange (although these must be approved by the department faculty member supervising the internship and the undergraduate or graduate director, as appropriate). Students may also choose from several internship opportunities established by the department, including internships in the media, non-profit administration, business, and government.</td>
</tr>
<tr>
<td>RELS 6430</td>
<td>American Jewish History</td>
<td>4.0</td>
<td>This course surveys the Jewish experience in the United States, examining the religious, cultural, political, and economic activities of American Jews from the colonial period to the present. Students will explore the ways Jewish tradition has been adapted in America, what the relationship of American Jews has been to other Americans, and how American Jewish identities have been created from modern Jews' dual impulses for integration and distinctiveness. The course will include a significant examination of issues with regional identity, with particular focus on Southern Jewish experience. We will explore Jewish relationships with black and white gentile southerners, as well as southern Jews' embrace of southern culture and southern identity. This course will also familiarize students with the excellent resources on Atlanta Jewish history available at local archives.</td>
</tr>
<tr>
<td>RELS 6450</td>
<td>Modern Judaism</td>
<td>3.0</td>
<td>Key issues and historical events shaping Judaism in the modern world, including Zionism, the development of Jewish denominations, the Holocaust, Middle East conflict, women's roles in Jewish life, and the development of Judaism in the United States. No previous knowledge of Judaism is required; all readings are in English.</td>
</tr>
<tr>
<td>RELS 6460</td>
<td>Judaism in the South</td>
<td>3.0</td>
<td>Examination of the historical and cultural development of Judaism in the American south. Topics may include Jewish immigrants, issues of assimilation, Jews and the Civil War, Jewish involvement in the Civil Rights Movement, the Leo Frank case, the Temple bombing in Atlanta, and contemporary issues in Southern Jewish life.</td>
</tr>
</tbody>
</table>
RELS 6465  Religion in the American South  
CREDIT HOURS 3.0  
DESCRIPTION Examines the historical and cultural development of Religion in the American South. Students will explore the increasing religious diversity in the “New South” and discuss the ways in which southern religious values have shaped conversations on race, sex, gender, politics, nationalism, science, and social reform.

RELS 6470  Martin Buber: His Thought and Influence  
CREDIT HOURS 3.0  
DESCRIPTION An exploration of Buber’s writings on subjects such as Hasidic folklore, Asian thought, dialogical philosophy, and Middle Eastern politics, with consideration of how his work has been received both inside and outside of Jewish circles.

RELS 6480  Modern Islam: Tradition & Transformation  
CREDIT HOURS 3.0  
DESCRIPTION The purpose of this course is to understand the Islamic tradition in the contemporary world through a study of its history, society, institutions, as well as its various relationships to non-Muslim societies and cultures. The task is to try to gain familiarity with the multiple manifestations and transformations of Islam from the pre-modern to the modern periods, with an emphasis on the changes brought about by the rise of European hegemony and colonial modernity. As a survey, the course will review broad socio-historical patterns in order to give students the ability to better assess a range of contemporary issues related to Islam as well as provide a basis through which further investigations can be made.

RELS 6483  Contemporary Issues in Islamic Faith and Practice  
CREDIT HOURS 3.0  
DESCRIPTION What challenges has the modern period posed to Islamic faith and practice. This course treats a number of issues---such as gender and family, the formation of the modern nation state, and minority Muslim populations---as a way to explore changing constructions of authority and evolving beliefs and practices within contemporary Muslim populations.

RELS 6490  Topics in Judaism  
CREDIT HOURS 3.0  
DESCRIPTION Examination of selected topics in Judaism. May be repeated if topic varies.

RELS 6500  Ethics of Violence In this course we will work our way through theoretical, ethnographic and fictional texts in order to explore the different ways in which violence has been examined as a dimension of human experience  
CREDIT HOURS 3.0  
DESCRIPTION

RELS 6570  Special Topics in Islam  
CREDIT HOURS 3.0  
DESCRIPTION Investigation of a specific theme, figure(s), or text(s) within Islam, such as Islamic ethics, historical portrayals of Muhammad, or the Nation of Islam. May be repeated if topic varies.

RELS 6580  Life of Muhammad  
CREDIT HOURS 3.0  
DESCRIPTION Study and contrast of various perspectives of the life of the Prophet Muhammad, including medieval Muslim hagiographies, medieval European polemics, and modern reinterpretations by both Muslims and non-Muslims.
Hinduism

Introduction to the Hindu gods and goddesses, Hindu temple and domestic worship, and key themes in modern Hinduism. Will include an overview of the development of Hindu thought and practice from ancient times to the present.

Hindu Sacred Myths and Epics

Introduction to the classic religious text in the Hindu tradition. Readings include selections from the Rig Veda, the Upanishads, the Satapatha Brahmana, the Yogasutras, the Mahabharata (including the Bhagavad Gita), devotional poetry, and writings from several modern Hindu religious leaders. All reading in English translation; no prior knowledge of Hinduism necessary.

Buddhism

Introduction to Buddhism in Asia and the West. This course offers a selective historical survey of the Buddhist traditions in India, Southeast Asia, Tibet, China, Japan, and North America. Topics include the life and image of the Buddha, the four noble truths, the philosophy of emptiness, the discipline of meditation, ethics and popular practice, devotional cults, and the concept of nirvana.

Introduction to Daoism, Confucianism, and the Religions of China

Selective historical survey of the Daoist, Confucian, Buddhist, and folk traditions of China. Topics will include gods and goddesses, ritual, questions of human nature, ethics, death and the afterlife, and mysticism.

Classical Chinese Philosophy

Focused exploration of the surviving works from the 'Hundred Schools Period' of ancient China, (roughly 550 - 200 BCE). Readings include the Analects of Confucius, Lao Tzu's Tao Te Ching, and several works by lesser known thinkers from various philosophical schools.

Introduction to Zen Buddhism, Shinto, and the Religions of Japan

Selective thematic survey of the Shinto, Buddhist, and folk traditions of Japan, with a special emphasis of Zen Buddhism. Topics include attitudes toward nature, the interpenetration of religion and the arts, monasticism and meditation practices, modern Zen philosophy, new religious movements, and the influence of the West.

Topics in Asian Religion

Investigation of a selected topic within Hindu, Buddhist, Chinese, and/or Japanese religion. Possible topics include classical Taoist philosophy, new religions in Japan, Tibetan Buddhist texts, and human rights in Asian religion. May be repeated if topic varies.

Comparative Study of Mysticism

In-depth study of mystical texts and traditions, with special attention given to theoretical and methodological inquiry. Readings drawn from a range of traditions and historical periods, as well as from works in contemporary critical theory in the study of religion.

RELS 6890 Religion On-site in Atlanta
CREDIT HOURS 3.0
DESCRIPTION Introduces students to various local sites that express religious communities' traditions and practices in Atlanta. Provides instruction to students at local sites integrated with lectures and readings that explore the history and diversity of Atlanta's religious communities. Students will learn from on-site lectures presented by lead and guest instructors; from relevant historical documents; and from contemporary literature (secondary scholarship, relevant websites and blogs, community-published material). Students will be trained to integrate information from these sources and analyze them from an academic, critical perspective.

RELS 8200 Pro-seminar in Advanced Theory and Method
CREDIT HOURS 3.0
DESCRIPTION Intensive seminar on theoretical and methodological issues in the academic study of religion. Specific attention to questions of what "religion" is, how it can be most appropriately conceptualized and studied, and how various research and interpretive methods can be applied.

RELS 8210 Seminar in Religious Studies
CREDIT HOURS 3.0
DESCRIPTION Religious thinker or topic, such as Matthew Fox, Sri Aurobindo, gnosticism, or religious pluralism. May be repeated once if topic varies.

RELS 8950 Directed Readings
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES consent of instructor
DESCRIPTION Designed to provide students with the opportunity to do more advanced work in an area of their choice. Not to be used as a substitute for topics normally covered in other graduate courses. May be repeated once for credit.

RELS 8960 Research in Religious Studies
CREDIT HOURS 3.0 TO 12.0
DESCRIPTION Does not count toward degree requirements. Authorization required. May be repeated for credit.

RELS 8970 Teaching Religious Studies
CREDIT HOURS 6.0
DESCRIPTION Does not count toward degree requirements. Preparation course for teaching, covering syllabus design, making up tests, grading papers, and other classroom techniques. Prerequisite for being a graduate teaching assistant. May be repeated with approval of graduate director.

RELS 8980 Teaching Practicum
CREDIT HOURS 3.0
DESCRIPTION Does not count toward degree requirements. Apprenticeship in teaching for graduate teaching assistants under faculty supervision. Required for all graduate teaching assistants in their first semester of teaching. May be repeated for credit with approval of graduate director.

RELS 8985 Advanced Teaching Practicum in Religious Studies
CREDIT HOURS 3.0 TO 12.0
DESCRIPTION Does not count toward degree requirements. Apprenticeship in teaching for advanced graduate teaching assistants under faculty supervision. Required for all graduate teaching assistant in their second and subsequent semesters of teaching. GTAs learn how to document and collect materials for Teaching Portfolio. May be repeated for credit.
RELS 8998  Prospectus Research & Writing

CREDIT HOURS  3.0

DESCRIPTION  Students enrolled in this course will complete the research required to writing a Masters thesis prospectus that conforms to the guidelines established by the Department. Students who successfully complete this course and whose prospectuses are approved by the faculty may continue in the thesis research and writing process. Permission from the instructor.

RELS 8999  Thesis Research

CREDIT HOURS  1.0 TO 6.0

<td>RT 6040</td>
<td>Respiratory Care Pharmacology</td>
<td>3.0</td>
<td>Entry into RT graduate program and RT 6005, RT 6111, RT 6025 and RT 6050.</td>
<td>A study of pharmacological agents used in the treatment of cardiopulmonary disease and critical care, with an emphasis on inhaled bronchoactive aerosols.</td>
</tr>
<tr>
<td>RT 6050</td>
<td>Clinical Practice I</td>
<td>1.0</td>
<td>Entry into RT graduate program. Four hours of clinical for four weeks. A preparation for and introduction to the hospital environment. Emphasis is placed on basic life support, introduction to the clinical affiliate, and medical gas therapy.</td>
<td></td>
</tr>
</tbody>
</table>
RT 6051  Clinical Practice II  
CREDIT HOURS 4.0  
PREREQUISITES Entry into graduate RT program, RT 6005, RT 6111, RT 6025, RT 6050  
DESCRIPTION This is sixteen-hours of clinical practice per week and one hour of lecture. Clinical experience is provided in basic respiratory care procedures. The integration of equipment and patient care are emphasized. Case presentations are required to integrate clinical and classroom theory.

RT 6052  Clinical Practice III  
CREDIT HOURS 1.0  
PREREQUISITES Successful completion of RT 6050 and RT 6051  
DESCRIPTION Five hours of clinical per week, one hour of lecture. Clinical experience is provided in the pulmonary function laboratory and in the intensive care setting to refine skills introduced in Clinical I and II. Case presentations are required to integrate clinical and classroom theory.

RT 6111  Respiratory Care Procedures I  
CREDIT HOURS 4.0  
PREREQUISITES Entry into RT graduate program  
DESCRIPTION A study of respiratory care treatment and support modalities, with associated equipment. Emphasis is placed on understanding application to patient situations, assessment of care, and principles of operation of equipment.

RT 6112  Respiratory Care Procedures II  
CREDIT HOURS 3.0  
PREREQUISITES Entry into RT graduate program and RT 6111, RT 6005, RT 6025 and RT 6050.  
DESCRIPTION A study of respiratory care treatment and support modalities, with associated equipment. Emphasis is placed on understanding application to patient situations, assessment of care, and principles of operation of equipment. A Continuation of RT 6111.

RT 7010  Teaching Practicum  
CREDIT HOURS 3.0  
DESCRIPTION Three lecture hours per week. This course provides supervised experience in organizing and teaching lecture, laboratory, and clinical courses at the undergraduate level in a respiratory therapy program.

RT 7011  Ventilatory Support I  
CREDIT HOURS 3.0  
PREREQUISITES Admission into RT program  
DESCRIPTION A study of methods of mechanical ventilatory support, including physiology and patient management, as well as equipment.

RT 7012  Mechanical Ventilation II  
CREDIT HOURS 4.0  
PREREQUISITES Entry into RT graduate program and RT 7011  
DESCRIPTION A study of methods of mechanical ventilatory support, including physiology and patient management, as well as equipment. This course is a continuation of RT 7011.

RT 7020  Advanced Clinical Preceptorship  
CREDIT HOURS 3.0  
DESCRIPTION Eight lab hours per week. This course provides clinical experience in pulmonary and critical care, under the direct preceptorship of a practicing pulmonologist, or other approved physician, with emphases on both in-patient and out-patient diagnosis, assessment, management, and procedures.
<table>

<tbody>
<tr>
<td>RT 7030</td>
<td>Advanced Mechanical Ventilation</td>
<td>3.0</td>
<td>Entry into the Graduate RT Program</td>
<td>Advanced study in methods of mechanical ventilatory support. Patient assessment by advanced monitoring is stressed, with attention to patient ventilator interactions, optimization of ventilatory support, and weaning of marginal patients. New ventilation technology and modes of support are discussed.</td>
</tr>
<tr>
<td>RT 7040</td>
<td>Clinical Application of Ventilation Waveforms</td>
<td>3.0</td>
<td>Entry into graduate program</td>
<td>An overview to interpretation of ventilation waveforms, providing an understanding of how ventilation waveforms are generated and how to interpret them. Topics will include pressure, volume and flow scalars, pressure and flow-volume loops, common ventilator modes, monitoring pressure and volume ventilation, common clinical findings, neonatal applications and end-tidal carbon dioxide waveforms. Case study review and clinical application with real time ventilator demonstration will be emphasized in the course.</td>
</tr>
<tr>
<td>RT 7050</td>
<td>Statistical Research II</td>
<td>3.0</td>
<td>Entry into RT graduate program and SNHP 6000</td>
<td>This is the second course for research in the health sciences. Emphasis will be placed on methods and principals, as well as statistical techniques utilized in modern research in the health sciences.</td>
</tr>
<tr>
<td>RT 7051</td>
<td>Clinical Practice IV</td>
<td>4.0</td>
<td>Entry into RT graduate program and RT 6050, RT 6051 and RT 6052</td>
<td>Sixteen hours of clinical per week, one hour of lecture. A third course in the sequence of clinical rotations which provides instruction and experience in the adult critical care setting. Case presentations are required to integrate clinical and classroom theory.</td>
</tr>
<tr>
<td>RT 7052</td>
<td>Clinical Practice III</td>
<td>5.0</td>
<td>Prior courses in program sequence</td>
<td>Clinical experience is divided into neonatal and pediatric care, and adult critical care. Alternate sites for respiratory care practice are possible, if a student desires.</td>
</tr>
<tr>
<td>RT 7055</td>
<td>Clinical Applications in Sleep Medicine</td>
<td>3.0</td>
<td></td>
<td>This course provides a basic introduction into sleep medicine and technology. Patient hookup procedures, sleep diagnostic equipment, EEG waveform recognition that make up a polysomnogram, recognition of various sleep problems and titration of therapy to treat those sleep abnormalities will be covered. Sleep clinics will be visited with students demonstrating skills in performance of a sleep study and the duties of a sleep technician including reading, scoring, and reporting a sleep study. Both adult and pediatric sleep disorders will be covered.</td>
</tr>
</tbody>
</table>
Advanced Cardiac Life Support

The Advanced Cardiac Life Support (ACLS) course is designed to develop the participant's proficiency in providing care in a cardiorespiratory arrest. This course is offered over a seven-week period to allow for understanding of pathophysiology and the assimilation of the knowledge to carry out skills required in emergent circumstances.

Patient Care Management

An analysis of patient care management strategies for the respiratory therapist. Patient assessment and critical care management topics will be emphasized.

Pediatric Respiratory Care

A study of respiratory care treatment and support modalities, with associated equipment. Emphasis is placed on understanding application to patient situations, assessment of care, and principles of operation of equipment.

Neonatal Respiratory Care

The processes of growth and development relating to respiratory care from the fetus to the infant will be discussed. Techniques of assessment, diagnosis, and treatment will be utilized to enable the student to develop the processes needed to combine physiological function with care modalities.

Professional Practice: From Current Trends to Extended Care

An analysis of the current professional environment and the role of the respiratory therapist in that atmosphere. An overview of concepts, procedures, and long-term care and how the respiratory therapist's role is impacted interacting between the acute care facility and self-administered care in the patient's home is emphasized. Other topics include medical ethics, smoking cessation, and sleep medicine. The emphasis may vary. Serves as one of the two Critical Thinking through Writing (CTW) courses required of all Respiratory Therapy majors.

Seminar in Respiratory Care

Three lecture hours per week. This course will address the newer and emerging technology specific to the cardiopulmonary system. The course will review research and journal articles which address new trends in respiratory care.

Special Problems in Respiratory Care

An in-depth review of the literature on selected topics in respiratory care, resulting in the preparation of a detailed proposal for further study.
RT 7096 End of Life Issues  
CREDIT HOURS 1.0  
PREREQUISITES First year and 2nd year Respiratory Therapy courses  
DESCRIPTION This course is designed to provide a broad overview of death and dying in United States. The growing need for quality palliative care, current gaps in care, and the scope of palliative care will be discussed in an attempt to introduce the student to current end-of-life issues.

RT 7800 Interprofessional Collaboration for Advanced Practice  
CREDIT HOURS 3.0  
PREREQUISITES Admission to the Graduate Program  
DESCRIPTION This course is designed to provide students in health care relate programs with introductory knowledge of interprofessional principles pertaining to team building skills, effective communication, and collaboration of care with individuals with multiple chronic conditions. Philosophical and theoretical foundations pertinent to interprofessional collaboration will be explored. Collaborative interprofessional learning experiences will provide the opportunity to increase knowledge and understanding of each profession's contribution to health care.

RT 7950 Directed Readings  
CREDIT HOURS 3.0  
PREREQUISITES Entry into RT graduate program  
DESCRIPTION

RT 7995 Directed Studies in Respiratory Care  
CREDIT HOURS 3.0  
DESCRIPTION Note: A minimum of six hours must be taken. Individual study of a selected topic under the guidance of a major adviser, resulting in the production of an original paper. This course serves as an alternative to the thesis option for Respiratory Care students in the master's degree program in Allied Health Professions.

RT 7999 Thesis Research  
CREDIT HOURS 3.0  
DESCRIPTION Individual study of a selected topic under the direction of the student's major professor. A minimum of six hours must be taken.

RT 8020 Neurobiology of Sleep  
CREDIT HOURS 3.0  
PREREQUISITES Acceptance into a graduate program at Georgia State University  
DESCRIPTION Participants in this course will gain knowledge of contemporary theories regarding why humans need to sleep and the neural mechanisms contributing to the states of sleep and wakefulness. An emphasis will be placed upon the analysis of perturbations within specific neurotransmitter systems may manifest as sleep related disorders. The application and evaluation of pharmacological interventions used to normalize activity within those neural pathways will be covered.

<tbody>
<tr>
<td>RMI 8050</td>
<td>Risk Management Modeling</td>
<td>3.0</td>
<td>None</td>
<td>CSP: 1, 2, 6, 7</td>
<td>This spreadsheet-based course surveys the principles of probability theory and mathematical finance for solving a diverse set of risk management problems related to the valuation and measurement of operational and financial risk exposures of the firm. The course is designed for all students interested in risk management and its application in finance, accounting, strategic management and economics.</td>
</tr>
<tr>
<td>RMI 8120</td>
<td>Property and Liability Insurance</td>
<td>3.0</td>
<td>None</td>
<td>CSP: 1, 6, 7</td>
<td>This course introduces the fundamental principles of property and liability insurance and a framework for designing and analyzing insurance contracts. The course examines property and liability loss exposures and their management, with primary emphasis on insurance.</td>
</tr>
<tr>
<td>RMI 8150</td>
<td>Corporate Risk Management</td>
<td>3.0</td>
<td>MBA 8135</td>
<td>CSP: 1, 2, 6, 7</td>
<td>Business organizations are exposed to loss-causing events that may have significant impact on their financial position. This course explores the analysis, control and financing of property, liability and human resource loss forecasting studies using microcomputer spreadsheets. Risk control focuses on principles of loss causation and mitigation and techniques for implementing risk control strategies. Risk financing alternatives include both funded and unfunded approaches. Traditional insurance, loss-sensitive insurance, cash-flow plans, self-insurance, captives, pooling, and financial risk management arrangements are examined. Case studies synthesize the risk management concepts covered in the course.</td>
</tr>
<tr>
<td>RMI 8200</td>
<td>Risk Management and Insurance Planning</td>
<td>3.0</td>
<td>None</td>
<td>CSP: None</td>
<td>The course includes an examination of risks to the person, including premature death, disability, health, and long term care. The course also analyzes property and liability risks, spanning auto, homeowners, and commercial. The course looks at methods of risk management beyond contracts, including organizational form. Case studies illustrate the application of risk management to client scenarios.</td>
</tr>
</tbody>
</table>
RMI 8300  
Predictive Risk Modeling  
CREDIT HOURS 3.0  
PREREQUISITES ECON 8740  
DESCRIPTION This course presents econometric techniques used to quantify risk exposures faced by individuals and corporations. The course emphasizes the microeconometric analysis of risk illustrated by examples including retail credit scoring, bankruptcy prediction, predictive loss modeling, stochastic loss reserving and others. Econometric techniques covered include generalized linear modeling, count models, survival regressions, and neural network analysis. Emphasis is placed on students gaining real world experience by being asked to estimate the models using data sets supplied by the instructor. The course is intended for graduate students in economics, business, finance, and actuarial science seeking to increase their ability to empirically model risk exposures in various settings.

RMI 83370  
Financial Risk Management  
CREDIT HOURS 3.0  
PREREQUISITES MBA 8135  
REQUIREMENTS CSP: 1, 2, 6, 7  
DESCRIPTION The course presents the fundamentals of corporate financial risk management. The objective is a realistic and conceptually motivated overview of risk management for major global companies. The strategic approach to risk management requires an understanding of insurance and alternative risk financing, as well as financial, insurance and commodity derivatives.

RMI 8389  
Directed Readings in Risk Management and Insurance  
CREDIT HOURS 1.0 TO 3.0  
PREREQUISITES Consent of a graduate adviser in Department of Risk Management and Insurance, good academic standing  
DESCRIPTION CSP: 1, 6.

RMI 9100  
Theory of Risk and Insurance  
CREDIT HOURS 3.0  
PREREQUISITES  
REQUIREMENTS CSP: 1, 2, 6, 7  
DESCRIPTION This course is a study of the generalized concept of risk and the alternative methods of risk accommodation from the viewpoint of the individual and businessperson. Special consideration is given to the theory of insurance and its proper utilization relative to risk.

RMI 9250  
Reading Seminar in Risk and Insurance  
CREDIT HOURS 3.0  
PREREQUISITES Consent of a graduate adviser in Department of Risk Management and Insurance  
DESCRIPTION CSP: 1, 2, 6, 7.
RCB 8040  Competing on Analytics and Organizational Knowledge

CREDIT HOURS  3.0
PREREQUISITES  None
REQUIREMENTS  CSP: 1, 2, 3, 4, 5 , 6, and 7
DESCRIPTION  Businesses are becoming increasingly "knowledge intensive." Analytics can help organizations develop a comprehensive approach to their knowledge assets to make better decisions and create distinctive competitive capabilities. High performing corporations compete on knowledge capabilities with their internal business processes as well as their external business processes. Data lies at the heart of this knowledge. Increasingly, decisionmakers rely on intelligent systems to analyze these data systematically and assist them in their decisionmaking. In many cases, automating the decisionmaking process is necessary because of the speed with which new data are generated. This course connects real-world data to decisionmaking through cases from finance, marketing, and operations.

<td>The purpose of this course is to establish communication skills that can be used by health and human service practitioners in culturally diverse settings to assist Spanish speaking clients. This course is designed for non-Spanish speaking students.</td>
</tr>
<tr>
<td>SNHP 6900</td>
<td>EKG Interpretation</td>
<td>3.0</td>
<td>SNHP 2010, SNHP 3010 or SNHP 6010</td>
<td>This course presents a study of electrocardiograms. The course will provide the student with the opportunity to understand basic and advanced EKG waveform morphology, normal physiology of cardiac conduction, and basic dysrhythmias. Appropriate case studies will be used to illustrate clinical significance.</td>
</tr>
<tr>
<td>SNHP 7109</td>
<td>Body Composition Assessment</td>
<td>3.0</td>
<td>Graduate student in BFLSONHP or consent of instructor</td>
<td>Assessment of body weight, body dimensions, and body composition is of considerable interest to those working in the health professions, as the information derived from these assessments is associated with health risks. In addition, the health professional's ability to accurately plot changes in body composition over time is important for determining whether the patient/client is changing in a way that reduces or increases health risk. There are numerous strategies for assessing body dimensions and composition, ranging from weight/height growth charts used with children, to skinfolds, and to more sophisticated analysis techniques that involve bioelectrical impedance and dual-energy x-ray absorptiometry. This course will review both the historical and new methods available to health professionals for the assessment of body dimensions and body composition, with special emphasis on the strengths and weaknesses of each technique and how these techniques may be appropriately used with the client/patient.</td>
</tr>
</tbody>
</table>
SNHP 7130 Tai Chi-A Therapeutic Exercise
CREDIT HOURS 3.0
DESCRIPTION This course introduces Tai Chi as a therapeutic exercise. The course addresses the benefits of Tai Chi exercise, Tai Chi’s origin, philosophy and development. Scientific evidence of Tai Chi’s benefits to health is discussed. The course introduces all the styles and forms of Tai Chi and the applications of Tai Chi to self-defense, exercise, rehabilitation and meditation. Application of the principles and practices of Tai Chi to various physical impairments and disabilities is discussed.

SNHP 7200 Health and the Older Adult
CREDIT HOURS 3.0
DESCRIPTION This course provides an introduction to physiological aging and the health status of older people and is designed for nonhealth professionals who work with older adults. Normal aging processes, age-related changes, and associated health promotion activities will be discussed. Information on the assessment and implications of alterations in functional health states, drug use, and referral sources are included.

SNHP 7500 Health Communication
CREDIT HOURS 3.0
DESCRIPTION This course will examine theories of interpersonal, organizational, and mass communication relevant to the health field. Students will review strategies of persuasion the relationship between attitude and behavior, and the changing nature of health and health delivery in the United States. Successful and unsuccessful health information campaigns will be evaluated.

SNHP 7800 Interprofessional Collaboration for Advanced Practice
CREDIT HOURS 3.0
PREREQUISITES Admission to a graduate program in the Lewis School
DESCRIPTION This course is designed to provide students in health care relate programs with introductory knowledge of interprofessional principles pertaining to team building skills, effective communication, and collaboration of care with individuals with multiple chronic conditions. Philosophical and theoretical foundations pertinent to interprofessional collaboration will be explored. Collaborative interprofessional learning experiences will provide the opportunity to increase knowledge and understanding of each profession’s contribution to health care.

SNHP 7810 Interpretation of Clinical Laboratory Values for Health Professionals
CREDIT HOURS 3.0
PREREQUISITES Inorganic chemistry with lab, organic chemistry with lab, AND EITHER human physiology OR biochemistry
DESCRIPTION The course will provide the student with the opportunity to understand the interrelationships between clinical laboratory test results and the disease process occurring in the patient. Laboratory values from hematology, clinical chemistry and urinalysis, and microbiology/immunology will be interpreted for infectious diseases, liver diseases, kidney diseases, hematologic disorders, and metabolic disorders. Appropriate case studies will be used to illustrate clinical significance.

SNHP 7980 Research Practicum
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.
SNHP 8000  Trends Affecting Health Policies, Practices, and Laws
CREDIT HOURS  3.0
DESCRIPTION  This course investigates the essential components of the health care system from the point of view of the practitioner, manager, and consumer. The course is designed to enable the student to demonstrate an understanding of government regulations, professional organization policies and practices, and practitioner roles as they relate to the formation and implementation of policy and law. This course is open to all university students.

SNHP 8010  Leadership and Ethics in Healthcare
CREDIT HOURS  3.0
DESCRIPTION  The course will describe and discuss major leadership philosophies and theories as well as ethical dilemmas. Through online and in class discussion and activities participants will explore these philosophies and theories to enhance their leadership potential. At the conclusion of this course each participant will have identified a leadership style(s) to use and grow within the healthcare industry.

SNHP 8020  Neurobiology of Sleep
CREDIT HOURS  3.0
PREREQUISITES  Acceptance into a graduate program at Georgia State University
DESCRIPTION  Participants in this course will gain knowledge of contemporary theories regarding why humans need to sleep and the neural mechanisms contributing to the states of sleep and wakefulness. An emphasis will be placed upon the analysis of perturbations within specific neurotransmitter systems may manifest as sleep related disorders. The application and evaluation of pharmacological interventions used to normalize activity within those neural pathways will be covered.

SNHP 8050  Selected Topics Nursing and Health Professions
CREDIT HOURS  1.0 TO 3.0
DESCRIPTION  This course provides an in-depth exploration of health and/or human service topics, research, and current issues. May be repeated up to six hours if topic varies.

SNHP 8100  Grantwriting
CREDIT HOURS  3.0
DESCRIPTION  This course offers applied grantwriting techniques within the governmental, corporate, and private sectors of grantmaking. Students will learn how to successfully compete for funding to support academic research and community-based service projects.

SNHP 8200  Instrument Evaluation and Construction
CREDIT HOURS  3.0
COREQUISITES  one graduate level research course
DESCRIPTION  This course presents the processes involved in designing, testing, and/or selecting instruments for measuring variables relevant to clinical and educational research and practice. Attention will be given to qualitative and quantitative approaches to measurement.
SNHP 8500  Systemic Meta-analysis
CREDIT HOURS  3.0
PREREQUISITES  Entrance into doctoral program
DESCRIPTION  Systematic Review and Meta-Analysis in the Health Sciences. This combination of systematic review and meta-analysis, the statistical process for combining data from multiple studies, is the basis for evidence-based practice in health sciences, social sciences, and a host of other fields. Clinicians use it to determine the most effective course of treatment. Researchers use it to plan new studies, to justify these studies (in grant applications) and to put these studies in context (in the introductory section of published papers). The objective of this course is for the student to become proficient in conducting a systematic review and meta-analysis in the health sciences. Topics will include publication bias, effect size calculation, forest plots, moderator variables, and meta-regression.

SNHP 8550  Basics of Financial Management in Health Care Organizations
CREDIT HOURS  3.0
PREREQUISITES  Admission to the DNP program
DESCRIPTION  This course focuses on application of finance principles and concepts to healthcare organizations. It will provide tools to promote fiscal accountability.

SNHP 8600  Systematic Review and Meta-Analysis in the Health Sciences II
CREDIT HOURS  3.0
PREREQUISITES  SNHP 8500 or PT 8500
DESCRIPTION  The objective of this course is to provide a practical implementation of the principles and concepts learned in SNHP 8500 or PT 8500. The desired goal is for the student to conduct a systematic review and meta-analysis that can be published in a peer-reviewed research journal. Students will work on a self-determined research question in groups of two or three in conjunction with a content expert for their research question. It is desired that the research question, student group, and content expert be identified prior to the start of classes.

SCUL SCULPTURE

SCUL 6050 Sculpture
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor
DESCRIPTION For students not majoring in Sculpture. Basic additive and subtractive processes used to create three-dimensional forms. May be repeated for a maximum of fifteen credit hours.
FEES $120.00

SCUL 6200 Wood Design
CREDIT HOURS 4.0
PREREQUISITES consent of instructor
DESCRIPTION A techniques-based course exploring wood as a medium for sculptural expression. Includes both additive and subtractive use of wood media, use of wood as a component of mixed-media works, lamination, and joinery.

SCUL 6300 Sculptural Drawing
CREDIT HOURS 4.0
PREREQUISITES consent of instructor
DESCRIPTION Investigates the process and outcome of drawing from the sculptor's perspective. Technical and conceptual aspects of drawing from this point of view will be covered.

SCUL 6400 Installation Art
CREDIT HOURS 4.0
PREREQUISITES Consent of instructor
DESCRIPTION Exploration of the methods and theories involved in the production of installation art through the investigation of form and space and of their function in transforming environmental, architectural, or invented sites.

SCUL 6980 Directed Study
CREDIT HOURS 3.0 TO 6.0
PREREQUISITES consent of the instructor
DESCRIPTION For students not majoring in Sculpture. Individual research. May be repeated for a maximum of twelve hours.

SCUL 8100 Directed Study Seminar
CREDIT HOURS 3.0
PREREQUISITES consent of instructor
DESCRIPTION For M.F.A. Sculpture major. Conceptual development in studio/seminar format using a variety of traditional and experimental approaches to ceramics. May be repeated for a maximum of 12 credit hours.

SCUL 8500 Directed Study
CREDIT HOURS 3.0 TO 9.0
PREREQUISITES SCUL 8000 with grade of C or higher
DESCRIPTION For the M.F.A. Sculpture major. Conceptualization and creation of three-dimensional forms. May be repeated for a maximum of twenty-four credit hours.

SCUL 8980 Special Problems
CREDIT HOURS 3.0
PREREQUISITES consent of the instructor and school director
DESCRIPTION Independent study. Contract outlining course content is required. May be repeated for a maximum of six credit hours.

SCUL 8999 Thesis Research
CREDIT HOURS 3.0 TO 12.0
PREREQUISITES consent of thesis advisor
DESCRIPTION Preparation of thesis and graduate exhibition.

SW 7100  Foundations of Community Partnerships  
CREDIT HOURS  3.0  
DESCRIPTION  This integrative course will introduce students to community partnerships from social systems and ecological perspectives. Macro content from human behavior and social environment, policy, and practice content, undergirds the community partnership framework. Provided is an overview of community practice, through an examination of theories, history, applications, and domains. Students will develop an understanding of the mission of social work and issues of economic and social justice in the context of community and will participate in community building through an experiential component.

SW 7200  Human Development Through the Life Course  
CREDIT HOURS  3.0  
DESCRIPTION  This course presents knowledge on developmental issues occurring throughout the life span. The focus is on gaining knowledge on individuals, families, small groups and interpersonal relationships in a multi-cultural context. Students will develop a critical understanding of current theories of well-being, stress, coping, and adaption, as well as macro issues such as oppression, privilege, and discrimination. The inter-relationships between small and large social systems will be explored, as well as the influence of bio-psycho-social factors on individual and family well-being. The implications of this knowledge for all social work practice in the community will be considered.

SW 7300  Methods of Community Research  
CREDIT HOURS  3.0  
DESCRIPTION  This course is designed to provide an overview of basic principles of social science research that provide the foundation for research in social work settings. Research processes will be examined in stages from problem formulation to data collection and some basic descriptive analysis. Both qualitative and quantitative methods will be reviewed. This course will stress the importance of the relationship between research and social work practice, and prepare students to evaluate existing social science research. Ethical issues, human diversity, and issues in community research will be discussed.

SW 7400  Social Work Practice I  
CREDIT HOURS  3.0  
DESCRIPTION  SW 7400 and SW 7800 are designed as a continuum. SW 7400 is designed to introduce students to the purpose, values and ethics of the profession and to provide foundation knowledge and skill development for generalist social work practice from a strengths perspective. Students will develop skills in critical thinking, building relationships, interviewing clients, assessing situations, planning and implementing change and evaluating outcomes across all levels of practice. Various theoretical frameworks used to describe and analyze interactions among and between individuals, families, groups and communities will be presented.
SW 7500  
**Foundation Field Education I**  
CREDIT HOURS: 5.0  
DESCRIPTION: 15 lecture hours; 200 field hours. SW 7500 and SW 7900 are designed as a continuum. This course provides a field experience that enables the social work student to integrate social work foundation knowledge, values, and skills with agency based social work practice. This experience incorporates an agency based field practicum and field integrative seminars.

SW 7501  
**Diversity and Social Justice**  
CREDIT HOURS: 1.0  
COREQUISITES: SW 7500 Field Education I  
DESCRIPTION: This course provides an introduction to understanding diversity in the context of social justice in the United States and in social work practice. The course focuses on understanding and applying multicultural concepts to practice, developing awareness of one's cultural identity, and exploring how diversity and justice issues impact generalist practice in the context of field education.

SW 7600  
**Social Welfare Policy**  
CREDIT HOURS: 3.0  
DESCRIPTION: This course focuses on the historical development and implementation of contemporary social welfare policies and programs in the United States. Critical analysis of the policy making process is emphasized. The influence of social values on the policy development process is highlighted relative to the differential allocation of material and social resources. Specific attention is given to understanding roles performed by social workers as community practitioners to affect change, and acknowledging the interplay among legislative, judicial and administrative levels of government. Although the primary focus is on federal/state government policies; presentations will incorporate policy development at the local as well as organizational/agency levels when appropriate. The current provisions and service delivery systems emanating from social welfare policies are examined, with special attention given to society's most vulnerable population defined by status, age, health or economic circumstances.

SW 7700  
**Community Foundation Integrative Seminar**  
CREDIT HOURS: 2.0 TO 3.0  
DESCRIPTION: This seminar course explores the professional identity shift from that of a generalist social worker to one as a community partnerships practitioner. Students will critically analyze contexts and trends that shape community partnerships practice. This is a required course of all advanced standing students prior to entry to the second year of the MSW program.

</tr>
<tr>
<td>SW 7950</td>
<td>Selected Topics in Social Work</td>
<td>1.0 TO 6.0</td>
<td>This course will offer knowledge and skills on variable topics that impact social work practice. May be repeated up to six hours if topic varies.</td>
</tr>
<tr>
<td>SW 7960</td>
<td>Seminar on Community Partnerships: Practice and Issues</td>
<td>2.0</td>
<td>An exploration of current challenges, issues, research skill or areas of special interest related to the social work practice of community partnerships. May be repeated up to six hours if topics vary.</td>
</tr>
<tr>
<td>SW 7980</td>
<td>Research Practicum</td>
<td>1.0 TO 15.0</td>
<td>Directed research in collaboration with a faculty member. For graduate assistants. Does not count towards degree requirements.</td>
</tr>
<tr>
<td>SW 7990</td>
<td>Directed Individual Study</td>
<td>1.0 TO 6.0</td>
<td>This course allows the student to extend his/her knowledge in a particular area through an independent study. A social work faculty member must agree to supervise this study, and it must be approved by the school director.</td>
</tr>
<tr>
<td>SW 8100</td>
<td>Skills and Techniques of Community Partnerships I</td>
<td>3.0</td>
<td>This is the first of two courses that focus on core skills, techniques for community partnership practice. Through the course students will develop skills in creating and sustaining community partnerships necessary for addressing social, economic and political issues facing communities today. Students will examine community practitioner roles and skills and apply these to contemporary community practice conceptual frameworks and models. The application of skills necessary for building organizational and community capacity and the development of authentic community partnerships will be emphasized.</td>
</tr>
<tr>
<td>SW 8200</td>
<td>Skills and Techniques of Community Partnerships II</td>
<td>3.0</td>
<td>This is the second of two courses that focus on core skills, strategies and techniques for community partnership practice. This course addresses the vital role of evaluation and technology in the modern social work environment. The course develops students’ skills in the formative and summative evaluation of community service delivery systems. With strong emphasis on the integration of evolving technologies for the human services, including online and data analysis tools, students will address methods for assessing and improving the quality of programs, policies, and community partnerships.</td>

</tr>
<tr>
<td>SW 8300</td>
<td>Leadership and Management</td>
<td>3.0</td>
<td>This course offers students a general introduction to the theory and practice of leadership management from a social perspective within public, for-profit and non-profit organizations. Theories of management (human resource, policy, functional and strategic management) organizational structures, roles and skills for mezzo and macro practice within an agency or organization are examined. The unique perspective that social workers bring to this discipline in resolution of community and agency decision making are central elements in this course. The ways in which the social work manager as leader can facilitate community partnerships will also be examined.</td>
</tr>
<tr>
<td>SW 8310</td>
<td>Group Facilitation</td>
<td>3.0</td>
<td>This course addresses knowledge and skill development in group facilitation. Issues, principles, and challenges common to diverse groups (e.g., focus groups, work teams, committees, partnerships, coalitions) are explored. Students will be exposed to specific methods of group facilitation, such as team building, consensus planning, and strategic action planning, and to the facilitator’s role in working with macro-focused groups.</td>
</tr>
<tr>
<td>SW 8315</td>
<td>Social Media Tools for Community Partnerships Practice</td>
<td>3.0</td>
<td>This course will focus on how to incorporate the use of social media in community partnerships practice. Students will examine both the theoretical framework for the use of social media by human service organizations and the application of social media to meet organizational mission through actual case studies. Organizational challenges in implementing social media will be addressed. Course will be an applied experience offering students' tools and techniques for integration in professional practice.</td>
</tr>
<tr>
<td>SW 8320</td>
<td>Grantwriting</td>
<td>3.0</td>
<td>This course offers applied grantwriting techniques within the governmental, corporate, and private sectors of grantmaking. Students will learn how to successfully compete for funding to support academic research and community-based service projects.</td>
</tr>
<tr>
<td>SW 8330</td>
<td>Contemporary Health Challenges</td>
<td>3.0</td>
<td>This course is designed to introduce students to chronic short- and long-term health concerns in our society. The course will address such illnesses as AIDS, hepatitis, tuberculosis, Alzheimer's, sexually-transmitted diseases (STD), and other health issues. The focus of the course will be upon treatment, identification and transmittal, with an examination of the impact of governmental regulations on drugs, the perception of patients, family members, and health care professionals.</td>
</tr>
</tbody>
</table>
SW 8340  Social Work and the Law
CREDIT HOURS  3.0
DESCRIPTION  Brief introduction to the law as it applies to social work practice and clients. Using case studies, students examine problems that the poor, the disadvantaged, and all other clients served by social workers face in confronting the justice system. Attention is given to worker liability and those skills essential for testifying in court and advocating.

SW 8350  Economics of Poverty and Public Policy
CREDIT HOURS  3.0
DESCRIPTION  Application of economic concepts to the study of poverty in the U.S. Topics include poverty and inequality, economics of the family, racial/gender implications, neighborhood effects, history of welfare structure and programs, and current issues in public policy related to poverty.

SW 8360  Forensic Social Work
CREDIT HOURS  3.0
DESCRIPTION  The course will introduce students to social work issues that are encountered by social workers, attorneys, and other specialists in a forensic setting. The course will include a critical analysis and study of particular social issues and the impact of those issues on the purposes and the effectiveness of organizations and individuals who work within the legal system. The course will address social work skills and ethical issues in a forensic setting.

SW 8370  Psychopathology
CREDIT HOURS  3.0
DESCRIPTION  The purpose is to acquaint students with the major types of psychopathology. Students should recognize those descriptions that are the defining features of each of the major pathologies. Theories as to the etiology considering both biochemical and social explanations will be reviewed. Contrasting perspectives of the ways in which a society can label and address deviant behavior will be presented.

SW 8440  Global Social Work Practice, Policy, and Research
CREDIT HOURS  3.0
DESCRIPTION  This course will offer students an introduction to social work issues from an international perspective. Using literature from around the world that focuses on global social issues, the course will address concepts of power, class, gender, race, sexuality, religion, violence, poverty, immigration, and social exclusion. Students will be required to evaluate critically what the international perspective might teach us about social work theory, practice, policy and research in the US.

SW 8450  Child Maltreatment Practice, Policy, and Research
CREDIT HOURS  3.0
DESCRIPTION  Child abuse and neglect are examined from both historical and contemporary perspectives using an ecological framework. Methodological and theoretical issues surrounding the study of maltreatment are highlighted. Symptomatology and sequelae of abusive behavior are examined with specific reference to the implications for family and community systems. Medical, legal, social, and cultural aspects of child maltreatment are explored. The role of community partnerships in the identification, intervention, treatment and prevention of child maltreatment is emphasized.

<tbody>
<tr>
<td>SW 8460</td>
<td>Aging Practice, Policy, and Research</td>
<td>3.0</td>
<td>This course is designed to provide the basic knowledge and entry-level skills appropriate for social work practice with older people and their families. Special attention is given to the biological, sociological, psychological, political and economic factors affecting older adults and methodology meeting these needs.</td>
</tr>
<tr>
<td>SW 8470</td>
<td>Substance Abuse Practice, Policy, and Research</td>
<td>3.0</td>
<td>This course will provide students with an overview of the various classes of psychotropic drugs. Students will learn the physiological mechanisms of action of each of the major classes of drugs. They will learn how each drug affects mood and behavior, how each drug affects major organ systems in the body, and how genetic and social factors may predispose an individual to drug use.</td>
</tr>
<tr>
<td>SW 8480</td>
<td>Disabilities Practice, Policy, and Research</td>
<td>3.0</td>
<td>This course will provide students with the opportunity to develop their knowledge of the impact of both physical and developmental disabilities on individuals and families. Focus is on responses to those disabilities diagnosed at birth or acquired through illness or injury. Emphasis is placed on utilizing appropriate social work interventions, while recognizing such variables as age, socioeconomic status, family constellation, cultural issues, and pre-morbid conditions. Understanding disabilities from a human rights perspective and the impact of oppression on people with disabilities will be explored. A historical perspective on how disability has been perceived and addressed by societal institutions will be presented.</td>
</tr>
<tr>
<td>SW 8490</td>
<td>Child Welfare Practice, Policy, and Research</td>
<td>3.0</td>
<td>This course is an introduction to the range of child welfare services including foster care, adoptions, permanency planning, and family preservation. Students will have the opportunity to explore current challenges inherent in the delivery of child welfare services to children, youth, and families. This course is intended to serve as a forum for the exchange of ideas and will focus on a range of critical issues in the field of child welfare including family violence, child maltreatment, HIV, drug exposure, and homelessness.</td>
</tr>

Sexuality across the life course, including dating, varieties of sexual relationships, birth control and procreative technologies, sexually transmitted diseases and AIDS, and sex and law.</td>
</tr>
</tbody>
</table>
**SOCI 8201  Social Inequality**

**CREDIT HOURS** 3.0

**DESCRIPTION** Theories, research methods, data sources, and empirical work in social stratification, power relations, class and status systems, and the changing structure of the economy and labor force. Examination of inequality based on gender, race/ethnicity, class, or age, and mobility among classes.

**SOCI 8208  Work and Occupations**

**CREDIT HOURS** 3.0

**DESCRIPTION** Social relationships in such areas as recruitment, stratifications, training, career patterns, client-colleague relations, mobility, social control, and job satisfaction.

**SOCI 8210  Industrial Sociology**

**CREDIT HOURS** 3.0

**DESCRIPTION** Systematic study of the organizational forms of industrial production in relation to society, community, and the individual.

**SOCI 8212  Race and Ethnic Relations**

**CREDIT HOURS** 3.0

**DESCRIPTION** Theory and research on racial and ethnic identities, communities, and conflicts; racism, discrimination, and related forms of inequality; racial/ethnic attitudes; assimilation, pluralism, and immigration.

**SOCI 8214  Immigration**

**CREDIT HOURS** 3.0

**DESCRIPTION** Study of the social forces that cause international migration and application of sociological perspectives to analyze conditions of immigrant life and the impact immigration has on different societies. Emphasizes social and cultural adaptations in communities affected by immigration, immigrants' participation in the labor force and economy, and public attitudes and government policies affecting entry and settlement processes in the U.S. and other societies.

**SOCI 8216  Gender and Society**

**CREDIT HOURS** 3.0

(Same as WGSS 8216.) Social construction of gender, gender-based stratification, and power dynamics.

**SOCI 8218  Political Sociology**

**CREDIT HOURS** 3.0

**DESCRIPTION** Sociological theories and methods to analyze power within social systems and the relations between state and society.

**SOCI 8220  Social Movements**

**CREDIT HOURS** 3.0

**DESCRIPTION** The causes, processes, and outcomes of social movements; including protest and other activities directed toward social change.

**SOCI 8222  Deviance and Social Control**

**CREDIT HOURS** 3.0

**DESCRIPTION** Theory and research regarding behavior which violates well-established social norms; social factors which engender such behavior and social reactions to such behavior; examples of typical interests would be sexually deviant behavior, certain types of mental illness, alcoholism, and suicide.

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCI 8224</td>
<td>Criminology</td>
<td>3.0</td>
<td>Issues in criminological theory and research, encompassing law and social control, the structure and process of the criminal justice system, epidemiology of crime, history of criminological thought, and criminal careers and behavior systems.</td>
</tr>
<tr>
<td>SOCI 8226</td>
<td>Urban Sociology</td>
<td>3.0</td>
<td>Urbanism from a sociological point of view. Focuses on three basic areas: theoretical concepts and perspectives on urban social organization; current sociological perspectives on the city; and contemporary application of these perspectives.</td>
</tr>
<tr>
<td>SOCI 8228</td>
<td>Contemporary Urban Research</td>
<td>3.0</td>
<td>Recent developments in urban sociological research and theory.</td>
</tr>
<tr>
<td>SOCI 8232</td>
<td>Poverty and Wealth</td>
<td>3.0</td>
<td>Critical issues in the generation and maintenance of economic inequalities, both domestically and globally. Emphasis on the role of socioeconomic forces in the production of poverty and wealth as well as individual and group attitudes and behaviors.</td>
</tr>
<tr>
<td>SOCI 8234</td>
<td>Race-Ethnicity and Health</td>
<td>3.0</td>
<td>This course focuses on social and behavioral aspects of health as they relate to race and ethnicity in the United States. Specifically, the course is designed to provide students with an overview of risk and protective factors related to health and health disparities across race-ethnic groups.</td>
</tr>
<tr>
<td>SOCI 8235</td>
<td>HIV/AIDS</td>
<td>3.0</td>
<td>AIDS has had an incredible impact on the world. In a time when infectious diseases have supposedly been conquered, a new virus, one with incredible stigma and other negative connotations attached, comes along and baffles the biomedical community. Further it has profoundly affected societal systems as diverse as sexual practices and the FDA drug approval process. Over twenty five years after AIDS was first announced we still do not have a handle on this epidemic. This course explores the social dimensions of HIV/AIDS in the U.S. and globally. We examine the social forces that impact and determine the course and experience of the epidemic as we also explore the impact the epidemic has had on communities and cultures worldwide. The course surveys 1) the social construction of the disease and its controversies; 2) the cultural aspects of AIDS; 3) the impact upon and response from particularly affected communities and social groups; 4) economic causes and consequences of AIDS; and 5) the politics of governmental, non-governmental and grassroots responses to the disease. There is no prerequisite for this course.</td>
</tr>
<tr>
<td>SOCI 8236</td>
<td>Race, Class, and Gender</td>
<td>3.0</td>
<td>This course examines the ways race, gender, and class are socially constructed concepts that are best understood as intersecting factors rather than mutually exclusive categories. Building on the work of pioneers in this field, this class considers how intersections of race, gender, and class shape social institutions like the workplace, family, school, and labor market, as well as the interactions that occur within these structures.</td>
</tr>
</tbody>
</table>
Critical Race Theory

3.0

Critical race theories analyze how race and racism are foundational social structures that shape the lived experience of people. This course will survey some of the major ideas and themes that define contemporary critical race theory and explore new directions in the field, especially colorblind racism and postcolonial studies.

Population Dynamics

3.0

Social factors influencing fertility, mortality, and migration in the U.S. and other countries and how these demographic processes influence social organizations; the impact of global and regional population changes on the environment and population policies; and basic techniques for constructing demographic rates and measures.

Qualitative Methods in Sociology

3.0

Methodological strategies in sociological research involving participant observation, in-depth interviewing, and the use of public and private documents. Special attention given to the analysis of text data (in contrast to numerical data) and the writing of text-based dissertations, articles, and books.

Sociology of Drugs

3.0

Major areas of sociological concern in drug abuse and addiction including legislation, epidemiology, etiology, treatment and rehabilitation and research and evaluation; examples of types of drugs covered would be narcotics, marijuana, psychedelics, sedatives and tranquilizers, and alcohol.

Sociology of Religion

3.0

Social dimensions of religion, the relationship between religion and society, sociological theories of religion, religious organizations and behavior, religion and social change, secularization, and the future of religion.

Sociology of Education

3.0

Sociological approach to the study of education as an institution in urban settings.

Special Topics in Sociology

3.0

May be taken more than once if topics are different.

Directed Reading

1.0 TO 3.0

Directed readings in special areas.

Sociology Internship

1.0 TO 6.0

Consent of the instructor

(A maximum of three credit hours may be applied toward the degree program required hours.) Apprenticeship in research or teaching under faculty supervision.

Research Practicum

1.0 TO 18.0

Consent of graduate director

Apprenticeship in research for GRAs and GLAs under faculty supervision.

SPAN SPANISH

SPAN 6135  Introduction to the Theory and Practice of Translation
CREDIT HOURS  3.0
DESCRIPTION  Introduction to professional translation based on a comparative study of characteristic modes of expression in Spanish and English and to the theoretical aspects of translation. Practice in translation of non-technical texts from Spanish to English and English to Spanish.

SPAN 6140  General Translation
CREDIT HOURS  3.0
DESCRIPTION  Translation of texts on a variety of cultural topics, documents, computer assisted translations, methods of research and documentation, and the continued study of comparative stylistics.

SPAN 6605  Spanish for International Business I
CREDIT HOURS  3.0

SPAN 6607  Spanish for International Business II
CREDIT HOURS  3.0
PREREQUISITES  SPAN 6605 or consent of the instructor
DESCRIPTION  Readings in the foreign language of current materials related to business and trade structures, issues, and procedures.

SPAN 6990  Independent Study – Special Topics
CREDIT HOURS  1.0 TO 4.0
PREREQUISITES  Consent of the instructor
DESCRIPTION  For Spanish M.A. students. No more than four credit hours may be applied toward the degree. Special topics readings and/or research to be determined in consultation with the instructor.

SPAN 7135  Introduction to the Theory and Practice of Translation
CREDIT HOURS  3.0
DESCRIPTION  Introduction to professional translation based on a comparative study of characteristic modes of expression in Spanish and English and to the theoretical aspects of translation. Practice in translation of non-technical texts from Spanish to English and from English to Spanish.

SPAN 7140  General Translation
CREDIT HOURS  3.0
DESCRIPTION  Translation of texts on a variety of cultural topics, documents, computer assisted translations, methods of research and documentation, and the continued study of comparative stylistics.

SPAN 7142  Specialized Translation I
CREDIT HOURS  3.0
DESCRIPTION  Business, economics, and banking.

SPAN 7145  Specialized Translation II
CREDIT HOURS  3.0
DESCRIPTION  Legal, medical, natural sciences, media, and other.
SPAN 7146  Workshop on the Translation of Special Topics
CREDIT HOURS  3.0
DESCRIPTION  Translation of texts of a technical nature, including the areas of computer, medicine, and the natural sciences; compilation of selected bibliographies and glossaries in the student’s chosen field of specialization and completion of a major translation project.

SPAN 7150  Introduction to Interpretation
CREDIT HOURS  3.0
DESCRIPTION  This course will introduce students to the field of consecutive interpretation. Students will learn protocol, how to take notes and practice with speeches from world organizations, impromptu speeches and scripted question and answer text.

SPAN 7151  Spanish for Reading
CREDIT HOURS  3.0
DESCRIPTION  Essential Spanish grammar and vocabulary building with emphasis on cognate recognition and idiomatic expressions for development of reading knowledge. For graduate students preparing for the Graduate Reading Examination. Not open to Spanish majors or native speakers of Spanish.

SPAN 7152  Medical Interpretation
CREDIT HOURS  3.0
DESCRIPTION  The protocol and procedures of the medical interpreter. Practice with medical texts and develop medical glossaries.

SPAN 7154  Interpretation II
CREDIT HOURS  3.0
DESCRIPTION  This course will focus on the development of simultaneous interpretation. The students will also be introduced to sight translation for more specialized courses.

SPAN 7157  State and Municipal Court Interpretation
CREDIT HOURS  3.0
DESCRIPTION  This course will focus on the protocol and procedures followed in the state and municipal court systems in Georgia. Specialized vocabulary will be presented and students will practice with actual court documents.

SPAN 7765  Practicum in Translation
CREDIT HOURS  1.0 TO 6.0
PREREQUISITES  consent of instructor
DESCRIPTION  Directed work in special projects; field experience; internships. May be repeated up to six hours.

SPAN 8103  Problems in Teaching Spanish Grammar
CREDIT HOURS  3.0
DESCRIPTION  Discussion of the role of grammar in the communicative approach to foreign language teaching; theoretical analysis of difficult points of Spanish grammar, including pronunciation; examination of Spanish textbooks; creation of portfolio of original grammar exercises.

SPAN 8105  Teaching Reading in a Foreign Language Classroom: From Theory to Practice
CREDIT HOURS  3.0
DESCRIPTION  This course will review the theory of reading and its pedagogical implications for the teaching of reading as a foreign language. Applying the theory to practice, the practical component of the course will prepare students to make informed decisions about the use and teaching of reading, especially about how to select reading, how to present it, and how to work with and on written material.
Teaching Listening in a Foreign Language Classroom: From Theory to Practice

**Description**
This course will focus on the importance of listening in the acquisition/learning of a foreign language and how this ability relates to the other language skills. Students will learn about the process of listening, review, and assess the listening material available in the Spanish FL setting, and learn how to select, develop, and use listening material in the FL classroom.

Spanish Linguistics

**Prerequisites**
SPAN 8600 or equivalent

**Description**
Study of all areas of Spanish linguistics: phonetics, phonology, morphology, syntax, historical linguistics, and dialectology.

Cultural Studies

**Description**
Study of particular aspects or periods of Spanish, Latin American, and other Spanish speaking communities. May be repeated if topics vary.

Special Topics in Spanish Applied Linguistics

**Description**
May be repeated for credit if topic varies.

History of the Spanish Language

**Description**
The phonological and morphological evolution of Spanish from Vulgar Latin to standard modern Spanish. Several old Spanish texts will be examined.

Medieval Spanish Literature

**Description**
Evolution of Spanish literature from the "jarcha" through La Celestina.

Topics in Golden Age Literature

**Description**
Study of particular aspects or periods of Golden Age Literature. May be repeated if topics vary.

Generation of '98

**Description**
Early twentieth-century Spanish literature with emphasis on the works of Unamuno, Machado, Baroja, Azorin, and Ortega y Gasset.

Contemporary Spanish Literature

**Description**
Study of particular aspects of Contemporary Spanish Literature. May be repeated if topics vary.

Trauma, Memory, and Artistic Representation: State Terror in Argentina (1976-83)

**Description**
A look at how different artistic expressions (literature, film, music, visual arts) have represented state terror and the trauma of the "desaparecidos" in the decades following the 1976-83 military dictatorship in Argentina.

Afro-Hispanic Literature and Cultures

**Description**
This course covers writings in a variety of genres as well as visual and musical selections pertaining to the African diaspora in Spanish America and the Caribbean.
SPAN 8845  Latin-American Literature from the Conquest to the 1900s  
CREDIT HOURS 3.0  
DESCRIPTION A survey of Colonial literature from the first chronicles of Colon and Cortes to the 1900s.

SPAN 8850  The Traditional Latin American Novel  
CREDIT HOURS 3.0  
DESCRIPTION (Not open to students with prior credit for SPAN 855A.) The evolution of the genre in the nineteenth and twentieth centuries from traditional trends ("indianismo," regionalism, social realism) to new trends ("modernismo," "vanguardismo").

SPAN 8855  The Latin American “Boom” Novel  
CREDIT HOURS 3.0  
DESCRIPTION (Not open to students with prior credit for SPAN 855B.) The "Boom" phenomenon of the 1960s and 1970s (including early manifestations in the 1940s and 1950s) as a radical departure from previous narrative forms.

SPAN 8860  The Contemporary Latin American Novel  
CREDIT HOURS 3.0  
DESCRIPTION (Not open to students with prior credit for SPAN 855C.) Newest trends in the post-Boom novel since the mid-1970s as both a continuation and a departure from the "Boom.”.

SPAN 8865  Latin American Short Story  
CREDIT HOURS 3.0  
DESCRIPTION The evolution of the genre in the nineteenth and twentieth centuries, as manifested in the various schools of romanticism, modernism, realism, naturalism, "vanguardismo," and contemporary trends.

SPAN 8870  Latin American Poetry  
CREDIT HOURS 3.0  
DESCRIPTION Study of particular aspects and periods of Latin American Poetry. May be repeated if topics vary.

SPAN 8875  Women Writers  
CREDIT HOURS 3.0  
DESCRIPTION A literary and cultural study of the literary production of Spanish, Latin American, and US Latina women writers. Special attention will be paid to the categories of gender and sexuality, and how these cultural constructs inform the ideological and aesthetic debates in the field of Hispanic Studies. May be repeated if topics vary.

SPAN 8880  Special Topics in Spanish Literature  
CREDIT HOURS 3.0  
DESCRIPTION May be repeated for credit if topics vary.

SPAN 8885  Special Topics in Latin American Literature and/or Culture  
CREDIT HOURS 3.0  
DESCRIPTION May be repeated for credit if topics vary.

SPAN 8890  Contemporary Mexican Fiction  
CREDIT HOURS 3.0  
DESCRIPTION An overview of the most influential novels in Mexican culture since 1960, with emphasis on writers such as Rulfo, Fuentes, Poniatowska, Agustin, Pacheco, Mastretta, and Esquivel.

SPAN 8895  Research  
CREDIT HOURS 1.0 TO 21.0  
DESCRIPTION Independent Research for credit.

SPAN 8999  Thesis Research  
CREDIT HOURS 1.0 TO 9.0  
DESCRIPTION
STAT 8050  Statistics for Bioinformatics  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4544/6544 or BIOL 4744/6744, or its equivalent  
DESCRIPTION  (Same as BIOL 8050 and CSC 8050.) Three lecture hours per week. Introduction of computational biology and microarray informatics, gene expression analysis using microarray for transcriptional profiling, use of multivariate statistics and computer algorithms for different clustering techniques, important role of statistical packages, algorithms for calculating statistical quantities, and statistical research in the area.

STAT 8090  Applied Multivariate Statistics  
CREDIT HOURS  3.0  
PREREQUISITES  consent of the instructor  
DESCRIPTION  Matrix algebra, Multivariate normal distributions, discriminant analysis, canonical correlations, and Multivariate analysis of variance.

STAT 8310  Applied Bayesian Statistics  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752 or equivalent  
DESCRIPTION  Topics included are developing prior distribution, conjugate analysis, Gibbs sampling, single and multiparameter problem, regression analysis, hierarchical models, generalized linear model, computation using winbugs and R software.

STAT 8320  Advanced Methodologies in Bioinformatics  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752 or equivalent  
DESCRIPTION  Topics included are microarray data analysis, data normalization, differential analysis, resampling techniques, multiple testing problems, correction methods for multiple tests, brief introduction to pathway analysis.

STAT 8440  Survival Analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752/6752  
DESCRIPTION  Topics included are survival function, hazard function, right censoring, nonparametric methods for comparing two survival distributions, parametric and nonparametric regression methods with survival data.

STAT 8540  Advanced Methodologies in Biostatistics  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 6752  
DESCRIPTION  Topics included are clinical trials, longitudinal data analysis, Bayesian method, and diagnosis.

STAT 8550  Applied functional data analysis  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4752 or MATH 6752  
DESCRIPTION  Functional data arises in many scientific areas. With an increasing number of cases, the collected data are curves or functions. This course introduces basic concepts and methods of functional data analysis. Topics include: functional data representation, smoothing methods, exploration of functional data, registration of functional data, functional principal component analysis, canonical correlation and discriminant analysis, functional linear models.

STAT 8561  Linear Statistical Analysis I  
CREDIT HOURS  3.0  
PREREQUISITES  MATH 4751/6751  
DESCRIPTION  Topics included are statistical inference, Multivariate normal distribution, distribution of quadratic forms, linear models, regression models and experimental design models.

</table>
STAT 8674
Monte Carlo Methods
CREDIT HOURS 3.0
PREREQUISITES MATH 6752 with grade of C or higher
DESCRIPTION Topics included are the Monte Carlo method for integration, Metropolis-Hastings algorithms, the Gibbs sampler and other Markov chain-based methods, importance sampling, simulated tempering, perfect sampling, and other related subjects. Some applications will be illustrated by real examples. Applications include use of a statistical computer package.

STAT 8678
SAS Programming
CREDIT HOURS 3.0
PREREQUISITES MATH 4544, MATH 6544, or equivalent
DESCRIPTION A comprehensive overview of programming using the SAS statistical software package. Topics included are data management, matrix operations, descriptive and inferential statistics, macro programming and graphs.

STAT 8680
Applied Nonparametric Methods
CREDIT HOURS 3.0
PREREQUISITES MATH 4752/6752
DESCRIPTION Three lecture hours a week. Nonparametric testing and estimation procedures are introduced. Topics include rank methods for one sample and two sample problems, rank tests for one-way layouts, linear regression and independence problems, robust estimates, goodness-of-fit test, U-statistics, recent developments in nonparametric statistics.

STAT 8690
Topics in Statistics
CREDIT HOURS 3.0
PREREQUISITES Consent of instructor
DESCRIPTION May be repeated for credit if topics vary.

STAT 8691
Graduate Research in Statistics
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION May be repeated for credit.

STAT 8692
Graduate Laboratory in Statistics
CREDIT HOURS 1.0 TO 15.0
DESCRIPTION May be repeated for credit.

STAT 8693
Statistical Internship
CREDIT HOURS 1.0 TO 3.0
PREREQUISITES Consent of instructor
DESCRIPTION This course involves supervised, off-campus experience in a field in which statistical science plays an important role.

STAT 8694
Topics in Biostatistics
CREDIT HOURS 3.0
PREREQUISITES Consent of instructor
DESCRIPTION This course involves opportunity to study new research topics. Students will develop advanced statistical skills in the frontier of biostatistics.

STAT 8700
Categorical Data Analysis
CREDIT HOURS 3.0
PREREQUISITES MATH 4752 or MATH 6752
DESCRIPTION Analysis of Multinomial Data and Contingency tables, loglinear model for count data, model selection procedures; applications include use of statistical software packages, like SAS and S+.

STAT 8760
Sample Surveys
CREDIT HOURS 3.0
PREREQUISITES MATH 4752/6752
DESCRIPTION Sampling from finite populations; random, stratified, cluster, and systematic sampling; estimation of means and variances; and ratio and regression sampling.
### STAT 8800  Statistical Consulting I
- **Credit Hours**: 1.0
- **Prerequisites**: graduate students who have taken at least one-year courses in statistics
- **Description**: The objectives of Statistical Consulting Practicum are for students to develop skills needed by a successful statistical consultant, such as the effective collaboration skills with researchers in other disciplines, the communication skills, both written and verbal. In the orientation phase, a number of lectures will cover topics on consulting philosophy, effective problem identification, consulting session management and positive interaction with clients. In the practicum phase, students will be exposed to realistic statistical and scientific problems.

### STAT 8801  Statistical Consulting II
- **Credit Hours**: 1.0
- **Prerequisites**: STAT 8800 or instructor's approval
- **Description**: The objectives of Statistical Consulting Practicum are for students to develop skills needed by a successful statistical consultant, such as the effective collaboration skills with researchers in other disciplines, the communication skills, both written and verbal. In the practicum phase, students will be exposed to more realistic statistical and scientific problems.

### STAT 8820  Research
- **Credit Hours**: 3.0
- **Prerequisites**: consent of instructor and chair of department
- **Description**: Directed research leading to a research paper in statistics or analysis of a statistical problem. This course is intended to satisfy the requirement for a research paper or a written report of a laboratory experience for the non-thesis option.

### STAT 8890  Colloquium
- **Credit Hours**: 1.0
- **Description**: The course is to serve the need of graduate students who are ready to start research work. It provides students the opportunity to see a wide range of topics that are currently being studied by statisticians. It also helps students to learn the important elements of a successful professional talk and to develop skills of professional communication and presentation.

### STAT 8895  Directed Research in Statistics
- **Credit Hours**: 1.0 to 15.0
- **Prerequisites**: consent of the instructor
- **Description**: This course is intended to satisfy the requirement for a research paper or a written report of a laboratory experience for the non-thesis option.

### STAT 8990  Thesis Research
- **Credit Hours**: 1.0 to 18.0
- **Prerequisites**: thesis option
- **Description**: Directed research leading to a research paper in statistics or analysis of a statistical problem. This course is intended to satisfy the requirement for a research paper or a written report of a laboratory experience for the non-thesis option.

### STAT 8999  Dissertation Research
- **Credit Hours**: 1.0 to 18.0
- **Prerequisites**: consent of instructor
- **Description**: Directed research leading to a research paper in statistics or analysis of a statistical problem. This course is intended to satisfy the requirement for a research paper or a written report of a laboratory experience for the non-thesis option.

</table>
**Accounting for Income Taxes**

**Credit Hours:** 3.0

**Prerequisites:** TX 8020

**Corequisites:** TX 8030

**Requirements:** CSP: 1, 2, 6, 7

**Description:** This course addresses timing issues in federal income taxation. Topics include cash and accrual accounting methods, installment reporting, accounting for inventories and long-term contracts, issues relating to the time value of money, adoption of accounting periods, and changes in accounting periods and methods.

---

**Directed Readings in Taxation**

**Credit Hours:** 1.0 TO 3.0

**Prerequisites:** TX 8020 and TX 8030 and consent of instructor, good academic standing

**Requirements:** CSP: 1, 2, 6, 7

**Description:** This course allows the supervised study of a specialized area not provided in the regular curriculum or provides a supervised study of a topical area of varied length, i.e., one to three semester hours. An arrangement must be made with a full-time faculty member to sponsor a student’s research.

---

**Advanced Case Studies in Taxation**

**Credit Hours:** 3.0

**Prerequisites:** 3.0 or higher GPA and B grade or higher in ACCT 4510; or consent of instructor

**Requirements:** CSP: None

**Description:** In this course students will use advanced real world cases to identify tax accounting and tax planning issues in unique fact patterns, select and apply appropriate tax laws to unique fact patterns and make decisions requiring knowledge of the tax law and its effect.

---

**Field Study in Taxation**

**Credit Hours:** 3.0

**Prerequisites:** TX 8020 with minimum grade of B; consent of instructor

**Requirements:** CSP: 1, 2, 6, 7, 8

**Description:** This field study is a supervised, employer-site learning experience. In this experience, students have the opportunity to apply tax-related skills in a professional setting. Students must consult with the instructor or the M.Tx. Program Coordinator before registering to determine whether their employment or internship experiences will qualify for credit.

---

**Issues in Individual Taxation**

**Credit Hours:** 3.0

**Prerequisites:** None

**Requirements:** CSP: 1, 2, 6

**Description:** This course emphasizes identification of tax issues, analysis of court decisions, and planning techniques to reduce tax liability.
TSLE 7250  Applied Linguistics for the Bilingual/English as a Second Language Teacher

CREDIT HOURS  3.0

DESCRIPTION  Students receive an overview of the principles of language structure, the processes of first and second acquisition, and the issues involved in assessing language proficiency with special attention paid to the application of linguistic knowledge to the multilingual and multicultural school setting. TSLE 7250 can be cross-listed with TSLE 4250.

TSLE 7260  Cultural Issues for the Bilingual/English as a Second Language Teacher

CREDIT HOURS  3.0

DESCRIPTION  Students examine the concept of culture and study cultural influences and the uses of culture in the education of children. Special attention is paid to the application of linguistic and cultural knowledge to the multilingual and multicultural school setting. TSLE 7260 can be cross-listed with TSLE 4260.

TSLE 7440  Methods and Materials for the Bilingual/English as a Second Language Teacher

CREDIT HOURS  3.0

DESCRIPTION  This course familiarizes students with current second language classroom research and with effective methods and materials with an emphasis on adapting these methods and materials to a specific classroom setting. TSLE 7440 can be cross-listed with TSLE 4440.

1.893
WGSS 6770  Gender and Sexuality in the African Diaspora

CREDIT HOURS  3.0
PREREQUISITES  WGSS 2010 with a grade of C or better
DESCRIPTION  This course thinks about the kinds of conceptual tools: questions, methods, theories, histories, geographies, time periods, and social/cultural movements needed in order to understand the dynamic and shifting terrain of gender and sexuality in the African Diaspora. Colonialism, slavery, social movements as well as transnational circuits of music, self-expression, desire and consumption/production will frame our approach to theorizing gender and sexuality in the actual and imagined spaces of the African Diaspora. Crosslisted with WGSS 4770.

WGSS 6780  African-American Lesbian and Gay Activism

CREDIT HOURS  3.0
DESCRIPTION  Examines the speeches, writings, and other public communication of African-American lesbians and gay men who promote democratic ideals. Surveys historical and contemporary issues confronting this marginalized population. Emphasis on thematic and cultural critical approaches.

WGSS 6790  Womanism

CREDIT HOURS  3.0
DESCRIPTION  Explores womanism as a perspective distinct from feminism. Examines the multiple origins of womanism within global Africana discourse. Covers theoretical and activist dimensions of womanism across multiple disciplines and in popular culture.

WGSS 6810  Feminism and Foucault

CREDIT HOURS  3.0
DESCRIPTION  Provides a broad overview of the works of the French philosopher, Michel Foucault, and emphasizes feminist/womanist use of his theories and methods to analyze domination and resistance.

WGSS 6820  Feminism and Queer Theory

CREDIT HOURS  3.0
DESCRIPTION  Analyzes the relations of sexuality and gender identity, as well as the interrelationships among these identities and other institutions, such as capitalism, globalization, art and performance, the law, media, and academia.

WGSS 6830  Class Matters

CREDIT HOURS  3.0
DESCRIPTION  Investigates the complexities of class in the U.S., where it is elusive because we often imagine ourselves free from the fixed hierarchies of other societies or, at the very least, overestimate our class mobility. Connects issues of social stratification to other systemic oppressions, such as race and gender, in the context of increasing globalization.

WGSS 6840  Arab and Islamic Feminisms

CREDIT HOURS  3.0
DESCRIPTION  We will look at how Arab and Islamic feminisms articulate with concerns of other feminisms indigenous to the global south and how Arab and Islamic feminisms have emerged as oppositional discourses to colonialism, patriarchal nationalism, and Western feminism.
WGSS 6842  Sexuality and Nationalism  
CREDIT HOURS 3.0  
DESCRIPTION This course explores the relationship between modern forms of identity, sexuality, gender and political regimes. We will explore the deployment of sexuality in various political systems and discuss the specific relations between nationalism and sexuality.

WGSS 6844  Youth and Sexualities  
CREDIT HOURS 3.0  
DESCRIPTION This class takes up the intersections of youth and sexuality. Readings, discussion, and analysis focus on the ways adults seek to govern the sexual subjectivities of young people and the ways young people respond to their surroundings as they create identities and social practices related to sexuality. Focuses of the course include practices of governing others and the self relating to sex education, the creation of "LGBT" and "queer" youth, social scientific "expertise," and popular culture.

WGSS 6846  Gender, War, and Militarism in/and the Middle East  
CREDIT HOURS 3.0  
DESCRIPTION Crosslisted with WGSS 4846. This course explores the interrelationships of war and militarism with gender and sexuality, with a focus on the geopolitical context of the Middle East. Students will engage with a variety of feminist and queer perspectives and disciplinary and interdisciplinary methodologies, including history, anthropology, literature, international relations, and cultural studies.

WGSS 6860  Feminist Philosophy  
CREDIT HOURS 3.0  
DESCRIPTION (Same as PHIL 6870). Classical and contemporary issues concerning women, such as discrimination on the basis of gender, class, race, or sexuality, whether gender is natural or constructed, and historical roots of feminist and anti-feminist perspectives.

WGSS 6910  Special Topics  
CREDIT HOURS 3.0  
DESCRIPTION Intensive treatment of specified topics in women's studies. May be repeated for credit if topic varies.

WGSS 8001  Feminist Theories  
CREDIT HOURS 3.0  
DESCRIPTION Students will be exposed to feminist intersectional approaches to gender, race, class and sexuality. This course serves as an introduction to the spectrum of feminist theories and their intellectual contexts. Students will be exposed to theoretical projects such as liberalism/neoliberalism, marxism, post-structuralism/post-modernism, psychoanalytic theory, and post-colonial studies. Engagements and critiques of these theories may include but are not limited to womanism, black feminist thought, queer theory, ecofeminism, transnational feminism, marxist/socialist feminism, and psychoanalytic feminism.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGSS 8002</td>
<td>Globalization and Gender</td>
<td>3.0</td>
<td>An exploration of the social, political, and economic impacts of globalization aimed toward understanding the gendered dynamics of global economic restructuring. The course will include a consideration of the relationship between globalization on the one hand and imperialism, national security, and imprisonment on the other. Students will survey a range of feminist theories and responses to globalization, including, but not limited to, transnational feminisms, postcolonial theory, and postmodern theories.</td>
</tr>
<tr>
<td>WGSS 8003</td>
<td>New Directions in Feminism</td>
<td>3.0</td>
<td>Emerging perspectives in feminist theory, feminist activism, and the field of women’s studies. May examine how feminism and women's studies intersect with other critical theories and social movements. Specific topics vary by instructor.</td>
</tr>
<tr>
<td>WGSS 8004</td>
<td>Feminist Methodologies</td>
<td>3.0</td>
<td>This interdisciplinary course critiques masculinist and other hegemonic knowledge practices by moving between epistemology, theory, methods and ethics. Rather than training students in particular research methods, this course engages students with feminist epistemological and methodological critiques and theories applicable to their research methods and design.</td>
</tr>
<tr>
<td>WGSS 8005</td>
<td>Proseminar in Women’s, Gender, and Sexuality Studies</td>
<td>1.0 OR 2.0</td>
<td>Introduction to discipline-specific research skills and socialization experiences in women’s, gender, and sexuality studies. Required for all first-year WGSS M.A. students. Students take Part A of this year-long course in Fall for 1 credit hour, and Part B in the Spring for 2 credit hours. Students are required to attend certain departmental events in addition to class sessions.</td>
</tr>
<tr>
<td>WGSS 8006</td>
<td>Feminist Pedagogy</td>
<td>3.0</td>
<td>Introduction to both theoretical and practical components of feminist pedagogy. The phrase “feminist pedagogy” refers to pedagogical practices that work to be anti-oppressive and liberatory. It develops within a tradition of critical pedagogy, which involves both a critique of the university as a place that acts as a “gatekeeper” for class privilege and “appropriate” subject-formation as well as a vision of the university where we can contest power relations and imagine new possibilities for expanding the intelligible. In other words, feminist pedagogy imagines the classroom as a space to encourage deep exploration of social problems in order to critically evaluate and explore social justice frameworks. In the class, students will utilize these theoretical frameworks in order to develop their own specific goals and evaluate specific teaching strategies for use in their own classrooms.</td>
</tr>
<tr>
<td>WGSS 8010</td>
<td>Affect and Cultural Politics</td>
<td>3.0</td>
<td>This course evaluates how interdisciplinary conceptualizations of affect inform analysis of contemporary theoretical, cultural, social, and political problems and issues. Objects of analysis include mass and popular culture, literature, visual art and aesthetics, scenes of activism, the body, modernity, neoliberalism and globalization.</td>
</tr>

Appendix II Administration and Faculty

This chapter contains information on administration for the University System of Georgia, Board of Regents and Georgia State University. A list of all Georgia State University faculty is provided.

The University System of Georgia

The University System of Georgia includes all state-operated institutions of higher education in Georgia: four research universities, four comprehensive universities, nine state universities, and 12 state colleges. These 29 public institutions are located throughout the state.

A 19-member constitutional Board of Regents governs the University System, which has been in operation since 1931. Appointments of board members, five from the state-at-large and one from each of the state’s fourteen congressional districts, are made by the governor and are subject to confirmation by the State Senate. Regular terms of board members are seven years.

The chairperson, vice chairperson, and other officers of the Board of Regents are elected by the members of the board. The chancellor, who is not a member of the board, is the chief executive officer of the board and the chief administrative officer of the University System.

The overall programs and services of the University System are offered through three major components: instruction, public service and continuing education, and research.

Instruction consists of programs of study leading toward degrees, ranging from the associate (two-year) level to the doctoral level, and certificates.

Standards for admission of students to instructional programs at each institution are determined by the institution pursuant to policies of the Board of Regents. The board establishes minimum standards and leaves to each institution the prerogative to establish higher standards. Applications for admission should be addressed to the institutions.

Public service and continuing education consist of non-degree activities, primarily, and special types of college degree credit courses. The non-degree activities include short courses, seminars, conferences, and consultative and advisory services in many areas of interest. Typical college degree credit courses are those offered through extension center programs and teacher education consortiums.

Research encompasses scholarly investigations conducted for discovery and application of knowledge. Most of the research is conducted through the universities; however, some of it is conducted through several of the senior colleges. The research investigations cover matters related to the educational objectives of the institutions and to general social needs.

The policies of the Board of Regents provide a high degree of autonomy for each institution. The executive head of each institution is the president, whose election is recommended by the chancellor and approved by the board.

Faculty

Andrew Young School of Policy Studies Faculty

Azuri, Maria Soledad, M.S. (Columbia University in the City of New York), Visiting Instructor of Social Work

Bahl, Roy W., Jr., Ph.D. (University of Kentucky), Dean and Regents’ Professor Emeritus of Economics

Banzhaf, H. Spencer, Ph.D. (Duke University), Professor of Economics

Beck, Elizabeth L., Ph.D. (University of Pittsburgh), Professor of Social Work

Blackwell, Brenda Sims, Ph.D. (University of Oklahoma), Associate Professor of Criminal Justice and Criminology

Bourdeaux, Carolyn, Ph.D. (Syracuse University), Associate Professor of Public Management and Policy and Associate Director of the Fiscal Research Center

Brezina, Timothy J., Ph.D. (Emory University), Associate Professor of Criminal Justice and Criminology

Brooks, Fred P., III, Ph.D. (University of Georgia), Associate Professor of Social Work

Camp, Damon Davis, Ph.D. (Claremont Graduate University), Associate Professor Emeritus of Criminal Justice and Criminology

Capers, K. Juree, Ph.D. (Texas A&M University), Assistant Professor of Public Management and Policy

Collins, Sue Carter, Ph.D. (Florida State University), Associate Professor of Criminal Justice and
Criminology

Courtemanche, Charles, Ph.D. (Washington University in St. Louis), Assistant Professor of Economics

Cox, James C., Ph.D. (Harvard University), Professor of Economics, Director of the Experimental Economics Center and Holder of the Noah Langdale, Jr. Eminent Scholar and the Georgia Research Alliance Eminent Scholar Chair

Cummings, Ronald G., Ph.D. (University of Kansas), Professor Emeritus of Economics

Cunningham, Christopher R., Ph.D. (Syracuse University), Adjunct Associate Professor of Economics

Cyan, Musharraf Rasool, Ph.D. (Georgia State University), Visiting Research Assistant Professor of Economics

Dabney, Dean A., Ph.D. (University of Florida), Interim Chair and Associate Professor of Criminal Justice and Criminology

Daigle, Leah, Ph.D. (University of Cincinnati), Associate Professor of Criminal Justice and Criminology

Dear, Renanda Wood, M.S.W. (University of Georgia), Senior Academic Professional of Social Work

Esnard, Ann-Margaret, Ph.D. (University of Massachusetts at Amherst), Professor of Public Management and Policy

Farnham, Paul G., Ph.D. (University of California, Berkeley), Associate Professor Emeritus of Economics

Feltenstein, Andrew, Ph.D. (Yale University), Professor of Economics

Ferraro, Paul J., Ph.D. (Cornell University), Professor of Economics

Finn, Mary A., Ph.D. (The State University of New York at Albany), Professor of Criminal Justice and Criminology

Forge, Nicholas, Ph.D. (Fordham University, New York City), Clinical Assistant Professor of Social Work

Friedmann, Robert R., Ph.D. (University of Minnesota), Professor Emeritus of Criminal Justice and Criminology and Director of the Georgia International Law Enforcement Exchange (GILEE) Program

Frost, Shelby, Ph.D. (University of Colorado, Boulder), Clinical Associate Professor of Economics

Gibson, John David, Ph.D. (Florida State University), Assistant Professor of Economics

Glass, Amy, Ph.D. (Brandeis University), Visiting Academic Professional of Social Work

Gurmu, Shiferaw, Ph.D. (Indiana University), Professor of Economics
Hacker, Joseph F., Ph.D. (University of Pennsylvania), Clinical Assistant Professor of Public Management and Policy and Director of the Undergraduate Program

Hansen, Carol D., Ph.D. (University of North Carolina, Chapel Hill), Associate Professor Emerita of Public Management and Policy and Member of the W. T. Beebe Institute of Personnel and Employment Relations

Hartinger-Saunders, Robin, Ph.D. (The State University of New York at Buffalo), Assistant Professor of Social Work

Heaghney, Jr., Kenneth, Ph.D. (Rice University), Research Professor of Economics

Hildreth, W. Bartley, Ph.D. (University of Georgia), Professor of Public Management and Policy

Hinkle, Joshua, Ph.D. (University of Maryland), Assistant Professor of Criminal Justice and Criminology

Hirsch, Barry, Ph.D. (University of Virginia), Professor of Economics and W. J. Usery, Jr. Chair of the American Workplace

Hotchkiss, Julie L., Ph.D. (Cornell University), Adjunct Professor of Economics

Ivery, Jan, Ph.D. (Virginia Commonwealth University), Associate Professor of Social Work

Jacques, Scott Thomas, Ph.D. (University of Missouri, St. Louis), Assistant Professor of Criminal Justice and Criminology

Johnson, Cyntoria, J.D. (Florida Coastal School of Law), Clinical Instructor of Criminal Justice and Criminology

Kahnweiler, William M., Ph.D. (Florida State University), Associate Professor of Public Management and Policy and Member of the W. T. Beebe Institute of Personnel and Employment Relations

Kaufman, Bruce E., Ph.D. (University of Wisconsin), Professor of Economics

Kerlin, Janelle A., Ph.D. (Syracuse University), Associate Professor of Public Management and Policy

Klausner, Debra, M.S.W. (University of Georgia), Visiting Clinical Instructor of Social Work

Kropf, Nancy P., Ph.D. (Virginia Commonwealth University), Associate Dean of the Andrew Young School of Policy Studies and Professor of Social Work

Laury, Susan K., Ph.D. (Indiana University), Associate Professor of Economics

Lecy, Jesse Daniel, Ph.D. (Syracuse University), Assistant Professor of Public Management and Policy

Lewinson, Terri, Ph.D. (University of Georgia), Assistant Professor of Social Work
Lewis, Gregory, Ph.D. (Syracuse University), Chair and Professor of Public Management and Policy

Liddie-Hamilton, Bernice W., D.S.W. (Fordham University), Clinical Associate Professor of Social Work and Director of Field Education

Ligon, Jan H., Ph.D. (University of Georgia), Associate Professor of Social Work

Littrell, Jill, Ph.D. (Arizona State University), Associate Professor of Social Work

Liu, Cathy Yang, Ph.D. (University of Southern California), Assistant Professor of Public Management and Policy

Luger, Richard P., Ph.D. (Universite de Montreal), Associate Professor of Risk Management Insurance and Economics

Lyons, Peter, Ph.D. (The State University of New York at Buffalo), Professor of Social Work and Associate Provost for Institutional Effectiveness

Mangum, Kyle Douglas, Ph.D. (Duke University), Assistant Professor of Economics

Manns, Edith Kelley, Ed.D. (University of Virginia, Charlottesville), Associate Professor Emerita of Public Management and Policy

Mansfield, Jon L., Ph.D. (Georgia State University), Clinical Associate Professor of Economics

Martin, James Francis, LL.M. (University of Georgia), Visiting Instructor of Public Management and Policy

Martinez-Vazquez, Jorge L., Ph.D. (Washington University), Regents’ Professor of Economics and Director of the International Center for Public Policy

Marton, James, Ph.D. (Washington University), Associate Professor of Economics

McEntire, Ranee Joy, Ph.D. (Florida State University), Visiting Instructor of Criminal Justice and Criminology

Mescon, Michael H., Ph.D. (New York University), Dean Emeritus of the Andrew Young School of Policy Studies and Regents’ Professor Emeritus of Economics

Minyard, Karen J., Ph.D. (Georgia State University), Director of the Georgia Health Policy Center and Research Associate Professor of Public Management and Policy

Moore, Robert E., Ph.D. (Cornell University), Associate Professor of Economics

Newman, Harvey K., Ph.D. (Emory University), Professor Emeritus of Public Management and Policy

Nguimkeu, Nguedia Pierre, Ph.D. (Simon Fraser University), Assistant Professor of Economics
Nigro, Lloyd G., Ph.D. (University of Southern California), Professor Emeritus of Public Management and Policy

Noonan, Douglas S., Ph.D. (The University of Chicago), Adjunct Associate Professor of Economics

O, Grace, Ph.D. (University of Kansas), Clinical Assistant Professor of Economics

Ohmer, Mary, Ph.D. (University of Pittsburgh), Associate Professor of Social Work

O’Kane, John, M.S.W. (Washington University at St. Louis), Visiting Professor of Practice of Public Management and Policy

Overton, Angela L., M.S.C.J. (The University of Tennessee at Chattanooga), Clinical Assistant Professor of Criminal Justice and Criminology

Parko, Jr., Joseph Edward, M.B.A. (Georgia State University), Assistant Professor Emeritus of Public Management and Policy

Patrick, Carlianne, Ph.D. (The Ohio State University), Assistant Professor of Economics

Patton, Carl V., Ph.D. (University of California, Berkeley), President Emeritus of Georgia State University, Professor of Public Management and Policy and Professor of Geosciences

Poister, Theodore H., Ph.D. (Syracuse University), Professor of Public Management and Policy

Price, Michael K., Ph.D. (University of Maryland at College Park), Associate Professor of Economics

Pridemore, William Alex, Ph.D. (State University of New York at Albany), Distinguished University Professor of Criminal Justice and Criminology

Ratajczak, Donald, Ph.D. (Massachusetts Institute of Technology), Regents’ Professor Emeritus of Economics

Ray, Barbara Jean, Ph.D. (Emory University), Associate Professor Emerita of Public Management and Policy

Reed, Mark D., Ph.D. (The State University of New York at Albany), Associate Professor of Criminal Justice and Criminology

Resiandini, Pramesti, Ph.D. (Auburn University), Visiting Assistant Professor of Economics

Rider, Mark, Ph.D. (Georgia State University), Associate Professor of Economics

Rioja, Felix K., Ph.D. (Arizona State University), Associate Professor of Economics

Roch, Christine H., Ph.D. (The State University of New York at Stony Brook), Associate Professor of Public Management and Policy and Director of Ph.D. Programs in Public Policy
Ross, II, Glenwood, Ph.D. (Georgia State University), Clinical Associate Professor of Economics

Anderson, Page L., Ph.D. (University of Georgia), Associate Professor of Psychology

Aneja, Ritu, Ph.D. (University of Delhi), Professor of Biology

Angryk, Rafal, Ph.D. (Tulane University), Associate Professor of Computer Science

Apalkov, Vadym M., Ph.D. (University of Utah), Professor of Physics and Astronomy
Arav, Marina, Ph.D. (Technion-Israel Institute of Technology), Associate Professor of Mathematics and Statistics

Armistead, Lisa, Ph.D. (University of Georgia), Distinguished University Professor of Psychology and Associate Provost for Graduate Programs

Armstrong, David, Ph.D. (XXX), Clinical Assistant Professor of Communication

Arsenault, Amelia, Ph.D. (University of Southern California), Assistant Professor of Communication

Armstrong, David, M.A. (University of Texas-Arlington), Lecturer of Communication

Atkinson, Nathan, Ph.D. (Carnegie Mellon), Assistant Professor of Communication

Attanasio, Roberta, D.Res. (University of Rome), Associate Professor of Biology

Avart, Christian, Ph.D. (Emory University), Senior Lecturer of Mathematics and Statistics

Babaie, Hassan A., Ph.D. (Northwestern University), Associate Professor of Geosciences and Computer Science

Baker, H. Robert, Ph.D. (University of California, Los Angeles), Associate Professor of History

Baker, Jan, D.M. (Northwestern University), Assistant Professor of Music

Ball, Mary, Ph.D. (Georgia State University), Associate Research Professor of Gerontology

Barker, Jennifer, Ph.D. (University of California at Los Angeles), Associate Professor of Communication

Baro, Deborah, Ph.D. (University of Illinois), Professor of Biology and Neuroscience

Baron, Fabien, Ph.D. (University of Paris), Assistant Professor of Physics and Astronomy

Barouch, Timothy, Ph.D. (Northwestern University), Assistant Professor of Communication

Barthlow, Douglas, Ph.D. (University of Georgia), Senior Lecturer of Communication

Barzegar, Abbas, Ph.D. (Emory University), Assistant Professor of Religious Studies

Bascomb, Lia, Ph.D. (University of California, Berkeley), Assistant Professor of African-American Studies

Bassett, Molly, Ph.D. (University of California), Associate Professor of Religious Studies

Baumstark, Alfons L., Ph.D. (Harvard University), Professor of Chemistry

Baumstark, Barbara R., Ph.D. (Massachusetts Institute of Technology), Professor of Biology
Becker, Mark P., Ph.D. (Pennsylvania State University), Professor of Mathematics and Statistics and President

Beirne, Mark, M.D. (St. Louis University School of Medicine), Lecturer of Biology

Belcher, Diane D., Ph.D. (Ohio State University), Professor and Chair of the Department of Applied Linguistics and English as a Second Language

Belkasim, Saeid, Ph.D. (University of Windsor), Associate Professor of Computer Science and Neuroscience

Bell, David M., Ph.D. (Emory University), Senior Lecturer of Religious Studies

Bellon, Joseph, Ph.D. (University of Georgia), Senior Lecturer of Communication

Belykh, Igor, Ph.D. (University of Nizhny Novgorod, Russia), Associate Professor of Mathematics and Statistics and Neuroscience

Benson, Charlie Garnett, Ph.D. (Emory University), Assistant Professor of Biology

Bentz, Misty, Ph.D. (Ohio State University), Assistant Professor of Physics and Astronomy

Beran, Michael, Ph.D. (Georgia State University), Associate Professor of Psychology

Berg, Louis-Alexandre, Ph.D. (Georgetown University), Assistant Professor of Global Studies

Berman, Larry, Ph.D. (Princeton University), Professor of Political Science and Dean of the Honors College

Bermudez, Maria Elena, Ph.D. (University of Georgia), Senior Lecturer of World Languages and Cultures

Berry, Jessica N., Ph.D. (University of Texas, Austin), Associate Professor of Philosophy

Besalyan, Raffi, D.M.A. (Yerevan Komitas State Conservatory), Assistant Professor of Music

Bhola, Jaman, M.S. (Georgia State University), Instructor of Computer Science

Black, Michael, Ph.D. (Georgia State University), Lecturer of Neuroscience

Black, Steven Ph.D. (University of California, Los Angeles), Assistant Professor of Anthropology

Blaustein, David, Ph.D. (Georgia State University), Senior Academic Professional of Biology

Bloom, Mia, Ph.D. (Princeton University), Professor of Communication

Blumi, Isa, Ph.D. (New York University), Associate Professor of History
Bolia, Ly, M.F.A. (New York University), Associate Professor of Communication

Bolsen, Toby, Ph.D. (Northwestern University), Assistant Professor of Political Science

Bondarenko, Vladimir, Ph.D. (M. V. Lomonsov Moscow State University), Associate Professor of Mathematics and Statistics

Bonnette, Lakeyta, Ph.D. (Ohio State University), Assistant Professor of Political Science

Boortz, Jeffrey, M.F.A. (University of Southern California), Assistant Professor of Art and Design

Borek, Lois, Ed.S. (Liberty University), Senior Lecturer of Biology

Bottoms, David, Ph.D. (Florida State University), Professor of English, and Amos Distinguished Chair in English Letters

Bourgeois, Anu, Ph.D. (Louisiana State University), Associate Professor of Computer Science

Branum-Martin, Lee, Ph.D. (University of Houston), Associate Professor of Psychology

Brattain, Michelle, Ph.D. (Rutgers State University), Associate Professor and Chair of the Department of History

Brazas, Jeremy, Ph.D. (University of New Hampshire), Lecturer of Mathematics and Statistics

Brewer, Matthew, Ph.D. (University of Wisconsin), Senior Academic Professional of Biology

Bricker, Meredith, M.A. (Georgia State University), Lecturer of Applied Linguistics and English as a Second Language

Brinton, Margo A., Ph.D. (University of Pennsylvania), Regents’ Professor of Biology

Brooks, Jody, M.F.A. (Georgia State University), Senior Lecturer of English

Brooks, Josh, Ph.D. (Capella University), Professor of Military Science

Brosnan, Sarah F., Ph.D. (Emory University), Associate Professor of Psychology, Neuroscience, and Philosophy

Brown, Chris, Ph.D. (University of Georgia), Lecturer of Political Science

Brown, Murray L., Ph.D. (University of Nebraska, Lincoln), Associate Professor of English

Bruner, Michael L., Ph.D. (University of Washington), Professor of Communication

Bunting, John, Ph.D. (Georgia State University), Senior Lecturer of Applied Linguistics and English as a Second Language
Burgess, Elisabeth, Ph.D. (University of Southern California), Associate Professor of Sociology and Director of the Gerontology Institute

Burmester, Elizabeth T., Ph.D. (University of Illinois, Chicago), Associate Professor of English

Burnet, Jennie, Ph.D. (University of North Carolina-Chapel Hill), Associate Professor of Global Studies

Burns, Robert, Ph.D. (Georgia State University), Senior Lecturer of English

Burrison, John A., Ph.D. (University of Pennsylvania), Regents’ Professor of English

Cai, Zhipeng, Ph.D. (University of Alberta), Assistant Professor of Computer Science

Caison, Gina, Ph.D. (University of California, Davis), Assistant Professor of English

Caldwell, Tanya, Ph.D. (University of Toronto), Professor of English

Calhoun-Brown, Allison, Ph.D. (Emory University), Associate Professor of Political Science and Assistant Vice President for Student Retention

Camacho, Alison, M.A. (Georgia State University), Lecturer of Applied Linguistics and English as a Second Language

Campbell, Ian, Ph.D. (Emory University), Associate Professor of World Languages and Cultures

Cao, Xiajun, Ph.D. (State University of New York, Buffalo), Associate Professor of Computer Science

Caporino, Nicole, Ph.D. (University of South Florida), Assistant Professor of Psychology

Carey, Henry F., Ph.D. (Columbia University), Associate Professor of Political Science

Carlin, Ryan, Ph.D. (University of North Carolina, Chapel Hill), Associate Professor of Political Science

Carlisle, Joanna Katie, Ph.D. (University of Toronto), Associate Professor of Music

Carlson, Daniel L, Ph.D. (Ohio State University), Assistant Professor of Sociology

Carruth, Laura, Ph.D. (University of Colorado, Boulder), Associate Professor of Neuroscience and Biology

Carter, Marva, Ph.D. (University of Illinois at Urbana), Associate Professor of Music

Cash, Annette, Ph.D. (Ohio State University), Senior Lecturer of World Languages and Cultures

Cavusgil, Sharon, M.A. (Michigan State University), Senior Lecturer of Applied Linguistics and English as a Second Language

Chan, Wing Yi, Ph.D. (University of Illinois), Assistant Professor of Psychology
Chapman, Rebekah, Ph.D. (University of Georgia), Senior Lecturer of Biology

Chen, Guantao, Ph.D. (University of Memphis), Distinguished University Professor and Chair of the Department of Mathematics and Statistics

Chen, Yanyi, Ph.D. (Georgia State University), Academic Professional of Chemistry

Cheshier, David, Ph.D. (University of Iowa), Associate Professor and Director of the Creative Media Industries Institute

Chin, Kuk Jeong, Ph.D. (University of Konstanz), Associate Professor of Biology

China, Chrystal, Ph.D. (XXX), Lecturer of Communication

Chou, Rosalind, Ph.D. (Texas A&M University), Assistant Professor of Sociology

Christie, Eddie, Ph.D. (West Virginia University), Associate Professor of English

Clarkson, Marsha G., Ph.D. (University of Florida), Associate Professor of Psychology

Clement, Richard, M.M. (Cincinnati-College Conservatory of Music), Associate Professor of Music

Cleveland, Kimberly, Ph.D. (University of Iowa), Associate Professor of Art and Design

Cohen, Andrew J., Ph.D. (Georgetown University), Associate Professor of Philosophy

Cohen, Lindsey L., Ph.D. (University of Georgia), Professor of Psychology

Cohen, Rachelle, J., Ph.D. (University of Georgia), Senior Lecturer of Psychology

Coleman, W. Dwight, M.M. (Northwestern University), Professor of Music

Collins, C. Brennan, Ph.D. (Georgia State University), Senior Academic Professional of English

Conner, Robin, Ph.D. (Emory University), Senior Lecturer of History

Connors, Megan, Ph.D. (SUNY-Stony Brook), Assistant Professor of Physics and Astronomy

Conway, Christopher, Ph.D. (Cornell University), Associate Professor of Psychology

Combs, Joshua, M.S. (Eastern Kentucky University), Assistant Professor of Military Science

Cook, Sarah, Ph.D. (University of Virginia), Professor of Psychology and Associate Dean for the Honors College
Cortes, Viviana, Ph.D. (Northern Arizona University), Associate Professor of Applied Linguistics and English as a Second Language

Cox, Daniel, Ph.D. (Duke University), Associate Professor of Neuroscience

Cox, Edward T., Ph.D. (University of Oklahoma), Senior Lecturer of Philosophy

Crenshaw, D. Michael, Ph.D. (Ohio State University), Professor and Chair of the Department of Physics and Astronomy

Crooks, Ryan, MA (Georgia Tech.), Assistant Professor of Art and Design

Crossley, Scott, Ph.D. (University of Memphis), Associate Professor of Applied Linguistics and English as a Second Language

Crow, Sidney A., Jr., Ph.D. (Louisiana State University), Professor of Biology, Director of the Center for Environmental Research

Cruz, Francisco, Ph.D. (Pennsylvania State University), Senior Academic Professional of Biology

Cui, Jainmei, Ph.D. (Chinese Academy of Medical Sciences), Academic Professional of Chemistry

Cummings, Alexander, Ph.D. (Columbia University), Assistant Professor of History

Cymbalyuk, Gennady, Ph.D. (Moscow State University, Russia), Associate Professor of Neuroscience and Physics and Astronomy

Dahl, Lara, D.M.A. (Arizona State University), Senior Lecturer of Music

Dai, Dajun, Ph.D. (Southern Illinois University), Associate Professor of Geosciences and Public Health

Darnell, Kim, Ph.D. (Ohio State University), Senior Lecturer of Psychology

Darsey, James F., Ph.D. (University of Wisconsin, Madison), Associate Professor of Communication

Davenport, Melanie G., Ph.D. (Indiana University), Associate Professor of Art and Design

Davidson, Denise, Ph.D. (University of Pennsylvania), Professor of History

Davis, Marni E., Ph.D. (Emory University), Associate Professor of History

Davis, Patricia, Ph.D. (University of California-San Diego), Assistant Professor of Communication

Davis, Sarita, Ph.D. (Cornell University), Associate Professor of African-American Studies

Davis, Tomeka, Ph.D. (Emory University), Assistant Professor of Sociology
De Vries, Geert, Ph.D. (University of Amsterdam), Professor and Director of the Neuroscience Institute
Decker, John R., Ph.D. (University of California, Santa Barbara), Associate Professor of Art and Design
Decoster, Clifford, B.S. (East Tennessee State University), Assistant Professor of Military Science
del Rio Parra, Elena, Ph.D. (Brown University), Professor of World Languages and Cultures
Demos, Nickitas, D.M.A. (Cleveland Institute of Music and Case Western Reserve University), Professor of Music
Denzel de Tirado, Heidi, Ph.D. (Saarlandes University), Assistant Professor of World Languages and Cultures
Deocampo, Daniel M., Ph.D. (Rutgers University), Associate Professor and Chair of Geosciences
Derby, Charles D., Ph.D. (Boston University), Regents’ Professor of Neuroscience and Biology
Dhamala, Mukesh, Ph.D. (University of Kansas), Associate Professor of Physics and Astronomy and Neuroscience
Diem, Jeremy E., Ph.D. (University of Arizona, Tucson), Associate Professor of Geosciences
Dietz, Nikolaus, Ph.D. (Technical University Berlin), Professor of Physics and Astronomy
Dix, Richard D., Ph.D. (Baylor College of Medicine), Professor of Biology and Neuroscience
Dixon, Dabney W., Ph.D. (Massachusetts Institute of Technology), Professor of Chemistry
Dixon, Patricia, Ph.D. (Temple University), Associate Professor of African-American Studies
Dobranski, Stephen B., Ph.D. (University of Texas, Austin), Distinguished University Professor of English
Doluweera, Sumith, Ph.D. (University of Cincinnati), Senior Lecturer of Physics and Astronomy
Dongoski, Craig, M.F.A. (University of South Dakota), Professor of Art and Design
Downs, William E., MA (Maryland Institute College), Lecturer of Art and Design
Drennen, Craig, M.F.A. (Ohio University), Associate Professor of Art and Design
Duffield, John S., Ph.D. (Princeton University), Professor of Political Science
Dwyer, Sandra, Ph.D. (Emory University), Senior Lecturer of Philosophy
Eckert, Lindsey, Ph.D. (University of Toronto), Assistant Professor of English
Edmundson, William, Ph.D. (University of California-Berkeley), Regents’ Professor of Law and Philosophy

Edwards, Donald H., Jr., Ph.D. (Yale University), Regents’ Professor of Neuroscience, Biology, and Physics and Astronomy

Eichenbaum, Zehava, Ph.D. (Weizmann Institute of Science, Rehovot, Israel), Associate Professor of Biology

Eilertson, Carmen, Ph.D. (North Dakota State University), Senior Lecturer of Biology

Elliott, W. Crawford, Ph.D. (Case Western Reserve University), Associate Professor of Geosciences

El-Mayas, Hanan, Ph.D. (University of East Anglia, England), Senior Lecturer of Biology

Enescu, Florian, Ph.D. (University of Michigan, Ann Arbor), Professor of Mathematics and Statistics

Esaki, Brett, Ph.D. (University of California- Santa Barbara), Assistant Professor of Religious Studies

Eskew, Glenn, Ph.D. (University of Georgia), Professor of History

Evans, John, Ph.D. (Georgia State University), Senior Lecturer of Physics and Astronomy

Evans, Michael, Ph.D. (University of Maryland), Assistant Professor of Political Science

Fang, Ning, Ph.D. (University of British Columbia), Assistant Research Professor of Chemistry

Fanoe, Andrew, Ph.D. (Columbia University), Lecturer of Mathematics and Statistics

Farnell, Cynthia, M.F.A. (Rhode Island School of Design); Senior Academic Professional of Art and Design

Faye, Ph.D. (Indiana University), Assistant Professor of World Languages and Cultures

Feit, Mario, Ph.D. (Johns Hopkins University), Associate Professor of Political Science

Fernández-L’Hoeste, Héctor, Ph.D. (State University of New York, Stony Brook), Professor of World Languages and Cultures and Director of the Center for Latin American and Latino/a Studies

Fernando, Nilmi, Ph.D. (Georgia State University), Lecturer of Chemistry

Finnegan, Steffan, Ph.D. (Georgia State University), Lecturer of Chemistry

Firat Hines, Rengin, Ph.D. (University of Iowa), Assistant Professor of Global Studies

Fix, Michael, Ph.D. (University of South Carolina), Assistant Professor of Political Science
Fletcher, Ian C., Ph.D. (Johns Hopkins University), Associate Professor of History

Flowers, Timothy R., M.F.A. (Rhode Island School of Design), Senior Lecturer of Art and Design

Floyd, Nancy, M.F.A. (California Institute of the Arts), Professor of Art and Design

Forger, Nancy, Ph.D. (University of California, Berkeley), Professor of Neuroscience

Frakenpohl, David, M.M. (University of North Texas), Instructor of Music

Francis, Gladys, Ph.D. (Purdue University), Assistant Professor of World Languages and Cultures

Frank, Jill, M.F.A. (School of the Art Institute of Chicago), Lecturer of Art and Design

Franklin, Daniel P., Ph.D. (University of Texas, Austin), Associate Professor of Political Science

Frantz, Kyle, J., Ph.D. (University of Florida), Professor of Neuroscience and Biology

Freeman, Carroll, M.P.A. (Oklahoma City University), Professor of Music

Freeman Pascal, Kay, M.P.A. (Oklahoma City University), Lecturer of Music

Freer, Patrick K., Ed.D. (Columbia University), Professor of Music

Friedman, Edward, Ph.D. (Duke University), Associate Professor of Communication

Frigional, Eric, Ph.D. (Northern Arizona University), Associate Professor of Applied Linguistics and English as a Second Language and College of Arts and Sciences International Programs Director

Frishkoff, Gwen, Ph.D. (University of Oregon), Assistant Professor of Psychology and Neuroscience

Fromherz, Allen., Ph.D. (University of St. Andrews), Associate Professor of History

Fujioka, Yuki, Ph.D. (Washington State University), Associate Professor of Communication

Fuller, Harcourt, Ph.D. (London School of Economics), Assistant Professor of History

Gabler-Hover, Janet, Ph.D. (Ohio State University), Professor of English

Gadda, Giovanni, Ph.D. (University of Milan, Milan, Italy), Distinguished University Professor of Chemistry

Gaillet, Lynée Lewis, Ph.D. (Texas Christian University), Professor and chair of the Department of English

Gainty, Denis, Ph.D. (University of Pennsylvania), Associate Professor of History
Galchinsky, Michael, Ph.D. (University of California, Berkeley), Professor of English
Galileas, Christos, D.M.A. (State University of New York at Stony Brook), Associate Professor of Music
Gallo, Sergio, D.M.A. (University of California, Santa Barbara), Associate Professor of Music
Gaffield, Julia, Ph.D. (Duke University), Assistant Professor of History
Garfin, Deborah, Ph.D. (University of Minnesota-Twin Cities), Senior Lecturer of Psychology
Garg, Pallavi, Ph.D. (Calcutta University), Assistant Research Professor of Biology
Garrett-Rucks, Paula, Ph.D. (University of Wisconsin, Madison), Assistant Professor of World Languages and Cultures
Gayles, Jonathan, Ph.D. (University of South Florida), Associate Professor of African-American Studies and Associate Provost for Institutional Effectiveness
Gayman, Mathew, Ph.D. (Florida State University), Assistant Professor of Sociology
Gerber, Stuart, D.M.A. (University of Cincinnati), Associate Professor of Music
Germann, Markus W., Ph.D. (University of Calgary), Professor of Chemistry and Neuroscience
Gershon, Sarah, Ph.D. (Arizona State University), Associate Professor of Political Science
Gies, Douglas R., Ph.D. (University of Toronto), Regents’ Professor of Physics and Astronomy
Gilbert, Eric, Ph.D. (University of California, Riverside), Associate Professor of Biology
Gilbert, Ralph, M.F.A. (University of California, Santa Barbara), Professor of Art and Design,
Gindhart, Maria P., Ph.D. (University of Pennsylvania), Associate Professor of Art and Design
Glover, Jeffrey B., Ph.D. (University of California, Riverside), Associate Professor of Anthropology
Gobron, Louise M., M.A. (Georgia State University), Senior Lecturer of Applied Linguistics and English as a Second Language
Goode, Christopher, Ph.D. (University of Washington), Senior Lecturer of Psychology
Goodman, Audrey, Ph.D. (Columbia University), Professor of English
Goulette, Elizabeth, Ph.D. (State University of New York), Lecturer of World Languages and Cultures
Graham, George, Ph.D. (Brandeis University), Professor of Philosophy and Neuroscience
Grant, Kathryn B., Ph.D. (Columbia University), Professor of Chemistry

Greene, Oliver, Ph.D. (Florida State University), Associate Professor of Music

Grindstaff, Davin, Ph.D. (Pennsylvania State University), Senior Lecturer of Communication

Grinshpon, Mark, Ph.D. (Virginia Polytechnic Institute and State University), Senior Lecturer of Mathematics and Statistics

Grober, Matthew, Ph.D. (University of California, Los Angeles), Associate Professor of Biology and Neuroscience

Grubbs, Larry, Ph.D. (University of South Carolina, Columbia, South Carolina), Senior Lecturer of History

Grussendorf, Jeannie, Ph.D. (Bradford University, UK), Senior Lecturer of Political Science

Gu, Baotong, Ph.D. (Purdue University), Associate Professor of English and Director of the Confucius Institute

Guano, Emanuela, Ph.D. (University of Texas, Austin), Associate Professor of Anthropology

Gunhouse, W. Glenn, Ph.D. (John Hopkins University), Senior Lecturer of Art and Design

Gyllys, Beth, Ph.D. (University of Cincinnati), Professor of English

Hall, Frank J., Ph.D. (North Carolina State University), Professor of Mathematics and Statistics

Hall, Jennifer, Ph.D. (Georgia State University), Senior Academic Professional of English

Hall-Godsey, Angela, Ph.D. (Georgia State University), Senior Lecturer of English

Hamelberg, Donald, Ph.D. (Georgia State University), Associate Professor of Chemistry

Hankins, Katherine B., Ph.D. (University of Georgia), Associate Professor of Geosciences

Hankla, Charles, Ph.D. (Emory University), Associate Professor of Political Science

Harden, Donald, M.S. (Georgia State University), Instructor of Mathematics and Statistics

Harden, Jeremiah, Ph.D. (University of Tennessee), Lecturer of Chemistry

Harker, Michael, Ph.D. (Ohio State University), Assistant Professor of English

Harrison, Robert, Ph.D. (Yale University), Professor of Computer Science and Biology

Hartgrove, Mary Kathryn, M.M. (University of North Carolina, Greensboro), Associate Professor of
Music

Hartley, Christie J., Ph.D. (University of Michigan), Associate Professor of Philosophy

Hastings, Gary, Ph.D. (Imperial College of Science and Technology), Professor of Physics and Astronomy

Haydon, Geoffrey, D.M.A. (University of Texas-Austin), Professor of Music

Haynie, Stephanie, Ph.D. (Georgia Institute of Technology), Assistant Professor of Art and Design

He, Xiaochun, Ph.D. (University of Tennessee), Distinguished University Professor of Physics and Astronomy

Heath, R. Scott, Ph.D. (University of Michigan), Assistant Professor of English

Henary, Maged, Ph.D. (Georgia State University), Assistant Professor of Chemistry

Henrich, Christopher, Ph.D. (Yale University), Professor and Chair of the Department of Psychology

Henry, Louis, M.S. (University of Maryland), Instructor of Computer Science

Henry, Todd, Ph.D. (University of Arizona), Distinguished University Professor of Physics and Astronomy

Herb, Michael, Ph.D. (University of California, Los Angeles), Professor of Political Science

Herman, Jonathan, Ph.D. (Harvard University), Associate Professor of Religious Studies

Hidalgo, Paulo, Ph.D. (Michigan State University), Lecturer of Geosciences

Hill, Rashon, Senior Military Science Instructor

Hilliard, Julia, Ph.D. (Baylor College of Medicine), Professor of Biology and Neuroscience, Eminent Scholar in Molecular Genetics, and Director of the Viral Immunology Center

Hirsh, James, Ph.D. (University of Washington), Professor of English

Hobson, Maurice, Ph.D. (University of Alabama), Assistant Professor of African-American Studies

Hocks, Mary E., Ph.D. (University of Illinois, Urbana-Champaign), Associate Professor of English

Hoffner, Cynthia, Ph.D. (University of Wisconsin-Madison), Professor of Communication

Holman, John, Ph.D. (University of Southern Mississippi), Professor of English

Holmes, Ashley, Ph.D. (University of Arizona), Assistant Professor of English
Holmes, Shirlene, Ph.D. (Southern Illinois University), Associate Professor of Communication

Hopkins, William, Ph.D. (Georgia State University), Professor of Neuroscience

Horgan, John, Ph.D. (University College Cork, Ireland), Professor of Global Studies

Houghton, John E., Ph.D. (Texas A&M University), Associate Professor of Biology

Howard, Robert M., Ph.D. (State University of New York, Stony Brook), Professor of Political Science

Hsieh, Kevin, Ph.D. (Pennsylvania State University), Associate Professor of Art and Design

Hu, Xiaoling, Ph.D. (University of Arizona), Associate Professor of Computer Science

Huang, Zhen, Ph.D. (Swiss Federal Institute of Technology, Switzerland), Professor of Chemistry

Huff, Robin Y., Ph.D. (Emory University), Senior Lecturer of World Languages and Cultures

Huhman, Kim, Ph.D. (University of Georgia), Distinguished University Professor of Neuroscience and Psychology

Ivanov, Ivaylo, Ph.D. (The Scripps Research Institute), Associate Professor of Chemistry

Jacobson, Stephen, Ph.D. (University of Michigan, Ann Arbor), Senior Lecturer of Philosophy

Jarmakani, Amira J., Ph.D. (Emory University), Associate Professor and Director of the Institute for Women’s, Gender, and Sexuality Studies

Jefferies, Stuart, Ph.D. (University of London), Professor of Physics and Astronomy

Jiang, Chun, Ph.D. (Shanghai Brain Research Institute), Professor of Biology and Neuroscience

Jiang, Yi, Ph.D. (University of Notre Dame), Associate Professor of Mathematics and Statistics

Johnson, Casyonya, Ph.D. (Johns Hopkins University), Associate Professor of Biology

Jones, Jessica, M.F.A. (East Tennessee State University), Assistant Professor of Art and Design

Jones, Steve, M.S. (Boston University), Instructor of Music

Joseph, Deanna, D.M.A. (Eastman School of Music), Assistant Professor of Music

Joseph, Sheri L., Ph.D. (University of Georgia), Professor of English

Judson, Robert, (University of Central Florida), Professor of Practice, Communication

Kabengi, Nadine, Ph.D. (University of Florida), Assistant Professor of Geosciences and Chemistry
Kail, Benjamin L., Ph.D. (Florida State University), Assistant Professor of Sociology

Katz, Paul, Ph.D. (Cornell University), Distinguished University Professor of Neuroscience and Biology and Director of the Center for Neuromics

Kaur, Parjit, Ph.D. (Panjab University, India), Professor of Biology

Keatley, Richard E., Ph.D. (Yale University), Assistant Professor of World Languages and Cultures

Kegley, Sarah, M.A. (Georgia State University), Lecturer of Applied Linguistics and English as a Second Language

Kemp, Candace, Ph.D. (McMaster University), Associate Professor of Gerontology

Kennedy, G. Davon, Ph.D. (Emory University), Associate Professor of Chemistry

Kerr, Tracy, Ph.D. (XXX), Lecturer of Chemistry

Kiage, Lawrence M., Ph.D. (Louisiana State University), Associate Professor of Geosciences

Kim, Jung, Ph.D. (Georgia State University), Senior Lecturer of Sociology

Kim, YouJin, Ph.D. (Northern Arizona University), Associate Professor of Applied Linguistics and English as a Second Language

King, Tiffany, Ph.D. (University of Maryland, College Park), Assistant Professor of Women’s, Gender, and Sexuality Studies

King, Tricia Zawacki, Ph.D. (University of Florida), Associate Professor of Psychology and Neuroscience

Kleider-Offutt, Heather M., Ph.D. (Arizona State University), Associate Professor of Psychology and Neuroscience

Kocela, Christopher P., Ph.D. (McGill University), Associate Professor of English

Konrad, Miriam, Ph.D. (Georgia State University), Senior Lecturer of Sociology

Kozaitis, Kathryn A., Ph.D. (University of Michigan, Ann Arbor), Associate Professor and Chair of the Department of Anthropology

Kozhanov, Alexander, Ph.D. (Moscow State University), Assistant Professor of Physics and Astronomy

Kubala, Juliana, Ph.D. (Emory University), Senior Lecturer of Women’s, Gender, and Sexuality Studies

Kuperminc, Gabriel, Ph.D. (University of Virginia), Professor of Psychology

Kuzio de Naray, Rachel, Ph.D. (University of Maryland), Assistant Professor of Physics and Astronomy
Lamoreaux, Marika, Ph.D. (University of Delaware), Senior Lecturer of Psychology

Larou, Hamed, Ph.D. (University Henri Poincare of Nancy), Assistant Professor of Chemistry

Larsson, L. Margareta, M.S. (Georgia State University), Senior Lecturer of Applied Linguistics and English as a Second Language

Latif, Nadia, Ph.D. (Columbia University), Assistant Professor of Religious Studies

Latzman, Robert, Ph.D. (University of Iowa), Assistant Professor of Psychology

Laub, Richard, M.P. (University of Virginia), Senior Lecturer of History and Director of the Heritage Preservation Program

Lazarus, Jeffrey, L., Ph.D. (University of California, San Diego), Associate Professor of Political Science

Le Calvez, Eric J., Ph.D. (University of Paris, III), Professor of World Languages and Cultures

LeCroix, Brian, Ph.D. (University of Tennessee- Knoxville), Lecturer of Chemistry

Lemieux, Anthony, Ph.D. (University of Connecticut), Associate Professor of Communication

Lepine, Sebastien, Ph.D. (University of Montreal), Associate Professor of Physics and Astronomy

Lewis, Phillip, Ph.D. (Queensland University of Technology), Professor of Communication

Li, Shuai, Ph.D. (Carnegie Mellon University), Associate Professor of World Languages and Cultures

Li, Yingshu, Ph.D. (University of Minnesota-Twin Cities), Associate Professor of Computer Science

Li, Zhongshan, Ph.D. (North Carolina State University), Professor of Mathematics and Statistics

Lifshey, Hollie, M.M. (University of Cincinnati), Professor of Music

Light, Sharee, Ph.D. (University of Wisconsin-Madison), Assistant Professor of Psychology

Lightsey, Scott, Ph.D. (University of Delaware), Associate Professor of English

Lim, Jae Hyang, Ph.D. (Chonnam National University), Assistant Professor of Biology

Lindeman, Stephanie, Ph.D. (University of Michigan, Ann Arbor), Associate Professor of Applied Linguistics and English as a Second Language

Lindsay, Peter, Ph.D. (University of Toronto), Associate Professor of Political Science and Philosophy

Lisby, Gregory C., Ph.D. (University of Tennessee, Knoxville), Professor and Chair of the Department of Communication
Liu, Jun, Ph.D. (Ohio State University), Professor of Applied Linguistics and English as a Second Language and Associate Provost for International Initiatives

Liu, Yuan, Ph.D. (University of South Alabama), Professor of Biology

Liu, Zhi-Ren, Ph.D. (Florida State University), Professor of Biology

Livingston, Arletha, Ph.D. (Temple University), Assistant Professor of African-American Studies

Llorente, Raul, Ph.D. (Universidad de Valladolid)), Lecturer of World Languages and Cultures

Locke, Douglas, B.A. (The Citadel), Assistant Professor of Military Science

Long, Kenneth A., D.M.A. (State University of New York, Stony Brook), Associate Professor of Music

Long, William, Ph.D. (Columbia University), J.D. (Georgetown University), Professor of Political Science

Longobardi, Pam, M.F.A. (Montana State University), Distinguished University Professor of Art and Design

Lopez, Elizabeth, Ph.D. (Purdue University), Associate Professor of English

Lou, Ming, Ph.D. (Purdue University), Professor of Chemistry

Maamoun, Eman, (XXX), Instructor of World Languages and Cultures

Malamud, Randy, Ph.D. (Columbia University), Regents’ Professor of English

Malseed, Robert, M.A. (Regent University), Professor of Practice, Communication

Manandhar, Kebina, Ph.D. (Georgia State University), Lecturer of Computer Science

Mani, Ramesh G., Ph.D. (University of Maryland), Professor of Physics and Astronomy

Mann, William, D.M.A. (University of Texas), Assistant Professor of Music

Manning, Carrie, Ph.D. (University of California, Berkeley), Professor and Chair of the Department of Political Science

Manson, Steven Trent, Ph.D. (Columbia University), Regents' Professor of Physics and Astronomy

Mariani, Victoria, Ph.D. (Georgia Institute of Technology), Lecturer of Chemistry

Marsh, Leslie, Ph.D. (University of Michigan), Associate Professor of World Languages and Cultures

Marshall, Amani, Ph.D. (Indiana University), Lecturer of History
Marshall, Daniel, M.F.A. (Georgia State University), Senior Lecturer of English
Marshall, Peter, D.M.A. (Yale University), Academic Professional in Music
Martens, Petrus, Ph.D. (Universiteit Utrecht), Professor of Physics and Astronomy
Masuda, Akihiko, Ph.D. (University of Nevada-Reno), Associate Professor of Psychology
Maxwell Clements, Tania, B.A. (Royal Scottish Academy of Music and Drama), Senior Lecturer in Music
Maxwell, Robert A., Ph.D. (Georgia State University), Senior Academic Professional in Biology
Mazzotta, Mizuki, M.A. (McGill University), Instructor of World Languages and Cultures
McClymond, Kathryn, Ph.D. (University of California, Santa Barbara), Professor and Chair of the Department of Religious Studies
McCoy, Jennifer, Ph.D. (University of Minnesota), Distinguished University Professor of Political Science and Global Studies; Director of the Global Studies Institute
McEdwards, Colleen, Ph.D. (Northcentral University), Lecturer of Communication
McFarland, Mark J., Ph.D. (University of California-Santa Barbara), Associate Professor of Music
McGimsey, Ben, Ph.D. (University of Florida), Lecturer of Physics and Astronomy
Mchaney, Pearl, Ph.D. (Georgia State University), Professor of English, Director of the Center for Collaborative and International Arts
McLeod, Melissa, Ph.D. (Georgia State University), Senior Lecturer of English
McMillian, John, Ph.D. (Columbia University), Assistant Professor of History
Meadows, Leslie, Ph.D. (Georgia State University), Academic Professional of Mathematics and Statistics
Meyer, Brian, Ph.D. (Georgia State University), Lecturer of Geoscience
Meyers, Marian J., Ph.D. (University of Iowa), Professor of Communication
Millbrandt, Melody, Ph.D. (Florida State University), Professor of Art and Design
Miller, Ben, Ph.D. (Emory University), Assistant Professor of English and Communication
Miller, Frank, Ph.D. (Ohio State University), Senior Lecturer of Communication
Miller, Valerie A., Ph.D. (University of South Carolina, Columbia), Associate Professor of Mathematics and Statistics
Min, Xiaoyi, Ph.D. (University of Missouri), Assistant Professor of Mathematics and Statistics
Mingo, Chivon, Ph.D. (University of South Florida), Assistant Professor of Gerontology
Montiel, Mariana, Ph.D. (University of New Hampshire), Associate Professor of Mathematics and Statistics
Moore, Gregory, Ph.D. (University of Cambridge), Associate Professor of History and Philosophy
Mooring, Suazette, Ph.D. (Georgia State University), Assistant Professor of Chemistry
Moreno, Oscar, Ph.D. (University of Southern California), Senior Lecturer of World Languages and Cultures
Morgan, Jennifer, Ph.D. (University of North Carolina, Chapel Hill), Assistant Professor of Gerontology
Morris, Jamae, Ph.D. (University of South Florida), Assistant Professor of African-American Studies
Morris, Robert D., Ph.D. (University of Florida), Regents’ Professor of Psychology and Educational Psychology and Special Education and Associate Provost for Strategic Initiatives and Innovation
Moulson-Falewicz, Magdalena, M.A. (State College of Music, Warsaw), Senior Lecturer of Music
Moultrie, Monique, Ph.D. (Vanderbilt University), Assistant Professor of Religious Studies
Murphy, Anne Z., Ph.D. (University of Cincinnati), Associate Professor of Neuroscience and Biology
Murphy, John M., Ed.D. (Columbia University), Professor of Applied Linguistics and English as a Second Language
Mutanyatta-Comar, Joan, Ph.D. (University of Botswana/University of Wurzburg), Senior Lecturer of Chemistry
Nadri, Ghulam A., Ph.D. (Leiden University), Associate Professor of History
Nahmias, Edward, Ph.D. (Duke University), Professor of Philosophy and Neuroscience
Naim, S. Rashid, Ph.D. (University of Illinois at Urbana-Champaign), Senior Lecturer of Political Science
Navarro-Eisenstein, Angela, Ph.D. (Georgia State University), Senior Lecturer of Chemistry
Nelson, Gayle L., Ph.D. (University of Minnesota), Professor of Applied Linguistics and English as a Second Language
Nichols, William, Ph.D. (Michigan State University), Associate Professor and Chair of the Department of World Languages and Cultures
Noble, Mark, Ph.D. (Johns Hopkins University), Assistant Professor of English
Nogueira, Ricardo, Ph.D. (Louisiana State University), Lecturer of Geosciences
Norgaard, Martin, Ph.D. (University of Texas, Austin), Assistant Professor of Music
Normandin, Joseph, Ph.D. (Georgia State University), Lecturer of Neuroscience
Norton, Laurah, M.F.A. (Georgia State University), Senior Lecturer of English
Nusnbaum, Matthew, Ph.D. (Georgia State University), Lecturer of Biology
Oakley, Deirdre, Ph.D. (University at Albany, State University of New York), Professor of Sociology
O'Keefe, Timothy S., Ph.D. (University of Texas, Austin), Associate Professor of Philosophy
Oommen, Kavita, Ph.D. (Baylor College of Medicine), Senior Lecturer of Biology
Osan, Remus, Ph.D. (University of Pittsburgh), Assistant Professor of Mathematics and Statistics
Osborn, Christopher, (Georgia State University), Professor of Practice, Communication
Özçaliskan, Seyda, Ph.D. (University of California, Berkeley), Associate Professor of Psychology
Packwood Freeman, Carrie, Ph.D. (University of Oregon), Associate Professor of Communication
Pallas, Sarah, Ph.D. (Cornell University), Professor of Neuroscience and Biology
Palm, Risa, Ph.D. (University of Minnesota), Professor of Geosciences and Senior Vice President for Academic Affairs and Provost
Palmer, Michael D., B.M. (Indiana University), Professor of Music
Pan, Yi, Ph.D. (University of Pittsburgh), Distinguished University Professor of Computer Science; Interim Associate Dean and Chair of Biology
Pangle, Luke, Ph.D. (Oregon State University), Assistant Professor of Geosciences
Papavasiliou, Faidra, Ph.D. (Emory University), Senior Lecturer of Anthropology
Parent, Marise, Ph.D. (University of California, Irvine), Professor of Neuroscience and Psychology
Parilla, Jessica, Ph.D. (University of Florida), Senior Lecturer of Biology
Parks, Samantha, Ph.D. (Georgia Institute of Technology), Lecturer of Biology
Parrott, Dominic, Ph.D. (University of Georgia), Associate Professor of Psychology
Pascoe, Keith, Ph.D. (University of West Indies, Jamaica), Senior Lecturer of Chemistry

Patico, Jennifer, Ph.D. (New York University), Associate Professor of Anthropology

Patonay, Gabor, Ph.D. (Technical University of Budapest), Professor of Chemistry

Peragine, Joseph, M.F.A. (Georgia State University), Associate Professor of Art and Design

Perera, Unil A. G., Ph.D. (University of Pittsburgh), Regents’ Professor of Physics and Astronomy and Neuroscience

Perilla, Julia, Ph.D. (Georgia State University), Academic Professional in Psychology

Perry, Joseph, Ph.D. (University of Illinois), Associate Professor of History

Petrulis, Aras, Ph.D. (Cornell University), Associate Professor of Neuroscience and Psychology

Phillips, Chester, D.M.A. (University of Georgia), Associate Professor of Music

Pierce, George, Ph.D. (Rensselaer Polytechnic Institute), Professor of Biology

Poley, Jared C., Ph.D. (University of California, Los Angeles), Associate Professor of History

Poole, Therese, Ph.D. (University of Wisconsin, Madison), Senior Lecturer of Biology

Poon, Gregory, Ph.D. (University of Toronto), Associate Professor of Chemistry

Powers, Shawn, Ph.D. (University of Southern California), Assistant Professor of Communication

Prasad, Sushil K., Ph.D. (University of Central Florida), Professor of Computer Science and Neuroscience

Presley, Cora, Ph.D. (Stanford University), Associate Professor of African-American Studies Price, Katie, Ph.D. (University of Georgia), Assistant Professor of Geosciences

Pullman, George L., Ph.D. (Rensselaer Polytechnic Institute), Associate Professor of English, Co-Director of the Center for Instructional Innovation

Qi, Xin, Ph.D. (University of Wisconsin, Madison), Assistant Professor of Mathematics and Statistics

Qin, Gengsheng, Ph.D. (Hong Kong University of Science and Technology), Professor of Mathematics and Statistics

Rabinovitch, Gilad, Ph.D. (Eastman School of Music), Assistant Professor of Music

Raengo, Alessandra, Ph.D. (New York University), Associate Professor of Communication

Rainbolt, George W., Ph.D. (University of Arizona), Professor and Chair of the Department of Philosophy
Rajiva, Jay, Ph.D. (University of Toronto), Assistant Professor of English

Ramzy, Rasha, Ph.D. (Georgia State University), Senior Lecturer of Communication

Rand, Sebastian, Ph.D. (Northwestern University), Associate Professor of Philosophy

Ray, Gigi, Ph.D. (Princeton University), Senior Lecturer of Chemistry

Reati, Fernando O., Ph.D. (Washington University, St. Louis), Professor of World Languages and Cultures and Director of the Center for Human Rights and Democracy

Rehder, Vincent, Ph.D. (Free University, Berlin), Professor of Biology and Neuroscience

Reid-Mooring, Ph.D. (Georgia State University), Assistant Professor of Chemistry

Reimann, Kim, Ph.D. (Harvard University), Associate Professor of Political Science and Director of the Asian Studies Center

Reitzes, Donald C., Ph.D. (Indiana University), Professor of Sociology and Associate Dean for Social and Behavioral Sciences

Renick, Timothy M., Ph.D. (Princeton University), Professor of Religious Studies and Vice President for Enrollment Management and Student Success and Vice Provost

Restivo, Angelo, Ph.D. (University of Southern California), Associate Professor of Communication

Reynolds, Douglas R., Ph.D. (Columbia University), Professor of History

Richardson, LeeAnne, Ph.D. (Indiana University), Associate Professor of English

Richey, Sean, Ph.D. (City University of New York), Associate Professor of Political Science

Richmond, Susan, Ph.D. (University of Texas, Austin), Associate Professor of Art and Design

Richtarik, Marilynn J., D.Phil. (Oxford University), Professor of English

Rizzo, Rebecca, Ph.D. (Florida Institute of Technology), Senior Lecturer of Mathematics and Statistics

Robbins, Chandan, Ph.D. (Georgia State University), Academic Professional of Biology

Roberts, James, Ph.D. (Pennsylvania State University), Senior Lecturer of Communication

Robin, Daniel, M.F.A. (San Francisco State University), Associate Professor of Communication

Rodgers, Edmund, Ph.D. (Georgia State University), Lecturer of Biology

Rodrigo, Victoria, Ph.D. (University of Southern California), Associate Professor of World Languages and
Cultures

Rodrigues, Luciana, Ph.D. (State University of Campinas), Lecturer of Communication

Roemer-Weyhofen, Ute, Ph.D. (Leibniz University Hanover), Assistant Professor of Applied Linguistics and English as a Second Language

Rolinson, Mary, Ph.D. (Georgia State University), Senior Lecturer of History

Romski, Mary Ann, Ph.D. (University of Kansas, Lawrence), Regents’ Professor of Communication, Psychology, and Educational Psychology, Special Education & Communication Disorders; Associate Dean for Research and Graduate Studies; and Director of the Center for Research on Atypical Development and Learning

Roseberry, Aaron, Ph.D. (Northwestern University), Assistant Professor of Biology

Ross, Kyla, Ph.D. (Georgia Institute of Technology/Emory University), Senior Academic Professional in Biology

Roudané, Matthew C., Ph.D. (University of Oregon), Regents’ Professor of English

Rouse, Jacqueline A., Ph.D. (Emory University), Associate Professor of History

Ruel, Erin, Ph.D. (University of Illinois, Chicago), Associate Professor of Sociology

Ruprecht, Louis, Jr., Ph.D. (Emory University), Professor of Religious Studies; William M. Suttles Chair of Religious Studies; and Director of the Center for Hellenic Studies

Russell, Joshua T., M.F.A. (Louisiana State University), Professor of English

Ryan, Maura, Ph.D. (University of Florida), Senior Lecturer of Sociology

Safer, Adam, Ph.D. (Florida Institute of Technology), Lecturer of Biology

Sarkar, Sutandra, M.S. (Georgia Institute of Technology), Senior Academic Professional of Mathematics and Statistics

Sarsour, Murad, Ph.D. (University of Houston), Associate Professor of Physics and Astronomy

Scarantino, Andrea, Ph.D. (University of Pittsburgh), Associate Professor of Philosophy and Neuroscience

Schatteman, Renée, Ph.D. (University of Massachusetts), Associate Professor of English

Schiffer, Sheldon, M.F.A. (University of California), Professor of Communication

Schlig, Carmen, Ph.D. (University of Texas, Austin), Associate Professor of World Languages and Cultures
Schmidt, Paul H., Ph.D. (University of Minnesota), Associate Professor of English

Schorpp, Susanne, Ph.D. (University of South Carolina), Assistant Professor of Political Science

Sehat, David, Ph.D. (University of North Carolina, Chapel Hill), Associate Professor of History

Selwood, Jacob, Ph.D. (Duke University), Associate Professor of History

Sevcik, Rose, Ph.D. (Georgia State University), Distinguished University Professor of Psychology and Co-Director of the Research on Challenges to the Acquisition of Language and Literacy Program

Sexton, Megan, Ph.D. (Georgia State University), Academic Professional of English

Shahaf, Sharon, Ph.D. (University of Texas, Austin), Assistant Professor of Communication

Shamsi, Shahab, Ph.D. (Miami University), Professor of Chemistry

Shaner, Jaynette L., Ph.D. (University of Kansas), Associate Professor of Communication

Sharratt, Nicola, Ph.D. (University of Illinois-Chicago), Assistant Professor of Anthropology

Shi, Hang, Ph.D. (University of Tennessee), Assistant Professor of Biology

Shilnikov, Andrey, Ph.D. (Nizhny Novgorod State University, Russia), Professor of Neuroscience and Mathematics and Statistics

Shlay, Anne, Ph.D. (University of Massachusetts-Amherst), Professor of Sociology

Simonds, Wendy, Ph.D. (City University of New York), Professor of Sociology

Sinnott, Megan, Ph.D. (University of Wisconsin, Madison), Associate Professor of Women’s, Gender, and Sexuality Studies

Smalls-Glover, Ciara, Ph.D. (University of Michigan), Assistant Professor of Psychology

Smirnova, Alexandra, Ph.D. (Kansas State University), Professor of Mathematics and Statistics

Smith, David, Ph.D. (University of Pennsylvania), Professor of Psychology

Smith, Gregory M., Ph.D. (University of Wisconsin, Madison), Professor of Communication

Smith, Jerry C., Ph.D. (University of North Carolina, Chapel Hill), Associate Professor of Chemistry

Smolinski, Reiner, Ph.D. (Pennsylvania State University), Professor of English

Snape, Jason, M.F.A. (Rochester Institute of Technology), Lecturer of Art and Design
Snell, Debra, M.S. (Georgia State University), Senior Lecturer of Applied Linguistics and English as a Second Language

Snow, Malinda, Ph.D. (Duke University), Associate Professor of English

Song, Chi-Sun K., Ph.D. (Georgia State University), Lecturer of Biology

Song, Wen Zhan, Ph.D. (Illinois Institute of Technology), Professor of Computer Science

Spring, Amy, M.A. (University of Washington), Assistant Professor of Sociology

Stanford, Ruth, M.F.A. (Carnegie-Mellon University), Associate Professor of Art and Design

Starrick, Amanda, M.A. (Arizona State University), Senior Lecturer of Applied Linguistics and English as a Second Language

Steffen, Charles G., Ph.D. (Northwestern University), Professor of History

Steigerwalt, Amy L., Ph.D. (University of California, Berkeley), Associate Professor of Political Science

Stewart, Faye, Ph.D. (Indiana University), Associate Professor of World Languages and Cultures

Stewart, Michael, Ph.D. (University of Illinois), Associate Professor of Mathematics and Statistics

Stockman, Mark I., D.Sc. (Institute of Automation and Electrometry of the Russian Academy of Sciences), Distinguished University Professor of Physics and Astronomy

Stokesbury, M. Leon, Ph.D. (Florida State University), Associate Professor of English

Stombler, Mindy, Ph.D. (Florida State University), Senior Lecturer of Sociology

Stroeva, Elina, Ph.D. (Moscow Chemical Technological Institute, Russia), Lecturer of Chemistry

Stuckey, Mary, Ph.D. (University of Notre Dame), Professor of Communication and Political Science

Sylvester, Jonathan, Ph.D. (Georgia Tech.), Lecturer of Biology

Subotic, Jelena, Ph.D. (University of Wisconsin), Associate Professor of Political Science

Suchke, Dara, M.A. (Georgia State University), Lecturer of Applied Linguistics and English as a Second Language

Sugarman, Matthew, M.F.A. (Montana State University), Professor of Art and Design

Sumner Lott, Marie Ph.D. (Eastman School of Music), Assistant Professor of Music

Sunderraman, Rajshekar, Ph.D. (Iowa State University), Professor of Computer Science and
Neuroscience

Swanson, Peter B., Ph.D. (University of Wyoming), Associate Professor of World Languages and Cultures

Tai, Phang-Cheng, Ph.D. (University of California, Davis), Regents’ Professor of Biology and Neuroscience

Talburt, Susan, Ph.D. (Vanderbilt University), Professor of Women’s, Gender, and Sexuality Studies

Taylor, Melissa Paige, M.S. (Georgia Institute of Technology), Assistant Professor of Art and Design

Thalken, Constance, M.F.A. (Yale University), Associate Professor of Art and Design

Thomas, Calvin, Ph.D. (University of Wisconsin, Milwaukee), Professor of English

Thompson, Robert S., Ph.D. (University of California, San Diego), Professor of Music

Thoms, Brian, Ph.D. (Cornell University), Associate Professor of Physics and Astronomy

Thornton, Judd, Ph.D. (Michigan State University), Assistant Professor of Political Science

Thota, Jyotsna, Ph.D. (University of Connecticut), Senior Lecturer of Chemistry

Throop, Elizabeth, M.G.D. (North Carolina State University), Associate Professor of Art and Design

Tims, Keith, Ph.D. (Georgia State University), Lecturer of Communication

Tindall, Natalie, Ph.D. (University of Maryland), Associate Professor of Communication

Tone, Erin McClure, Ph.D. (Emory University), Associate Professor of Psychology and Neuroscience

Torres, Germán, Ph.D. (University of Georgia), Associate Professor of World Languages and Cultures

Trask, Jeffrey, Ph.D. (Columbia University), Assistant Professor of History

Tullos, J. Kyle, Ph.D. (University of Georgia), Lecturer of Philosophy

Tully, Erin, Ph.D. (Emory University), Assistant Professor of Psychology

Turner-Livermore, Bethany L., Ph.D. (Emory University), Associate Professor of Anthropology

Turner, Jessica, Ph.D. (University of California, Irvine), Associate Professor of Psychology

Tusher, Chantal Positer, Ph.D. (Georgia State University), Senior Lecturer of Psychology

Tussey, Ethan, Ph.D. (University of California, Santa Barbara), Assistant Professor of Communication
Ulrich, Paul, Ph.D. (University of Delaware), Lecturer of Biology

Umoja, Akinyele, Ph.D. (Emory University), Professor and Chair of the Department of African-American Studies

Urquhart, Lela, Ph.D. (Stanford University), Assistant Professor of History

Van der Holst, Hendricus, Ph.D. (University of Amsterdam), Associate Professor of Mathematics and Statistics

Van Leeuwen, Neil, Ph.D. (Stanford University), Assistant Professor of Philosophy and Neuroscience

Vandewalker, David, D.M.A. (Boston University), Lecturer of Music

Vasquez, Pedro, Ph.D. (Emory University), Senior Academic Professional of Chemistry

Venet, Wendy, Ph.D. (University of Illinois), Professor of History

Vernick, Gordon, D.A. (University of Northern Colorado), Professor of Music

Vidakovic, Draga, Ph.D. (Purdue University), Professor of Mathematics and Statistics

Vincent, Nicole, Ph.D. (University of Adelaide), Associate Professor of Philosophy, Law, and Neuroscience

Visaggi, Christy, Ph.D. (North Carolina, Wilmington), Lecturer of Geosciences

Vollmer, Niklas, M.F.A. (University of California, San Diego), Associate Professor of Communication

von Korff, Joshua, Ph.D. (University of California, Berkeley), Assistant Professor of Physics and Astronomy

Voss, Paul J., Ph.D. (University of California, Riverside), Associate Professor of English

Walthall, Walter W., Ph.D. (State University of New York, Albany), Associate Professor of Biology and Neuroscience

Wang, Binghe, Ph.D. (University of Kansas), Regents’ Professor of Chemistry, Associate Dean for Natural and Computational Sciences, Georgia Research Alliance Eminent Scholar in Drug Discovery, Director of Center for Diagnostics and Therapeutics, and Co-director of the Center for Biotechnology and Drug Design

Wang, Danzhu, Ph.D. (Georgia State University), Lecturer of Chemistry

Wang, Gangli, Ph.D. (University of North Carolina, Chapel Hill), Associate Professor of Chemistry and Neuroscience

Wang, George Peng, Ph.D. (University of California, Berkeley), Professor and chair of Department of Chemistry; Georgia Research Alliance Eminent Scholar in Chemical Glycobiology
Wang, Ruili, Ph.D. (Georgia State University), Lecturer of Physics and Astronomy

Washburn, David A., Ph.D. (Georgia State University), Professor of Psychology and Neuroscience and Director of the Language Research Center

Way, John, Ph.D. (Yale University), Assistant Professor of History

Weast, Wade, D.M.A. (SUNY-Stony Brook), Professor and Director of School of Music; Associate Dean for Fine Arts

Weber, Irene, D., Ph.D. (Oxford University, Oxford, England), Regents’ Professor of Biology, Chemistry, and Neuroscience

Wedeman, Andrew, Ph.D. (University of California, Los Angeles), Professor of Political Science

Weeks, Michael, Ph.D. (University of Southwestern Louisiana), Associate Professor of Computer Science and Neuroscience

Weigle, Sara Cushing, Ph.D. (University of California, Los Angeles), Professor of Applied Linguistics and English as a Second Language

Weiskopf, Daniel, Ph.D. (Washington University), Associate Professor of Philosophy and Neuroscience

Welborn, Daniel, Ph.D. (University of Southern Mississippi), Assistant Professor of Music

Welch, Richard, Ph.D. (University of Denver), Senior Lecturer of Communication

West, Christina, M.F.A. (New York State College), Associate Professor of Art and Design

West, Elizabeth, Ph.D. (Emory University), Professor of English

Weyermann, Andrea, Ph.D. (Georgia State University), Senior Lecturer of Psychology

Weyhenmeyer, James, Ph.D. (Indiana University), Professor of Neuroscience and Vice President for Research and Economic Development

Wharton, Robin, Ph.D. (University of Georgia), Lecturer of English

White, Cassandra, Ph.D. (Tulane University), Associate Professor of Anthropology

White, Michael A., Sr., M. Arch. (Georgia Institute of Technology), Associate Professor and Director of the Welch School of Art and Design

White, Russell, Ph.D. (University of California, Los Angeles), Associate Professor of Physics and Astronomy

Wilczynski, Walter, Ph.D. (University of Michigan-Ann Arbor), Professor of Neuroscience
Wilding, Nick, Ph.D. (European University Institute, Fiesole, Italy), Associate Professor of History

Wilkin, Holley A., Ph.D. (University of Southern California), Associate Professor of Communication

Williams, Ann, Ph.D. (University of Michigan), Associate Professor of Communication

Williams, Frank L’Engle, Ph.D. (University of Massachusetts, Amherst), Associate Professor of Anthropology

Williamson, Rebecca, Ph.D. (Stanford University), Associate Professor of Psychology

Wilson, Adam, Ph.D. (University of California), Assistant Professor of Biology

Wilson, Eric, Ph.D. (Emory University), Associate Professor of Philosophy

Wilson, John, Ph.D. (Georgia State University), Senior Academic Professional of Physics and Astronomy

Wilson, Kathryn, Ph.D. (University of Pennsylvania), Associate Professor of History

Wilson, William David, Ph.D. (Purdue University), Regents' Professor of Chemistry

Winkler, Carol K., Ph.D. (University of Maryland), Professor of Communication and Associate Dean for the Humanities

Wrenn, Diana, M.A. (Georgia State University), Lecturer of Applied Linguistics and English as a Second Language

Wright, Eric, Ph.D. (Indiana University, Bloomington), Professor of Sociology and Public Health

Wsol, Michael, M.Arch. (University of Virginia), Assistant Professor of Art and Design

Xiao, Yuanhui, Ph.D. (University of Georgia), Assistant Professor of Mathematics and Statistics

Xu, Bin, Ph.D. (University of North Carolina at Chapel Hill), Senior Academic Professional of Chemistry

Xu, Hao, Ph.D. (Scripps Research Institute), Assistant Professor of Chemistry

Xue, Bingzhong, Ph.D. (University of Tennessee), Associate Professor of Biology

Yang, Jenny, Ph.D. (Florida State University), Distinguished University Professor of Chemistry and Neuroscience

Yao, Yongwei, Ph.D. (University of Kansas), Associate Professor of Mathematics and Statistics

Ye, Xiaojing, Ph.D. (University of Florida), Assistant Professor of Mathematics and Statistics

Yin, Jun, Ph.D. (University of California, Berkeley), Associate Professor of Chemistry
Young, Daniel, Ph.D. (University of California), Assistant Professor of Political Science

Young, Jeffrey, Ph.D. (Emory University), Senior Lecturer of History

Zelikovskiy, Aleksandr, Ph.D. (Institute of Mathematics of the Byelorussian Academy of Sciences), Distinguished University Professor of Computer Science

Zellars, Malcolm, Ph.D. (Georgia State University), Senior Lecturer of Biology

Zhan, Heying, Ph.D. (University of Kansas), Associate Professor of Sociology

Zhang, Jing, Ph.D. (Harvard University), Assistant Professor of Mathematics and Statistics

Zhang, Yanqing, Ph.D. (University of South Florida), Professor of Computer Science and Neuroscience

Zhao, Yi, Ph.D. (Rutgers University), Associate Professor of Mathematics and Statistics

Zhao, Yichuan, Ph.D. (Florida State University), Professor of Mathematics and Statistics and Neuroscience

Zhong, Changyong, Ph.D. (Vanderbilt University), Senior Lecturer of Mathematics and Statistics

Zhu, Ying, Ph.D. (George Mason University), Associate Professor of Computer Science and Neuroscience

College of Education and Human Development Faculty

Abbott, Laura, M.S. (Georgia State University), Clinical Instructor of Kinesiology and Health

Albers, Margaret M., Ph.D. (Indiana University), Professor of Middle and Secondary Education

Alberto, Paul A., Ph.D. (Georgia State University), Dean and Regent’s Professor of Educational Psychology, Special Education, and Communication Disorders

Ari, Omer, Ph.D. (Georgia State University), Limited Term Clinical Assistant Professor of Early Childhood and Elementary Education

Ariail, Mary, Ph.D. (University of Georgia), Associate Chair and Associate Professor of Middle and Secondary Education

Ashby, Jeffrey S., Ph.D. (Pennsylvania State University), Professor of Counseling and Psychological Services

Bayazit, Nermin, Ph.D. (Florida State University), Clinical Assistant Professor of Middle and Secondary Education
Beavers, Gracie, Ph.D. (University of Florida), Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Behizadeh, Nadia, Ph.D. (Emory University), Assistant Professor of Middle and Secondary Education

Benson, Gwendolyn, Ph.D. (University of Kansas), Associate Dean for School, Community, and International Partnerships and Clinical Associate Professor of Educational Psychology, Special Education, and Communication Disorders

Berry, Jami, Ph.D. (Georgia State University), Clinical Assistant Professor of Educational Policy Studies

Bingham, Gary, Ph.D. (Purdue University), Associate Professor of Early Childhood and Elementary Education

Boden, Lauren, M.S. (Georgia State University), Limited Term Clinical Instructor of Educational Psychology, Special Education, and Communication Disorders

Bohan, Chara, Ph.D. (University of Texas, Austin), Associate Professor of Middle and Secondary Education

Boyles, Deron R., Ph.D. (Vanderbilt University), Professor of Educational Policy Studies

Brack, Gregory, Ph.D. (Indiana University, Bloomington), Associate Professor of Counseling and Psychological Services

Brandon, Leslie Jerome, Ph.D. (University of Illinois, Urbana-Champaign), Professor of Kinesiology and Health

Bridges-Rhoads, Sarah, Ph.D. (University of Georgia), Assistant Professor of Early Childhood and Elementary Education

Brison, Natasha, J.D. (University of Georgia School of Law), Clinical Assistant Professor of Kinesiology and Health

Buras, Kristen L., Ph.D. (University of Wisconsin, Madison), Associate Professor of Educational Policy Studies

Burns, Janet L., Ph.D. (Georgia State University), Clinical Associate Professor of Middle and Secondary Education

Calandra, Brendan D., Ph.D. (University of South Florida), Associate Professor of Learning Technologies

Carter, Patricia, Ph.D. (University of Cincinnati), Clinical Associate Professor of Educational Policy Studies

Chahine, Iman, Ph.D. (University of Minnesota), Assistant Professor of Middle and Secondary Education
Chang, Catherine, Ph.D. (University of North Carolina, Greensboro), Professor of Counseling and Psychological Services

Chilungu, E. Namisi, Ph.D. (University at Buffalo), Clinical Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Choi, Jayoung, Ph.D. (Georgia State University), Clinical Assistant Professor of Middle and Secondary Education

Cianfrone, Beth A., Ph.D. (University of Florida), Associate Professor of Kinesiology and Health

Cohen, Jonathan, Ph.D. (University of Virginia), Assistant Professor of Learning Technologies

Commander, Nannette, Ph.D. (Georgia State University), Professor of Educational Psychology and Special Education

Crisp, Thomas, Ph.D. (Michigan State University), Assistant Professor of Early Childhood and Elementary Education

Cross, Stephanie Behm, Ph.D. (Virginia Polytechnic Institute and State University), Assistant Professor of Middle and Secondary Education

Curlette, William Lynch, Ph.D. (Syracuse University), Chair and Professor of Educational Policy Studies and Counseling and Psychological Services

Davis, Don E., Ph.D. (Virginia Commonwealth University), Assistant Professor of Counseling and Psychological Services

DeBlare, Cirleen, Ph.D. (University of Florida), Assistant Professor of Counseling and Psychological Services

Demir, Abdulkadir, Ph.D. (University of Missouri, Columbia), Associate Professor of Middle and Secondary Education

Dew, Brian J., Ph.D. (The University of North Carolina), Chair and Associate Professor of Counseling and Psychological Services

Dispenza, Franco, Ph.D. (Georgia State University), Assistant Professor of Counseling and Psychological Services

Dixon, Andrea, Ph.D. (University of North Carolina, Greensboro), Associate Professor of Counseling and Psychological Services

Dooley, Caitlin, Ph.D. (University of Texas, Austin) Associate Professor of Early Childhood and Elementary Education

Doyle, James Andrew, Ph.D. (The Ohio State University), Associate Professor of Kinesiology and Health
Earl, Chantee, Ph.D. (University of Pittsburgh), Clinical Assistant Professor of Middle and Secondary Education

Easterbrooks, Susan R., Ed.D. (University of Georgia), Regents’ Professor of Educational Psychology, Special Education, and Communication Disorders

Ellis, Rebecca, Ph.D. (University of Florida), Associate Professor of Kinesiology and Health

Emerson, Judith, Ph.D. (University of Southern Mississippi), Clinical Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Esposito, Jennifer, Ph.D. (Syracuse University), Associate Professor of Educational Policy Studies

Feinberg, Joseph, Ph.D. (University of Georgia), Associate Professor of Middle and Secondary Education

Fernandes Williams, Rhina, Ph.D. (Emory University), Clinical Assistant Professor of Early Childhood and Elementary Education

Fiore, Rachel, Ph.D. (John Hopkins Medical Institutions), Limited Term Clinical Assistant Professor of Early Childhood and Elementary Education

Fisher, Teresa, Ph.D. (Georgia State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Flint, Amy, Ph.D. (University of California, Berkeley), Professor of Middle and Secondary Education

Fortner, Kevin, Ph.D. (Georgia Institute of Technology and Georgia State University), Assistant Professor of Educational Policy Studies

Fournillier, Janice, Ph.D. (University of Georgia), Associate Professor of Educational Policy Studies

Fox, Dana L., Ph.D. (University of Missouri, Columbia), Associate Professor of Middle and Secondary Education

Fredrick, Laura D., Ph.D. (Georgia State University), Chair and Professor of Educational Psychology, Special Education and Communication Disorders

Gallagher, Peggy L., Ph.D. (University of North Carolina, Chapel Hill), Professor of Educational Psychology, Special Education, and Communication Disorders

Geil, Mark, Ph.D. (Ohio State University), Associate Professor of Kinesiology and Health

Gilbride, Dennis, Ph.D. (University of Southern California), Professor of Counseling and Psychological Services

Goerger, Benjamin, Ph.D. (University North Carolina, Chapel Hill), Assistant Professor of Kinesiology and Health
Greenberg, Daphne, Ph.D. (City University of New York), Professor of Educational Psychology, Special Education, and Communication Disorders

Greene, Barbara J., M.Ed. (Georgia State University), Clinical Instructor of Kinesiology and Health

Gurewicz, Rachael, Ph.D., (West Virginia University), Associate Professor of Kinesiology and Health

Harmon, Stephen W., Ed.D. (University of Georgia), Professor of Learning Technologies

Hart, Lynn C., Ph.D., (Georgia State University), Professor of Early Childhood and Elementary Education and Mathematics and Statistics

Hill, Joseph A., Ph.D. (University of Georgia), Clinical Assistant Professor of Counseling and Psychological Services

Holbrook, Teri, Ph.D. (University of Georgia), Associate Professor of Early Childhood and Elementary Education

Houchins, David E., Ph.D. (University of Florida), Professor of Educational Psychology, Special Education, and Communication Disorders

Ingalls, Christopher P., Ph.D. (Texas A&M University), Professor of Kinesiology and Health and Physical Therapy

Irving, Miles A., Ph.D. (University of California, Santa Barbara), Associate Professor of Educational Psychology, Special Education, and Communication Disorders

Jolivette, Kristine, Ph.D. (Vanderbilt University), Professor of Educational Psychology, Special Education, and Communication Disorders

Junor-Clarke, Pier., Ph.D. (University of Toronto), Clinical Associate Professor of Middle and Secondary Education

Kahrs, James, Ed.D. (University of Georgia), Clinical Assistant Professor of Educational Policy Studies and Director of the Principles Center

Kaufmann, Jodi, Ph.D. (University of Georgia), Associate Professor of Educational Policy Studies

Kesner, John E., Ph.D. (The Ohio State University), Associate Professor of Early Childhood and Elementary Education

King, Joyce, Ph.D. (Stanford University), Professor of Educational Policy Studies and Benjamin E. Mays Endowed Chair

Kinuthia, Wanjira, Ph.D. (University of South Alabama), Associate Professor of Learning Technologies

Kruger, Ann C., Ph.D. (Emory University), Associate Professor of Educational Psychology, Special
Education, and Communication Disorders

Kurumada, Katharine, Ph.D. (Georgia State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Kwon, Kyong-Ah, Ph.D. (Purdue University), Associate Professor of Early Childhood and Elementary Education

Lakes, Richard D., Ph.D. (The Ohio State University), Professor of Educational Policy Studies

Laures-Gore, Jacqueline, Ph.D. (University of Wisconsin, Madison), Associate Professor of Educational Psychology, Special Education, and Communication Disorders

Lederberg, Amy R., Ph.D. (University of Minnesota), Regents’ Professor of Educational Psychology, Special Education, and Communication Disorders

Lemons-Smith, Shonda, Ph.D. (Indiana University), Clinical Assistant Professor of Early Childhood and Elementary Education

Leroux, Audrey, Ph.D. (University of Texas, Austin), Assistant Professor of Educational Policy Studies

Levy, Diane, Ph.D. (Georgia State University), Clinical Assistant Professor of Counseling and Psychological Services

Lewis, Tisha, Ph.D. (University of Albany, SUNY), Assistant Professor of Middle and Secondary Education

Li, Hongli, Ph.D. (Pennsylvania State University), Assistant Professor of Educational Policy Studies

Linens, Shelley, Ph.D. (Virginia Commonwealth University), Assistant Professor of Kinesiology and Health

Lund, Jacalyn, L., Ph.D. (The Ohio State University), Chair and Professor of Kinesiology and Health

Lynch, Heather, Ph.D. (Georgia State University), Limited Term Clinical Assistant Professor in Early Childhood and Elementary Education

Many, Joyce E., Ph.D. (Louisiana State University), Associate Dean of Undergraduate Programs and Educator Preparation and Professor of Middle and Secondary Education

Matthews, Ramona W., Ph.D. (University of Georgia), Professor of Early Childhood and Elementary Education

May, Laura, Ph.D. (University of Texas, Austin), Assistant Professor of Early Childhood and Elementary Education

McGrail, Ewa, Ph.D. (Syracuse University), Associate Professor and Middle and Secondary Education
McKeown, Debra, Ph.D. (Vanderbilt University), Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

McKinney, Tracy, Ph.D. (University of Central Florida), Clinical Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Metzler, Michael, Ph.D. (The Ohio State University), Professor of Kinesiology and Health

Meyers, Barbara, Ed.D. (Temple University), Chair and Associate Professor of Early Childhood and Elementary Education

Meyers, Joel, Ph.D. (University of Texas), Regents’ Professor of Counseling and Psychological Services

Meyers, Laura, E., Ph.D. (Purdue University), Clinical Assistant Professor of Early Childhood Education

Muhummad, Gholnecsar, Ph.D. (University of Illinois, Chicago), Assistant Professor of Middle and Secondary Education

O'Rourke, Colleen M., Ph.D. (Wayne State University), Associate Professor of Educational Psychology, Special Education, and Communication Disorders

Orr, Jonathan, Ph.D. (University of New Orleans), Clinical Assistant Professor of Counseling and Psychological Services

Oshima, T. Chris, Ph.D. (University of Florida), Professor of Educational Policy Studies

Otis, Jeffrey, Ph.D. (Virginia Polytechnic Institute and State University), Assistant Professor of Kinesiology and Health

Patterson, DaShaunda, Ph.D. (Georgia State University), Clinical Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Patton-Terry, Nicole, Ph.D. (Northwestern University), Associate Professor of Educational Psychology, Special Education, and Communication Disorders

Perkins, Catherine P., Ph.D. (Georgia State University), Clinical Assistant Professor of Counseling and Psychological Services

Pitts, Brenda, Ed.D. (University of Alabama), Professor of Kinesiology and Health

Puvirajah, Anton, Ph.D. (Wayne State University), Assistant Professor of Middle and Secondary Education

Rambow, Mary W., M.A. (University of Kansas), Clinical Instructor of Educational Psychology, Special Education, and Communication Disorders

Renken, Maggie, Ph.D. (University of Wyoming), Assistant Professor of Educational Psychology, Special
Education, and Communication Disorders

Rice, Kenneth, Ph.D. (University of Notre Dame), Matheny Endowed Chair and Professor of Counseling and Psychological Services

Rice, Robert, Ph.D. (Georgia State University), Clinical Assistant Professor of Counseling and Psychological Services

Roach, Andy, Ph.D. (University of Wisconsin, Madison), Associate Professor of Counseling and Psychological Services and Public Health, and Associate Director of the Center for Leadership in Disability (CLD)

Sauers, Nick, Ph.D. (Iowa State University), Assistant Professor of Educational Policy Studies

Saxton, Ruth, Ph.D. (University of California, Berkeley), Clinical Associate Professor of Early Childhood and Elementary Education

Schafer, Nancy, Ph.D. (Georgia State University), Clinical Assistant Professor of Early Childhood and Elementary Education

Schober-Peterson, Debra L., Ph.D. (University of Illinois, Urbana-Champaign), Clinical Associate Professor of Educational Psychology, Special Education, and Communication Disorders

Schwartz, Renee, Ph.D. (Oregon State University), Associate Professor of Middle and Secondary Education

Shapiro, Deborah, Ph.D. (Indiana University), Associate Professor of Kinesiology and Health

Shoffner, Mary B., Ph.D. (Kent State University), Associate Professor of Learning Technologies

Smith, Stephanie, Z., Ph.D. (University of Wisconsin, Madison), Associate Professor of Early Childhood and Elementary Education

Stinson, David, W., Ph.D. (Georgia State University), Associate Professor of Middle and Secondary Education

Stuckey, Adrienne, M.A.Ed. (Virginia Polytechnic Institute and State University), Limited Term Clinical Instructor of Educational Psychology, Special Education, and Communication Disorders

Sullivan, Caroline, Ph.D. (University of Texas, Austin), Clinical Assistant Professor of Middle and Secondary Education

Sumpter, Tricia, Ed.D. (University of Georgia), Limited Term Clinical Assistant Professor of Early Childhood and Elementary Education

Swafford, K. Journey, M.Ed. (University of Tennessee), Associate Project Director in Early Childhood and Elementary Education
Swar, Susan, L., Ph.D. (University of Alabama), Associate Professor of Early Childhood and Elementary Education

Tanguay, Carla, Ed.S. (Georgia State University), Clinical Instructor of Early Childhood and Elementary Education

Towson, Jacqueline, M.S. (University of Texas, Dallas), Limited Term Clinical Instructor of Educational Psychology, Special Education, and Communication Disorders

Thomas, Christine D., Ph.D. (Georgia State University), Professor of Middle and Secondary Education

Thomas, Sharren, Ph.D. (University of Georgia), Limited Term Clinical Assistant Professor of Middle and Secondary Education

Thompson, Walter R., Ph.D. (The Ohio State University), Associate Dean of Graduate Studies and Research and Regents’ Professor of Kinesiology and Health and Nutrition

Tinker Sachs, Gertrude, Ph.D. (University of Toronto), Chair and Associate Professor of Middle and Secondary Education

Truscott, Diane M., Ph.D. (State University of New York, Buffalo), Associate Professor of Early Childhood and Elementary Education

Truscott, Stephen D., Ph.D. (State University of New York), Associate Professor of Counseling and Psychological Services

Tullis, Christopher, Ph.D. (The Ohio State University), Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

van Leer, Eva, Ph.D. (University of Wisconsin), Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Varjas, Kristen, Psy.D. (State University of New York), Professor of Counseling and Psychological Services

Wallen, Stacey, Ph.D. (The Ohio State University), Clinical Assistant Professor of Educational Psychology, Special Education, and Communication Disorders

Wang, Yinying, Ph.D. (University of Cincinnati), Assistant Professor of Educational Policy Studies

Washington, Julie, Ph.D. (University of Michigan), Professor of Educational Psychology, Special Education, and Communication Disorders

Williams, Brian, Ph.D. (Emory University), Clinical Assistant Professor of Early Childhood Education and Director of the Alonzo A. Crim Center for Urban Educational Excellence

Williams, Shannon, Ph.D. (University of Georgia), Clinical Assistant Professor of Kinesiology and Health
Byrdine F. Lewis School of Nursing and Health Professions Faculty

Ari, Arzu, Ph.D. (Georgia State University), Assistant Professor of Respiratory Therapy

Aycock, Dawn, Ph.D (University of Alabama), Assistant Professor of Nursing

Bates, Teresa, M.N. (Medical College of Georgia), Clinical Instructor of Nursing

Benardot, Dan, Ph.D. (Cornell University), Professor of Nutrition

Butler, Andrew, Ph.D (University of Iowa), Associate Dean of Research, Interim Director of the Physical Therapy Department, and Professor of Physical Therapy

Campbell, Kimberly, MSN (Northern Kentucky University), Clinical Instructor of Nursing

Casseus, Karis, MSN (Mercer University), Clinical Assistant Professor of Nursing

Chen, Yu-ping, Sc.D. (Boston University), Assistant Professor of Physical Therapy

Clark, Patricia, Ph.D. (University of Rochester), Professor of Nursing

Cranford, Joan, Ed.D (University of Georgia), Interim Director and Clinical Associate Professor of Nursing

Cranwell-Bruce, Lisa, M.S. (Georgia State University), Clinical Instructor of Nursing
DeMars, Laura, MS (Mercer University), Instructor in Nursing

Eades, Lee, D.N.P (Georgia Southern University), Clinical Assistant Professor of Nursing

Eastman, Vedica, M.S.N. (Duke University), Clinical Instructor of Nursing

Evans, Katherine, DNP (Vanderbilt University), DNP Coordinator and Clinical Assistant Professor of Nursing

Farrell, Bradley, PhD (Georgia Institute of Technology), Assistant Professor of Physical Therapy

Florman, Terri M.S. (Georgia State University), Clinical Instructor of Nursing

Garcia, Jodan, D.P.T (A.T Still University), Assistant Department Chair and Clinical Assistant Professor of Physical Therapy

Gardenhire, Douglas S., Ed.D (University of Georgia), Interim Chair and Clinical Instructor of Respiratory Therapy

Goodfellow, Lynda, Ed.D, (University of Georgia), Professor of Respiratory Therapy and Associate Dean of Academic Affairs

Gordon, Paula, M.S. (Georgia State University), RN-BS and Undergraduate Program Coordinator and Clinical Instructor of Nursing

Gore, Jane, Ph.D (Georgia State University), Clinical Assistant Professor of Physical Therapy

Grantham, Carol A., Ph.D. (University of Michigan), Clinical Assistant Professor of Nursing

Helvig, Ashley, Ph.D (Georgia State University), Assistant Professor of Nursing

Henes, Sarah, Ph.D (East Carolina University) Assistant Professor of Nutrition

Hopkins, Barbara Lee, M.M.Sc. (Emory University), Clinical Assistant Professor of Nutrition

Horne, Eva M., M.N. (Emory University), M.S. Coordinator and Clinical Assistant Professor of Nursing

Huggins, Carla, D.P.T (Temple University), Clinical Assistant Professor of Physical Therapy

Johnson, Jessica, M.S (Georgia State University), Clinical Director and Coordinate Program Director of Nutrition

Kelley, Susan J., Ph.D. (Boston College), Professor of Nursing and Director, Project Health Grandparents

Killian, Sarah M., M.S. (Georgia State University), Clinical Assistant Professor of Nursing

Kirkendoll, Kenya D., M.S.N. (Emory University), Clinical Assistant Professor of Nursing
Kropf, Nancy P, PhD (Virginia Commonwealth University, Dean and Professor, Byrdine F Lewis School of Nursing and Health Professions

Long, J. Lynn, M.S.N (Georgia State University) Clinical Instructor of Nursing

Lorio, Ann, D.P.T (Alabama State University), Clinical Assistant Professor of Physical Therapy

Marcus, Jessica, M.S.N (Georgia State University) Clinical Instructor of Nursing

McCrory, Megan, Ph.D (University of California, Davis) Associate Professor of Nutrition

Melton, Tamara, M.S. (Georgia State University), Program Director, Clinical Health Informatics and Clinical Instructor

Middleton, Spencer, M.S.W (Howard University), Academic Professional

Milner, John, M.S.N. (Duke University), Instructor/Informatics Specialist of Nursing

Mo, Huanbiao, PhD (University of Wisconsin-Madison), Chair and Professor of Nutrition

Moloney, Margaret, Ph.D. (Georgia State University), Associate Professor of Nursing Emeritus

Morelli, Kimberly, Ph.D (Emory University) Clinical Assistant Professor of Physical Therapy

Murray, Robert “Brent”, M.S. (Georgia State University), Clinical Assistant Professor of Respiratory Therapy

Nelson, Michelle, M.S. (Wagner College), Clinical Assistant Professor of Nursing

Nucci, Anita, Ph.D. (University of Pittsburgh), Assistant Professor and Graduate Program Coordinator of Nutrition

Nunez, Nomeli, PhD (Washington State University), Associate Professor of Nutrition

Plitnick, Katherine R., Ph.D. (University of Florida), Clinical Assistant Professor of Nursing

Polovich, Martha, Ph.D (Georgia State University), Ph.D Coordinator and Clinical Associate Professor of Nursing

Porter, Holly, MS (Georgia State University, Clinical Instructor of Health Informatics

Roseberry, Beverly, M.S. (Georgia State University), Clinical Instructor of Nursing

Schwarze, Lois, MSN (University of Alabama at Birmingham), Instructor of Nursing

Sims, Traci T., M.S. (Georgia State University), Clinical Instructor of Nursing

1.952
Spratling, Regena, Ph.D (Georgia State University), Assistant Professor of Nursing

Thompson, A. Deon L., Ph.D. (Wake Forest University), Clinical Assistant Professor of Physical Therapy

Thompson, Walter, Ph.D (The Ohio State University), Regents Professor joint appointment with the Department of Kinesiology and Health
